blowpipe[1], *n.* 3†. A blast-pipe or blower-pipe; hence the steam-pipe for a steam-blast.—**Blow-pipe bamboo, furnace.** See ★*bamboo*, ★*furnace*.—**Oxyacetylene blowpipe**, a piece of apparatus similar in general character to the oxyhydrogen blowpipe, but serving to burn a mixture of oxygen with acetylene instead of hydrogen, and thus producing a much higher temperature. Special precautions against explosion are necessary in the construction of the instrument, which has been found valuable in the autogenic soldering of iron and steel.

blow-torch (blō'tôrch), *n.* An apparatus for applying heat to a small area; a small portable heater. See *gasolene* ★*torch*.

Bloxaming (blok'sam-ing), *n.* A method of obtaining a smoothed series or smooth curve from a series of irregular observed values and thus detecting any regular periodicity that may be concealed in those values: introduced into English meteorology by John C. Bloxam in 1858, but used in modified forms by many others previously. Bloxam adopted the rule that the mean value of 9 or 11 consecutive days gives the normal value for the central date more accurately than the identical value observed on that date. If, therefore, one desires the normal mean temperatures for a series of days, he takes the sums and means for consecutive decads, 1–10, 2–11, 3–12, etc. The dates for these mean values are, therefore, for the first mean $5\frac{1}{2}$, for the second mean $6\frac{1}{2}$, etc. Having carried this process through the whole year, the resulting series of mean decadal daily values is treated again in the same way, so that the new decadal values belong to dates that are whole numbers, such as 5, 6, etc. This process is repeated until the resulting values constitute regularly increasing and decreasing quantities for dates that represent whole numbers, and accidental irregularities are smoothed out. Bloxam states that by repeating the process twenty-two times the annual curve of temperature at Newport, England, was reduced to one line of constant ascent and one of common descent. Usually two or four repetitions are sufficient for climatological studies; but the great labor involved in the process, and the absence of any clearly defined theoretical basis, make the harmonic analysis preferable to this numerical method.

B. L. S. An abbreviation of *Bachelor of Library Science*.

blubber-guy (blub'ėr-gī), *n.* A device, peculiar to a whaling-vessel, consisting of a stout rope secured between the two forward masts, having a tackle hooked into it: employed for turning the whale over as it is stripped of its blubber.

blubber-hook (blub'ėr-hůk), *n.* In *whaling*, a hook used to remove and handle a whale's blubber.

In boarding the *blubber-hook* is detached.

Fisheries of the U. S., ser. 5, II. 28.

blue. I. *a.*—**Blue ash, baby.** See ★*ash*[1], ★*baby*.—**Blue band**, a band of ice in a glacier which owes its blue color to the absence of air-bubbles. *Dana*, Manual of Geol., p. 243.—**Blue butter.** Same as *mercurial ointment* (which see, under *ointment*).—**Blue** ★**calx**, ★**dragon**, ★**heat.** See the nouns.—**Blue iron earth.** See *vivianite*.—**Blue lead.** See ★*lead*[2].—**Blue line**, a bluish discoloration of the edge of the gums present in chronic lead-poisoning.—**Blue oil, oxid, powder, silver.** See ★*oil*, etc.—**Blue water**, the deep sea.—**Blue-yellow zone.** See ★*zone*.

II. *n.* 10. In *archery*: (*a*) The third circle of the target, which is now usually colored blue. See *target*. (*b*) An arrow which hits this circle; a hit in the blue. By the present method of scoring, such a hit counts 5.—**Acetin blue.** Same as spirit-soluble *induline*.—**Acid alizarin blue**, a mordant acid coal-tar color derived from anthracene. It is rendered extremely fast when subjected to an after-chroming.—**Acid blue.** See ★*acid-blue*.—**Alizarin blue**, a mordant dyestuff derived from anthracene, which dyes chromium mordanted wool a very fast blue. It is a di-hydroxy-anthraquinone-betaquinoline, and is sold in the form of a paste.—**Alizarin blue powder**, a sulphonic-acid derivative of alizarin blue.—**Alizarin indigo blue**, a mordant dyestuff derived from anthracene. It is the sodium bisulphite compound of penta- and tetra-hydroxy anthraquinone-quinoline. With a chromium mordant it produces a color similar to indigo blue.—**Alpine blue**, an acid coal-tar color of the triphenyl-methane-carbinol sulphonic-acid type.—**Azindone blue.** Same as ★*indamine*.—**Azine blue.** Same as *spirit-soluble induline*.—**Azodiphenyl blue.** Same as *spirit-soluble induline*.—**Azonavy blue.** Same as *azo* ★*black-blue*.—**Azophor blue.** Same as *dianisidine* ★*blue*.—**Basel blue**, a name given to two basic coal-tar colors of the azonium chlorid type, of similar constitution. They give a bright blue.—**Basel blue S**, an acid color produced by the sulphonation of Basel blue.—**Bengal blue.** (*a*) Same as ★*benzo-azurine*. (*b*) A name sometimes given to water-soluble induline.—**Bengal blue S.** Same as ★*benzo-azurine*.—**Benzidine blue**, a direct cotton coal-tar color similar to benzo-azurine. [Now obsolete.]—**Benzo-pure blue.** Same as *diamine* ★*sky-blue*.—**Benzyl blue**, a basic coal-tar color of the triphenyl-methane type: but little used.—**Brilliant cotton blue.** Same as *Bavarian* ★*blue*.—**Capri blue**, a basic coal-tar color of the oxazin type which dyes tannin-mordanted cotton a bluish green.—**Celestine blue**, a mordant coal-tar color of the oxazin type, derived from gallocyanine. It dyes chromium-mordanted wool a bright blue. Same as ★*coreine 2R*.—**Chicago blue**, the name given to several direct cotton coal-tar colors of the diazo type, derived from benzidine, toluidine, or dianisidine. They dye unmordanted cotton bright blues in a salt bath.—**Chinoline blue.** Same as *quinoline blue*.—**Chlorazol blue**, a direct cotton coal-tar color of the diazo type, derived from dianisidine, which dyes unmordanted cotton blue in a salt bath. It is very fast when after-treated with copper sulphate.—**Cobalt ultramarine blue**, one of the cobalt blues.—**Columbia blue R** and **G**, direct cotton coal-tar colors of the diazo type, derived from benzidine: similar to the Chicago blues. They dye unmordanted cotton in a salt bath, and are well suited for the dyeing of cotton-and-wool union goods.—**Columbia fast blue**, a dye similar to ★*Columbia blue R* and *G*.—**Cresyl blue**, a basic coal-tar color of the oxazin type but of uncertain constitution. It dyes tannin-mordanted cotton a bright blue.—**Cryogen blue**, a coal-tar color of the sulphid type, of unpublished constitution, which dyes unmordanted cotton blue in a salt bath.—**Cyanol blue**, an acid coal-tar color related to triphenyl-methane. It dyes wool and silk a remarkably bright and pure blue in an acid bath. Also called *acid-blue*.—**Delphin blue**, a mordant coal-tar color of the oxazin type. It dyes chromium-mordanted wool a blue resembling indigo which is very fast to light and milling: also used in calico-printing.—**Diamine blue B, 2B, 3B, BX, 3R, RW**, etc., names applied to certain direct cotton coal-tar colors of the diazo type, derived from benzidine or toluidine. They dye unmordanted cotton various hues of blue in a neutral salt bath: similar to the benzo-blues.—**Diamine blue 6G**, a direct cotton coal-tar color of the diazo type, derived from diazotized β-naphthylamine disulphonic acid. It dyes unmordanted cotton blue in a salt bath.—**Diamine brilliant blue**, a direct cotton coal-tar color of the diazo type, derived from dianisidine. In a salt bath it dyes unmordanted cotton a blue resembling indigo.—**Diamine new blue G** and **R**, direct cotton coal-tar colors which dye unmordanted cotton a dull blue in an alkaline salt bath, and unmordanted wool blue or dull blue in a slightly acid salt bath.—**Diamine pure blue.** Same as *diamine* ★*sky-blue*.—**Dianil blue**, a direct cotton coal-tar color of the diazo type which dyes unmordanted cotton blue in a salt bath.—**Dianisidine blue**, a reddish-blue ingrain color of the insoluble azo type. It is formed when cotton material prepared with sodium β-naphtholate is passed through a cold solution or printed with a cold paste of diazotized dianisidine in the presence of a copper salt. It is fast to washing and fairly fast to light and chlorin.—**Diazin blue.** Same as *indoin* ★*blue*.—**Diazo blue**, a direct cotton coal-tar color of the diazo type. It dyes unmordanted cotton in a salt bath, but for the best results a subsequent diazotizing and developing is necessary.—**Diphenyl blue B, 2G**, and **2R**, direct cotton coal-tar colors of unpublished constitution which dye unmordanted cotton blue in a salt bath.—**Direct blue B, 2BX**, and **3BX**, direct cotton coal-tar colors of the diazo type, derived from dianisidine. They dye unmordanted cotton blue in an alkaline bath.—**Direct blue R**, a direct cotton coal-tar color of the diazo type, derived from toluidine. It dyes unmordanted cotton violet-blue in a salt bath.—**Electric blue**, a trade name for a light, greenish blue.—**Erie blue**, a direct cotton coal-tar color which dyes unmordanted cotton blue in a salt bath. An after-treatment with copper sulphate renders the blue faster but duller.—**Fast marine blue GM, MM**, and **RM.** Same as the *new* ★*blues*.—**Fast navy blue BM, G, GM, MM, R**, and **RM.** Same as the *new* ★*blues*.—**Fast neutral blue**, a basic coal-tar color of the azonium chlorid type which dyes tannin-mordanted cotton blue.—**Fine blue.** Same as *spirit-blue*.—**Flown blue.** Same as ★*flow-blue*.—**Gallamine blue**, a mordant coal-tar color of the oxazin type. It is an amide of gallocyanine, and dyes chromium-mordanted wool blue: also used in calico-printing.—**Gentian blue.** Same as *spirit-blue*.—**Glycin blue**, a direct cotton coal-tar color of the diazo type, derived from benzidine sulphone. It dyes unmordanted cotton blue in a soap bath.—**Helgoland blue**, a direct cotton coal-tar color which dyes unmordanted cotton blue in a salt bath.—**Hessian blue.** Same as *spirit-blue*.—**Hoechst new blue**, an acid coal-tar color of the triphenyl-methane-carbinol type which dyes wool and silk bright blue in an acid bath.—**Immedial blue**, a coal-tar color of the sulphid type, of unpublished constitution, which dyes unmordanted cotton blue in a sodium sulphid bath.—**Indamine blue**, a basic coal-tar color of the azonium chlorid type.—**Indazin blue**, a basic coal-tar color of the azonium chlorid type.—**Indoin blue**, a Janus coal-tar color prepared by combining diazotized safranine with β-naphthol. It dyes both unmordanted and tannin-mordanted yarn a very fast blue which resembles indigo blue.—**Indol blue.** Same as *indoin* ★*blue*.—**Intensive blue**, the name under which an acid coal-tar color possessing great coloring power is sometimes sold.—**Iridium blue**, a blue pigment composed of iridium oxid.—**Janus blue.** Same as *indoin* ★*blue*.—**Ketone blue**, an acid coal-tar color of the triphenyl-methane type which dyes wool blue in an acid bath.—**King's blue.** (*a*) A blue pigment composed of the carbonate of cobalt. (*b*) Same as *bleu-de-roi* (which see).—**Kongo blue 2B, BB, BX**, and **2BX**, direct cotton coal-tar colors similar to the diamine blues.—**Kongo fast blue B** and **R**, direct cotton coal-tar colors of the triazo type, the former derived from dianisidine, the latter from toluidine. They dye unmordanted cotton blue in a salt bath.—**Kongo pure blue.** Same as *diamine* ★*sky-blue*.—**Kumassi navy blue**, an acid coal-tar color of the diazo type, similar in constitution to Kumassi black. It dyes wool navy blue in an acid bath.—**Lanacyl blue**, an acid coal-tar color of the monoazo type, prepared from diazotized amido-naphthol-disulphonic acid. It dyes wool dark-reddish blue in an acid bath.—**Lichner's blue**, a variety of smalt.—**Light blue.** Same as *diphenyl* ★*blue*.—**Löffler's blue**, an alkaline solution of methylene-blue used for staining bacteria. It is composed of 30 c.c. of a concentrated alcoholic solution of methylene-blue, diluted to 100 c.c. with an aqueous solution of potassium hydrate (1 : 10,000).—**London blue.** Same as *soluble blue*.—**Madras blue**, a name sometimes applied to a mixture of gallocyanine and logwood extract.—**Marine blue.** (*a*) Same as *methyl-blue*. (*b*) A mixture of methylene-blue and methyl-violet.—**Meldola's blue.** Same as *new blue*.—**Metamine blue B** or **G.** See ★*metamine*.—**Metaphenylene blue**, a basic coal-tar color of the azonium chlorid type which dyes tannin-mordanted cotton a shade of blue resembling indigo.—**Methyl alkali blue**, an acid coal-tar color of the triphenyl-methane-carbinol type: similar to *alkali blue*.—**Milling blue**, a mordant coal-tar color of the azonium chlorid type which gives blue shades on a chromium mordant.—**Mohammedan blue**, a cobalt blue of a brilliant color, supposed to have been imported by Chinese potters. The Chinese term is *hui hui ch'ing*.

Then followed the Yunglo period (1403 to 1424), during which much white porcelain, with ornamentation in blue under the glaze, was manufactured. The blue employed in these periods is said to have been brought from some Mohammedan country as tribute, and hence was known as "*Mohammedan blue*."

Sci. Amer. Sup., Feb. 28, 1903, p. 22,711.

Molybdenum blue, a blue pigment composed of the dioxid and trioxid of molybdenum.—**Naphthalene blue**, an acid coal-tar color which dyes wool blue in an acid bath.—**Naphthalene blue R.** Same as *new blue*.—**Naphthazin blue**, an acid coal-tar color of the azonium type which dyes wool blue in an acid bath.—**Naphthyl blue**, an acid coal-tar color prepared by sulphonating milling-blue.—**Naphthyl blue 2B**, a direct cotton coal-tar color of the diazo type, derived from diamino-diphenic acid. It dyes unmordanted cotton blue in a salt bath.—**Naphthylene blue.** Same as *new blue*.—**New blue B** or **G**, a basic coal-tar color of the oxazin type, prepared by condensing new blue R with dimethyl-paraphenylene-diamine. It dyes tannin-mordanted cotton a fast deep blue.—**New fast blue**, a basic coal-tar color of the oxazin type. It dyes tannin-mordanted cotton blue.—**Nicholson's blue.** Same as *alkali blue*.—**Night blue.** (*a*) A coal-tar color, the hydrochlorid of tetramethyl-tolyl-triamido-diphenyl-naphthyl-carbinol, used in dyeing silk, wool, and cotton goods: so named on account of the pur-

ity of the color by artificial light.—**Nile blue,** the names by which two similar basic coal-tar colors of the oxazin type are known. They dye tannin-mordanted cotton a greenish blue.—**Oxamine blue,** a name applied to several direct cotton coal-tar colors. They dye unmordanted cotton blue in a salt bath.—**Paraphenylene blue,** a basic coal-tar color of uncertain constitution.—**Patent blue,** an acid dyestuff, related to triphenyl-methane, similar in constitution and properties to cyanol blue.—**Peacock blue,** a deep, greenish blue. See *peacock-blue.*—**Pelican blue.** Same as spirit-soluble *induline.*—**Phenylene blue.** Same as *new blue.*—**Potash blue,** a blue produced on wool by using logwood and potassium ferrocyanide.—**Powder blue,** a blue pigment consisting of smalt ground to a very fine powder.—**Printing blue.** Same as spirit-soluble *induline.*—**Scudder's blue,** an American lycænid butterfly, *Rusticus scudderi,* occurring in Canada and the northeastern United States. Its larva lives on wild lupine.—**Sèvres blue.** Same as ★*bleu de Sèvres.*—**Silvery blue,** an American lycænid butterfly, *Nomiades lygdamas,* occurring east of the Mississippi. Its early stages are unknown.—**Solid blue.** Same as water-soluble *induline.*—**Spirit-soluble blue.** Same as *aniline blue.*—**Tailed blue,** an American lycænid butterfly, *Everes comyntas,* dark purplish violet in color, and of very wide distribution, feeding, in the larval state, on the flowers of clover and other leguminous plants.—**Vienna blue,** one of the cobalt blues.—**Zambesi blue,** a direct cotton coal-tar color. It dyes unmordanted cotton in a salt bath a blue which is rendered faster by subsequent diazotizing and developing.

blueback *n.* 5. The lake-herring, *Argyrosomus artedi,* of the Great Lakes.—6. A bank-note of the Confederate States. Compare *greenback.*—**Michigan blueback,** the lake-herring, *Argyrosomus artedi.* [Lake Michigan.]

bluebell, *n.*—**California bluebell,** the baby-blue-eyes, *Nemophila insignis.*—**Peruvian bluebell,** a robust herb of the potato family, *Physalodes Physalodes,* with nodding blue flowers, cultivated and adventive in the United States; the apple of Peru.—**Tasmanian bluebell,** a slender, graceful plant of the campanula family, *Cervicina marginata* (*Campanula marginata* of Thunberg), bearing blue flowers. Also cultivated under the name of *Australian harebell.*

blueberry, *n.* 2. In Australia: (*a*) The fruit of the blueberry-tree, or the tree itself. (*b*) The berry-like fruit of *Dianella lævis,* of the lily family.

blueberry-ash (blö'ber-i-ash), *n.* See ★*ash*[1].

blueberry-root (blö'ber-i-röt″), *n.* The rhizome and rootlets of the blue cohosh, *Caulophyllum thalictroides.* Also called *papoose-root* (which see) and *squawroot.*

blueberry-tree (blö'ber-i-trē), *n.* The palberry, *Myoporum serratum.* Also called *cockatoo-bush, native currant,* and *native juniper.* See ★*palberry.* [Australia.]

blue-black, *n.* 3. In making black leathers, the foundation for the final color, a bluish black which when finished is a jet-black on the grain side.—**Alizarin blue-black,** a name sometimes assigned to *alizarin* ★*black.*—**Blue-black B** and **R,** acid coal-tar colors similar to ★*azo-black.*—**Diamine blue-black,** a direct coal-tar color derived from benzidine which dyes unmordanted cotton a blue-black shade in an alkaline salt bath.—**Diazo blue-black,** a direct coal-tar color of the diazo type. It dyes unmordanted cotton in a salt bath, but for the best results subsequent diazotizing and developing are necessary.—**Naphthol blue-black,** an acid coal-tar color of the diazo type, prepared by combining a diazotized mixture of paranitraniline and aniline with amido-naphthol-disulphonic acid. Also called *naphthol black* 12*B.*—**Naphthyl blue-black,** an acid coal-tar color similar to *naphthylamine* ★*black.*

blue-blindness (blö'blīnd″nes), *n.* A supposed form of color-blindness in which the subject is unable to distinguish the fundamental color blue. *Stud. Yale Psych. Lab.,* VIII. 14.

blue-blossom (blö'blos″um), *n.* The blue myrtle or California lilac, *Ceanothus thyrsiflorus.*

bluebottle, *n.,* 1. (*b*) *pl.* The grape-hyacinth, *Muscari botryoides* and *M. racemosum.* See *Muscari.* [Pennsylvania.]

bluebush, *n.* 2. A species of salt-bush, *Kochia pyramidata,* belonging to the goosefoot family, native to southeastern Australia. It is a valuable forage-plant in times of drought.

blue-chat (blö'chat), *n.* An Anglo-Indian name for a bird of the genus *Larvivora.*

blue-devil (blö'dev'il), *n.* The blueweed, *Echium vulgare,* a pest in the middle Atlantic States.

blue-dicks (blö'diks), *n.* One of the wild hyacinths (*brodiæas*) of California, *Hookera capitata.* Its violet-colored clusters are much used for decoration.

blue-dyeing (blö'dī-ing), *n.* The process of dyeing with indigo.

bluefish, *n.* 6. *Girella cyarrea,* a hæmuloid fish found in Australian waters.—**Bermuda bluefish,** a labroid fish, *Iridio radiatus,* found from the Florida Keys and Bermuda south to Brazil: common in the West Indies.

bluegill (blö'gil), *n.* One of the largest of the sunfishes, *Lepomis pallidus.*

blue-grass, *n.*—**Alkali blue-grass,** the west American *Poa juncifolia.*—**Apache blue-grass,** the wire bunch-grass, *Agropyron divergens.*—**California blue-grass,** the mutton-grass, *Poa Fendleriana.*—**Canadian** or **flat-stalked blue-grass,** *Poa compressa.*—**Hungarian blue-grass,** the velvet-grass *Holcus lanatus.*—**Mountain blue-grass.** Same as **Apache** ★**blue-grass.**—**Nevada blue-grass,** *Poa nemoralis.*—**Seaside blue-grass,** *Poa macrantha,* a species native on the sand-dunes of the Pacific coast, valued as a sand-binder and promising for forage.

bluehead (blö'hed), *n.* Same as *blue* ★*groper.* [Tasmania.]

blue-jay (blö'jā), *n.* 1. See *jay*[2].—2. See *road* ★*monkey.*

blue-mope (blö'mōp), *n.* Same as *bluebonnet,* 1.

blue-oil (blö'oil), *n.* A soft, semisolid mixture of paraffin crystals with heavy hydrocarbon oils, one of the commercial products from ozocerite or mineral wax. *Sadtler,* Handbook of Indust. Chem., p. 26.

Blue-pigeon flier, one who steals lead pipes and the like. [Thieves' cant.]

blue-point (blö'point), *n.* Same as *Blue Point oyster.*

blue-pointer (blö'poin″tėr), *n.* A shark, *Isuropsis glauca,* of the family *Lamnidæ,* found throughout the Indian region. [Australia.]

blue-poll (blö'pōl), *n.* A trout, *Salmo trutta cambricus,* found in rivers in Wales.

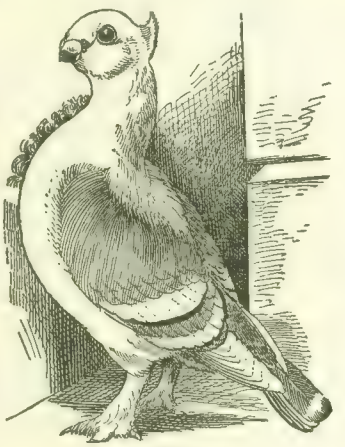
blue-print, *n.*—**Electric blue-print machine,** a machine in which the sensitized paper is exposed behind tracings to a series of electric lights instead of to sunlight.

blue-printing, *n.* 2. The process of printing on china in blue beneath the glaze (first employed by English potters about 1780), as distinguished from ★*black-printing.*

bluer (blö'ėr), *n.* One whose business it is to blue gun-metal, etc. *Gentleman's Mag.,* XVII. 101.

blue-ribbonism (blö-rib'ọn-izm), *n.* The wearing of a blue ribbon as a badge of adherence to total-abstinence principles; total abstinence.

blue-ribbonist (blö-rib'ọn-ist), *n.* A total abstainer who wears a blue ribbon as a badge of his principles.



blue-rock, *n.* 2. A dark-blue clay pigeon used in trap-shooting.

blue-sighted (blö'sīt-ed), *a.* In *psychol. optics,* seeing as if through blue glasses. The eye which has become adapted to yellow (for example, to lamplight) is *blue-sighted* when placed in the dark or in white light; it sees everything as if tinged with the complementary blue. *E. B. Titchener,* Exper. Psychol., I. i. 22.

blue-stem, *n.*—**Big blue-stem,** *Andropogon furcatus.*—**Bushy blue-stem,** the Indian grass, *Sorghastrum avenaceum.*—**Little blue-stem,** *Andropogon scoparius.*

blue-top (blö'top), *n.* The bull-nettle, *Solanum elæagnifolium.*

bluette (blö-et'), *n.* [*blue* + *-ette.*] A breed of oriental frilled pigeons of small size and

Bluette.

plump form. The shoulders are clear, pale blue, and the tail blue with white spots or bands. The wing-bars are white, graduating into warm brown and edged with black.

blue-vat (blö'vat), *n.* An indigo-dyeing liquor.

blueweed, *n.* 2. A cæsal piniaceous plant, *Hoffmanseggia stricta,* introduced from Mexico into Texas in alkali soils and regarded as a pest, though its tubers are eaten by hogs and its foliage, in dry seasons, by cattle. It is the *camote del raton* of the Mexicans.

bluey (blö'i), *n.* [*blue* + dim. *-y*[2].] 1. An Australian bushman's blanket: so called from the color.—2. The material of which the blanket called a *bluey* is made.—3. The bundle wrapped up in a bluey, carried by a bushman when he sets out on a tramp.—4. A rough shirt or blouse made of bluey, worn over the coat in the wilderness of western Tasmania.—**To humb bluey,** to go on the tramp, as in search of work, carrying one's bundle wrapped in bluey.

bluf, *a., n.,* and *v.* A simplified spelling of *bluff.*

bluff[1], *n.* 2. An isolated group of trees on the prairie. [Manitoba.]

bluing, *n.* 4. A disease of pine timber which causes it to assume a blue color. It is due to the pyrenomycetous fungus, *Ceratostomella pilifera.*

blunderhead, *n.* 2. A dipterous insect of the family *Simuliidæ;* a black-fly. [Local, U. S.]

B. M. An abbreviation (*b*) of *Bachelor of Metallurgy;* (*c*) of *Bachelor of Music.*

b. m. An abbreviation (*a*) of *bay mare;* (*b*) of *bench-mark;* (*c*) of *board-measure.*

B. M. E. An abbreviation (*b*) of *Bachelor of Mechanical Engineering.*

B. M. S. An abbreviation of *Bachelor of Medical Science.*

B'nai B'rith (bnī brith). [Heb., 'children of the covenant' (i.e., circumcision).] An independent Jewish order.

B. N. S. An abbreviation of *Bachelor of Natural Science.*

B. O. An abbreviation of *Bachelor of Oratory.*

boagan (bō'a-gạn), *n.* [Manx, = W. *bwgan,* a goblin: cf. *boggard, bogle,* etc.] One of the 'black spirits' or goblins which figure in Manx superstition.

[At an expected birth, men] hang up their hats over the staw to fright the *boaganes.*
Hall Caine, The Deemster, p. 13.

boanthropy (bō-an'thrō-pi), *n.* [Gr. *βοῦς,* ox, + *ἄνθρωπος,* man.] A form of madness in which the victim imagines himself to be an ox.

The exact form of the disease, which would be *Boanthropy,* I have not found any notice of. [though] Arnold (on Insanity) suggests that such may have been meant by the story of the Proetidis in Virgil Ecl.
Pusey, Daniel, Lecture VII. 427.

board, *n.* 15. In an Australian wool-shed, the floor on which the sheep are sheared; hence, the shearers there. [Australia.]—**Ballistic board.** See ★*ballistic.*—**Board and board** (*naut.*), side by side; in parallel courses.—**Duplicate whist board,** a board or tray with 4 pockets, each capable of holding 13 cards, and so marked that one side of it will always be laid on the table to the north and each player will lead in turn: used for whist and bridge.—**Fullers' board,** the best grade of binders' board: not used extensively except in the very best bindings.—**Perforated board,** a thin pasteboard, perforated with small holes at regular distances apart, for embroidery and similar work.—**Take-off board,** in *athletics,* a bar or section of plank set in the ground from or behind which the running broad-jumper must jump.—**To bid to the board.** See ★*bid.*—**Trade board,** in Great Britain, a permanent committee of employers and work-people in a particular trade, appointed for the consideration of matters affecting the interests of both sides, with a view to preventing strikes and lockouts.

Voluntary *trade boards,* however (i.e., permanent joint boards representing employers and work-people in particular trades), are at once the most firmly established and the most important agencies in Great Britain for the prevention and settlement of labour disputes.
Encyc. Brit., XXV. 550.

board, *v.* **I.** *trans.*—**To board a card,** to play a card if called for, as must be done when it is shown.—**To board a tack,** (*naut.*), to haul the lower corner of a course down to the deck, bumkin, or chess-trees.

II. *intrans.*—**To board round,** to board in turn at the different houses in a community: a custom to which school-teachers in country districts were in some places expected to conform, their board being charged against their hosts, who thus paid their portion of the school taxes.

boarded (bōr'ded), *p. a.* Specifically said of a card that is played and cannot be taken back.

board-foot (bōrd'fůt), *n.* The cubic contents of a board one foot square and one inch thick (144 cubic inches): used as a unit of measure in selling logs and lumber.

The unit of measure most commonly used in this country for selling logs and lumber is the *board foot.*
Woodsman's Handbook, I. 9.

boarding-car (bōr'ding-kär), *n.* In *railroads,* a car fitted with bunks and a kitchen and dining-room, or designed either for lodgings or for serving meals: used by the crew of a construction-train or by a wrecking-crew.

boarding-gage (bōr'ding-gāj), *n.* A simple device for keeping weather-boarding even in width: generally a board or strip with a notched edge.

boardman (bōrd'man), *n.*; pl. *boardmen* (-men). A man who perambulates the streets carrying an advertising-board; a sandwich-man.

board-measure (bōrd′mezh″ūr), *n.* In *mensur.*, a cubic measure or measure of volume wherein the unit is the board-foot.

The unit of *board measure* is the board foot, which is the contents of a board 1 foot square and 1 inch thick.
Woodsman's Handbook, I. 12.

board-room (bōrd′röm), *n.* **1.** The room or office in which a board meets to transact business.—**2.** In *mining*, the space excavated in driving a board. The term is used in connection with the "ridding" of the fallen stone in old boards when driving roads across them in pillar working. Also *bord-room.*
Coal and Metal Miners' Pocket-book.

board-scale (bōrd′skāl), *n.* Same as ★*board-measure.*

boardy (bōr′di), *a.* Hard and non-flexible: said of the wire teeth of card-clothing when they become worn and stumpy.

boar-grunt (bōr′grunt), *n.* A food-fish, *Hæmulon sciurus*, found in the West Indies. It is supposed by fishermen to be the male of the duller-colored species *H. plumieri.* [Key West.]

boarwood (bōr′wůd), *n.* The poison-sumac, *Rhus Vernix.* [Dismal Swamp region, Virginia.]

Boas-Oppler bacillus. See ★*bacillus.*

boat, *n.* **5.** A narrow, shallow vessel of platinum or porcelain which serves to hold a substance that is to be subjected to ultimate analysis, or to the action of gases, and which for that purpose is placed in a glass or porcelain tube.

Combustion Boat.

Moissan illustrates the vaporization of carbon by heating the outside of a carbon tube containing a *boat* filled with silicon, with an arc, and describes the formation of silicon carbide from the combination of the vapors of silicon and carbon.
Electrochem. Industry, August, 1904, p. 331.

6. A small device attached to each side of a loom for weaving a plain selvage in a fabric having a twill or figured weave.

By means of a contrivance known as a *boat*, a selvage approximating to plain cloth is readily obtained.
Fox, Mechanism of Weaving, p. 482.

Automobile boat. See ★*autoboat.*—**Boat log.** See ★*log*2.—**Combustion boat.** Same as ★*boat*, 5.—**Flying boat,** a combined aëroplane and boat.—**Folding boat,** a collapsible boat used in the army for transporting men from one river-bank to another. These boats have a wooden keel and light wooden longitudinal ribs covered with water-tight canvas.—**Loose boat,** in *whaling*, a boat that has not succeeded in striking a whale.

The duty of a *loose boat*, if near by and not certain of a capture, is to keep within hailing distance of the fast boat. *Fisheries of the U. S.*, Sec. 5, II. 262.

Paddle-box boat, a boat of peculiar construction which when inverted, or turned upside down, forms the top section of a paddle-box on a paddle-wheel steamer.—**Umbrella boat.** See ★*umbrella-boat.*

boatbill, *n.* **2.** One of the broadbills, *Eurylæmidæ*, a group of perching birds characteristic of the Indo-Malayan region; in particular, *Cymbirhynchus macrorhynchus.* See cut under *gaper.*

boat-boom (bōt′böm), *n.* A long boom projecting transversely from each side of a war-ship or a yacht at anchor in a harbor, with hanging pendants to which boats may be made fast. In the days of sailing men-of-war the lower studdingsail-booms were used for this purpose; now special booms are fitted. Also called *swinging-boom.*

boat-car (bōt′kär), *n.* A wheeled conveyance used in the life-saving service for facilitating the launching of boats.

boat-crane (bōt′krān), *n.* A rotary crane fitted on each side of a war-ship for lifting the heavier boats out of the water or lowering them into it, particularly the steam-launches and vedette-boats. Such cranes are usually supplied with steam or electric hoisting and turning apparatus. See cut under ★*battle-ship.*

boat-nail (bōt′nāl), *n.* A form of nail, made of soft and ductile iron or steel and tinned, suitable for fastening the strakes or skin of a small boat to the ribs or along the seams. It must be capable of being effectively clinched in the wood of the strakes.

boat-pan (bōt′pan), *n.* A pan of wrought- or cast-iron, shaped like a boat, used, in the Leblanc process for making carbonate of soda, to boil down the crude tank-liquor.

boat-shell, *n.* **2.** The common slipper-limpet or half-deck, *Crepidula fornicata.* [U. S.]

Boatswain's call, pipe, or whistle, a small whistle used by a boatswain in giving signals.—**Boatswain's chair** (*naut.*), a piece of board in the shape of a parallelogram, or scup-seat, having a hole in each end through which a short length of rope in the form of a bridle is passed, and the ends knotted on the under side to prevent them from pulling through. It is hoisted aloft by a whip, and is used by seamen to sit on while at work in the rigging where foothold is not obtainable, as when scraping down masts, etc.

boat-yoke (bōt′yōk), *n.* A horizontal piece of wood or metal placed across the head of a boat's rudder. To each end of the yoke a line is secured, known as a *yoke-line*, by means of which the rudder is turned and the boat steered.

bob[1], *n.* **14.** A piece of clay placed beneath a vessel in a kiln. An old English name for *bat*[1], 13 (*b*).

bob[1], *v. t.*—**3.** To transport (a load, as of logs) on a bob or sled.

bobachi (bob′a-chi), *n.* [Hind. *bāwarchī*, popular *bavarchī*, illiterate *babarchī*, prob. of Turkish origin.] A male cook. [Anglo-Indian.]

bob-apple (bob′ap″l), *n.* The Hallowe'en pastime of 'ducking for apples' while they float in a tub of water, or trying to bite one as it swings from a string. See *bob-cherry.*

bobbery-bob (bob′ėr-i-bob″), *interj.* The Anglo-Indian form of the Hindu exclamation of surprise, *bap re bap* ("O Father!"). See *bobbery.*

bobbin-cradle (bob′in-krā′dl), *n.* A horizontal holder for a bobbin upon which is wound the yarn from the hank on a hank-winding machine.

bobbin-lead (bob′in-lēd), *n.* In *textile-manuf.*, the excess of the surface-speed of the bobbin over the speed of the spindle-flier on a roving-frame.

bobbin-rail (bob′in-rāl), *n.* An iron bar or rail supporting the bobbins of a roving-machine.

bobbin-reel (bob′in-rēl), *n.* In *cotton-manuf.*, a machine for winding yarn from bobbins into hanks.

bobbin-wheel (bob′in-hwēl), *n.* In *textile-manuf.*, the principal gear in a series for driving the bobbin on a roving-frame.

bobble, *v. i.* **2.** In *golf*, to run unevenly on a green: said of a ball. *W. Park*, Game of Golf, p. 202.

bobcat (bob′kat), *n.* A popular name for the bay lynx, *Lynx rufus*, and its various subspecies, all of which have short tails.

bobeche (bō-bāsh′), *n.* [F. *bobèche*, OF. *buibeche*; origin unknown.] A glass disk or shallow cup with a central perforation, made to surround the base of a candle or of a gas-light. In the latter case the glass is ground to diffuse the light.

To adapt this to microscopic work we add a '*bobeche*' as used for Welsbach lights made of finely ground imported glass. *Science*, April 3, 1903, p. 536.

bob-fly (bob′flī), *n.* In *angling*, an artificial fly attached to the leader above the stretcher-fly. Also called *bobber*, *dropper*, and *drop-fly.*

Bobierre metal. See ★*metal.*

bobierrite (bō-bi-ār′īt), *n.* [Named after *Bobierre*, who first described it.] A hydrated magnesium phosphate from the guano of Mexillones, off the western coast of South America.

bob-jerom (bob-jer′um), *n.* [*Bob*[1], *n.*, 10, + *Jerome*, a proper name.] A bob-wig.

What I say is, let everybody follow their nature; . . . and then if they pay every one his own, who 's a right to call 'em to account, whether they wear a *bob-jerom*, or a pig-tail down to the calves of their legs?
Miss Burney, Cecilia, ix. 1.

bob-lever (bob′lev″ėr), *n.* A lever carrying a bob-weight. The bob-weight is used to balance one or more reciprocating parts on a machine.

bobo (bō′bō), *n.* [A W. Ind. use of Sp. *bobo*, a dolt, fool: see *booby.*] A species of mullet, *Joturus pilchardi*, found in the mountain torrents of the larger islands of the West Indies. It is characterized by the simple stomach and the coarse truncate incisors.

bobong (bō-bông′), *n.* [Bisaya *bobong*, Tagalog *bobongan*, the roof; *bobong*, cover, roof.] In the Philippine Islands, the roof of a building.

bob-runner (bob′run-ėr), *n.* One of a pair of short runners placed on the arms of an axle instead of wheels, to enable a carriage or wagon to be used as a sleigh. [New Eng.]

bobtail, *n.* **5.** In *poker*, a four-card flush or straight.

bobtailed, *a.* **2.** In *archery*, gradually decreasing in diameter from the point to the nock: said of an arrow.

bocca[2] (bok′ä), *n.* [Native name.] A name applied by the natives of French Congo to a shrub of the dogbane family, *Tabernanthe Bocca*, which is planted about their villages for the sake of its medicinal roots. Compare ★*iboga.*

bocon (bō-kōn′), *n.* [Cuban use of Sp. *bocón*, a wide-mouthed person, < *boca*, mouth.] A Cuban name of a small anchovy, *Anchovia cubana.*

bodenite (bō′den-īt), *n.* [Named from *Boden*, near Marienberg, Saxony.] A silicate related to allanite, containing a relatively large amount of the yttrium and cerium metals.

bodhi (bō′di), *n.* [Skt.: see *Buddha.*] Knowledge; enlightenment: a term of Buddhism.

bodhisattva, *n.* **2.** Also, any religious teacher.

Bodianus (bō-di-ā′nus), *n.* [NL., < Sp. *bodian* = Pg. *bodião*, a sea-fish so called.] **1.** A genus of large labroid fishes of the West Indies, of numerous species, usually known by the later name of *Harpe. B. rufus* is the best-known species.—**2.** A genus of sea-bass. *Serranidæ*, of the warm seas, more properly called *Cephalopholis.*

Bodo (bō′dō), *n.* [NL. (Stein, 1878).] The typical genus of the family *Bodonidæ*: sometimes called the hooked or springing monad.

bodock (bō′dok), *n.* Same as *bodark.*

Bodonidæ (bō-don′i-dē), *n. pl.* [NL. *Bodo*(*n*-) + *-idæ.*] A family of flagellate protozoans of the order *Heteromastigidæ*, consisting of small, naked forms in which there is little, if any, difference between the flagella. It contains the genera *Bodo*, *Phyllomitus*, *Colponema*, and *Oxyrrhis.*

body, *n.* **14.** All the strapping of a harness back of the collar; specifically, that part of the breeching and other straps which bears against the horse.—**15.** In *ceram.*, the substance or base of pottery and porcelain. See *frit body*, *kaolinic* ★*body.*—**16.** An ore body, or pocket of mineral deposit.—**17.** The thickness of a lubricating oil or other liquid: also the measure of that thickness expressed in the number of seconds in which a given quantity of the oil at a given temperature flows through a given aperture. *Coal and Metal Miners' Pocket-book.*—**Alloxur body.** See ★*alloxur base.*—**Anti-immune body.** See ★*anti-immune.*—**Anti-intermediary body.** Same as ★*anti-amboceptor.*—**Body blow.** See ★*blow*3.—**Brown body.** See ★*brown.*—**Central body,** a term used to denote the aggregation of protoplasmic matter in the interior of many bacteria and blue-green algæ. It is believed by some to represent a true nucleus.—**Cornalian bodies.** See ★*cornalian.*—**Directive body.** See *directive corpuscle* and ★*polar body.*—**Fat body,** in *entom.*, a more or less lobulated or net-like mass of large cells filled with small drops of fat, covering parts of the viscera and lining the integument.—**Guarnieri body,** a protozoan parasite, *Cytoryctes variolæ* Guarnieri, thought to be the cause of smallpox and vaccinia.—**Harting's bodies,** granular concretions of carbonate of lime obtained by allowing carbonic-acid alkalis to act upon albumin or other nitrogenous substances. This action has been said to explain the mode of formation of the shells of mollusks and protozoa.—**Hassall** or **Hassall's bodies,** in *histol.*, the remains of the epithelium which during embryologic development makes up the main portion of the thymus gland.—**Hyaloid body.** See ★*hyaloid.*—**Immune body.** Same as ★*amboceptor.* See ★*immune.*—**Immunizing body.** See ★*immunity.*—**Intermediary body.** Same as ★*amboceptor.*—**Kaolinic body,** a porcelain composition consisting largely of kaolin, as hard-paste porcelain.—**Leishmann-Donovan body,** a small rounded or ovoid body, occurring singly or in groups of several, embedded in a matrix but not intracorpuscular, in tropical splenomegaly or kala-azar, and probably also in Oriental sore. Ross considers these bodies to belong to a new genus of *Sporozoa* and suggests for them the name *Leishmannia donovani.*—**Lummer-Brodhun body,** a device, used in certain photometers and spectrophotometers, for rectifying or rendering parallel the two beams of light to be compared. It consists of two right-angled prisms of glass cemented together so as to form a cube the diagonal section of which is partly cut away. See *spectrophotometer.*—**Meissner's body,** a tactile corpuscle.—**Melon-seed bodies.** Same as *rice* ★*bodies.*—**Mushroom body,** in *entom.*, one of two stalked and capped bodies arising from the procerebral lobe of an insect's brain, which resemble minute mushrooms. They are more highly developed in bees, ants, and wasps than in other insects, and it is therefore supposed that the intelligence of insects bears a direct relation to the size of these bodies.—**Nissl** or **Nissl's bodies,** in *neurol.*, small bodies which are found in the cytoplasm of nerve-cells and which take on a deep stain with methylene blue.—**Onion body,** a concentrically arranged mass of epithelial cells sometimes seen in carcinomatous tumors. Also called *epithelial pearl* or *nest.*—**Plimmer bodies,** certain cell-inclusions found in malignant growths which were thought to be parasitic protozoa and concerned in the production of the growths.—**Presegmenting bodies,** in *zoöl.*, the malarial parasites before they undergo segmentation.—**Pyramidal body.** Same as *pyramid*, 4.—**Rice bodies,** small growths, resembling rice-grains, which form in the sheaths of the tendons in hygroma and, becoming detached, float free in the fluid.—**Rosenmüller's body,** the parovarium.—**Russell fuchsin bodies,** hyaline bodies which stain readily with fuchsin, sometimes seen in carcinomatous tumors.—**Spongy body.** Same as *corpus spongiosum.*—**The body Alpha.** See ★*alpha*, 4.—**Turbinate body.** See *turbinate bone*, under *turbinate.*

body-brace (bod′i-brās), *n.* **1.** A brace which crosses a whole frame or one parallelogram of a frame diagonally from corner to opposite corner. See ★*brace*[1], 1 (*b*).—**2.** Specifically,

in *car-building*, an inclined timber extending from one end of the body center-plate of a long car to the middle of the car. Two braces, united to a compression-beam, form a truss built into the side of the car under the windows.

body-plasm (bod′i-plazm″), *n.* In *biol.*, the substance of the body of an animal or plant, in contradistinction to the *germ-plasm*, or the substance of the reproductive organs. Same as *soma*[1], *somatoplasm*.

body-plate (bod′i-plāt), *n.* A shell-plate for a boiler located anywhere except in heads or domes.

body-wood (bod′i-wůd), *n.* Cord-wood cut from those portions of the trunks which are clear of branches.

Boehmenism (bē′men-izm), *n.* The theosophical view of God and the world set forth by Jacob Boehme (1575–1624), a mystical German philosopher. He contemplated deity as "the eternal one, the silent nothing," from which nature proceeds as the expression of spiritual principles. He endeavored to show that material powers and moral forces are one, that evil is the manifestation of the wrath of God, and that good will finally be victorious. Also ★*Behmenism*.

Boehmenist (bē′men-ist), *n.* One who follows the teachings of Boehmenism. Also ★*Behmenist*.

Boehmenite (bē′men-īt), *n.* A Boehmenist.

Boethian (bō-ē′thi-an), *a.* Pertaining to or derived from Boethius, a distinguished Roman official, philosopher, and writer on music, who died about 524 A. D. Less correctly ★*Boetian*.

Boetian (bō-ē′ti-an), *a.* Same as ★*Boethian*.

Boettcher's crystals. See ★*crystal*.

bog[1], *n.*—**Anchored bog**, an originally floating bog which has become fixed by roots and rhizomes from its bottom or by growths from shore-plants into it, or by both. *C. MacMillan.*—**Climbing bog**, the rim of a normal bog, nourished at a higher level by the capillary elevation of water.—**Emerged bog**, a bog growing above water-level.—**Floating bog**, a natural floating island (see *island*[1]), named 'bog from its morassic character.

In some of the lakes of Minnesota these *floating bogs* are very prominent features and constitute the so-called "floating islands." *C. MacMillan.*

Immersed bog, a bog whose chief growth is below water-level.—**Quaking bog**, a bog whose matted, peaty growth has covered comparatively unstable and treacherous ground that shakes under foot.—**Sphagnous** or **sphagnum bog**, a stagnant swamp with acid soil, characterized by the growth of sphagnum mosses; a muskeg. A deep swamp of this kind becomes at length a peat-bog.

boga[2] (bō′gä), *n.* [Sp.] A species of small fish of the genus *Orestias*, common in the waters of Lake Titicaca in Bolivia and Peru. There are several species of *Orestias* in the lake, and they constitute the aquatic food of the inhabitants of those regions.

Bogardus mill. See ★*mill*[1].

bogart (bog′art), *n.* See ★*boggard*, 4.

bog-birch (bog′bėrch), *n.* The Carolina buckthorn, *Rhamnus Caroliniana*. [Minnesota.]

bog-burst (bog′bėrst), *n.* An outbreak or flow of peaty materials which are saturated with water, so that barriers no longer restrain them. Also *bog-flow*.

A discussion of *bog-bursts*, with special reference to the great outburst of a bog in the Killarney district in 1896. *Geog. Jour.* (R. G. S.), XI. 206.

bog-flow (bog′flō), *n.* See ★*bog-burst*.

boggard[1], *n.* 4. The hellgrammite. [Local, U. S.]

bogie[2], *n.* 4. A small wheelbarrow or box upon wheels, made of light boiler-plate iron, used in the removal from the furnace of black-ash in the manufacture of soda by the Leblanc process.

Bogie, Colonel. See *Colonel Bogie*.

bogie-frame (bō′gi-frām), *n.* The pivoted or swinging frame under the front end of a locomotive; the truck-frame.

bogie-locomotive (bō′gi-lō-cō-mō″tiv), *n.* Same as *bogie-engine*.

bogie-spring (bō′gi-spring), *n.* One of the springs which are interposed between the truck of a locomotive and the parts supported by it, to take up the shocks and jars due to inequalities in the road.

Bognor beds. See ★*bed*[1].

bogong (bō′gong), *n.* [Native Australian.] An Australian noctuid moth, *Agrotis spina*, which occurs in enormous numbers in Victoria, where the hibernating adults were eaten by the aborigines.

bog-ore (bog′ōr), *n.* Same as *bog-iron ore*.

Bogoslovius (bog-ō-slō′vi-us), *n.* [NL., named from the volcanic island of St. John *Bogoslof* (Bogoslovŭ), near which the typical species was dredged.] A genus of macruroid fishes taken in deep water in Bering Sea.

bog-slide (bog′slīd), *n.* Same as ★*bog-burst*.

bog-torches (bog′tôr″ches), *n.* The golden-club, *Orontium aquaticum*: so called from the shape and color of its flower-stalk and flowers. See cut under *Orontium*. *Small*, Flora Southeastern U. S.

bogum (bō′gum), *n.* [*Australian.*] The name in New South Wales of the bean-tree or Moreton Bay chestnut, *Castanospermum australe*. It yields a soft, fine-grained, beautifully figured, brown wood, which is not very durable. See *black* ★*bean* (*b*).

Bohairic (bō-hī′rik), *n.* [*Bohaireh, Boheyreh*, a district in the Delta of the Nile, + *-ic*.] One of the main divisions of Coptic; the dialect of the coast district, spoken in the northwestern Delta of the Nile: formerly named *Memphite* (which see). Saludic and Bohairic are the most important dialects of Coptic. Since the fifteenth century the latter has been the language of the sacred books of Christianity throughout the country. *Encyc. Brit.*, XXVII. 727.

boheic (bō-hē′ik), *a.* [*Bohea* + *-ic*.] Derived from *Thea Bohea*.—**Boheic acid**, a bibasic acid, $C_7H_{10}O_8$, obtained from black tea.

Bohemian, *n.* 6. As employed by the French geologists, the later deposits of Silurian time, from the fine development of these strata in the Bohemian basin: equivalent to *Upper Silurian* or to *Silurian* in its restricted sense.

bohio (bō-hē′ō), *n.* [Sp. *bohío, bojío*, from a native W. Ind. name.] A West Indian hut; a thatched hut of the kind used by the negroes of the West Indies.

boil,[1] *n.*—**Aleppo, Delhi, oriental, tropical boil.** Same as *Aleppo ulcer* (which see, under *ulcer*).—**Blind boil**, a sluggish boil in which pus forms slowly and there is no slough or core.—**Bulama boil** [Afr. *Bulama*, island of W. Africa], a phlegmon caused by the presence of a worm or the larva of an insect beneath the skin.—**Burmese boil**, an endemic sore, probably of the same nature as the Delhi boil or Aleppo ulcer.

boil,[2] *n.* 3. The period during which the carbon is being burned out of the iron in a puddling-furnace. During this period jets of burning carbonic oxid cover the surface of the bath. *Lockwood*, Dict. Mech. Eng. Terms.

boiler, *n.* 5. A small isolated reef or atoll below water. [West Indies and Bermuda.]—**Belleville boiler**, a type of sectional boiler much used at one time in the British navy, in which the generating units are water-tubes of moderate diameter: named after its designer.—**Double boiler**, a cooking-utensil consisting of two metal or glazed-ware vessels nesting one within the other. The larger vessel is partly filled with water, the smaller is put inside of it, and both are placed over the fire. The boiling of the water and the resulting partly inclosed steam cook the contents of the inside vessel without danger of burning from direct contact with the fire.—**Drop-flue boiler**, a boiler having flues coming in from the sides and joining a central flue which is open at the bottom. The hot gases come in the horizontal flues and descend the center, or drop, flue.—**Elephant boiler**, a horizontal cylindrical boiler having one or more shells below the main shell and connected to the latter by necks.—**Elliptical boiler.** (*a*) A round-ended or oval-ended boiler. (*b*) A boiler whose cross-section is an oval or an ellipse.—**Field boiler**, a boiler having double tubes, the inner one for getting water to the lower end of the outer tube, in which the steam is generated. These tubes are either vertical or inclined. *Hiscox*, Horseless Vehicles, p. 47.—**Flash boiler.** See ★*flash-boiler*.—**Lancashire boiler**, a horizontal cylindrical boiler having two horizontal flues each containing a furnace. The combustion gases pass through the flues and return to the front end along the outside of the shell, and then pass back underneath the shell.—**Multitubular boiler.** (*a*) A boiler having a large number of small tubes for the hot gases to pass through. (*b*) A boiler made up of a number of tubes in which steam is generated; a water-tube boiler.—**Niclausse boiler**, a type of sectional boiler which has been used in the British navy, in which the generating units are water-tubes of moderate diameter.—**Oval boiler.** Same as *elliptical* ★*boiler* (*a*) and (*b*).—**Sectional boiler**, a steam-generator in which the plan of a single enveloping shell to contain the water and steam is abandoned, and is replaced by a number of small generating vessels so joined together that the steam formed in all of these separate units or sections is delivered from a common disengagement surface into a common steam-space. The units may be spherical or they may be cylindrical water-tubes. Such sectional boilers are safer because stronger to resist internal pressure, and rupture of one unit is not usually followed by a destruction of the structure as a whole.—**Semi-flash boiler.** See ★*flash-boiler*.—**Tubulous boiler.** Same as *water-tube boiler* (which see, under *water-tube*).

boiler-brace (boi′lėr-brās), *n.* A stay or tie-rod between the shell and the flat end of a steam-boiler, or a tension-rod running from end to end of the boiler to tie the flat surfaces together and prevent bulging or other deformation under pressure.

boiler-cement (boi′lėr-sē-ment″), *n.* A mixture of various substances, such as clay, magnesia, etc., which is used for covering boilers and steam-pipes to prevent or check the radiation of heat.

boiler-compound (boi′lėr-kom″pound), *n.* Any substance used to prevent the formation of a hard scale in steam-boilers which use impure feed-water. As the impurities are of so many varieties, the boiler-compounds have to be adapted to each case. Some compound of soda is the most common ingredient of such mixtures.

boiler-felt (boi′lėr-felt), *n.* A non-conducting covering for boilers, steam-pipes, etc., made of matted hair. In appearance it resembles felt.

boiler-maker (boi′lėr-mā″kėr), *n.* 1. One who makes boilers; a boiler-smith.—2. A petty officer in the United States navy.

boiler-palm (boi′lėr-päm), *n.* 1. A pad or foot on a bracket which is used to fasten or support a boiler.—2. The flattened end of a boiler-stay, where it is enlarged to take the rivets; specifically, that part of the knee, bracket, or tension-stay which goes against the boiler and is fastened to it.

boiler-scale (boi′lėr-skāl), *n.* A substance deposited on the surfaces of boilers which are in contact with the water. This scale is due to impurities in the water precipitated as solids on heating, and is sometimes hard and difficult to remove.

boiler-smith (boi′lėr-smith″), *n* A smith who forges boiler-plates; a boiler-maker.

boiling-basket (boi′ling-bäs″ket), *n.* Among primitive races, a water-tight basket in which liquids are boiled. Generally the contents are heated by means of red-hot stones which are thrown into the basket.

boiling-house (boi′ling-hous), *n.* A local West Indian term for the building, at a sugar-mill, in which the cane-juice, expressed in the cane-mill, is boiled down to the syrup from which sugar is made.

Such of the negroes as are employed in the mill and *boiling-houses* often work very late. *Bryan Edwards*, A Hist. of the Brit. W. Indies, II. 160.

Boiling-point of the thermometer. (*a*) A small nick on the glass tube of the mercurial thermometer showing the observed height of the mercury when the instrument is wholly immersed in steam from boiling water. Formerly the bulb only was placed in boiling water, but now the whole instrument is immersed in the steam. (*b*) A scale-division near the above-mentioned nick, indicating the boiling-point under standard pressure of one atmosphere. (*c*) The thermometric temperature of standard boiling water or its steam, that is, 100°C., 80°R., or 212°F. (*d*) The correct reading of the thermometer immersed in steam from boiling water under some special low pressure, such as that on the summit of a mountain. This boiling-point depends directly on the atmospheric pressure and is utilized to ascertain the latter when the mercurial barometer is not available.

Bojan gneiss. See ★*gneiss*.

boje (bō′hā), *n.* [Native name.] A name in Porto Rico of a rubiaceous tree, *Antirhea coriacea*, native to the West Indies. It furnishes a heavy, strong, durable yellow wood used for carpenter work, furniture, and the framework of houses. Also called *quina*.

B. O. L. An abbreviation of *Bachelor of Oriental Literature*.

bola (bō′lä), *n.* [Native name.] A name in Bengal of the mahoe or majagua, *Pariti tiliaceum*. See *mahoe*, 1, and ★*majagua*, 1.

bolboporite (bol-bō-pō′rīt), *n.* [NL., < Gr. *βολβός*, a bulb, + *πόρος*, a pore, + *-ite*[2].] One of certain fossil bodies found in the Silurian rocks of Russia, Canada, and New York, inversely conical or clavate in form, and having the narrower end smooth but the broader pitted. They have been regarded by some authors as corals, and probably some of the bodies to which this name has been applied are of this nature; but the affiliations of the typical bolboporites are still dubious, though their microscopic structure is very similar to that of the test of the *Echinodermata*.

Bolderian stage. See ★*stage*.

boldoin (bōl′dō-in), *n.* [*boldo* + *-in*[2].] Same as *boldine*.

bole[2], *n.* 3. In *medieval* and *early Renaissance art*, an earthy paste added over gesso as a ground for tempera painting and gilding.

Directly on this, and without the usual preparation of *bole*, gold leaf was laid over the whole surface. *Burlington Magazine*, II. 89.

Boleichthys (bō-lē-ik′this), *n.* [NL., < Gr. *βολή*, a throw, + *ἰχθύς*, fish.] A genus of darter-fishes, typified by the species *B. fusiformis*.

boleite (bō′lē-īt), *n.* [*Boleo* (see def.) + *-ite*[2].] An oxychlorid of lead, copper, and silver, occurring in deep-blue cubic crystals and related to percylite: found at Boleo, Lower California.

Bolelia (bō-lē′li-ä), *n.* [NL. (Rafinesque, 1832), an anagram of *Lobelia*.] A genus of dicotyledonous plants of the family *Campanulaceæ*. See *Downingia*.

Boleosoma (bō″lē-ō-sō′mä), *n.* [NL., irreg. < Gr. *βολή*, a throw, + *σῶμα*, body.] A genus of tessellated darters, small quick-moving fishes of the brooks of the eastern United States. *B. olmstedi* is the best-known species.

bolero, *n.* **3.** A short jacket, ending about three inches above the waist-line: originally in imitation of the Spanish jacket, but now made in many fashions, and trimmed either simply or with extremely elaborate ornament.

boletoid (bō-lē'toid), *a.* [*Boletus* + *-oid.*] Like or pertaining to the genus *Boletus.*

Boliche furnace. Same as *Spanish furnace.*

bolivar, *n.* **2.** A large ginger-cake. [U. S.]

Bollmannia (bol-man'i-ạ), *n.* [NL., from C. H. *Bollman,* an American scientist.] A genus of goboid fishes inhabiting the depths of the tropical Pacific, typified by the species *B. chlamydes.*

bollo (bō'lō), *n.* A brick of amalgamated silver ore, so shaped that six bricks form a circular cake with a hole in the center to allow the mercurial vapors to escape during the distillation process.

boll-weevil (bōl'wē-vl), *n.* See *cotton-boll* ★*weevil.*—**Mexican boll-weevil.** Same as ★*cotton-boll weevil.*

bolo (bō'lō), *n.* [Bisaya *bolo.*] **1.** A long knife resembling a Cuban machete, used in the Philippine Islands, for domestic and agricultural purposes, and in war.

Bolo.

(From an original in the Amer. Museum of Nat. History, New York.)

bolochore (bō'lō-kōr), *n.* [Irreg. < Gr. *βολή,* a throw, + *χωρεῖν,* spread abroad.] In *phytogeog.,* a fruit with some adaptation for the mechanical propulsion of its seeds or spores, or a plant bearing such fruit; a sling-fruit; a ballistic or catapult fruit. Bolochores are divided by F. E. Clements, the author of the term, into ★*pladoboles,* ★*edoboles,* ★*xeriboles,* and ★*tonoboles.* See these terms.

bolochorous (bō-lok'ō-rus), *n.* [*bolochore* + *-ous.*] Having the character of or pertaining to bolochores.

Bologna flask, hemp, vial. See ★*flask,* ★*hemp,* ★*vial.*

bolograph (bō'lō-grȧf), *n.* [Gr. *βολή,* a throw, + *γράφειν,* write.] An automatic record of the indications of a bolometer. Bolographs of the solar spectrum are made by passing the spectrum at a constant rate over the face of the bolometer and photographing upon a moving sheet the deflections of a sensitive galvanometer in circuit with the bolometer. The result is a curve giving in graphic form the distribution of energy in the sun's spectrum at the time when the bolograph is taken. Such records are termed *spectrobolographs.*

A study of the yearly variations of the selective absorption of the Earth's atmosphere by the aid of a long series of *bolographs.*

S. P. Langley, Astrophysical Jour., March, 1903, p. 93.

bolographic (bō″lō-graf'ik), *a.* Of, pertaining to, or effected by means of a bolograph.

The *bolographic* method can be employed, which, being independent of circle readings, and involving instead a clock work of extreme accuracy, gives differences of deviation with extraordinary precision, reaching, as we said in last year's report, to within a second of arc.

Smithsonian Rep., 1898, p. 72.

boloman (bō'lō-mạn), *n.* A man armed with a bolo. [Philippine Is.]

Bolometric curve, a curve indicating the distribution of energy in the spectrum as determined by measurements with the bolometer.

bolsa (bōl'sȧ), *n.* [Sp. *bolsa,* a purse.] An exchange where merchants and others meet to transact their business. [Spanish-American and the Philippine Is.]

bolson (bōl-sōn'), *n.* [Sp., augm. of *bolso,* a purse, < *bolsa,* a purse: see *burse, purse.*] In *phys. geog.,* a basin-shaped depression inclosed on nearly all sides by mountains. [Southwestern U. S.]

bolson-plain (bōl-sōn'-plān), *n.* [*bolson* + *plain.*] A plain formed of land-waste occupying basin-like depressions among mountains in Mexico and contiguous portions of the United States. See ★*bolson.*

The *bolson plains* may be considered as sections of an upraised peneplain surface in its earliest infancy, at a stage in which they are as yet untouched by stream-action. They could not exist under present hypsometric conditions except in an arid region, which snow-fed perennial rivers do not traverse. *Amer. Geol.,* Sept., 1904, p. 164.

bolster, *n.,* **2.** (*p*) Same as *bunk,* 2. (*q*) In *arch.,* a horizontal piece of wood set on the top of a post and projecting on one or both sides: intended to diminish the unsupported stretch of a girder or beam, or to act as a corbel, allowing a post to be set upright in false bearing beyond the axis of the lower post. (*r*) In *paleobot.,* same as ★*leaf-cushion.*

bolster-wagon (bōl'stėr-wag″ọn), *n.* A form of road-wagon used for speeding purposes. The body is hung on side-bars the ends of which rest on bolsters over the axles; no springs are used.

bolt[1], *n.*—**Cremorne bolt,** a casement-fastening consisting of two long bolts, one engaging the top of the window-frame and the other the window-sill, both being inclosed in a casing and operated by a handle at the middle of the casement. It is sometimes provided with a third bolt which locks the casements together and is operated by the same handle.—**Espagnolette bolt,** a casement-fastening consisting of a long rod placed on the edge of the casement and fitted with catches at the top and bottom. By means of a handle the rod can be rotated to cause the catches to engage the opposite casements and lock them together at the top and bottom.—**In-and-out bolt,** a bolt which extends through the pieces to be joined.

bolt[1], *v. t.* **9.** In *archery,* to loose too soon after drawing the bow. See ★*hold.*—**10.** In *golf,* to putt with so much force that the ball will go some distance past the hole if it fails to go into it.

bolt-die (bōlt'dī), *n.* **1.** A die or hob for cutting the thread on a bolt.—**2.** A die for shaping blanks for bolts.

bolt-dog (bōlt'dog), *n.* An attachment to a lathe for driving bolts.

bolter[1], *n.* **2.** A machine for sawing logs into a size suitable for cutting into small strips. The pieces cut by a bolter are called *bolts,* and these bolts are sawed into laths, pickets, etc., in a gang-saw.—**3.** In *archery,* an archer who, after drawing the bow, looses too soon.

bolting-reel (bōl'ting-rēl), *n.* A reel, covered with bolting-cloth, used in separating flour, etc.

bolting-saw (bōl'ting-sȧ), *n.* See ★*bolter,* 2.

bolt-machine (bōlt'mạ-shēn″), *n.* A machine used for forging the shanks of bolts from stock which has been rolled to the size of the head of the bolt. It consists of a series of forging-dies which vary in size and through which the body of the bolt is passed in a proper succession.

Boltonia (bōl-tō'ni-ạ), *n.* [NL. (L'Héritier, 1788), named in honor of James *Bolton* (fl. 1775–95), an English botanist.] A genus of plants of the family *Asteraceæ.* There are 4 or 5 species, natives of the United States. They are sometimes known as *false camomile.* They are tall, leafy, aster-like, glabrous and often glaucous perennial plants, blooming profusely in late summer and autumn, and are excellent for the hardy border. *B. asteroides* and *B. latisquama* are sometimes planted in gardens for their showy bloom.

bolt-ring (bōlt'ring), *n.* A small ring with a spring-and-bolt arrangement, much used in modern jewelry for holding small or large gems or to secure necklaces.

bolt-saw (bōlt'sȧ), *n.* A saw for cutting off the bark-covered slabs from a log and forming them into squared bolts; a saw for the rough dressing of logs in the forest.

bolt-threader (bōlt'thred″ėr), *n.* A machine or device used to cut the thread on bolts.

bolt-wire (bōlt'wīr), *n.* Wire which is to be cut into blanks for small bolts.

Bolyaian (bōl-yī'an), *a.* Of or pertaining to John Bolyai (in Hungarian, Bolyai János), a Hungarian geometer who was born at Kolozsvár in 1802, and who died at Maros-Vásárhely in 1860.—**Bolyaian** or **Bolyai geometry.** See ★*geometry.*

bom, *n.* A simplified spelling of *bomb.*

boma (bō'mȧ), *n.* [Central African.] An inclosure of bushes, thorn, or stakes formed as a protection for a camp or village.

I went out on a sandspit into the lake and camped, cutting down the bush and placing it across the shore end of the bank so as to form a *boma.* At one o'clock in the morning the Turkana attacked and succeeded in breaking through the *boma,* a few of them getting into camp.

Geog. Jour. (R. G. S.), XI. 389.

Bomb calorimeter. See ★*calorimeter.*—**Bread-crust bomb,** a somewhat rounded mass of igneous rock, ejected in a volcanic eruption, whose surface presents an appearance similar to that of baked bread, as if the interior had expanded beyond the stretching capacity of the surface crust. The more or less vitrified surface and the seamed crust are characteristic.

bombardier, *n.* **4.** [*cap.*] A former name, among the Portuguese, for a Fleming or other foreigner.

The whole country spoke of this boat . . . with a crew that spoke like *Bombardiers.*

Geog. Jour. (R. G. S.), XI. 82.

bombardment, *n.*—**Molecular bombardment,** impact of the molecules of a vapor or gas against a submerged body or against any wall which forms a boundary to the gaseous volume. The resultant effect is the pressure which the vapor exerts. Under high electrostatic strain, especially in a high vacuum, such bombardment may exert considerable power on the bodies struck, causing them, for example, to give off X-rays or heat, and even fusing very refractory substances, as platinum.

Bombax, *n.* **3.** [*l. c.*] A plant of the genus *Bombax.*—**Bombax cotton,** the seed-hair of the bombax, known in commerce as *vegetable down, red-silk cotton, God-tree cotton, silk-cotton,* etc. The fiber is smooth, glossy, pliable, rectilinear, and from white to yellow-brown in color, but it is without spiral twist, and the cell-walls are thin and weak, making it unsuitable for spinning; hence it is chiefly used for such purposes as stuffing mattresses, etc.

bombed (bomd), *a.* [*bomb* + *-ed*[2]. Cf. F. *bombé.*] Rounded: as, a *bombed* frontal bone. *Keane,* Ethnology, p. 185.

That *bombéd* brow, that eye a kindling chrysoprase.

Browning, Fifine, x. 22.

Bombinæ (bom'bi-nē), *n. pl.* [NL., < *Bombus* + *-inæ.*] The *Bombidæ* considered as a subfamily of *Apidæ.*

bombom (bom'bom), *n.* [Also *bombon, bombong.* Philippine Sp.] Same as ★*bongbong.*

bombonne (bom-bon'), *n.* [F. *bombonne,* < Pr. *boumbouno,* < *boumbo,* a bomb, a bottle, = F. *bombe,* a bomb: see *bomb*[2].] A hollow vessel, usually of salt-glazed stoneware, either egg-shaped or cylindric, with three necks at the top and an exit-tap at one side near the bottom: used in the condensation of acids on a manufacturing scale: essentially a Woulfe's bottle.

bomb-signals (bom'sig″nalz), *n. pl.* See ★*signal.*

Bombyces (bom-bī'sēz), *n. pl.* [NL., pl. of *Bombyx.*] An old group of *Lepidoptera,* corresponding to the modern family *Bombycidæ.*

Bombylioidea (bom-bil″i-ō-id'ē-ạ), *n. pl.* [NL. (Coquillett, 1901), < *Bombylius* + *-oidea.*] A superfamily of dipterous insects comprising the so-called bee-flies of the family *Bombyliidæ* and their allies, including the *Apioceridæ* and *Mydaidæ.*

Bombyx, *n.* **3.** [*l. c.*] A wind-instrument of the ancient Greeks, probably sounded by a reed mouthpiece: so called from its shape.

bonanza, *n.* **II.** *a.* Very extensive and profitable. Compare *bonanza,* *n.*, 2.—**Bonanza farm,** in the great wheat-producing regions of the United States, a farm of great extent, operated on a gigantic scale.—**Bonanza farmer,** one who owns and operates a bonanza farm.

bonasi (bo-nä-sē'), *n.* [Cuban *bonasi,* from a native name (Pichardo).] The Cuban name of a species of grouper, *Mycteroperca bonaci,* a food-fish of the West Indies.

bonaventia (bon-ạ-ven'shạ), *n.* [Origin unknown.] A buggy with a wooden dash and a standing top. [Pennsylvania.]

Bonaventure formation. See ★*formation.*

Bonaveria (bō-nạ-vē'ri-ạ), *n.* [NL. (Scopoli, 1777), named in honor of J. B. *Bonaveria,* an Italian botanical artist of the 18th century.] A genus of dicotyledonous plants of the family *Fabaceæ.* See *Securigera.*

Bonavist bean. See ★*bean*[1].

bonbo (bon'bō), *n.* [Tibetan *Bon* (in Eastern Tibet *Bhön*) the name of this religion, + *Bod* (Eastern *Bhö*), Tibet.] The form of shamanism which forms the indigenous religion of Tibet. It is rapidly waning in the presence of the Lamaistic form of Buddhism which is now the dominant cult.

bonbonnière (boṅ-bon-iãr'), *n.* [F.] A box for holding bonbons or confections.

bond[1], *n.*, **12.** (*c*) Same as *bond-timber.*—**14.** In *elect.,* the rod, heavy copper wire, or weld which is used to connect the abutting rails of a railway-track to form an electric circuit.—**Bond and disposition in security,** an expression equivalent to bond and mortgage on land.—**Double bond.** In certain cases the atoms in chemical compounds do not exhibit their full valency. This behavior can sometimes be expressed by the assumption of a double union or bond between two polyvalent atoms, as in ethylene, $H_2C:CH_2$. The double bond is not stronger than two single bonds, nor in any way equivalent to them, except arithmetically. Compounds assumed to possess them are usually most readily attacked at the position of the double bond, either by reagents or by decomposing agencies, such as heat. In general, organic compounds with a double bond, such as defined, are distinguished by their ability to form derivatives by addition, while those without double unions, as paraffins, form derivatives by substitution.—**Joint bond,** in *law,* an undertaking executed by two or more parties all of whom must be joined as defendants in an action upon the bond.—**Resignation bond.** (*a*) In *eccles. law,* an instrument, usually attested by a notary, by which a beneficed clergyman voluntarily surrenders his benefice. (*b*) In *Scots law,* the surrender of a fee to a superior.—**Tax bond.** See ★*tax.*—**Three-quarter bond.** Same as *heart-bond.*

bond[1], *v. t.* **6.** To unite the ends of (two adjacent rails,) either by copper wires or cables, or by welding, in order to secure a low-resistance return-circuit for the electric current.

Briefly, my experience in *bonding* rails is that in the cast weld made since 1898 the bond at the beginning of

the pour is of lower resistance than a 90-pound rail of the same length as the weld.
Jour. Franklin Inst., April, 1904, p. 287.

Bondon cheese. See ★*cheese*[1].

bond-wire (bond′wīr), *n.* A wire used to make a good joint for the conduction of electricity from one railway rail to another.

bone[1], *n.*, **6.** (*e*) In *card-playing*, a chip of the smallest value.

10. A piece of horn or wood-fiber inserted in the sole of a wooden golf-club to prevent injury to the face of the club at the bottom.—**11.** The midrib of a leaf, especially that of a sugar-cane leaf or the large midrib of a palm-leaf. [Colloq., West Indies.]—**Bone-wire.** See ★*wire*[1].—**Cavalry bone,** a bone sometimes developed in the adductor muscle of the thigh in men who are constantly in the saddle.—**Dissolved bone,** bone which has been treated with sulphuric acid so as to produce the soluble monocalcic phosphate for use as a fertilizer. The term has often been used as a trade-name to include mineral phosphates similarly treated, these in some cases consisting of or containing the debris of fossil bone.—**Exercise bone.** Same as *cavalry* ★*bone* or ★*drill-bone.*—**Ground bone.** Same as *bone-dust* and ★*bone-meal.*—**Inca bone.** Same as *interparietal bone* (which see, under *interparietal*).—**Ligament bone.** Same as *sesamoid bone.*—**Lingual bone,** the hyoid bone.—**Riolan's bones,** small detached bones, like Wormian bones, occasionally present in the suture between the occipital bone and the petrous portion of the temporal bone.—**Suspensory bones,** in the fish skull, the chain of bones connecting the mandible to the cranium, consisting of the hyomandibular, the symplectic, and the quadrate.—**Ungual bone.** See ★*ungual.*

bone[1], *v. t.* **5.** To 'hold up' with a demand or importunate request for something, as for a small loan: as, to *bone* one for a 'fiver.' [Colloq.]

bone-body (bōn′bod′i), *n.* In *ceram.*, the composition of natural soft-paste porcelain, which contains a certain proportion of calcined bone.

His body was neither that of the French potters nor the true bone of the English, but partook of the characteristics of both, the proportion of phosphate of lime, as shown by analysis, being about eight per cent., a very much smaller percentage than in the English *bone-body.*
E. A. Barber, Pottery and Porcelain of the U. S., p. 126.

bone-cell (bōn′sel), *n.* In *histol.*, one of the stellate cells which produce bone; an osteoblast.

bone-conduction (bōn′ kọn-duk″shọn), *n.* Transmission of sound-waves to the auditory apparatus through the bones of the face.

bone-corpuscle (bōn′kôr″pus-l), *n.* Same as ★*bone-cell* or *osteoblast.*

bone-dry (bōn′drī), *a.* Very dry; as dry as a bone. *Modern Amer. Tanning*, p. 189.

bone-fat (bōn′fat), *n.* Fatty matter, of soft, semisolid consistence, extracted from bones by melting or by the use of solvents: used in making cheap soaps. *Jour. Soc. Chem. Industry*, VI. 825.

bone-flour (bōn′flour), *n.* The most finely divided portion of ground bones, separated from the coarser parts by sifting: used as a fertilizer. *Jour. Soc. Chem. Industry*, VII. 821.

bone-heap (bōn′hēp), *n.* **1.** A heap of bones.—**2.** In *archæol.*, a refuse-pile containing bones and other remnants of food of a prehistoric village. Bone-heaps are also found near villages of modern primitive tribes.

bonellein (bō-nel′ē-in), *n.* [*Bonell-ia* + *-e-* + *-in*[2].] A green pigment obtained from *Bonellia viridis.*

bone-meal (bōn′mēl), *n.* Bones reduced to a rather coarse powder by grinding: used in agriculture as a fertilizer. *Jour. Soc. Chem. Industry*, X. 151.

bone-oil, *n.* **2.** Fatty matter, of liquid consistence at common atmospheric temperature, extracted from bones by heating them with water or by the use of solvents: used in soap-making.

bone-painting (bōn′pān″ting), *n.* The custom of painting the bones of skeletons, particularly those of friends and relations. This custom seems to have prevailed in many parts of prehistoric America and also in other continents.

bone-powder (bōn′pou″dėr), *n.* Bones reduced to powder by grinding: used in agriculture as a fertilizer, and in the manufacture of mixed fertilizers. *Jour. Soc. Chem. Industry*, VII. 133.

bonery (bō′nẹ-ri), *n.* [*bone*[1] + *-ery.*] A place where bones are deposited.

boneset, *n.*—**Bastard boneset.** Same as *upland* ★*boneset.*—**Blue boneset,** the mist-flower, *Eupatorium cœlestinum.*—**Climbing boneset,** the climbing hempweed, *Willughbæa scandens.*—**False boneset,** any plant of the genus *Kuhnia.*—**Purple boneset,** the joepye-weed, *Eupatorium purpureum.*—**Upland boneset,** *Eupatorium sessilifolium,* a species with sessile but not connate leaves.

bone-shaker (bōn′shā-kėr), *n.* A humorous name applied to the bicycle before the introduction of rubber or pneumatic tires and other improvements. *Encyc. Brit.*, XXVII. 324.

bone-tankage (bōn′tangk″āj), *n.* Meat offal containing more or less bone in fragments: used in the manufacture of fertilizers.

bonga (bông′gä), *n.* [Tagalog and Bisaya *bonga* (*bongga*).] The betel-nut palm (*Areca Cathecu*), the nuts of which, together with the leaves of the betel-pepper and a little lime, form a masticatory called *buyo.* See *areca-nut.*

bongo (bong′gō), *n.* [Nat. African.] A large antelope, *Boocercus euryceros*, related to the harnessed antelope, found in the forests of Central and East Africa. Horns are present in both sexes; the hair is short, of a chestnut color, and there are a few white markings. In the eastern bongo, *Boocercus euryceros isaaci*, these markings tend to form stripes.

bonifacial (bon′i-fā″shal), *a.* [*boniface* + *-ial.*] Of or pertaining to a boniface or the landlord of an inn. *G. A. Sala.*

boning[2] (bō′ning), *n.* A form of machine-sewing in which two or more parallel lines of stitches are made in the fabric: used especially in corset-making as a means of holding the bones in place. See *two-needle machine,* under ★*sewing-machine.*

boning-knife (bō′ning-nīf), *n.* A kitchen-knife with a short, wide, and pointed blade, used in boning.

boning-stick (bō′ning-stik), *n.* Same as *boning-rod.*

boninite (bō-nin′-īt), *n.* [*Bonin* (Islands of Japan) + *-ite*[2].] A term proposed by Petersen (1891) for a glassy andesite containing bronzite, diallage, and olivine, occurring in the Bonin Islands, Japan.

bonism (bō′nizm), *n.* [L. *bon(us)*, good, + *-ism.*] The doctrine that the world is good, but not the best possible. See *optimism.*

bonist (bō′nist), *n.* [*bon(ism)* + *-ist.*] One who believes that the world is good, but not the best possible.

bonito[1], *n.* (*g*) In Australia, the oceanic bonito, *Gymnosarda pelamis.*

bonito[2] (bọ-nē′tō), *a.* [Sp., dim. of *bueno*, < L. *bonus*, good: see *boon*[2].] Pretty; nice; fine; graceful: an epithet in use in Spanish-speaking countries or regions originally settled by Spaniards.

bonnet, *n.*, **8.** (*b*) A portion of a coal-seam left for a roof. (*c*) A flat piece of wood on the top of a prop. (*d*) *pl.* Gas-coal or shale overlying a coal-seam or worked with it. [Scotch in senses *b*, *c*, and *d.*]—**15.** The lid or cover of a hole by which access may be had to valves or other apparatus in a closed chamber.—**16.** The protecting hood over the machinery or motor of a motor-vehicle, in front of the dashboard.—**17.** The plate on the motor-crank case, or on the transmission gear, normally closed, through which the cranks and gears of a motor-car can be inspected and cleaned and oiled.—**18.** *pl.* The spatter-dock, *Nymphæa advena* and the other species. See *Nymphæa*[1], 1.

bonnet, *v. t.* **2.** To provide with an iron shield or bonnet: as, to *bonnet* a safety-lamp. *Jour. Inst. Elect. Eng.* (Lond.), 1900–1901, p. 834.

bonnethead (bon′et-hed), *n.* A species of hammerhead, *Sphyrna tiburo*, abundant on the Atlantic coast of the United States. The head is kidney-shaped, rather than hammer-shaped as in the true hammerhead (*S. zygæna*).

bonnet-press (bon′et-pres), *n.* An apparatus for shaping a bonnet by pressing and ironing it.

bonnet-skate (bon′et-skāt), *n.* In *ichth.*, the common skate.

bonnet-stack (bon′et-stak), *n.* A metal chimney-stack having a cover or lid over its top, at a slight distance above the opening, to prevent snow and rain from falling into it. Sometimes the bonnet is made part of a spark-arrester netting over the top.

bonnet-wire (bon′et-wīr), *n.* A wire for stiffening hats and bonnets.

Bononian beds. See ★*bed*[1].

Bonsor's black. See ★*black.*

bont-tick (bont′tik), *n.* [D. *bont*, variegated, + E. *tick.*] A South African ixodid, *Amblyomma hebræum*, parasitic on live stock: so called because of the variegated color of the dorsum of the adult male. See *bont-leg* ★*tick.*

The tick of greatest importance, because of its injuries to stock, is Amblyomma hebræum Koch, commonly known as the *bont tick.* "Bont" is a Dutch word, equivalent to "variegated," and its application in this case has reference to the mixed coloring on the back of the male.
C. P. Lounsbury, in Proc. Assoc. Econ. Ent., 1900, p. 41.

bon voyage (boṅ vwo-yäzh′). [F.] A parting salutation meaning, I wish you 'a pleasant journey' (or 'voyage' if by water).

bony-fish, *n.* **2.** A common name of the tenpounder, *Elops saurus*, of the family *Elopidæ*, an abundant and widely distributed fish in tropical seas.

bony-tail (bō′ni-tāl), *n.* A fish of the Gila river, *Gila elegans.* Also called *Gila trout.*

boobook (bö-bök′), *n.* [In allusion to the cry of the bird.] A small owl, *Athene boobook*, of a rusty red color, found in Australia and Tasmania: so named on account of its peculiar call or hoot.

Booby prize. See ★*prize*[1].

boobyalla (bö-bi-ä′lą), *n.* [Aboriginal name.] A tree of southeastern Australia and of Tasmania, *Acacia longifolia*, a shrubby form of which is common in the coast regions and is of service in binding the sands. Also called *native willow.*

boodle[1], *n.* **4.** Same as *newmarket*, 1.

boodlerism (böd′lėr-izm), *n.* The practice, by persons in public office, of asking or accepting bribes, or of making corrupt bargains for their own profit, as in selling votes for money, office, or influence. [Slang, U. S.]

Boohoo fever. See ★*fever.*

boojery, *n.* See ★*budgeree.*

boojum (bö′jum), *n.* [A made word based unconsciously on *boo*, with a Latin-looking termination, *-jum*, *-ium.*] An imaginary animal introduced by C. L. Dodgson ("Lewis Carroll") as a particularly dangerous variety of 'snark,' into his "Hunting of the Snark."

Book of responses, in *Scots law*, the account, kept by the directors of the chancery, for entering all non-entry and relief duties payable by heirs taking precepts from chancery.—**Book of the Covenant,** a code of laws which, according to Exodus xxiv., is ascribed to Moses. Recent writers consider the substance of the code to be found in Exodus xx. 24–xxiii. 19. Also called *Greater Book of the Covenant.*—**Book of the Dead,** a papyrus which the Egyptians placed with the mummy in the coffin, to furnish the deceased with needful directions for the journey to the life beyond.—**Book value,** in *bookkeeping*, the value of any commodity as shown by the books of a firm or commercial concern, as distinguished from its market value (which see, under *market*).—**Caroline Books,** four books written under the direction of Charlemagne, during the controversy of the eighth century concerning image-worship. The books contain a censure of the decrees of the council of Nicæa on the adoration of images, and established the principle of the freedom of Christian art in representing Christian ideas.—**Golden book.** See ★*golden.*—**Little Book of the Covenant,** the name given by critics to the brief legislative section in Exodus xxxiv. 12–26, the contents of which are similar to parts of the Book of the Covenant.—**Red book.** See ★*red*[1].

Bookbinders' varnish, wire. See ★*varnish*, ★*wire.*

book-buyer (bůk′bī-ėr), *n.* One who buys books.

book-crab (bůk′krab), *n.* Same as *book-scorpion.*

booker (bůk′ėr), *n.* **1†.** A writer of books; a scribe.—**2.** A 'spotter.' *All the Year Round*, July 11, 1863.—**3.** An entry-clerk or bookkeeper.—**4.** One who makes up finished goods into 'books.'

book-gill (bůk′gil), *n.* The respiratory organ of *Limulus*, which is regarded as comparable to the lung-book of a scorpion everted and adapted for aquatic respiration.

booking (bůk′ing), *n.* The act of engaging or securing beforehand (by registry or payment) a box or seat at the opera, a passage on a steamer or train, etc.

book-lung (bůk′lung), *n.* The lung-book of a scorpion. See ★*lung-book.* *Parker and Haswell*, Zoölogy, I 605.

book-marker (bůk′märk-ėr), *n.* Same as *bookmark.*

book-number (bůk′num-bėr), *n.* In *library-cataloguing*, a particular number (or a number and a letter) designating the book in its proper sequence in the smallest division to which it belongs. It is the number that is individual to the book itself or any copy of it, and with the class-number (which may be borne by a thousand books) makes up its identification-number not only in the given library, but in every library using the same system. The accession-number, which marks the order of receipt, belongs only to the particular copy which bears it. In the Cutter and Dewey systems the book-number consists of the initial letter or letters of the author's name, followed by a number which indicates in a printed list the rest of the name.

book-sewer (bůk′sō″ėr), *n.* One whose occupation is to fasten together with thread the different sections or foldings of a book.

book-stamp (bůk′stamp), *n.* The plate of hard metal (usually of brass) which contains

the decoration or letters selected for stamping the covers of a book.

booky[1] (bůk'i), *a.* [*book* + *-y*[1].] **1.** Bookish; given to reading: as, a *booky* person.—**2.** Derived from books: as, *booky* lessons. *Mark Twain.* [Colloq.]

booky (bůk'i), *n.* [*book* + *-y*[2].] Same as *book-maker*, 3. [Slang.]

bool[3] (böl), *n.* [Australian.] Same as ★*beal*[3].

boom[2], *n.* **6.** A pole fastened lengthwise of a load of hay to bind the load. *Stand. Dict.* —**Down booms!** (*naut.*), an order to send on deck the studdingsail-booms from the yard-arms.—**Sheer boom**, a boom so secured that it guides floating logs in the desired direction. Also called *fender boom* and *glancing boom.*

The formation of the gorge is supposed to have been caused by the driving of piles in the Mississippi River at a point a few miles above Alma, Wis., to hold a *sheer boom* for the purpose of running the logs which had been loosened from the sandbars and shores of the Chippewa and Mississippi rivers by the recent heavy rains into the Zumbra River for safe harbor.

U. S. Monthly Weather Rev., Nov., 1896, p. 407.

boomah (bö'mä), *n.* A false spelling of *boomer*[1], 1 (a kangaroo), used on the supposition that the name was native Australian.

boom-band (böm'band), *n.* A band for the boom of a sail-boat. It is made in two parts held together on the boom by bolts and nuts, and fitted with an extra half-band for holding the hook of a block.

boom-buoy (böm'boi), *n.* Same as ★*boom-stay.*

boom-chain (böm'chān), *n.* A short chain which fastens boom-sticks end to end.

boom-company (böm'kum-pa-ni), *n.* A corporation engaged in handling floating logs, and owning booms and booming privileges. [U. S.]

boom-crane (böm'krān), *n.* A crane having a vertical mast, steadied at the head and foot by proper pivots, and a horizontal boom projecting at right angles from the mast, and braced to it by an inclined strut; a ★jib-crane (which see).

booming[3] (böm'ing), *n.* In *mining*, ground-sluicing on a large scale by emptying the contents of a reservoir at once on material collected below, thus removing boulders. *Coal and Metal Miners' Pocketbook.*

boom-rat (böm'rat), *n.* In *lumbering*, one who works on a boom. [Slang.]

boom-stay (böm'stā), *n.* A heavy weight used to anchor booms in deep water, its position being indicated by a pole or float attached to it. Also called a *boom-buoy.*

boom-stick (böm'stik), *n.* In *lumbering*, a timber which forms part of a boom. [U. S.]

boom-town (böm'toun), *n.* A town or community which has acquired sudden wealth and notoriety through land speculation, etc.; also, a town which originated in a real estate 'boom.' [Western U. S.]

boomy (bö'mi), *a.* [*boom*[1] + *-y*[1].] Hollow; deeply resonant.

boost[1], *n.* **2.** A charge of short duration, at a high current-rate, given to an electrical storage battery in order to prolong its usefulness.

booster (bö'stėr), *n.* [*boost*[1] + *-er*[1].] **1.** One who boosts.—**2.** In *elect.*, a device by which the electromotive force in an electric circuit is regulated.

boot[2], *n.* **11.** In *agri.*, the uppermost leaf-sheath, just below the brush or head, of a broom-corn plant; also the lowest leaf-bearing internode on a stalk of wheat.—**Junod's boot**, a surgical appliance for exhausting the air surrounding a limb in order to draw blood to it.

boot-grain (böt'grān), *n.* A leather made from cowhide: used for heavy boots. *Modern Amer. Tanning*, p. 114.

boothite (böth'īt), *n.* [Named after Prof. Edward *Booth* of California.] A hydrated copper sulphate ($CuSO_4+7H_2O$), similar in form to melanterite and pisanite: found in California.

boot-leg, *n.* **2.** One of the levers connected with the winding mechanism of a spinning-mule: so named from its shape. *Nasmith*, Cotton Spinning, p. 269.

boot-lick (böt'lik), *n.* A mean, cringing person; a toady. [U. S.]

booz, *v. i.* and *n.* A simplified spelling of *booze*, *boose.*

boquin (bō-kēn'), *n.* [Sp.] A baize of coarse texture.

bora[2] (bō'rä), *n.* [Native Australian.] A ceremony of the natives of eastern Australia by which a boy is admitted to the rights of manhood.

The great mystery of the Blacks is the *Bora*—a ceremony at which the young men found worthy receive the rank of warriors. *R. M. Praed*, Australian Life, p. 24.

boracha (bo-rä'tshä), *n.* [Braz. Pg., a particular use of Pg. *borracha*, a leather bottle, a rubber bag, etc.: see *borachio.*] A conventional weight of crude india-rubber, used to designate, in the Amazonian rubber districts, the bundle in which india-rubber is shipped.

borage, *n.*—**Ceylon borage**, a coarse, hardy annual plant, *Boraginoides Zeylanicum* (*Borago Zeylanica* of Burman), a native of southern India and Ceylon, and naturalized in Australia and Tasmania.—**Native borage**, a name in Australia of the *Ceylon borage.*

Borago (bō-rā'gō), *n.* [NL. (Linnæus, 1753, adopted from Tournefort, 1700): see *borage.*]

Borago officinalis L.

a, top of flowering branch (one-half natural size); *b*, fruit (enlarged); *c*, a stamen (enlarged). (From Britton and Brown's "Ill. Flora of the Northern States and Canada.")

A genus of dicotyledonous plants, type of the family *Boraginaceæ*, including 3 species all natives of the Mediterranean region. They are annual or biennial herbs, with hirsute or hispid foliage and showy blue flowers in terminal racemes. In some parts of Europe, *B. officinalis* is used as a pot-herb and sometimes with salads. Only the young leaves are palatable. See *bee-bread*, 2.

boragoid (bō'ra-goid), *a.* [*Borago*, type-genus of the *Boraginaceæ*, + *-oid.*] Resembling *Borago:* applied specially to the extreme extra-axillary inflorescence of certain boraginaceous plants, as *Anchusa.* *Schumann.*

borak[1] (bor'ak), *n.* [See ★*barrack*[2].] An aboriginal Australian term for banter; chaff; fun, especially at the expense of another: as, to poke *borak* at one, that is, to make game of him. [Colloq., Australia.]

On telling him my adventures, how Bob in my misery had "poked *borack*" at me.

Australasian Printers' Keepsake, p. 75.

borak[2] (bō'rak), *n.* Spirit distilled from rice.

When quiet had been restored we all sat down, and *borak* (rice spirit) was produced, healths drunk, and speeches made. *Geog. Jour.* (R. G. S.), XVI. 49.

Borate of lime, a salt, more correctly called *calcium borate*, which occurs as the mineral colemanite in great abundance in California, and is used as a material from which to make boracic acid and borax.—**Borate of manganese**, a salt extensively used as a dryer to hasten the absorption of oxygen from the air by linseed-oil and the consequent hardening of paints made with this oil as a vehicle.

borated (bō'rā-ted), *a.* Mixed or treated with boracic acid or borax or with both.—**Borated gauze**, gauze prepared with boracic acid for surgical use in dressing wounds.—**Borated milk**, milk to which boracic acid or borax, or both, have been added as preservatives. Careful experiments, made by the United States Department of Agriculture, have shown that such additions to food, although not in the ordinary sense of the term poisonous, are unwholesome and, in time, injurious.—**Borated talcum**, finely pulverized talc to which boracic acid has been added.

borax, *n.*—**Burned borax**, borax which has been deprived of its water of crystallization by being heated.—**Octahedral borax**, in *chem.*, sodium pyroborate when crystallized under special conditions with 5 molecules of water of crystallization ($Na_2B_4O_7.5H_2O$); it then assumes the form of the regular octahedron. The common or prismatic borax contains 10 molecules of water and crystallizes in monoclinic forms.

Borboridæ (bôr-bor'i-dē), *n. pl.* [NL., < *Borborus* + *-idæ.*] A family of acalyptrate flies, comprising small, stout species, usually of dark color and with clear wings. They occur in large numbers on the dung of animals and breed exclusively in this substance.

Borborus (bôr'bō-rus), *n.* [NL. (Meigen, 1830), < Gr. *βόρβορος*, mud, mire.] A genus of small acalyptrate flies typical of the family *Borboridæ*, containing black or blackish-brown species, some of which have rudimentary wings.

Bordeaux, *n.*—**Alizarin Bordeaux**, a mordant dyestuff derived from anthracene. It is similar in properties to alizarin, but produces colors of a much bluer character.—**Bordeaux B, BL,** and **R,** synonymous names for an acid coal-tar color of the monoazo type, prepared by combining diazotized α-naphthylamine with β-naphthol-disulphonic acid. It dyes wool a vinous red in an acid bath.—**Bordeaux BX,** a name applied to two acid coal-tar colors of the diazo type which differ but slightly in composition. They both dye wool a vinous red in an acid bath.—**Bordeaux DH** and **S,** synonymous names for an acid coal-tar color, the same as *fast* ★*red D.*—**Bordeaux extra** and **COV,** synonymous names for a direct cotton coal-tar color, the same as *Kongo* ★*violet.*—**Bordeaux G.** (*a*) An acid coal-tar color similar to ★*Bordeaux BX.* (*b*) Same as ★*Bordeaux B.*—**Bordeaux hammer.** See ★*hammer*[1].—**Bordeaux mixture.** See ★*mixture.*—**Bordeaux Pottery.** See ★*pottery.*—**Brilliant Bordeaux,** an acid coal-tar color which dyes wool a vinous red in an acid bath.—**Cotton Bordeaux,** a direct coal-tar color of the diazo type, derived from diamido-diphenyl-ketoxim. It dyes unmordanted cotton a bluish red in a salt bath.—**Diamine Bordeaux B** and **S,** two direct coal-tar colors of the diazo type, derived from benzidine. They dye unmordanted cotton a claret red in an alkaline salt bath.—**Diazo Bordeaux,** a direct coal-tar color closely allied to primulin. It dyes unmordanted cotton in a salt bath, but for the best results subsequent diazotizing and developing are necessary.—**Fast Bordeaux,** a mordant acid coal-tar color, same as *cloth* ★*red B.*—**Hessian Bordeaux,** a direct coal-tar color of the diazo type, derived from diamido-stilbene. It dyes unmordanted cotton a claret red in an alkaline salt bath.—**Naphthylamine Bordeaux.** Same as *alpha-naphthylamine* ★*red.*

bordereau (bôr-drō'), *n.*; pl. *bordereaus* or *bordereaux* (-drōz', -drō'). [F., OF. *borderel*, *bordrel*, < *bord*, edge, strip of paper, etc.: see *board*[2], *border.*] A memorandum or note, especially one containing a more or less detailed list of documents.

bordered, *p. a.* **2.** In *bot.*, having the margin distinct from the rest of the organ either in texture or color.—**Bordered pit,** one of the pits in coniferous and other kinds of wood which are surrounded by a thickened border. They consist of thin spots, pervious to water, and regulate the passage of the sap from one cell to another. They are best seen in radial section. See cuts under ★*Araucarioxylon* and ★*Cupressinoxylon.*—**Bordered pore.** Same as ★*bordered pit.*

borderism (bôr'dėr-izm), *n.* A word, an expression, or conduct characteristic of the borders, especially the English and Scottish Border.

border-pen (bôr'dėr-pen), *n.* A drawing-pen having several points, used in making broad decorative edges or borders.

border-shears (bôr'dėr-shērz), *n.* Long-handled clipping-shears for trimming the edges of lawns: often fitted with a small wheel to support their weight.

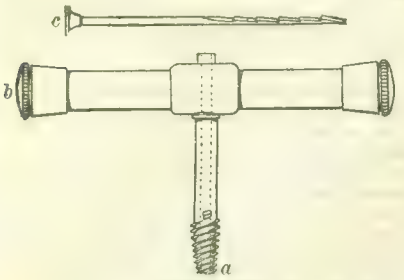
borealize (bō'rē-a-līz), *v. i.*; pret. and pp. *borealized;* ppr. *borealizing.* To adopt northern manners or ways of thinking and speaking.

Gill gives a Northern origin to *geaun* for gown and Spenser *borealized* in his pastorals.

Lowell, Introduction to Biglow Papers, 2nd ser., p. 174.

bore-bit (bōr'bit), *n.* A piece of steel which forms the cutting-edge of a rock-boring drill.

boree[2] (bō-rē), *n.* [Prob. from aboriginal Australian (in Queensland) *booreah*, fire. It is especially preferred by the natives for firewood.] The weeping myall, *Acacia pendula*, which yields a hard, close-grained, violet-scented wood used by turners and cabinet-makers. [Eastern Australia.]



borele (bor'e-le), *n.* [Bechuana.] The native (Bechuana) name of the black rhinoceros, *Rhinoceros bicornis*, used frequently as a book-name.

bore-meal (bōr'mēl), *n.* The fine material taken from a hole which is being bored through rock which is comminuted by the action of the drill.

Boreogadus (bō-rē-og'a-dus), *n.* [NL., < Gr. *βορέας*, the north (*βόρειος*, of the north), + *γάδος*, a fish (see *Gadus*).] A genus of small codfishes of the arctic seas, typified by the species *B. saida.*

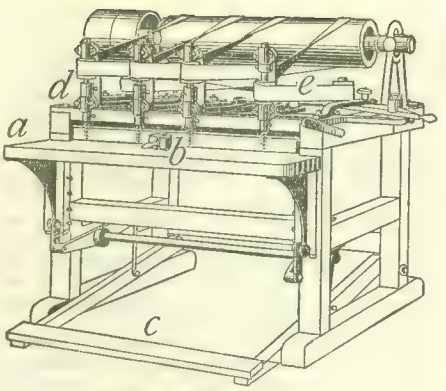
borer, *n.* **8.** A marine snail, as *Urosalpinx cinerea:* so named because of its habit of boring through the shells of oysters and other mollusks.—**Accretion borer,** an instrument for determining the growth in diameter of standing trees. It consists of a hollow auger, which, when bored into a tree, extracts a section showing the annual rings.—

Apple-tree borer (*a*) The larva of the American cerambycid beetle, *Saperda candida* (which see, with cut); the round-headed apple-tree borer. (*b*) The larva of the American buprestid beetle, *Chrysobothris femorata*

Accretion Borer.

a, hollow auger; *b*, hollow handle in which other parts are carried; *c*, rod for extracting wood section.

(which see, with cut); the flat-headed apple-tree borer.—**Blackberry saw-fly borer,** the larva of an American insect, *Janus fumipennis.*—**Clear-wing borer,** any one of several species of moths of the lepidopterous family *Sesiidæ*, whose larvæ bore into trees, as *Sesia acerni*, the clear-wing borer of the maple.—**Cucumber caterpillar borer,** a pyralid moth, *Diaphania nitidalis*, found in North and South America and the West Indies, whose larvæ bore into the fruit of cucumbers and melons. The larva is also called the *pickle-worm.*—**Flathead borer,** the larva of any one of many species of beetles of the family *Buprestidæ* which bore into the branches and trunks of trees and which have an enlarged and flattened thorax and head: as, the *flat-headed apple-tree* ★*borer*, larva of *Chrysobothris femorata.*—**Hammer-head borer.** Same as *flathead* ★*borer* (which see).—**Increment borer.** See *accretion* ★*borer.*—**Larger corn-stalk borer.** Same as *sugar-cane borer* (which see).—**Long-horned borer,** a name of any wood-boring beetle of the family *Cerambycidæ.*—**Pacific peach-tree borer,** the larva of a sesiid moth, *Sanninoidea opalescens*, which bores into the trunks and larger branches of the peach on the Pacific coast of the United States.—**Peach-tree borer.** (*b*) Same as *peach-borer*, 1.—**Pear-tree borer,** the larva of a sesiid moth, *Sesia pyri*, which feeds on the inner layer of the bark of the pear-tree in the eastern United States.—**Red borer,** the larva of an oriental cossid moth, *Zeuzera coffeæ*, which bores into the stems of the coffee-plant in the East Indies.—**Round-headed borer,** the larva of any one of many species of beetles of the family *Cerambycidæ*, which bore into the trunks and branches of trees: in contradistinction to the flat-headed borers of the coleopterous family *Buprestidæ*; specifically, the round-headed borer of the apple, *Saperda candida.*—**Sequoia-borer,** the larva of a sesiid moth, *Vespamima sequoiæ*, which bores into the branches of the sequoias of the Pacific coast.—**Smaller corn-stalk borer,** an American phycitid moth, *Laodamia lignosellus*, occurring in the eastern United States and South America, whose larva bores into the lower sections of corn-stalks.—**Sugar-cane borer.** (*a*) See *sugar-cane.* (*b*) The larva of a crambid moth, *Diatræa saccharalis*, which bores in sugar-cane in the West Indies and the southern United States, where it is also known as the *larger corn-stalk borer.* (*c*) A scolytid beetle, *Xyleborus perforans.* (*d*) The larva of the sugar-cane weevil, a calandrid beetle, *Sphenophorus obscurus*, common in the islands of the Pacific.—**Sweet-potato borer,** a brenthid beetle, *Cylas formicarius*, also called *sweet-potato weevil*, occurring in Cochin China, Madagascar, the Antilles, and in the southern United States. It bores in the tubers of the sweet potato.—**Tulip-tree borer,** any one of several coleopterous insects which bore into the tulip-tree, notably the cerambycid *Centrodera decolorata*, whose larva bores into the heart-wood.—**Wine-cask borer,** a scolytid beetle, *Xyleborus perforans*, which frequently perforates wine-casks in the East and West Indies. It also attacks sugar-cane.

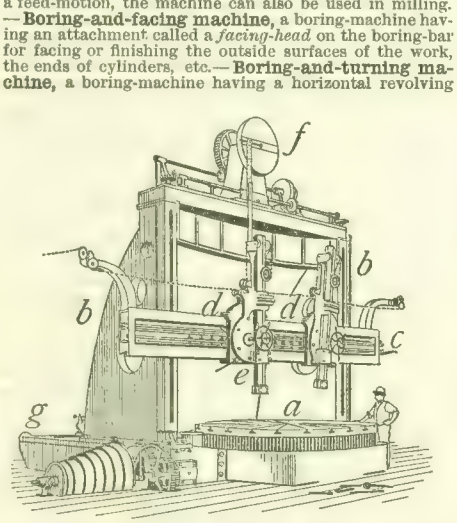


bore-rod (bōr′rod), *n.* A long rod, usually made up in sections, which is used for drilling deep wells, the drill being carried at the lower end of the rod.

Boreus (bō-rē′us), *n.* [NL. (Latreille, 1825), < Gr. *βόρειος*, boreal.] A genus of curious mecopterous insects of the family *Panorpidæ*, composed of wingless species which look like small wingless grasshoppers. They are often found on snow in the winter.

Borhyænidæ (bō-ri-ē′ni-dē), *n. pl.* [NL. *Borhyæna*, the type-genus, + *-idæ*, family ending.] A family of extinct creodont mammals whose members have some points of resemblance to the living marsupial *Thylacinus.* The angle of the jaw is somewhat inflected, and very few of the teeth are known to have had milk predecessors. The known species are from the Santa Cruz formation (Miocene?) of Patagonia. *Ameghino*, 1894.

borickite (bō′rik-īt), *n.* [Named after Prof. E. *Boricky* of Prague.] A hydrated phosphate of ferric iron and calcium, occurring in reddish-brown reniform masses.



boring-machine, *n.* This term includes a great variety of wood-boring machines used in the building of cars and wagons, in making furniture and agricultural machinery, etc. They are named from the work they do, or from the number and arrangement of the augers. They are often combined with other machines. Many are automatic in action and adjustable for spacing the distances between the holes or for boring holes at different angles, and they range in size from a single-auger bench-machine up to very large multiple borers having ten or more augers making holes at different angles and of different sizes.—

Multiple Wood-boring Machine.

a, table with vertical traverse; *b*, adjustable stop for holding work on table; *c*, treadle operating table to bring work up to augers; *d*, spindles carrying augers, adjustable to any position; *e*, belt operating all spindles.

Boring-and-drilling machine, a boring-machine that can also be used for drilling, tapping, and screw-cutting. Both horizontal and vertical forms are in use. One type has a vertical spindle supported by a saddle which has a traverse on a cross-rail supported between two columns. The saddle and the cross-rail are swiveled, enabling the operator to present the boring-tool to the work in any direction. The cross-rail has a traverse up and down the whole height of the columns to admit large work under the point of the boring-tool. Other types have horizontal spindles, with a fixed or a movable table. When the table is given a feed-motion, the machine can also be used in milling.—**Boring-and-facing machine,** a boring-machine having an attachment called a *facing-head* on the boring-bar for facing or finishing the outside surfaces of the work, the ends of cylinders, etc.—**Boring-and-turning machine,** a boring-machine having a horizontal revolving

Boring-and-turning Machine.

a, revolving table; *b*, *b*, housing; *c*, cross-rail; *d*, *d*, saddles traversing cross-rail, one in inclined position; *e*, tool-bar; *f*, slotting attachment; *g*, bed on which housing travels forward and back: housing shown in forward position. Boring-bar carried on extra saddle not shown.

table and vertical boring and cutting-tools, upheld by a tool-bar or boring-bar supported from saddles that traverse a cross-rail supported by housings. In essential features it is a modification of a lathe, set on end, the rotary table taking the place of the vertical face-plate of the lathe. The cross-rail carrying cutting-tools is also an adaptation from the planer, the only difference being that in this machine the traversing table has a rotary motion, the cutting being done in circles: hence the name *turning-machine.* In small machines only one tool-bar is used; in the *turret boring-and-turning machine* the tools are carried in a turret over the table. In large machines a boring-bar is placed on the cross-rail between the cutter-bars, boring and cutting being done at the same time. Supplementary horizontal tool-bars at the side of the table and slotting attachments are also used. In large machines the housing has a traverse, forward and back, to bring the boring-bar to the center of the work. See ★*milling-machine* and ★*drilling-machine.*—**Boring-, drilling-, and milling-machine,** a machine of which the spindle is supported by a saddle that can traverse up and down a column. In one type the work is placed on a fixed table or on the floor, and the column also has a traverse. This makes it possible to use the machine in milling. In another type the column is fixed and the table has a traverse to right and left and, by the addition of a supplementary table, a rotary motion. Sometimes called *floor drilling-machine.*—**Crank boring-machine,** a machine with a single vertical spindle supporting a cutter-head having three cutters working in a circle and cutting a very large hole.—**Cylinder-boring machine,** a machine for boring out and finishing engine-cylinders. The boring-bar may be horizontal or vertical and may have a fixed cutter-head for the tools, the bar being fed to the work; or the cutter-head may travel upon the boring-bar, turning with it and having its own feed. In some machines one of the heads supporting the boring-bar may travel upon the bed of the machine for convenience in adapting the machine to the cylinder; in others two or three boring-bars are used for compound cylinders and valve-chambers. Larger machines have attachments for boring the ports of cylinders and adjusting the boring-bar to various sizes of cylinders.—**Elbow boring-machine,** a single vertical-spindle

machine supported by a horizontal jointed arm to enable the workmen to bore holes at irregular distances over a wide surface.—**Hub-boring machine,** a large machine for boring holes in blocks of wood preparatory to turning down the blocks in a lathe in making wagon-hubs. In some forms the augers are automatically fed to the work; in others the work is fed to the augers.—**Locomotive-rod boring-machine,** a boring-machine having two vertical spindles mounted upon a rail that is supported by massive columns. The spindles travel upon the rail in either direction to bring them to the work laid upon the table.—**Post boring-machine,** a boring-machine affixed to a post. It has a single vertical spindle and an adjustable table to bring the work to the auger at any angle.—**Universal boring-machine,** a boring-machine in which the auger may be used to bore a hole in any direction. In one type the auger is supported on a bracketed arm that swings in any direction over a table on which the work is laid; in another the auger is fixed and the table can be so adjusted as to present the work to the auger at any angle; and in still another the auger can be moved up and down on an upright column which is free to turn on its axis.—**Vertical chord-boring machine,** a very large machine used for boring holes in bridge-work. It has two spindles carried by vertical heads, one of which travels upon the bed of the machine for convenience of adjustment.

boring-ram (bōr′ing-ram), *n.* In *mining*, a machine-drill provided with a hammer-head that can be used for driving wedges.

borize (bō′rīz), *v. t.*, pret. and pp. *borized*, ppr. *borizing.* [*bor(ax)* + *-ize.*] To heat with boracic acid; specifically, to inject a solution of boracic acid into the circulatory apparatus of a slaughtered animal with the object of preserving the meat.

Borkholm beds. See ★*bed*[1].

borlase (bor′läs), *n.* [Origin not ascertained.] The blackfish or black ruff, *Centrolophus niger*, of the coasts of southern Europe.

Borneo camphene, tallow. See ★*camphene*, ★*tallow.*

bornesite (bôr′nē-sīt), *n.* [**Bornese* (< *Borneo* + *-ese*) + *-ite*[2].] The monomethyl ether of inosite, $C_6H_{11}O_6CH_3$. It is found in the caoutchouc of Borneo. It is crystalline, easily soluble in water, and melts at 175° C.

Bornhardt's machine. See ★*machine.*

borofluoric (bō″rō-flö-or′ik), *a.* Same as *fluoboric.*

borofluoride (bō-rō-flö′ō-rid or -rīd), *n.* Same as *fluoboride.*

boroglycerate (bō-rō-glis′e-rāt), *n.* A trade-name for each of two antiseptic preparations made by heating sodium borate (borax) or calcium borate with glycerin.

boroglyceric (bō″rō-gli-ser′ik), *a.* [*bor(ax)* + *glycer(ol)* + *-ic.*] Derived from boracic acid and glycerol.—**Boroglyceric acid** (H_3BO_3), a compound of boracic acid with glycerol, supposed to exist in solutions containing both substances. It reacts as a monobasic acid, requiring for neutralization one molecule of sodium hydroxid for each molecule of boracic acid.

boroglycerin (bō-rō-glis′e-rin), *n.* [*bor(ax)* + *glycer(ol)* + *-in*[2].] An antiseptic patented by Barff and used for fruits and wines. It is prepared by heating 92 parts of glycerol and 62 parts of boracic acid to 200° C.

borol (bō′rol), *n.* [*bor(ax)* + *-ol.*] A material, patented under this name in Germany, which is made by melting boracic acid with alkaline bisulphates. It is soluble in water, and is proposed for use in the bating or removal of lime from hides in preparing them for tanning.

Boron nitride, in *chem.*, a curious white solid substance, insoluble in water and in most acids, obtainable by the direct action of the two elements, boron and nitrogen, upon each other at a high temperature, or more conveniently by heating to redness a mixture of borax and sal ammoniac and washing out all matter soluble in water and hydrochloric acid. Its composition is represented by the formula BN.—**Boron trioxid,** in *chem.*, the anhydrid of boracic acid, obtained by heating this acid as long as vapor of water is given off. The formula for the oxid is B_2O_3.—**Diamond boron,** an extremely hard crystallized form of boron.

boron-bronze (bō′ron-bronz″), *n.* An alloy of aluminium and copper containing some boron, which last makes the alloy more dense and tough than aluminium bronze.

Boronia (bō-rō′ni-ạ), *n.* [NL. (J. E. Smith, 1798), named in honor of Francesco *Borone* (1769–94), an Italian botanist.] A genus of Australian shrubs of the family *Rutaceæ.* They have opposite leaves, odd-pinnate, trifoliate, or simple, pink-purplish, red, or white 4-merous flowers with a rue-like fragrance. There are about 60 species. The horticultural value of these plants is in their fragrance; a small specimen will perfume a whole house for two or three weeks. *B. pinnata, B. megastigma, B. denticulata, B. elatior, B. heterophylla, B. crenulata*, are some of the species grown.

borophenate (bō-rō-fē′nāt), *n.* [*bor(ax)* + *phen(ol)* + *-ate*[1].] A mixture of salts of boracic acid and of phenol: as, bismuth *borophenate*, an antiseptic dusting-powder.

Borough council. See ★*council.*—**County borough.** See ★*county*[1]

boroughmongery (bur'ō-mung″gėr-i), *n.* The buying and selling of parliamentary representation; boroughmongering. *H. Martineau.*

borracha (bō-rä'chä), *n.* [Braz., < Pg. *borracha*, a leather bottle. This is the usual form in which the substance is prepared for market.] Caoutchouc or crude rubber when in the form of large balls or bottles. It is composed of many layers of the dried and smoked rubber-milk which have been built up on a central stick or paddle during the smoking process. These layers are easily separated, and when stretched are very transparent. The rubber smells not unlike smoked bacon. See *caoutchouc*, *india-rubber*, and ★*rubber*. [Brazil.]

borroto (bor-ō'tō), *n.* See ★*baroto*.

borrow[1], *n.* 5. Same as *borrow-pit*.

borrow[1], *v.* **I.** *trans.* 5. A term used specifically in *organ-building:* (*a*) of a pipe which improperly takes the wind from another and sounds at the latter's expense; (*b*) of a stop or set of pipes which is incomplete in itself, but which is filled out by using some of the pipes of another stop or set: within certain limits the latter arrangement is entirely legitimate, since it renders possible the use of the same pipes in two distinct connections. — **To borrow trouble**, to be needlessly or unduly anxious, especially over misfortunes that are still contingent.

II. *intrans.* 2. In *golf*, when putting across sloping ground, to play the ball a little up the slope to counteract its effect.

borrowed, *p. a.* 3. In *organ-building*, said of pipes or a stop. See ★*borrow*, *v. t.*, 5 (*b*). **Borrowed days**, in Cheshire, the first eleven days of May, regarded as taken, in the change from old style, from April.—**Borrowed light**, reflected light, as the light of the moon, which is merely borrowed from the sun.

bort, *n.*—**Dutch bort**, a local name given at the Kimberley diamond-mines to zircon.

Borzor dog. See ★*dog*.

boschveldt (bosh'velt), *n.* [D., 'bush land.'] A South African name for an open plain covered with bush.

Boscovichian (bos-kō-vich'i-an), *a.* Pertaining to Ruggiero Giuseppe Boscovich (1711–87), an Italian Jesuit philosopher, physicist, and mathematician, and particularly to his "Theory of Natural Philosophy," published in 1758. Discarding the unverifiable metaphysical hypothesis that within a certain spherical surface about the center of each atom its inertia and attractive and repulsive force is distributed through space, so that at that surface there is a discontinuity and an infinite force, he supposed that the matter within that surface was, like the matter we see, to be explained atomically. He therefore made each atom to be confined to an absolute point where its inertia was concentrated, while in its attractive-repulsive force it was diffused throughout space, thus allowing this force to be infinite and repulsive at a spherical surface, should experiment require that hypothesis, although he held that in the existing state of knowledge the force seemed to vary so as to be attractive at some distances and repulsive at others.—**Boscovichian point** or **atom**, an atom, as above described, whose inertia is confined to a point.

bosh-water (bosh'wâ″tėr), *n.* Water which is circulated around the outside of the boshes of a blast-furnace to prevent them from getting too hot.

Most of the power houses for these plants have their steam boilers supplied by the waste blast gases, no additional fuel being required; the *bosh water* which is circulated around the tuyeres and cooling plates of the furnaces can be used as condensing water, so that power can be generated very economically, as the power plants for this purpose generally use compound condensing engines of good steam economy.

Sci. Amer. Sup., March 7, 1903, p. 22727.

Bosnian group. See ★*group*[1].

bosom-knee (bu̇z'um-nē), *n.* A knee secured to a vessel's side and the after side of a deck-beam. Also called *lap-knee*.

boss[1], *n.* 10. In *geol.*, an irregular knob-like outcrop of eruptive rock, especially of granite. *Geikie*, Text-book of Geol., p. 722.—**Boss of the stern-post**, in *ship-building*, that part of the stern-post of a screw-steamship where it is swelled out to permit the propeller-shaft to pass through it.

boss[1], *v.* **II.** *intrans.* — **To boss up**, to form a boss or projection on the face of a forging, either by upsetting the metal of the forging or by welding on a piece. Sometimes machining the edges of such bosses is also called *bossing up*.

boss[3] (bos), *n.* The worked-out portion of a mine; the goaf. *Barrowman*, Glossary. [Scotch.]

boss[3] (bos), *v. t.* In *mining*, to hole or undercut. *Barrowman*, Glossary. [Scotch.]

Bossardville limestone. See ★*limestone*.

boss-cockie (bos'kok″i), *n.* A slang name in the Australian bush for a farmer whose holding is large enough to require the employment of laborers to assist him in working it. *E. E. Morris*, Austral English.

bossed (bost), *a.* [*boss*[1] + *-ed*[2].] Having a boss or bosses; specifically, in *ship-building*, swelled out or enlarged to form a boss or rounded protuberance.

boss-frame (bos'frām), *n.* See ★*frame*, 5, (*b*).

bossing[2] (bos'ing), *n.* In *mining*, the holing or undercutting of a thick seam, as of limestone, the height of the undercut being sufficient for a man to work therein. [Scotch.]

bossing-machine (bos'ing-ma̤-shēn″), *n.* A steam-hammer used for welding the bosses on built-up car-wheels.

boss-plate (bos'plāt), *n.* In *ship-building*, one of the sharply curved plates of the outside shell of a screw-steamship, fitted around the boss of the stern-frame and forming an enlargement of the thin part of the dead-wood to receive the propeller-shaft.

boss-roll (bos'rōl), *n.* An iron roll (formed with collars) over which a cylindrical boss, or shell, turns loosely: used in cotton-manufacturing as one of the draft-rolls of a drawing-frame. Also called *shell-roll*.

boss-tool (bos'tōl), *n.* A tool called a *sleeker*, used by molders for smoothing the sides and faces of boss-molds. The body of the tool is a crescent in cross-section and a flat foot turns off at right angles at one end; at the other end is a long handle or shank.

Boston de Fontainebleau. See *boston*, 1.—**French boston**, the French method of declaring and paying in the game of boston.

Boston chaise, fern. See ★*chaise*, ★*fern*.

bostonite (bôs'ton-īt), *n.* [*Boston* + *-ite*[2].] 1. A trade-name for Canadian asbestos, a variety of chrysotile or fibrous serpentine.—2. In *petrog.*, a term proposed by Rosenbusch (1882) for certain fine-grained igneous rocks of the syenite family, consisting chiefly of alkali feldspars (microcline, microcline-microperthite, anorthoclase or orthoclase). The texture is panautomorphic granular, with common tabular form and fluidal arrangement of the feldspars. Rosenbusch regards bostonite as a leucocratic differentiation-product of syenitic magmas and as a typical 'dike-rock.' It is nearly the same as keratophure. First described from Marblehead Neck, not far from Boston, whence the name.

bostrychid (bos'tri-kid), *a.* and *n.* **I.** *a.* Of or belonging to the coleopterous family *Bostrychidæ*.

II. *n.* A member of the *Bostrychidæ*.

Bostrychoid cyme. Same as *bostryx*.—**Bostrychoid dichotomy.** Same as *helicoid dichotomy* (which see, under *helicoid*).

bosua (bō-sō'ä), *n.* [Native name.] A tree of the rue family, *Fagara monophylla*, which yields a yellow wood. Its bark contains berberine and is used as a yellow dye. [Venezuela.]

boswellic (boz-wel'ik), *a.* [*Boswellia* + *-ic*.] Derived from plants of the genus *Boswellia*.—**Boswellic acid**, an acid of unknown composition found in olibanum. Also called *boswellinic acid*.

bot[1], *n.*—**Emasculating bot**, the larva of a fly of the family *Œstridæ*, *Cuterebra emasculator*, which lives in the genital and axillary regions of gophers and squirrels.

bot[5] (bot), *n.* [From the initials of "Board of Trade".] The English Board of Trade unit of electrical supply.

bot[6] (bot), *n.* 1. A dialectal form of *bat*[1] in various senses. Also spelled *bott*.—2. In *founding*, a clay plug used to close a hole against molten iron.

B. O. T. An abbreviation of *Board of Trade*.

botallackite (bo-tal'ak-īt), *n.* [*Botallack* + *-ite*[2].] A mineral containing copper as hydroxy-chlorid, found at the Bottallack mines, Cornwall, closely related to if not identical with atacamite.

Botal's duct. Same as *ductus Botalli*.

Botanic physician, a physician who uses no drugs except those of vegetable origin.

botany, *n.*—**Agricultural botany**, that branch of the science of plants which relates to their utility in agriculture.—**Commercial botany**, that branch of botany which relates to plants or plant products which enter into trade.—**Cryptogamic botany**, that branch of botany which relates to the *Cryptogamia*, or flowerless plants.—**Domestic botany**, a body of simplified botanical information suited to home use.—**Economic botany**, the science of plants with reference to their uses, including, therefore, agricultural, commercial, medical, etc., botany.—**Medical botany**, the science of plants with reference to their medical uses.—**Œcological botany**, that division of botany which relates to the correlation of plants with their environment; plant œcology. See ★*phytogeography*.—**Phanerogamic botany**, the botany of the *Phanerogamia* or flowering plants.—**Tropical botany**, that branch of botany which deals with the plants of the tropics.

bote[4] (bō'tā), *n.* [Jap.] The Japanese name of a deep-bodied shiner of the family *Cyprinidæ*, *Acheilognathus rhombeus*, found in the waters of Japan. Also known as *tabira*.

botete (bō-tā'tā), *n.* [Mex. Sp.?] One of the swell-fishes, *Spheroides lobatus*, found from the Gulf of California to the Galapagos.

Bothragonus (bō̤-thrag'ō̤-nus), *n.* [NL., < *βόθρος*, a pit, + NL. *Agonus*.] A genus of sea-poachers typified by the species *B. swanii* of Puget Sound.

bothridium (bō-thrid'i-um), *n.*; pl. *bothridia* (-ä). [NL., < Gr. *βόθρος*, a pit, + dim. *-ιδιον*.] 1. Same as *bothrium*. *Van Beneden*.—2. In *Cestoidea*, the cup or sucker carried by the phyllidium. *Benham*.

bothriocephaline (both″ri-ō̤-sef'a-lin), *a.* Having the characters of or resembling the *Bothriocephalidæ*.

Bothriocidaris (both″ri-ō̤-sid'a̤-ris), *n.* [NL., < Gr. *βοθρίον*, dim. of *βόθρος*, a pit, + *κίδαρις*, a Persian head-dress.] The only genus representing the extinct echinoids or sea-urchins of the order *Bothriocidaroida*. They are nearly spherical bodies, the ambulacra carrying 2 vertical rows of plates in 5 series, and the interambulacra but a single row. The genus occurs in the Lower Silurian of Esthonia.

Bothriolepis (both-ri-ol'e-pis), *n.* [NL., < Gr. *βοθρίον*, dim. of *βόθρος*, a pit, + *λεπίς*, a scale.] A genus of fossil fishes belonging to the family *Asterolepidæ*, of the order *Antiarcha*. They are allied to *Pterichthys*, but have the remarkable pectoral appendages much longer. Like the other members of this family, it is found in the Old Red Sandstone deposits of Europe and America. See ★*Antiarcha*, ★*Asterolepidæ*, and *Pterichthys*.

Bothriothorax (both″ri-ō̤-thō'raks), *n.* [NL. (Ratzeburg, 1844), < Gr. *βοθρίον*, dim of *βόθρος*, a pit, + *θώραξ*, breastplate.] A notable genus of chalcidoid hymenopterous parasites of the family Encyrtidæ. They have very coarse and thick punctures on the head and scutellum and a long mesoscutum. The species whose habits are known are parasitic on dipterous larvæ, inflating the skin of the host in pupating.

Bothrocara (bō̤-throk'a̤-rä), *n.* [NL., < Gr. *βόθρος*, a pit, + (?) *κάρα*, head.] A genus of zoarcid fishes typified by the species *B. pusilla* of Bering Sea.

bothrocraspedote (both″rō̤-kras'pe-dōt), *a.* [Gr. *βόθρος*, a hollow, + *κράσπεδον*, edge.] In *anthrop.*, having a hollow margin: said of the nasal skeleton. *Jour. Anthrop. Inst.*, 1900, p. 147.

bothropic (bō̤-throp'ik), *a.* [NL. **bothrops*, a generic name (< Gr. *βόθρος*, a pit, + *ὤψ*, eye, face), + *-ic*.] Noting a form of snake poison derived from the genus *Lachesis*.

Dr. Vital, . . . on further experiment, made the important discovery that there are two classes of snake poison, the *bothropic* and the crotalic, the first belonging to the genus Lachesis and the second to the genus Crotalus.

Sci. Amer., Aug. 13, 1904, p. 110.

Bothus (bō'thus), *n.* [NL., origin not ascertained.] A genus of flatfishes typified by the European brill, *B. rhombus:* distinguished from the turbot, *Scophthalmus lævis*, by the presence of true scales.

boton (bō-tōn'), *n.*; pl. *botones* (tō'nēz.) [Sp.] A button; specifically, the knot at the end of a rope used as a lariat. [Mex. and southwestern U. S.]

botong (bō-tong'), *n.* [Philippine Sp.; also *bitung*, *bitoon*, *bitog*, < Tagalog *botong-botong* (Blumentritt), Bisaya *bitoón*. Not the same as Bisaya *botong*, the name of a large reed and of a liana.] A handsome littoral tree, *Barringtonia speciosa*, belonging to the *Lecythidaceæ*, having large, glossy leaves and white flowers with crimson stamens. The four-angled pyramidal fruit is widely used in the East Indies and on the tropical islands of the Pacific as a fish-intoxicant. In Guam it is called *putting* and in Samoa *futu*. See ★*Barringtonia*. [Philippine Is.]

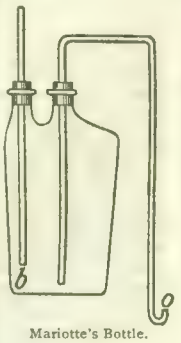
Fruit of Botong (*Barringtonia speciosa*), about one fifth natural size.

botoque (bō-tō'ke), *n.* [Pg. *botoque*, a stone worn by the Indians (Lacerda), appar. connected with *botoque*, a hole in a cask or pipe; a bunghole.] An ornament worn in a perforation of the lower lip; a labret. [Brazil.]

botrycymose (bot-ri-sī'mōs), *a.* [Gr. *βότρυς*, a cluster of grapes, + E. *cymose*. Consisting of racemes or any botryose clusters cymosely aggregated. *A. Gray*.

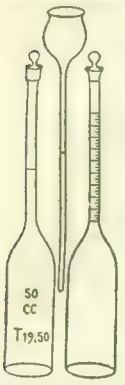
Botryoidal tissue, in certain leeches, a peculiar growth surrounding the enteric canal, blood-vessels, and main lacunæ of the cœloma, and consisting of branched rows of swollen cells containing dark pigment.

botryomyces (bot″ri-om'i-sēz), *n.* [NL., < Gr. *βότρυς*, a cluster, + *μύκης*, a fungus.] A micrococcus, *Staphylococcus botryomyces*, which causes the formation of small fibrous tumors in the lungs and other structures in the horse.



botryomycosis (bot″ri-ō-mī-kō'sis), *n.* [NL., < *botryomyc(es)* + *-osis*.] A morbid condition caused by the presence of Botryomyces.

botryotherapy (bot″ri-ō-ther′a-pi), *n.* [Gr. *βότρυς*, a cluster of grapes, + *θεραπεία*, cure.] Same as *grape-cure*.



Böttger's test. See ★*test*[1].

Bottini's operation. See ★*operation*.

bottle[2], *n.*—**Cubic-foot bottle,** an egg-shaped metallic vessel having glass tubes at the top and bottom and of a capacity of exactly one cubic foot between the water-lines of the two tubes: used in testing the correctness of gas-meters. *W. L. Dibdin*, Public Lighting, p. 83. —**Hicks's bottles,** certain long, delicate tubes, each with a bottle-like inner extremity, found in the antennæ of bees and ants, 12 in the terminal segment and one or two in each of the others. Lubbock suggests that they may be microscopic stethoscopes, and Leydig thinks that they are chordotonal organs. *A. S. Packard*, Textbook of Entom., p. 292. —**Jenny Lind bottle,** a bottle with a globular body and long, slender neck, extensively made by American glass-manufacturers. This type was originated in the year 1850, when the famous singer came to America. See cut under ★*blowing-mold*.—**Mariotte's bottle,** an apparatus for securing a uniform flow of a liquid, such as water. The liquid is placed in a two-necked bottle (with both necks on the top, or one on the top and the other at the side) fitted with air-tight stoppers, an inlet-tube for air, and a siphon or a stop-cock for outlet. The outflow will be regular, owing to the influence of atmospheric pressure, and the difference of pressure within and without the bottle is always equal to a column of the liquid used whose height equals the difference between the level between *b* and *o*.—**Reischauer's bottle,** a special form of pycnometer in use by brewers. —**Soxhlet bottle,** a special apparatus used for the extraction of fat in milk or other substances.—**Specific-gravity bottle,** a flask for the determination of the specific gravity of gases, liquids, or solids.—**Squibb's specific-gravity bottle,** a special form of pycnometer which permits the liquid to expand without loss of vapor during the process of weighing.

Mariotte's Bottle.

Reischauer's Specific-gravity Bottle.

Squibb's Specific-gravity Bottle.

bottle-atom (bot′l-at″um), *n.* Same as *bottle-tit*.

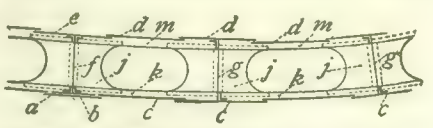
bottle-butted (bot′l-but″ed), *p. a.* See ★*swell-butted*.

bottle-coal (bot′l-kōl), *n.* Gas-coal. *Barrowman*, Glossary. [Scotch.]

bottle-kiln (bot′l-kil), *n.* A pottery kiln shaped like a bottle.

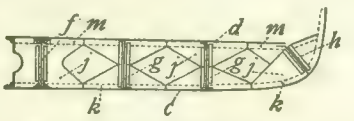
Bottlenose oil. See ★*oil*.

bottle-pool (bot′l-pōl), *n.* An American game of pool played under various and conflicting rules. Its chief feature is that a leather bottle is placed, bottom upward, in the center of the table. To knock this over, under certain conditions, with the cue-ball increases the score. Two red balls and one cue-ball are used, and pockets and caroms count.



bottle-stone (bot′l-stōn), *n.* [Tr. G. *Bouteillenstein*.] A green and very pure glass, or glassy rock, which is found as rolled pebbles in the Moldau river, Bohemia: otherwise called *moldauite* and *pseudochrysolite*. *Smithsonian Rep.* (Nat. Mus.), 1900, p. 516.

bottle-swallow (bot′l-swol″ō), *n.* A local name for the fairy-martin, *Hirundo* (*Lagenoplastes*) *ariel*, referring to the shape of its nest, which is built under eaves or overhanging rocks like the nests of the American cliff-swallow. The bird is widely distributed through Australia and has been found in Tasmania.



bottle-tight (bot′l-tīt), *a.* So tight as to admit of no leakage: used to signify that a boiler is without a leak at any rivet, seam, or joint when tested under steam pressure.

bottle-tree, *n.* **2.** Any tree with a swollen trunk. In examples of the dry, thorny bush of central Brazil (*Cavanillesia arborea* and other *Bombacaceæ*) the trunks are expanded like a cask up to a thickness of five meters. These trunks serve as water-reservoirs to carry the tree through the dry season.

bottom, *n.*, **4.** (*b*) The lowest landing in a shaft or incline; the lowest working in a mine. (*c*) The lower portion of a seam or bed, as of coal. *Barrowman*, Glossary. [Scotch.] (*d*) In *gold-mining*, the old river-bed upon which the wash-dirt rests, and upon which the richest alluvial gold is found. Sometimes called the *gutter*. *Austral English*.—**18.** In *golf*, a backward rotation of the ball which tends to check its motion after it touches the ground.—**19.** In *saddlery*, the portion of a martingale which passes between the horse's belly and the belly-band.—**American bottom,** an alluvial plain bordering the east side of the Mississippi river in southern Illinois. *Science*, Mar. 18, 1904, p. 450.—**Bottom disease.** Same as ★*crotalism*.—**Cellular bottom.** Same as *double* ★*bottom*.—**Double bottom,** in *shipbuilding*, the space between the outside and the inner bottom plating of an iron or steel ship. The inner and outer plating are separated by the frames and longitudinals, or framing of the double bottom. A certain number of these frames and longitudinals are made water-tight,

Cellular Double Bottom on the Bracket System of a War-ship.

Cellular Double Bottom on the Bracket System of a Merchant Vessel.

a, inner keel-plate; *b*, outer keel-plate; *c*, outside plating; *d*, inner bottom-plating; *e*, inner keel- or keelson-plate; *f*, vertical keel; *g*, *g*, longitudinals; *h*, margin-plate; *j*, *j*, *j*, bracket-floors; *k*, frame-bar; *m*, reverse frame-bar.

thus dividing the double bottom into a number of cells, and the whole is sometimes called a *cellular bottom*. The cells are usually arranged to contain water ballast in merchant ships, and are then called *ballast-tanks*. Some of them are fitted for the storage of feed-water for the boilers or drinking-water for the crew. Hence the double-bottom is sometimes called the *water-bottom*.—**Water-bottom.** Same as *double* ★*bottom*.

bottom, *v. i.* **3.** In *bot.*, to form a bulb or other underground expansion, as an onion.—**4.** In *gold-mining*, to get to the bed-rock, or clay, below which it is useless to sink. *E. E. Morris*, Austral English.

bottom-blow (bot′um-blō), *n.* Same as ★*mud-blow*.

bottom-broth (bot′um-brôth), *n.* A fanciful name applied to the ooze or slime found covering the floor of the sea, and formerly supposed to be living matter (called *bathybius* by Huxley).

Bathybius, then, is now no longer known as Bathybius, but as '*bottom broth*,' an exceedingly suggestive term, and it is supposed to be the inexhaustible supply of nourishment, the basal food store-house of the innumerable creatures that live and move, or simply live without movement, at or near the bottom of the sea.
Science, May 31, 1901, p. 847.

bottomer (bot′um-ėr), *n.* In *mining*, the person who loads the cages at the pit-bottom and gives the signal to bank. *Coal and Metal Miners' Pocketbook*.

bottoming (bot′um-ing), *n.* The act of forming a bottom or of placing on a bottom or foundation, as the fitting of a structure with a bottom, the placing of the ballast for a road-bed, or the Telford foundation for a pavement.

bottoming-piston (bot′um-ing-pis″ton), *n.* A piston that touches the end of the cylinder and hence has no clearance.

bottom-line (bot′um-līn), *n.* A fishing-line stretched on the bottom and having attached to it short lines with hooks.

bottom-moraine (bot′um-mō-rān′), *n.* A ground-moraine. *J. Geikie*, The Great Ice Age, p. 39.

bottom-rot (bot′um-rot), *n.* A decay of the base of trees, especially firs and spruces, caused by fungi, particularly *Polyporus Schweinitzii*.

bottom-set (bot′um-set), *p. a.* Deposited conformably upon the sea floor, as in delta-building. See *bottom-set* ★*bed*. *Chamberlin and Salisbury*, Geol., I. 191.

botulism (bot′ū-lizm), *n.* [NL. *botulismus*, < L. *botulus*, sausage, + *-ism*.] Poisoning with ptomaïnes of decomposing meat, especially potted meat or sausage, referable to a toxin produced by the *Bacillus botulinus*. Also *botulismus*.

The varieties of meat which have most frequently given rise to poisoning (*Botulismus*) are pork, ham, veal, sausages, brawn, various kinds of meat pies, and potted meats.
Encyc. Brit., XXX. 609.

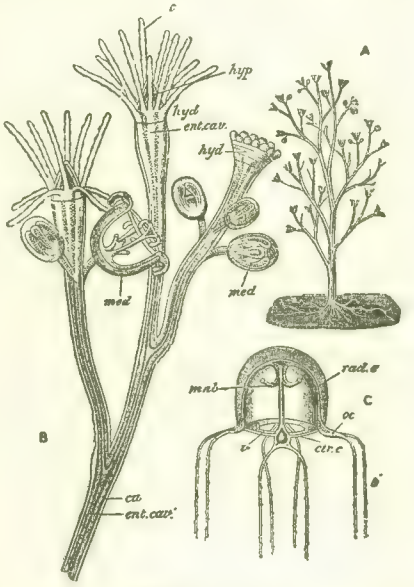
botuto (bō-tō′tō), *n.* [S. Amer.] A large clay trumpet formerly used by certain Indian tribes of the Orinoco region. *Smithsonian Rep.*, 1896, p. 652.

boucanelle (bō-ka-nel′), *n.* [Martinique F., < NL. *buccanella*, < (?) L. *bucca*, mouth.] A common name in Martinique of the black-fin snapper, *Lutjanus buccanella*.

boucharde (bō-shärd′), *n.* [F., origin unknown.] A hammer having a head with many points, used by stone-cutters in dressing the surface of stone; also, a similar tool used by sculptors.

boucharde (bō-shärd′), *v. t.* To dress (stone) with a boucharde.

Bouchardia (bō-shär′di-ạ), *n.* [NL., < *Bouchard*, proper name.] A genus of brachiopods. They have elongate, smooth, radially colored shells, with elevated beak on the larger valve, the smaller or dorsal valve having a large-lobed cardinal process. The brachidium consists of curved triangular processes uniting with a median septum. They live in the Caribbean Sea.



boucherism (bō′shėr-izm), *n.* The practice or process of impregnating timber with sulphate of copper, in order to preserve it. *Notes and Queries*, Sept. 10, 1892.

boucherize, *v. t.* **2.** To impregnate (timber) with any preservative liquid by means of capillary absorption in a still living tree. The liquid is applied at the base of the trunk, beneath the bark, either with or without hydrostatic pressure.

bouclée (bō-klā′), *n.* [F., < *boucler*, buckle: see *buckle*, *v.*] The French name for what in billiards elsewhere is known as the *hook-bridge*, the forefinger of the bridge-hand infolding the cue in its narrowest part. *Broadfoot*, Billiards, p. 109. See cut at ★*bridge*.

bouderie (bö′dė-rē), *n.* [F., < *bouder*, pout: see *boudoir*.] Pouting; sulks. *Thackeray*, Newcomes, II. 239.

Bougainvillia (bö-gān-vil′i-ạ), *n.* [NL., < *Bougainville* (1729–1814), a French navigator.] The typical genus of the family *Bougainvillidæ*. *Lesson*, 1843. Same as *Hippocrene*, 2 (*b*). *Mertens*, 1829.

Bougainvillia ramosa.

A, entire colony, about two thirds natural size; *B*, portion of the same magnified; *C*, immature medusa; *cir. c.*, circular canal; *cu.*, cuticle or perisarc; *ent. cav.*, enteric cavity; *hyd.*, polyp or hydranth; *hyp.*, hypostoma or manubrium; *med.*, medusa; *mnb.*, manubrium; *rad. c.*, radial canal; *t*, tentacle; *v*, velum. (From Parker and Haswell's "Zoology," after Allman.)

Bougainvillidæ (bö-gān-vil′i-dē), *n. pl.* [NL., < *Bougainvillia* + *-idæ*.] A family of tubularian *Hydromedusæ*, with a conical hypostoma having a single row of filiform tentacles around its base. It contains *Bougainvillia*, *Dicoryne*, *Perigonimus*, and several other genera.

bough[1]†, *v.* **I.** *trans.* **2.** To strip of boughs. *Fitzherbert*, Husb., §132.

II. *intrans.* To send out boughs.

bougie, *n.* **3.** A pencil of paraffin or other material which melts at the temperature of the body, with which some medicinal substance has been incorporated: employed for local medication of the urethra, uterus, or other canal into which it is introduced, the melting of the bougie liberating the drug.—**Bougie à boule** ['ball bougie'], a bougie having a bulbous expansion at its extremity, employed to locate a constriction in a canal.—**Bougie décimale,** in *photom.*, a standard of light defined as one twentieth of the Violle platinum standard and represented in practice by the light from a Hefner standard lamp. See *light* ★*standard*.—**Bougie de l'étoile,** a French standard candle formerly used in photometry. See *standard* ★*candle*.—**Filiform bougie,** a very slender bougie of whalebone or other elastic material.

bougie-meter (bö″ji-mē′tėr) *n.* A unit of illumination used in photometry; the illumination produced by the flame of the standard Hefner lamp at a distance of one meter. Same as ★*lux*.

bougong, *n.* See ★*bogong*.

bouillon, *n.* 3. A puff on a lady's dress; a puffed fold of the same material.

bouillotte (bö-lyot′), *n.* [F., a little boiler, < *bouillir*, boil.] A device for heating and moistening the compressed air on a compressed-air locomotive by passing it through a tank of hot water on its way from the storage-reservoir to the motor-cylinder. *Sci. Amer. Sup.*, Oct. 17, 1903, p. 23236.

bouked (bökt), *a.* In *mining*, increased in size: for example, when a winding-drum is increased in diameter by lagging-strips, or the cylinder of a pump is enlarged by wear. Also *bowked*. *Barrowman*, Glossary. [Scotch.]

bouking (bö′king), *n.* In *mining*, segments of wood or other material used for increasing the diameter of a winding-drum (see *lagging*, 3); hence, winding. When a rope is not coiling evenly on a drum it is said not to be *bouking* well. *Barrowman*, Glossary. [Scotch.]

Boulangism (bö-loṅ′jizm), *n.* The political policy and methods represented in France by General Georges Ernest Jean Marie Boulanger (1837-91) from about 1886 to 1889. Its chief features were militarism and revenge upon Germany.

Boulangist (bö-loṅ′jist), *n.* A political follower of General Boulanger.

boulder-bed (bōl′dėr-bed), *n.* See ★*bed*[1].

boulder-belt (bōl′dėr-belt), *n.* A train of boulders deposited by a glacier on melting. *J. Geikie*, The Great Ice Age, p. 742.

boulder-clay, *n.*—**Great chalky boulder-clay,** an unstratified mass of pale, dirty gray clay, more or less abundantly crammed with fragments of chalk and flint. This deposit is one of the lowest members of the glacial series of southern England. *J. Geikie*, The Great Ice Age, p. 342.

boulder-cracker (bōl′dėr-krak″ėr), *n.* A heavy iron rod to be dropped upon a rock encountered by the drill in a deep well-boring. *Stand. Dict.*

boulderet (bōl-dėr-et′), *n.* A small boulder. *R. D. Salisbury*, Geol. Surv. of New Jersey, 1893, p. 291.

boulder-fern (bōl′dėr-fėrn), *n.* See ★*fern*[1].

boulder-pavement (bōl′dėr-pāv″ment), *n.* An exposed bed of boulders such as might result from the removal of sand or clay, by waves or currents, from unsorted glacial deposits. *J. Geikie*, The Great Ice Age, p. 523.

boulder-train (bōl′dėr-trān), *n.* A train of boulders, once a lateral moraine upon a glacier, now left stranded in lineal arrangement by the melting of the ice-sheet.

boulder-wall (bōl′dėr-wâl), *n.* A frontal moraine composed almost entirely of boulders. *J. Geikie*, The Great Ice Age, p. 467.

bouleutai (bö-lū′ti), *n. pl.* [Gr. *βουλευταί*, pl. of *βουλευτής*, < *βουλεύειν*, take counsel, < *βουλή*, counsel: see *boule*.] In *Gr. antiq.*, members of the council or boule of a Greek city. See *boule*[2].

bouleutic (bö-lū′tik), *a.* [Gr. *βουλευτικός*, < *βουλευτής*, member of a council: see ★*bouleutai*.] In *Gr. antiq.*, pertaining to the boule or council of a Greek city: as, the *bouleutic* oath.

boulevardist (bö′le-vär-dist), *n.* [*boulevard* + *-ist*.] Same as *boulevardier*.

bound[3], *p. a.*—**Bound energy.** See ★*energy*.

boundary-rider (boun′da-ri-rī″dėr), *n.* A man employed on an Australian farm or 'station' to ride over the estate, inspecting the fences and gates.

The manager's lieutenants are the '*boundary-riders*,' whose duty it is to patrol the estate and keep him informed upon every portion of it.
Scribner's Mag., Feb., 1902, p. 147.

bounder, *n.* 4. A dos-à-dos dog-cart brought out in England in 1843.—5. A four-wheeled cab.—6. A vulgar, ill-mannered swell; a loud, boisterous person. [Eng. slang.]

The beautiful art [of dancing] . . . has fallen largely into the hands—or perhaps we should say feet—of hoydens, *bounders*, and acrobats. *World* (London).

bouquet, *n.* 3. See the extract. Also called *bouquet of herbs* and *fagot of herbs*.

Parsley wrapped around peppercorns, cloves, bay-leaves, and other herbs excepting sage, and tied, makes what is called a *bouquet*. In this shape the herbs are more easily removed. *Century Cook Book*.

bouqueted (bö-kād′), *a.* Furnished with a bouquet or with bouquets.

bourbe, burbe (börb), *n.* [F. *bourbe* (Larousse); name in Tunis.] A copper coin and money of account in Tunis, of the value of half an asper.

Bourbon metal. See ★*metal*.

bourdon[2], *n.* (*c*) In the hurdy-gurdy, the lowest open string, usually tuned to the C below middle C or to the G below that.—**Bourdon lace, tube.** See ★*lace*, ★*tube*.

Bourg la Reine porcelain. See ★*porcelain*[1].

Bourgueticrinus (bör-get-ik′ri-nus), *n.* [NL., < F. *Bourguet*, a proper name, + Gr. *κρίνον*, a lily (see *crinoid*).] A genus of *Crinoidea*, or encrinites, typical of a family *Bourgueticrinidæ*. They have a small pyriform calyx with remarkably large centrodorsal plate, 5 basal plates, and 5 radials. This member of the family has been found in Jurassic, Cretaceous, and Tertiary rocks, but *Rhizocrinus*, another representative, is found living to-day in the greater depths of the ocean. See *Rhizocrinus*.

bourneene (bör′nē-ēn), *n.* A liquid hydrocarbon from *Dryobalanops camphora:* now considered to be a mixture of the decomposition-products of camphene.

bourrelet, *n.*—**Buccal bourrelets,** in certain echinoids or sea-urchins, fossil and recent, especially those belonging to the family *Cassidulidæ*, lip-shaped ridges formed when the ambulacral areas about the peristome are sunken and the interambulacra are swollen. The entire combination forms a floscelle about the mouth.

bourrette (bö-ret′), *n.* [F. *bourrette*, coarse silk, < *bourre*, refuse silk, etc.: see *bur*[1], *n.*, 7.] An inferior grade of spun silk, made from the waste in the manufacture of schappe silk. It is often used as weft for dress-goods, knit goods, fancy fabrics, insulating lagging for steam-pipes, etc.

Boussingaultia (bös-in-gâl′ti-ä), *n.* [NL. (Humboldt, Bonpland, and Kunth, 1825), named in honor of Jean Baptiste Joseph Dieudonné *Boussingault* (1802–87), a French chemist, who traveled in South America.] A genus of plants of the family *Basellaceæ*. It contains about 10 species, all climbing herbs of tropical America. *B. baselloides*, commonly known as *Madeira-vine* or *mignonette-vine*, a native of Ecuador, is a popular perennial-rooted but tender twiner, used for porches, in greenhouses, and in window-gardens. It produces a profusion of small white fragrant flowers in racemes. See also *Madeira-vine*.

boutell†, *n.* Same as *boltel*.

boutgate (bout′gāt), *n.* In *mining*, a road by which the miners can reach the surface; a traveling-way around a shaft at a landing; a traveling-road from one seam to another. *Barrowman*, Glossary.

boutique (bö-tēk′), *n.* [F.: see *bodega*, *apothec.*] A shop or place where goods are sold at retail.

bouto (bō′tō), *n.* [Pg. *bouto*, *boto*, *bodo*, from a Brazilian name.] A large dolphin, *Inia geoffrensis*, of the Amazon river. It is of variable color, often pink or pink and black, attains a length of 8 feet, and is regarded with superstitious reverence by the Indians.

bouton, *n.* 2. In *entom.*, the spoon-like or button-like extremity of the tongue of the honey-bee. *A. S. Packard*, Text-book of Entom., p. 80.

boutonnière (bö-ton-iâr′), *n.* [F.] 1. A buttonhole bouquet.—2. In *surg.*, an incision into the urethra for the removal of an impacted calculus.

Bovey-Tracey lignites. See ★*lignite*.

bovicide (bō′vi-sīd), *n.* [L. *bos* (*bov-*), ox, + *-cida*, < *cædere*, kill.] A slayer of oxen; a butcher. *E. Phillips*.

bow[2], *n.*, 4. (*j*) A curved piece of metal used to make contact with an electric wire to get current for operating a car. This bow is used in place of a trolley.—**Composite bow,** in *archery*, a bow made of two or more pieces of wood, bone, sinew, or other material joined together longitudinally. See *bow*[2], 2.—**Reflex bow,** in *archery*, a bow, concave on the back when unstrung, the curve of which is reversed in stringing it.—**Springing bow,** in *violin-playing*, same as *saltato*.—**Twilight bow** or **twilight arch.** Same as *twilight curve*. It is most distinct when the sun is only a few degrees below the horizon, and is then reddish at the upper edge. As it rises (after sunset) it becomes more indistinct, and practically disappears before reaching the zenith.

bow[3], *n.*—**In bow!** an order given to the bow-oarsman of a single-banked boat, signifying that he is to cease rowing, ship or boat his oar, and stand up with his boat-hook to catch hold of the dock, float-stage, or vessel's side to hold the boat steady after the landing has been made. The plural form, *in bows*, is used in the case of a double-banked boat, where there are two bow-oarsmen.

bowback (bō′bak), *n.* The whitefish, *Coregonus clupeiformis*.

bow-chock (bou′chok), *n.* In *marine hardware*, a chock with two arms which are bent over and nearly touch in the middle: used on yachts to keep the mooring-rope in place.

bow-cithern (bō′sith″ėrn), *n.* See ★*cithern*, 2.

bowed, bowelled (bou′eld), *p. a.* 1†. Disemboweled: as, "a hare already *bowelled*."—2. Having recesses or hollow places: as, "the *bowelled* cavern," *Thomson*, Summer, p. 133.

Bower-Barff process. See ★*process*.

bowl[2], *n.* 7. The main cylinder or drum of a calico-printing machine, against which are pressed the engraved copper rollers; a calender-roller.—8. An antifriction roller in the pedal-motion of the feeding-device of a cotton-scutcher or picking-machine.—**Stocks and bowls,** a set of loom-levers, either circular or oblong, connected with the harnesses for operating them when the same number is required to be lifted at each pick of the weft.

bowl[2], *v. i.*—**To bowl off one's pads,** in *cricket*, to bowl (a batsman) by a ball which strikes him on the leg-guards. *Hutchinson*, Cricket, p. 312.

bowl-ball (bōl′bâl), *n.* A game of the natives of North Australia, consisting in rolling a ball or disk along a sloping place and discharging small spears at it as it rolls.

bowl-disk (bōl′disk), *n.* Same as ★*bowl-ball*.

bow-light (bou′līt), *n.* A large lantern, usually with a Fresnel globe, placed at a ship's bow.

bowlin, *n.* A simplified spelling of bowline.

Bowline lizard. See ★*lizard*.

bowling[2], *n.*—**Break bowling,** in *cricket*, bowling in which the ball, after pitching on the ground, changes its course. *Hutchinson*, Cricket, p. 33.—**Length bowling,** in *cricket*, bowling which has the proper length or pitch. See *length* ★*ball*.

bowly (bō′li), *n.*; pl. *bowlies* (-liz). [Also *bowlee*, *bowry*. Hindi *baoli*, *bāorī*, Marathi *bāvaḍi*, Telugu *bāvidi*.] A large rectangular well, provided with steps leading down to the water, and with recesses for travelers to rest in. The providing and maintenance of such tanks is a favorite object of native benevolence. [Anglo-Indian.]

bowmanite (bō′man-īt), *n.* [For H. L. *Bowman* of Oxford, England.] A rare phosphate of aluminium and calcium, related to hamlinite. It occurs in rosettes of thin rhombohedral crystals of honey-yellow color, and is found in the dolomite of the Binnenthal, Switzerland.

bow-mark (bō′märk), *n.* In *archery*, a target or mark to be shot at.

bow-pencil (bō′pen″sil), *n.* See *bow-pen*.

bow-plating (bou′plā-ting), *n.* In *ship-building*, the outside shell-plates of a steel or iron vessel, covering the bows and extending to the stem.

A portion of the heavy iron stem of the former was nearly wrenched out of place, and the armour and *bow-plating*, etc., abutting on the stem were considerably disturbed.
White, Manual of Naval Arch., p. 339.

bow-rest (bō′rest), *n.* An iron projection placed at the rear corner of a carriage-seat as a support for the lower end of the top-joint, and also for the bows when the top is lowered.

bow-rudder (bou′rud″ėr), *n.* A rudder sometimes fitted at the bows or under the fore part of the keel of vessels intended for special purposes, as torpedo-boats, to give great turning power, or to permit the vessel to steer more easily when going astern.

Of the auxiliary appliances fitted to increase the steering power of ships, the most important are *bow rudders*. These rudders are rarely fitted except in vessels which are required to steam with either end foremost; to avoid the necessity for turning, or to be capable of service in rivers or narrow waters where there is little room for turning, or to meet some other special requirement.
White, Manual of Naval Arch., p. 699.

bow-socket (bō′sok″et), *n.* A long metallic socket used in place of slat-irons on the bows of a carriage-top.

bow-spring (bō′spring), *n.* In *elect. traction*, the spring which keeps the bow spread out, when a bow is used to take current from a trolley-wire. See ★*bow*[2], 4 (*j*).

Bowsprit bitts, perpendicular timbers which extend above the upper deck, and between which the heel of the bowsprit is secured.

bowstave (bō′stāv), *n.* Same as *bowstaff*.

bowstring-creeper (bō′string-krē″pėr), *n.* Same as ★*jeetee*.

bowstring-truss (bō′string-trus″), *n.* A form of truss in which the upper chord or compression flange is made in the form of a 'bow' or curve, preferably a parabola, and the lower chord or tension-member is a straight line. The truss resembles a bow and string, whence its name.

bow-wave (bou′wāv), *n.* The wave set up at the bows of a vessel under way. The crest of the wave is inclined diagonally outward and aft on each side from the bow.

During each interval occupied by a ship in advancing through a distance equal to the length of her entrance the sets of particles then contiguous thereto undergo accelerations which lead to the production of the *bow-wave*; and this interval of time depends upon the ratio of the length of entrance to the speed of the ship.
White, Manual of Naval Arch., p. 457.

bowyer[1], *n.*—**Master bowyer,** the chief bowyer.

box[1], *n.* **2.** A name in Australia (usually with a distinctive epithet, as *bastard, black, white,* etc.) of many eucalypts, and of a few trees of the genus *Tristania,* belonging to the same family: applied chiefly because of the qualities of their timber, which more or less resembles true boxwood. See the phrases below. In Australia the name is also applied to several shrubs or trees on account of their odor, which resembles that of the true box (see *China* ★*box*), or of their dwarf habit with leaves like the true box (see *heath* ★*box* and *native* ★*box*).—**Bastard box,** *Eucalyptus goniocalyx, E. bicolor* (also called *cooburn*), *E. longifolia, E. microtheca, E. polyanthemos, E. populnea* (also called *bembil* or *red box*), *Tristania conferta,* and *T. laurina.*—**Black box,** *Eucalyptus obliqua, E. bicolor,* and *E. microtheca.*—**Box family,** the plant family ★*Buxaceæ* (which see), including the genus *Buxus,* which contains the common box.—**Box reaction.** See ★*reaction.*—**Brisbane box,** *Tristania conferta.*—**Broad-leafed box,** *Eucalyptus acmenioides.*—**Brown box,** *Eucalyptus polyanthemos.*—**Brush box,** *Tristania conferta.*—**Cape box,** a grayish spiny shrub, *Celastrus buxifolia,* common in South Africa; it resembles the ordinary box in growth.—**China box,** *Chaleas Camuneng,* of the rue family, a perfume plant: found also in India and China.—**Dwarf** or **flooded box,** *Eucalyptus microtheca.* Also called *goborro* and *swamp-gum,* from its habit of growing on land inundated at flood time.—**Gray box,** *Eucalyptus goniocalyx, E. hemiphloia, E. bicolor, E. polyanthemos,* and *E. saligna.*—**Heath box,** *Gymnopogon buxifolia,* of the dog's-bane family.—**Ironbark box,** *Eucalyptus obliqua.*—**Native box,** *Bursaria spinosa,* a forage-plant belonging to the *Pittosporaceæ.* Also called *box-thorn* and *native olive.*—**Poplar box,** *Eucalyptus populnea.*—**Red box,** *Eucalyptus populnea, E. polyanthemos,* and *Tristania conferta.* See *bastard* ★*box* and ★*bembil.*—**Tasmanian box.** Same as *native* ★*box.* See ★*box-thorn,* 2.—**Thozet's box,** *Eucalyptus Raveretiana.*—**White box,** *Eucalyptus hemiphloia, E. odorata, E. populnea,* and *Tristania conferta.*—**Yellow box,** (*b*) *Eucalyptus hemiphloia* and *E. bicolor.*

box[2], *n.,* **9.** In *mach.*: (*g*) A die for cutting the thread on a wooden screw.—**16.** In *irrigation,* a device for measuring water through a small flume of rectangular section.—**17.** In *turpentine-making,* the cavity cut in a pine-tree to receive the resin which flows from the scarified surface above.—**18.** In *mining,* a small mine-car; a hutch; a tub.—**19.** A mix-up of things that should be kept apart, as different flocks or mobs of sheep. [Australia.]

Great care must of course be taken that no two flocks come into collision, for a *box,* as it is technically called, causes an infinity of trouble, which is the reason that the stations are so far apart.

C. H. Eden, My Wife and I in Queensland, p. 67.

Batsman's box. See ★*batsman.*—**Box of tricks.** Same as ★*building-motion.*—**Circular box,** a cylinder with chambers for shuttles, attached to the lathe of a loom and moved forward and backward as may be necessary to bring the desired shuttle and yarn within striking range of the picker. Also called *revolving box.* [Eng.]—**Clifford's box,** in *math.,* a hollow surface with tubes running through it, into the form of which a Riemann's surface may be distorted.—**Three-part box,** a molding-box or -flask consisting of three parts, and used for molding those patterns in which the middle section must be distinct from the top and bottom, as in the case of a grooved pulley. *Lockwood,* Dict. Mech. Eng. Terms.

box[2], *v. t.* **6.** To mix up or allow to be mixed up (things, such as different flocks of sheep, which should be kept apart). [Australia.]

All the mobs of different-aged lambs which had been hitherto kept apart were *boxed* up together.

A. C. Grant, Bush Life in Queensland, p. 253.

7. To grain or board on the grain side with a graining-board, to give skin a rough or pebbled effect. *Modern Amer. Tanning,* p. 83.

box[4] (boks), *n.* [L. *box,* < Gr. *βώξ, βόαξ,* a certain fish, prob. an imitative name. See *bogue*[2].] A sparoid fish, *Box boops,* known from the Mediterranean to the southern coast of England.

box-bill (boks'bil), *n.* A tool for recovering boring-rods.

box-cage (boks'kāj), *n.* A bird-cage opening in front.

box-calf (boks'kăf), *n.* Originally, calf leather of a rough or thick variety, as used in *box-toes;* now, a chrome-tanned calfskin, either in black or colors and usually grained or boarded.

box-cañon (boks'kan″yon), *n.* In *phys. geog.,* a narrow, flat-floored valley inclosed by nearly vertical walls or cliffs. [Western U. S.]

box-chisel (boks'chiz″el), *n.* See ★*chisel*[2].

box-chronometer (boks'krō-nom″e-tėr), *n.* A marine clock of great accuracy, set to the time of a certain prime meridian, and employed in the calculation of the longitude at sea. It derives its name from the box inside which it is hung in gimbals, so that it may always maintain a horizontal position irrespective of the rolling and pitching of the ship.

box-colored (boks'kul″ord), *a.* In *leather-manuf.,* colored in a box or tray of dye. *Flemming,* Practical Tanning, p. 80.

box-coupling (boks'kup″ling), *n.* A coupling for connecting two shafts. A collar is fastened on the end of each of the shafts to be joined, the two are brought together, and a box or rim is slipped over them and keyed to both.

Box-dressing machine. See ★*dressing-machine.*

box-drift (boks'drift), *n.* A drift which has been boxed. See ★*drift.*

box-edged (boks'ejd), *a.* With a border of box, as a parterre or path in a garden.

box-elder (boks-el'dėr), *n.* See *elder*[2] and *Negundo.*—**Box-elder leaf-roller, plant-bug.** See ★*leaf-roller,* ★*plant-bug.*

boxer[2], *n.* **2.** [*cap.*] A member of a Chinese association known as *Yi Ho Ch'uan Hwuy,* "The Righteousness, Harmony, and Fists Society," organized in China in 1900 or earlier, ostensibly for the practice of athletics, but really as a league for the expulsion of foreigners and the uprooting of Christianity. Aided by the regular army, and egged on and led by officials and persons of the highest standing, the Boxers murdered large numbers of native Christians, missionaries, and other foreigners, destroyed much property, attacked the foreign legations in Peking, and besieged the British legation there for over two months, until the rising was suppressed by the military forces of the principal treaty powers.

boxer[3] (bok'sėr), *n.* A bowler or low-crowned stiff felt hat; a billycock hat. [Australia.]

box-gear (boks'gēr), *n.* A differential gear used on bending-rolls and motor-vehicles. In the former case it prevents a calendering action on the plate by either roll; in the latter it enables the driving-wheels to move over different distances when turning corners or curves, or when for any reason the two wheels are of differing diameter.

box-groove (boks'grōv), *n.* A close groove between two rolls, formed by a collar on one roll fitting between collars on another roll.

boxhead (boks'hed), *n.* The squaw-fish, *Ptychocheilus oregonensis,* one of the largest of the minnows, ranging from British Columbia southward to Oregon.

box-honey (boks'hun″i), *n.* Honey stored by the bees in specially prepared boxes.

boxing[1], *n.* **7.** In *mining,* a method of securing shafts solely by slabs and wooden pegs. *Coal and Metal Miners' Pocketbook.*

boxing-up (bok-sing-up'), *n.* Specifically, the process of constructing large patterns by making them hollow instead of by using solid planks.

box-keel (boks'kēl), *n.* In *iron shipbuilding,* a keel built of plates and angles in box form. Not now used.

box-keelson (boks'kēl″son), *n.* A heavy keelson consisting of plates and angles arranged to give a closed, rectangular section.

box-kid (boks'kid), *n.* See ★*box-calf.*

box-level (boks'lev″el), *n.* A metallic box (generally circular) with a glass cover used as a spirit-level. The bubble of inclosed air is brought into coincidence with a circle engraved at the center of the cover.

box-link (boks'lingk), *n.* A slotted link each side of which is of U-section, so as partly to embrace the sliding-block and prevent it from dropping out.

box-loom (boks'lōm), *n.* A loom with two or more shuttle-boxes at either end of the lathe. *T. W. Fox,* Mechanism of Weaving, p. 388.

box-loop (boks'lōp), *n.* A long leather loop pressed or worked up square, creased and ornamented, used in a harness in place of a number of short loops.

box-mangle (boks'mang″gl), *n.* A mangling apparatus, consisting of a rectangular wooden box weighted with stone or iron and run to and fro over rollers upon which the fabrics to be mangled are wound. Also called *chest-mangle.* See *mangle*[2].

box-mill (boks'mil), *n.* See ★*box-tool.*

box-motion (boks'mō″shon), *n.* The mechanism for operating the shuttle-boxes of a loom. *Fox,* Mechanism of Weaving, p. 352.—**Eccentric box-motion,** a mechanism for operating the drop-boxes for shuttles in a loom by means of two or more eccentrics capable of being moved either independently or conjointly.

Box-nailing machine. See ★*nailing-machine.*

box-nut (boks'nut), *n.* A nut which is closed on one end; one which does not have a hole clear through; a cup-nut. Such nuts are commonly used on the axles of wagons to hold the wheels on.

box-package (boks'pak″āj), *n.* A package in the form of a box: used on the Pacific coast for packing fruit for shipment.

The *box-package* is preferable to the barrel.

Yearbook, U. S. Dept. Agr., 1901, p. 606.

box-piston (boks'pis″ton), *n.* A hollow piston made by coring out the interior of the piston when casting it.

box-spanner (boks'span″ėr), *n.* A spanner for turning or holding bolts whose heads are in recesses and so cannot be caught by an ordinary wrench.

box-standard (boks'stan″dărd), *n.* The column or standard which forms the main frame of a machine and is hollow, thus obtaining strength and rigidity with little material.

box-staple (boks'stā″pl), *n.* The staple or keeper into which the bolt of a lock is shot, when the staple is so made as to box in, or cover, the end of the bolt.

box-step (boks'step), *n.* In *car-building,* a step or a short flight of steps inclosed at the sides by a stringer or guard; a platform-step in a passenger-car.

boxstones (boks'stōnz), *n. pl.* See *nodule* ★*beds.*

box-stoop (boks'stōp), *n.* A stoop of which the steps are divided into two or more flights, which therefore has a platform and projects into the street as a mass of some height.

box-tappet (boks'tap″et), *n.* A cam on a loom for working the shuttle-boxes. *T. W. Fox,* Mechanism of Weaving, p. 305.

box-thaler (boks'tä″lėr), *n.* A coin made to open like a box and contain objects: confined to certain German states and Savoy.

box-thorn, *n.* **2.** A spiny, bushy tree of Tasmania, *Bursaria spinosa,* yielding a hard white wood resembling boxwood and used in turnery.

box-tool (boks'tōl), *n.* An attachment to a lathe for holding cutting-tools used in cutting the exterior surfaces of objects turned in the lathe; a turner. It is named from the shape of the tool-holder. A box-tool used, with special cutter, for finishing the ends of rods is called a *pointing-box.* A modified form carrying several cutters is called a *box-mill.* Another form of box-tool is used on screw-machines.

box-tubular (boks'tū″bū-lăr), *a.* A name applied to tubular boilers in which the enveloping shell was made up of flat surfaces, carefully stayed against bulging, with the hot gases passing through tubes between the parallel surfaces. The shape suggested a box.

box-wallah (boks'wol″ä), *n.* [Hind. *bakas-wālā,* < *bakas,* < E. *box,* + *wālā,* a man, agent.] A native peddler or itinerant merchant. [Anglo-Indian.]

boxwood, *n.*—**Cape boxwood,** the wood of *Buxus Macowani,* a medium-sized tree of Cape Colony. It is nearly identical with the common boxwood and can be split easily into thin plates. The kamassi is also known commercially by this name and as *knysna boxwood.* See *kamassi.*—**Knysna boxwood.** See *cape* ★*boxwood.*—**New Zealand boxwood** (Maori *maire*), a species of olive, *Olea lanceolata,* used locally for making woodcuts, and said to be superior to the true boxwood for that purpose.—**Rule boxwood,** the hard golden-yellow wood of *Macaglia Vargasii,* a tree of the dog's-bane family native to Venezuela. It is used for measuring-rules, loom-shuttles, etc., and in turning and pyrography. Also called *zapatera* and *amarillo.*—**West Indian boxwood.** Same as *rule* ★*boxwood.* The wood usually reaches the markets by way of the West Indies.

boy[1], *n.*—**Bowery boy.** A young rowdy of a type once common in the Bowery, in New York city, the analogue of the London ★'Arry (which see). See *Bowery* in the Century Cyclopedia of Names.—**Cape boy.** A South African half-breed resulting from the union of a native black and a settler of another race.

boyla (boi'lä), *n.* An aboriginal Australian sorcerer. [Australia.]

B. P. An abbreviation of (*a*) *Bachelor of Painting;* (*b*) *Bachelor of Philosophy;* (*c*) *British Pharmacopœia;* (*d*) *British public.*

B. P. B. An abbreviation of *Bank post-bill.*

B. Ph. An abbreviation (*a*) of *Bachelor of Philosophy;* (*b*) of *British Pharmacopœia.*

Br. An abbreviation of *British.*

brab (brab), *n.* [Anglo-Indian form of Pg. **braba, brava,* wild (sc. *palmeira,* palm-tree).] The palmyra-palm, *Borassus flabellifer.* See *palmyra,* 1.

brabant (bra-bant'), *n.* A foreign base coin current in England in the time of Edward I.

Brabant crown, sovereign. See ★*crown,* ★*sovereign.*

brab-tree (brab'trē), *n.* Same as ★*brab.*

braça (brä'sä), *n.* See *brass*[2], 2.

brace[1], *n.,* **1.** (*b*) In any frame, a stiff piece, as a bar or strip, put in to prevent a parallelogram or the like from changing its shape under pressure or strain. It acts usually by dividing the parallelogram into triangles or by forming a smaller triangle at one corner of the parallelogram, thus stiffening that part of the frame.

14. (*b*) Same as *brace-head.*—**17.** A short, thick bar lying above the suture between two pyramids in the dental apparatus of *Echinus.*—**18.** In *saddlery,* the short strap which connects the hip-strap and the breeching-body.—

19. An old measure of weight. A Hurley brace was equal to 4 cwt. [Scotch.]—**20.** In *mining*, a platform at the top of a shaft on which miners stand to work the tackle. *Coal and Metal Miners' Pocketbook.*—**Brace-game.** See ★*game*1.

brace-box (brās′boks), *n.* A box from which the cards can be taken two at a time at the pleasure of the dealer: used in dealing faro.

Braced arch. See ★*arch*1.

bracelet-wood (brās′let-wůd), *n.* A name in the West Indies of a small tree of the family *Myrsinaceæ*, *Jacquinia armillaris*, so called on account of its hard seeds, which are made into bracelets. Also called *currant-tree*, *barbasco*, and *joe-wood*.

brace-wrench (brās′rench), *n.* A tool with a square head boxed out to receive a threaded nut. The head is attached to a branch shank, which is joined at the top and is fitted with a square head tapered to enter the brace-stock: used for turning nuts on bolts.

brachial. I. *a.*—**Brachial cavity,** in a brachiopod, the anterior part of the shell-cavity, in which lie the arms or brachia.—**Brachial disk,** a horizontal structure which occupies the center of the subumbrellar surface of *Rhizostomæ* and which is formed by the fusion of the proximal ends of the arms. The mouth is thus completely closed, and food is ingested through the numerous small suctorial mouths leading into the network of canals in the arms and thence into the stomach.—**Brachial ossicles,** Same as *actinosts.*—**Brachial sinuses.** In certain Paleozoic nautiloid cephalopods, the aperture of the shell is greatly contracted about the base of the tentacles and hyponome, giving the opening a T- or Y-shaped figure. The shorter arms of this opening, which may be variously lobed, are termed *brachial sinuses*, the longer arm the *hyponomic sinus.*—**Brachial thecæ.** See ★*theca*.

II. *n.* **4.** In the morphology of the *Crinoidea*, one of the calcareous plates which compose the arms. The application of the term has varied with different writers, some restricting it to the plates of the free arms, others applying it to all plates in the radial series lying above the lowermost circlet or true radials. In the latter case the radials include some of the bodyplates, and these have been subdivided into *costals*, *distichals*, and *palmars*, whether free or fixed.

brachiation (brak-i-ā′shon), *n.* [NL. **brachiatio(n-)*, < **brachiare*, swing by the arms, < L. *brachium*, arm.] The act of swinging by the arms from tree to tree, a method of locomotion employed by the gibbons. [Rare.]

The hand of the chimpanzee is adapted for *brachiation*. *Proc. Zool. Soc. London*, 1899, p. 306.

brachiator (brak′i-ā-tor), *n.* An animal that swings by its arms from tree to tree. [Rare.]

The arm of the chimpanzee is that of the *brachiators*, anthropoids like the orang and gibbon which use the arms as one of the main organs of locomotion. *Proc. Zool. Soc. London*, 1899, p. 355.

brachidium (bra-kid′i-um), *n.*; pl. *brachidia* (-ä). [NL., < Gr. *βραχ(ίων)* (L. *brachium*), arm, + Gr. *-ίδιον*.] The shelly calcareous spiral or loop-shaped supports of the fleshy arms or brachia in the *Brachiopoda*; used collectively of the entire apparatus irrespective of division into symmetrical parts.

brachigerous (bra-kij′e-rus), *a.* [L. *brachium*, arm, + *gerere*, bear.] Same as *brachiferous*.

brachiocœle (brak′i-ō-sēl), *n.* [NL., < Gr. *βραχίων*, an arm, + *κοίλος*, a hollow.] In the *Brachiopoda*, the anterior portion of the cavity of the valves, wherein lie the brachia.

Brachionocephala (bra-kī″o-nō-sef′a-lä), *n. pl.* [NL., < Gr. *βραχίων*, an arm, + *κεφαλή*, a head.] A name proposed in 1862 by Bronn as a substitute for *Brachiopoda* (Dumeril, 1806).

Brachiopoda, *n. pl.* In recent years extensive studies of the *Brachiopoda* have been made: by Joubin on the anatomy of recent species, by Hall and Clarke on the anatomy and taxonomy of fossil forms, and by Beecher on ontogeny and phylogeny. It is now generally conceded that a classification based on the absence or presence of hinge-teeth, which is the foundation of that introduced by Deshayes, Owen, Bronn, and Huxley, or on the perforation or closing of the anus, as in King's scheme, has a value restricted to fully accomplished phylogenetic phases or ontogenetic conditions. In Beecher's classification, variation in the nature of the pedicle-opening is assumed as the basis of ordinal divisions, and the stages of shell-growth and its accessory developments of those of minor value. This classification establishes the following orders: (1) *Atremata*, in which the valves are unhinged and the pedicle emerges freely between them. These are subcircular or elongate shells in which growth takes place freely in all directions except posteriorly. *Obolus* and *Lingula* are typical genera. (2) *Neotremata*, in which the valves are also hingeless, cone-shaped, with the pedicle restricted to the ventral valve and the pedicle-aperture modified by a deltidium or listrium. These are circular, often largely calcareous shells (*Acrotreta*, *Orbiculoidea*, *Discina*). *Crania* and its allies have lost the pedicle by atrophy and are either attached by cementation of their valves or are wholly free. (3) *Protremata*, in which an articulate hinge is developed in progressed forms, the pedicle is restricted to the ventral valve, the deltidium originates on the dorsal side of the larval body but becomes ankylosed to the ventral shell and modifies the pedicle-passage, and the brachia are unsupported by calcareous processes. (*Strophomena*, *Thecidium*, *Productus*, *Orthis*, *Pentamerus*.) (4) *Telotremata*, in which the pedicle-passage is shared by both valves in early growth, but is confined to the ventral valve at maturity and modified by deltidial plates which are morphologically distinct from the deltidium and have a later origin in ontogeny. The valves are hinged, the brachia supported by calcareous crura, loops, and spirals. (*Rhynchonella*, *Terebratula*, *Spirifer*, *Atrypa*.) With the increased knowledge of the structure, distribution, and vertical range of the extinct brachiopods, the number of genera has been augmented to about 400, living and extinct, represented by some thousands of species, 2000 species being recognized in the Paleozoic rocks of North America alone, while about 150 species are now living.

brachiopodist (brak-i-op′ō-dist), *n.* One who is proficient in knowledge of the *Brachiopoda*.

brachioradialis (brak i-ō-rā-di-ā′lis), *n.*; pl. *brachioradiales* (-lēz). One of the muscles of the arm, the long supinator of the radius.

Brachiospongia (brak″i-ō-spon′ji-ä), *n.* [NL., < Gr. *βραχίων*, an arm, + *σπόγγος*, a sponge.] A genus of hexactinellid sponges having the form of a broad-mouthed, shallow vase with a single series of broad pouch-like hollow extensions about the base. It occurs in the Silurian rocks of the Mississippi valley.

brachisthode (brak′is-thōd), *n.* [Gr. *βράχιστος*, shortest, + *ὁδός*, way.] The shortest line between two points on the earth's surface; the geodetic line. *Rep. U. S. Coast and Geodetic Surv.*, 1896, p. 293.

brachistocephalous (bra-kis-tō-sef′a-lus), *a.* Same as *brachistocephalic*.

brachistocephaly (bra-kis-tō-sef′a-li), *n.* In *anthrop.*, the character, state, or condition of being brachistocephalic.

brachistochronic (bra-kis-tō-kron′ik), *a.* [Gr. *βράχιστος*, shortest, + *χρόνος*, time.] That can be traversed, accomplished, etc., in the shortest possible time under the conditions then prevailing; of or pertaining to the brachistochrone: as, a ball may roll from *A* down to *B*, or an earthquake wave may pass from *a* to *b*, by the *brachistochronic* path. *Rep. Brit. Ass'n Advancement of Sci.*, 1900, p. 76.—**Brachistochronic curve,** a curve representing the path which a body moving freely in a field of force must follow in order to reach a given point in the least time. See *brachistochrone*.

Brachium inferius cerebelli, the inferior peduncle of the cerebellum.—**Brachium opticum,** one of the processes which extend from the corpora quadrigemina to the optic thalamus.—**Brachium quadrigeminum,** Same as ★*brachium opticum*.—**Brachium superius cerebelli,** the superior peduncle of the cerebellum.

brachyaxis (brak-i-ak′sis), *n.* [Gr. *βραχύς*, short, + L. *axis*, axis: see *axis*.] The brachydiagonal axis, that is, the shorter lateral axis of an orthorhombic (or triclinic) crystal.

brachybiostigmatic (brak i-bī ō-stig-mat′ik), *a.* [Gr. *βραχύβιος*, short-lived, + *στίγμα* for 'stigma.'] In *plant œcol.*, having the stigma short-lived: said of proterogynous flowers in which the stigma quickly withers. Opposed to ★*macrobiostigmatic*. *F. Delpino*.

brachybiostigmatous (brak″i-bī″ō-stig′ma-tus), *a.* Same as ★*brachybiostigmatic*.

brachybioty (brak-i-bī′ō-ti), *n.* [Gr. *βραχύς*, short, + *βιοτος*, life.] Brevity of life as contrasted with longevity and considered in relation to inheritance. [Rare.]

Miss Beeton working solely at the material thus provided was enabled to form fairly extensive tables for the inheritance of longevity in the female line, and also with somewhat less extensive data for the deaths of infants to form some appreciation of what we have elsewhere termed the inheritance of *brachybioty*. *Biometrika*, Oct., 1901, p. 51.

brachycardia (brak-i-kär′di-ä), *n.* [NL., < Gr. *βραχύς*, short, + *καρδία*, heart.] Same as ★*bradycardia*.

brachycephal (brak-i-sef′al), *n.* One of the brachycephali; a brachycephalic person.

The *brachycephals* had also larger heads than the dolichocephals. *Geog. Jour.* (R. G. S.), XVI. 290.

brachyceral (bra-kis′e-ral), *a.* [Gr. *βραχύς*, short, + *κέρας*, horn, + *-al*.] Same as *brachycerous*.

brachycercic1 (brak-i-sėr′sik), *a.* [Gr. *βραχύς*, short, + *κέρκος*, tail.] Having a short tail. *Philos. Trans. Roy. Soc.* (London), ser. B, 189, 173.

brachycercic2 (brak-i-sėr′sik), *a.* [Gr. *βραχύς*, short, + *κερκίς*, the radius, the tibia, a rod or comb of a loom, < *κέρκος*, tail, handle.] Having a short forearm; in *anthrop.*, having a radiohumeral index less than 75. *Turner*.

brachycnemic (brak-ik-nē′mik), *a.* [Gr. *βραχύς*, short, + *κνήμη*, tibia.] In *anthrop.*, having a tibiofemoral index less than 83. *Turner*.

brachycranial (brak-i-krā′ni-al), *a.* [Gr. *βραχύς*, short, + *κρανίον*, cranium, + *-al*.] In *anthrop.*, characterized by or exhibiting a skull of less than middle length.

In both races platycephaly is associated with *brachycranial* characters—the association vanishing, however, for the Naqada males, and being more marked for the French. *Biometrika*, Aug., 1902, p. 462.

brachydactylism (brak-i-dak′ti-lizm), *n.* [*brachydactyly* + *-ism*.] A condition in which the fingers or toes are abnormally short. *Buck*, Med. Handbook, IV. 493.

brachydactylous (brak-i-dak′ti-lus), *a.* [Gr. *βραχύς*, short, + *δάκτυλος*, finger.] Having abnormally short fingers.

brachydactyly (brak-i-dak′ti-li), *n.* [Gr. *βραχύς*, short, + *δάκτυλος*, finger.] Same as ★*brachydactylism*. *Buck*, Med. Handbook, IV. 494.

Brachydeuterus (brak-i-dū′te-rus), *n.* [NL., < Gr. *βραχύς*, short, + *δεύτερος*, second.] A genus of grunts of the family *Hæmulidæ*. *B. auritus* is found in western Africa. The other species are chiefly American.

brachydomal (brak-i-dō′mal), *a.* Same as *brachydomatic*.

brachydont (brak′i-dont), *a.* Same as *brachyodont*. *Philos. Trans. Roy. Soc.* (London), March, 1903, p. 110.

brachydontism (brak′i-don-tizm), *n.* Same as ★*brachyodontism*.

brachyellipsoid (brak-i-e-lip′soid), *n.* [Gr. *βραχύς*, short, + *ellipsoid*.] In *anthrop.*, a short cranium of ellipsoid form. *G. Sergi*, Var. of the Human Species, p. 49.

brachyfacial (brak-i-fā′shal), *a.* and *n.* [Gr. *βραχύς*, short, + L. *facies*, face, + *-al*.] **I.** *a.* Having a short face. *Buck*, Med. Handbook, VII. 231.

II. *n.* Same as ★*chamæprosope*. *Deniker*, Races of Man, p. 60.

Brachygenys (bra-kij′e-nis), *n.* [NL., < Gr. *βραχύς*, short, + *γένυς*, chin.] A genus of grunts of the family *Hæmulidæ*, characterized by the small mouth. The one species known, *B. chrysargyreus*, 6 inches in length, is abundant about Key West and Havana.

brachygnathism (bra-kig′na-thizm), *n.* [Gr. *βραχύς*, short, + *γνάθος*, jaw, + *-ism*.] The condition of having an abnormally short lower jaw.

brachygraphic (brak-i-graf′ik), *a.* Of or pertaining to brachygraphy, or shorthand: as, *brachygraphic* characters.

brachygraphical (brak-i-graf′i-kal), *a.* Same as ★*brachygraphic*.

brachyhieric (brak-i-hī-er′ik), *a.* [Gr. *βραχύς*, short, + *ἱερόν* (*ὀστέον*), sacrum, + *-ic*.] Having a short sacrum. See ★*platyhieric*. *Amer. Anthropologist*, Jan. – March, 1901. p. 34.

brachyhypsicephalic (brak-i-hip″si-se-fal′ik), *a.* [Gr. *βραχύς*, short, + *ὑψι-*, on high, + *κεφαλή*, head, + *-ic*.] In *anthrop.*, having a short and high head or skull. *Man*, 1901, p. 190.

Brachyistius (brak-i-is′ti-us), *n.* [NL., < Gr. *βραχύς*, short, + *ἱστίον*, sail (alluding to the dorsal fin).] A genus of surf-fishes of the family *Embiotocidæ*. It comprises a single species, *B. frenatus*, a small carnivorous fish, living on sandy shores from Vancouver Island to Guadaloupe.

brachykerkic, *a.* Same as ★*brachycercic*.

Brachymetopus (brak′i-me-tō′pus), *n.* [NL., < Gr. *βραχύς*, short, + *μέτωπον*, front, face.] A genus of trilobites, belonging to the family *Proëtidæ*, having a semioval head and tail-shield (the latter being large), the glabellum small, and the entire surface covered with bead-like ornament. It is found in Carboniferous rocks and is one of the last representatives of these ancient crustaceans.

brachyodontism (brak′i-ō-dont″izm), *n.* The state or condition of being brachyodont or having short-crowned molars: used in describing teeth of mammals. Also *brachydontism*. *Proc. Zool. Soc. London*, 1893, p. 180.

brachyodonty (brak′i-ō-don″ti), *n.* Same as ★*brachyodontism*. *Trans. Linnean Soc. London, Zoöl.*, Nov., 1899, p. 446.

brachyome (brak′i-ōm), *n.* [NL., < Gr. *βραχύς*, short, + *ὠμος*, shoulder (see *humerus*).] In the nomenclature of the spicular parts in the sponge, the abbreviated arm of a ★*trider* (which see).

Brachyopsinæ (brak″i-op-sī′nē), *n. pl.* [NL., < *Brachyopsis* + *-inæ*.] A subfamily of seapoachers of the family *Agonidæ*, containing 3 genera, *Stellerina*, *Brachyopsis*, and *Pallasina*.

Brachyopsis (brak-i-op′sis), *n.* [NL., < Gr. *βραχύς*, short, + *ὄψις*, face.] A genus of fishes of the family *Agonidæ*, found in the North Pacific, comprising 2 species, *B. rostratus* and *B. segaliensis*. The latter attains a length of 7 inches.

brachypentagonoides (brak″i-pen″ta-gō″nō-ī′dēz), *n.* [Gr. *βραχύς*, short, + *πεντάγωνος*, five-cornered, + *εἶδος*, form.] In *anthrop.*, a cranium the norma verticalis of which has the form of a pentagon with rounded corners, and with short distances between the parietal and frontal protuberances. *Sergi*, Var. of the Human Species, p. 30.

Brachyphyllum (brak-i-fil′um), *n.* [NL. (Brongniart, 1828), < Gr. *βραχύς*, short, + *φύλλον*, leaf.] A genus of fossil coniferous plants characterized by short and thick scale-like leaves tightly appressed to the stems, for the most part rhombic in shape and regularly arranged so as to form a graceful pattern. It is most abundant in the Rhætic, but ranges from the Trias to the Lower Cretaceous, being found in both Europe and America.

Brachyptera (bra-kip′tē-rä), *n. pl.* [NL., < Gr. *βραχύς*, short, + *πτερόν*, wing.] An old name for the rove-beetles of the coleopterous family *Staphylinidæ*.

brachyrhomboides (brak″i-rom″bō-ī′dēz), *n.* [Gr. *βραχύς*, short, + NL. *rhomboides*, rhomboid.] In *anthrop.*, a cranium the norma verticalis of which has a rhomboid form, the rhomboid being wide in transversal direction. *Sergi*, Var. of the Human Species, p. 31.

brachysclereid (brak-i-sklē′rē-id), *n.* [Gr. *βραχύς*, short, + E. *sclereid*.] In *bot.*, one of the sclereids or stone cells that occur in bark and in fruits.

Brachyscome (bra-kis′kō mē), *n.* [NL. (Cassini, 1816), < Gr. *βραχύς*, short, + *κόμη*, hair; in allusion to the short pappus.] A genus of herbaceous plants of the family *Asteraceæ*. There are about 50 species, chiefly Australian. The only species under cultivation, *B. iberidifolia*, is commonly known as the Swan River daisy, a very graceful aster-like annual of easiest cultivation. It has blue or white daisy-like flowers.

brachystaphyline (brak-i-staf′i-lin), *a.* [Gr. *βραχύς*, short, + *σταφυλή*, the (swollen) uvula, + *-ine*[1].] In *anthrop.*, having a short palate, especially having a palate with an index more than 85. *Virchow.*

In both sexes there is sensible correlation between the palate and orbital indices, hypsiconchy being associated with *brachystaphyline* characters.
Biometrika, Aug., 1902, p. 460.

brachystaphyly (brak-i-staf′i-li), *n.* [*brachystaphyl(ous)* + *-y*[3].] In *anthrop.*, the character of having a short palate. *Biometrika*, March–July, 1904, p. 236.

Brachystegia (brak-i-stē′ji-ä), *n.* [NL. (Bentham, 1866–67), < Gr. *βραχύς*, short, + *στέγη*, covering. The name refers to the scantiness of the floral protective organs.] A genus of trees of the family *Cæsalpiniaceæ*, with even-pinnate leaves and terminal racemes, or raceme-like panicles of small flowers. These have no calyx and only rudimentary petals. The stamens and pistil are covered in the bud by a pair of bracts. There are about 12 species, natives of tropical Africa. Several of them have tough fibrous inner bark, which is used by the natives for making bark-cloth. The most important are *Brachystegia spicæformis* of the Zanzibar coast and *B. appendiculata* of southeast Africa.

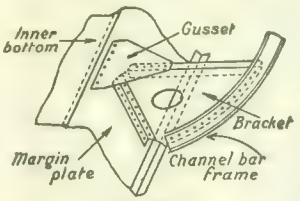
brachytmema (brak-it-mē′mä), *n.* [NL., < Gr. *βραχύς*, short, + *τμῆμα*, section.] In *bryol.*, a disk-shaped cell which on rupturing sets free a gemma. *Correns.*

brachyuranic (brak-i-ū-ran′ik), *a.* [Gr. *βραχύς*, short, + *οὐρανός*, palate, + *-ic.*] Having a short palate; specifically, in *craniom.*, having a palatomaxillary index of more than 115. *Amer. Anthropologist*, Jan.–March, 1901, p. 42.

bracingness (brās′ing-nes), *n.* Bracing quality or effect.

brack[2]†, *n.* **II.** *a.* Brackish; salt; briny: as, "living upon beef and *brack* water." *Southey*, Quarterly Rev., XXXV. 117.

brack[4] (brak), *v. t.* [G. *bracken*, inspect and assort (goods), < *brack*, inferior goods, refuse: see *brack*[2], *n.* Cf. *cull*[1], *v.* and *n.*] To inspect and assort (produce, etc.) at the Baltic ports by sworn selectors.



All flax and hemp shipped from Memel must be *bracked* or assorted. *Homans*, Cyclo. of Commerce, p. 1343.

brack[4] (brak), *n.* [*brack*[4], *v.*] A long-established system of official inspection and assorting of produce and other goods at the Baltic seaports.

brackebuschite (brak′e-bush-īt), *n.* [Named after D. Luis *Brackebusch* of Buenos Aires.] A vanadate of lead, iron, and manganese, found in Argentina.

bracker (brak′ėr), *n.* [G. *bracker*, < *bracken*, inspect and assort (goods): see *brack*[4], *v.*] An official inspector and assorter of goods in ports on the Baltic. See ★*brack*[4], *v. t.*

bracket[1], *n.* **1.** (*e*) In carriages, a heavy standard placed at an incline at the front end of the boot of a coach as a support for the foot-board.—**8.** A stiffening-rib on a casting. —**9.** (*a*) In *wood ship-building*, a short crooked timber, resembling a knee, for support or ornament. *Knowles*, Naval Arch. (*b*) In *iron ship-building*, a piece of plate of a triangular shape uniting, at their junction, two parts which meet at an angle to strengthen the joint against flexure. A bracket differs from a gusset in that it meets at least one of the surfaces to which it is attached angularly, being secured thereto by a riveted flange or a piece of angle-bar. The two terms are loosely used interchangeably. See ★*gusset*.—**Pendent bracket**, a shaft-hanger; a fixture projecting below a ceiling to support the journal of a shaft.—**Pendulum bracket**, a hinged bracket connected with the winding-motion of a spinning-mule.

Bracket.

bracket[1], *v. t.* **3.** In *ship-building*, to unite by a bracket.

bracket-floor (brak′et-flōr), *n.* In *iron ship-building*, a floor-plate of bracket form uniting the frame, reverse frame, and longitudinal in the framing of a double bottom. See cut under ★*bottom*.

bracket-frame (brak′et-frām), *n.* In *iron ship-building*, a frame composed of a frame-bar, reverse frame-bar, and bracket-floors.

bracket-fungus (brak′et-fung″gus), *n.* A fungus growing on a tree-trunk and forming a bracket or shelf-like projection, as many of the polyporoid fungi. See *Polyporus* (cut *a*).

bracket-plate (brak′et-plāt), *n.* In *ship-building*, same as ★*bracket*[1], 9 (*b*).

At the turn of the bilge there is a continuous watertight longitudinal frame, and upon this the vertical frames are stopped short, their heels being connected to the longitudinal by *bracket-plates*.
White, Manual of Naval Arch., p. 371.

bracketwise (brak′et-wīz), *adv.* In the manner of a bracket; so as to resemble a bracket.

Bracklesham beds. See ★*bed*[1].

braconid (brak′ō-nid), *n.* A member of the parasitic hymenopterous family *Braconidæ* (which see).

bract, *n.*, 2. (*b*) The oval distal exite on the appendages of certain segments of phyllopod crustaceans, as *Apus*, probably serving a respiratory function.

bractea (brak′tē-ä), *n.*; pl. *bracteæ* (-ē). [NL.: see *bract.*] One of the scale-like protective structures found on certain *Siphonophora* and considered to be greatly modified medusoids. Same as *bract*, 2.

bracteated (brak′tē-ā-ted), *a.* Same as *bracteate*.

bracteose (brak′tē-ōs″), *a.* [NL. **bracteosus*, *bractea*, a bract.] Furnished with numerous or large bracts; conspicuously bracteate.

bractiferous (brak-tif′ėr-us), *a.* In *bot.*, bract-bearing.

bract-scale (brakt′skāl), *n.* In *bot.*, a bract constituting a proper scale of the cone in conifers, and bearing or subtending the seed-bearing scale when this is present. It may surpass or be surpassed by the latter.

Bradford clay. See *clay*.

Bradleyanism (brad′lē-an-izm), *n.* The doctrine of F. H. Bradley, an English metaphysician, a mixture of intellectualism, absolute idealism, and skepticism.

This is Aristotelianism in contrast with *Bradleianism* in metaphysics. *Encyc. Brit.*, XXX. 678.

Bradley's process. See *aluminium* ★*processes*.

brad-punch (brad′punch), *n.* A small nail-set; a steel rod about 3 inches long, tapered to a blunt point at one end and used for driving brads, or small nails, so deeply into the wood that the heads will be below the surface.

bradycardia (brad-i-kär′di-ä), *n.* [NL., < Gr. *βραδύς*, slow, + *καρδία*, heart.] Abnormally slow pulsation of the heart.

The opposite condition to tachycardia, namely, *bradycardia*, is frequently met with in applicants for life insurance. *Med. Record*, Feb. 7, 1903, p. 206.

bradycrotic (brad-i-krot′ik), *a.* [Gr. *βραδύς*, slow, + *κρότος*, rattle (pulse).] Marked by a slow pulse.

bradylecithal (brad-i-les′i-thal), *a.* [Gr. *βραδύς*, slow, + *λέκιθος*, the yolk of an egg.] In *embryol.*, applied to certain eggs which have much yolk, such as the eggs of sharks, reptiles, and birds.

bradynosus (bra-din′ō-sus), *n.* [Gr. *βραδύς*, slow, + *νόσος*, disease.] A chronic disease.

bradypepsia (brad-i-pep′si-ä), *n.* [NL., < Gr. *βραδυπεψία*, < *βραδύς*, slow, + *πέψις*, digestion, < *πέπτειν*, digest.] Slow digestion.

bradypepsy (brad′i-pep-si), *n.* Same as ★*bradypepsia*.

bradypeptic (brad-i-pep′tik), *a.* Suffering from bradypepsia, or slow digestion.

bradypnœa (brad-ip-nē′ä), *n.* [NL., < Gr. **βραδύπνοια*, < *βραδύπνοος*, breathing slowly, < *βραδύς*, slow, + *πνεῖν*, breathe.] Slowness of respiration.

bradyseism (brad′i-sīzm), *n.* [Gr. *βραδύς*, slow, + *σεισμός*, an earthquake.] In *geol.*, a single slow rise or fall of the land. See the extract.

Prof. Milne commences with the discussion of *bradyseisms*, the slow and gentle movements of elevation or depression in the Earth's crust.
Geog. Jour. (R. G. S.), XIII. 544.

bradyseismic (brad-i-sīs′mik), *a.* In *geol.*, pertaining to or characterized by the slow rise and fall of the land with regard to the sea.

The fact that round the borders and upon the summit of hidden domes and tablelands there are at present displays of seismic and volcanic activity, leads to the belief that sub-oceanic *bradyseismic* action is yet in progress.
Geog. Jour. (R. G. S.), X. 131.

bradyseismical (brad-i-sīs′mi-kal), *a.* Same as ★*bradyseismic*.

bradytrophic (brad-i-trof′ik), *a.* [Gr. *βραδύς*, slow, + *-τροφος*, < *τρέφειν*, nourish.] Marked by slowly acting nutritive processes.

bradyuria (brad-i-ū′ri-ä), *n.* [NL., < Gr. *βραδύς*, slow, + *οὖρον*, urine.] Slow and difficult urination.

brae, *n.* **2.** An inclined roadway in a mine: commonly used in compounds: as, *cuddy-brae*. *Barrowman*, Glossary.

brag, *n.* **3.** It is played with 3 cards in the hand of each player, something like poker, but the ace and nine of diamonds and the jack of clubs are braggers, and may be called anything the holder pleases, 2 kings and a bragger being equal to 3 kings.

bragger, *n.* **2.** In the game of brag, the ace, the nine of diamonds, the jack of clubs. The holder of any of these cards can call it anything he pleases.

bragite (brag′īt), *n.* [< *Bragi*, in Norse myth. a son of Odin, + *-ite*[2].] A variety of fergusonite from Norway.

braguero (brä-gā′rō), *n.* [Sp., a truss, band, < *braga*, a cord (pl. *bragas*, also breeches).] A girth. [Western U. S.]

Brahmanda (brä-mān′dä), *n.* [Skt. *brahmānda*, < *brahmar*, Brahma, + *aṇḍa*, egg.] In *Hindu myth.*, the 'egg of Brahma': designating a division of infinite time.

Brahmani, Brahmini, *n.* See *Brahmanee*.

Brahmanian stage. See ★*stage*.

Brahmanization (brä-man-īz-ā′shon), *n.* Conversion to Brahmanism. Also *Brahminization*.

Caste is in a state of transition owing to the rapid *Brahmanization* of the Dravidian races of the mountain region.
Geog. Jour. (R. G. S.), X. 120.

Brahmaputra (brä-ma-pō′tra), *n.* [Named from the *Brahmaputra*, river of northeastern India.] A variety of the domestic hen better known as *brahma*. See *brahma*[3].

Brahminization. Same as ★*Brahmanization*.

Brahminism (brä′mism), *n.* Same as *Brahmanism*.

braid[1], *n.*—**Honiton braid**, narrow machine-made braid of ornamental oval figures connected by narrow bars.

braided (brā′ded), *p. a.* Specifically, anastomosed or interlaced: said of a stream.

This extensive deposit, in some places 500 feet thick, is the product of aggradation by *braided* or laced streams, whose load of material from the mountains could not all be carried across the gentle slope of the plains.
Science, Nov. 15, 1901, p. 778.

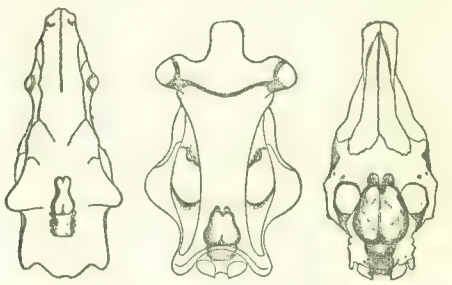
braid-fern (brād′fėrn), *n.* See ★*fern*.

braid-stitch (brād′stich), *n.* In *sewing-machine work*, a method of stitching with a coarse thread designed to give to the fabric an ornamental finish resembling braid.

brail, *n.* **3.** A section of a log-raft, six of which make an average tow. [U. S.]—**Foot-brails**, the lowest brails on a sail.

braille (brāl, F. brā′y), *n.* [Named from the French inventor, Louis *Braille*.] A method of writing or printing for the blind in which combinations of tangible dots or points are used to represent alphabetical letters. There

are several systems, which differ considerably in details and have undergone various modifications. Thus in the British system the base is a group of six dots in two columns of three dots each ⠿, from which the letters are made as follows: A ⠁, B ⠃, C ⠉, etc. In the New York point system, which is extensively used in the United States, ⠂ is the first base, ⠆ the second, ⠒ the third, and ⠲ the fourth; and the letters are: A ⠂⠁, B ⠆⠁, C ⠒⠉, etc. This notation is adapted to indicate capital and lower-case letters, numerals, punctuation, abbreviations, syllables, and musical notes and signs.



brain, *n.*—**Abdominal brain.** See *solar plexus*, under *plexus*. —**Brain center.** See ★*center*. —**Calyx of the brain.** See ★*calyx*. —**Central ganglia of the brain.** See ★*ganglion*. —**Dropsy of the brain,** hydrocephalus. —**Great brain,** the cerebrum. —**Little brain,** the cerebellum. —**Silent regions of the brain.** Same as *association* ★*areas*. —**Viallanes's tritocerebral lobes of the brain,** in *entom.*, a division of the embryonic brain intercalated between the antennal and mandibular segments. *A. S. Packard*, Text-book of Entom., p. 51.

brainal (brān'al), *a.* [*brain* + *-al.*] Of or relating to the brain: as, *brainal* normality. *Science*, May 2, 1902. [Rare.]

brain-cap (brān'kap), *n.* Same as *brain-box*.

The *brain-cap* of many savages has been found to be larger and heavier than that of some higher races.
Keane, Ethnology, p. 46.

brain-cast (brān'kȧst), *n.* A cast or filling, natural or artificial, of the cranial cavity.

A *B* *C*

Restorations of the Brain in Successive Genera of Ungulates. *A*, Dinoceras (Eocene); *B*, Brontotherium (Miocene); *C*, Modern Horse. (From Marsh.)

Brain-casts are approximate restorations of the brain surface and the principal nerve-trunks departing therefrom.

brain-eye (brān'ī), *n.* In polyclads, one of a group of eyes lying above the brain: distinguished from *tentacular* ★*eyes* and *marginal* ★*eyes*.

The eye-spots have an arrangement very similar to that found in the latter species. There is a dense cluster at the base of each tentacle; the paired group of *brain-eyes* lying in front of the brain is more extensive than that behind it. *Proc. Zool. Soc. London*, 1903, II. 100.

brain-stem (brān'stem), *n.* The crura cerebri, pons Varolii, and medulla oblongata.

braird, *v.* **II.** *trans.* In *coal-mining*, to widen the undercut or holing in a coal-seam. *Barrowman*, Glossary. [Scotch.]

brairding (brār'ding), *n.* In *coal-mining*, the height of undercut or holing in front. *Barrowman*, Glossary. [Scotch.]

brake[3], *n.* **13.** In *cracker-baking*, a machine for rolling dough, to be used in making gingersnaps and other thin cakes, into sheets ready for the panning-machine. It consists essentially of rolls between which the dough is passed to press it into a sheet. A *reversible brake* is one having aprons on each side of the rolls to enable the operator to pass the sheet through in opposite directions by reversing the rolls. See *panning-machine*.

14. In *sheet-metal work*, a machine for bending and forming sheet-metal, used in making larger forms such as metal cornices; a cornice-brake. —**Alden brake,** a device for absorbing and measuring the power developed by an engine. The power is absorbed by overcoming the friction developed by one disk pressing on another against which it is forced by water-pressure which can be varied to suit the power to be absorbed. —**Atmospheric brake.** Same as *vacuum-brake*. —**Brake horse-power.** See ★*horse-power*. —**Counter-pressure brake,** an air-brake so constructed that a certain pressure must be overcome to release the brake. This makes a very sensitive brake, particularly suitable for controlling the speed of a train on down grades. —**Differential brake,** a brake which is applied by a differential motion. —**Electric brake,** any brake worked by electricity, either by a magnet or by a solenoid, or otherwise. See *magnetic* ★*brake*. —**Emergency brake,** a brake for use in case it is desired to stop a train or car as quickly as possible, without regard to the inconvenience caused by the shock due to the quick arrest of motion. —**Expanding brake,** a brake, applied to the inner side of a wheel-rim, usually made of two or more parts which are pushed apart or expanded from within, instead of clasping the rim from without. —**Hand-brake,** in *car-building*, a brake operated by hand; the most simple form of brake; a mechanical brake as distinguished from an air-brake. —**High-speed brake,** a form of Westinghouse air-brake designed to secure greater safety for high-speed railway-trains from a quick and powerful application of the brakes, if desired. The system uses an air-pressure of 110 pounds per square inch, instead of 70 pounds, in train-pipe and reservoirs. The brake-cylinder under each car has a special reducing-valve, the function of which is to allow high-pressure air from the train-pipe to vent into the brake-cylinder, causing a momentary pressure there in excess of that permissible at the time of the stop. This type, in experiments at 80 miles per hour, reduced the distance required for the stopping of a train by 20 per cent. as compared with the length passed over when the same train was equipped with the quick-action brake only. —**Hydraulic brake,** a form of power train-brake in which the brake-beams that force the brake-shoes against the wheels of the car are actuated by pistons in hydraulic cylinders. When the brakes are to be applied, water or other liquid under pressure is admitted by pipes and valves to the cylinders, and the brakes are applied with the necessary power. The difficulty in getting and keeping the water-pressure and that from freezing in cold weather prevent extensive or satisfactory use of this system. —**Hydropneumatic brake,** a brake which is operated by compressed air and the resistance offered by a liquid flowing through a confined channel. Such brakes are often used to take up the recoil of guns. The first shock is taken up by the compressed air and the rest of the recoil by forcing a liquid through a passage that is smaller at the back end than at the front, thus making an augmented resistance. —**Instep brake,** a crimping-brake which uses a special form of forming-die to shape the shoe to the instep. —**Magnetic brake,** any brake which is actuated by a magnet. Sometimes it is applied by the magnet, and sometimes the magnet is used to release the brake which is applied by a spring. —**Mechanical brake,** a brake which is applied by the action of levers, rods, cranks, etc., and not by an electric current or air-pressure. —**Pneumatic brake,** an air-brake. —**Prony's brake.** Same as *Prony's dynamometer* (which see). —**Reversible brake,** an apparatus used in cracker-bakeries to prepare cake-dough in sheets for the panning-machine. It consists of rollers with a platform, or table, each side of which has an apron on which the dough is run back and forth through the rollers. It is fitted with three pulleys, two loose and one tight, to change the motion of the rolls. —**Westinghouse brake,** a form of air-brake invented by George Westinghouse. See ★*air-brake*.

brake[4], *n.*—**Cedar brakes.** See ★*cedar*.

brake[5], *n.*—**Chinese brake,** *Pteris serrulata*, a Chinese species established in the southeastern United States. —**Winter brake,** *Pellæa atropurpurea*: so called because it remains green throughout the winter.

brakeage (brāk'āj), *n.* [*brake* + *-age.*] Braking power or action. See *brake*[3], *n.*, 9, and *brake*[3], *v. t.*, 2.

brake-band (brāk'band), *n.* Same as *brake-strap*.

brake-dog (brāk'dog), *n.* The pawl of a brake-ratchet.

brake-finger (brāk'fing″gėr), *n.* Same as ★*brake-dog*.

brake-gear (brāk'gēr), *n.* In *car-building*, the brake-system of a railroad-car, including all its component parts. It includes all the pipes, hose, air-cylinders, chains, rods, brake-shoes, etc.

brake-handle (brāk'han″dl), *n.* In *car-building*, a hand-lever for controlling a brake, used only in a special type of brake-gear. It takes the place of the ordinary brake-wheel.

brake-hose (brāk'hōz), *n.* A superior grade of air-hose, composed of rubber and cotton fabric, used in short lengths to connect the brake-pipes under a railroad-car and to convey compressed air to the brake-gear. —**Armored brake-hose,** brake-hose protected by wire wound tightly round the outside to prevent injury by abrasion. Any hose protected by wire may be termed an *armored hose*. —**Brake-hose coupling,** a self-locking coupler for connecting the ends of brake-hose between railway cars and forming an air-tight connection between them.

brake-pipe (brāk'pīp), *n.* A pipe for carrying compressed air to an air-brake cylinder. *Encyc. Brit.*, XXVI. 342.

brake-power (brāk-pou″ėr), *n.* Same as *brake* ★*horse-power*.

brake-rod (brāk'rod), *n.* The rod by which a brake is operated; the rod connecting the operating lever to the brake.

brake-rubber (brāk'rub″ėr), *n.* A brake-shoe.

brake-sieve (brāk'siv), *n.* A jigger operated by a hand-lever. See *jigger*[1], 2 (*a*).

brake-signal (brāk'sig″nal), *n.* In *car-building* and *railroading*, any signal that the brakes are to be put on; a ★train-signal (which see).

brake-sled (brāk'sled), *n.* A logging-sled so constructed that, when the pole-team holds back, a heavy iron is forced into the road-bed on the side of each runner of the forward sled.

braking-machine (brā'king-ma-shēn″), *n.* A machine used to soften skins. It consists of a large wheel with several dull blades projecting from the rim which come in contact with the skin.

bramathere (brā'ma-thēr), *n.* An animal of the genus *Bramatherium*.

bramble-shark (bram'bl-shärk), *n.* See ★*shark*[1].

branch, *n.* **2.** (*m*) In *math.*, some one determination of a many-valued function selected for consideration. Thus the values log. x, log. $x + 2\pi i$, log. $x + 4\pi i$, . . . , may be said to belong to different *branches* of the function log. x. (*n*) In *coal-mining*, a road in long-wall working leading off a level, heading, or other main road.

branchage (brânch'āj), *n.* [*branch*, *n.*, + *-age*. Cf. *leafage*.] Branches collectively or in the mass.

Leafage and *branchage*, vulgar eyes admire.
Browning, Ring and Book, x. 275.

branch-climber (brânch'klī″mėr), *n.* A liana supported by irritable curling branches, not otherwise different from the ordinary climber, that is, from one bearing leaves and lateral shoots. It is exclusively tropical and subtropical. See ★*tendril-climber*.

branch-cut (brânch'kut), *n.* In *math.*, a line, quite arbitrary (except that it cannot intersect itself), which either passes from a branch-point to infinity or joins two branch-points.

brancher, *n.* **3.** In *flower-making*, one who attaches the branches to the main stems.

branch-grass (brânch'gras), *n.* The creek-sedge, *Spartina stricta maritima*. It grows along channels in salt-marshes. See *Spartina*.

branchiæ, *n. pl.*—**Dermal branchiæ,** prolongations (like glove-fingers) of the interior membrane of echinoderms, as the starfishes, which protrude through the dermal pores and serve as respiratory organs. They are retractile and are covered with ciliated epithelium. —**Secondary branchiæ,** structures of various form which, as in mollusks, perform the respiratory function in case of the absence or atrophy of the true ctenidia.

Branchial cartilage, one of the cartilaginous rods or bars in the branchial arches of sharks or of the embryos of higher animals. —**Branchial filament.** Same as *gill-filament*. —**Branchial fistula.** See ★*fistula*. —**Branchial formula,** a table showing the number and arrangement of the gills, as in crustaceans. —**Branchial junction,** a transverse band uniting the first-formed or primary septa of the branchial apparatus of the lancelet, *Branchiostoma*. —**Branchial pocket,** in *zoöl.*, a pouch-like dilatation of the branchial slits in the cyclostomes, larval *Balanoglossus*, etc. —**Branchial rod,** a chitinous rod forming the support of the lamella, or septum, between each pair of branchial openings in the lancelet.

branchicolous (brang-kik'ō-lus), *a.* [L. *branchia*, gill, + *colere*, till, dwell.] Living in or on the gills of fishes or other aquatic animals: said of certain parasites, as *Distoma*, etc.

branchihyal, *n.*—**Axial branchihyals,** the basibranchials; the lower median unpaired bones in the branchial arches or gill-arches of fishes. —**Lateral branchihyals,** the ceratobranchials; bones of the gill-arches of fishes between the hypobranchials and the epibranchials.

branchiogasteropod (brang″ki-ō-gas'tę-rō-pod), *n.* One of the *Branchiogasteropoda*.

branchiomere (brang'ki-ō-mer), *n.* [NL., ‹ Gr. *βράγχια*, gills, + *μέρος*, part, segment.] In *embryol.*, one of the segments of the vertebrate embryo as indicated by the presence of a visceral arch and cleft; a branchial segment or metamere.

branchiomeric (brang-ki-ō-mer'ik), *a.* Relating to the division of the cranial region into segments, each furnished with a gill-arch or respiratory pouch.

branchiomerism (brang-ki-om'ėr-izm), *n.* In *embryol.*, the development of branchial segments as indicated by the so-called visceral skeleton and the metameric diverticularization of the fore-gut in the vertebrate embryo.

branchiopalatal (brang″ki-ō-pal'a-tal), *a.* [Gr. *βράγχια*, gills, + L. *paries*, wall: see *parietal*.] Relating to the gills and the wall of the atrium in mollusks.

Branchiopoda, *n.* **3.** An order of entomostracous crustaceans containing the *Phyllocarida*, *Phyllopoda*, *Cladocera*, and *Branchiura*.

branchiosaurian (brang'ki-ō-sâ'ri-an), *n.* and *a.* **I.** *n.* A fossil amphibian of the genus *Branchiosaurus*.

II. *a.* Pertaining to or having the characters of *Branchiosaurus*.

Branchiosaurus (brang″ki-ō-sâ'rus), *n.* [NL., ‹ Gr. *βράγχια*, gills, + *σαῦρος*, a lizard.] A genus of small extinct amphibians of lizard-like form, with broad, obtusely rounded heads and large orbits. The ventral surface of the body was covered with overlapping cycloidal scales arranged in several different series; the tail was long and partly unossified. The genus occurs abundantly in the Permian rocks of Saxony and Bohemia.

branchiostegal, *a.* **II.** *n.* One of the bony rays under the head of a fish below the opercular bones and behind the lower jaw. They are connected by a membrane called the *branchiostegal* or *gill-membrane*.

Branchiostomatidæ (brang″ki-ō-stō-mat′i-dē), *n. pl.* [NL., < *Branchiostoma*(*t*-) + *-idæ*.] The family of lancelets, the lowest of known fishes, comprising 2 or 3 genera and 8 or 10 species. They are small translucent creatures found embedded in the sand on warm coasts throughout the world. The recognized genera are *Branchiostoma*, *Epigonichthys*, and *Amphioxides*.

branchiotreme (brang′ki-ō-trēm), *n.* [Gr. *βράγχια*, gills, + *τρῆμα*, a hole.] Same as *gill-slit*.

branch-island (brânch′ī-land), *n.* The island formed by an ★anabranch (which see). [Australia.]

branch-lacquer (brânch′lak″ėr), *n.* The juice obtained from the branches of the lacquer-tree. See *seshime lacquer* (under *lacquer*).

branch-line (brânch′līn), *n.* Same as ★*branch-cut*.

branch-section (brânch′sek″shọn), *n.* Same as ★*branch-cut*.

brand, *n.*—**Sugar-cane brand,** a disease of the leaves of sugar-cane caused by the smut, *Ustilago Sacchari*.

brand-book (brand′bůk), *n.* In *stock-raising*, a record-book showing the various cattle-brands and their owners.

brander[2], *n.* 3. *pl.* Furnace-bars; the grate-bars of a ventilating-furnace. *Barrowman*, Glossary. [Scotch.]

brander[2], *v. t.* 2. To nail furring-strips or the like to a girder or other timber as a preparation for lathing and plastering.

Brandes's test for quinine. See ★*test*[1].

branding-chute (bran′ding-shōt), *n.* A narrow lane or guideway through which cattle are driven one at a time to be branded.

branding-helmet (bran′ding-hel″met), *n.* A helmet-like cage placed over the head and face in branding the cheek of a criminal who had pleaded benefit of clergy: in use in the sixteenth century.

brandise (bran′dis), *n.* [Ult. < AS. *brandīsen*: see *brand-iron* and *brander*[2].] A trivet on which to set a pot or kettle.

> And there was a great black crock upon the *brandise*, with his legs sticking out.
> *T. Hardy*, Madding Crowd, p. 178.

brandisite (bran′dis-īt), *n.* [Said to be named for Clement, Count of *Brandis*, + *-ite*[2].] A micaceous mineral closely related to seybertite.

bran-drench (bran′drench), *v. t.* In *leather-manuf.*, to wash in sour bran to remove the lime. *Modern Amer. Tanning*, p. 161.

Brand's method. See ★*method*.

brandtite (brand′tīt), *n.* [Named after Georg *Brandt*, master of the Swedish mint.] A hydrated arseniate of calcium and manganese occurring in from colorless to white triclinic crystals: found at Pajsberg, Sweden.

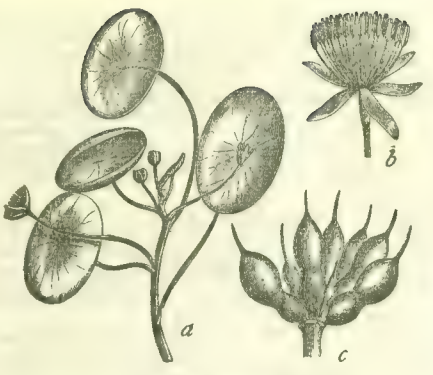
brandy[1], *n.*—**White brandy,** brandy as it comes, colorless, from the still, not having taken up coloring matter from the casks in which it is commonly stored, nor having been artificially colored.

brandy-cowe (bran′di-kou), *n.* In *wine-making*, the washings of a brandy-cask, used to adulterate port-wine. *Encyc. Brit.*, I. 173.

brandy-faced (bran′di-fāst), *a.* Having a face which shows the effects of brandy-drinking.

> Where you have to elbow and jostle your way . . . by hulking labourers and *brandy-faced* viragos, squabbling at tavern doors.
> *G. A. Sala*, Twice round the Clock, p. 266.

brandy-oil (bran′di-oil), *n.*—**Marc brandy-oil.** Same as *fusel-oil*.



brandy-smash (bran′di-smash), *n.* A drink made by mixing brandy with crushed ice and putting a few sprigs of mint in the glass. See *smash*, 3.

branner (bran′ėr), *n.* [*bran*[1], *v.*, + *-er*[1].] A machine for applying bran for cleansing purposes. It consists of a box filled with bran and slaked lime, and an endless belt on which tin plates, coated with oil as they come from the tin-pot, are carried through the bran and lime. *Sci. Amer.*, Nov. 1, 1902, p. 290.

branning, *n.* 2. The process of removing the oil from tin plates during their manufacture, by passing them through a mixture of bran and slaked lime.

brant[2], *n.*—**China brant,** a Californian name for Hutchins's goose, *Branta canadensis hutchinsi*, a subspecies of the Canada goose.—**Hutchins's brant.** Same as *Hutchins's goose*.—**Mexican brant.** Same as *China* ★*brant*.

Brasenia (bra-sē′ni-ä), *n.* [NL. (Schreber, 1789): formation not indicated by the namer.] A genus of dicotyledonous aquatic plants belonging to the family *Nymphæaceæ*. The only species, *B. Schreberi*, has alternate, peltate, oval, entire, floating leaves and axillary purple flowers. It is widely distributed in North America, eastern and tropical Asia, western tropical Africa, and Australia. It is sometimes cultivated in ponds, along with water-lilies, chiefly for its floating foliage; the flowers are inconspicuous.

Brasenia Schreberi.

a, a flowering branch with peltate leaves; *b*, flower, three fourths natural size; *c*, ripe fruit showing the separate carpels, enlarged twice. (From Engler and Prantl's "Pflanzenfamilien.")

brasero (brä-sā′rō), *n.* [Sp.: see *brazier*[2].] 1. A brazier for holding burning charcoal for heating purposes.—2. In Mexico, a hearth or fireplace.

Brasero, with paddle for stirring fire.

brash[2], *n.*—**Spaning brash.** Same as *weaning brash* (which see, under *brash*[2]).

brashy[1], *a.* 2. Brittle; crumbly; fragmentary: as, *brashy* sandstone.—3. Showery: as, *brashy* weather; a *brashy*, cold spring.—4. Subject to slight attacks of sickness or indisposition, especially when connected with acidity of the stomach. Hence—5. Acid or bitter: as, a *brashy* taste.

brass[1], *n.* 1. The following are varieties of brass, with the parts, by weight, of their components:

Name.	Copper.	Zinc.	Tin.	Lead.	Iron.
Admiralty metal	87	5	8		
Bell-metal	16		4		
Brazing-metal	16	3			
Brazing-solder	50	50			
Bushing-metal	64	8	4		
Common brass	64	36			
Composition, United States Navy	88	2	10		
Copper-red brass	99.9				0.1
Gun-metal	92.5	2.5	5		
Gun-metal	83	15	2		
Muntz's metal	60	40			
Naval brass	62	37	1		
Red brass	87	4.4	4.3	4.3	
United States Navy journal-boxes	82.8	3.4	13.8		
White brass	34	66			

Aluminium brass. See ★*aluminium*.—**Brass sleeker, wire.** See ★*sleeker*, ★*wire*[1].—**Brass solder.** See ★*solder*.—**Burnt brass,** a brass or alloy, containing copper and zinc, which has been exposed to so high a temperature that the more volatile zinc element in the compound has begun to start or leave its combination with the copper.—**Calamin brass,** brass prepared by the calamin method—that is, by mixing metallic copper with calcined calamin and charcoal and heating the mixture for twelve hours or more in fire-clay crucibles, till the zinc, reduced by the carbon and carbonic oxid, alloys with the copper. The calamin method, although cheaper than the direct method, has been replaced by the latter which requires less time.—**Naval brass,** a metal consisting of 62 parts of copper, 37 parts of zinc, and 1 part of tin, used in England for surfaces to be exposed to corrosion in sea-water, or in parts of guns and fittings.—**Small brass,** a Roman coin the size of a sextans.—**Soft brass,** brass which has not been hardened by hammering or working; brass which has been annealed after being worked: used when ductility is required.—**Tough brass,** any brass which is suitable for making bushing or linings for bearings.—**Yellow brass,** a cheap brass used for making castings when strength and ductility are not required: usually made of 70 parts of copper and 30 parts of zinc.

brass[1], *v. t.*—**To brass it,** to brazen it out; behave brazen-facedly or with effrontery. [Colloq.]

brassart, *n.* 2. A band of any material worn about the arm above the elbow. Hospital-corps men on the battle-field wear a white cloth brassart marked with a red cross.

Brass-founders' ague. See ★*ague*.

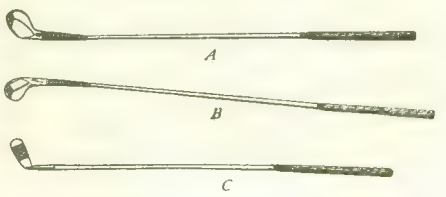
brassic (bras′ik), *a.* [L. *brass*(*ica*), cabbage, + *-ic*.] Same as ★*brassidic*.

Brassicaceæ (bras-i-kā′sē-ē), *n. pl.* [NL. (Lindley, 1836), < *Brassica* + *-aceæ*.] A family of dicotyledonous choripetalous plants of the order *Papaverales*, the mustard family, typified by the genus *Brassica*. It is the same as the *Cruciferæ* (which see), and is the name adopted by botanists who require that family names be derived from those of the type genera.

brassicaceous (bras-i-kā′shius), *a.* Belonging to the *Brassicaceæ*, or mustard family.

brassidic (bra-sid′ik), *a.* [*brass*(*ic*) + *-id* + *-ic*.] Noting an acid, $C_8H_{17}CH{:}CHC_{11}H_{22}CO_2H$, formed by the action of nitrous acid on erucic acid and probably stereomeric with the latter. It is monobasic and melts at 66° C. This acid is also called *brassic acid*.

brassière (brȧ-siãr′), *n.* [F., < *bras*, arm.] A short stiffened or boned waist or bust-support worn by women.



brass-molder (brȧs′mōl″dėr), *n.* One who makes brass castings. As brass requires quite different treatment from iron, special men do the brass-molding.

brass-shirted (brȧs′shėr″ted), *a.* Covered or incased with brass: as, a *brass-shirted* roller. *Fox*, Mechanism of Weaving, p. 465.

brassware (brȧs′wār), *n.* Things made of brass; brazen utensils.

brass-work (brȧs′wėrk), *n.* Articles or finishings of brass, as the small mountings or trimmings about a boiler or machine.

brassy[1], *a.* II. *n.* A wooden golf-club shod with brass on the sole.

A, brassy-niblick; *B*, brassy-spoon; *C*, brassy-cleik.

brassy-cleik (bras′i-klēk), *n.* An iron golf-club with a wooden or hard-rubber inset, sometimes used in place of a brassy.

brassy-niblick (bras″i-nib′lik), *n.* A wooden golf-club with a small head and a brass sole, used for playing out of bad lies.

brassy-spoon (bras′i-spōn). *n.* A wooden golf-club with a long face, lofted, and a brass sole.

Brathay flags. See ★*flag*[4].

bratling (brat′ling), *n.* [*brat*[2] + *-ling*[1].] A little brat; an infant. [Jocose.]

> We are all—wife, *bratling*, and self—remarkably well.
> *Cottle*, Reminiscences of Coleridge, p. 75.

bratty[2] (brat′i), *n.*; pl. *bratties* (*-iz*). [Tamil *varaiti* or *virātti*, dried dung.] A cake of dried cows' dung, used as fuel. [Southern India.]

Brauneria (brou-nē′ri-ä), *n.* [NL. (proposed by Necker, 1790), named in honor of *J. J. Bräuner*, author of a German herbal published in 1713.] A genus of dicotyledonous plants belonging to the family *Asteraceæ*. See *Echinacea*.

Braun's solution. See ★*solution*.

Braun tube See ★*tube*.

Brauronia (brâ-rō′ni-ä), *n. pl.* [Gr. *Βραυρώνια*, neut. pl. of *Βραυρώνιος*, adj., < *Βραυρών*, a village of Attica.] In *Gr. antiq.*, a festival in honor of Artemis Brauronia. It was celebrated every fifth year at Brauron, a village of Attica; its chief features were a procession of ten virgins to the temple of the goddess, their consecration to her service, and the sacrifice of a goat. See *Brauronian*.

Bravais's method. See ★*method*.

bravura, *n.* 2. In *painting*, vigorous, brilliant treatment in both color and technique.

> Here, instead of *bravura*, we have a careful, almost painstaking, reproduction of the model.
> *Portfolio*, XXII. 175.

brawl[3], *n.* See *braul*[2].

bray[1], *v. t.* 2. In cloth-finishing, to pound (woolen cloth) in a soapy scouring-liquor; same as *full*. See *full*[2] and *fulling*[2].

braza (brä′thä), *n.* [Sp.: see *brace*[1], *n.*] The Spanish fathom (see *brass*[2], 2); in the Philippines, a measure of length somewhat less than 6 feet.

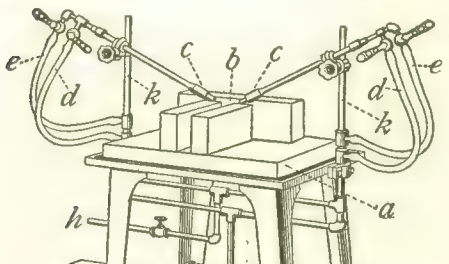
brazenry (brā′zen-ri), *n.* [*brazen* + *-ry.*] Brazen assertion; effrontery.

Coming from Lord Lucan, this language was no vulgar *brazenry*; it represented the irrepressible strength of his real though mistaken conviction.
Kinglake, Crimea, IV. 57.

braziery (brā′zi̇ėr-i), *n.* Braziers' work; brassware.

brazilein (brą-zil′ē-in), *n.* [Appar. < *brazil*, + *-e-in*[2].] Same as *brazilin*.

Brazilian anime. Same as *anime*, 3.—**Brazilian bug** or **beetle.** See ★*bug*2.—**Brazilian cedar.** See ★*cedar.*—**Brazilian cherry.** Same as *Surinam* ★*cherry* (*b*).—**Brazilian emerald, ruby,** etc. See ★*emerald*, ★*ruby*, etc.



brazilite (brą-zil′īt), *n.* [*Brazil* + *-ite*[2].] See ★*baddeleyite*.

brazing-clamp (brā′zing-klamp), *n.* A clamp used in repairing saws and in brazing together the ends of band-saws. It consists of a strong frame with two or more set-screws for holding the saw-web in position, and is fitted with a screw-press. The ends of the band-saw are beveled to match, placed in the clamp with the ends joined, and supplied with solder under the press. Red-hot irons a e then placed above and below the joint and firmly held together by the press. The hot irons cause the solder to flow and make a brazed joint. A pair of brazing-tongs (which see) can be used instead of the press.

brazing-machine (brā′zing-ma-shēn″), *n.* A heating-machine fitted with a conveyer by which small articles to be brazed are carried under the gas-flames in the furnace.

brazing-metal (brā′zing-met″al), *n.* Any metal suitable for brazing; specifically, an alloy used for making flanges for copper steam-pipes and facings for valves. This alloy is usually 98 parts copper and 2 parts tin, the proportion of copper being high, so that the flange will not melt when it is brazed to the pipe.

brazing-table (brā′zing-tā″bl), *n.* An iron table supporting a flat slab of fire-clay and fitted with gas-burners for using producer-gas under an air-blast and giving blowpipe flames that may be concentrated upon any point on the table. The table is also provided with a number of loose fire-bricks that may be used to guide and concentrate the heat upon the metals to be brazed. The illustration shows a simple form of brazing-table. Other and larger tables have several burners and fixed fire-clay bricks arranged in convenient positions for the work. See ★*heating-machine*.

Brazing-table.

a, fire-brick slab on iron table; *b*, loose fire-brick to concentrate heat; *c*, blowpipes; *d*, gas-pipes; *e*, air-pipes; *f*, compressed-air reservoir; *g*, pressure control; *h*, gas supply; *i*, air supply; *k*, standard, with set-screw, supporting pipes.

brazing-wire (brā′zing-wīr), *n.* Soft brass wire of small diameter bound around a joint to be brazed. The joint is then heated, and the flux, usually borax, is sprinkled on the joint, which is then filled by the molten metal from the wire.

brea (brā′ä), *n.* [Sp. tar, resin: cf. F. *brai*, resin, etc.] 1. A small thorny tree, *Cæsalpinia præcox*, with light-green bark, found in northern Argentina. It yields a pale-brown gum resembling gum arabic and known commercially as *goma brea*.—2. A variety of asphaltum which is fluid at ordinary temperatures; maltha.

In regard to *brea* and chapapote, usage seems to make them synonymous, unless it be that the solidity of chapapote is a degree greater than that of *brea*, by no means an assured distinction. *U. S. Geol. Surv.*, 1902, p. 299.

brea-blanca (brā″ä-bläng′kä), *n.* [Sp. *brea*, pitch, + *blanca*, white.] A soft resin obtained from the pilaui-tree (*Canarium Luzonicum*), used in the arts to toughen varnish and prevent it from cracking, but not suitable for varnish alone. Also called *Manila elemi*. See *elemi* and ★*pilaui*. [Philippine Is.]

Breach of faith, betrayal of confidence or implied trust: as, "vicious *breach of faith*," *Massinger*, Bashful Lover, iv. 2.—**Clean breach** (*naut.*), a boarding sea which strips the deck-furniture from a vessel.—**Clear breach** (*naut.*), a sea that sweeps across the deck without breaking.—**To mount a breach,** to assault a breach in a fortification.

bread[1], *n.*—**Black bread,** bread made of rye flour, often with the addition of caraway seeds. See *rye*[1].—**Bread oil.** See ★*oil*.—**Feast of unleavened bread.** See *Jewish* ★*festivals*.—**Indian bread.** See *tuckahoe*, 2.—**Pulled bread,** pieces of the crumb of fresh bread or biscuit dried in a slow oven until slightly colored: served with chocolate, coffee, or bouillon.

bread[1], *v. t.* 2. To clean by rubbing with dry bread or with a bread-crust, as a drawing.—3. To provide with daily bread.

They had enough to *bread* themselves.
Tourgée, Fool's Errand, p. 91.

bread-board (bred′bōrd), *n.* 1. A board upon which to knead, roll, or mold flour-mixtures; a kneading-board; a molding-board; a rolling-board.—2. A board upon which bread is cut on the table during the serving of a meal.

bread-crust (bred′krust), *n.* A crust of bread.—**Bread-crust bomb.** See ★*bomb*.—**Bread-crust structure** or **texture,** in *geol.*, the vesicular structure exhibited by the outer portions of many volcanic bombs, resembling the crust of a loaf of bread. *Geikie*, Text-book of Geol., p. 274.

breadfruit, *n.*—**African breadfruit,** a tree of the mulberry family, *Treculia Africana*. The large round fruits contain numerous starchy seeds, buried in a spongy substance, which are ground into meal and eaten by the natives.

bread-maker (bred′mā″kėr), *n.* A household machine for mixing and kneading dough. It consists of a tin vessel containing a curved blade suspended from a vertical rod passing through the cover of the vessel. By means of a horizontal handle fixed to the rod the blade can be made to turn in the vessel. The materials are placed in the vessel, the cover is placed over it and fastened, and the handle is turned rapidly for a few minutes, when the dough is found to be well kneaded and ready to be left to rise.

bread-nut, *n.* 2. The seeds of the fertile breadfruit, *Artocarpus communis*, which form a food staple on many Pacific islands and in the East Indies. They are somewhat like European chestnuts in flavor. See *Artocarpus*, *breadfruit*, ★*antipolo*, and ★*dugdug*.

bread-sticks (bred′stiks), *n. pl.* Bread-dough rolled into sticks and baked: served with bouillon, soup, or tea.

Breadth extreme, in *ship-building*, an expression used to designate the greatest breadth of the ship to the outside of planking or plating, whether above or below water.—**Breadth for tonnage,** in *ship-building*, the breadth of a vessel used in calculating the tonnage by an obsolete rule called "builders' old measurement." It differs from breadth extreme in the exclusion of extra thickness of outside plank worked in certain places over the average thickness.—**Breadth index.** Same as *cephalic index* (which see, under *cephalic*).—**Internal biorbital breadth,** in *anthrop.*, the distance between the inner sides of the two orbits.—**Interpterion breadth,** the distance between the pteria.—**Minimum frontal breadth,** in *anthrop.*, the minimum distance between the temporal ridges.—**Minimum ramus breadth,** in *anthrop.*, the minimum breadth between the ascending branches of the lower jaw.—**Nasal breadth,** the greatest breadth of the nose.—**Orbital breadth,** in *anthrop.*, the greatest horizontal diameter of orbit; also, the greatest distance from the dacryon to the opposite side of orbit.—**Palatal breadth,** in *anthrop.*, the breadth of the palate, generally measured between the canines as *anterior* and between the second molars as *posterior* palatal breadth.—**Straight of breadth,** in *ship-building*, same as ★*middle-body*. [Great Britain.]

The "middle body" or "*straight of breadth*," is that part of a ship amidships where the cross-sections maintain the form of the midship section.
White, Manual of Naval Arch., p. 457.

breadwinning (bred′win″ing), *n.* The earning of a livelihood.

breadwinning (bred′win″ing), *a.* Serving to earn a livelihood: as, *breadwinning* pursuits or labors.

break, *v.* **I.** *trans.* **14.** In *cricket*, to cause (the ball) to change its course after the pitch, by imparting to it a twist or spin at the moment of leaving the hand. Also used intransitively.—**To break a landing.** See ★*landing*.—**To break a will,** to secure a judicial determination that an instrument purporting to be a will is not a legal will by reason of defects, either in the forms required for its proper execution or in the substance of the instrument.—**To break broadcast,** to plow throughout: in *cotton-growing*, contrasted with merely forming the beds. [Southern U. S.]—**To break (one) all up,** to unsettle or disturb greatly. [Colloq.]—**To break the balls,** to open the game at English billiards or ball-pool.—**To break up.** (*f*) To confuse; disconcert, as a public speaker. [Slang.]—**To break up a fox,** in *hunting*, after the fox is killed, to take him away from the dogs, take off the mask, brush, and pads, and then throw the remains to them to worry.

—**To break water.** (*b*) To soften water for washing, in case it contains much lime or magnesia, by the addition of carbonate of soda or borax.

II. *intrans.* **15.** In *tennis* and other games, to bound: as, the ball *breaks* in a contrary direction.—**16.** In *trap-shooting*, to hit the target. *Forest and Stream*, Jan. 24, 1903, p. 80. **17.** In *cricket.* See **I.** ★14.—**To break back,** in *cricket*, said of a ball when it breaks from the off, that is, as the bowler views it, from left to right. See ★*off-break*. *Hutchinson*, Cricket, p. 60.—**To break down.** (*f*) To lose homogeneity: said of a composite fluid or semisolid in the first stage of decomposition.—**To break even,** in *faro*, to bet that each card will win or lose an even number of times on the deal.—**To break off.** (*c*) Said of the wind when it comes more ahead, compelling a vessel to go off from her course in order to keep her sails full.—**To break up.** (*c*) *Naut.*, of a ship, to go to pieces in a heavy sea; of a storm, to cease.

break, *n.* **20.** An unlucky remark, or a breach of propriety, etiquette, or the like. [Colloq., U. S.]—**21.** In *elect.*, the opening of an electric circuit.—**22.** *pl.* In *phys. geog.*, the broken land at the border of an upland that is dissected by ravines. [Western U. S.]—**23.** An apparatus for breaking the stalks of hemp, etc., with the object of facilitating the separation of the bast from the woody tissue. Also called *breaker*.—**24.** The bound of the ball in tennis service.—**25.** A reduction in the rate of wages. [Scotch.]—**26.** In *cricket*, a ball which, because of a twist or spin imparted to it by the bowler, changes its course after the pitch.—**27.** In *boxing* and *prize-fighting*, the act of separating after the contestants have come to close quarters and seized each other. Certain rules provide whether they may or may not strike at each other upon 'breaking away,' that is, separating.—**All-round break** or **run,** in *billiards*, one into which a variety of billiard-strokes enter, and the balls are never close together for more than three or four shots at a time.—**Hammer break.** See ★*hammer-break*.

breakaway (brak′a-wā), *n.* 1. An animal which breaks away from a herd or flock.—2. A panic rush of sheep, cattle, horses, or other animals at the sight or smell of water; a stampede. [Australian in both senses.]

The smartest stock horse that ever brought his rider up within whip distance of a *breakaway* or dodged the horns of a sulky beast took the chance.
E. E. Morris, Austral English.

break-back (brāk′bak), *n.* An ★off-break (which see). *Hutchinson*, Cricket, p. 64.

breakbones, *n.* 2. A book-name for the giant fulmar, *Ossifraga gigantea*: usually called *capehen* by sailors; also, rarely used in books for the osprey, *Pandion haliaëtus* and the lammergeier, *Gypaëtus barbatus*.

break-club (brāk′klub), *n.* In *golf*, a stone or other obstacle lying near the ball which might break or injure the club in the act of playing.

breakdown, *n.* **II.** *a.* Used or employed in repairing a breakdown, specifically in the railway service: as, a *breakdown* crew; a *breakdown* train. Called *wrecking-train*, etc., in the United States.

When the Westbound's ditched, and the tool-car's hitched,
And it's 'Way for the *Breakdown* gang (Tara-ra!)
'Way for the *Breakdown* gang! *R. Kipling*, .007

We moved off, . . . the first [train] being a short "*breakdown*" pilot train.
Julian Ralph, War's Brighter Side, p. 89.

breaker, *n.*, 1. (*h*) In *elect.*, a device for opening an electric circuit.

breaker-scutcher (brā″kėr-skuch′ėr), *n.* A machine used in preparing cotton for carding; the first scutching-machine.

breakfaster (brek′fas-tėr), *n.* One who breakfasts.

"Oh, don't you know what has happened?" said the sacred *breakfaster*.
Sydney Smith, Irish Rom. Cath. Church.

breakhead (brāk′hed), *n.* Powerfully reinforced stem and bows, peculiar to certain vessels used for breaking channels through heavy ice.

In order to be able to maintain this ferry service in winter the "Mecklenburg" has been constructed as an ice-breaker. The hull has a *breakhead* such as is usually only carried by ice-breakers, and other important reinforcements. *Sci. Amer. Sup.*, Jan. 9, 1904, p. 23422.

breaking-cap (brā′king-kap), *n.* 1. A cap placed over an opening in the cylinder of a steam-engine, so that if water collects in the cylinder the cap will be broken and thus open an outlet for it and prevent injury to the engine.—2. A cap or cup-shaped casting, used in machines for rolling iron or steel, such that if a piece is fed to the rolls too cool, or too hard, the casting will yield first and save the more costly roll.

breaking-harness (brā'king-här″nes), *n.* A harness of special design used in breaking colts to familiarize them with the strapping.

breaking-joint (brā'king-joint), *n.* The joint or surface where an injured portion of the body of an organism is thrown off and a new one regenerated.

There is a definite *breaking-joint* at the base of the crab's leg, at which the separation takes place.
T. H. Morgan, Regeneration, p. 100.

breaking-pin (brā'king-pin), *n.* In a conveyer or elevator, a small safety-pin inserted at some point between the shafting or gearing which operates the conveyer and a sprocket-wheel which controls the belts or chains. Any unusual strain breaks the pin, releases the wheel, and causes the whole system to stop.

breaking-snaffle (brā'king-snaf l), *n.* A heavy jointed snaffle with a key-piece at the center and three or more players hanging on it.

breaking-strength (brā'king-strength), *n.* In *mech.*, the strength of a body as measured by the load, per unit of cross-section, necessary to produce rupture.

break-off, *n.* 2. The act of breaking off, separating, or severing connection, company, or relations.

break-wind (brāk'wind), *n.* A rude shelter, constructed of sticks, bushes, bark, or other material, used by primitive tribes, such as the former natives of Tasmania, and the Athapascans of northwestern North America, in place of a tent or a hut.

Ignorant of agriculture, with no dwellings but rough huts or *break-winds* of sticks and bark, . . . these savages, until the coming of civilized man, roamed after food within their tribal bounds. *Encyc. Brit.*, XXV. 467.

bream[1], *n.*—**Black bream.** (*a*) A fish, *Sparus australis*, of the family *Sparidæ*. Called in Tasmania *silver bream*. [Australia.] (*b*) *Girella tricuspidata*, of the family *Kyphosidæ*. [Tasmania.]—**Bony bream**, a clupeoid fish, *Dorosoma erebi*, found in Australia.—**Red bream.** Same as *red snapper*.—**Red-breasted bream**, a species of sunfish, *Lepomis auritus*, of the family *Centrarchidæ*, which reaches a length of from 6 to 8 inches: abundant from Maine to Louisiana in streams east of the Alleghanies.—**Silver bream.** (*a*) Same as *black* ★*bream* (*a*). (*b*) Same as *white* ★*bream* (*b*).—**White bream** (*b*), a fish of New South Wales, *Xystæma ovatum*, of the family *Percidæ*. Also called *silver-belly*.

bream-backed (brēm'bakt), *a.* Having the back straight or slightly arched: said of a horse.

He [a horse] was not jogged under the jaw, . . . hollow-backed, *bream-backed*, long-backed or broken-backed. *Southey*, Doctor, V. cxliii.

brean[2] (brean), *n.* [G. **brean*, < Sp. *brea*, resin, + *-an*.] A crystalline resin obtained from elemi.

breast, *n.*, 7. (*h*) The front part of the first of a set of wool-carding machines for opening the locks of wool preparatory to passing them to the carding-cylinders.—**Breast-doffer**, in *wool-carding*, the cylinder that doffs and conveys the wool from the breast, or first part, of the carding-machine to the main cylinder, or drum.—**Broken breast, gathered breast**, abscess of the breast.—**Funnel breast**, a deformity of the chest consisting in a conical depression at the lower end of the sternum.—**Hysterical breast**, simulation of a tumor of the breast, sometimes seen in young nervous women.

breast-board, *n.* 2. *pl.* In *mining*, retaining-boards in the face of a heading in running ground.

breast-bore (brest'bōr), *n.* In *mining*, a bore-hole in front. *Barrowman*, Glossary.

breast-brace (brest'brās), *n.* Any brace having a knob or breastplate, so that the operator can push on it with his breast to feed the drill. See *brace*, 14.

breast-collar (brest'kol-ar), *n.* A harness-strap passing round a horse's breast, to which the traces are attached.

breast-high, *a.* As high as the breast; specifically, in *lumbering*, having a height of 4½ feet above the ground.

breast-hole (brest'hōl), *n.* The arched hole, at the base of a foundry cupola, used for lighting the fire and taking out the cinder and slag after the iron has been drawn off. The hole is covered by a sheet-iron door while the blast is on.

breasting, *n.* 4. Same as ★*breast-stoping*.

breast-mining (brest'mī″ning), *n.* Same as ★*breast-stoping*.

breastplate, *n.* 7. The iron plate used for covering the breast-hole of a cupola.

breast-shore (brest'shōr), *n.* In *ship-building*, one of a line of props or shores, nearly horizontal, supporting transversely a ship in dry-dock, in the vicinity of her load water-line. Also called *wale-shore*. *White*, Manual of Naval Arch., p. 324.

breast-stoping (brest'stō″ping), *n.* Mining from a vertical or steeply inclined face of ore. In inclined veins this is a variety of underhand stoping. In flat deposits the term is applied to an extended face of work, as distinguished from *room-work*.

breastwise (brest'wīz), *adv.* Abreast; side by side.

To form the two bridges, two lines of ships . . . were moored across the strait *breastwise*.
Grote, Greece, II. iv. 38.

breathiness (breth'i-nes), *n.* In a vocal or similar sound, the state, quality, or effect resulting from an escape of unvocalized air with the sound proper, as in clumsy vocalization, apprehension or terror, whispering, etc.: sometimes equivalent to *wheeziness*, which, however, is usually applied to mechanical sounds, as to a poor organ tone.

breathing, *n.*—**Abdominal breathing.** See *abdominal respiration*, under *abdominal*.—**Cheyne-Stokes breathing.** See *Cheyne-Stokes respiration*, under *respiration*.—**Mouth breathing**, habitual breathing through the open mouth instead of through the nose: often in children a sign of obstruction of the posterior nares by adenoid vegetations.

breathy (breth'i), *a.* [*breath* + *-y*[1].] 1. Pertaining to or of the nature of breath.—2. In *phonetics*, accompanied with breath; pronounced with open glottis; uttered with breath.—3. Characterized by a conspicuous use of the breath: said usually of vocal sounds in which breath is needlessly and faultily wasted.

breccial (brech'i-al), *a.* [*breccia* + *-al*[1].] Of, pertaining to, or of the nature of breccia: as, one solid *breccial* mass. *Kane*, Grinnell Exped., p. 269.

brecciate (brech'i-āt), *v. t.*; pret. and pp. *brecciated*, ppr. *brecciating*. [*breccia* + *-ate*[2].] To break or shatter (the solid rock): a process common in the faulting and folding of strata. It is one of the methods of origin of the rock known as *breccia*.

The folding which is almost certainly present would easily joint or *brecciate* the brittle Niobrara limestone to such an extent as to make it no barrier to the accumulation of oil above from the carbonaceous constituents of the beds below. *U. S. Geol. Surv.*, 1902, p. 331.

brecciform (brech'i-fôrm), *a.* [E. *breccia* + L. *forma*, form.] Having the form of a *breccia*. *Geikie*, Text-book of Geol., p. 1071.

Brechitidæ (brē-kit'i-dē), *n. pl.* [NL., < *Brechites* + *-idæ*.] A family of mollusks containing the genus *Brechites*, or *Aspergillum*, now generally included in the *Clavagellidæ*: same as *Aspergillidæ*.

bred, *n.* A simplified spelling of *breed*.

bredbergite (bred'bėrg-īt), *n.* [Named after B. G. *Bredberg*, a Swedish chemist, who analyzed it.] An iron garnet from Sala, Sweden, peculiar in that it contains a considerable amount of magnesium.

bredi (brā'di), *n.* [Cape Dutch.] In *South Africa*, vegetables stewed with meat.

bredth, *n.* A simplified spelling of *breadth*.

breech, *n.* 5. The lowest quality or sort of wool from the fleece of the sheep: it is taken from the hinder part.

breech-cloth (brēch'klôth), *n.* Same as *breech-clout*.

breeches, *n. pl.*—**Pair of breeches**, in *Eng. billiards*, making a winning and a losing hazard in two different pockets by the one stroke, when playing from balk only.—**Scotchmen's breeches**, a kilt. It is a popular saying that when enough blue sky appears after a storm to make a pair of *Scotchmen's breeches* the weather will clear. [Humorous.]

breeches-flue (brich'ez-flö), *n.* An uptake; a flue having conduits for gases of combustion which join so as to discharge into one stack.

breeches-pipe (brich'ez-pīp), *n.* A pipe which divides into legs or branches; a Y-pipe.

breeches-tube (brich'ez-tūb), *n.* A boiler-tube or -flue which divides into two parts which either run parallel or diverge.

breeching-body (brich'ing-bod″i), *n.* That part of the breeching of a harness which encircles the rump of a horse. It is held in place by hip-straps. The ends are provided with rings to receive the side or breeching-straps.

breeching-loop (brich'ing-löp), *n.* 2. A leather or metal loop used as a substitute for the breeching-hook in a harness.

breeching-strap (brich'ing-strap), *n.* A strap by which the breeching is connected with the trace in double harness, or with the shaft in single harness.

breeching-tug (brich'ing-tug), *n.* In a harness, a short tug provided with a buckle and loops, attached to the breeching-body or braces to receive the hip-strap.

breech-plug (brēch'plug), *n.* In *ordnance*, the steel plug which closes the bore of a breech-loading gun at the rear end. Breech-plugs are of various forms, but are usually of the general shape of a cylinder or truncated cone, on the surface of which is an interrupted screw-thread corresponding to a similar female interrupted thread in the breech of the gun. When the plug is entered into the breech of the gun, the threads on the plug enter the blanks between the threads in the breech, and the two parts are locked together by a quarter or sixth turn of the plug which engages the threads. See *breech-block* and *breech-mechanism*, with cut.

breeding, *n.*—**Line breeding**, in *stock-raising*, another name for *in-and-in breeding*.—**Straight breeding**, breeding within the limits of a breed: opposed to *cross-breeding*.

breeding-ground (brē'ding-ground), *n.* A place suitable or used for breeding: as "ducks seeking their *breeding-grounds*," *Kane*, Arctic Expl., I. 268.

breedy (brē'di), *a.* [*breed* + *-y*[1].] Breeding readily, as rabbits; prolific.

Blockheads too are *breedy*, and double themselves every ten years. *Blackwood's Mag.*, XII. 55.

breez, *n.* A simplified spelling of *breeze* (wind).

breeze[2], *n.* 3. In *electrotherap.*, a discharge of high tension electricity from a pointed or brush electrode, causing a sensation as of a spray falling on the skin.—**Mountain breeze, valley breeze**, cool winds blowing down a mountain-side or through a valley, gorge, or cañon: especially felt during the late hours of clear nights in the summer season.—**Topgallant breeze**, a wind of such power as to permit the carrying of topgallant sails only.

Brehmer arc-lamp. See *electric* ★*arc*.

breidin (brē'i-din), *n.* [Sp. *brea*, resin, + *-id* + *-in*[2].] A compound of uncertain identity described by Baup as occurring in elemi.

brein (brē'in), *n.* [Sp. *brea*, resin, + *-in*[2].] A compound described by Baup as occurring in elemi. It is probably impure amyrin.

breislakite (brīs'lak-īt), *n.* [Named after Scipione *Breislak*, an Italian geologist (1748–1826).] A mineral occurring at Vesuvius in wool-like forms. Its exact character is uncertain, but it has been referred to pyroxene, to amphibole, and also to fayalite.

brekfast, *n.* and *v.* A simplified spelling of *breakfast*.

brelan (brā-loṅ), *n.* [F.] 1. In games, three of a kind.—2. An ancient French game very much like poker, but played with only three cards in each player's hand. It is now superseded by bouillotte.

Bremia (brē'mi-ä), *n.* [NL. (Regel, 1843), named for J. J. *Bremi*-Wolf, a Swiss naturalist (1791–1857).] A genus of peronosporaceous fungi. They have the conidiophores expanded into a cup-like disk, from the margin of which arise short processes bearing the spores. The single species, *B. Lactucæ*, is the downy mildew of lettuce. It also occurs on several other closely related plants.

Bremia Lactucæ.

a, a branching conidiophore showing the expansions and processes on which the conidia are borne, much enlarged; *b*, a ripe conidium, highly magnified; *c*, a conidium after germination has begun, highly magnified.

brephalos (bref'a-los), *n.*; pl. *brephaloi* (-loi). [NL., < Gr. *βρέφος*, the young of any animal, + *-αλος*, a mere termination.] The first larval stage of a crustacean after leaving the egg.

brephic (bref'ik), *a.* [Gr. *βρεφικός*, adj. < *βρέφος*, fetus, embryo.] In *biol.*, pertaining to an early developmental stage.

brer (brur, bru), *n.* A dialectal contraction of the word 'brother' in use among the negroes of the southern United States: as, *brer* Fox, *brer* Rabbit, etc. *J. C. Harris*, Uncle Remus.

brest, *n.* and *v.* A simplified spelling of *breast*.

bretas (bret'as), *n.*; pl. *bretea* (-ē-ă). [Gr. *βρέτας*, pl. *βρέτεα*.] In *Gr. antiq.*, a small idol or image having slight resemblance to the human form. There may be found indications of a head, and sometimes of hair and drapery. Bretea are often seated.

bretelles (bre-telz'), *n. pl.* [F.] In *dressmaking*, straps running from the belt in front over the shoulders to the belt in the back, with more or less elaboration of trimming and outline. They usually broaden at the shoulder and narrow toward the waist.

breth, *n.* A simplified spelling of *breath*.

Brethrenism (breTH'ren-izm), *n.* The principles or doctrines of the sect known as *Christian Brethren, Plymouth Brethren*, and sometimes *Darbyites*. See *Plymouth Brethren*, under *brother*.

Breton, *n.*—**Low Breton.** Same as *Breton*, 2.

Bretonian (brē-tō'ni-an), *a.* and *n.* [Cape *Breton* or Cape *Breton* Island.] In *geol.*, a divisional name applied by Matthew to the uppermost stage of Cambrian deposits in New Brunswick. The rocks carry many fossils, among them *Dictyonema flabelliforme*, a graptolite which in other countries also marks the summit of the sediments of Cambrian time.

bretonne (bre-ton'), *n.* [F., fem. of *breton*, Breton.] A purée of red onions.

Brev. An abbreviation of *brevet*.

breviary, *n.*—**Mozarabic breviary,** the breviary as arranged according to the Mozarabic liturgy, now extant only in the city of Toledo, Spain.

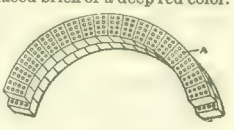
breviconic (brev-i-kon'ik), *a.* [L. *brevis*, short, + Gr. *κῶνος*, cone.] Having a short cone, as the shells of certain fossil cephalopods.

brevipalatal (brev-i-pal'ā-tal), *a.* Same as ★*brachyuranic*. *Turner*.

Brevoortia, *n.* **2.** A genus of California plants of the family *Liliaceæ*. *B. Ida-Maia*, the only species, is a slender, grassy, half-hardy plant with beautiful and lasting scarlet and green flowers often called *floral fire-crackers*.

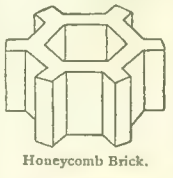
Brewer's mask. See ★*mask*[3].

brewst (brōst), *n.* A brewing. Same as *browst*.



brew-wife (brö'wīf), *n.* [ME. *bruewyf*.] A woman who brews; a brewster.

> For the sei(d) gold smyth hath maried a *bruewyf*, and keepeth the brue haus. *Paston Letters*, III. 244.



Brianchon hexagon, luster, point. See ★*hexagon*, ★*luster*[2], ★*point*[1].

Briasse limestone. See ★*limestone*.

brick[2], *n.* **1.** Commercial bricks are divided into two general classes, *hard brick*, and *soft brick*. A *hard brick* is any brick burned sufficiently hard to resist moisture, heavy pressure, and moderate heat; it ranges in color from deep blue-black, through dark reds, to dark browns and reddish yellows, and is used for pavements, sidewalks, hearths, ovens, foundations, bridges, subways, and exterior walls of buildings. A *soft brick* is a partly burned brick, ranging in color from pale yellow to salmon, used only for interior walls and partitions in dry places, such as the backing of exterior walls, for filling in piers, and in other places exposed to moderate temperature and pressure. Each class is divided into many kinds, chiefly described by their character or use, as *hard building, rough hard, common hard*, etc., and *pale, light, filling-in, backing-up, inside wall*, etc.—**Aluminous bricks,** bricks consisting principally of alumina. These bricks are neutral in character, not being easily attacked by either an acid or a basic slag. They are used as linings of furnaces, where they will come in contact with the slag or other corrosive material, or at a point of junction between an acid and a basic lining.—**Bauxite bricks,** refractory bricks made of calcined bauxite, mixed with clay or plumbago. They are used for lining furnaces, and are neutral in character.—**Boston brick,** a rough face-brick much used in old colonial buildings. It is made in shades of red.—**Brown brick,** a hard fire-brick used in constructing coke-ovens. It measures 9 inches long by 4½ by 2⅝ at one end and 4 by 2⅜ at the other end.—**Face- or front-brick,** any hard brick suitable for the front exterior walls of buildings of some architectural character.—**Gage-brick,** a special kind of fire-brick that under the influence of heat changes color: used in bake-ovens to serve as a crude guide to the temperature.—**Glass brick,** a street-paving material made of broken or scrap glass, which is melted and compressed into shape. By this treatment the glass is strengthened and its resisting quality is increased.—**Glazed brick,** brick having one face coated with enamel.—**Honeycomb brick,** fire-brick of a special form, shown in the figure, patented for use in the interior construction of the Cowper regenerative hot-blast stove. Built up together, these bricks form a honeycomb-like structure with hexagonal channels, through which the flame of blast-furnace waste gas passes for two or three hours, heating up the fire-brick, and is then replaced by air, which takes up the heat thus stored and is sent on to the furnace at a temperature of about 1,500° F.—**Magnesite brick,** a fire-brick made of impure magnesia mixed with water, dried, and burned.—**Muley brick,** a brick-yard term for an imperfect brick.—**Natural brick,** clays baked or sintered by some natural source of heat, such as a molten lava-flow or the spontaneous combustion of a coal-seam. *Sci. Amer. Sup.*, July 23, 1904, p. 23872.—**Neutral brick,** in *metal.*, a brick containing a large proportion of alumina and capable of resisting well the action of both acid and basic oxids at a high temperature without slagging or melting down.—**Philadelphia brick,** a fine quality of hard smooth-faced brick of a deep red color.—**Radial brick,** a form of refractory perforated brick used in building tall chimneys. It is in the form of the keystone of an arch and has two rows of perforations. Built into a circular chimney, radial bricks break joint with each line of perforations in line with those in the bricks below, the mortar filling the perforations through each tier of bricks and binding them together vertically.—**Sand-lime brick,** a brick made from silicious sand, with a small admixture of lime to serve as cementing material, and burned at a very high temperature.—**Sewer-brick,** very hard brick suitable for sewer or other submerged or buried work.—**Stock brick,** any hard brick for general exterior work.—**White brick,** brick made of clay that in burning turns white: a fine decorative brick for interior walls.

Radial Brick.
A, perforation.

Honeycomb Brick.

brick[2], *v. t.*—**To brick in,** to inclose with brickwork: used of timber constructions the open spaces of which have to be filled in with brickwork.—**To brick up,** to close with brickwork, as an opening; to strengthen with brickwork, as a wall or pier.

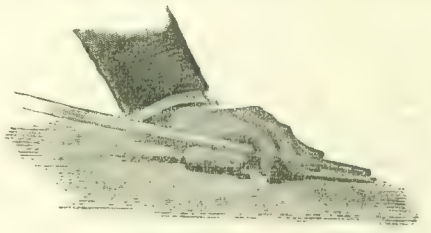
brickbat, *n.* **2.** Hornblende schist, which upon weathering breaks up into rectangular blocks from three sets of joints. *Bulletin* 213, *U. S. Geol. Surv.*, 1902, p. 59. [Local name near Dahlonega, Ga.]

brick-chisel (brik'chiz"el), *n.* A short, heavy steel chisel having a wide cutting-edge, used by bricklayers in cutting fine face-brick.

Brick-dust deposit, a urinary sediment of a brick-red color, consisting of urates.

Brickmakers' anemia. See ★*anemia*1.

bricknogged (brik'nogd), *a.* Filled with bricknogging, as a timber construction the open spaces of which are to be filled in this way.

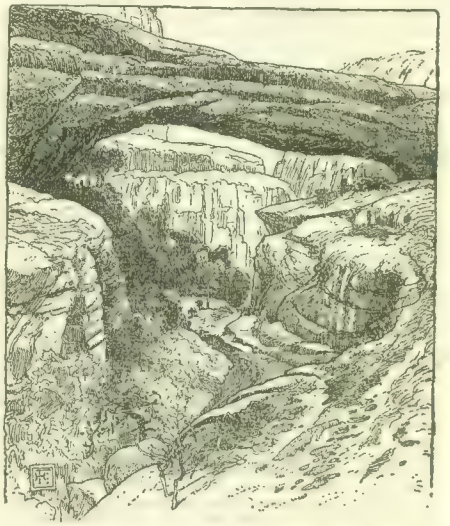


brick-top (brik'top), *n.* An edible agaricaceous fungus, *Hypholoma sublateritium*.

bricole, *n.* **4.** In *billiards*, the act of causing the cue-ball to hit a cushion first; cushioning. *Banding, banking, benching*, and *walling* are all equivalents of *cushioning* in this sense.

brideship (brīd'ship), *n.* The standing or status of a bride.

> Wilhelmina's wedding day arrived, after a *brideship* of eight months. *Carlyle*, Frederick the Great, II. viii. 276.



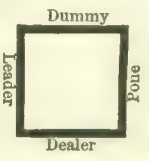
bridge[1], *n.* **13.** (*b*) An arrangement of circuits, electric or magnetic, whereby the bridge circuit connects from a point of one circuit to a point of another circuit, and thereby permits a comparison of the parts of the two circuits. —**14.** In *billiards:* (*a*) A notched piece of wood, attached to a long handle, used as a support for the cue when the ball is in such a position that the hand cannot conveniently be used as a rest. (*b*) The thumb and forefinger used as a rest over which the billiard-cue glides. The best players now use the hooked forefinger, infolding the small end of the cue.—**15.** In *math.*, the crossing-place of two sheets of a Riemann's surface. It may run from 0 to ∞ along an arbitrary line, say along the ray of positive real numbers. Along the bridge the surface intersects itself. **16.** A narrow-railed, movable plank extending across the flies of a theater: used in raising angels, fairies, etc., in spectacular plays, and worked by ropes and pulleys from the gridiron.—**17.** A platform or scaffold hung by ropes, used by mechanics in painting or finishing walls.—**18.** An arched casting fastened to the cover of a pump which guides the free end of the plunger or piston-rod.—**19.** In *mining:* (*a*) A platform on wheels running on rails for covering the mouth of a shaft or slope. (*b*) A track or platform which passes over an inclined haulage-way and can be raised out of the way of ascending and descending cars. (*c*) An air-crossing. *Coal and Metal Miners' Pocketbook.*—**20.** A narrow strip,

Bridge.

placed across an opening, for supporting something without closing too much of the opening. Also *bridge-bar, bridge-piece*. *Trautwine*, Engin. Pocket-book.—**21.** In a Dow composing-machine, the place on the raceway where the justification of a line of characters begins.—**Cytoplasmic bridge.** See ★*cytoplasmic*.—**Flying bridge,** in *ship-building*. (*b*) The uppermost bridge, particularly in war-ships, of light construction, supported from below by open framework.—**Hanging bridge.** (*b*) A partition hanging down from a boiler to deflect the hot gases. This is sometimes a water-leg and sometimes is made of fire-brick.—**Low bridge!** a cry of warning on a canal-boat to duck the head when about to pass under a bridge.

> "Wa'al," says I, "I was thinkin' 't I'd like to bet you . . . that if all them fellers we seen this afternoon, that air over fifty, c'd be got together, an' some one was suddenly to holler '*Low Bridge*,' that nineteen out o' twenty 'd duck their heads." *E. N. Westcott*, David Harum, xxviii.

Natural bridge, a natural span of rock across a stream or hollow, usually a remnant of the former roof of a cave,



The 'Caroline' Natural Bridge, San Juan County, Utah.
Height, from surface of water to lower center of arch, 197 feet; width, from buttress to buttress at bottom of cañon, 208 feet 6 inches; thickness of sandstone arch at highest point, 125 feet.

which after the destruction of adjacent parts of the formation may leave a bridge-like structure. Famous natural bridges occur in Virginia and Utah.—**Supracondylar bridge.** See ★*supracondylar*.—**Traveling bridge,** a portable bridge mounted on a form of truck. Such bridges are generally used for transporting materials such as coal or ore from cars to storage-bins or from the storage-bins to cars.

bridge[1], *v.* **I.** *trans.* **4.** In *card-playing*, to bend (a card) so that a confederate can cut the pack wherever the bent card is placed.

II. *intrans.* In *wrestling*, to make a bridge of the body by pressing the head and feet on the ground and bowing up the back, to prevent the opponent from securing a fall.

bridge[2] (brij), *n.* [Short for *bridge whist*, prop. *bridge whist*, < *bridge*[1] + *whist*. The allusion is not determined. It is not the same as in *bridge*[1], *v.* 4. The "Russian *britch*," cited as the source of the Eng. word, must be recently borrowed from the Eng.] A card game for four players, a variant of whist, called also (originally) *bridge whist*. The players cut for partnership and deal, each drawing from a full pack of 52 cards, spread face downward on the table. The two lowest pair against the two highest, and the lowest of the four has the choice of seats and cards and takes the first deal. In cutting, the ace is low; in play it is high, the other cards ranking from the king down to the deuce. Partners sit opposite each other, the positions at the table being as in the diagram:

The leader and the pone are known as the adversaries. The dealer presents the pack to the pone to be cut, and then distributes the cards one at a time until each player has 13. No trump is turned. If any card is found faced in the pack, or if the last card does not come in its proper order to the dealer, or if any player has more or less than 13 cards, there must be a new deal by the same dealer. No matter what irregularity occurs, the dealer cannot lose his deal. The dummy shuffles the still pack for the next deal. The dealer looks at his hand and announces the suit he selects as a trump for that deal, or declares to play without a trump, or passes the declaration over to his partner, who must decide on something without consultation. Should the dummy declare before being asked

to do so, the leader may demand that the declaration shall stand, or that there shall be a new deal. If the dummy asks the dealer to make the declaration, the leader may ask for a new deal or insist on the dummy declaring. If either of the adversaries makes a declaration, the dealer may either deal again or ignore the irregularity. Bridge is played in rubbers, two out of three games of 30 points each winning. If the same partners win the first two games, the third is not played. All tricks over six taken by one side count toward the game, but the value of these tricks varies with the declaration. When spades are trumps, each trick above six counts 2; when clubs are trumps, 4; diamonds, 6; hearts, 8; and when there is no trump, 12. No matter how much more than enough to win the game may be made, it is all counted. In addition to the trick scores there are 5 honors in the trump suit (ace, king, queen, jack, and ten), the value of which varies with the declaration. When there is no trump the four aces are the only honors. The honors count nothing toward the game, but they add to the value of the rubber as follows:

Declaration	S.	C.	D.	H.	No Tr.
3 honors	4	8	12	16	30
4 honors	8	16	24	32	40
4 in one hand	16	32	48	64	100
5 honors	10	20	30	40	
5, 4 in one hand	18	36	54	72	
5 in one hand	20	40	60	80	
Chicane	4	8	12	16	

Grand slam 40, little slam 20

The winners of the rubber add 100

The declaration once legitimately made, the adversaries cannot change it, but they may double the value of the trick points by 'going over.' If the leader does not wish to double, he says, "Shall I play?" If he plays without asking this question, the declaring hand may call a suit. In reply to the question, if the pone does not wish to double he says, "If you please." If either adversary doubles (making hearts, for instance, worth 16 instead of 8), the declaring hand may redouble, making hearts worth 32. If the maker of the trump does not redouble, he says, "Content," and his partner may then redouble, the first chance to redouble always lying with the one who is doubled. Doubling adds nothing to the value of the scores that go into the honor column. The usual expression for doubling is "Over" or "I double." The declaration settled, the leader plays any card he pleases, and the dummy then lays his 13 cards face upward on the table, sorted into suits, the trumps on his right. From that point on the dealer plays the two hands without any assistance or suggestions from the dummy, who is not allowed to take any part in the play except to ask the dealer if he has none of a suit to which he renounces, or to correct the adversaries if they claim a penalty to which they are not entitled. Should the dealer lead from the wrong hand, the adversaries take one of his tricks as penalty. The penalty for a revoke is to take 3 tricks from the revoking side. The penalty if the adversaries lead out of turn is to call a suit. If one side wins 12 out of the 13 tricks, it adds 20 points to its honor score for little slam; if it wins all 13, it adds 40 for grand slam. If any player has a hand dealt him with no trump in it, he scores for chicane, which is equal to 'simple' honors (3 out of 5). At the end of the hand the scores are put down on a score-sheet, all the points made in tricks below the line and all the honor scores above it. When the score of either side reaches or passes 30, a line is drawn under it to show that one game of the rubber is finished. The side that wins two games adds 100 points as bonus, and the scores of each side are then added up, and the difference between them is the value of the rubber, which is always played for so much a point. The player who keeps the score writes "We" at the top of his side of the score-slip and "They" on the other side. In the sample score-slip given the scores put down are: we, 2 by cards and simple honors in hearts; they, 3 by cards and 4 honors in diamonds; we, 4 by cards and 30 aces in no-trumps, winning the first game and drawing a line under it; they, 6 by cards, 30 aces, and little slam at no-trumps, drawing a line under the second game; we, the odd trick at doubled spades and 4 honors in one hand, they having chicane in spades; they, 4 by cards and 4 honors in one hand in hearts, drawing a line under the third game and adding 100 points for winning the rubber. The scores added and the lower deducted from the higher, the difference is found to be 234, and as the points are usually counted to the nearest 10, the value of this rubber would be 230. It is possible for the winners of the rubber to lose a few points, owing to the higher honor score of their opponents. *Dummy bridge* is played by three persons. There are no rubbers, each in turn taking the dummy, and the winning side in each game adding 50 points bonus. If the single player is the dealer and passes the make, he picks up his dummy's cards, and, without showing them to the adversaries, declares according to rule. With 3 or 4 aces, dummy must make it no-trump. With less than 3 aces he cannot call no-trumps, but must select his longest suit. If two suits are equal, the pips are counted, aces being worth 11 and court-cards 10 each; if still equal, the more valuable suit must be declared. The leader is the only one who can double, and he cannot double a dummy declaration. When the opponents of the single player have the deal, the single player changes his seat so as to be the leader on that deal.

—Auction bridge, a variety of bridge in which the privilege of declaring the trump is bid for, instead of being the prerogative of the dealer's side. The dealer must start the bidding by offering to make at least one odd trick with a named trump, or no trumps. He cannot pass. Each player to his left, in turn, may then double the declaration, bid higher, or pass. A higher bid must be for the same number of tricks in a suit of greater value, or for a greater number of tricks having the same total value. "Two hearts" is a better bid than "two diamonds," and "two diamonds" is better than "one no trump." No player can change his bid unless it is doubled or overbid, otherwise there is no limit to the number of bids a player may make in his proper turn. Doubling does not increase the value of the bid, but only the final scoring, after the hand has been played, so that "two hearts" is still a better bid than "I double two diamonds." Only one double and redouble is allowed, and no player can double his partner's bid, but he can redouble if an adversary has doubled. Doubling reopens the bidding for the next player, but it does not give the doubler the privilege of playing the combined hands. If a player declares an insufficient number of tricks, he is supposed to have declared enough to overcall the last bid, and either opponent may call attention to the insufficiency. If either adversary passes, doubles, or overcalls the insufficient bid, it condones the offense. If the number required is impossible, such as three spades overcalling two hearts, the player in error is supposed to declare a grand slam. If a player bids out of turn, either opponent may demand a new deal or may allow the irregular declaration to stand. If the irregular bid is not doubled, passed, or overcalled by either adversary, the partner of the player in error is barred from any further bidding on that deal. The play of the combined hands rests with the partners who have made the "winning declaration," and the one who made the last bid becomes the "declarer," even if he has been doubled, and he plays the combined hands, his partner becoming dummy. When both partners have made bids in the winning suit, the one who first named it is the "declarer." The player to the left of the declarer leads for the first trick, regardless of the position of the deal, and dummy's cards are then laid down. When the declarer fulfils his "contract" he scores for tricks and honors exactly as in bridge, tricks counting double value if the declaration was doubled, but the rubber is worth 250 points instead of 100. When the declaration fails, the adversaries score in the honor column 50 points penalty for each trick by which the declarer fails to fulfil his contract, taking no notice of their own tricks except as a check on the count. If the bid is two hearts and the declarer wins only five actual tricks, he is three short. If the bid has been doubled, the penalty is 100 instead of 50; if redoubled it is 200. Neither side can score toward game if the declaration fails, so that no player can win the game except on his own contract.—**Royal auction,** or **lilies,** a variety of auction bridge, in which spades are worth 2, clubs 6, diamonds 7, hearts 8, royal spades (or lilies) 9, and no-trumps 10. Honors are multiples of trick values; simple honors are worth two tricks, four honors four tricks, etc. The limit of loss on a declaration of one spade is 100 points, whether doubled or not. For all other rules, see *auction bridge*, above.

bridge-bar, *n.* 2. Same as ★*bridge*[1], 20.

bridge-coupler (brij'kup″lėr), *n.* In *railroading,* an automatic coupling- and locking-device for a drawbridge. See ★*bridge-lock* and ★*derail.*—**Multiple bridge-coupler,** one which controls two or more signals: used where there are more tracks than one.

bridge-house (brij'hous), *n.* In *ship-building,* a superstructure of comparatively light construction, above the general line of the hull proper, in the middle part of a merchant steamer. The bridge is located on top of it. *White,* Manual of Naval Arch., p. 18.

bridge-jumper (brij'jum-pėr), *n.* One who, for notoriety or gain, makes a practice of jumping from high bridges. [U. S.]

bridge-lock (brij'lok), *n.* In *railroading,* a self-locking bolt-lock used on a drawbridge to lock the bridge and prevent it from being opened until the signal-man, by the movement of his levers, has withdrawn the bolt.

bridgeman (brij'man), *n.*; pl. *bridgemen* (-men). A bridge-builder; a workman engaged in bridge-building.

bridge-money (brij'mun″i), *n.* An early Chinese bronze coinage, so called from its appearance. Also called *tin-dangle money.*

bridge-motion (brij'mō″shon), *n.* A form of doffing-motion for facilitating the removal of hanks from the reel of a yarn-reeling machine.

bridge-perch (brij'pėrch), *n.* A species of bass, *Pomoxis annularis,* of the family *Centrarchidæ.* Also called *crappie.*

bridge-plate (brij'plāt), *n.* A steel or iron plate of a comparatively low carbon content. These plates have a tensile strength of about 40,000 pounds per square inch and are quite ductile.

bridge-pot (brij'pot), *n.* The movable socket of a millstone-spindle which rests on the bridge-support.

Bridger group. See ★*group*[1].

bridge-screen (brij'skrēn), *n.* A shelter for the helmsman on the bridge of a war-ship, differing from a pilot-house in that it is open at the back and sides.

bridgework (brij'wėrk), *n.* The adjustment of artificial teeth by attaching the frame holding them to adjacent sound teeth as abutments.

bridle, *n.* 10. An arrangement by which a large kite, used in aërial observations, is attached to the steel wire by which it is held. The Marvin safety-bridle consists of two parts, the upper and lower bridle, attached to the main rib of the kite a few inches apart. A small copper wire, or safety-line, is inserted between them. When this wire is broken by the strain of a strong wind, the upper bridle comes into play and the lower portion goes out of use, so that the kite at once flies at a lower angle and the strain is relaxed. In the Blue Hill automatic elastic bridle an elastic band is introduced into the bridle and an increasing strain gradually alters the angle of flight.

11. A device for controlling the speed of logs on a skid-road. It consists of a short rope with two hooks at one end which are driven into the first log of the turn; at the other end is a clamp which runs over the cable.

12. In certain cephalopods, one of the bands which attach the funnel to the head.—13. In *pianoforte-making.* Same as ★*bridle-tape.*—**Bonaparte bridle,** a bridle consisting of a piece of rope looped at one end. A portion of the rope is placed in the horse's mouth as a bit and the end is passed over the crown and through the loop and extended back as a rein.—**Bridoon bridle,** a bridle provided with double cheeks, one pair for the driving-bit, the other for the bridoon check-bit.

bridle, *v. t.* 3. To connect; join as by a bridle: as draft-rollers (in cotton-manufacturing) that are yoked together. *Thornley,* Cotton-combing Machines, p. 237.

bridle-cable (brī'dl-kā″bl), *n.* A cable which is shackled or made fast to a bridle along the length of which it is free to play. See *bridle,* 7.

bridle-iron (brī'dl-ī″ėrn), *n.* A steel or wrought-iron loop or frame for supporting the end of a beam from a wall or another beam; a joist-hanger.

bridle-man (brī'dl-man), *n.* One who follows a turn of logs down the skid-road and tends the bridle. See ★*bridle,* 11.

bridle-tape (brī'dl-tap), *n.* In *pianoforte-making,* a short strip of cloth or leather between parts of the hammer-action, by which motion in excess of a fixed amount is prevented.

bridle-wire (brī'dl-wīr), *n.* In *pianoforte-making,* the wire, projecting from the whip, to which the bridle-tape is fastened. See cut under *pianoforte.*

Brief of title. Same as *abstract of title,* which see, under *abstract.*

Brieger's bases. See ★*base*[2].

brier, *n.*—**Chainy brier.** See *china* ★*brier.*—**China brier,** a thorny vine, *Smilax glauca,* which causes trouble in agricultural lands from Pennsylvania to Tennessee. The name (often corrupted to *chainy brier*), is connected with *china-root* (which see).—**Running brier,** a species of dewberry, *Rubus subumiflorus.*—**Sand-brier,** the horse-nettle *Solanum Carolinense.*—**Saw-brier.** Same as *China* ★*brier.*—**Sensitive brier.** See *Schrankia.*

brier-stitch (brī'ėr-stich), *n.* In *sewing-machine work,* a method of sewing with a two-needle machine in which the combined needles stitch a fine cord or embroidery-thread upon the fabric in a running pattern resembling the figure 8. Sometimes called *figure-of-eight stitching.*

Brig. An abbreviation of (*a*) *Brigade;* (*b*) *Brigadier.*

brigade, *n.* 3. In *zoöl.,* a division of no fixed value, used in the sense of 'cohort,' as a convenient term for assemblages of animals which may not be included in any of the divisions commonly employed. *Trans. Linnean Soc., London,* Zool., Oct., 1901, p. 240.—4. A small squad of engineers or of other technical troops: as, the full sap was executed by a *brigade* of eight sappers.

brigalow (brig'a-lō), *n.* [Also *bricklow:* from a native Australian name, in the Namoi dialect of New South Wales, *buriagalah* = 'place of the *buri*-tree,' < *buri* or *bri,* the name of *Acacia pendula.*] Any one of several species of *Acacia,* especially *A. harpophylla,* which yields a hard, heavy brown wood having a strong odor of violets. It is used in turning and for building purposes, and by the aboriginals for spears, boomerangs, and clubs. [Australia.]

brigantine[1], *n.* 4†. A quarter-galley, known for its delicate lines, swiftness, and quick handling.

> The boats were called galleys, galleots, *brigantines* (*galeotas ligeras o vergátines,* or *frigates*), &c., according to their size: a galleot is a small galley, while a *brigantine* may be called a quarter galley.
>
> *Poole,* Barbary Corsairs, p. 205.

Bright-line spectrum. See ★*spectrum.*

brightness equation, sensation. See ★*equation,* ★*sensation.*

brightsmith† (brīt'smith), *n.* A whitesmith. [Rare and artificial.]

brill, *n.* 2. A small and very bony flounder of New Zealand, *Caulopsetta scaphus,* of the family *Pleuronectidæ.* The name was transferred from the true brill of Europe.

brilliant. I. *a.*—**Brilliant** ★**red,** ★**purple,** ★**scarlet,** etc. See the nouns.

II. *n.* **English double-cut brilliant,** the regular full brilliant with 8 or 16 facets added above or below, or both, on the front and back.—**Full brilliant.** In *diamond-cutting,* cut as a brilliant with 58 facets. See *brilliant,* 1.

brilliantine (bril-yan-tēn′), *n.* [*brilliant* + *-ine*².] 1. A dress-goods for women's wear, similar to alpaca, but superior to it in richness of material and finish. —2. A name freely and generally employed to designate toilet preparations of variable composition for the face or hair.

brimade (bri-mäd′), *n.* [F. slang.] A hazing (at certain civil and military schools in France).

brimborion (brim-bō′ri-on), *n.* [Also *brimborium*. F. *brimborion*, a bauble, a gewgaw, formerly one of a series of prayers that were mumbled over. OF. *breborion*, perhaps a corruption of ML. *breviarium*, a breviary: see *breviary*. Cf. the etym. of *bead*.] A trifling object kept as a charm or gewgaw; a trifle: as, "handing *brimborions*, baubles, knickknacks," etc. *Mme. D'Arblay*, Diary, III. 8.

brin², *n.* 2. One of the two circular fibers that issue from the silkworm. It consists of two parts, the inner of fibroin, or true silk, and the outer of sericin, or silk-glue.

Brindle disease. See ★*disease*.

brine¹, *n.* 4. In *refriger.*, a solution of alkaline salts in water, which has a solidifying point below the temperature at which the solution is to be used.—**Leach brine**, the brine which drains away from common salt crystallized by boiling when this is stacked up in piles ready to be returned to the boiling-pans.

brine-cooler (brīn′kö″lėr), *n.* A coil of pipes used for cooling the brine used in a cold-storage warehouse or in an ice-machine. It is identical with the pipe ammonia condenser, except that the pipes are larger and the brine flows downward through a small interior pipe, while the ammonia flows upward through the larger pipe inclosing the brine-pipe, the expansion of the ammonia absorbing the heat of the brine and reducing it to a low temperature. See ★*ammonia condenser*.

brine-fly (brīn′flī), *n.* Any one of a number of insects of the dipterous family *Ephydridæ*, whose larvæ live in alkaline lakes and salt-wells. See *Ephydra* and *Ephydridæ*.

brine-gage (brīn′gāj), *n.* A salinometer.

brine-well (brīn′wel), *n.* A well from which natural brine is obtained.

A description of the great field of *brine-wells* which has accumulated a population of a million people in the town of Tze-liu-tsin. *Geog. Jour.* (R. G. S.), XII. 95.

bring, *v. t.* **To bring in**, in *whist* or *bridge*, to get the lead with (a suit) after establishing it.—**To bring to grass**, to bring to the surface, as ore.

II. *intrans.*—**To bring up all standing**, said of a vessel when she comes to anchor without taking in her sails, or when she strikes an obstruction and is suddenly halted while all sail is set.

brinjarree (brin-jä′rē), *n.* [Also *brinjarry*; a perverted form (perhaps by confusion with Pers. *birinj*, rice) of *bunjarree* for *bunjarree*, a grain merchant: see *bunjarree*.] In India, a grain merchant: same as *bunjarree*.

brinjarree dog, a long-haired, rough-coated, tan-colored East Indian breed of greyhound, used in hunting jackals. [East Indian.]

brio (brē′ō), *n.* [It.: see *con brio*.] Spirit, animation; especially, in *music*, in the expression *con brio*, spiritedly.

Briovarian system. See ★*system*.

briquet¹, *n.*, 2. The production of such blocks now constitutes an important industry. Cohesion is obtained by pressing in heated molds (in the case of bituminous coal), or by addition of tar or pitch, or of clay or hydraulic cement. Balls, solid cylinders, or most commonly brick-shaped blocks are thus formed by molding.—**Petroleum briquet**, a briquet made of a mixture consisting of 1 liter of petroleum, 150 grams of soft soap, 150 grams of resin, and 300 grams of caustic soda-lye wash. This mixture is well heated and allowed to solidify, and then run into molds of the required size, in which it is heated again in a furnace for about 15 minutes. The briquets produced in this way are said to yield three times as much heat as ordinary coal and are much lighter. Their solidity can be increased by adding sawdust or sand to the mixture.

briquet¹ (bri-ket′), *v. t.*; pret. and pp. *briqueted*, *briquetted*, ppr. *briqueting*, *briquetting*. To compress (minerals or mineral dust) into bricks; form into briquets.

The slag is a waste product, and the flue-dust, collected by special devices in dust-chambers, is *briquetted* by machinery. *Encyc. Brit.*, XXX. 173.

briquet² (bri-kā′), *n.* A silver coin of the fifteenth century, current in Holland: so called from the figure it bears of a short thrusting sword (*briquet*) held in a lion's claw.

briquetage (bri-ke-täzh′), *n.* [F., brickwork, < *brique*, brick: see *brick*².] In *prehistoric archæol.*, masses of oven-baked clay found in some parts of western Europe, and supposed to be remains of an ancient salt industry. *Amer. Anthropol.*, Jan.–March, 1902, p. 162.

Brisbane box. See ★*box*¹.

brisling (bris′ling), *n.* [Origin unknown.] A clupeoid fish, *Sardinella pilchardus*, caught in great numbers in the English Channel, in the seas of Spain and Portugal, and in the Mediterranean. They are cooked and packed in oil in tin cans.

Brislington delf. See ★*delf*².

brisque (brisk), *n.* [F., origin unknown, perhaps from *brisk*.] A privileged card in certain games: as, in the game of bezique, the aces and tens of the various suits, all of which count toward the game.

bristle-bird (bris′l-bėrd), *n.* Any one of the Australian reed-warblers of the genus *Sphenura*: so called from the bristles about the corners of the mouth.

bristle-cell (bris′l-sel), *n.* One of the ciliate cells of the auditory-nerve terminations.

bristletail, *n.* 2. One of the many names borne by the ruddy duck, *Erismatura rubida*, given on account of the stiff tail-feathers.

bristling², *n.* Same as ★*brisling*.

Bristol delf. See ★*delf*².

britannia (bri-tan′i-ä), *n.* Same as *Britannia metal* (which see, under *metal*).

britch (brich), *n.* Same as *breech*, *n.*, 5.

britholite (brith′ō-līt), *n.* [So called in allusion to its high specific gravity; < Gr. *βρῖθος*, weight, *λίθος* stone.] A rare silicate and phosphate of the cerium metals and calcium, occurring in brown, pseudohexagonal crystals: found in southern Greenland.

British Board of Trade unit, British dollar, British standard candle. See ★*unit*, ★*dollar*, *standard* ★*candle*.

Britishism (brit′ish-ism), *n.* Same as *Britticism*.

Brito-arctic (brit-ō-ärk′tik), *a.* British and arctic.

It is evident, therefore, that the basalts of Cape Flora and Hooker Island are similar to types widely distributed in the *Brito-arctic* volcanic province.
Geog. Jour., XI. 134.

brittle-fern (brit′l-fėrn), *n.* See ★*fern*¹.

brittlely† (brit′l-li), *adv.* In a brittle or fragile manner.

briza (brē′zä), *n.* [Sp. *brisa*, Pg. *briza*: see *breeze*².] A local afternoon and evening breeze at San Juan, Porto Rico. It is the regular northeast trade-wind deflected to an east wind by the influence of the land surface.

broach¹, *n.* 21. An occasional name for the *hurdy-gurdy* (which see).—22. In *quarrying*, a tool used in a machine-drill to break down the walls between a row of boreholes in order to form a continuous channel. Also called *broaching-bit*.

broach² (brōch), *n.* [Short for *Broach cotton*, from *Broach*, *Baroach*, Hind. *Bharōch*, *Bhrōch*, orig. (Gujarati) *Bhrigu-kachchha*, *Bhāru-kachchha*, an ancient and modern city of Gujarat (Guzerat) (Yule).] A short-stapled cotton grown in the Broach district of the Bombay Presidency, British India.

broaching-bit (brō′ching-bit), *n.* Same as ★*broach*¹, 22.

Broad Scotch, the unliterary vernacular of the Lowlands of Scotland.

broadcast (brâd′kâst), *v. t.* To sow broadcast. [Recent.]

In the spring wheat districts, the winds tend to lay bare the seeds when *broadcasted*.
T. F. Hunt, Cereals in America, 1904, p. 85.

broadhead (brâd′head), *n.* The name of a fish, the *Grubber broadhead*, a species of anchovy, *Anchovia producta*, of the family *Engraulididæ*.

broad-headed (brâd′hed″ed), *a.* Same as *brachycephalic*.

broad-headedness (brâd′hed″ed-nes), *n.* Same as *brachycephalism*. The vague term *broad-headedness* has been employed by recent writers, because *brachycephalism* has been used as if implying in all cases racial unity among the persons concerned.

broadleaf, *n.* 2. Also in New Zealand a name for a large tree of the dogwood family, *Decostea littoralis* (*Griselinia littoralis* of Raoul), yielding a hard, red, durable wood. Called by the natives *paukatea*.

broadman, broadsman (brâd-′or brâdz′man), *n.*; pl. *broadmen*, *broadsmen* (*-men*). One who resides near the Norfolk broads. See *broad*, *n.*, 1.

broad-minded (brâd′mīn″ded), *a.* Characterized by breadth of view and freedom from bigotry; liberal and unprejudiced: as, a *broad-minded* man.

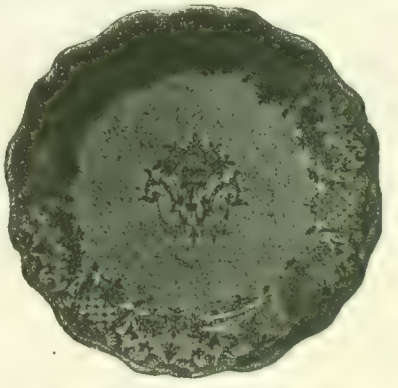
broadsheet (brâd′shēt), *n.* Same as *broadside*, 4.

broad-winged (brâd′wing″d), *a.* Having broad wings.—**Broad-winged katydid**, one of the commonest of the American katydids, *Cyrtophyllus concavus*. See *katydid*.

brocade (brō-kād′), *v. t.*; pret. and pp. *brocaded*, ppr. *brocading*. To weave with a pattern in relief, for the ornamentation and enrichment of the fabric.

brocaded, *a.* 4. Figuratively, heavily 'embroidered' with pompous diction: as, "much of the language is stiffly *brocaded*," *Athenæum*, Jan. 23, 1904.

Brocard angle, Brocard angle of a polygon, Brocard arcs, points, triangles. See ★*angle*³, ★*arc*, etc.



Brocardist (brō-kär′dist), *n.* A geometer who works along the particular line of research concerning the geometry of the triangle started by H. Brocard in 1875 and 1881.

Broca's area, convolution, point, stereograph. See ★*area*, etc.—**Broca's center.** Same as *speech-center*.—**Broca's gyrus.** Same as *inferior frontal gyrus*. See *frontal gyri*, under *gyrus*.

brochidodrome (brok′i-dō-drōm), *a.* [Gr. *βροχίς* (*βροχιδ-*), dim. of *βρόχος*, a loop, + *-δρομος*, < *δραμεῖν*, to run.] Forming loops within the blade of the leaf: said of the nerves. See *nervation* (*a*) (3).

brockage, *n.* 2. Broken or damaged material; broken glass, pottery, etc.

broderie (brōd-rē′), *n.* [F.] 1. Embroidery. —2. In *ceram.*, a style of decoration first used at Rouen and later at other French factories:

Broderie.—Plate, design in blue, Rouen, France. In the Pennsylvania Museum, Philadelphia.

suggested by the embroidery patterns of the period.—3. *pl.* In *music*, embellishments or highly figured variations or accompaniments.

Brodiæa (brō-di-ē′ä), *n.* [NL. (Smith, 1811), named in honor of James *Brodie*, a Scotch botanist who lived about the year 1800.] 1. An untenable name for *Hookera*, a genus of plants of the family *Liliaceæ*. By some authors the name is used to include also plants of the related genera *Triteleia* and *Milla*. Among the brodiæas sometimes cultivated in the United States are *Hookera coronaria*, *H. terrestris*, *H. Californica*, *Triteleia laxa*, *T. candida*, and *T. peduncularis*.

2. [*l. c.*] A plant of the genus *Hookera*. The brodiæas are bulbous plants of the Pacific coast, some of great beauty and gathered wild or cultivated for ornament. From the habit of some species has arisen the name *California hyacinth*. See ★*blue-dicks*.

broguery (brōg′ėr-i), *n.* [*brogue* + *-ery*.] Characteristic brogue: as, "by dint of swaggering, impudence, and *broguery*," *Fraser's Mag.*, XIX. 443.

broild, *p. a.* A simplified spelling of *broiled*.

broiler¹, *n.* 4. In *railroading*, a parlor-car fitted with a grill kitchen or a kitchen in which broiling of chops, etc., can be done without the more elaborate cooking of a dining-car; a grill-room car.—5. An attachment to a gas-stove, or a special gas-stove, adapted to broiling meat or fish. Two types are in use, the horizontal broiler in which the steak or fish to be broiled is laid on a grid under a broad flat gas-flame; and the vertical broiler in which the steak is placed in a hinged grid on edge between two sheets of metal kept red hot by gas-flames.

Broken hand. See ★*hand*.—**Broken over.** (*a*) In *bookbinding*, a phrase applied to the creasing down of a small part of an inserted print near the binding margin, for the purpose of giving support to the binding thread. (*b*) In *printing*, said of the fault of a sheet of paper which shows on its surface the creasing marks of broken fibers.—**Broken weather**, unsettled weather.

broken-backed, *a.* 3. Of a horse, a loose term for ★*hollow-backed*.

He was not . . . long-backed or *broken-backed*.
Southey, Doctor, cxliii.

broken-haired (brō′kn-hârd), *a.* Rough-coated: said of such dogs as the Scotch and Irish terriers.

broken-knees (brō'kn-nēz), *n. pl.* A condition seen in badly knee-sprung horses in which the animal cannot keep permanently in the upright position but is liable at any time to fall upon the knees.

Broken-wing fever. Same as *dengue.*

broker[1], *n.*—**Odd-lot broker,** one who deals in lots of less than 50 or 100 shares of stock.

broker[2] (brō'kėr), *n.* [*broke, p. a.,* + *-er*[1].] One who has 'gone broke'; a 'dead broke,' ruined, or bankrupt man. [Slang, Australia.]

brokes (brōks), *n. pl.* [*broke, p. a.*] The lowest grade of wool fleece, taken from the neck and belly of the sheep.

broking (brōk'ing), *n.* [A back-formation from *brok-er* + *-ing*[1].] The business of a broker; the broker's trade: as, furniture-*broking*: pawn*broking.*

bromacetic (brō-ma-set'ik), *a.* [*brom(ine)* + *acetic.*] Derived from acetic acid by the substitution of bromine for hydrogen.—**Bromacetic acid,** an acid made by the action of bromine upon acetic acid. *Monobromacetic acid* is a crystalline substance, $CH_2Br.COOH$, which melts at 50-51° C. *Dibromacetic acid,* $CHBr_2.COOH$, forms crystals which melt at 45-50° C. *Tribromacetic acid,* $CBr_3.COOH$, is a crystalline compound which melts at 135° C.

bromalin (brō'ma-lin), *n.* [*brom(ine)* + *-al*[3] + *-in*[2].] A colorless, nearly tasteless crystalline compound, $(CH_2)_6NH.C_2H_5Br$, obtained by the action of ethyl bromide on hexamethylene-tetramine. It is used as a substitute for alkaline bromides. Also known as *bromethylformin.*

bromamide (brōm'am-id), *n.* [*brom(ine)* + *amide.*] A colorless, odorless, and tasteless compound, $C_6H_2Br_3NH_2HBr$, obtained by the action of hydrobromic acid upon amido tribrombenzol. It is analgesic, sedative, and antipyretic.

bromargyrite (brōm-är'ji-rīt), *n.* [*brom(ine)* + *argyrite.*] Same as *bromyrite.*

bromatologist (brō-ma-tol'ō-jist), *n.* [*bromatology* + *-ist.*] One who is skilled in the science of dietetics.

bromatotoxicon (brō″ma-tō-tok'si-kon), *n.* [NL., < Gr. *βρῶμα(τ-),* food, + *τοξικόν,* poison.] Any poisonous substance produced in an article of food.

bromatotoxin (brō″ma-tō-tok'sin), *n.* [*bromatotox(icon)* + *-in*[2].] A basic poison generated in food by the growth of bacteria or fungi.

bromatotoxism (brō″ma-tō-toks'izm), *n.* [*bromatotox(ic)* + *-ism.*] Poisoning with bromatotoxin in some article of food.

brome, *n.* 2. Same as *brome-grass.*—**Red brome.** Same as *red* ★*chess.*

brome-grass, *n.*—**Australian brome-grass.** Same as *fescue-grass.*—**Austrian, awnless, beardless, Hungarian brome-grass.**—Same as *smooth* ★*brome-grass.*—**Russian brome-grass,** chiefly the *smooth* ★*brome-grass.*—**Short-awned brome-grass,** *Bromus breviaristatus,* a Rocky Mountain species, valuable in meadows at high altitudes.—**Smooth brome-grass,** a beardless species, *Bromus inermis,* native in the dry regions of Russia, prized as a hay grass in Europe, and now proving very valuable in the semi-arid parts of the northwestern United States. It is a perennial grass forming a turf in loose soils and very resistant to drought.—**Western brome-grass,** *Bromus Pumpellianus,* a native of the northern Rocky Mountain region, similar to the smooth brome-grass and perhaps of like value.—**Willard's brome-grass,** the chess or cheat, *Bromus secalinus.*

bromeliaceous (brō-mē-li-ā'shius), *n.* Belonging to the *Bromeliaceæ* or pineapple family.

bromelin (brom'ē-lin), *n.* [*Bromelia,* a former name of the pineapple (*Ananas Ananas*), + *-in*[2].] A proteolytic ferment derived from the juice of the pineapple.

bromhydric (brōm-hī'drik), *a.* [An inversion of *hydrobromic.*] Same as *hydrobromic.*

Bromian (brō'mi-an), *a.* [Gr. *βρόμιος,* noisy, an epithet of Bacchus, < *βρόμος,* noise, roar, < *βρέμειν,* roar.] Of or pertaining to Bromius or Bacchus; Bacchic. *Shelley.*

bromide, *n.*—**Alkaline bromide,** a compound obtained when bromine acts on alkaline metals.—**Bromide emulsion.** See ★*emulsion.*—**Bromide of ethyl,** the old term for *ethyl* ★*bromide.*—**Bromide paper.** See ★*paper.*—**Ethyl bromide,** a colorless, limpid, inflammable liquid, C_2H_5Br. It is anesthetic.—**Ethylene bromide,** a colorless liquid, $C_2H_4Br_2$, of chloroform odor, used as an antiepileptic.—**Potassium bromide,** a salt largely prepared and used. In medicine it is employed to allay nervous irritability, and hence as an indirect hypnotic, in epilepsy, hysteria, alcoholic mania, etc. It is also used in photography.—**Radium bromide.** See ★*radium.*

bromin, *n.* A simplified spelling of *bromine.*

brominate (brō'mi-nāt), *v. t.*; pret. and pp. *brominated,* ppr. *brominating.* [*bromine* + *-ate*[1].] To cause to react with bromine; especially, to replace hydrogen with bromine in an organic compound.

Their properties of being chlorinating or *brominating* agents, of being susceptible to hydrolysis, and of being readily rearranged into acyl derivatives of chlorinated or *brominated* anilines, $NH_2(C_6H_4X)$, would agree equally well with either of the above constitutions (I. and II.).
Amer. Chem. Jour., April, 1903, p. 292.

bromination (brō-mi-nā'shọn), *n.* [*bromine* + *-ation.*] The process of treating a substance with bromine: especially, for the introduction of a bromine atom in place of hydrogen (in an organic compound). *Nature,* July 9, 1903, p. 238.

Bromine water, in *chem.,* water holding bromine in solution: often used with advantage in analytical chemistry as a substitute for chlorine water.

bromipin (brō'mi-pin), *n.* A yellow, oily, nonirritating liquid consisting of 10 parts bromine and 90 parts oil of sesame. It is said to be of value in epilepsy and neurasthenia.

bromization (brō-mī-zā'shọn), *n.* [*bromize* + *-ation.*] 1. Impregnation with bromine or the bromides.—2. Induction of a toxic state by means of large doses of the bromides.

bromized (brō'mizd), *p. a.* Under the influence of large doses of one of the bromides, as bromide of potassium or sodium. *Buck,* Med. Handbook, II. 484.

bromo-albumin (brō″mō-al-bū'min), *n.* A compound of bromine and peptone, albumose, or protogen given internally for general nervous conditions.

bromohematin (brō-mō-hem'a-tin), *n.* [*brom(ine)* + *hematin.*] A substance analogous to hemin, in which hydrobromic acid is combined with hematin in the place of hydrochloric acid.

bromohemol (brō-mō-hem'ōl), *n.* A red-brown compound of bromine and hemol containing 2.7 per cent. bromine. It is hematinic and sedative.

bromohydrate (brō-mō-hī'drāt), *n.* [*brom(ine)* + *hydr(ogen)* + *-ate*[1].] Same as *hydrobromate.*

bromol (brō'mol), *n.* [*brom(ine)* + *-ol.*] Same as *tribromphenol.*

bromomania (brō-mō-mā'ni-ạ), *n.* [*brom(ide)* + Gr. *μανία,* madness.] The condition of being morbidly addicted to the use of any of the medicinal bromides.

bromophenol (brō-mō-fē'nol), *n.* Same as *tribromphenol.*

bronchadenitis (brong″kad-e-nī'tis), *n.* [Gr. *βρόγχος,* windpipe, + *ἀδήν,* gland, + *-itis.*] Inflammation of the bronchial glands.

Bronchial asthma, catarrh. See ★*asthma,* ★*catarrh.*

bronchiectasia (brong″ki-ek-tā'si-ạ), *n.* [NL.] Same as *bronchiectasis.*

bronchiectatic (brong-ki-ek-tat'ik), *a.* Same as *bronchiectasic. Phil. Med. Jour.,* Jan. 31, 1903, p. 200.

bronchiogenic (brong″ki-ō-jen'ik), *a.* [Gr. *βρόγχια,* the bronchial tubes, + *-γενης,* produced.] Of bronchial origin. *Buck,* Med. Handbook, IV. 356.

bronchiolitis (brong″ki-ō-lī'tis), *n.* [NL., < *bronchiole* + *-itis.*] Capillary bronchitis.

bronchiospasm (brong'ki-ō-spazm), *n.* [Gr. *βρόγχια,* bronchia, + *σπασμός,* contraction.] Spasmodic narrowing of the bronchia.

bronchismus (brong-kis'mus), *n.* [NL., < Gr. *βρόγχος,* windpipe.] Same as ★*bronchiospasm.*

bronchitis, *n.*—**Catarrhal bronchitis,** simple bronchial inflammation with profuse secretion.—**Croupous, exudative bronchitis.** Same as *pseudomembranous bronchitis.*—**Fetid bronchitis,** bronchitis accompanied with a foul-smelling expectoration.—**Fibrinous, membranous bronchitis.** Same as *pseudomembranous bronchitis.*—**Potters' bronchitis.** Same as *potters'* ★*asthma.*—**Productive bronchitis,** bronchial inflammation accompanied by an irregular formation of fibrous tissue in and around the bronchial tubes.—**Putrid bronchitis.** Same as *fetid* ★*bronchitis.*—**Staphylococcus bronchitis,** bronchial inflammation excited by the presence of *staphylococci.*—**Streptococcus bronchitis,** bronchial inflammation excited by the presence of *streptococci.*—**Suffocative bronchitis.** Same as *capillary bronchitis.*—**Verminous bronchitis,** a bronchial inflammation in cattle due to the presence in the bronchial tubes of a parasitic worm, *Strongylus filaria,* called in sheep *husk,* in calves *hoose.*—**Vesicular bronchitis.** Same as *bronchopneumonia.*

bronchocavernous (brong-kō-kav'ėr-nus), *a.* [Gr. *βρόγχος,* the windpipe, + L. *cavernosus,* cavernous.] Relating to the bronchi and to a pulmonary cavity; noting a quality of sound heard on auscultation of the chest. *Buck,* Medical Handbook, II. 818.

bronchopleuropneumonia (brong″kō-plö″rō-nū-mō'ni-ạ), *n.* [NL., < Gr. *βρόγχος,* windpipe, + *pleuropneumonia.*] Pneumonia complicated by bronchitis and pleurisy.

bronchopneumonic (brong″kō-nū-mon'ik), *a.* Relating to, caused by, or affected with bronchopneumonia. *Jour. Exper. Med.,* V. 165.

bronchopulmonary (brong-kō-pul'mō-nā-ri), *a.* [Gr. *βρόγχος,* the windpipe, + L. *pulmo(n-),* lung, + *-ary.*] Relating to the bronchi and the lungs. *Buck,* Med. Handbook, V. 848.

bronchoscope (brong'kō-skōp), *n.* [Gr. *βρόγχος,* windpipe, + *σκοπεῖν,* view.] An instrument used in examining the interior of the trachea and the beginning of the bronchi.

A *bronchoscope,* which consists of a tube, the inner surface of which is highly polished to serve as a reflector, with an electric lamp arranged so as to throw a strong light on the tube, was passed into the bronchial tube and then withdrawn. *Elect. World and Engin.,* Jan. 16, 1904, p. 140.

bronchoscopy (brong-kos'kō-pī), *n.* [Gr. *βρόγχος,* windpipe, + *σκοπεῖν,* view.] Inspection of the larger bronchial tubes by means of reflected light, usually through an opening into the trachea.

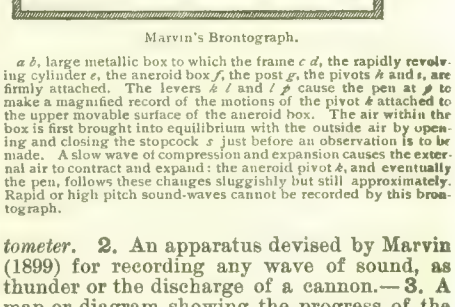
Bronchoscopy allows the whole bronchial tree to be searched. *Therapeutic Gazette,* Jan., 1903, p. 60.

bronchovesicular (brong″kō-vē-sik'ū-lär), *a.* Relating to both bronchial tubes and pulmonary air-cells.—**Bronchovesicular murmur,** a sound heard in cases of partial consolidation of the lung, in which the normal vesicular murmur is present, but more or less obscured by the bronchial respiration. See *respiration.*

bronco-buster (brong'kō-bus″tėr), *n.* One who subdues or breaks a broneo to the saddle. [Western U. S. slang.]

He was accordingly given the belt and declared to be the "champion *bronco-buster*" of the world.
Wide World Mag., April, 1903, p. 547.

bronco-busting (brong'kō-bus″ting), *n.* The process of breaking broncos to the saddle. [Western U. S. slang.]



bronco-grass (brong'kō-gràs), *n.* A brome-grass, *Bromus maximus Gussoni,* native in the Mediterranean region, introduced into California and a troublesome weed in the region of San Francisco bay.

Bronsil shales. See ★*shale*[2].

bronteion (bron-tē'on), *n.*; pl. *bronteia* (-ạ). [Gr.] Same as *bronteum.*

brontogram (bron'tō-gram), *n.* [Gr. *βροντή,* thunder, + *γράμμα,* writing.] The record-sheet from the brontometer or brontograph; also any diagram of lines on a map showing the phenomena of thunder-storms.

brontograph (bron'tō-gràf), *n.* [Gr. *βροντή,* thunder, + *γράφειν,* write.] 1. Same as ★*brontometer.* 2. An apparatus devised by Marvin (1899) for recording any wave of sound, as thunder or the discharge of a cannon.—3. A map or diagram showing the progress of the front of a thunder-storm by means of isobronts or equivalent lines for successive hours.

Marvin's Brontograph.

a b, large metallic box to which the frame *c d,* the rapidly revolving cylinder *e,* the aneroid box *f,* the post *g,* the pivots *h* and *s,* are firmly attached. The levers *k l* and *l p* cause the pen at *p* to make a magnified record of the motions of the pivot *k* attached to the upper movable surface of the aneroid box. The air within the box is first brought into equilibrium with the outside air by opening and closing the stopcock *s* just before an observation is to be made. A slow wave of compression and expansion causes the external air to contract and expand: the aneroid pivot *k,* and eventually the pen, follows these changes sluggishly but still approximately. Rapid or high pitch sound-waves cannot be recorded by this brontograph.

brontometer (bron-tom'e-tėr), *n.* [Gr. *βροντή,* thunder, + *μέτρον,* measure.] An instrument devised by G. W. Symons, and constructed in 1888, for registering simultaneously the time of beginning and ending of lightning, thunder, rain, wind, and other phenomena of thunderstorms. More properly a brontograph.

Brontops (bron'tops), *n.* [Gr. *βροντή,* thunder, + *ὄψ,* voice.] See *Titanotherium.*

Brontornis (bron-tôr'nis), *n.* [NL., < Gr. *βροντή,* thunder, + *ὄρνις,* bird.] A genus of gigantic extinct birds, related to *Phororhacos,* whose bones are found in the Santa Cruz Miocene of Patagonia. See cut under ★*Phororhacos.*

brontothere (bron'tō-thēr), *n.* An animal of the genus *Brontotherium.*

bronze, *n.*—**Bismuth bronze,** a bronze in which bismuth replaces the copper of the copper-tin alloy.—**Boron bronze.** See ★*boron-bronze.*—**Bronze positive.** See ★*positive.*—**Deoxidized bronze.** See *Tobin* ★*bronze.*—**Diamine bronze,** a direct cotton coal-tar color of the triazo type, derived from benzidine. It dyes unmordanted cotton a bronzy brown from an alkaline salt bath. When after-treated with copper sulphate or chromium fluoride the shade is rendered faster and darker.—**Magenta bronze.** See *tungsten* ★*bronze.*—**Manganese bronze.** (*b*) Same as *manganese brown* (which see, under *brown*).—**Nickel bronze.** See ★*nickel-bronze.*—**Plastic bronze,** a copper, lead, tin, and nickel alloy which casts readily, gives good castings, and can be easily machined.—**Platinum bronze.** See ★*platinum-bronze.*—**Saffron bronze.** See *tungsten* ★*bronze.*—**Tobin bronze,** an alloy resembling in its properties delta-metal (which see), and composed chiefly of copper, zinc, tin, iron, and lead, in varying proportions. Tobin bronze is used extensively for household articles, ornaments, parts of machinery, etc. One sort of Tobin bronze—composed, before oxidation, of 82.67 per cent. copper, 12.40 per cent. tin, 3.23 per cent. zinc, 2.14 per cent. lead, and some iron and silver—is sold under the name of "*deoxidized bronze.*"—**Tungsten bronze,** a substance made by dissolving tungsten trioxid in fused potassium or sodium tungstate. With the potassium compound the product is called *magenta bronze,* and consists of violet crystals with a coppery luster. With the sodium compound the product is called *saffron bronze* and the resulting crystals have a golden luster. When ground they are used as pigments.

Bronzed diabetes. See ★*diabetes.*

bronze-steel (bronz′stēl), *n.* A hard, tough alloy of copper, tin, and iron: used as a gun-metal.

bronziness (bron′zi-nes), *n.* Bronze-like quality or color.

> Autumnal browns . . . rise gradually . . . from a sort of buff to *bronziness.*
>
> *Athenæum,* May 4, 1895, p. 576.

brood[1], *n.* **6.** Oyster spat in the second year of development.—**Foul brood,** a disease of the honey-bee caused by *Bacillus alvei.* It affects both early stages (brood) and adults.

brood[1], *v. t.* **4.** To incubate: as, *brooded* eggs. *Jour. Exper. Med.,* VI. 251.

brood-chamber (bröd′chām″bėr), *n.* A chamber which is folded off from the uterus and closed around each embryo in some species of *Peripatus;* any chamber for holding the developing eggs or young of an animal.

brooder, *n.* 2. Same as *couveuse,* 2. *Buck,* Med. Handbook, VI. 749.

broodered (brö′dėrd), *a.* Hatched or reared in a brooder; artificially reared: as, *broodered* chickens. [Rare.]

brood-food (bröd′föd), *n.* A prepared food for bees in their early stage: in one form it is a pap prepared from pollen.

broodiness (brö′di-nes), *n.* Inclination to brood or sit, as in a hen.

broodingly (brö′ding-li), *adv.* In a brooding manner; while brooding. *Bulwer,* Pilg. Rhine, xxvi.

brood-lamella (bröd′la-mel″ä), *n.*; pl. *brood-lamellæ* (-ē). In crustaceans, a part of an appendage modified to form a protective cover for the eggs or young.

> In the female of the *Arthrostaca, Schizopoda,* and *Cumacea* the *brood-lamellæ* on the basal joints of the thoracic feet . . . develop at the approach of sexual maturity.
>
> *Lang* (trans.), Comp. Anat., p. 380.

broodlet (bröd′let), *n.* [*brood* + *-let.*] A young bird; a chick.

brookable (brůk′a-bl), *a.* [*brook*[2] + *-able.*] Capable of being brooked, put up with, or endured; endurable. *Hogg,* Tales and Sketches, v. 41.

brook-grass (brůk′grȧs), *n.* *Andropogon glomeratus,* a broom-like species found in low grounds. In the southern United States it is, in its young state, valuable for pasturage.

brook-lamprey (brůk′lam″pri), *n.* Same as *river-lamprey.*

brook-runner (brůk′run-ėr), *n.* The water-rail, *Rallus aquaticus.*

brook-silk (brůk′silk), *n.* A popular name for *Spirogyra, Œdogonium,* and other filamentous algæ.

brook-stickleback (brůk′stik″l-bak), *n.* See ★*stickleback.*

brook-tongue (brůk′tung), *n.* The water-hemlock, *Cicuta maculata,* and perhaps other species.

brook-trout (brůk′trout), *n.* See *trout*[1].

brool (brōl), *n.* [Imitative. Cf. G. *brüll,* *n.*, < *brüllen,* roar.] A murmuring sound as of wind blowing through a forest.

> List to the *brool* of that royal forest-voice.
>
> *Carlyle,* French Rev., I. v. 2.

broom[1], *n.*—**Native broom, swamp-broom,** in Australia, same as *swamp-oak,* 2 (*a*). It yields a soft, spongy wood.—**Pneumatic broom.** See ★*pneumatic.*—**Purple broom,** *Comesperma retusum,* an Australasian plant of the family *Polygalaceæ,* bearing racemes of small purple flowers.—**Sweet broom** Same as *sweet broomweed* (see *broomweed*) and *licorice-weed.*—**Wild broom,** the deerweed, *Lotus glaber,* a plant somewhat resembling the common broom. [California.]

broomer (bröm′ėr), *n.* One who uses a broom, as in street-cleaning; a street-sweeper; a broom-man. [Rare.] *N. E. D.*

broom-rape, *n.*—**American broom-rape,** the squawroot, *Conopholis Americana,* a fleshy light-brown root-parasite.—**Branched broom-rape.** Same as *hemp* ★*broom-rape.*—**Broom-rape family.** See *Orobanchaceæ.*—**Clover broom-rape.** Same as **lesser** ★**broom-rape.**—**Hemp broom-rape,** *Orobanche ramosa,* an Old World species, in Kentucky now an annoying parasite on the roots of hemp and tobacco.—**Lesser broom-rape,** *Orobanche minor.* See *Orobanche.*—**Louisiana broom-rape,** *Orobanche Ludoviciana,* a species native to the western United States.—**Naked broom-rape.** (*a*) See *naked.* (*b*) Same as *pale* or *one-flowered* ★*broom-rape.*—**Pale** or **one-flowered broom-rape,** *Thalesia uniflora,* a woodland plant of the broom-rape family, widely diffused in North America, sending up from near the ground one to four slender peduncles with single nodding white or violet flowers.

broom-squarer (bröm′skwâr″ėr), *n.* See ★*broom-squire.*

broom-squire (bröm′skwīr), *n.* In certain parts of England, a squatter on a moor who lives by making brooms of heath. Also in West Surrey called *broom-squarer.*

> "*Broom-squires?*" "So we call in Berkshire squatters on the moor, who live by tying heath into brooms."
>
> *Kingsley,* Two Years Ago, xiv.

broomstick, *n.*—**To marry over the broomstick,** to go through a make-believe marriage ceremony in which both parties jump over a broomstick; a sort of play in which the parties are children or a grown person and a child: hence, by allusion, a mock marriage ceremony.

> There's some as think she was *married over the broomstick,* if she was married at all.
>
> *J. Hawthorne,* Fort. Fool, iv.

broom-wire (bröm′wīr), *n.* The wire used by broom-makers in binding the head to the broomstick.

Broseley dragon, porcelain. See ★*dragon,* ★*porcelain*[1].

brosing (brō′zing), *n.* Meal-time. Also *brosing-time.* [Scotch.]

Brosmophycinæ (bros-mō-fi-sī′nē), *n. pl.* [NL., < *Brosmophycis* + *-inæ.*] A subfamily of fishes of the family *Brotulidæ,* including two genera, *Brosmophycis* and *Ogilbia.*

Brosmophycis (bros-mō-fī′sis), *n.* [NL., < Norw. *brosme* (see *Brosmius*), + Gr. *φύκης,* fem. *φυκίς,* a fish living in seaweed (the forked hake?), < *φῦκος,* seaweed.] A genus of fishes of the family *Brotulidæ,* represented by a single species, *B. marginatus,* found on the California coast.

brostenite (bros′te-nīt), *n.* [*Brosténi* (see def.) + *-ite*[2].] A hydrated manganite of ferrous iron and manganese, occurring in black friable masses in crystalline schists near Brosténi in Rumania.

brother, *n.*—**Brethren of the Sack,** an association of mendicant monks in the thirteenth century, who were vulgarly so called from the coarse sack they wore as an outer garment.

Brotherist (bruᴛʜ′ėr-ist), *n.* A follower of Richard Brothers (1757–1824), a fanatic who predicted the destruction of the world. He announced himself as the nephew of the Almighty and prince of the Hebrews, appointed to lead them to a new Jerusalem on the banks of the Jordan.

brotherlike (bruᴛʜ′ėr-līk), *a.* Brotherly; fraternal; like a brother.

> Welcome, good Clarence; this is *brother-like.*
>
> *Shak.,* 3 Hen. VI., v. 1.

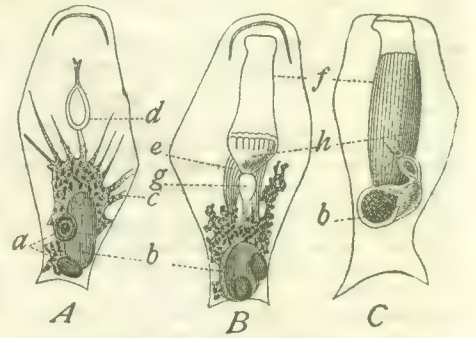
brothership (bruᴛʜ′ėr-ship), *n.* **1.** Brotherliness.—**2.** A fraternity or gild; a brotherhood.

brotochore (brō′tō-kōr), *n.* [Irreg. < Gr. *βροτός,* a mortal, + *χωρεῖν,* spread abroad.] In *phytogeog.,* a plant disseminated through the agency of man. *F. E. Clements.*

brotuliform (bro-tū′li-fôrm), *a.* Formed like a brotuloid fish.

brougham-hansom (brö′ȧm-han″sum), *n.* A public cab having the driver's seat at the front and the entrance at the rear: originated by a London firm of carriage-builders.

Broun's rule. See ★*rule*[1].



brow-ache (brou′āk), *n.* Supraorbital neuralgia. Also *brow-pang.*

browed (broud), *a.* Having a brow or brows (of some specified kind): as, low-*browed,* dark-*browed,* etc.

Browgill beds. See ★*bed*[1].

brown. **I.** *a.*—**Brown ash.** See ★*ash*[1].—**Brown body,** the pigmented remnants of the old polypide which breaks down and is replaced by a new polypide in the *Polyzoa.*

> The periodical histolysis of the polypide, leading to the formation of a *brown body,* may partly be due to the accumulation of excretory substances in the cells of the alimentary canal (Harmer, *Quart. J. Micr. Sci.,* xxxiii. p. 123); but the effects of artificially introduced pigments (indigo-carmine, etc.) suggest that the excretory function is in part performed by some of the mesodermic tissues.
>
> *Encyc. Brit.,* XXXI. 827.

Brown Body (*Flustra papyrea* Pall.) Naples x 50. Illustrating the development of a new polypide after the formation of a *brown body.*

A, *a*, two masses formed from the alimentary canal; *b*, degenerating tentacles; *c*, connective tissue; *d*, young polypide bud. *B*. Another zoœcium, later stage; *b*, brown body; *e*, retractor muscles; *f*, tentacle-sheath; *g*, stomach; *h*, tentacle. *C*. The same zoœcium, 191 hours later; letters as in *B*. *A* and *B* are seen from the front, *C* from the back.

(After figure in "Cambridge Natural History.")

—**Brown disease.** See ★*disease.*—**Brown NP,** a mordant coal-tar color prepared by combining diazotized para-nitraniline with pyrogallol. It dyes chromium-mordanted wool a brown.—**Brown-print paper.** See ★*paper.*—**Brown rot, rust, vitriol.** See ★*rot,* ★*rust*[1], ★*vitriol.*

II. *n.*—**Acid alizarin brown,** a mordant-acid coal-tar color. It is rendered extremely fast when subjected to an after-chroming.—**Acid brown.** See ★*acid-brown.*—**Alizarin brown.** Same as *anthracene* ★*brown.*—**Alkali brown,** a direct cotton coal-tar color of the monoazo type. It dyes unmordanted cotton a reddish brown in an alkaline bath. Also called *benzo-brown 5R.*—**Anthracene brown,** a mordant coal-tar color derived from anthraquinone. It is a trihydroxyanthraquinone and is therefore isomeric with anthrapurpurin, flavopurpurin, and purpurin. With a chromium mordant it gives very fast browns, particularly on wool. Sometimes called *alizarin brown.*—**Asphalt brown,** a brown pitch originally obtained from the Dead Sea, but now from the residue of the distillation of bituminous matter. In the powdered form it is used as a pigment. Its solution in turpentine is called *asphalt paint.*—**Benzo dark brown,** a direct cotton coal-tar color of unpublished composition. It dyes unmordanted cotton black-brown shades in a salt bath.—**Catechu brown.** (*a*) A direct cotton coal-tar color of the tetrakisazo type, derived from Bismarck brown. It dyes unmordanted cotton brown in a salt bath. (*b*) A brown produced upon textile material with catechu. Also called *cutch brown.* See *catechu.*—**Chloramine brown,** a direct cotton coal-tar color of unpublished composition.—**Cologne brown,** a pigment of humus-like character, similar to Cassel brown.—**Columbia brown,** a direct coal-tar color used for dyeing cotton. In a salt bath it dyes unmordanted cotton a brown which becomes darker when diazotized and developed with phenylene diamine.—**Cryogen brown,** a coal-tar color of the sulphid type, of unknown constitution. It dyes unmordanted cotton brown in a salt bath.—**Cutch brown.** Same as *catechu* ★*brown.*—**Diamine brown,** the name given to several direct cotton coal-tar colors of the diazo type, derived from benzidine. They dye unmordanted cotton various shades of brown.—**Diamond brown,** a mordant-acid coal-tar color of unpublished composition. It dyes wool brown in an acid bath, the shade becoming exceedingly fast when after-treated with potassium bichromate. It may also be applied upon chromium-mordanted wool.—**Diazin brown,** a basic coal-tar color of unpublished composition, but probably of the monoazo type and derived from safranine. It dyes tannin-mordanted cotton a brown of good fastness.—**Diazo brown,** a direct cotton coal-tar color of the diazo type. It dyes unmordanted cotton brown in a salt bath, but for the best results a subsequent diazotizing and developing is necessary.—**Diphenyl brown,** a direct cotton coal-tar color of the diazo type, derived from benzidine. It dyes unmordanted cotton brown in a salt bath.—**Direct brown J,** a direct cotton coal-tar color of the tetrakisazo type, prepared by combining two molecules of diazotized meta-amido-benzoic acid with Bismarck brown. It dyes unmordanted cotton brown in a salt bath.—**Direct brown R,** a color obtained by dyeing with polychromine and subsequently diazotizing and developing with meta-phenylene diamine.—**Durophenine brown,** a coal-tar color of uncertain composition, prepared by boiling nitroso-phenol with sulphuric acid. It dyes unmordanted cotton brown in a sodium-sulphid bath, the shade being rendered faster by an after-chroming.—**Egyptian brown.** Same as *mummy* ★*brown.*—**Eyed brown,** an American agapetid butterfly, *Satyrodes canthus,* occurring east of the Mississippi and feeding in its larval stages on sedges and grasses.—**Fast brown.** Same as *naphthylamine* ★*brown.*—**Gemmed brown,** an American agapetid butterfly, *Neonympha gemma,* occurring in the southern United States and feeding in its larval stages on grasses.—**Gold brown,** Same as *phenylene brown* (which see, under *brown*).—**Hessian brown,** a direct cotton coal-tar color of the tetrakisazo type, derived from benzidine or toluidine, sulphanilic acid, and resorcinol. It dyes unmordanted cotton brown in an alkaline salt bath.—**Janus brown,** a Janus coal-tar color. It dyes tannin-mordanted cotton brown in a neutral bath and unmordanted cotton in an acid bath: similar to *diazin* ★*brown.*—**Kongo brown G** and **R,** direct cotton coal-tar colors of the triazo type, derived from benzidine. They dye unmordanted cotton brown in a salt bath.—**Mikado brown,** a direct cotton coal-tar color of the stilbene type, prepared by the action of caustic-soda

solution upon para-nitrotoluene-sulphonic acid. It dyes cotton brown in a salt bath.—**Mummy brown,** a brown pigment consisting of a bituminous matter mixed with animal remains brought from the catacombs, where bitumen was employed in embalming.—**Naphthylamine brown,** an acid coal-tar color prepared by combining diazotized naphthionic acid with α-naphthol. It dyes wool brown in an acid bath.—**Picryl brown,** an acid coal-tar color, now obsolete.—**Pigment brown.** Same as *Sudan ★brown.*—**Seal brown,** a rich, dark brown. See *seal-brown.*—**Sudan brown,** an insoluble colored azo compound prepared by combining diazotized α-naphthylamine with α-naphthol. It is not used in textile-coloring, but is of value for the coloring of oil, soap, and spirit varnishes.—**Sulphone brown,** a sulphone coal-tar color of unpublished composition. It dyes wool brown in a salt bath containing ammonium acetate or a little acetic acid.—**Toluylene brown G,** a direct cotton coal-tar color of the diazo type, derived from tolylene diamine. It dyes unmordanted cotton a yellowish brown in a salt bath, and is very fast to soaping.—**Toluylene brown R,** a direct cotton coal-tar color of the tetrakisazo type, derived from tolylene diamine and naphthionic acid. It dyes unmordanted cotton brown in a salt bath.—**Zambesi brown,** a direct cotton coal-tar color. It dyes unmordanted cotton in a salt bath dull purplish browns, which when diazotized and developed are converted into dark yellowish browns.

browneyed-Susan (broun-īd-sū′zan), *n.* The common cone-flower, *Rudbeckia hirta:* the same as ★*blackeyed-Susan* (which see).

brownie-bug (brou′ni-bug), *n.* Any one of many species of the homopterous family *Membracidæ,* so called on account of their bizarre appearance. *Sci. Amer. Sup.,* Dec. 6, 1902, p. 22520.

browning, *n.* **3.** In *plastering,* the second coat. The first coat, called the scratch coat, is generally deeply scored to receive and hold the browning.—**4.** In *bot.,* the discoloration which takes place in vegetable cells when they are injured, as by cutting. It is probably due to chemical changes.

If a suitable mass of living cells is neatly cut with a sharp razor the first perceptible change is one of color; the white "flesh" of a potato or an apple, for instance, turns brown as the air enters the cut cells, and the microscope shows that this *browning* affects cell-walls and contents alike. *M. Ward,* Disease in Plants, p. 122.

brown-saddler (broun′sad″lėr), *n.* One who makes riding-saddles. [Eng.]

brownstone, *n.* **2.** Decomposed iron pyrites.

browntail (broun′tāl), *n.* A local name for the Tasmanian tit, *Acanthiza diemenensis.*

brown-top (broun′top), *n.* **1.** A panic-grass, *Panicum fuscum,* having the panicle brown. It is native in tropical America, also in Florida and Texas, and is similar in habit and value to the Texas millet (see under ★*millet*).

2. The redtop, *Agrostis alba.*

browny, *n.* **2.** A kind of currant loaf in common use in Australia.

Roast mutton and *brownie* are given us to eat.
Gilbert Parker, Round the Compass, p. 36.

brow-pang (brou′pang), *n.* Same as ★*brow-ache.*

browse[2], *n.*—**Slag-hearth browse,** partly reduced lead ore mixed with cinder, obtained in smelting gray slag in the slag-hearth. The lead from the slag-hearth browse is extracted by resmelting.

brow-skid (brou′skid), *n.* The chief beam in a frame to which tackle for loading logs on cars is fastened. Also called *draw-skid* and *lead-log.*

brow-tined (brou′tind), *a.* Having a brow-tine or branch starting just above the bur and bending forward: said of antlers. This condition is characteristic of the genus *Cervus* and related forms. Contrasted with ★*fork-tined.*

If this be not enough, we may refer to p. 291, where it is suggested that the extinct Sedgwick's deer may be allied to the Oriental rusine group. Evidently the author [Sir H. Johnston] does not know the difference between a *brow-tined* and a *fork-tined* antler, as, indeed, may be gathered from certain statements in regard to supposed roe-antlers later on in the work.
Nature, Dec. 31, 1903, p. 194.

Bruce's banana. See ★*banana.*

brucia (brö′si-ä), *n.* [NL.] Same as *brucine.*

Brugère's picrate powder. See ★*powder.*

Brühl's receiver. See ★*receiver.*

bruisable (brö′z̤a-bl), *a.* [Also *bruiseable; bruise* + *-able.*] Capable of being bruised; friable. *Cotgrave.*

bruise, *v. t.*—**To bruise water** (*naut.*), said of a vessel when she pitches heavily into a head sea.

bruise, *n.*—**Dry bruise,** a bruise without ecchymosis, or subcutaneous effusion of blood.

bruisewater (brö′z̤wât″ėr), *n.* A bluff-bowed vessel which creates much disturbance under the bows when forcing its way through the water.

bruit, *n.* —**Aneurismal bruit,** a murmur heard on auscultating over an aneurism.—**Bruit de choc** [F., 'sound of impact'], the second sound of the heart accompanied by an impression of impact, such as is noted in auscultating over an aneurism of the aorta.—**Bruit de cuir neuf** [F., 'sound of new leather'], a sound resembling the creaking of leather sometimes heard in pericarditis.—**Bruit de dra peau** [F., 'sound of (flapping) cloth'], a flapping sound produced by the to-and-fro movement of a polypus in the trachea.—**Bruit de pot félé** [F., 'sound of cracked pot'], a sound heard on percussion over a cavity in the lung which is filled with air and communicates with the bronchia by a narrow opening.—**Bruit de souffiet** [F., 'sound of bellows'], a blowing sound heard in certain affections of the heart and also over an artery when it is compressed.—**Systolic bruit,** an abnormal sound heard, on auscultation, with the contraction of the heart.

bruiter (brö′tėr), *n.* [*bruit* + *-er*[1].] One who bruits or spreads abroad reports or rumors. *Udall.*

brum[1] (brum), *v. i.*; pret. and pp. *brummed,* ppr. *brumming.* [Imitative var. of *bum*[1], *v.*] To hum; murmur. *Blackwood's Mag.,* LVI. 207.

brum[2] (brum), *a.* and *n.* A slangy contraction of *brummagem.*

brumby (brum′bi), *n.* [Native Australian.] A name used originally in Australia to denote a wild or unbroken horse and adopted in other English colonies.

People who lost money on him called him a *brumby.*
R. Kipling, The Broken-link Handicap.

brummagem, *a.* **II.** *n.* A piece of brummagem ware; hence, an imitation; sham.

In these days one is so used to sham and imitation and *Brummagem,* that when by chance one comes to the real thing it is hard to believe in it.
Miss Thackeray, Village, p. 9.

brummer (brö′mėr), *n.* [G., < *brummen,* hum, buzz: see *bomb*[1], etc.] Same as *bombard,* 6.

brummish (brum′ish), *a.* [*brum*[1] + *-ish*[1].] Brummagem; counterfeit; of counterfeit character: applied to coin. *Colman the Younger.* [Slang.]

brunch (brunch), *n.* [*br(eakfast)* + *(l)unch.*] In Oxford University slang, a meal which takes the place of breakfast and lunch.

brunch-word (brunch′wėrd), *n.* A word made on the model of 'brunch,' that is, by blending parts of two other words; a ★blend-word (which see).

brunella (brö-nel′ä), *n.* [An improper form of *prunella.*] A plant of the genus *Prunella.* These plants are little perennial weeds, sometimes grown in rockeries and slightly shaded parts of the border. *Prunella vulgaris,* commonly called *self-heal* or *heal-all,* is found wild in America, Asia, and Europe, often invading poor lawns and causing annoyance. See *prunella*[2], 2.

brunetness (brö-net′nes), *n.* In *anthrop.,* the character of being brunette.

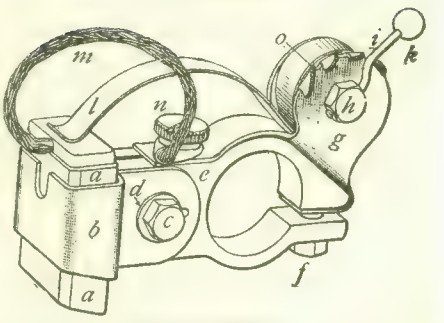
brunettism (brö-net′ism), *n.* Same as ★*brunetness. Amer. Anthropologist,* Jan.–March, 1902, p. 157.

Brunfelsia (brun-fel′si-ä), *n.* [NL. (Linnæus, 1753, adopted from Plumier, 1703), named in honor of Otto *Brunfels* (1488?–1534), an early German botanist and physician.] A genus of plants of the family *Solanaceæ,* containing about 30 species, native in tropical America. A few of the species are grown in warm glass houses. *B. Hopeana* and *B. pauciflora* are the most common, the latter being a very handsome plant, flowering in succession most of the year. *B. Americana, B. hydrangeæformis,* and others are also in cultivation. See *Franciscea.*

brunissure (brü-ni-sür′ or brū′nis-ūr), *n.* [F., browning, < *brunir,* brown: see *burnish, v.*] A disease of grape-vines characterized by the formation of brown spots covering more or less of the surface of the leaves. The cause of it is uncertain.

Brunistic (brö-nis′tik), *a.* Of or pertaining to the doctrines of Giordano Bruno, the Italian philosopher (1548-1600). *Encyc. Brit.,* XXX. 651.

brunneous (brun′ē-us), *a.* [ML. *brunneus, bruneus,* < *brunus,* brown: see *brown.*] Dark brown: used chiefly in entomology: as, *brunneous-gray* wings. *Humphreys,* Brito. Mths, I. 137.



brunsvigite (brunz′vig-īt), *n.* [Dan. *Brunsvig,* Brunswick, + *-ite*[2].] A kind of chlorite occuring in gabbro in the Radauthal, Germany.

Brunswick stew. See ★*stew*[1].

Brunton's calciner. See ★*calciner.*

brush, *n.,* **7.** (*b*) One of the ends of the stationary circuit of an electric machine which receive the current from or supply it to the revolving circuit: so called because they had formerly a brush-like structure. Now the 'brushes' are solid blocks of carbon or graphite, or packages of wire gauze or of metal leaves. The part of the revolving circuit with which the brushes make contact is called the *commutator* or *collector.*

13. The hair on the upper end of a grain of wheat. It furnishes a distinction between varieties.—**Ambulacral brush.** See ★*ambulacral.*—**Brush discharge, electrode.** See ★*discharge,* ★*electrode.*—**Faradic brush,** a brush-electrode; a wire brush attached to one pole of a battery and used in the application of electricity to the surface of the body.—**To be in the brush,** to be embarrassed or confused, as a public speaker. [Western U.S.]—**Wire brush,** any brush made entirely, or nearly so, of wires. Specifically: (*a*) a hair-brush made with metal wires in place of bristles; (*b*) a gilder's brush of brass wire used for spreading gilding and for cleaning metal surfaces; (*c*) a brush made with iron wires used for street-sweeping; (*d*) a carding brush; etc.

Electric Brush-holder.

a, brush; *b,* brush-box; *c,* brush-box stud; *d,* washer; *e,* brush-holder shank; *f,* clamping-screw; *g,* spring-box; *h,* spring-box bolt; *i,* tension-lever; *k,* tension-lever head; *l,* brush-spring; *m,* pig-tail connection; *n,* thumb-screw; *o,* adjustment notches.

brush, *v. t.* **6.** In *mining,* to remove, by blasting or otherwise, rock from (the floor or roof of a level or roadway) to increase its height.

brush-cherry (brush′cher-i), *n.* **1.** See *cherry*[1]. —**2.** An Australian tree, *Caryophyllus myrtifolius* (*Eugenia myrtifolia* of Sims), which yields a light-reddish, elastic timber, used for staves, oars, boat-building, boomerangs, and shields. Its red, acid fruit makes a good preserve.

brush-clutch (brush′kluch), *n.* A clutch in which a semipositive contact is obtained by having wire brushes on one face catch into grooves on the other face.

brush-coal (brush′kōl), *n.* In *mining,* the coal taken down when the top of a level is brushed.

brush-deal (brush′dēl), *n.* A slender Australian tree, *Cupaniopsis anacardioides,* of the soapberry family. It yields a tough, close-grained, pinkish timber, sometimes used for house-building.

brusher, *n.* **3.** A miner who enlarges the roadways by breaking down the roof-rock or by taking up rock from the floor.—**4.** A local Australian name for the small, active kangaroos which inhabit the scrub, or brush.

brusher-off (brush′ėr-ôf), *n.* A worker in a pottery who brushes off the ware before it goes to the kiln.

The atmosphere which the *brushers-off,* the finishers, and the porcelain makers generally work in [in the Limoges potteries] contained 640,000,000 of dust-particles to the cubic metre. *Buck,* Med. Handbook, VI. 324.

brush-grain (brush′grān), *n.* In the painting of woodwork, an effect produced when the second coat is made to show through the third, of another color, by passing the brush over it while the second coat is still wet. *N. and Q.* 9th ser., VIII. 310.

brush-harrow (brush′har″ō), *n.* Same as *brush,* 6.

brush-holder (brush′hōl″dėr), *n.* A device for holding the brushes of an electric machine. See ★*brush,* 13, with cut.

brush-hook (brush′ hůk), *n.* A bush-hook (which see).

brushing (brush′ing), *n.* In *mining,* that part of the roof or floor of a roadway which is removed to increase its height. *Barrowman,* Glossary.

brush-line (brush′līn), *n.* A fishing-line suspended from a branch of a tree, with the hook immersed in the water beneath: used for catching catfish in a Mississippi river overflow.

Practically all the fishing is done with "trot-lines" and "*brush-lines.*"
Jordan and Evermann, Amer. Food and Game Fishes, [p. 18.

brush-scythe (brush′sīŦH), *n.* A ★bush-scythe (which see).

brush-turkey, *n.* The name is also loosely applied to various megapods, or mound-builders, besides the curious *Talegallus lathami.* Among these is the mallee, *Leipoa ocellata.* It is also given to the bustard, *Eupodotis australis.*

brush-turpentine (brush′tėr″pen-tīn), *n.* In Australia, either one of two trees of the myrtle family, *Syncarpia leptopetala* and *Rhodamia trinervia,* both yielding useful timber. The latter is also called *red scrub tea-tree* and *three-veined myrtle.* See *Syncarpia* and compare *turpentine-tree,* 2.

brush-wire (brush'wīr), *n.* Wire which is made especially for coarse brushes such as are used in street-sweepers.

brusk[1], **brusque** (brŭsk), *v. t.*; pret. and pp. *brusked, brusqued,* ppr. *brusking, brusquing* [*brusk*[1], *a.*] To treat with scant courtesy or in a brusk, offhand way: as, "in this first dialogue he *brusques* Tasso," *Fraser's Mag.*, XIII. 530.—**To brusk it,** to assume a brusk manner; act with bruskness: as, "I'll *brusque it* a little," *Scott*, Woodstock, I. 150.

bruskly, brusquely (brŭsk'li), *adv.* In a brusk manner; offhandedly and with scant courtesy.

brusque, brusquely. See ★*brusk*[1], ★*bruskly.*

brut (brūt), *a.* and *n.* [F. *brut,* fem. *brute,* rude, rough, unfashioned, < L. *brutus,* brute. See *brute, a.*] **I.** *a.* Raw; rough; rude; as applied to wines, dry; not sweet.

II. *n.* [F. *diamant brut.*] A rough diamond or other gem. Roughing out a gem is often called *bruting. M. Bauer,* Precious Stones, v. 243

brute, *n.* **3.** *Naut.*, a yacht that to some extent sacrifices fineness of lines to fullness of form, so that great initial stability and sail-carrying power are obtained.

"Reliance," however, is a *brute* of the most pronounced type, the term *brute* being used in its present accepted sense among yachtsmen as meaning a vessel that sacrifices fineness of form to fullness, great initial stability, and large sail-carrying power.
Sci. Amer., May 9, 1903, p. 354.

bruter (brū'tėr), *n.* [*brut*[2] + *-er*[1].] One who roughs out or roughly shapes gems either by chipping or by grinding them. *M. Bauer,* Precious Stones, p. 244.

bruting (brū'ting), *n.* [*brut*[2] + *-ing*[1].] Roughing out or shaping gems by chipping or grinding.

brutting (brut'ing), *n.* [*brut*[1] + *-ing*[1].] **1.** Browsing; nibbling of young shoots.—**2.** The breaking off of young shoots (or branches?). [Provincial in all uses.]—**Brutting crew,** a crew which rolls logs down slopes too steep for teams.

Bruxellian (bruk-zel'i-an), *a.* and *n.* [F. *Bruxelles,* E. *Brussels,* in Belgium.] In *geol.*, noting a local division of the Middle Eocene in Belgium, corresponding in part to the lower portion of the limestones of the Paris basin. See ★*Lutetian.*

bryaceous (brī-ā'shius), *a.* Belonging or pertaining to the family *Bryaceæ* or to the order *Bryales,* that is, to the true mosses.

Bryales (brī-ā'lēz), *n. pl.* [NL., < *Bryum* + *-ales.*] An order of mosses, the true mosses, characterized by having the spore-case separated from the wall of the capsule by a hollow cylindrical intercellular space. It is divided into the *Acrocarpi* and *Pleurocarpi* (ranked as suborders) and embraces by far the greater part of all mosses.

Bryanthus (brī-an'thus), *n.* [NL. (Gmelin, 1769), < Gr. *βρύον,* moss, + *ἄνθος,* flower, in allusion to the habit of the plant.] A genus of plants of the family *Ericaceæ.* The only species, *B. Gmelini,* is a moss-like or heather-like plant of eastern Siberia. The use of the name is sometimes extended to include the allied genus *Phyllodoce.* This consists of about 6 species, belonging to the arctic-alpine regions of both hemispheres. They are low, evergreen, heath-like shrubs with handsome yellow, red, or purplish flowers. *Bryanthus empetriformis* and other species are occasionally cultivated.

Brycon (brī'kon), *n.* [NL., < Gr. *βρύκων,* ppr. of *βρύκειν,* eat greedily.] A genus of fishes of the family *Characinidæ,* of numerous species, the typical one being *B. dentex,* found on the coast of South America.

Bryophyllum (brī-ō-fil'um), *n.* [NL. (Salisbury, 1805), < Gr. *βρύον,* moss, + *φύλλον,* leaf.] A genus of succulent plants of the family *Crassulaceæ,* containing 4 species, natives of tropical Africa. *B. pinnatum* (*B. calycinum* of Salisbury) is the only species under cultivation. If the leaves are laid on moist sand or moss, after a time new plants will appear at the indentations; it is therefore frequently grown for students' use. It runs wild in some of the warm countries. Sometimes known as the *life-plant.*

bryophytogeographic (brī-ō-fī-tō-jē-ō-graf'ik), *a.* [NL. *bryophytum,* bryophyte, + *geographicus,* geographic.] Relating to the geographical distribution of mosses or of bryophytes generally.

Bryssetæres (bris-e-tē'rēz), *n.* [NL., irreg. < Gr. *βρύσσος,* a kind of sea-urchin, + *ἑταῖρος,* companion.] A genus of cling-fishes of the family *Gobiesocidæ,* represented by a single species, *B. pinniger,* a small fish abundant in the Gulf of California.

Bryssophilus (bri-sof'i-lus), *n.* [NL., < Gr. *βρύσσος,* a kind of sea-urchin, + *φιλεῖν,* love.] A subgenus of cling-fishes of the family *Gobiesocidæ,* typified by the single species *Gobiesox papillifer.*

Brython (brith'on), *n.* [W. *Brython:* see *Briton.*] In *ethnog.*, a Briton of Wales, Cornwall, or ancient Cambria, as distinct from a Gadhelic Celt.

Brythonic (bri-thon'ik), *a.* Of or pertaining to the Brythons.

The god's Irish name Nuada assumes on *Brythonic* ground the form of Nodens, genitive Nodentis, to be found in Latin inscriptions, of which more anon.
Rhys, Celtic Heathendom, p. 125.

B. S. An abbreviation of (*a*) *Bachelor of Surgery;* (*b*) *Bachelor of Science.*

B. S. A. An abbreviation of *Bachelor of Scientific Agriculture.*

B. S. C. An abbreviation of *Bengal Staff Corps.*

B. S. D. An abbreviation of *Bachelor of Scientific Didactics.*

B. S. F. An abbreviation of *Bachelor of Scientific Forestry.*

B. S. G. An abbreviation of *British Standard Gage.*

Bt. A contraction of *Baronet.*

B. Th. An abbreviation of *Bachelor of Theology.*

B. T. U. An abbreviation of *British Thermal Unit.*

buabua (bö-ä-bö'ä), *n.* [Fijian, also simply *bua* = Tongan *bua* = Samoan and Tahitian *pua,* name of several different trees, = Maori *pua,* Hawaiian *pua, puwa,* a flower.] In the Fiji Islands, a small evergreen tree, *Guettarda speciosa,* of the madder family, with opposite obovate leaves and very fragrant jasmine-like flowers, which are strung in garlands by the natives. The tree is widely distributed on tropical shores from East Africa and the adjoining islands to eastern Polynesia. It is highly esteemed on account of its delicious perfume.

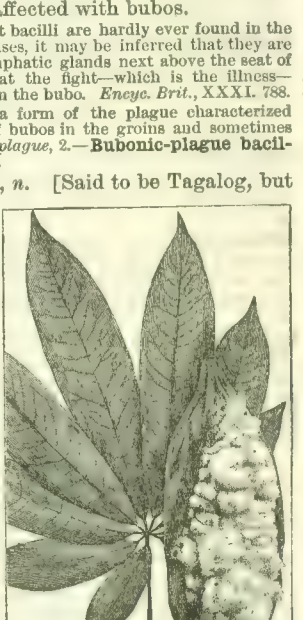
buba (bö'bä), *n.* [Swahili *buba.*] *Frambœsia. Jour. Trop. Med.*, Feb. 16, 1903, p. 62.

bubal (bū'bal), *n.* [Also *bubale;* < L. *bubalus* < Gr. *βούβαλος:* see *buffle, buffalo, bubalis, Bubalus.*] A large ox-like antelope of South Africa, otherwise known as the *bubalis.*

Bubastic (bū-bas'tik), *a.* Of or pertaining to the ancient Egyptian city Bubastis, in Lower Egypt, the present Tel Basta.—**Bubastic dynasty,** the twenty-second Egyptian dynasty, which was of Semitic origin, had its seat at Bubastis, and lasted through 170 years, beginning with about 980 B. C.

bubble-boy† (bub'l-boi), *n.* Same as *bubble-bow.*

bubble-foot (bub'l-fůt), *n.* Any insect of the order *Thysanoptera* or *Physapoda. Amer. Inventor,* June 1, 1904, p. 244.



bubo[1], *n.*—**Malignant bubo,** bubo occurring as the characteristic symptom of one of the forms of plague.—**Sympathetic bubo,** swelling of the inguinal glands due to an irritation or wound of some part of the leg or foot.—**Venereal bubo,** one associated with venereal disease.

bubonic, *a.* **2.** Accompanied by the formation of bubos; affected with bubos.

From the fact that bacilli are hardly ever found in the blood of *bubonic* cases, it may be inferred that they are arrested by the lymphatic glands next above the seat of inoculation, and that the fight—which is the illness—takes place largely in the bubo. *Encyc. Brit.*, XXXI. 788.

Bubonic plague, a form of the plague characterized by the formation of bubos in the groins and sometimes in the axillæ. See *plague,* 2.—**Bubonic-plague bacillus.** See ★*bacillus.*

bubui (bö-bö-ē'), *n.* [Said to be Tagalog, but not traced.] The silk-cotton, *Ceiba pentandra,* a tree belonging to the family *Bombacaceæ,* with a straight trunk, whorls of radiating branches, digitate leaves, and mallow-like flowers. The seed-pods yield a silky floss, called *pulu* in Ceylon and *kapok* in the Malay archipelago, which is brittle and elastic and not suitable for spinning, but is used for stuffing pillows and cushions. It is very inflammable and is used in India in the manufacture of fireworks. See *kapok,*

Bubui (*Ceiba pentandra*).

and *silk-cotton tree,* under *silk-cotton.*—**Bubui gubat** ('forest-bubui'), a name applied to an allied tree, *Bombax Ceiba,* called in the East Indies *simool* or *red* ★*silk-cotton tree.* See *silk-cotton,* under *cotton*[1], and *simool.* [Philippine Is.]

bucan, *n.* **4.** Meat prepared on a bucan. [Guiana.]

Bucania (bū-kā'ni-ä), *n.* [NL., < Gr. *βυκάνη,* a trumpet; see *buccina.*] A genus of prosobranchiate gasteropod mollusks of the family *Bellerophontidæ.* They have nautiloid, symmetrical, spirally enrolled shells with all the volutions exposed, the final whorl ending in an explanate peristome. Typical species are from the Silurian rocks.

bucaramangite (bö"ka-ra-man'jīt), *n.* [From *Bucaramanga,* Colombia.] A fossil resin from Colombia. It is like amber in appearance, but does not yield succinic acid.

bucare (bö-kä'rā), *n.* [S. Amer.; orig. language not traced.] The name in Venezuela, Porto Rico, Trinidad, and other islands of the West Indies of several leguminous trees belonging to the genus *Erythrina,* especially *E. umbrosa* and *E. velutina.* These are used as shade-trees in the cultivation of cacao and coffee. See ★*anauca.*

Buccal chamber, in holothurians, the cavity into which the mouth leads. See *buccal cavity.*—**Buccal shield,** in *Ophiuroidea,* a shield-shaped plate, interradial in position, lying in the angle between the two jaws of one segment. Also called *oral plate, mouth-plate,* and *scutum buccale.*—**Buccal tube,** in certain trematodes, the passage from the mouth to the pharynx.

buccia (bŏ'chä), *n.* [It., bark, peel, hull, etc.] The marc or solid residue from the second pressing of olives in the production of olive-oil.

buccinite (buk'si-nīt), *n.* [*Buccin(um)* + *-ite*[2].] A fossil *Buccinum,* or some shell allied to that genus.

bucco[2] (buk'ō), *n.* Same as *buchu.*

buccofacial (buk-ō-fā'shal), *a.* [L. *bucca,* cheek (mouth), + *facies,* face.] Relating to the mouth and adjoining portion of the face. *Philos. Trans. Roy. Soc.* (London), ser. B, 183. 102.

buccopharyngeal (buk-ō-fā-rin'jē-al), *a.* [L. *bucca,* mouth, + Gr. *φάρυγξ,* pharynx.] Pertaining to the cavity of the mouth and to the pharynx.—**Buccopharyngeal aponeurosis,** a fibrous band stretching between the pterygoid process and the posterior part of the alveolus of the lower jaw, and giving attachment to the superior constrictor pharyngis and the buccinator muscles.—**Buccopharyngeal muscle,** part of the superior constrictor pharyngis muscle.

Bucephalus, *n.* **4.** [*l. c.*] A jocose name for a riding-horse, implying 'a spirited or raging steed,' in allusion to the spirited steed of Alexander the Great.

Buchan's rule. See ★*rule*[1].

Buchiola (bö-kī'ō-lä), *n.* [NL., < G. von *Buch,* a German geologist, + L. dim. *iola.*] A genus of pelecypod mollusks. They have the general form of *Cardium,* but are of very primitive aspect, being without hinge-structure except for minute denticulations along the hinge-line. The surface is usually covered with festooned ribs. On account of the primitive expression of this and some contemporary genera, they were put together by Neumayr into a group termed *Palæoconcha;* but the genus *Buchiola* is not of primitive age and is now regarded as a degenerative pelagic type. Same as ★*Glyptocardia.*

Büchner funnel. See ★*funnel.*

buchnerite (bök'nėr-īt), *n.* [*Buchner* (Otto Buchner, an authority on meteorites) + *-ite*[2].] In *petrog.*, a name given by Wadsworth (1884) to certain ultrabasic igneous rocks, both terrestrial and meteoric, of granular texture and consisting of olivin, enstatite (or bronzite) and augite. Buchnerite is a kind of peridotite.

Buchu camphor. See ★*diosphenol.*—**Long buchu,** the leaves of *Empleurum ensatum,* a shrub of southwestern Cape Colony, related to the plants which produce the true buchu, and used for adulterating that drug. See cut on following page.

buck[1], *n.*—**Golden buck,** a 'rabbit' with a poached egg placed on the cheese mixture.

buck[2], *v. t.* **3.** To saw (felled trees) into logs. [Western U. S.]—**4.** To bring or carry: as, to *buck* water or wood. [U. S.]—**5.** To cut to a proper shape for a barrel-stave.—**6.** To attempt to control (a bucking or obstreperous beast or a difficult affair or proposition): used only in the phrase *to buck the tiger.* See *to fight the tiger,* under *fight.*

buck[2], *n.* **2.** In *poker,* any article placed in the pool with the chips, to be taken down by the winner, indicating that when he deals it shall be a jack-pot. In straight poker, since the winner of the pool always deals, the buck is passed round to mark whose turn it is to ante for all the players.

buck[4], *v. t.* **5.** In *football,* to charge into (the line of opponents) with the ball.

buck[6], *n.* (*c*) An apparatus used in the northwestern United States for gathering hay from the swath and transferring it directly to the foot of the stack. It consists of a coarse

Long Buchu (*Empleurum ensatum*).

a, branch with flowers and fruit; *b*, a male flower; *c*, a hermaphrodite flower. (From Engler and Prantl's "Pflanzenfamilien.")

rake or cradle with horizontal teeth, supported at the two ends by wheels and propelled by horses at the rear. A *drag-buck* used on rougher ground is similar but without the wheels. The hay is elevated by means of a slide (see ★*slide*).

buck[6] (buk), *v. t.* To cut (wood) with a buck-saw. [Canada.]

buck[11] (buk), *n.* A dollar. [Slang.]

A man . . . passed around some gold watches. . . . Twenty *bucks* they cost you over the counter. At three dollars the crowd fought for the tickers.

McClure's Mag., Feb., 1903, p. 428.

buckberry (buk'ber-i), *n.* **1.** The squaw-huckleberry or deerberry, *Polycodium stamineum* and other species. [Southern U. S.]—**2.** The bear-huckleberry, *Gaylussacia ursina*, a species with a sweet fruit, much used in North Carolina. *Lounsberry*, Southern Wild Flowers, p. 396.

buckboard-barouche (buk″bōrd-ba-rösh′), *n.* A large buckboard used as a stage-coach. [Western U. S.]

buckboard-mail (buk″bōrd-māl′), *n.* A form of buckboard-wagon with accommodation for six passengers, used for passenger and mail service in the western United States, especially in Yellowstone Park.

buck-brush (buk'brush), *n.* One of several plants associated in the western United States with the feeding of deer: (*a*) In the mountains of California, *Lotus glaber*, also called *deer-weed* and *wild broom*. (*b*) In Oregon, the shrub *Kunzia tridentata*. (*c*) In Colorado, various shrubby composites of the genera *Chrysothamnus* and *Isocoma*.

buckeen[1] (buk-ēn′), *n.* [Guiana D. **bokin*, fem. of *bok*, goat, buck; see *buck*[1], *n.*, 4.] An Indian woman: a term adopted from the Dutch in Guiana.

The Indian men and women were called by the Dutch "Bucks" and "*Buckeens*," and these rather inelegant expressions are still in common use.

W. H. Brett, Indian Tribes of Guiana, p. 34, note.

buckeen[2] (buk-ēn′), *n.* [*buck* + *-een*, an Ir. dim. (*-ĭn*), used as in *squireen*.] In Ireland one belonging to the less wealthy section of the class known as gentry, who, without a profession or any settled income, tries to play the buck. See *buck*[1], *n.*, 3.

bucker[1], *n.* **4.** One who saws felled trees into logs. Also called a *cross-cutter*. [Western U. S.] —**5.** One who brings or carries. See ★*buck*[2], *v. t.*, 4.

bucker[3] (buk'ėr), *n.* A machine for shaping staves for barrels or kegs. It consists of a steel carriage into which the stave is clamped by a lever. The carriage is then forced by a ram into such a position that the stave passes between two cutters, which shave it to the proper proportions, the width in the center being greater than at the ends to give the barrel the proper bulge or belly.

bucket[1], *n.* **7.** A letter full of abuse. [Local, U. S. slang.]—**8.** A scoop or digger used for taking up loose material such as coal or ore, and often for digging under water. Such buckets are operated by power and can lift a ton or more at a time. The most common form is the clam-shell bucket, which is made in two parts hinged together. It is lowered with the jaws open, and they are closed while the bucket rests on the material to be lifted. It is heavy enough to dig in as the jaws close and so pick up its load. **9.** In turbines and centrifugal pumps, the space between two adjacent vanes on the revolving wheel.—**Bucket fever.** See ★*fever*[1].—**Orange-peel bucket,** a self-filling bucket for a dredging-machine or for a coal-hoisting plant. It consists of four steel leaves hinged together and resembling the sections of half an orange when the skin is cut into four quarters. Dropped upon a mass of coal the pointed ends of the four leaves sink into the coal, and when the bucket is raised by its hoisting-chain the strain causes the leaves to come together, inclosing and lifting one or more cubic yards of coal. It is a modification of the more familiar clam-shell bucket (see *clam-shell*, 3).

bucket, *v. t.*—**To bucket an oar,** to recover the stroke with a hurried forward swing of the body.

bucket[2] (buk'et), *n.* [Appar. ‹OF. *buquet*, a balance: see *bucket*[1], *n.*] A beam or pole on which anything may be hung or carried. *Levins*, Manipulus Vocab., col. 86.

bucket-conveyer (buk'et-kon-vā″ėr), *n.* A device for transporting material, consisting of a chain on which buckets are fixed at regular intervals. The material to be transported is put in the buckets and carried to the desired point, where it is dumped. See ★*conveyer*, 4.

bucket-door (buk'et-dōr), *n.* The cover of an opening in a pump designed to give access to the pump-buckets.

bucket-elevator (buk'et-el″ē-vā-tor), *n.* An apparatus for raising ore, grain, or other material, consisting of a number of metal buckets attached to an endless belt or chain.

bucket-float (buk'et-flōt), *n.* The float of a paddle-wheel.

bucket-lid (buk'et-lid), *n.* The flap of a bucket-valve.

bucket-light (buk'et-līt), *n.* A very short candle, consisting of stearin poured, in the melted state, into a shallow cylinder of tin-plate with a slender wick in the center: intended for use in bedrooms at night and for outdoor illumination of colored lamps. *Groves and Thorp*, Chem. Technol., II. 96.

bucket-mounting (buk'et-moun″ting), *n.* The leather or rubber packing of a pump-bucket.

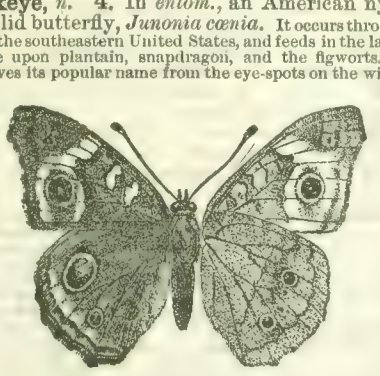
bucket-piece (buk'et-pēs), *n.* The casting of a mine-pump which carries the bucket-door.

bucket-pump (buk'et-pump), *n.* A chain or lifting-pump which employs small buckets in place of pistons. See *chain-pump*.

bucket-recall (buk'et-rē-kâl″), *n.* A sphere formed of bucket-hoops and canvas: it is hoisted aloft by whalers as a signal for the boats to return to the ship.

bucket-ring (buk'et-ring), *n.* Same as ★*bucket-strap*.

bucket-shell (buk'et-shel), *n.* The metal frame of the bucket of a pump.



bucket-strap (buk'et-strap), *n.* An iron ring which clasps the leather of a bucket-valve.

bucket-trap (buk'et-trap), *n.* A form of steam-trap in which a bucket or open vessel is used as the float or weight to operate the valve.

bucket-wheel (buk'et-hwēl), *n.* The rotating part of the turbine wheel (using either steam or water) in which a jet impinges upon curved surfaces, called *buckets*, and imparts velocity and energy to the rotor which is fastened to the revolving shaft. These vanes, or buckets, are either cut or molded from the solid edge of the wheel, or are made separately and carefully fitted on the edge.

buckety (buk'et-i), *a.* Like a bucket; clumsy. [Rare.] *N. E. D.*

buckeye, *n.* **4.** In *entom.*, an American nymphalid butterfly, *Junonia cœnia*. It occurs throughout the southeastern United States, and feeds in the larval state upon plantain, snapdragon, and the figworts. It derives its popular name from the eye-spots on the wings.

Buckeye Butterfly (*Junonia cœnia*).

(From "Amer. Museum Journal.")

—**Big** or **large buckeye,** Same as *yellow* ★*buckeye*.—**Purple** or **purplish buckeye,** a variety (*hybrida*) of the yellow buckeye, which has purplish or pink flowers.—

Red buckeye. See *red*.—**Shrubby buckeye,** a low species, *Æsculus arguta*, found on plains and prairies west of the Mississippi.—**Small buckeye,** *Æsculus parviflora*, a low southern species with pure white flowers, sometimes cultivated.—**Stinking buckeye,** the fetid buckeye. See *buckeye*, 1.—**Texas buckeye.** Same as *Spanish buckeye* (which see, under *buckeye*).—**Yellow buckeye,** *Æsculus octandra*, a large tree of the eastern United States, with yellow flowers.

buck-fly (buk'flī), *n.* Same as *buck-moth*.

buck-heap (buk'hēp), *n.* See the extract.

The great majority of the rabbits captured [in Australia] are sure to be males, because the male rabbits have the habit of congregating in certain spots called "*buck-heaps*." In these spots they are easily caught by the trappers.

Nature, Nov. 13, 1902, p. 43.

buckhorn, *n.* **3.** See *deerhorn*.

bucking-hammer (buk'ing-ham-ėr), *n.* An iron disk, provided with a handle, used for breaking up minerals by hand. *Coal and Metal Miners' Pocketbook*.

bucking-table (buk'ing-tā″bl), *n.* A strong table, usually of cast-iron, on which crushed ore is placed to be pulverized.

buck-jump (buk'jump), *n.* A leap like that of a buck or a bucking horse or mule. [U. S. and Australia.]

buckjump (buk'jump), *v. i.* To jump in the manner of a bucking horse or mule. Same as *buck*[2], 3. [U. S. and Australia.]

buck-jumping (buk'jump-ing), *n.* The plunging and leaping of horses and mules addicted to bucking. See *buck*[2], *v. i.*, 3.

bucklandite (buk'lan-dīt), *n.* [Named after W. *Buckland*, an English geologist (1784–1856).] A variety of allanite from Arendal, Norway.

buckle[1], *v. t.* **2.** To do up (the hair) in curl-papers; curl; crimp. See *buckle*[1], *n.*, 3.

Another word, *buckle*, used in the sense of "to curl," is a localism perhaps. I have heard it used much in Newport, where the ladies spoke of "*buckling* their hair," i. e. rolling it up on a bit of paper or cloth.

Letter from *P. M. C.*

buckler-head (buk'lėr-hed), *n.* Same as *buckler-fish*.

buckling[2] (buk'ling), *n.* [G. *bückling*.] A large smoked and salted herring.

buck-plate (buk'plāt), *n.* Same as *bucking-plate*.

buck-quartz (buk-kwârts′), *n.* Hard, non-auriferous quartz. *Coal and Metal Miners' Pocketbook*.

Buck's extension apparatus. See ★*apparatus*.

buck-shell (buk'shel), *n.* A dugout canoe with straight sides, the wood not being spread in the middle by heating. See ★*shell*, 19. [Guiana.]

buck-shot, *n.* **2.** A lava of granulated structure, occurring in Australia, embedded in sandy alluvium. [Australia.]

The plain under our feet was everywhere furrowed by dead men's graves, and generally covered with the granulated lava, aptly named by the settlers *buck-shot*, and found throughout the country on these trappean formations. *Buck-shot* is always imbedded in a sandy alluvium, sometimes several feet thick.

Austral. Quart., 1851, p. 459, quoted by E. E. Morris in [Austral English.

Buck-shot cinder. See ★*cinder*.—**Buck-shot land,** land whose soil carries rounded lumps of the size of buck-shot, or that carries or produces concretionary pellets.—**Buck-shot soil.** Same as ★*buck-shot land*.

buck-sick (buk'sik), *n.* See the extract.

Epidemic gangrenous rectitis, known here as "caribi" or "*buck-sick*," is said to be common amongst the Aboriginal Indians. I have only seen one or two cases, simply, I presume, because these Indians so rarely come to hospital for treatment.

Jour. Trop. Med., Nov. 15, 1904, p. 357.

buckskinned (buk'skind), *a.* Wearing buckskin; clothed in buckskin.

Our *buckskinned* justices expound the law.

Scott, The Poacher.

buck-stave (buk'stāv), *n.* Same as ★*buck-stay*.

buck-stay (buk'stā), *n.* One of the vertical beams which are run up the outside of a brick boiler-setting or furnace to keep it from buckling, or cracking.

buckthorn, *n.* **3.** In the southern United States any species of the genus *Bumelia*, particularly *B. lycioides*. The tough buckthorn is *B. tenax*, and the wooly buckthorn of the coast region is *B. lanuginosa*. Both of these are also called *black-haw* and *ironwood*.—**Cascara buckthorn,** *Rhamnus Purshiana*, the source of the cascara sagrada bark. See *Rhamnus* and *bark*[2].

Buckwheat swarm. See ★*swarm*[1].—**Copse-buckwheat,** *Polygonum dumetorum*, a climbing species, naturalized from Europe in parts of the United States. This and *P. scandens* have been called *hedge-buckwheat*.—**Crested false buckwheat,** *Polygonum cristatum*, a smaller species of the eastern and southern United States, having the wings of the fruiting calyx incised.—**Hedge-buckwheat.** See *copse-*★*buckwheat*.

buckwheater (buk'hwē-tėr), *n.* A novice at lumbering. [Slang, U. S.]

bucolism (bū'kol-izm), *n.* [*bucol(ic)* + *-ism.*] A bucolic phrase or characteristic. *H. N. Coleridge*, Greek Poets, p. 7. [Rare.] *N. E. D.*

bucorvine (bū-kôr'vin), *a.* and *n.* [NL. *bucorvus* (< Gr. *βοῦς*, ox, + L. *corvus*, crow) + *-ine*[1].] **I.** *a.* Of or pertaining to the hornbills of the genus *Bucorvus* or family *Bucerotidæ*.

II. *n.* A hornbill of this family.

bud[1], *n.*—**Imaginal buds**, the slight projections in full-grown larvæ and semipupæ of insects from which the wings and legs are developed. *Packard*, Text-book of Entom., p. 652.

bud-beetle (bud'bē″tl), *n.* A beetle which infests the buds of various plants.—**Raspberry-bud beetle**, an American dermestid beetle, *Byturus unicolor*, which feeds on the buds and blossoms of the raspberry and blackberry.

bud-brush (bud'brush), *n.* A species of sage-brush, *Artemisia spinescens*, especially abundant in the Red Desert of Wyoming. It is a low plant with bud-like bunches of leaves and flowers much relished by sheep, and is the most valuable of the sage-brushes. Also called *bud-sage* and *spring sage*.

buddawong-nut (bud'a̤-wông-nut″), *n.* Same as *burrawang-nut*.

Budde effect. See ★*effect*.

Buddeize (bůd'īz), *v. t.*; pret. and pp. *Buddeized*, ppr. *Buddeizing*. [Sw. *Budde*, name of the inventor of the process, + *-ize.*] To sterilize (milk) by heating to 48°–55° C. (118.4°–131° F.), with the addition of hydric oxid. At this temperature the enzymes of the milk decompose the hydric oxid, and the nascent oxygen destroys all spores as well as microbes. *Sci. Amer.*, May 30, 1903, p. 413.

Buddhadharma (bůd'ä-där-mä), *n.* [Skt.] The ethical code and religious system of Gautama Buddha.

Buddha's rays. See ★*ray*[1].

Buddhic (bůd'ik), *a.* [*Buddha* + *-ic.*] Same as *Buddhistic*.

Buddhism, *n.*—**Esoteric Buddhism**, a phrase applied to recent theosophical speculations.

budding, *n.*—**Axial budding**, the multiplication of a bilateral organism by transverse fission accompanied by regeneration.

In the rhabdocœl turbellarians, and in some of the annelids, we often find chains of new individuals produced by a process that is often spoken of as budding. It is convenient, however, to distinguish these cases of *axial budding* from those of lateral budding.

T. H. Morgan, Regeneration, p. 149.

Lateral budding, the production by an organism of buds which become new organisms with their planes of symmetry different from those of the budding organism.

Buddleja (bud-lē'jä), *n.* [NL. (Linnæus, 1737–53), named in honor of Adam *Buddle* (died 1715), an English clergyman and botanist.] A genus of trees or shrubs of the family *Loganiaceæ*, usually with quadrangular branches. There are about 70 species in the tropical and temperate regions of America, Asia, and South Africa. The flowers are in racemes, panicles, or clusters; the corolla is tubular or campanulate and 4-lobed. The shrubs are ornamental and the fruit is a two-celled capsule with numerous seeds. It is not hardy in the north; *B. Japonica*, *B. globosa*, *B. Lindleyana*, *B. variabilis*, and *B. Colvillei*, however, will stand many degrees of frost.

buddler (bud'lėr), *n.* One who uses a buddle in washing ore. See *buddle*[2], *n.* and *v. t.*

buddy (bud'i), *a.* [Also *buddie.*] **1.** Full of buds. *Florio.*—**2.** Like a bud. *Cotgrave.*

budge[2], *n.* **4.** Same as *booze*. [Local, U. S. slang.]

budgeree (buj'e̤-rē), *a.* [Also *boojery*, etc. Australian.] An aboriginal commendatory expression meaning 'good': used colloquially in the Australian bush.

budgerigar (buj″e̤-ri-gär′), *n.* [Also *budgereegah*, *betcherrygah*, *betshiregah*, *beauregarde*, etc. Native Australian *budgery*, good, + *ga*, *gah* (misspelled *gar*), a cockatoo or other bird.] An Australian name of the grass-parrakeet, *Melopsittacus undulatus*.

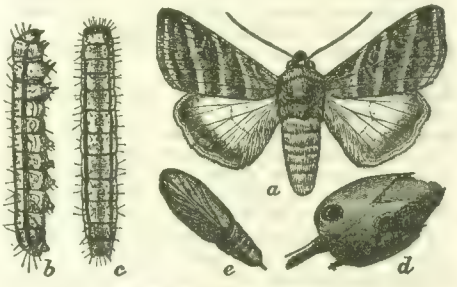
budgerook (buj'e̤-růk), *n.* [Also *budgrook*, *buserook*, *basrook*, etc. Pg. *bazarucco*, *basarucco*, *basaruco*: see ★*bazarucco*.] Same as ★*bazarucco*.

Budge's center. See ★*center of Budge*.

budgetary (buj'e-tā-ri), *a.* Of or pertaining to the budget or governmental financial estimates for the year; relating to or compared with the budget: as, *budgetary* arrangements; a *budgetary* surplus.

budgeteer (buj-et-ēr′), *n.* [*budget* + *-eer.*] One who makes up a budget, as the chancellor of the exchequer of Great Britain when he presents his financial statement for the year.

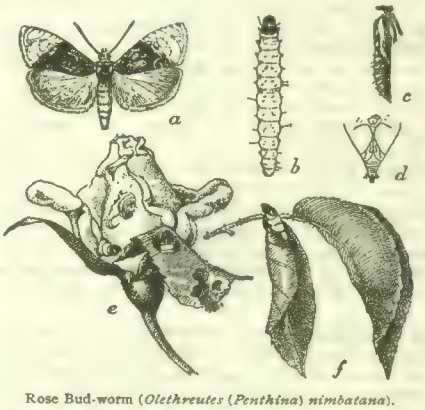
budgrook (buj'růk), *n.* [See ★*budgerook*. Also *buserook*, *basrook*, etc. Pg. *bazarucco*, prob. < Canarese *bāzār-rūka* or *bajāra-rokkha*, 'market-money' (see Yule, 1903, p. 121).] A coin of low denomination, made of copper, tin, lead, etc., formerly current on the western coast of India. [Anglo-Indian.]



bud-moth (bud'môth), *n.* A tortricid moth, *Tmetocera ocellana*. It is common to Europe and the northern United States, and its larva damages apple-trees by destroying the blossoms, newly formed fruit, and terminal twigs. Also called *eye-spotted bud-moth*.

bud-sage (bud'sāj), *n.* Same as ★*bud-brush*.

bud-scale (bud'skāl), *n.* The scale-like outer leaves of a leaf-bud. See *scale*[1], 2.



bud-stick (bud'stik), *n.* A twig from which one who practises budding cuts the buds. The twig is not more than one year old, so that the buds have never yet started into growth. These buds, when removed from the twig, or stick, are inserted into the stock, there to grow. See *budding*.

bud-worm (bud'wėrm), *n.* The larva of an American noctuid moth, *Chloridea virescens*, which affects the bud of the tobacco-plant, frequently doing much damage.—**Apple bud-worm**, the larva of a tortricid moth, *Tmetocera ocellana* Schiff., which bores into the blossoms and newly formed fruit of the apple in the eastern United States.—**Rose bud-worm**, the larva of an American tortricid moth, *Olethreutes nimbatana*, which bores into the flower-buds of roses.

Bud-worm (*Chloridea virescens*).

a, adult moth; *b*, full-grown larva, from side; *c*, same, from above; *d*, seed pod bored into by larva; *e*, pupa. Natural size. (Howard, U. S. D. A.)

Rose Bud-worm (*Olethreutes* (*Penthina*) *nimbatana*).

a, moth; *b*, larva; *c*, empty chrysalis skin; *d*, terminal segment of pupa; *e*, rosebud, showing larva at work; *f*, leaves folded by larva. All enlarged one third, except *d*, which is greatly enlarged. (Chittenden, U. S. D. A.)

budzart, *n.* See ★*budzat*.

Why the shaitan didn't you come before, you lazy old *budzart?* *Cholmondeley*, Dawk Bungalow, p. 215.

budzat (bud'zät), *n.* [Also *budzart*; < Hind. *badzāt*, of evil race, low-born.] A blackguard; a low fellow. [Anglo-Indian.]

buf, *n.* and *v. t.* A simplified spelling of *buff*.

buff[1], *v. t.* **2.** In *leather-manuf.*, to grind or shave with a buff-wheel.

buffa (būf'fä), *a.* and *n.* [It.: see *buffo*.] **I.** *a.* Comic: as, *opera buffa*, *aria buffa*.

II. *n.* A female singer of comic music. See *buffo* and *bouffe*[2].

buffalo, *n.*—**Big-mouthed buffalo**, the common buffalo-fish, *Ictiobus cyprinella*, of the family *Catostomidæ*, a species which reaches a weight of 50 pounds or more: found in certain lakes of the Mississippi valley. Also called *gourdhead*.—**Black buffalo**, a buffalo-fish, *Ictiobus urus*, of the family *Catostomidæ*: found in the Mississippi river.—**Buffalo cholera.** See ★*cholera*.—**Buffalo-clover.** (*a*) See *clover*, 1. (*b*) See ★*buffalo-pea*.—**Gourd-head buffalo**, a name in Louisiana of the buffalo-fish, *Ictiobus cyprinella*. Also called *red-mouthed* and *big-mouthed buffalo*, and *gourdhead*.—**Mongrel buffalo**, a fish, *Ictiobus urus*, of the family *Catostomidæ*, found in streams of the Mississippi valley.—**Small-mouthed buffalo**, the most abundant and best-known of the buffalo-fishes, *Ictiobus bubalus*, of the family *Catostomidæ*.—**White buffalo.** Same as *small-mouthed* ★*buffalo*.

buffalo-bur (buf'a̤-lō-bėr″), *n.* Same as *sand-bur*.

buffalo-fly (buf'a̤-lō-fli″), *n.* Same as *buffalo-gnat*.

buffalo-pea (buf'a̤-lō-pē″), *n.* **2.** In Texas the term is used indiscriminately of species of *Astragalus* and *Lupinus* forming natural pasturage. In the latter sense *buffalo-clover* has also been used. [Western U. S.]

buff-coated (buf'kōt-ed), *a.* Wearing a buff-coat: as, *buff-coated* cavalry.

buffed (buft), *a.* [*buff*[2] + *-ed*[1].] **1.** Clad in buff.—**2.** Coated or covered with buff; having a buffy coat. *N. E. D.*

buffer[1], *n.* **2.** Any instrument or contrivance used in buffing or polishing, such as the thin, sharp-edged steel plate used by woodworkers to bring out the grain; the chamois-covered pad or ball used in polishing the finger-nails; the buffing-lathe, buff-stick, buffing-machine, buff-wheel, etc., used by different workers in different materials, and usually with some kind of powder.

3. One who buffs or polishes (knives, glass, cut precious stones, daguerreotype plates, woodwork, etc.).—**Buffer's consumption**, consumption prevalent among metal-polishers or -buffers.

buffer-beam, *n.* **3.** In *mining*, a beam fixed across a shaft to prevent the pump-rods from moving too far.

buffer-box (buf'ėr-boks), *n.* The casing which incloses the buffer-spring and -rod at the end of a railway-car.

buffer-rod (buf'ėr-rod), *n.* In a railway-car, the rod which carries a buffer; the rod which transfers the shock or bump from the buffer to the spring or cushion which is intended to receive it.

buffer-state (buf'ėr-stāt″), *n.* A state which lies between two larger and supposedly hostile states, and thus serves as a 'buffer.'

buffet-car (buf'et or bü-fā'-kär), *n.* A parlor-car or sleeper fitted with a small kitchen for preparing light meals, which are served on temporary tables placed between the car-seats.

buffet-organ (buf'et or bü-fā'-ôr″gan), *n.* A small, portable organ.

buffo, *n.* **II.** *a.* Comic: as, *basso buffo*. See *bouffe*[2] and ★*buffa*.

bufidin (bū'fi-din), *n.* [L. *bufo*, toad, + *-id*[2] + *-in*[2].] A poisonous substance formed in the skin-glands of toads.

bufonin (bū'fō-nin), *n.* [L. *bufo*(*n*-), toad, + *-in*[2].] A name given by *Faust* to a substance obtained from the skin and parotid gland of the common toad, *Bufo vulgaris* L. Later investigations indicate that it was impure cholesterol containing some bufotalin.

bufotalin (bū-fot'a̤-lin), *n.* [L. *bufo*, toad, + *-t-* + *-al* + *-in*[2].] An amorphous, bitter, poisonous compound, $C_{119}H_{171}O_{25}$ (?), found in the parotid glands of the toad. It is very poisonous to toads, acting on the heart and stopping it in systole.

bufotenin (bū-fot'e̤-nin), *n.* [L. *bufo*, toad, + *-t-* + *-en*(*e*) + *-in*[2].] A poisonous compound obtained from the secretion of the parotid glands of the toad. It acts upon the central nervous system, producing paralysis.

bug[2], *n.*—**Abe Lincoln bug**, a name in some parts of Georgia of the harlequin cabbage-bug, *Murgantia histrionica*. See *cabbage-bug*. Also called *third-party bug*, *fire-bug*, and *terrapin-bug*.—**Brazilian bug** or **beetle**, any one of several beautiful Brazilian chrysomelid or curculionid beetles, sometimes worn alive as ornaments, and frequently set in gold and used in scarf-pins and other articles of jewelry. Among the species so used are the chrysomelid *Desmonota variolosa* and the curculionid *Entimus splendidus*.—**Destructive mealy bug**, *Dactylopius destructor*, found commonly on citrus-trees in Florida.—**Electric-light bug**, either one of two large American water-bugs, *Belostoma Americanum* and *Benacus griseus*. See *Belostoma*.—**Golden bug**, any one of several species of tortoise-beetles, notably *Coptocycla aurichalcea*, which feed on the sweet potato and other convolvulaceous plants.—**Green bug.** Same as *greenfly*, 2; any one of several species of plant-lice.—**Greenhouse-bug**, a scale-insect or coccid *Coccus* (*Lecanium*) *hesperidum* L., a common cosmopolitan species found in greenhouses on various plants. Also called *flat scale*.—**Leaf-foot bug.** Same as *leaf-footed* ★*plant-bug*.—**Long-horned bug**, any heteropterous insect of the series *Gymnocerata* (which see).—**Long-threaded mealy bug**, *Dactylopius longitilis*, a species found in Florida and in northern greenhouses.—**Military bug**, an American capsid bug, *Hadronema militaris*, which sometimes damages the sugar-beet plant.—**Miona bug.** Same as *Persian* ★*bug*.—**Persian bug**, a tick, *Argas persicus* or *persicæ*. See *Argas*.—**Sandy-ground bug**, an American lygæid bug, *Emblethis arenarius*, of wide distribution.—**Semiaquatic bug**, any heteropterous insect of the family *Saldidæ*, *Veliidæ*, *Hydrobatidæ*, or *Limnobatidæ*.—**Short-horned bug**, any heteropterous insect of the series *Cryptocerata*, including the families *Belostomidæ*, *Corixidæ*, *Galgulidæ*, *Naucoridæ*, *Nepidæ*, and *Notonectidæ*.—**Thin-winged bug**, any species of the aberrant heteropterous family *Henicocephalidæ*.—**Third-party bug**, *Murgantia his-*

trionica. Also called *Abe Lincoln* ★*bug*. [Local Texas.] —**Thread-legged bug**, any member of the family *Emesidæ* (which see).—**Toad-shaped bug**. Same as ★*toad-bug*.

bug-agaric (bug′a-gar″ik), *n*. Same as *fly-agaric*. See ★*Amanita*.

bug-fly (bug′flī), *n*. The chinch-bug of the United States, *Blissus leucopterus*. *Kirby and Spence*, Entomol., p. 92.

buggy[2], *n*.—**Concord buggy**, a side-spring, three-perch buggy having a low-sided body. It originated in Concord, New Hampshire, and is the original of side-spring wagons. —**Fantail buggy**, a buggy with the rear cut down from the seat-back to a shallow depth at the rear end of the body.

buggyette (bug-i-et′), *n*. [*buggy* + *-ette*.] A vehicle of novel design, built at Calcutta, India, by a local firm of coach-builders.

bug-hole (bug′hōl), *n*. A small cavity usually lined with crystals. See *vug*. *Coal and Metal Miners' Pocketbook*.

bug-juice (bug′jös), *n*. Poor liquor. [Slang, U. S.]

buglet (bū′glet), *n*. A small bugle, as that carried by bicyclists. *N. E. D.*

bugle-weed (bū′gl-wēd), *n*. Same as ★*Ajuga*.

bug-light (bug′līt), *n*. A small incandescent electric light, used either in street- or house-lighting, as distinguished from the more powerful arc-light. [Colloq.]

Buhl's disease. See ★*disease*.

Buhrstone formation, a cellular silicious rock from which calcareous shells have been dissolved out, occurring in South Carolina, where it attains a thickness of 200 feet and was formerly largely used for millstones. It is of Eocene Tertiary age. The name was introduced into geological nomenclature by Tuomey.

build, *v. i.* **4.** In *casino*, to combine certain cards so that their total pip-value equals that of a single card in the player's hand.

Builders' hoist, lock. See ★*hoist*, ★*lock*[1].

builder-cam (bil′dėr-kam), *n*. A heart-shaped cam placed on a ring-spinning frame to regulate the wind of the yarn on the bobbin.

builder-screw (bil′dėr-skrō), *n*. A part of the mechanism of a spinning-mule for building or forming the yarn cop.

builder-wheel (bil′dėr-hwēl), *n*. One of the gears of a cotton-roving machine for regulating the wind of the roving on the bobbin.

building, *n*. **4.** In *mining*, a wall or pillar built of stone to support the roof in long-wall mining; a pack-wall. *Barrowman*, Glossary. [Scotch.]

building-berth (bil′ding-bėrth), *n*. In *ship-building*, a place in a shipyard on which a vessel is built, with its accessories of piling, blocking, staging, etc.; a building-slip.

As an example mention may be made of the overhead cranes fitted at the Union Ironworks of San Francisco. A framework of wood is built up over the entire *building berth*, the structure being well braced in all directions for carrying two travelling girder cranes.
Encyc. Brit., XXXII. 593, 594.

building-motion (bil′ding-mō″shon), *n*. A mechanical contrivance on a cotton-roving machine for regulating the speed of the bobbin and the wind of the roving thereon. Sometimes called *box of tricks*.

building-paper (bil′ding-pā″pėr), *n*. Paper intended to be inclosed between the sheathing and clapboards of a wall or the sheathing and shingles of a roof, chiefly to give additional warmth and dryness.

building-wheel (bil′ding-hwēl), *n*. Part of the mechanism of a spinning-mule for building or shaping the cop of yarn on the spindle.

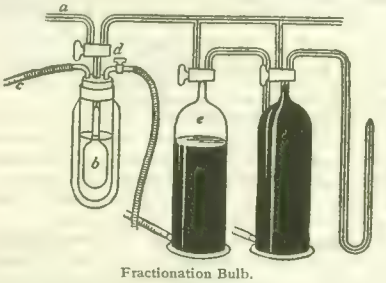
buire (bwēr), *n*. [F. *buire*, dial. *buie*, *bie*, OF. *buire*, *buie*, < ML. **buca*, < OLG. **būc*, AS. *būc*, a pitcher, also the belly: see *buck*[5], *bouk*[1].] A jug or flagon with a handle and spout. Compare *burette*.

buitenlander (bī′ten-lan-dėr), *n*. [S. African D.: *buiten*, outside (see *but*[1]), + *land*, land.] A foreigner; an alien.

buko (bō′kō), *n*. Same as *buchu*.

Bukowka sandstone. See ★*sandstone*.

bul, *n*. A simplified spelling of *bull*.

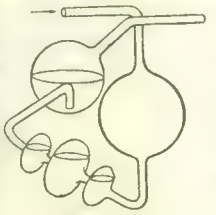


Bul (bōl), *n*. [Heb. *būl*, a word of Canaanite origin.] An ancient name of the second month of the Jewish civil year, now called *Hesvan* or *Mar-hesvan*. As the name of a month it occurs only once in the Hebrew Bible (1 Ki. vi. 38). There are several renderings of the word. See *Hesvan*.

bulak (bō′läk), *n*. [Tagalog *bulak*, *bulac*, cotton; = Bisaya *bolac*, a flower, esp. the flower of cotton.] **1.** A general name in the Philippine Islands for cotton (*Gossypium*).—**2.** A name sometimes applied in those islands to the silk-cotton tree, *Ceiba pentandra*, and to other plants yielding down resembling cotton. See ★*bubui* (with cut).—**Bulak-damo** ('cotton-weed'), *Asclepias curassavica*, a milkweed: so called on account of the silky pappus of its seeds. See *kapok*.

bulakan, bulacan (bö-lä-kän′), *n*. [Visayan name.] Either of the species *Thespesia macrophylla* and *T. populnea*, two closely allied trees belonging to the mallow family, yielding fine cabinet-wood. Also called *banago* and *banalo*. See *Thespesia*, ★*banalo*, ★*milo*, and *Polynesian* ★*rosewood*. [Philippine Is.]

Bulama fever. See ★*fever*[1].



Bulb of percussion, a shell-like projection found on the fractured surface of flints.—**Bulb of the vestibule, vulvovaginal bulb**. Same as *vulvovaginal gland*.—**Conjugate bulbs**, a pair of thermometers inclosed in copper globes, respectively bright and black, for the purpose of determining the total effect of daylight (that is, skylight plus sunshine).—**Fractionation bulb**, a small

Fractionation Bulb.

a, tube through which argon enters bulb; *b*, fractionation bulb in which it is liquefied; *c*, tube connecting Fleuss pump with liquid air contained in a vacuum-vessel; *d*, tap for communicating with mercury gas-holders; *e*, mercury gas-holder. (From Travers's "Exper. Study of Gases.")

glass bulb surrounded by liquid air held in a vacuum-vessel: used in separating the rare gaseous elements of the atmosphere.—**Gas-washing bulb**, a glass apparatus especially designed to expose gases to absorbent liquids.—**Liebig's bulb**, a form of potash-bulb devised by Liebig for the absorption of the carbon dioxid produced in the combustion of carbon compounds in ultimate analysis: frequently used for the absorption of gases by liquids.—**Nitrogen-bulb**, a glass apparatus for the absorption of the ammonia gas set free in the analysis of nitrogenous compounds. The bulbs are filled with standard acid. The various shapes are known by the names of their designers.—**Potash bulb**, a light glass apparatus designed to contain a strong solution of potassium hydrate, so arranged that the gas (carbon dioxid) must bubble through several bulbs or through a length of tubing to effect complete absorption. The apparatus increases in weight in proportion to the gas absorbed. There are many forms.

Liebig's Bulb.

Bulb-angle bar. Same as ★*angle-bulb*.

Bulbar apoplexy. See ★*apoplexy*.—**Bulbar arteries**, small arteries, derived from the anterior spinal artery, which supply the medulla oblongata.—**Bulbar myelitis**, a slow inflammatory process in the medulla oblongata, leading to bulbar paralysis.

bulb-bar (bulb′bär), *n*. A rolled section of iron or steel which has a cylindrical rib along one edge of its flange or tension-edge. See ★*bulb-tee*.

bulb-beam (bulb′bēm), *n*. Same as ★*bulb-bar*.

bulbilla (bul-bil′ä), *n*.; pl. *bulbillæ* (-ē). [NL., dim. of L. *bulbus*, bulb.] In hydroid zoöphytes, a bud which becomes detached at an early stage and is capable of independent development.

bulb-iron (bulb′ī″ėrn), *n*. Same as ★*bulb-bar*.

bulb-mite (bulb′mīt), *n*. A tyroglyphid mite, *Rhizoglyphus hyacinthi*, which often does great damage to bulbs in hothouses by burrowing into healthy tissue and giving entrance to destructive fungi and bacteria.

bulbocapnine (bul-bō-kap′nin), *n*. [NL. *Bulbocapnus* + *-ine*[2].] A crystalline alkaloid, $C_{19}H_{19}NO_4$, found in the roots of *Corydalus cava* or *Bulbocapnus cavus*. It melts at 199° C.

bulbocavernosus (bul″bō-kav-ėr-nō′sus), *n*. [NL., < L. *bulbus*, bulb, + *cavernosus*, cavernous.] The accelerator urinæ muscle.

bulbocavernous (bul-bō-kav′ėr-nus), *a*. Pertaining to the enlargement at the root of the corpus cavernosum.—**Bulbocavernous glands**. Same as *Cowperian glands*.

bulbosin (bul′bō-sin), *n*. [*bulb* + *-ose* + *-in*[2].] A poison extracted from certain fungi.

bulbo-urethral (bul″bō-ū-rē′thral), *a*. [L. *bulbus*, bulb, + LL. *urethra*, urethra.] Pertaining to the bulb of the urethra.—**Bulbo-urethral glands**. Same as *Cowperian glands*.

bulb-plate (bulb′plāt), *n*. In *iron ship-building*, a rolled plate or bar having on one edge an

enlargement or bulb, and used in connection with angle-bars riveted to the other edge for deck-beams, stringers, etc. Modern facilities in steel-rolling have resulted in the general substitution of angle-bulb and T-bulb bars for these purposes.

bulb-rot (bulb′rot), *n*. A disease of bulbs of bacterial or fungous origin: as, the *bulb-rot* of the lily, said to be due to the fungus *Rhizopus necans*.

bulb-scab (bulb′skab), *n*. A fungus disease of *Iris reticulata*, caused by *Mystrosporium adustum*, which produces black patches on the sheath of the bulb.

bulb-scale (bulb′skāl), *n*. One of the fleshy leaves or coats of a bulb.

bulb-tee (bulb′tē), *n*. A deck-beam; a bar, rolled from iron or steel, which has a web with a double flange at one end and a cylindrical head at the other end, thus:

Bulb-tee.

bule, *n*. Same as *boule*[2].

Bulgaria (bul-gā′ri-ä), *n*. [NL. (Fries, 1823), in allusion to the somewhat coriaceous ascomata; < L. *bulga*, a leather sac: see *bouge*[1].] A genus of discomycetous fungi having rather

Bulgaria polymorpha.

a, the fungus, showing the habit, growing between the ridges of oak bark; *b*, fruiting body in longitudinal section. Twice natural size.

large, dark-colored gelatinous ascomata which are hard and horny when dry. The spores are simple and brown. *B. polymorpha* is a common species occurring on oaks and said to cause their decay and death.

bulge, *n*. **3.** A rapid rise in price, of stock, grain, cotton, or the like, followed by an equally rapid fall, owing to some temporary causes. The name has reference to the curve in a diagram of prices. [Colloq.]

bulge, *v*. **II.** *trans*. **1.** To cause to swell out and become protuberant.

How his Majesty is crushed down; quite *bulged* out of shape in that sad way, by the weight of time and its pressures! *Carlyle*, Frederick the Great, II. x. 7.

2. To bilge or stave in the bottom of, as a ship.

Here I found the ship was *bulged* and had a great deal of water in her hold. *Defoe*, Robinson Crusoe, p. 51.

bulger (bul′jėr), *n*. That which bulges; in *golf*, a club with a convex face.

bulger-driver (bul-jėr-drī′vėr), *n*. A wooden golf-club with a convex face.

bulging-stress (bul′jing-stres), *n*. The force which tends to make a metal plate bulge, whether the plate is flat or curved.

bulimuloid (bū-lim′ū-loid), *a*. [*Bulimulus* + *-oid*.] Having the characters of or resembling the gastropods of the genus *Bulimulus*.

bulk[1], *n*. **8.** A pile of tobacco laid up in courses for the purpose of sweating.

Before the sweat is completed the *bulk* is pulled down and built up eight or ten times.
U. S. Dept. Agr., Farmers' Bulletin, No. 60 (1898), p. 7.

Bulk modulus. See ★*modulus*.—**Ton of bulk**. See *ton*[1], 2.

bulk[1], *v. t.* **2.** In the tobacco industry, to form into a bulk or bulks; to leave in the state of bulks: used in this sense with *down*.

These are tied into hands and *bulked down* for a short time. *U. S. Dept. Agr.*, Farmers' Bulletin, No. 60 (1898), p. 9.

3. To pile in heaps, as fish for salting.

bulker[1], *n*. **2.** One who bulks tobacco, fish or the like.

bulkhead, *n*. **4.** In *hydraulic mining* the pressure-box or -tank at the end of a water-ditch or flume from which the water-pipes lead to the nozles.—**Partial bulkhead**, in *ship-building*, a bulkhead extending only part way across the ship from the side; also, by extension, a name given to very deep plate-frames (5–10 feet deep) fitted on high-power passenger-steamers between the decks and in the hold at the side. In the longitudinal system proposed by Scott Russell, and carried out on the "Great Eastern," there were no transverse frames except such partial bulk-

heads. In modern steamers they are used in conjunction with ordinary frames.—**Splinter bulkhead,** a bulkhead or partition of thin armor (usually 1–2 inches thick) of nickel-steel, fitted in the interior of large war-ships, between the guns in the citadel or casemates, to localize the damage from the explosion of shells in the interior. In the newest ships there are both longitudinal and athwartship splinter bulkheads, dividing the citadel into a number of compartments, in each of which there are one or two medium-caliber guns.

bulkheaded (bulk'hed″ed), *a.* Furnished with (water-tight) bulkheads: applied to ships.

bull[1], *n.* **11.** In *mining,* an iron rod used in ramming clay to line a shot-hole. *Coal and Metal Miners' Pocketbook.*—**Bull in the ring,** a child's game, played by a number joining hands in a circle to prevent one in the center from getting away.

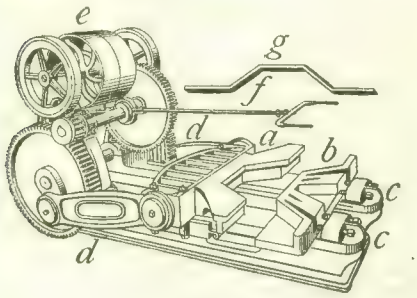
bull[5] (bůl), *n.* Same as ★*beal*[3].

bull-ant (bůl'ânt), *n.* Same as *bull-dog* ★*ant.*

bullation, *n.* **2.** In *bot.,* one of the elevations which, with alternating depressions, occur in considerable numbers nearly parallel with the margin of the lamina of *Laminaria bullata.*

bull-berry (bůl'ber-i), *n.* The buffalo-berry, *Lapargyrea argentea.* See *Shepherdia.*

bull-block (bůl'blok), *n.* A machine for tapering a wire so that it can enter a drawing-die.



bull-chain (bůl'chān), *n.* **1.** A very heavy chain to which a number of short chains with hooks on one end and dogs on the other are attached: used to draw logs from a mill-pond up a gangway.—**2.** Same as *jack-chain.*

bull-clover (bůl'klō″vėr), *n.* See ★*clover.*

bull-daisy (bůl'dā″zi), *n.* The ox-eye daisy.

bulldog, *n.* **8.** Same as *bulldog* ★*ant.*

bulldozer, *n.* **3.** A horizontal geared press for bending, shaping, forming, upsetting, and welding heavy bars, rods, and other metal shapes. It consists of a massive frame which supports bending-, punching-, and shaping-dies, one die being controlled by crank-shafts from the gearing. By using double dies, two bends may be given to any piece of work at one stroke of the machine.

Bulldozer.

a, forming-die sliding on bed; *b,* fixed die; *c, c,* screws for adjustment of *b*; *d, d,* connecting-rods operating *a*; *e,* pulley for belt-delivering power; *f,* controller; *g,* sample steel bar bent in machine. Machine 16 feet long.

buller[2] (bůl'ėr), *n.* Same as ★*bull-shot.*—**2.** In *stock-raising,* a cow of irregular reproductive habit. *Rep. Kansas State Board Agr.* 1901–1903, p. 253.

bullet, n. **4.** In *poker,* an ace: as, a pair of *bullets.* [Slang.]—**Bullet gall.** See ★*gall*[3].—**Dumdum bullet,** a half-covered bullet with an expansible soft core: named from the Dumdum ammunition-works at Calcutta.—**Soft-nose bullet,** a bullet in which the nose is made of softer metal than the rest in order that it may flatten out, or mushroom, on impact.

bullet-head (bůl'et-hed), *n.* A round head like a typical bullet; a person having such a head, and, figuratively, a pig-headed, obstinate person.

bulletin, *n.*—**International bulletin,** in *meteor.*: (*a*) The bulletin of weather telegrams published in Paris since 1859 as the *Bulletin International.* (*b*) The bulletin published by the chief signal officer of the United States army from 1875 to 1889, containing the daily reports and charts and monthly and annual summaries of the international simultaneous meteorological observations for the whole northern hemisphere.

bullet-money (bůl'et-mun″i), *n.* A Siamese gold and silver ingot coinage: so called from its form.

bullet-wood, *n.*—**Andaman bullet-wood,** the timber of *Mimusops littoralis,* a tree of the Andaman and Nicobar islands and Tenasserim. It is reddish brown, close-grained, very hard, durable, and heavy, and is used especially for gun-stocks.

bullety (bůl'et-i), *a.* [*bullet* + *-y*[1]]. Bullet-like as regards form; shaped like a bullet: as, a *bullety* brow. *Poe,* Works, III. 111.

bull-fiddle (bůl'fid″l), *n.* A device consisting of a tin can with a string so inserted that when it is twanged a harsh, noisy tone is produced.

bull-fighting (bůl'fīt-ing), *n.* A sport among Spaniards, and peoples of Spanish origin, in which mounted men attack bulls. See *bull-fight.*

bullfinch[1], *n.* This name is applied locally to many very different birds, as the pine-grosbeak, *Pinicola enucleator*; the house-finch, *Carpodacus mexicanus frontalis*; the black-breasted plover, *Charadrius squatarola*; the goldeneye *Glaucionetta clangula americana*; etc.

bullhead, *n.* **1.** (*f*) A shark of Tasmania and South Australia, *Heterodontus phillipii* Lacépède, of the family *Heterodontidæ,* of small size and harmless, with teeth formed for crushing shells. Also called *bulldog shark,* and in Sydney, where it is common, *Port Jackson shark.* The aboriginal name was ★*tabbigan. Austral English.*

6. A local name for a river-mussel, *Pleurobema æsopus,* found in the Mississippi, the shell of which is used in the manufacture of pearl buttons.—**Bear Lake bullhead,** a species of sculpin, *Cottus cognatus,* of the family *Cottidæ,* found in Great Bear Lake and in the Yukon.—**Black bullhead,** the common species of horn-pout, *Amiurus melas,* found especially in western New York and southwestward.—**Bullhead shark.** See ★*shark*[1].—**Prickly bullhead,** a species of sculpin, *Cottus asper,* of the family *Cottidæ,* found in streams of the Cascade range.—**Rocky Mountain bullhead,** a species of sculpin, *Cottus semiscaber,* of the family *Cottidæ,* found in clear streams in the Rocky Mountain region.

bull-headed, *a.* **3.** Having a blunt, thick, or massive head.—**Bull-headed rail,** a rail which has a thick, heavy head, over 50 per cent. of the metal in the cross-section being located in its head.

bull-headedness (bůl'hed″ed-nes), *n.* **1.** The quality of being bull-headed.—**2.** Figuratively, blind, unreasoning impetuosity or obstinacy; stupid aggressiveness; blockheadedness.

bull-hide (bůl'hīd), *n.* The hide of a bull; loosely, any very heavy hide or skin.

bull-leader (bůl'lē″dėr), *n.* See ★*bull-ring,* 2.

bull-metal (bůl'met″al), *n.* A form of bronze which is used for hydraulic and marine work, both in rolled sections and castings. The metal becomes tougher and more ductile as its temperature is increased.

bull-nettle (bůl'net″l), *n.* A perennial weed, *Solanum elæagnifolium,* often prickly, which

Bull-nettle (*Solanum elæagnifolium*).

a, upper portion of a plant in flower and fruit; *b,* portion of a leaf magnified to show stellate pubescence.

(From Britton and Brown's "Illus. Flora of the Northern States and Canada.")

causes trouble in the region from Kansas to New Mexico. The leaves are silvery like those of species of *Elæagnus.*

bull-oak (bůl'ōk), *n.* Same as ★*belah.*

bullock-puncher (bůl'o̤k-punch″ėr), *n.* Same as ★*bull-puncher.*

bullock-sling (bůl'o̤k-sling), *n.* A strong, broad sling of canvas, employed for hoisting live cattle in and out of a vessel.

bullock-wagon (bůl'o̤k-wag″o̤n), *n.* A crude vehicle, with solid plank wheels, drawn by bullocks: used in South Africa.

bullocky (bůl'o̤k-i), *n.*; pl. *bullockies* (-iz). The driver of a bullock-cart or -wagon. [Australia.]

By George, Jack, you're a regular *bullocky* boy.
Rolf Boldrewood, Colonial Reformer, xii. *Austral English.*

Bulloidea (bůl-ō-id'ē-ă), *n. pl.* [NL., < *Bulla* (a genus) + *-oidea.*] A group of tectibranchiate gasteropods of the order *Opisthobranchiata.* They have the more or less spiral shell either external or internal; epipodia more or less well developed; a broad cephalic shield distinct from the dorsal region; usually no tentacles; and the eyes sessile. It includes the *Actæonidæ, Bullidæ, Doridiidæ,* and other families.

bullon (bö-lōn'), *n.* [Cf. Sp. *bullón,* a kind of knife.] The Cuban name of a species of wrasse-fishes, *Scarus croicensis,* of the family *Labridæ,* found about the West Indies.

bull-puncher (bůl'punch″ėr), *n.* A bullock-driver. [Australia.]

bull-redfish (bůl'red″fish), *n.* The red-drum, *Sciænops ocellata,* of the family *Scizænidæ,* a well-known and abundant food-fish of the sandy shores from Virginia to Texas. See *redfish,* 4.

bull-ring, *n.* **2.** A bronze or copper ring designed to be inserted in the septum of a bull's nose, and used to lead and control the animal by means of a wooden handle having a snap-hook at the end. The snap-hook, when caught in the ring, makes it possible to lead the bull in safety. The handle is called a *bull-leader* or *bull-staff.*

3. The main part of the piston in an engine; the spider of the piston.

bull-rope, *n.* **2.** In *well-boring,* the rope on which the boring-tools are suspended and which operates them: so called from the fact that it passes over the bull-wheel.

bull-rout (bůl'rout), *n.* A scorpænoid fish, *Centropogon robustus,* found in Australian waters.

bull's-eye, *n.* **14.** In *meteor.*: (*a*) A small cloud of ruddy aspect which off the coast of South Africa rapidly develops into a local storm. (*b*) The center of a system of circular isobars, such as characterizes an extensive storm. The isobars suggest the appearance of a target with its bull's-eye. Hence—(*c*) The severest part of a storm or the center of a hurricane.—**15.** A fish of New South Wales, *Priacanthus macracanthus. E. E. Morris,* Austral English.—**16.** The labradorite variety of feldspar, with a dusky sheen. Also *œil-de-bœuf.*—**Bull's-eye cringle, lens.** See ★*cringle,* ★*lens.*

bull-shot (bůl'shot), *n.* In *mining,* a blown-out shot; a blast that has blown out the tamping. Also *buller.*

bull-staff (bůl'stâf), *n.* See ★*bull-ring,* 2.

bull-tongue (bůl'tung), *n.* In *cotton-culture,* a heavy plow having a vertical mold-board. It is more of a digger than a plow. [Local, southern U. S.]

bull-trout, *n.* **2.** *Salvelinus malma,* of northern and western North America and Kamchatka.

bullule (bul'ūl), *n.* [LL. *bullula,* dim. of *bulla,* a bubble: see *bulla.*] A minute vesicle.

bull-wheel, *n.* **3.** In the machine for boring wells, the wheel on which the part of the bull-rope which is not in use is wound. It usually consists of a drum with a wheel on each end.

bully[1], *n.* **6.** In *field-hockey,* the beginning of a game and the starting of each goal. A player from each side stands facing the side-line, and strikes first the ground and then the stick of his opponent alternately three times, after which either player may strike the ball: as soon as it is so struck the ball is in play.—**7**†. A foot-ball scrimmage.—**8.** The foreman or boss of a logging-camp. [U. S.]

bully[3] (bůl'i), *n.* [F. *bouilli,* boiled beef: see *bouilli.* The E. use is prob. often associated with *bull*[1].] Canned or pickled beef. Also attrib., as *bully beef.*

Anything more ridiculous than the possibility of my return to Africa never occurred to me as I wearily munched my ration of everlasting *bully beef* and rice during the Matabele war of 1896.
E. S. Grogan, in Geog. Jour., Aug., 1900, p. 431.

bully[4] (bůl'i), *n.* [An assumed sing. of *bullis* (sometimes written *bullies*), a form of *bullace,* q. v.] The bullace or sloe.

bully[5] (bůl'i), *n.* [Prob. a different application, alluding to the similar fruit, of *bully*[4], either directly or in the compound *bully-tree.*] Same as *bully-tree.* Also called *bully-bay* and *bully-berry tree.*

bullyism (bůl'i-izm), *n.* The practices and conduct of a bully.

The Outises who practice this species of *bullyism* are, as a matter of course, anonymous.
Poe, Mr. Longfellow and Other Plagiarists, Works, III. 320.

bully-off (bůl-i-ôf'), *n.* In *field-hockey,* the starting of the game. See ★*bully*[1], 6.

bulpiss (bůl'pis), *n.* [Native in Nicaragua.] A cutaneous affection, probably parasitic, endemic among the Mosquito Indians in Nicaragua. *Buck,* Med. Handbook, II. 516.

bulrush, *n.*—**Alkali bulrush.** See *American* ★*bulrush.*—**American bulrush,** *Scirpus Americanus,* a species widely diffused in North America, sometimes called *three-square* in allusion to its triangular stem, and *chair-maker's bulrush,* doubtless with reference to its use. In the West, often called *alkali bulrush* because it endures alkali soils.—**Chair-maker's bulrush.** See *American* ★*bulrush.*—**Great bulrush,** *Scirpus lacustris.* See *Scirpus.*—**Prairie bulrush,** *Scirpus campestris,* a species with a three-angled stem, lower than the stem of the *American bulrush,* found on wet prairies from Mani-

toba to Mexico.—**Salt-marsh bulrush**, *Scirpus robustus*, a stout species found on the North American coast from Nova Scotia to Texas.

bultong (bůl'tong), *n.* See *biltong*.

Bulwark plain. See ★*plain*[1].

bum[1], *n.* **II.** *a.* Of poor quality; low-down: as, a *bum* show; a *bum* performance. [Slang. U. S.]

Bumba rubber. See ★*rubber*.

bumbarge (bum'bärj), *n.* Same as *bumboat*.

bumble, *n.* **3.** A jumble or confused heap; confusion.—**4.** An awkward person.

> Hadst thou taen aff some drowsy *bummle*,
> Wha can do naught but fyke an' fumble,
> Twad been nae plea.
> *Burns*, On a Scotch Bard, st. 4.

Bumble flower-beetle. See ★*flower-beetle*.

bumblebee, *n.*—**Trumpeter bumblebee**, an individual worker in a colony of bumblebees whose function it is to awaken the others in the early morning.

bumbo[2] (bum'bō), *n.* A native name in Sierra Leone for a fragrant resin resembling incense, which is yielded by the bumbo- or bungo-tree, *Daniellia thurifera*, as a result of punctures of the twigs and branches by an insect. See *bungo-tree*.

bumboating (bum'bōt-ing), *n.* The business of a bumboat-man (or -woman). *Marryat*.

bummer, *n.* **3.** A small truck with two low wheels and a long pole, used in skidding logs. Also called a *drag-cart*.

bumming (bum'ing), *n.* In *mining*: (*a*) The heaving or rising of the floor. (*b*) The emitting of a hollow sound when struck. [Scotch.]

bump[2], *n.* **6.** In *cricket*, the act of rising higher than usual from the pitch after being bowled: said of the ball.

bumper[1], *n.* **3.** A species of pompano-like fish, *Chloroscombrus chrysurus*, of the family *Carangidæ*, found on the South Atlantic coast and about Cuba. Also called *casabe*. [Bahamas.]—**4.** In *felt-hat manuf.*, a machine used for consolidating the felted material.—**5.** In *Eng. whist*, a rubber of 8 points.

bumper[2], *a.* Brimming; abundant; very good; as, a *bumper* crop.

bumper[2], *v.* **I.** *trans.* **2.** To toast by drinking off a bumper.

II. *intrans.* To drink bumpers: as, "we all sang and *bumpered* away," *M. Scott*, Tom Cringle, p. 510.

bumper[3] (bum'pėr), *n.* In *pianoforte-making*, same as ★*counter-check*, 2.

bumping-table (bump'ing-tā'bl), *n.* In *mining*, a concentrating-table with a jolting motion. Also *bump-table*. *Coal and Metal Miners' Pocketbook*.

bump-joint (bump'joint), *n.* A joint for fastening flanges on pipes by expanding or bumping the end of the pipe into a recess in the flange, thus preventing the flange from pulling off.

bumpkinet (bump'kin-et'), *n.* [*bumpkin* + *-et*[1].] A little bumpkin. [Rare.]

> Peggy was a little vulgar *bumpkinet*.
> *Times* (London), Jan. 12, 1881.

bunch[1], *n.* **7.** In *mining*, the expanded portion of a pipe-line; a place where the pipe does not maintain a uniform cross-section, but is expanded.—**Miners' bunches**, circumscribed edematous infiltrations in various parts of the surface in cases of ankylostomiasis. *Nature*, Sept. 22, 1904, p. 520.

bunch[1], *v. t.* **2.** In *sugar-beet growing*, see ★*block*[1], *v. t.*, 8.—**To bunch a load**, in *lumbering*, to encircle several logs with a chain and load them at once, by steam or horse-power.—**To bunch logs**, to collect logs in one place for loading.

buncher (bun'chėr), *n.* One who or that which bunches; specifically, an attachment to a mower designed to collect the clover, grass, etc., as fast as it is cut, and to deliver it in regular lots called bunches. It consists of a series of steel bands trailing on the ground behind the cutter-bar, and a rear stop or gate composed of steel rods resembling a hay-rake. The grass, cut by the mower, falls on the buncher and is prevented from reaching the ground by the gate. When the buncher is full the gate is released by the operator, and the grass is delivered in a compact bundle called a bunch.—**Asparagus-buncher**, a self-locking cylindric, hinged holder in which asparagus-stems are placed and compressed and tied into convenient and uniform bunches for transportation. It has a guide for the knife used in trimming off the end of the bunch.—**Side-delivery buncher**, a form of buncher designed to deliver the grass at the side of the mower instead of at the back. See ★*windrower*.

bunch-evergreen (bunch'ev'ėr-grēn), *n.* See ★*evergreen*.

bunch-grass, *n.* **2.** In general, any grass which grows in scattered tufts or bunches as distinguished from one which forms a continuous sod. *Pound* and *Clements*.—**Black bunch-grass**, principally *Hilaria mutica*; also several other grasses of different genera.—**Early bunch-grass**, a tender grass, *Eatonia obtusata*, readily eaten by cattle, ranging across the American continent and valuable where abundant.—**Feather bunch-grass**, a slender grass, *Stipa viridula*, growing in and along the Rocky Mountains. It is the best of its genus for hay, free from the objectionable awns of *S. spartea*, the porcupine-grass.—**Great bunch-grass**, *Festuca scabrella*, a valuable mountain-grass of the western United States.—**Pine bunch-grass**, the sheep's fescue, *Festuca ovina*. [Northwestern United States.]—**Wire bunch-grass**, a wheat-grass of the western United States, *Agropyron divergens*, indicating agricultural value.—**Woodland bunch-grass**, *Eragrostis glomerata*, a useful summer grass of moist grounds in the Gulf States.

bunching (bun'ching), *n.* In *sugar-beet growing*, same as *blocking*.

bunch-oyster (bunch'ois'tėr), *n.* A wild oyster found growing in clusters. Same as *coon-oyster*.

bunch-word (bunch'wėrd), *n.* A word formed by 'bunching' several words together, that is, in technical phrase, by agglutination. *Sir D. Wilson*, Prehistoric Man, II. 136.

bund[2] (bůnt), *n.* [G., < *binden* = E. *bind*. The noun answers in meaning to E. *band*[1], *bond*[1].] A league, society, or association: as, *Sängerbund*, a 'singing association'; a shooting *bund*.

> The institution of revolver shooting is regarded likely to create much interest, as many members of the *bunds* favor this sort of work.
> *Forest and Stream*, Jan 24, 1903, p. 78.

bunding (bun'ding), *n.* A staging or scaffold in a mine-level for carrying debris.

bundle, *n.*—**Aberrant bundle**, a collection of nerve fibers in the callosal gyrus.—**Anterior marginal bundle**, the anterior portion of the descending cerebellar tract in the spinal cord.—**Bundle of Vicq d'Azyr**, a collection of nerve-fibers around the anterior nucleus of the optic thalamus.—**Gratiolet's bundle**, a band of nerve-fibers which pass from the optic thalamus to the optic center in the occipital lobe of the brain.—**Ground bundle**, one of two groups of nerve-fibers, anterior and lateral, forming part of the lateral tract of the spinal cord.—**Lenhossek's bundle**, the ascending root of the glossopharyngeal and pneumogastric nerves.—**Meynert's bundle**, a collection of nerve-fibers connecting the ganglion interpeduncular and ganglion habenulæ.

bundling-press (bun'dling-pres), *n.* A machine for compressing yarns or textile materials into packages for shipment.

bundling-wire (bun'dling-wīr), *n.* Baling-wire; wire used for securing bundles or bales.

bundobust (bun'dō-bust), *n.* [Also *bandobast*. Hind. Pers. *band-o-bast*, 'tying and binding.'] System; discipline; orderliness. *Yule; Kipling*. [Anglo-Indian.]

bung[3] (bung), *a.* and *adv.* [Also *bong*. Native Australian *bong*, die.] Dead.—**To go bung.** (*a*) To die: as, "suppose you *go bung*, then you go to heaven." [Australia.] (*b*) To fail; go to smash; collapse; become bankrupt: as, the bank has *gone bung*. [Eng. Slang.]

bung-lathe (bung'lāᵺ), *n.* A lathe specially equipped for turning bungs for barrels.

bungy (bung'i), *n.* [Hind. *bhangī*.] An Anglo-Indian term peculiar to Bombay, denoting a servant of the low class of sweepers: equivalent to *mehtar*, a scavenger in Bengal.

bunjarree (bun-jä'rē), *n.* [Also *bunjary*, *binjarree*, *binjarry*, *benjary* (< Hind. *banjārī*; adj.), prop. *bunjara*, < Hind. *banjārā*, in Bombay *vanjārā*, a grain-merchant, grain-carrier, < Skt. *vāṇij*, trade (see *banyan*) + *-kāra*, suffix of agent.] In India, a grain-merchant; a carrier of grain.

bunk, *n.* **3.** The cross-beam on which the logs rest on a log-car or truck. [U. S.]—**4.** A log-car or truck. [U. S.]

bunk[1], *v.* **II.** *trans.* To place upon the bunks: as, to *bunk* a log.

bunk[2] (bungk), *v. i.* To make off; run away; decamp. [Colloq.]

bunk-chain (bungk'chān), *n.* Same as ★*toggle-chain*.

bunker[1], *n.* **4.** *pl.* The coal carried in bunkers for consumption on board ship. See *coal-bunker*.

bunker[1] (bung'kėr), *v. t.* **1.** *Naut.*, to load (coal) into a steamer's bunkers for its own use as distinguished from loading it as cargo.

> The export of coal from Natal in 1901 amounted to 204,788 tons, of which 55,757 tons were exported from Durban by sea, 1,865 tons overland to Orange River and Transvaal colonies, and 241,166 tons were *bunkered* by vessels at Durban.
> *Sci. Amer.*, Jan. 17, 1903, p. 36.

2. In *golf*, to place (a ball) in play in a difficult position, from which it must be played out; to strike (a ball) into a bunker: said also of the player whose ball is so placed.—**To be bunkered** (from the meaning in *golf*), to be placed in a situation of difficulty, from which it is hard to extricate one's self. [Colloq.]

> In the long narrow ice-bound valleys which lead up from the Hindu Kush to the Pamirs, where one can only see, towering thousands of feet above, the lower knobs and buttresses of gigantic spurs which intersect the glaciers of the mighty ranges on either hand—where the wind whistles down with the force of steam and the temperature of ice, we *were* once, to use a familiar term, fairly *bunkered*.
> *Geog. Jour.* (R. G. S.), XIII. 474.

bunker-coal (bun'kėr-kōl), *n.* Coal carried in a steamer for its own use as distinguished from coal carried as cargo.

bunkering (bung'kėr-ing), *n.* The act of stowing the bunkers with coal; the operation of filling the coal-bunkers.

bunk-hook (bungk'hůk), *n.* The hook, attached to the end of the bunk on a logging-car, which may be raised to hold the logs in place or lowered to release them.

bunk-load (bungk'lōd), *n.* A load of logs not over one log deep, that is, one in which every log rests on the bunks.

bunk-spike (bungk'spīk), *n.* One of the sharp spikes set upright in the bunks of a logging-sled to hold the logs in place.

Bunodes (bū-nō'dēz), *n.* [NL., < Gr. *βουνώδης* < *βουνός*, a mound, hill, + *εἶδος*, form.] A genus of merostomatous crustaceans belonging to the family *Hemiaspidæ* of the order *Synxiphosura*. They have a semicircular cephalothorax, no eyes and no facial sutures, abdomen divided into six anterior broad segments, four posterior narrow segments, and an acuminate telson. The genus occurs in Upper Silurian rocks of the Baltic Sea.

bun-okra (bun'ō-krä), *n.* [Said to be native in Bengal.] The name in India of two cosmopolitan malvaceous shrubs, *Triumfetta rhomboidea* and *Urena lobata*. See ★*aramina*, ★*Cæsar-weed*, *Triumfetta*, and *Urena*.

bunolophodont (bū-nō-lof'ō-dont), *a.* Having tuberculate teeth in which the tubercles are arranged more or less in the form of cross-crests.

bunow (bu-nou'), *n.* [Also *bunnow*. Hind. *banāo*, preparation, embellishment, decoration, < *banānā*, paint, varnish, gild.] A mere fabrication; anything that is fictitious; a sham. [Anglo-Indian.]

Bunsen combustion-furnace, eudiometer, etc. See ★*combustion-furnace*, ★*eudiometer*, etc.

Bunsen's and Roscoe's photometer. See ★*photometer*.

bunt[1], *v.* **II.** *trans.* In *base-ball*, to block (the ball) with the bat, so that it goes to the ground and rolls only a short distance.

Bunt.

bunt[1], *n.* **2.** A blunt stone arrow-head with rounded edge in place of a point.—**Foul bunt**, in *base-ball*, a hit which goes outside of the fair-lines or is hit unfairly.

bunt[2], *v. i.*—**Bunt up!** (*naut.*), an order given in furling sail to haul the bunt of the squaresail up on the yard by aid of the buntlines.

buntal (bůn'täl'), *n.* [Philippine name.] A fiber prepared from the petioles, or leaf-stems, of the talipot or buri palm (*Corypha umbraculifera*), from which hats of the finest quality are made in the Philippine Islands. See ★*buri* and *talipot*.

bunter[2] (bůn'tėr), *a.* and *n.* [Short for G. *bunter-sandstein*, 'variegated sandstone' (see *bunting*[4]).] **I.** *a.* In *geol.*, noting the lowest division or group of strata in the Triassic system in Europe. The word has reference to the variegated colors of these strata. The lower division of the Bunter is a sandstone several hundred feet thick (also locally known as the *Vosgesian*, *grès des Vosges*, and *grès bigarré*), resting conformably on the uppermost layers of the Permian (Zechstein) and passing insensibly into them. The middle and upper divisions, from 1,000 to 2,000 feet thick, are sandstones passing into dolomites and red and green marls, the upper beds being known in Germany as the 'Röth.' The Bunter is overlain by the Muschelkalk in the German Triassic Basin and by the Keuper in Great Britain.

II. *n.* [*cap.*] The bunter-sandstein division.

Bunte's azotometer. See ★*azotometer*.

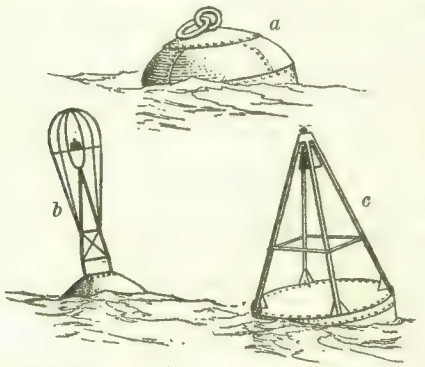
bunting[6] (bun'ting), *a.* and *n.* [Related to *bunting*[1] as *bunch*[1] to bunch[2]. Cf. *bunting*[1], *n.*, 3.] **I.** *a.* Short and thick-set. [Prov. Eng.]

II. *n.* A short and thick-set person. [Prov. Eng.]

bunting[7] (bun'ting), *n.* [Prob. another use of *bunting*[6], *n.*] The common shrimp, *Crangon vulgaris*. [Gr. Brit.]

Buntline lizard. See ★*lizard*.

bunt-rush (bunt-rush'), *n.* In *foot-ball*, a rush made by all the attacking side at once.



bunyip (bun'yip), *n.* [Also *bunyup;* aboriginal Australian.] 1. A fabulous animal supposed to inhabit water-holes and rivers. [Australia.]

Certain large fossil bones, found in various parts of Australia Felix, have been referred by the natives, when consulted on the subject by the colonists, to a huge animal of extraordinary appearance, called in some districts the *Bunyup*, in others the Kianpraty, which they assert to be still alive. It is described as of amphibious character, inhabiting deep rivers, and permanent water-holes, having a round head, an elongated neck, with a body and tail resembling an ox.

W. Westgarth, Australia Felix, p. 391. Quoted in Austral English.

2. An impostor. [Australia.]

buoy, *n.*—**Automatic buoy**, either a bell-buoy or a whistling-buoy, which is operated by the action of the waves.—**Electric buoy**, a buoy which carries an electric lamp.—**Luminous buoy**, a buoy provided with

a, spherical or swinging-buoy; *b*, electric or luminous buoy; *c*, automatic bell-buoy.

either an electric or a gas lamp carried on a stand at the top.—**Spherical buoy**, a buoy in the shape of a globe.—**Swinging-buoys**, a number of mooring-buoys placed more or less in a circle as a convenience in swinging a ship around to different points of the compass when it is being adjusted or compensated for deviation.

buoyancy, *n.*—**Curve of buoyancy**, in *naval arch.*, a curve whose ordinates are the areas of the cross-sections up to the load water-line at each point in the length of a vessel. This curve represents the longitudinal distribution of the buoyancy of the ship, and its area the total buoyancy or displacement.—**Reserve of buoyancy**, in *naval arch.*, the volume of a vessel above the water-line which can be considered as part of the water-tight hull. It is usually expressed as a percentage of the total volume of the vessel or total buoyancy, and is thus a measure of the additional weight which could be placed on the ship before she would sink beneath the surface. It is thus, to a certain extent, a measure of the seaworthiness of the vessel.—**Total buoyancy**, in *naval arch.*, the total floating-power of the water-tight hull of a vessel (including its own weight) up to the point where it is about to sink beneath the surface of the water.

buoying (boi'ing), *n.* The act of sustaining or keeping afloat; support.

Without some such *buoying* as M. Simon's he would be likely to let Caro and Chevalier sink altogether.

Athenæum, July 8, 1893, p. 62.

buoy-safe (boi'sāf), *n.* A large, floating metallic vessel divided into compartments for protecting merchandise against water.

buphthalmia (būf-thal'mi-ạ), *n.* [NL., < Gr. *βουφθαλμος, ox-eyed, < βοῦς, ox, + ὀφθαλμός, eye.] Forward projection of the iris and cornea caused by an increase in the amount of vitreous humor. See *buphthalmos*.

buphthalmic (būf-thal'mik), *a.* Relating to or affected with buphthalmia. *Lancet*, July 11, 1903, p. 101.

buplever (bū-plev'ėr), *n.* [Appar. from a Sp. form of the NL. *bupleurum*.] Any plant of the umbelliferous genus *Bupleurum*. The most noticeable species is the hare's-ear or thoroughwax, *Bupleurum rotundifolium*, naturalized in parts of the United States.

bur[1], *n.* 14. An abnormal outgrowth of wood, frequently of large size, occurring on the trunk or branch of a tree, usually as the result of some injury. See *burl*[1], 2.

Turning now to outgrowths of a woody nature, the well-known *burrs*, or "knaurs," so common on elms and other trees are cases in point. They are due to some injury—e. g., bruising by a cartwheel, insects—having started a callus on which adventitious buds arise, or to the destruction of buds at an early stage.

Encyc. Brit., XXXI. 577.

Bathurst bur, the spiny clot-bur or cockle-bur, *Xanthium spinosum*. See *Xanthium*.—**Creeping bur**, an ambrosiaceous weed, *Gærtneria discolor*, spreading by creeping rootstocks. It is found over the southern part of the Great Plains region.—**French bur**. Same as *French burstone* (which see, under *burstone*).—**Paraguay bur**, either of two composite weeds, *Acanthospermum xanthioides*, from Brazil (also called *sheep-bur*), and *A. humile*, from the West Indies, both introduced into the southern United States. Their bur-like fruits are damaging to wool.—**Sheep-bur**. See *Paraguay* ★*bur*.—**Spanish bur**, a malvaceous plant, *Urena lobata*, with a bristly fruit. It has become a weed in Florida and Alabama. See *Urena* and ★*Cæsar-weed*.—**Tasmanian bur**, a name applied to several species of *Acæna* or their fruits. See ★*biddy-bid* and *sheep-pest*, 2.

bur[1] (bėr), *v. t.*; pret. and pp. *burred*, ppr. *burring*. [*bur*[1], *n.*] 1. To extract (burs and other extraneous matter) from (wool) by chemical or mechanical means.—2. To use a dental bur in the excavation of (a tooth-cavity).

bur[4] (bėr), *n.* [Also *burr*; < Hind. *bar*.] The native Indian name for the banian-tree.

buranhem (bö-rän-yem'), *n.* [Native name.] A name applied in Brazil to a large tree of the family *Sapotaceæ*, *Pradosia lactescens*, the thick, sweet bark of which is used in medicine under the name of monesia bark. The tree yields a very hard wood, used in ship-building, and from the roasted seeds a beverage like coffee is prepared. Also called *guranhem* and *casca-doce*. See *monesia*.

burbung (bėr'bung), *n.* The ceremony of admitting a young man to the privileges of manhood. Also *burbong*. [New South Wales.]

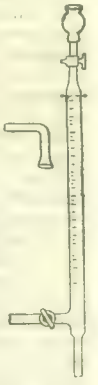
Some Australian tribes have typical and elaborate initiative ceremonies, called *Burbung* or *Bora*, for their adolescents. *G. S. Hall*, Adolescence, II. 240.

bur-chisel (bėr'chiz″el), *n.* A three-edged chisel used to clear out the corners of mortises.

bur-clover (bėr'klō″vėr), *n.* Either of two species of medic, *Medicago Arabica* and *M. denticulata*, so called from their prickly spiral seed-cases. Both are valuable forage-plants, the former extensively introduced in the eastern United States, the latter in California, where it furnishes an important late-summer feed. Since the burs become entangled in wool, the *smooth bur-clover*, more properly *snail-clover*, *M. rugosa*, is preferred for sheep-ranges.

bur-cucumber (bėr'kū″kum-bėr), *n.* See ★*cucumber*.

burdekin-vine (bur'dẹ-kin-vīn), *n.* A name applied in Australia to a grapevine, *Vitis opaca*, bearing large edible tubers and pungent berries.



Burdiehouse group. See ★*group*[1].

Burdigalian stage. See ★*stage*.

bureau, *n.*—**Bureau of Accounts**, a division of the United States Department of State, charged with department appropriations and property, and with indemnity funds and bonds.—**Bureau of Animal Industry**, a division of the United States Department of Agriculture, charged with investigation of matters relating to the raising of live stock, with inspection of live stock, and with the collection and dissemination of information of value to this industry and allied industries.—**Bureau of Appointments**, a division of the United States Department of State, charged with appointments to office, with commissions, etc., and with the care of the great seal.—**Bureau of Chemistry**, a division of the United States Department of Agriculture, charged with investigation of food-products and fertilizers.—**Bureau of Construction and Repair**, a division of the United States Navy Department, charged with the construction and repair of vessels.—**Bureau of Corporations**, a division of the United States Department of Commerce which is charged with the investigation of corporations and joint-stock companies, and with the publication of information relating to them.—**Bureau of Equipment**, a division of the United States Navy Department, charged with the equipment of vessels and with the care of the Naval Observatory, the Nautical Almanac, the Hydrographic Office, etc.—**Bureau of Fisheries**. Same as *United States Commission of Fish and Fisheries*. See *commission*.—**Bureau of Foreign Commerce**, a division of the United States Department of State, charged with the publication of consular and other foreign trade reports.—**Bureau of Forestry**, a division of the United States Department of Agriculture, charged with the investigation of matters relating to forestry. Officially known as the *Forest Service*.—**Bureau of Immigration**, a division of the United States Department of Labor which is charged with the execution of the laws relating to immigration and Chinese exclusion and to alien contract-labor.—**Bureau of Indexes and Archives**, a division of the United States Department of State charged with the care of the department correspondence and with the archives.—**Bureau of Insular Affairs**, a division of the United States War Department, charged with matters relating to the civil government of the Philippine Islands, and with certain records of various insular affairs.—**Bureau of Intelligence**. Same as *intelligence department* (which see, under *intelligence*).—**Bureau of Labor Statistics**, a division of the United States Department of Labor, charged with the investigation of matters pertaining to labor, and with the publication of bulletins and other information relating to labor.—**Bureau of Medicine and Surgery**, a division of the United States Navy Department, charged with laboratories, hospitals, dispensaries, and medical supplies.—**Bureau of Mines**, a division of the United States Department of the Interior, charged with the investigation of the methods of mining, especially in relation to the safety of the miners.—**Bureau of Navigation**. (*a*) A division of the United States Navy Department, charged with fleet orders, enlistment and discharge, various branches of naval education, and various codes, records, etc. (*b*) A division of the United States Department of Commerce which is charged with a general superintendence of many matters connected with the merchant marine.—**Bureau of Plant Industry**, a branch of the United States Department of Agriculture, devoted to the investigation of plants in their economic aspects. Its subjects include plant diseases, plant breeding, etc.—**Bureau of Rolls and Library**, a division of the United States Department of State, charged with the promulgation of laws and with the care of treaties and various other documents.—**Bureau of Soils**, a branch of the United States Department of Agriculture, charged with the investigation of soils in their relation to agriculture. Among its subjects are the physical and chemical properties of soils, the materials and methods of artificial fertilization, the reclamation of old lands, alkali problems, and the adaptations of particular soils, the study of the last involving a Soil Survey, in which are mapped the soils of particular agricultural regions.—**Bureau of Standards**, a division of the United States Department of Commerce which is charged with the custody and investigation of the standards of weight and measure.—**Bureau of Steam Engineering**, a division of the United States Navy Department, charged with matters relating to the steam-machinery of vessels.—**Bureau of Supplies and Accounts**, a division of the United States Navy Department, charged with matters relating to clothing, provisions, and other stores.—**Bureau of the Census**, a division of the United States Department of Commerce which is charged with the taking of the census.—**Bureau of Trade Relations**, a division of the United States Department of State, charged with the instructions for consular reports and with the transmission of such reports, and with the compilation of various information with regard to trade.—**Bureau of Yards and Docks**, a division of the United States Navy Department, charged with the care of docks, wharves, navy-yards, and similar matters.—**Children's Bureau**, an office of the United States Department of Labor which is charged with the investigation of matters pertaining to the welfare of children and child life. The results of investigations may be published with the approval of the secretary of the department. It was established in 1912.—**Consular Bureau**, a division of the United States Department of State, in charge of consular correspondence.—**Credit Bureau**. See *mercantile* ★*agency*.—**Diplomatic Bureau**, a division of the United States Department of State, in charge of diplomatic correspondence.—**International Bureau of the American Republics**, a bureau established to promote closer relations among the republics in America. It is charged with carrying out the mandates of the international American conferences, and is the custodian of their archives.—**Passport Bureau**, a division of the United States Department of State, charged with the issuing of passports.

bureaucratism (bū-rō'kra-tizm), *n.* Government by bureaus; officialism: as, Russian *bureaucratism*.

burette, *n.*—**Constant-volume burette**, a burette connected directly with a mercury reservoir and with a barometer. By adjusting the reservoir the gas in the burette is made to occupy the volume indicated by some fiducial mark. The difference of level between the mercury in the burette and the top of the column of mercury in the barometer indicates the pressure exerted by the gas when occupying a known or definite volume. From this it is possible to calculate the volume of the gas at normal pressure.—**Explosion burette**, a form of burette used in gas analysis.

Explosion Burette.

burga (bör'gä), *n.* [Appar. a dial. var. of Russ. *purga:* see *purga*.] A storm of wind and sleet in Alaska. This storm is similar to the purga of Russia and Siberia in which fine snow or snow-sand is raised by the wind a few feet from the ground and whirled rapidly around. Not to be confounded with the blizzard of North America which is characterized by less snow, greater cold, and fiercer winds. Also spelled *boorga*.

burgator (bėr-gā'tọr), *n.* [NL., equiv. to *burgulator:* see *burglar*.] A burglar.

burgher, *n.* 3. In South Africa, a citizen of the Transvaal or of the Orange Free State.

bur-head (bėr'hed), *n.* A plant of the alismaceous genus *Echinodorus*. The fruits form small, bur-like heads.

burhel, *n.* Same as ★*bharal*.

buri (bö-rē'), *n.* [Philippine name.] The talipot palm, *Corypha umbraculifera*, of great economic importance. The blades of the large fan-shaped leaves yield a material for mats, sacks, and thatch; the vascular fiber of their petioles, called *buntal*, is the material from which the celebrated buntal hats are braided; the sap, collected by cutting off the immature inflorescence, yields a cider-like drink, molasses, sugar, vinegar, and a distilled liquor called *vino;* the small edible fruit is made into preserves; and the starchy pith of the trunk yields a kind of sago called *yoro*. It is from this palm that the island of Burias in the Philippine archipelago takes its name. See *talipot*. [Philippine Is.]

Burial society. See ★*society*.

burial-aisle (ber'i-ạl-īl″), *n.* An aisle, in a church or other religious building, under which bodies are buried.

To send his body and his heart to be buried in Avenal *burial aisle*, in the monastery of Saint Mary's.

Scott, The Abbot, xxxvii.

burial-hill (ber'i-ạl-hil), *n.* Same as *burial-mound*.

burial-robe (ber'i-ạl-rōb), *n.* A dress or robe for the dead; a shroud.

burial-vault (ber'i-ạl-vâlt), *n.* A vault in which the dead are buried.

burk, *v. t.* A simplified spelling of *burke*.

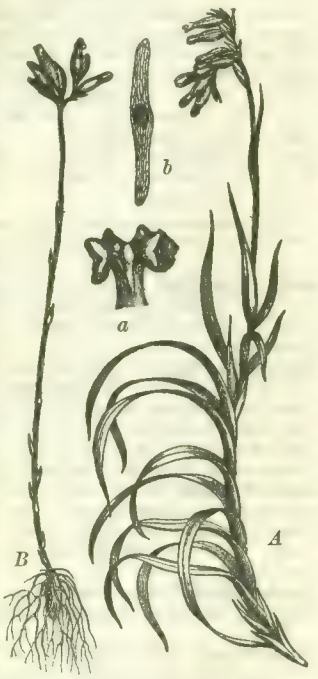
burking, *n.* 2. Killing by suffocation; figuratively, a private suppression of a proposition, bill, or the like.—3. Specifically, in *med.*, suffocation due to tonic spasm of the muscles of respiration.

If we had diaphragm spasm alone, the symptoms then would rather resemble *burking*.
Buck, Med. Handbook, I. 588.

burkism (bėrk'izm), *n.* [*Burke* (see *burke*, *v.*) + *-ism*.] The practices of Burke, the murderer (see *burke*, *v.*); that is, murder of kidnapped victims by smothering.

burkundaz (bėr'kun-däz), *n.* [Hind. (< Ar.) Ar. Pers. *barkandāz*, lit. 'lightning-darter.'] An armed retainer, policeman, or other unmounted armed employee of a civil department in India. Also spelled *burkendoss*. [Anglo-Indian.]

burley[2] (bėr'li), *n.* [Prob. from a proper name *Burley*.] A well-known American variety of tobacco, having two subvarieties, red and white.



Burlington group. See ★*group*[1].

burly-boned (bėr'li-bōnd), *a.* Having large, massive bones; of massive build; stout: as, *burly-boned* soldiers. *Nashe*.

burly-headed (bėr'li-hed″ed), *a.* Massive-headed; of great or commanding intellect.

Destiny has work for that swart *burly-headed* Mirabeau.
Carlyle, French Rev., I. iv. 4.

Burmannia (bėr-man'i-ą), *n.* [NL. (Linnæus, proposed 1737, established 1753), named in honor of Johannes *Burman* (1706–79), professor of botany at Amsterdam.] A genus of monocotyledonous plants, type of the family *Burmanniaceæ*. They are annual, erect herbs with ensiform basal leaves, or with these sometimes wanting, and scape-like stems, the cauline leaves being reduced to bracts or scales. There are about 20 species, natives of the warmer parts of the world. Two species, *B. biflora* and *B. capitata*, occur in the United States from Virginia southward to Florida and Louisiana.

A, *Burmannia longifolia*, in flower; *a*, an anther, enlarged; *b*, a seed, enlarged; B, *Burmannia tuberosa*, an entire plant.

Burmanniaceæ (bėr-man-i-ā'sē-ē), *n. pl.* [NL. (Blume, 1827), < *Burmannia* + *-aceæ*.] A family of monocotyledonous plants of the order *Orchidales*, typified by the genus *Burmannia*, and characterized by flowers with a double 3-merous perianth, 6 stamens, 3 styles, and capsular many-seeded fruits. There are 13 genera and about 60 species, natives of the tropics of both hemispheres, with a few in temperate Australasia. They are herbs growing from rhizomes or tubers, sometimes saprophytic and destitute of chlorophyl, and with flowers in racemes, often nodding or pendulous.

burmanniaceous (bėr-man-i-ā'shius), *a.* Belonging to the plant family *Burmanniaceæ*.

Burmese gold, ringworm. See ★*gold*, ★*Tinea imbricata*.

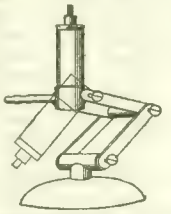
burmite (bėr'mīt), *n.* [*Burma* + *-ite*[2].] A variety of amber, often of a light-sherry color, pale red and yellow, found in Burma, occasionally in masses of ten pounds or more. Many Chinese art-objects are made of it.

burn[1], *v.* **I.** *trans.* **9.** To vulcanize (india-rubber) by mixing it with sulphur or metallic sulphids and heating to a properly determined temperature. *Sadtler*, Handbook of Indust. Chem., p. 106.—**10.** To alter by means of heat, as a gem. Thus yellow topaz may be burned to pink, smoky quartz to brown and yellow (so-called Spanish topaz), chalcedony to carnelian, yellow or bluish zircon to the colorless variety, etc.—**11.** To injure (plants) as if by scorching: said of the action of strong fertilizers.—**To be burned out,** to have one's house or shop gutted by fire.—**To burn a hole in one's pocket,** said of money when the owner is eager to spend it.—**To burn away,** to remove by burning.—**To burn on,** in *foundry-work*, to add a fresh part to an injured or incomplete casting by running a stream of molten iron through the mold of the new part. The molten metal fuses the surface on which it is to be joined and produces perfect union between the two.—**To burn one's boats or bridges,** to cut off all chances of retreat (usually in order to prevent one's self from considering that policy in case of adverse conditions).

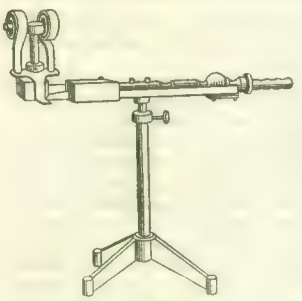
II. *intrans.* **10.** To become acidified as the effect of an excess of green herbage which has been plowed under: said of a soil.

burn[1], *n.* **5.** In the tobacco trade: (*a*) The quality of leaf considered with reference to the completeness or incompleteness of its reduction to ash in being smoked. *Yearbook U. S. Dept. Agr.*, 1901, p. 165. (*b*) A damage sometimes suffered by tobacco in the process of curing (drying), due to excessive moisture in the air. Specifically termed *house-burn* when it takes place indoors, and *pole-burn* when the leaves are dried hanging on poles.

burn-baiting (bėrn'bā-ting), *n.* Same as *burn-beating*. See *burn-beating* and ★*burn-beat*.



The paring of land is a practice of long standing in this island, particularly in the west of England, where it is also denominated (in conjunction with *burning*) den-shiring, *burn-baiting*, or sod-burning.
W. Fream, The Complete Grazier, p. 861.



burn-baking† (bėrn'bā-king), *n.* Same as *burn-beating*.

burn-beat (bėrn'bēt), *v. i.* To perform the operation of burn-beating, or paring and burning (see under *paring*). See also ★*burn-baiting*.

burned, *a.*—**Burned coating,** a technical term applied, in a figurative sense, by electroplaters to a metallic deposit of unsatisfactory appearance and character.

burner, *n.* **3.** A device for heating a painted surface so that the paint can be removed. It has a lamp to which a blowpipe is attached, by which the flame from naphtha is driven with great force against the paint, softening it so that it can be scraped off.—**Albo-carbon burner.** See ★*albo-carbon*.—**Asbestos burner.** See ★*asbestos*.—**Auer burner.** Same as *Welsbach* ★*burner*.—**Clamond burner,** an inverted air-and-gas burner so arranged that a conical basket made of twisted threads of calcined magnesia, supported by platinum wire, is heated to incandescence.—**Friedburg burner,** a form of gas-burner in which the air to be mixed with the gas is admitted at the top and is preheated. The regulation of air is effected by sliding the outer tube up and down. Either a luminous or a non-luminous flame is thus obtained.—**Incandescent oil-vapor burner,** a burner which uses an oil vapor mixed with air for fuel and in which the flame heats a mantle of an infusible substance to incandescence.—**Koch burner,** a special form of gas-burner with a safety-device. As long as the flame continues it heats two spiral springs which control a lever attached to the stop-cock of the gas-supply. Whenever the flame is extinguished the cooling of the springs releases the lever and the stop-cock is automatically closed. It is of especial use where flames are left burning overnight, as under bacteriological ovens.—**Maletra burner,** a simple and valuable arrangement for burning off the sulphur from iron pyrites in the manufacture of sulphuric acid. The 'pyrites small' (dust and coarse powder) having been placed on a succession of superposed shelves of fire-clay, and the combustion started by flame from ordinary fuel, the hot gases are led from one shelf to another over the material, the burning of the sulphur producing heat enough to keep the process going.—**Mantle burner,** a gas-burner in which a non-luminous flame impinges on a mantle, making it incandescent. See *Welsbach* ★*burner*.—**Naphtha burner,** a burner so arranged as to vaporize or atomize the naphtha and then burn it with an admixture of air.—**Petroleum burner,** any burner which atomizes and vaporizes petroleum and, mixing the finely divided particles with air, burns the oil as a vapor.—**Ratchet-wheel burner,** a burner the valve of which is operated by a ratchet and pawl.—**Recuperative burner,** a burner in which the gas or the air or both are preheated before reaching the point of inflammation.—**Scott-Snell burner,** a self-intensifying mantle burner in which heated air is fed to the burner under pressure. The air is compressed by the aid of a displacer attached to a diaphragm, which forms a small caloric engine operated by the waste heat of the gas flame.—**Self-intensifying burner,** a form of mantle burner provided with a draft-chimney which forces all of the gas and all the air introduced at the base of the burner to pass through the mantle.—**Siemens burner,** a form of regenerative burner specially useful in the illumination of large spaces, the large sizes (100–200 candle-power) being the most efficient. The light is diffused downward.—**Sugg burner,** an Argand gas-burner of standard form sometimes used in the photometry of illuminating gas.—**Suvio burner,** the trade name of a gas-heater. It is a Bunsen burner having a small drum attached to radiate the heat generated by the burner. Also called *Suvio heater*.—**Welsbach burner,** a burner for illuminating gas devised by Auer von Welsbach. It consists essentially of a Bunsen burner about the non-luminous flame of which a mantle of cotton gauze impregnated with certain metallic oxids (chiefly thorium oxid) is placed. When first ignited the cotton burns away and leaves a skeleton of the oxids, which becomes incandescent and emits a brilliant light.

Friedburg Burner.

Koch Burner.

burner-dome (bėr'nėr-dōm″), *n.* A metallic dome-shaped plate used in connection with an Argand lamp to deflect the ascending current of air, throwing it on the flame, and thus increasing the temperature, and hence the brightness of the light.

burner-gas (bėr'nėr-gas), *n.* In the manufacture of sulphuric acid, the mixture of gases from the kiln or burner in which sulphur as such, or the sulphur of iron pyrites, is converted into sulphur dioxid by union with atmospheric oxygen. This mixture consists mainly of sulphur dioxid, surplus oxygen, and the whole of the nitrogen of the air used. *G. Lunge*, Sulphuric Acid, I. 579.

burnet[2], *n.*—**Native burnet** (of Australia), the sheep-pest or biddy-bid, *Acæna ovina*. See *sheep-pest*, 2, and ★*biddy-bid*.

Burnetan (bėr-net'an), *n.* [*Burnet*, a town and county in Texas.] The lowest subdivision of the Precambrian series of Texas. As used by T. W. Comstock, probably equivalent to Laurentian of eastern Canada.

burnet-rose, *n.* See *rose*[1], **I,** 1 (2), and *cantrobin*.

burnettism (bėr-net'izm), *n.* The impregnation of wood with Burnett's liquid as a preservative. *N. and Q.*, Sept. 10, 1892.

burning, *n.* **4.** Oxidation of iron by keeping it too long at a welding heat. Burnt iron is practically worthless, although it is sometimes used after repeated reheatings and hammerings, which partially remedy the damage.

burning-oil (bėr'ning-oil), *n.* A trade-name for all liquid products distilled from petroleum which are used for illuminating purposes. [U. S.]

burning-point (bėr'ning-point), *n.* The temperature at which the vapor from the free surface of an illuminating-oil contained in an open vessel, when ignited by contact with a flame, will continue to burn: distinguished from the *flashing-point* which is the temperature at which the first momentary ignition becomes possible.

Burn-nose tree. Same as *bonace-tree*.

burn-out (bėrn'out), *n.* The melting of a wire or other electric conductor by an electric current of too great quantity.—**Burn-out fuse, alloy,** in *elec. wiring*, a fuse or alloy which melts readily at a comparatively low temperature when placed in circuit. The melting of the fuse forms an arc across the space for an instant, and the current is cut out from the main line before other harm is done.

burnsides (bėrn'sīdz), *n. pl.* A style of beard such as that affected by General Burnside (1824–81), consisting of a mustache, whiskers, and a clean-shaven chin.

Burnt amethyst, brass, card, coal. See ★*amethyst*, ★*brass*[1], etc.—**Burnt logwood.** Same as *over-aged logwood*. See ★*over-aged* and ★*aging*, 4.

burnt-stuff (bėrnt'stuf), *n.* A miners' term for the oxidized surficial facies of certain ore-deposits. [Australia.]

burnut (bėr'nut), *n.* [Appar. from *bur*[1] + *nut*, in an allusion reflected also in its other name, *caltrop*.] A plant of the genus *Tribulus* (which see).

Burow's veins. See ★*veins of Burow*.

burra-khana (bu-rä-kä'nä), *n.* [Hind. *barā khāna*, 'big dinner.'] A 'big spread'; an entertainment or feast; a banquet. [Anglo-Indian.]

burring-saw (bėr'ing-sâ), *n.* A thin circular plate with a serrated edge, used in a burring-machine.

burring-wheel (bėr'ing-hwēl), *n.* A drum having teeth on the outside, used in burring wool.

burrito (bō-rē'tō), *n.* [Sp., so called from its grunting noise; dim. of *burro*, a donkey.] A species of grunt, *Pomadasis branicki*, of the family *Hæmulidæ*, found on the sandy shores of the Pacific coast of America and reaching a length of 7 inches. The name is also applied to other related species, as *Brachydeuterus leuciscus*, also of the family *Hæmulidæ*.

burro[2], *n.*—**2.** A name of species of grunts of the family *Hæmulidæ*, as *Pomadasis macracanthus* of the Pacific coast of tropical America.—**Burro blanco,** a species of grunt, *Brachydeuterus axillaris*, of the family *Hæmulidæ*: found only about Guaymas and Mazatlan.

bur-rubber (bėr'rub″ėr), *n.* A block of emery and cement used in facing and dressing millstones.

Burrum formation. See ★*formation.*

bursa, *n.* 2. [*cap.*] A genus of dicotyledonous plants of the family *Brassicaceæ.* See *Capsella* and *shepherd's-purse.*—**Adventitious** or **artificial bursa,** a bursa formed over a bony surface when the part is subjected to intermittent pressure.—**Boyer's bursa,** a bursa between the thyrohyoid membrane and the hyoid bone.—**Bursa virilis,** the scrotum.—**Luschka's bursa,** a sac in the mucous membrane of the posterior wall of the pharynx.—**Rider's bursa,** an adventitious bursa formed in the thigh from pressure of the saddle.

Bursal apertures. Same as ★*bursal fissures.*—**Bursal fissures,** in the *Ophiuroidea,* or brittle-stars, slits bordering each margin of the arms and communicating with the bursæ or pouches, which receive the generative products. These fissures are sometimes discontinuous and, in fossil species, are known to be reduced to rows of pores.—**Bursal scales,** in the *Ophiuroidea,* or brittle-stars, the scales or plates which bound the ★bursal fissures (which see).—**Bursal slits.** Same as ★*bursal fissures.*

bursatti (bėr-sat'i), *n.* Same as ★*bursautee.*

bursautee (bėr-sō'tē), *n.* [Also *bursatti, bursattee;* < Hind. *barsāti,* adj. < *barsāt,* the rains.] 1. A disease of horses thought to be caused by a fungus. It is characterized by peculiar swellings under the skin which finally rupture and are converted into chronic ulcers.—2. A waterproof coat; a rain-coat. [Anglo-Indian.]

burseed (bėr'sēd), *n.* A species of stickseed, *Lappula Lappula,* introduced into the United States from Europe.

burst, *v. i.* 4. In *pin-pool billiards,* to go beyond a score of 31; in *ball-pool,* to smash at the pyramid.

burster, *n.* 2. In *mining,* a blast-hole bored in solid coal not previously made ready for blasting by shearing or holing.

bur-thimble (bėr'thim″bl), *n.* A dentists' thimble.

burweed, *n.*—**Yellow burweed,** an annual boraginaceous weed, *Amsinckia intermedia,* troublesome in California grain-fields and vineyards. The burs are formed by the hispid calyces.

bus[2] (bus), *n.* Short for ★*bus-bar.* Same as ★*bus-bar.*

busain, *n.* Same as ★*busaun.*

busaun (bö-zoun'), *n.* [G. ★*busaun, posaune,* etc., trombone: see *posaune.*] In *organ-building,* a soft reed stop, usually of 16-feet pitch.

bus-bar (bus'bär), *n.* [*(omni-)bus* + *bar*[1].] A system of conductors, in an electric generating-station, on which the power of all the generators is collected for distribution into the system, or (in an electric receiving-station) on which the power from the generating-station is received for distribution to the apparatus consuming it.

busenna (bö-sen'ą), *n.* Same as *mesenna.*

bush[1], *v. t.*—**To bush a road,** to mark the course of a logging-road across a marsh or the ice by setting up bushes. [U. S.]

bush[2], *n.* 3. In *milling,* a packing of wooden blocks placed in the eye of the bedstone and forming the upper bearing of the spindle.

bush[3] (bůsh), *v. t.* To dress a stone with a bush-hammer.

busha (bůsh'ą), *n.* [Negro? Appar. not native W. Ind.] The manager or overseer of an estate in Jamaica. [West Indies.]

bush-beater (bůsh'bē'tėr), *n.* Same as *bush-whacker,* 1.

Such was the legion of sturdy *bush-beaters* that poured in at the grand gate of New Amsterdam.
Irving, Knickerbocker, vi. 5.

bush-boy (bůsh'boi), *n.* An Australian bushman.

bush-bred (bůsh'bred), *a.* Bred or reared in the bush. [Australia.]

bushbuck, *n.* 2. The harnessed antelope, *Tragelaphus pictus;* also, the rare *T. bor.*

Bushbuck (*Tragelaphus bor*).

bush-cattle (bůsh'kat″l), *n.* In Australia, cattle lost from a herd and running wild in the bush.

bush-clover (bůsh'klō-vėr), *n.* Any species of the genus *Lespedeza* (which see). The bush-clovers are either erect, prostrate, or ascending plants, with numerous yellowish or purplish pea-like flowers. The only species of special economic value is the *Japan clover* (which see, under *Japan*).

bush-coral (bůsh'kor″al), *n.* A bushy gorgonian, *Acanella normani,* found in the North Atlantic.

bush-cow (bůsh'kou), *n.* The tapir. [British Guiana.]

Of the quadrupeds found in these forests, the largest is the tapir, or maipuri, commonly called the *bush-cow.*
W. H. Brett, Indian Tribes of Guiana, p. 20.

bush-drive (bůsh'drīv), *n.* A hunt or shooting expedition in which the game is driven from cover in the bush toward the sportsmen. [South Africa.]

At the *bush-drives* so common in the [Cape] Colony Blue-buck are seldom turned out.
Proc. Zool. Soc. London, 1899, p. 831.

bushed, *a.* Hence—2. Bewildered; at a loss; 'lost'; all at sea.

The poor youth, new to the wilds, had, in the expressive phrase of the colonials, got *bushed,* that is, utterly bewildered, and thus lost all idea of the direction that he ought to pursue. *W. Howitt,* Australia, I. 283.

busheling (bůsh'el-ing), *n.* In *iron-working,* the process of heating iron scrap and forming it into a solid block in a furnace.

busheling-furnace (bůsh'el-ing-fėr″nās), *n.* A furnace used in working scrap-iron into a solid block. The scrap, consisting of turnings, chips, nails, etc., is heated to a welding heat, and gathered into a ball about as large as a bushel basket. While still hot and soft it is taken to a hammer and welded by hammering into a billet or is blown.

bush-faller (bůsh'fâl″ėr), *n.* A bushman who fells or cuts down timber in the bush. [Australia.]

bush-fighter (bůsh'fī″tėr), *n.* One who fires from the shelter of bushes; a bushwhacker.

bush-fruit (bůsh'frōt), *n.* A term recently adopted in the United States from English usage to designate those cultivated fruits which are borne on bushes or shrubs, as the raspberry, blackberry, gooseberry, and currant. The term *small-fruit* comprises the same and also the strawberry.

bushhammer (bůsh'ham″ėr), *v. t.* To break or dress (stones) by means of a bush-hammer.

bush-harrow (bůsh'har-ō), *v. t.* To treat with a bush-harrow.

Bush-harrow after sowing.
W. Fream, The Complete Grazier, p. 826.

bush-hawk (bůsh'hâk), *n.* One of the smaller hawks of New Zealand and Australia, *Hieracidea novæ-zealandiæ.*

bush-hog (bůsh'hog), *n.* 1. Same as ★*bush-pig.*—2. A name given in British Guiana to the peccary, *Dicotyles* (or *Tayassu*) *tajacu.*

bush-honeysuckle (bůsh″hun'i-suk-l), *n.* 1. A plant of the genus *Diervilla.* See *honeysuckle,* 2.—2. Any species of true honeysuckle with a bushy habit, including, therefore, the fly-honeysuckles; particularly, *Lonicera Tatarica,* the Tatarian bush-honeysuckle, an ornamental species native in southeast Russia and Siberia.

bush-horse (bůsh'hôrs), *n.* A horse which is lost and running wild in the bush. [Australia.]

bushido (bö͝o′shi-dō″), *n.* [Chino-Jap., < *bu* (Chin. *wu*), military, warrior, + *shi,* officer, + *do* (Chin. *tao*), way.] The code of moral principles which the knights and warriors of feudal Japan were required to put into practice in all circumstances and relations of life; knightly spirit and conduct; chivalry; gentlemanly politeness and honor; integrity, devotion, and duty to one's superiors, and unswerving loyalty to the mikado.

Bu-shi-do means literally 'Military-knight-ways'—the ways which fighting nobles should observe in their daily life as well as in their vocation; in a word, the 'precepts of knighthood,' the *noblesse oblige* of the warrior class.
Nitobe, Bushido, p. 7.

bushloper (bůsh'lō″pėr), *n.* [New York D. **bosch-looper*?: see *bush*[1], *lope*[1], and *loper.* Cf. *interloper.*] One who tramps through the bush or wilderness; a peddler: as, "a romantic young *bushloper*" (of the earlier period of the Dutch occupation of New York). *E. Eggleston,* Duffels, Preface.

bush-magpie (bůsh'mag″pī), *n.* A name of the Australian piping-crows, or crow-shrikes, belonging to the genus *Gymnorhina,* from their black-and-white coloration.

bushman, *n.* 3. A settler in the bush of Australia, as distinguished from one who dwells in a town or city; specifically, one who is acquainted with the bush and its ways.

bushmanite (bůsh'man-it), *n.* [Also *bosjesmanite* and *boschjesmanite. Bushman* (D. *Bosjesman*) + *-ite*[2].] A native alum, in composition intermediate between pickeringite and apjohnite.

bushmanship (bůsh'man-ship), *n.* Knowledge and experience of the bush and its ways; skill in the methods and practical work of the bushman.

bush-pea (bůsh'pē), *n.* A plant of the leguminous genus *Thermopsis;* false ★lupine (which see). The Montana bush-pea, *T. Montana,* a tall herb with a cluster of erect stems, is regarded as possessing some value as forage.

bush-pig (bůsh'pig), *n.* An African pig of the genus *Potamochœrus,* either *P. africanus* or *P. porcus;* a boschvark. Also *bush-hog.*

bush-ranging (bůsh'rān″jing), *n.* The lawless life of a bush-ranger.

bush-rider (bůsh'rī″dėr), *n.* One employed in riding over a bush farm, or station, rounding up the cattle, inspecting the fences, etc. [Australia.]

bush-rope (bůsh'rōp), *n.* A name given to various species of woody vines (bejuco, etc.), the stems of which (lianas) are used as a substitute for ropes, and in the place of nails for securing to one another the timbers of a house. [West Indies and British Guiana.]

bush-scrubber (bůsh'skrub″ėr), *n.* A bumpkin; a boor; a slattern: as, she's a lady! she's no *bush-scrubber.* See *scrubber*[1]. [Bushman's Eng., Australia.]

bush-scythe (bůsh'sīŦH), *n.* A scythe having a short, wide, and strong blade for cutting brush and briers.

The primitive reaping knife or hemp cutter, which is something between a corn-cutter and a *bush-scythe.*
Yearbook U. S. Dept. Agr., 1901, p. 547.

bush-tamarind (bůsh'tam″ą-rind), *n.* A tall tree of Guiana, *Machærium Schomburgkii,* which yields a valuable wood. See *itaka-wood* and *Machærium.*

bush-telegraph (bůsh'tel″ē-grâf), *n.* A confederate of the bush-rangers of Australia, who keeps them informed with regard to the movements of the police, etc. [Australia.]

bush-turkey (bůsh'tėr″ki), *n.* A name in Guiana of the larger curassows.

bush-warbler (bůsh'wâr″blėr), *n.* 1. See *warbler.*—2. Any species of *Gerygone,* a genus of small birds generally placed with the flycatchers. They are inhabitants of the Australian region.

bush-water (bůsh'wâ″tėr), *n.* Rain-water which collects in low places in forests. [West Indies.]

bushwhack (bůsh'hwak), *v. i.* 1. To act in the manner of a bushwhacker: (*a*) sojourn in or beat about the bush; (*b*) engage in guerrilla warfare and fire from behind the bushes.—2. To cut bushes with a bushwhacker.—3. To hunt ducks by approaching them in a boat which has a screen around it to conceal the occupants. *Forest and Stream,* Feb. 21, 1903.

bushwoman (bůsh'wům″an), *n.*; pl. *bushwomen* (-wim″en). A woman living in the bush and playing her part in the settlement and development of the country.

bushwood (bůsh'wůd), *n.* See ★*woodland.*

bush-wren (bůsh'ren), *n.* A small passerine bird, *Xenicus longipes,* of New Zealand: so called from its general resemblance to the wren of England.

bushy[2] (bůsh'i), *n.* [*bush* + dim. *-y*[2].] A countryman. [Australia.]

business-wagon (biz'nes-wag″on), *n.* A wagon, with or without an inclosed top, used for carrying merchandise.

busk[3], *v. i.* 3. To cruise as a pirate.—4. To earn a livelihood by going about singing, playing, and selling ballads, or as an acrobat, juggler, etc., in public houses, steamboats, on the street, etc. [Slang, Eng.]

busker (busk'ėr), *n.* [*busk*[3] + *-er*[1].] A strolling singer, player, ballad-seller, or the like. See ★*busk*[3], 4.

The words and tune of which I remember hearing from the lips of a *busker* at Margate.
Referee, June 29, 1884. [*Encyc. Dict.*]

busking (busk'ing), *n.* [*busk*[3] + *-ing*[1].] The practice of going about as an itinerant singer, player, juggler, ballad-seller, or the like, in pursuit of a livelihood. *Mayhew,* London Labour, I. 215. [Slang, Eng.]

Bussira rubber. See ★*rubber*.

bust[1], *v. i.* **2.** To break to the saddle, as an intractable bronco. [Slang, western U. S.]

It is upon the cowboys that the task falls of breaking to the saddle, or *busting*, the almost untractable "bronchos" that are raised both for this purpose and for the open market. *Wide World Mag.*, April, 1903, p. 545.

bustamite (bös'tą-mīt), *n.* [Named after General A. *Bustamante*.] A variety of the manganese silicate, rhodonite, peculiar in containing calcium.

bustard-quail (bus'tärd-kwāl), *n.* Any of the small, three-toed quails or hemipods of the family *Turnicidæ*, found in the Old World; in particular, the East Indian *Turnix taigoor*.

buster, *n.* **5.** In Australia, a sudden violent squall from the south.

The cold wind or southerly *buster* which . . . carries a thick cloud of dust . . . across the city.
F. Fowler, in Athenæum, Feb. 21, 1863, p. 264.

6. One who breaks intractable horses to the saddle; a bronco-buster. [Slang, U. S.]

Naturally, on a large ranch which employs many cowboys, there is much rivalry among them as to who is the best rider, or *buster*.
Wide World Mag., April, 1903, p. 545.

bustite (bus'tīt), *n.* [*Bustu*, in India, + *-ite*[2].] See ★*meteorite*.

busy, *a.* **8.** In *decoration*, full of detail; overcrowded; fussy. [Trade cant.]

The decoration, in dealer's language, being too *busy* for broad effects. *Burlington Mag.*, III., p. 86.

busybodied (biz'i-bod″id), *a.* Of the nature of a busybody; meddlesome. *N. E. D.*

butalanine (bū-tal'a-nin), *n.* [Gr. *βοῦς*, ox, + *-t-* + *-al* + *-ine*[2].] Alpha-aminoisovaleric acid, $(CH_3)_2CHCHNH_2CO_2H$: found in the pancreas of the ox.

butane (bū'tān), *n.* [L. *but(yrum)*, butter, + *-ane*.] In *chem.*, the fourth member of the paraffin series of hydrocarbons, C_4H_{10}. Two isomeric forms are known, normal butane and isobutane; both are at ordinary temperature and pressure gaseous, colorless, almost odorless, very slightly soluble in water, and readily combustible. Normal butane occurs in small quantity in American petroleum, and has been to a limited extent condensed from the most volatile portion, by means of a freezing mixture, as a colorless, very light liquid boiling at 1° C. (or about 34° F.), forming almost the whole of the commercial product *chymogene*.

butcha (bu'chą), *a.* [Hind. *bachā*.] A young one; a boy, babe, bairn, urchin, chit, chicken, sapling, etc. [Anglo-Indian.]

butcher, *n.* **5.** A long drink of beer. *Austral English*. [Slang, South Australia.]

butcher-bird, *n.* **2.** In Australia, a name of birds of the genus *Cracticus*. *Gould*, Birds of Australia.

butene (bū'tēn), *n.* [L. *but(yrum)*, butter, + *-ene*.] The official name of the hydrocarbon C_4H_8. It exists in three isomeric forms. Also called *butylene*.

butenyl (bū'te-nil), *n.* [L. *but(yrum)*, butter, + *-en(e)* + *-yl*.] The radical C_4H_7: as in *butenyl glycerol*, $C_4H_7(OH)_3$.

butic (bū'tik), *a.* [L. *but(yrum)*, butter, + *-ic*.] Derived from butine.—**Butic acid.** Same as ★*tetrolic acid*.

butine (bū'tin), *n.* [G. *butin*, < L. *but(yrum)*, butter, + *-ine*[2].] The official name of the hydrocarbon C_4H_6. Four isomeric forms are possible, and at least three of these are known.

Butomaceæ (bū-tō-mā'sē-ē), *n. pl.* [NL. (S. F. Gray, 1821), < *Butomus* + *-aceæ*.] A family of monocotyledonous plants of the order *Naiadales*, typified by the genus *Butomus*, and characterized by regular, hermaphrodite, 3-merous flowers, usually with a larger number of stamens and carpels and many seeds. They are swamp or aquatic herbs with linear leaves or with a broad blade having a lattice-like nervation. There are 4 genera, 3 of which are monotypic, and 6 species, widely distributed.

butomaceous (bū-tō-mā'shius), *a.* [< *Butomaceæ* + *-ous*.] Belonging to the plant family *Butomaceæ*.

Butomus (bū'tō-mus), *n.* [NL. (Linnæus, 1753, adopted from Tournefort. 1700), < Gr. *βούτομος*, some aquatic plant, probably the flowering rush.] A genus of plants, type of the family *Butomaceæ*. *B. umbellatus*, the only species, is a hardy perennial aquatic, easily grown on the margins of ponds. It is known as *flowering rush*. See *rush*[1].

butt[2], *n.*, **1.** (*e*) In *archery*, the end of an arrow which is held against the bowstring in shooting: opposed to *point*.—**14.** A shelter or concealment, built of blocks of peat or turf, for the gunner in grouse-driving on English and Scotch moors. Also called a *battery*.

Where possible, the *butts* should always be placed in a hollow of the ground; this not only helps to conceal them from the birds, but also produces higher and prettier shots. . . . He [the sportsman] should not crouch in his *butt* nor seek to conceal himself by stooping, but remain perfectly motionless, until the moment when he throws his gun up to his shoulder to fire.
Encyc. Brit., XXXII. 604.

15. In the tobacco trade, a box 12 inches square, holding from 15 to 50 pounds. *Stand. Dict.*—**16.** *pl.* The ends or 'cuttings' of jute rejected by the manufacturer of cloth or bagging. They are used in making coarse kinds of paper. *Sadtler*, Handbook of Indust. Chem. p. 282.—**Butt cut.** (*a*) The first log cut above the stump. (*b*) In gathering tan-bark, the section of bark taken from the butt of a tree before felling it for further peeling.—**Shift of butts,** in *ship-building*, an arrangement of any extensive surface of plating or planking by which the various butts between plates or planks are distributed over the surface in a regular manner to give the greatest possible strength to the plating as a whole. In iron shipbuilding, for outside plating, the rule is that butts in adjacent strakes of plating must not be less than two frame-spaces apart and that there must be at least two solid passing-strakes between butts over each other in the same frame-space.

butt[2], *v.* **I.** *trans.* **3.** To challenge to a trial of skill in wood-cutting.

I had an uncle . . . who was a famous chopper. . . . When he was past seventy, he had a man working for him who thought himself pretty smart, and my uncle offered to *butt* him.
E. Ingersoll, Country Cousins, i.

II. *intrans.* **2.** In *lumbering*, to undertake, as a trial of skill, to cut off the butt-end of a prostrate log while an opponent is cutting through the smaller end.

butt-box (but'boks), *n.* The bearing or box at the cross-head end of a connecting-rod.

butted (but'ed), *a.* Furnished with a butt (of some specified kind): as, *butted* with ivory. Used chiefly in combination: as, brass-*butted*.

butter[1], *n.*—**Bambara, bambui,** or **bambuk butter.** Same as *shea-butter*.—**Blue butter.** Same as *mercurial ointment* (which see, under *ointment*).—**Butter bacillus.** See ★*bacillus*.—**Butter substitute** or **surrogate.** Same as *oleomargarin*.—**Cay-cay butter,** the fat obtained from the seeds of *Irvingia Malayana* of Malacca and *I. Oliveri* of Cochin China. It is used in the manufacture of soaps and candles.—**Dika butter,** the fat obtained from the roasted seeds of *Irvingia Gabonensis*, used as food by the natives of tropical West Africa, and in Europe for the manufacture of soaps and pomades. See *dika-bread* and *Irvingia*.—**Diseased butter,** in *dairying*, a general though not strictly correct term applied to several kinds of altered, contaminated, infected, or fermented butter, the so-called diseased condition originating in milk or appearing first in the butter itself as a fermentation arising from some bacterial forms added accidentally to the butter through want of cleanliness in its manufacture or care. The following are recognized varieties of contaminated butter: *Bitter butter*, a fermented condition that appears in butter made from bitter milk or fermented milk having a bitter taste. *Blue butter*, butter made from the infected milk called *blue milk* (which see). *Dappled butter*, butter marked by grayish spots originating from the contamination of the milk in the barn. The bacteria causing the abnormal condition of the butter can be removed by heat. It is sometimes called *mottled butter* or *mottles*. *Moldy butter*, butter infected by mold-fungi. *Off-flavor butter*, dry, soft, and unclean butter. *Oily butter*, a condition marked by a disagreeable oily odor and the presence of a white coagulum. *Root-* or *turnip-taste butter*, butter marked by a disagreeable bitter taste suggestive of a raw turnip. It has been commonly supposed to be caused by turnips fed to the cow, but is now known to be of bacterial origin. *Rotten-taste butter*, a fermentation in butter caused, according to Jensen, by the presence of *Bacillus fœtidus lactis*.—**Dutch butter.** Same as *oleomargarin*. *Thorpe*, Dict. Applied Chem., I. 702. [Colloq.]—**Goa butter.** Same as *cocum-butter*.—**Illipé butter.** Same as *shea-butter*.—**Kafir butter,** a solid fat obtained from the seeds of *Combretum butyrosum* by the natives of southeastern Africa.—**Lard butter,** artificial or imitation butter the basis of which has been obtained from lard; butterin.—**Laurel butter.** Same as *bay-oil*.—**Mineral butter,** in early *chem.*, a name given to certain soft, semi solid metallic chlorids: as *butter of antimony* (antimonious chlorid), etc.—**Nungu butter.** Same as *shea-butter*.—**Print-butter,** in *dairying*, butter pressed in a mold to give it a convenient shape and weight for sale and transportation: so named because the mold prints the maker's name or trade-mark on the butter. The opposite of *tub-butter*, or butter packed in bulk in tubs.—**Process butter,** an inferior imitation or adulterated butter. Also called *renovated butter*.—**Renovated butter.** Same as *process* ★*butter*.—**Tub-butter.** See *print-*★*butter*.—**Whey butter,** in *dairying*, an inferior butter made from the fat in whey: sometimes used as a dressing in the manufacture of cheese and called *cheese-grease*. *Yearbook U. S. Dept. Agr.*, 1897, p. 528.

butter[1], *v. i.* **2.** In *cricket*, to fail to make a simple and easy catch; to muff. [Slang.]

butter-bush (but'ėr-bůsh), *n.* The name in Australia of a small tree, *Pittosporum phylliræoides*, bearing bitter, non-poisonous berries, which were pounded into flour by the aborigines for use as food. It yields a very hard, close-grained, light-colored wood, useful for turnery. The leaves furnish an excellent fodder, and cattle are so fond of it that the trees are in danger of extinction.

butter-carrier (but'ėr-kar″i-ėr), *n.* A refrigerator-box or -case for transporting print-butter in ice without bringing the ice into contact with it.

butter-cloth (but'ėr-klôth), *n.* A thin, loosely woven cloth, like cheese-cloth, but with a slightly finer mesh.

Butter- or cheese-*cloth* is almost universally used at present for a wound dressing. *Buck*, Med. Handbook, I. 568.

butter-cross (but'ėr-krôs), *n.* A market-cross near which butter is sold. [Eng.] *N. E. D.*

buttercup, *n.* **2.** A small, square sugar-plum, colored in a variety of tints, and somewhat creamy inside.—**Acrid buttercup.** Same as *tall buttercup*.—**Bulbous buttercup,** *Ranunculus bulbosus*, a species with the stem arising from a bulbous thickened base, native in Europe and now common in fields, etc., in the eastern United States.—**Buttercup oil-beetle.** See ★*oil-beetle*.—**Creeping buttercup,** *Ranunculus repens*, in England a bad weed creeping by runners, introduced in the eastern United States.—**Meadow buttercup.** Same as *tall buttercup*.—**Swamp-** or **marsh-buttercup.** (*a*) See *marsh-buttercup*. (*b*) *Ranunculus septentrionalis*, a vigorous species growing on wet ground in the eastern half of the United States, with the later branches prostrate and rooting.

butter-daisy (but'ėr-dā″zi), *n.* See ★*daisy*.

butter-dish (but'ėr-dish), *n.* **1.** A small plate or dish, often with a cover and strainer, for holding and serving butter; also an individual plate for butter.—**2.** In *dairying*, a thin wooden dish or platter for packing or delivering tub- or print-butter.

butter-drier (but'ėr-drī″ėr), *n.* In *dairying*, a centrifugal drier used to extract the water from newly made butter.

butter-extractor (but'ėr-eks-trak″tor), *n.* A combined milk-separator and churn for making butter directly from fresh milk; a butter-making machine.

butter-fat (but'ėr-fat), *n.* The fat which enters the composition of butter: essentially a mixture of 68 per cent. of palmitin and 30 per cent of olein.

butterfly, *n.* **5.** A local name for a mussel, *Plagiola securis*, found in the Mississippi river: so called from the shape of the valves. The shell is used in the pearl-button industry.—**American copper butterfly,** an American lycænid butterfly, *Heodes hypophlœas*, common in the eastern United States, where its larva feeds on sorrel and clover.—**Antiopa butterfly,** a common European and North American nymphalid butterfly, *Euvanessa antiopa*, also called *mourning-cloak* from its somber colors. The wings are purplish brown with a yellow outer margin. The larvæ live gregariously on the willow, elm, poplar, and hackberry.—**Argus butterfly.** See ★*argus-butterfly*.—**Atalanta butterfly,** a nymphalid butterfly, *Vanessa atalanta*, also known as the *red admiral*, which occurs in Europe and the United States.—**Brush-footed butterfly,** any one of the butterflies in which the front legs are imperfect, including those of the families *Agapetidæ*, *Heliconiidæ*, *Nymphalidæ*, and *Lymnadidæ*.—**Butterfly lupus.** See ★*lupus*.—**Clicking butterfly,** any butterfly of the South American nymphalid genus *Ageronia*. These butterflies make a clicking noise when in flight or by moving the wings when at rest, probably by means of two hooks at the base of the fore wings and two other hooks on the thorax.—**Cosmopolitan butterfly,** a nymphalid butterfly, *Vanessa cardui*, of general distribution, whose larvæ feed on thistles and other *Compositæ*.—**Cresphontes butterfly,** a large black-and-yellow swallow-tailed butterfly, *Papilio cresphontes*, extending up the Atlantic coast of the United States from Florida to New England. Its larvæ feed on the leaves of orange- and lemon-trees, prickly-ash, Lombardy poplar, and other trees.—**Dead-leaf butterfly,** any one of the Oriental nymphalid butterflies of the genus *Kallima*. The under sides of the wings are so colored and marked that the butterflies when at rest almost precisely resemble dead leaves.—**Gossamer-winged butterfly,** any butterfly of the family *Lycænidæ* (which see).—**Harris's butterfly,** an American nymphalid butterfly, *Cinclidia harrisii*, resembling the species of *Phyciodes*. It occurs in the northeastern United States, and its larvæ feed on asters.—**Little sulphur butterfly,** an American pierid butterfly, *Eurema euterpe*, of wide distribution, and feeding in the larva stage on *Cassia* and other leguminous plants.—**Milkweed butterfly.** See *archippus*.—**Monarch butterfly,** a large red cosmopolitan lymnadid butterfly, *Anosia plexippus*, whose larvæ feed on milkweed. It is especially common all through the United States and Canada, but hibernates only in the Southern States, migrating northward in the spring and early summer, and returning southward in the autumn.—**Roadside butterfly,** an American pierid butterfly, *Eurymus philodice*, yellow in color with black-margined wings, common on roadsides from Canada to South Carolina and west to the Rocky Mountains. Its larvæ feed on clover, vetch, lupine, and similar plants.—**Southern dog-face butterfly,** an American pierid butterfly, *Zerene cæsonia*, of wide though principally southern distribution, yellow in color, bordered with black. Its larvæ feed on clover and false indigo.—**White Mountain butterfly,** an American agapetid butterfly, *Œneis norna*, of Arctic distribution and occurring also on the tops of the White Mountains of New Hampshire and among the Rocky Mountains in Colorado. Its larvæ feed on *Carex vulgaris*.—**Wood-white butterfly.** See the extract.

Again, a contributor to the Speaker recently pointed out the resemblance of the resting "*wood white*" *butterfly* (*Leucophasia sinapis*) to the flower buds of the corn wheat—a plant invariably abundant in the woods frequented by this dainty insect.
Sci. Amer. Sup., Apr. 29, 1905, p. 24520.

butterfly-conch (but'ėr-flī-kongk), *n.* A marine univalve mollusk of Tasmania, *Voluta papillosa.*

butterfly-damper (but'ėr-flī-dam″pėr), *n.* A thin plate of metal which turns on an axis across a pipe so that it controls the amount of the passage left open in the pipe. The pipe may be of various cross-sections, but, if round, the axis of the plate or damper is at the middle of the pipe.

butterfly-dock (but'ėr-flī-dok), *n.* Same as ★*batter-dock* 1.

butterfly-fish, *n.* **3.** The common name of the species of fishes of the family *Chætodontidæ* found in tropical seas, noted for their singular form, bright colors, and great activity. The family comprises 8 or 10 genera and nearly 200 species.

butterfly-lesion (but'ėr-flī-lē″zhọn), *n.* A common form of the eruption of lupus erythematosus, in which there is a patch on each side of the nose, joined by a narrow strip across the bridge, suggesting a butterfly in shape.

butterfly-lily (but'ėr-flī-lil″i), *n.* The mariposa-lily; any species of *Calochortus.* The more appropriate name *butterfly-tulip* seems to be gaining favor.

butterfly-lobster (but'ėr-flī-lob″stėr), *n.* A crustacean, *Ibacus peronii,* in which the carapace is broadly extended into wing-like projections. [Tasmania.]

butterfly-nut (but'ėr-flī-nut), *n.* A thumb-nut.

butterfly-tulip (but'ėr-flī-tū″lip), *n.* See ★*butterfly-lily.*

butter-ladle (but'ėr-lā″dl), *n.* A wooden spoon used in handling newly made butter. One type is called a *spoon-ladle,* and another form (used in England), having a perforated bowl, a *butter-scoop.*

Butterman schooner. See ★*schooner.*

butter-oil (but'ėr-oil), *n.* The part of refined cotton-seed oil which is used in making oleomargarin, or butter substitute. *U. S. Dept. Agr., Bulletin* 33, 1896, p. 372.

butter-paddle (but'ėr-pad″l), *n.* Same as ★*butter-spade.*

butter-paper (but'ėr-pā″pėr), *n.* A tough, semitransparent waterproof paper used for wrapping print-butter, cream-cheese, and other materials requiring protection from air, water, or oil.

butter-pear (but'ėr-pār), *n.* Same as ★*aguacate.*

butter-press (but'ėr-pres), *n.* In *candy-making,* a screw or hydraulic press for extracting the essential oil or cacao-butter from ground cacao. A common type is a filter-press.

butter-print, *n.* **2.** The Indian mallow, *Abutilon Abutilon.* The name alludes to the large round seed-capsule, which is neatly marked above with radiating furrows. Also called *stamp-weed.*

butter-salt (but'ėr-sâlt), *n.* Common salt in small crystals, obtained by rapid evaporation of brine at the boiling temperature. On account of its fine texture it is preferred for use in salting butter.

butter-scoop (but'ėr-sköp), *n.* See ★*butter-ladle.*

butter-spade (but'ėr-spād), *n.* A wooden spatula used in cutting butter from a firkin or other vessel. When grooved in parallel lines, butter-spades are used, in pairs, for rolling lumps of butter into balls for the table.

butter-tree, *n.*—**Indian butter-tree,** the fulwa, *Madhuca butyracea.*

butter-worker, *n.,* A creamery apparatus for pressing the buttermilk out of freshly made butter, working in the salt, and bringing the butter to a condition for use or shipment to market. There are several types of such machines, all consisting essentially of one or more plain or fluted rolls that traverse with a rolling motion over or through the butter, which is spread out in a thin cake upon a tray. In small hand-machines the trays are stationary; in power-machines the trays revolve and carry the butter under rolls revolving in a fixed position. In one type of machine the butter is placed in a revolving drum. Butter-workers and churns are sometimes united in one machine. See *churn.*

butter-yellow (but'ėr-yel″ō), *n.* A monoazo coal-tar color produced by combining diazotized aniline with dimethylaniline. It is used for coloring butter, oils, etc.

butt-gage (but'gāj), *n.* A measuring- and marking-tool used, in hanging doors, to mark the positions of the hinges upon the door and upon the door-frame.

butt-hook (but'hůk), *n.* In *lumbering,* the hook by which the cable is attached to the tackle on the logs. [U. S.]

butt-lap (but'lap), *n.* In *ship-building,* a junction of plates or bars at their ends or butts by lapping the end of one over the adjacent end of the other and riveting the lapped parts together.

butt-measurement (but'mezh″ūr-mẹnt), *n.* Measurement from a shoulder or projection; a measurement taken by placing one end of the rule against the projection from which the measurement is taken.

button, *n.,* **4.** (*d*) A finger-knob or key on the concertina and some accordions.—**15.** In *pathol.,* any small, rounded, circumscribed elevation on the cutaneous or mucous surface.

According to Welch and Clement, more characteristic lesions, but less often met in experimental cases, are the so-called *buttons,* viz., certain elevated, circumscribed, round or oval areas of necrotic inflammation of firm consistence, which implicate the mucous and submucous coats, and sometimes all of the coats of the bowel.

Jour. Exper. Med., V. 259.

Amboyna button or **pimple.** An affection of the skin, possibly of syphilitic origin, endemic in the island of Amboyna.—**Button- and buttonhole-marking machine,** in *shoe-manufacturing,* a machine for marking on the edges of a partly made shoe the positions of the buttons to be stitched on and those of the corresponding buttonholes to be cut.—**Button-sewing machine,** a machine having a device for clamping the button to the machine while it is sewed down on the fabric. One type of machine employs the vibrating needle-bar of the ★overseaming machine (which see) and sews two- and four-hole flat buttons and bar-buttons, and fastens and cuts the thread when the work is done. Another type makes a barring-stitch on four-hole and bar-buttons. It is also adapted to sew on buckles, curtain-rings, etc.—**Mescal button.** See ★*mescal.*—**Murphy's button,** an instrument consisting of two button-shaped pieces joined by a screw employed to retain in apposition the two ends of divided intestine in the operation of intestinal anastomosis or that of gastro-enterostomy.—**Naples button,** a bubo of venereal origin.—**To press the button,** to push an external button or knob, and thereby, according to its connections with a prepared system, to close an electric circuit, or to release a spring that operates the shutter of a camera in instantaneous photography; hence, colloquially, to start by a simple act what may be followed by important results.

button, *v. i.* **2.** To bud or form imperfect heads, offsets, rosettes, tubers, or bulbs: for example, the cauliflower buttons when the head sends up imperfect and irregular glomerules, thus destroying the symmetry and solidity of the head.

button-balance (but'n-bal″ans), *n.* A small, very delicate balance used for weighing assay-buttons. *Coal and Metal Miners' Pocketbook.*

button-blanket (but'n-blang″ket), *n.* A blue blanket, generally bordered with red, set with numerous pearl buttons which either edge the blanket or are arranged in patterns. Such blankets are worn by the Indians of British Columbia and Alaska at festivals.

Button-bush dodder. See ★*dodder*[1].

button-cautery (but'n-kâ″tėr-i), *n.* Same as *Corrigan's button* (which see under *button*).

button-eared (but'n-ērd), *a.* Having button-ears, as certain dogs.

button-gage (but'n-gāj), *n.* A slide caliber-rule having two sets of gage-marks, used in precise measurements of button-blanks, -dies, etc.

button-grass (but'n-gras), *n.* A name applied in Tasmania to a sedge, *Gymnoschœnus sphærocephalus,* covering barren, boggy land and bearing a capitate flower-cluster on the end of a slender stalk 4 or 5 feet in length.

buttonhold† (but'n-hōld), *v. t.*; pret. and pp. *buttonheld,* ppr. *buttonholding.* An obsolete form of *buttonhole.*

buttonholder† (but″n-hōl-dėr), *n.* An obsolete form of ★*buttonholer.*

buttonhole, *n.* **3.** In *surg.,* any small straight incision into a cavity or canal. See ★*boutonnière,* 2.—**4.** A buttonhole bouquet. [Eng.]—**Buttonhole stitch,** the stitch used in making buttonholes. The edge of the buttonhole is sewed over and over, leaving a knot on the inside edge with each stitch, to strengthen it and prevent fraying against the button.

buttonhole, *v. t.* **3.** To sew with the stitch used in making buttonholes: used in sewing, lacework, and embroidery.

buttonhole-machine (but'n-hōl-ma-shēn″), *n.* A machine for cutting, sewing, and finishing buttonholes in leather and fabrics. In buttonhole-making the slit in the fabric may be cut with a knife by hand, or by a pivoted knife attached to the machine, or by a knife operated by the machine, and either before or after sewing up the hole. Two types of machine are used. In one the needle, as in an ordinary sewing-machine, remains in a fixed position, and the work, by a suitable mechanism attached to the machine, is fed forward and backward at each stroke of the needle to form the overseaming-stitch, and is also carried round the ends of the slit to sew up the opposite side. This feed-mechanism is adjustable to all sizes of buttonholes. In the other type the work is held in one position while the sewing is done, and the needle-bar supporting the needle vibrates to and fro in forming the stitch, as in the ★overseaming-machine (which see). With this machine the ends of the buttonhole are reinforced by barring or a band of long stitches.

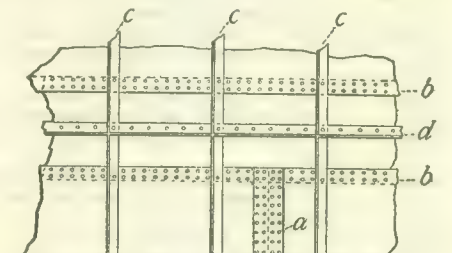
buttonholer (but'n-hōl-ėr), *n.* **1.** One who makes buttonholes; also, a machine designed to be used in making buttonholes.—**2.** One who buttonholes another.

button-press (but'n-pres), *n.* A machine for making buttons. It is usually an upright press which can be fitted to cut the blanks, impress a design on a blank, or assemble the parts.

button-scar (but'n-skär), *n.* A scar drawn up into a button-shape, used for ornamentation of the body by African negroes and corresponding to the tattoo-marks of people with lighter skin. *Ratzel* (trans.), Hist. of Mankind, II. 394.

button-shell (but'n-shel), *n.* A small marine gastropod of the genus *Rotella,* having a rounded, lenticular polished shell.

button-valve (but'n-valv), *n.* A valve in which the plug has a head or button forged on the end of the stem.



buttress, *n.* **4.** A wall or abutment built along a stream to prevent the logs in a drive from cutting the bank or jamming. [U. S.]—**5.** The angle formed on the plantar surface of the hoof by the junction of the wall with the bar.

buttressed (but'rest), *p. a.* Furnished with a buttress or buttresses: said of an arch, or of a building or part of a building, as a Gothic church.

buttress-thread (but'res-thred), *n.* A thread intended to resist a force in one direction only, and hence having one face at right angles to the axis of the shaft or bolt.

butt-riveting (but'riv″et-ing), *n.* A term used instead of *butt-connected,* when two plates have their edges brought against each other and are each riveted into a covering-plate or -strap: distinguished from ★*lap-riveting.*

butt-strap (but'strap), *n.* The covering-plate which is used for connecting two plates which are to be butt-riveted; in *ship-building,* a piece of plate or bar covering the joint of two plates or bars at their ends where they abut against each other, to give continuity of strength. The strap covers the two adjacent ends and is riveted to each. When plates are thus joined, a strap is sometimes placed on each surface of the plates, and the two straps together are called a *double-butt strap.* Straps are further distinguished according to the number of rows of rivets in them on each side parallel to the butt-joint, as a *single-riveted butt-strap,* a *double-riveted butt-strap,* a *treble-riveted butt-strap,* or a *quadruple-riveted butt-strap.*

Butt-strap and Seams in Outside Plating.

a, double-riveted butt-strap; *b, b, b,* double-riveted seam-laps; *c, c, c,* frames; *d,* longitudinal bar.

butt-strip (but'strip), *n.* Same as ★*butt-strap.*

butty, *n.* **3.** In *archery,* one of a pair of archers who shoot together at a target: as, when the leader has shot his first arrow his *butty* takes his place.

butyroin (bū-tir'ō-in), *n.* [L. *butyrum,* butter, + *-o-* + *-in*[2].] Octanol-4-1-5, $C_3H_7COCHOHC_3H_7$. It is an oil which can be distilled with slight decomposition under a low pressure.

butyrometer (bū-ti-rom'e-tėr), *n.* [Gr. *βούτυρον,* butter, + *μέτρον,* measure.] An apparatus for ascertaining the amount of butter-fat in milk.

The *butyrometer* is extremely useful, alike for measuring periodically the fat-producing capacity of individual cows in a herd, for rapidly ascertaining the percentage of fat in milk delivered to factories and paying for such milk on the basis of quality, and for determining the richness in fat of milk supplied for the urban milk trade.

Encyc. Brit., XXVII. 360.

butyrone (bū'ti-rōn), *n.* [L. *butyrum,* butter, + *-one.*] Four-heptanone or dipropylketone, $(C_3H_7)_2CO$. It is prepared by the distillation of calcium butyrate.

butyro-refractometer (bū″ti-rō-rē-frak-tom'e-tėr), *n.* [L. *butyrum,* butter, + *refractometer.*] A refractometer adapted for the measurement

of the refractive power of butter-fat, whereby evidence as to its degree of purity can be obtained.

butyrousness (bū′ti-rus-nes), *n.* Buttery or butyraceous quality. *H. Stubbe.* [Rare.]

Buxaceæ (bux-ā′sē-ē), *n. pl.* [NL. (Dumortier, 1822), < *Buxus* + *-aceæ*.] A family of dicotyledonous archichlamydeous (apetalous) plants of the order *Sapindales*, the box family, typified by the genus *Buxus*, the box. It is characterized by unisexual regular bracted flowers, the staminate with four or more stamens and sometimes a rudimentary pistil, the fertile with a 2–4-celled ovary and as many simple styles. It embraces 6 genera and 30 species — trees, shrubs, or perennial herbs, chiefly with evergreen leaves, widely scattered over the globe. See *box*[1], *Buxus*, and *Pachysandra*.

buxaceous (buks-ā′shius), *a.* Belonging to the *Buxaceæ*, or box family of plants.

buxinidine (buk-sin′i-din), *n.* [*Buxus* + *-in* + *-id* + *-ine*[2].] An amorphous alkaloid of uncertain composition, found in the green leaves of *Buxus sempervirens*.

buxum, *a.* A simplified spelling of *buxom*.

buyo (bō′yō), *n.* [Tagalog.] In the Philippine Islands the leaves of the betel-pepper (*Piper Betle*), which, together with the nuts of the betel-palm (*Areca Catheeu*) and a pinch of slaked lime, are used by the natives as a masticatory. Also called *itmo*. See *betel* and ★*bonga*.

Buys Ballot's law, system of weather-signals. See ★*law*[1], ★*signal*.

buz, *v.* and *n.* A simplified spelling of *buzz*.

buzz[1], *v.* **I.** *intrans.* **3.** To move hurriedly or with fuss; run; fuss about: as, to *buzz* along; to *buzz* about; to *buzz* against a person. [Prov. Eng.] **4.** To pick pockets. [Slang, Eng.] *Hotten.*

II. *trans.* **4.** To throw with violence. [Prov. Eng.)—**5.** To drink (a bottle) till it is empty. [Prov. Eng.]

buzz[1], *n.* **4.** In *angling*, a beetle or its artificial imitation used as bait.

buzz[4] (buz), *n.* [Assumed sing. of **buzzes*, dial. pronunciation of **burses*, double pl. of *bur*[1]. Compare dial. *fur* and *fuzz* for *furze*.] A bur; prickly calyx. [Prov. Eng.]

buzz[5] (buz), *a.* [Also *buz:* a vague use of *buzz*[1], *v.*, in composition, implying something large, as in ★*buzz-wig* (q. v.), but sometimes written detached, as an adjective.] **1.** See ★*buzz-wig*.—**2.** Of an artificial fly, having the hackle wrapped closely under the wings.

A fly is said to be *buz* when the hackle is wrapped on thick and it looks bushy, as we Americans would term it.
T. Norris, Sportsman's Gazetteer, p. 599.

buzz-cove (buz′kōv), *n.* A pickpocket. [Thieves' cant.]

buzzer, *n.* **4.** A pickpocket. [Thieves' cant.]

buzz-fly (buz′flī), *n.* A yellow Australian sarcophagid fly.

buzzing (buz′ing), *n.* **1.** The act or sound of anything that buzzes; humming.—**2.** The picking of pockets. [Slang, Eng.]

Buzzing is the name given to the crime. A gang of thieves surround a man and while one robs him the rest maintain a *buzzing* noise.
Standard (England), May 23, 1904.

buzz-planer (buz′plā″nėr), *n.* A machine for smoothing or planing wood. It consists simply of a table and a revolving head which carries two or four knives. The head or spindle makes about 3,500 revolutions per minute, and the wood is passed over it. One part of the table can be raised or lowered to get the depth of cut desired.

buzz-wig (buz′wig), *n.* [*buzz*[1], used vaguely to imply something large or imposing (cf. *humming*, *whopping*, etc.), + *wig*[3].] **1.** A large wig. [Colloq. or slang.]

The reverend gentleman was equipped in a *buzz wig*.
Scott, Antiquary, xvii.

2. A person wearing a buzz-wig; hence, a bigwig.

Whom the old Spanish *buzzwigs* doated on.
De Quincey, Works, III. 69.

B. V. M. An abbreviation of *Blessed Virgin Mary*.

B. W. G. An abbreviation of *Birmingham wire-gage*.

by[1], **bye**[1], *n.*—**To draw a by,** to go up into the next round without play.

by-act (bī′akt), *n.* An act that is secondary or incidental to a main act.

by-alley (bī′al″i), *n.* An alley at the side or somewhat out of the way.

by-bill (bī′bil), *n.* An incidental bill, or a bill for incidentals; a casual item.

by-blow, *n.* **3†.** A calamity or disaster out of the common.—**4†.** A blow that misses its aim. *Bunyan*, Pilg. Prog., II. 103.

by-ceremony (bī′ser″ē-mō-ni), *n.* A secondary or incidental ceremony; a ceremony that has its origin in an afterthought or is suggested or rendered necessary by some incidental circumstance.

by-chamber (bī′chām″bėr), *n.* A chamber; a secluded chamber.

by-channel (bī′chan″el), *n.* A side-channel or -stream apart from the main channel: as, a network of *by-channels*.

by-chapel (bī′chap″el), *n.* A chapel subordinate to the principal church.

by-day (bī′dā), *n.* A leisure day; an off day.

by-effect (bī′e-fekt″), *n.* A secondary or unintended effect.

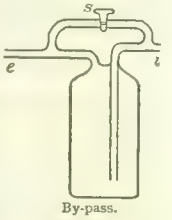
byerite (bī′ē-rīt), *n.* [Named in honor of W. N. *Byers*.] A caking bituminous coal resembling albertite and torbanite: first found in Colorado.

by-form (bī′fôrm), *n.* A collateral or minor form.

The English masque is a *by-form* of the English drama which flourished between the years 1597 and 1658, and is absolutely definite in its nature and characteristics.
Science, May 26, 1905, p. 802.

bygon, *a.* and *n.* A simplified spelling of *bygone*.

by-hint (bī′hint), *n.* An indirect hint; a side-hint.



by-letter (bī′let″ėr), *n.* In the early history of the postal service of England, a letter forwarded by a local postmaster 'to any place but London or beyond.'

The *by-letters* occasioned uneasiness to Whitley [deputy postmaster-general 1672–77] because he was entirely in the hands of the postmasters for the accounting of them.
Hyde, The Post in Grant and Farm, p. 315.

by-note (bī′nōt), *n.* In *music*, either a grace-note or an overtone.

byon (bī′on), *n.* A name given by the natives of Upper Burma to a clay which there contains rubies and other gems. The byon is supposed to result from the decomposition of a marble which has been affected by contact-metamorphism.

by-pass, *n.* **2.** In wash-bottles and similar apparatus for the handling of gases, a tube with a stop-cock connecting the ingress and egress tubes, so that by opening the stop-cock the gas may pass without flowing through the apparatus itself.—**3.** Any passage for conducting around an obstruction, such as a closed valve, a part of the fluid or material which goes through the main channel. A by-pass is frequently placed on large steam- or water-valves to relieve the pressure on the valve so that it can be opened and closed easily. Also *bye-pass*.

By-pass.
i, ingress tube; *e*, egress tube; *s*, stop-cock.

by-pass, *v. t.* **2.** To permit (a liquid) to flow through an auxiliary channel, around a valve or a cylinder or back into a reservoir, instead of pursuing the usual or direct course through the main or normal channel.

by-pit (bī′pit), *n.* In *coal-mining*, a shaft nearer the outcrop than the hoisting-shaft; an air-shaft.

by-production (bī′prō-duk″shọn), *n.* Same as *by-product*.

by-regard (bī′rē-gärd″), *n.* A side-look or -glance; a mere glimpse.

Byronian (bī-rō′ni-an), *a.* and *n.* **I.** *a.* Of or pertaining to Byron, the poet; resembling Byron.

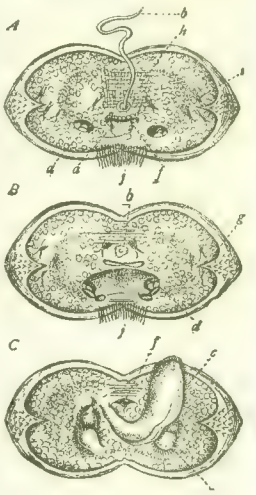
II. *n.* An admirer or imitator of Byron: as, the French *Byronians*.

Byronical (bī-ron′i-kạl), *a.* Same as *Byronic*.

Byronize (bī′rọn-īz), *v.*; pret. and pp. *Byronized*, ppr. *Byronizing*. **I.** *trans.* To invest with the characteristics of Byron.

Let others prepare their parchment-bound portfolios, throw their visages into the *penseroso*, fling their curls back from their brows, unbutton their shirt-collars, and, thus *Byronised*, begin. *Blackwood's Magazine*, LXI. 430.

II. *intrans.* To imitate Byron in person, habits, or style.



Indeed, under any circumstances, his [Kirke White's] gentleness and devoutness would have *Byronized* but ill.
Edinburgh Review, LXII. 299.

byrsoid (bėr′soid), *n.* [Gr. *βύρσα*, a skin (> L. *bursa*, a skin bag, a purse: see *bursa*, *burse*, *purse*), + *εἶδος*, form.] In *anthrop.*, a cranium the norma verticalis of which shows an elongated, rounded form, narrow in front but with wide forehead, widest near the occiput, similar in form to an elongated purse. *G. Sergi* (trans.), Var. of the Human Species, p. 37.

bysmalith (biz′mạ-lith), *n.* [Ignorantly formed as if from **bysma*, deep, depth, or bottom, wrongly assumed as the stem of *abysm*, + Gr. *λίθος*, stone.] In *geol.*, a large and rudely cylindric mass of igneous rock which has been driven upward through overlying strata as a punch goes through a sheet of metal.

byssinosis (bis-i-nō′sis), *n.* [NL., < *byssinus*, of cotton, + *-osis*.] A form of pneumonoconiosis due to the inhalation of cotton-fibers.

Byssus gland. See ★*gland*.—**Byssus silk,** mussel silk. It is made from the filamentous beard of a mussel inhabiting the Mediterranean, particularly near the Dalmatian and Italian coasts. The silk is golden brown in color, very soft and elastic, and is manufactured into small garments, purses, gloves, and fancy goods.—**Provisional byssus,** a thread secreted by a gland in the midventral region of the body of the *Glochidium* larva of fresh-water mussels (*Anodonta*, *Unio*).

Three Stages (*A*, *B*, *C*) in the Metamorphosis of *Anodonta*.
a, enteric canal; *b*, provisional byssus; *c*, foot; *d*, lateral pits; *e*, rudiments of gills; *f*, mouth; *g*, shell; *h*, adductor muscle; *i*, sense organs; *j*, cilia. (Drawn from Parker and Haswell's "Zoology," after Korschelt and Heider.)

by-start (bī′stärt), *n.* A deviation from the right direction.

by-station (bī′stā″shọn), *n.* A way-station.

by-step (bī′step), *n.* A step to one side or in the wrong direction.

bythium (bith′i-um), *n.* [NL., < Gr. *βυθός*, depth.] A supposed new element, said to have been obtained from sulphur by electrolysis. The alleged facts in regard to it have been completely disproved.

by-touch (bī′tuch), *n.* An incidental or unintended touch or stroke.

by-work (bī′wėrk), *n.* **1.** Work done at odd times or in addition to one's regular work; an occasional task or performance.

To make Religion the great business and concern of their Lives, and not as most do a *By-work*.
Norris, Chr. Prud., p. 385.

2†. A work that has failed in the doing; a work that has proved a failure.

Aristotle thinketh that the female is a *by-work*.
Crooke, Body of Man, p. 271.

Byzantine Greek, Greek of Byzantium, especially of the later Byzantine empire; practically, medieval Greek.

Byzantinesque (bi-zan-ti-nesk′), *a.* In the Byzantine style.

Byzantinize (bi-zan′tin-īz), *v. t.*; pret. and pp. *Byzantinized*, ppr. *Byzantinizing*. To render Byzantine; impart a Byzantine character to; affect or influence by Byzantinism.

C 3. (*a*) (4) The tone given by such a key, or a tone in unison with such a tone. What is called *middle C* has (at French pitch) about 259 vibrations per second. (5) The staff-degree assigned to such a key or tone: as, with the treble clef, the third space or the first added line below. (6) A note placed on such a degree and indicating such a key or tone. (7) The key-note of the major key of no sharps or flats (C major), or of the minor key of three flats (C minor); also, in medieval music, the final of the Ionian and Hypoionian modes. (8) In the fixed system of solmization, the first tone of the scale, technically called either *ut* or *do*: hence, *C* is called *ut* absolutely by French, Italian, and Spanish musicians. (*c*) In *elect.*: (1) The symbol for electrostatic capacity. (2) An abbreviation of *current*.

4. An abbreviation of *Court* and [*l. c.*] of *centimeter*.—**C clef.** See *clef*.—**White C,** an American nymphalid butterfly, *Polygonia faunus*, common in the northern United States and Canada. Its larvæ feed on the alder, willow, black birch, currant, and gooseberry. Also known as the *green comma*.

C. A. An abbreviation (*a*) of *Court of Appeal*; (*b*) of *Court of Arches*; (*c*) of *Chancery Appeals*; (*d*) of *commercial agent*; (*e*) of *Confederate army*; (*f*) of *county alderman*.

ca. An abbreviation (*b*) of *cases*; (*c*) of *centare*.

caable (kä-ä′bl), *n.* [OF. *caable, chaable*, a ballista, also throwing down, prostration, = Pr. OSp. *calabre* (ML. reflex *cadabula*, **cadabulus, cabulus*), ‹ ML. **catabola* (recorded as *catabolum*, payment), ‹ Gr. καταβολή, a throwing down, paying down, etc.: see *catabolism*.] In medieval (French) use, a ballista or catapult.

caapeba (kä-ä-pā′bä), *n.* [Tupi.] 1. Either of two plants, *Heckeria peltata* and *H. umbellata*, of the pepper family, natives of South America and the Antilles. Their aromatic roots are used medicinally, and their edible berries yield an oil resembling anise-oil.—2. Same as *pareira*.

caatinga (kä-ä-tēn′gä), *n.* [Also *catinga*; ‹ Tupi *caatinga*, 'white leaf,' 'light (that is, open, leafless) forest': *caa*, leaf, plant, tree, etc.] A type of sparse, stunted woodland occupying extensive tracts, alternating with savanna, in the dry region of eastern and central Brazil. The vegetation consists of thorny bushes (chiefly *Mimosaceæ*), with some low trees of several families, including different bottle or barrel-trees (see ★*bottle-tree*, 2) and columnar *Cactaceæ*, with prickly *Bromeliaceæ* (herbaceous). During the dry season all is nearly or quite leafless and as if dead, but with the advent of rain it bursts into leaf and flower. Phytogeographically this belongs to the category of *bush-wood*. Also (by translation), *light forest*.

cab[6] (kab), *n.* [Short for *cabbage*[3], *n.*] A translation (usually literal) of a classical or other work in a foreign language, surreptitiously used by school-boys and students in preparing their lessons or recitations; a crib. [Eng. school slang.]

cab[6] (kab), *v. t.* [Short for *cabbage*[3], *v.*] To appropriate dishonestly and on the sly; crib; purloin. [Eng. school slang.]

caba[2] (kä′bä), *n.* [Philippine Sp.] In the Philippine Islands, a measure of capacity equal to about one and one third United States bushels.

cabalic (ka-bal′ik), *a.* [Also *cabbalic, cabbalick*, ‹ ML. *cabbalicus*, ‹ *cabbala*, cabala.] Same as *cabalistic*.

caballada (kä-bäl-yä′dä), *n.* [Sp., a stud of horses, ‹ *caballo*, a horse.] A reserve stud or 'mob' of horses from which remounts may be drawn by cavalry or any mounted expedition while on the march. [Spanish America.]

caballerote (kä-bäl-ye-rō′tā), *n.* [Cuban use of Sp. *caballerote*, a gentleman (colloq. one of unpolished appearance), aug. of *caballero*, a gentleman: see *cavalier*.] A Cuban name of a food-fish called *gray snapper*, *Lutianus griseus*.

cabal-system (ka-bal′sis″tem), *n.* A mnemonic system by which one remembers a vocable whose letters (or all except certain vowels) are the initials of the words to be remembered. The name alludes to the fancy mentioned under *cabal*[1], 4.

Cabbage, gall-weevil, leaf-miner, Pionea, web-worm. See ★*gall-weevil*, etc.

cabbage[1], *n.*—**Kerguelen cabbage,** the cabbage-like *Pringlea antiscorbutica*. See *Pringlea*.—**Native cabbage,** in Australia, the yellow-flowered marsh-cress, *Roripa palustris*.—**Savoy cabbage.** Same as *savoy*.

cabbage[3], *v. t.* or *i.* 2. To crib or appropriate dishonestly; use surreptitiously; cab. [School-boy slang.]

cabbage[3], *n.* 2. A cab or crib, used surreptitiously by a school-boy in preparing his lessons or writing his exercises.

cabbage-aphis (kab′āj-ā″fis), *n.* Same as *cabbage* ★*plant-louse*.

cabbage-bark (kab′āj-bärk), *n.* See ★*bark*[2].

cabbage-beetle (kab′āj-bē″tl), *n.* Same as *cabbage-flea*.

cabbage-butterfly, *n.*—**Large cabbage-butterfly,** an American pierid butterfly, *Pontia monuste*, white in color, and of tropical and subtropical distribution. Its larvæ feed on cabbage, lettuce, and turnip.

cabbage-curculio (kab′āj-kėr-kū″li-ō), *n.* A curculionid beetle, *Ceuthorhynchus rapæ*, common to Europe and North America. It bores into the crown and roots of young cabbage- and cauliflower-plants, and attacks the stems of kale and mustard.

cabbage-head (kab′āj-hed), *n.* 1. The mass of crowded and incurved leaves which form the edible part of the cabbage.—2. Figuratively, a brainless fellow; a blockhead. *N. E. D.*

cabbage-looper (kab′āj-lö″pėr), *n.* The larva of a noctuid moth, *Autographa brassicæ*, common in the United States where it feeds on cabbage and other cruciferous plants.

cabbage-louse (kab′āj-lous), *n.* Same as *cabbage* ★*plant-louse*.

cabbage-oil, *n.*—**Chinese cabbage-oil,** oil expressed from the seeds of *Brassica sinensis*.

cabbage-patch (kab′āj-pach), *n.* A patch of ground where cabbages are grown.

> The Wiggses lived in the *Cabbage Patch*. It was not a real *cabbage patch*, but a queer neighborhood, where ramshackle cottages played hop-scotch over the railroad tracks.
>
> *A. C. Hegan*, Mrs. Wiggs of the Cabbage Patch, p. 4.

cabbage-red (kab′āj-red), *n.* The coloring-matter of red cabbage. See ★*cauline*.

Cabbage-root maggot. See ★*maggot*.

cabbage-thrips (kab′āj-thrips), *n.* Any one of several species of thrips found on cabbage-leaves: usually, and most abundantly, *Thrips tritici*.

Cabbage-tree hat, a large, low hat made of the leaves of the cabbage-tree. [Australia.]

cabbage-worm, *n.*—**Cross-striped cabbage-worm,** the larva of an American pyralid moth, *Evergestis rimosalis*.—**Southern cabbage-worm,** the larva of an American pierid butterfly, *Pontia protodice*.

cabbagy (kab′āj-i), *a.* [*cabbage*[1] + *-y*[1].] Cabbage-like: as, a *cabbagy* green.

cabbalism, *n.* Another spelling of *cabalism*.

cabber (kab′ėr), *n.* 1. A cab-horse, or a horse well suited for use as a cab-horse.—2. One much given to riding in cabs.

cabbing (kab′ing), *n.* The business of owning, letting, or driving cabs. *N. E. D.*

cab-bit (kab′bit), *n.* A French bit, the cheeks of which are made up of a series of rings solid upon one side.

cabcaban (käb-kä′bän), *n.* [Bisaya *cabcában*.] An epiphytal fern, *Drynaria quercifolia*. See ★*pakpak-lauin*.

cabecera (kä-bā-thā′rä), *n.* [Sp., ‹ *cabeza*, a head, chief.] In the Philippine Islands, a provincial capital.

cabeceria (kä-bā-thā-rē′ä), *n.* [Sp. *cabeceria*, ‹ *cabecera*: see *cabecera*.] In the Philippine Islands, the taxpaying population of a barangay; also, a barangay.

cabestro (ka-bes′trō), *n.* [Sp., a halter, etc., ‹ L. *capistrum*, a halter: see *capistrum*.] A hair lariat.

cabeza (kä-bā′thä), *n.* [Sp., = Pg. *cabeça*, head, chief: see *cabeca*.] In the Philippine Islands, a chief.

cabezon, *n.* 2. *Larimus breviceps*, a sciænoid fish of the West Indies.

cabezote (kä-bä-thō′tā), *n.* [Sp. *cabezota*, a big-headed person, ‹ *cabeza*, head.] The broad-head silverside, *Atherina stipes*. [Cuba.]

cabildo (ka-bil′dō), *n.* [Sp., ‹ L. *capitulum*, chapter: see *chapter*.] The chapter-house of a cathedral or collegiate church. [Southern U. S., etc.]

> The cathedral, and standing beside it, like Sancho beside Don Quixote, the squat hall of the *cabildo* with the calabozo in the rear.
>
> *G. W. Cable*, The Grandissimes, p. 320.

cabin, *n.* 5. In *mining*, a small room partitioned off inside the mine for the use of the mine officials.

Cabinet finish, finish with delicate joinery, as in hard wood finely polished or varnished.—**Cabinet picture,** in *photog.*, a small and generally highly finished picture about 4½ by 6½ inches in size.

cabinet-beetle (kab′i-net-bē″tl), *n.* Any one of several species of injurious beetles of the family *Dermestidæ*, as *Dermestes cadaverinus*, *Anthrenus varius*, or *Anthrenus museorum*, which infest cabinets of natural history.

cabinet-maker, *n.* 2. One who busies himself unauthorizedly with constructing a governmental cabinet; a politician or busybody who speculates on or needlessly troubles himself with the selection of cabinet ministers and the formation of a cabinet.

cabinet-making (kab′i-net-mā″king), *n.* 1. The occupation of a cabinet-maker; the making of fine furniture and the like.—2. The selection of cabinet ministers; the formation of a political cabinet.

cabinet-work (kab′i-net-wėrk), *n.* Fine woodwork used in cabinet-making: thus, veneered doors or polished paneled dados, mantelpieces, and the like are spoken of as fine cabinet-work.

Cabiria (ka-bi′ri-ä), *n. pl.* [NL., also *Cabeiria*, ‹ Gr. Καβειρία, neut. pl., ‹ Κάβειροι, Cabiri.] In *Gr. antiq.*, mysteries connected with the cult of the Cabiri, or Pelasgic gods of the Ægean Sea. Their chief seat was Samothrace.

Cabirion (ka-bir′i-on), *n.* [Gr. Καβείριον, ‹ Κάβειροι, Cabiri.] In *Gr. antiq.*, a temple or shrine sacred to the Cabiri. The most important was that near Thebes in Bœotia, which was excavated in 1888, yielding vases and terra-cottas.

Cabirops (ka-bī′rops), *n.* [NL.; formation not certain; appar. ‹ Gr. Κάβειροι, Cabiri, + ὤψ, eye, face.] The typical genus of the family *Cabiropsidæ*. *Kossmann*, 1884.

Cabiropsidæ (kab-i-rop′si-dē), *n. pl.* [NL., irreg. for **Cabiropidæ*, ‹ *Cabirops* (*Cabirop-*) + *-idæ*.] A family of parasitic isopod crustaceans typified by the genus *Cabirops*.

cable, *n.* 4. A long, narrow strip of land. [Prov. Eng.]—5. A cablegram; a cable message: as, a *cable* announcing their departure has just been received.—6. An abbreviation of *cable-car*: as, to take the *cable* up-town.—**Concentric cable,** in *elect.*, a cable containing two or more conductors, of which the inner one is a wire and the others are concentric tubes surrounding the inner wire and insulated therefrom and from the outer armor.—**Pupin cable,** in *elect.*, a cable the telegraphic or telephonic transmission of which is enhanced by the insertion of inductance at stated intervals.—**Telodynamic cable,** a transmission-rope; an endless rope used as a belt for the transmission of power.—**Ten cables,** an English nautical measure, equal to 1,000 nautical fathoms, or 6,080.3 feet; a nautical mile.—**Three-wire cable,** in *elect.*, a cable consisting of three insulated conductors, for use in three-wire or three-phase circuits.

cable, *v. t.* 4. To make into a cable; specifically, to twist two threads together and then to twist three of these doubled threads into one, as in the manufacture of sewing-thread.

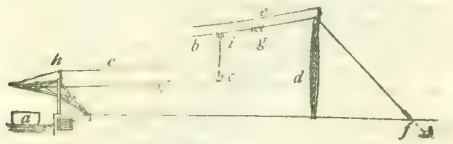
cable-bell (kā′bl-bel), *n.* In *elect.*, a bell-shaped enlargement at the end of the cable armor, filled with an insulating compound.

cable-box (kā′bl-boks), *n.* A box or fixture in which the ends of an electric cable are fastened.

cable-buoy (kā′bl-boi), *n.* A small buoy which rests upon the surface of the water over the anchor, to the ring of which it is secured by a

length of line. The position of the buoy betrays the resting-place of the anchor, over which it is also left as a sentinel in case it becomes necessary to slip the cable.

cabled, *a.* 3. In *her.*, formed of a cable: applied to a cross formed of the two ends of a ship's cable.

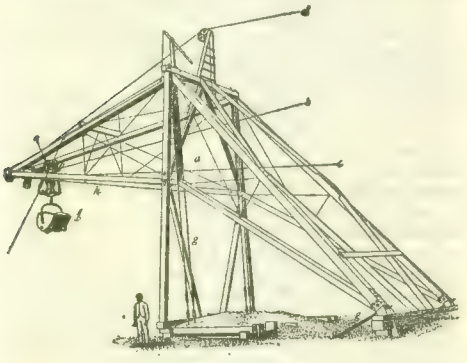


cable-grip (kā′bl-grip), *n.* A clutch or jaw attached to a car for the purpose of gripping the moving cable by which the car is propelled.

cable-hanger (kā′bl-hang″ėr), *n.* A person who unlawfully dredges for oysters. [Colloq., Eng.]

cable-rope (kā′bl-rōp), *n.* A cable; a cable-laid rope.

cable-tank (kā′bl-tangk), *n.* A strong, water-tight tank placed on a cable-ship and provided for holding a coiled section of cable that is ready for laying. *Houston*, Dict. Elect.



cableway, *n.* In general, any conveying apparatus in which the load is carried in a bucket

Cableway.

a, barge from which coal is hoisted up to cable; *b*, fixed cable on which trolley supporting hoisting-bucket travels; *c*, bucket suspended from trolley; *d*, tower supporting cable; *e*, small return cable hauling trolley (drawing-cable not shown); *f*, anchorage; *g*, supports for drawing cable; *h*, combined tower and crane; *i*, trolley.

or carrier traveling with or on a wire cable which is suspended between struts or towers. The most simple type is an endless cable which is supported by means of pulleys or sheaves, placed at the tops of two head towers, and is made to travel continuously in one direction or alternately forward and back between the towers. The material to be transported is placed in a bucket which is suspended under the cable and moves with it from one tower to the other. On reaching the tower the bucket may be removed or unloaded and is then carried by the cable back to the loading-tower. If the cable moves in one direction two or more buckets may be used by transferring the buckets when unloaded to the returning cable. Where the cableway descends a hillside, and the traffic is down grade, the weight of the loaded buckets may be used to operate the plant without the aid of a motor, the movement of the cable being controlled by a brake. In another type, largely used in the construction of docks, breakwaters, canals, subways, and reservoirs, a single cable is suspended between struts or towers and the bucket is suspended from a trolley having flanged wheels which travel on the cable, the trolley and its bucket being hauled in either direction by means of an endless wire rope passing through blocks at the tops of the towers and controlled by a winding engine. Two cables are also used with two haulage ropes, and, to prevent the sagging of the ropes, they are passed through carriers that travel on a separate cable. When the bucket is at the tower the rope-carriers are bunched near the tower, and when the bucket is drawn over, the carriers

Cableway Head-tower.

a, open tower at loading point of cableway; *b*, cable extending to unloading tower (not shown); *c*, hauling-cable; *d*, returning cable; *e*, trolley, with hoist; *f*, bucket with load; *g*, *g*, anchor rods; *h*, overhanging crane which brings bucket over car or boat.

are automatically distributed along the cable sustaining the ropes. The haulage-ropes are also passed through blocks on the trolley and can be used to raise or lower the buckets at any point of the cable. The cable may also be connected by overhead switches to run the buckets from the cable to the tracks of a telpherage system. The towers may be stationary, as in building a dam; or may be mounted upon trucks and moved along parallel tracks, as in digging canals; or one tower may be stationary and the other may travel upon a circular track. Self-filling buckets and automatic dumping-buckets are extensively used in handling sand, coal, etc. Cableways are also used in coaling war-ships at sea, the masts of the collier and the battle-ship acting as the towers of the cableway. The coal, in sacks, is hoisted to the cable, hauled to the ship, and lowered to the deck, while the war-ship tows the collier. Another type employs very long cables supported at intervals upon towers, with the hauling-rope resting on brackets that are placed at short distances apart or running over guide-rollers on the towers. This type is used for transporting large quantities of material over rough and mountainous countries, rivers, and valleys.

cab-master (kab′más″tėr), *n.* One who owns a cab or cabs; one who maintains a public cab-service.

cabochon, *n.*—**Double cabochon,** a gem which is domed, that is, convex on the upper and lower sides with a girdle-line separating the two.—**Single cabochon,** a stone which is cut with a flat or slightly rounded back and a convex top.

cabo-negro (kä-bō-nā′grō), *n.* [Sp.: *cabo*, rope (see *cable*) + *negro*, black (see *negro*).] A name, in the Philippines, of *Saguerus pinnatus*, a palm yielding a beautiful black, horsehair-like fiber which is very durable under water and is used for making cables for towing and ropes for the standing rigging of vessels. The name is also applied to the jaggery-palm, *Caryota urens*, which yields the kittul fiber of commerce. See *gomuti*, 2, *ejoo*, *medrinack*, and *kittul*, 2.

caboose, *n.* 3. An inclosed wagon for conveying workmen to mines. [Western U. S.]

Cabotian (ka-bō′ti-an), *a.* Of or pertaining to either or both of the navigators and explorers, John and Sebastian Cabot (father and son), who, in the fifteenth century, discovered the mainland of North America.

cab-phaëton (kab′fā″e-tọn), *n.* A combination of the cabriolet and the phaëton in which the driver's seat was placed at the rear. It was one of a class of vehicles originating in a fashion in vogue in the middle of the nineteenth century in accordance with which styles of carriages designed for two wheels were combined and suspended on four wheels, the cabriolet being used for the rear portion and the phaëton for the front of the body.

cab-rank (kab′rank), *n.* A row of cabs on a cab-stand.

cabrilla, *n.* (*d*) *Epinephelus maculosus*, an American grouper. (*e*) In Chile, the rockfish, *Sebastodes oculatus*. —**Cabrilla verde,** the green grouper of the genus *Paralabrax*, a bass-like fish of the Pacific coast.—**Spotted cabrilla,** *Paralabrax maculatofasciatus*, a bass-like fish of California.

cabriolet, *n.* 2. In furniture, a light arm-chair. Cabriolets are first mentioned in a French inventory of 1759.

cabriolet-phaëton (kab-ri-ọ-lā′ fā″e-tọn), *n.* A carriage similar to the ★cab-phaëton (which see), except that the driver's seat was placed at the front.

cab-runner (kab′run″ėr), *n.* A tout who, in expectation of a fee, calls cabs for travelers at a railway-station, steamboat-landing, and the like.

cab-signal (kab′sig″nal), *n.* In *railroading*, an adaptation of the automatic block-signaling system by which signal-lights are displayed in the cab of an engine. The electric rail-circuit, controlled by a train (as in the block-system), causes the proper signals to be displayed in the cab of the next following engine, the current following the rails and the wheels of the engine into the cab to the signal.

cabureiba (kä-bö-rā-ẹ̄-bä′), *n.* [Braz., < Guarani *cabure*, name of a bird, + *iba*, tree, fruit.] A tall leguminous tree, *Myrocarpus fastigiatus*, a native of southern Brazil and northern Argentina. It yields a fine cabinet-wood and a balsam resembling balsam of Peru. Also called *incienso*, the balsam having been used for incense.

cabuya (kä-bö′yä), *n.* [Sp., agave, < W. Ind. *cabuya*, a cord of vegetable fiber, as of the agave, etc.; Galibi *cabuyo*, a species of pine-apple.] 1. A species of agave, *Agave rigida*, which yields sisal hemp.—2. In Central America and the West Indies, the cajun, *Furcræa Cubensis*.

cacafuego (kä-kä-fö-ā′gō), *n.* [Sp., < *cagar*, < L. *cacare* (see *cack*), + *fuego*, fire. This was the name of a Spanish galleon taken by Drake in 1579.] A spit-fire; a bragging, vaporing fellow.

cacahuate (kä-kä-hwä′te), *n.* [Nah. *tlalcacahuatl*, earth-cacao, < *tlalli*, earth, + *cacahuatl*, cacao.] The name in Mexico and the Philippine Islands of the peanut, *Arachis hypogæa*.

cacanthrax (ka-kan′thraks), *n.* [NL., < Gr. *κακός*, bad, + *ἄνθραξ*, anthrax.] Malignant pustule.

cacao, *n.*—**Cacao-pod disease.** See ★*disease*.—**Crème de cacao.** See ★*crème*.

cacao-beetle (ka-kā′ō-bē″tl), *n.* A longicorn beetle, *Stirastoma depressum*, which attacks cacao-trees, boring into the trunks and branches. In some parts of the West Indies and Guiana it has been very destructive. Also *cocoa-beetle*.

cacao-disease (ka-kā′ō-di-zēz″), *n.* See ★*disease*.

cacao-powder (ka-kā′ō-pou″dėr), *n.* The product obtained after pressing out a portion

of the cacao-butter from roasted and shelled cacao-beans and pulverizing the resultant hard mass.

Cacara (ka-kā′rą), *n.* [NL. (Thouars, 1806, adopted from Rumph, 1747), < Malay *kakara*, name of the edible sim bean of India, *Dolichos Lablab*.] A genus of dicotyledonous plants of the family *Fabaceæ*. See *Pachyrhizus*.

cacesthesia (kak-es-thē′si-ą), *n.* [NL. *cacæsthesia*, < Gr. *κακός*, bad, + *αἴσθησις*, feeling.] Malaise.

cachectic, *a.* **II.** *n.* One who suffers from a cachexy.

cachet, *n.* 2. A distinguishing mark or stamp.

> All his works have a grand *cachet;* he never did anything mean. *Thackeray*, Paris Sketch Book, p. 61.

3. In *phar.*, a hollow wafer containing medicine in powder form. *Buck*, Med. Handbook, III. 1.

Cachexia thyreopriva. Same as *myxedema*.—**Cachexia virginum,** chlorosis.—**Cancerous cachexia,** a morbid condition marked by emaciation, weakness, etc., accompanying the growth of a malignant tumor.—**Malarial cachexia,** chronic malaria, marked by enlarged spleen, anemia, sallow complexion, and little or no fever. —**Saturnine cachexia,** chronic lead-poisoning, marked by anemia, the presence of a bluish line at the edge of the gums, obstinate constipation, often wrist-drop or paralysis of other parts, and arteriosclerosis.—**Splenic cachexia,** a state of malnutrition accompanying disease of the spleen.—**Strumous cachexia,** scrofula.—**Thyroid cachexia.** Same as *exophthalmic goiter* (which see, under *exophthalmic*).—**Venous cachexia.** Same as *venosity*, 3.—**Verminous cachexia,** constitutional symptoms (anemia, debility, etc.) accompanying the presence of intestinal parasites, especially of *Ankylostoma*.

cachexy, *n.* 2. A perverted or depraved habit of thought or feeling.

cachil (kä-chēl′), *n.* [Philippine Sp., prob. ult. < Malay *kechil*, little, small. Cf. *cachila*, applied by the natives to the Spaniards.] A prince of the reigning house in the Mohammedan parts of western Mindanao. [Philippine Is.]

cachimilla (kach-i-mēl′yą), *n.* [Mex. Sp.] A west American composite shrub, *Pluchea sericea*, called *arrow-wood* by travelers because it is used by the Indians in making arrows. It ranges from western Texas to California and northern Mexico. Also called *arrow-weed*.

cachinnate (kak′i-nāt), *v. i.*; pret. and pp *cachinnated*, ppr. *cachinnating*. [L. *cachinnare*, laugh: see *cachinnation*.] To indulge in loud, continued laughter; to laugh immoderately. *De Quincey*.

cachinnator (kak′i-nā-tọr), *n.* [NL. ★*cachinnator*, < L. *cachinnare*, laugh.] One who cachinnates; one who indulges in loud or immoderate laughter.

cachou de Laval (ka-shö′ dẹ la-väl′). [F., 'Laval's cachou.'] An artificial dyestuff, first prepared in 1873 by fusing various vegetable and animal products, such as sawdust, bran, blood, and horn, with sodium sulphid. It dyes unmordanted cotton brown in a salt bath, and the color is fixed by an after treatment in a warm solution of some acid, as sulphuric, or a metallic salt, as copper sulphate or potassium bichromate. Various shades of a fast brown are produced, depending in character upon the after treatment. It is of interest as being the first of that important class of dyestuffs known as the sulphid colors.

cachucho (kä-chö′chō), *n.* [Sp. *cachucho*, an earthen pot, a cartridge, etc.] A Cuban name for a food-fish, *Etelis oculatus*, of the family *Lutianidæ*, remarkable for its brilliant red color.

caciqueship (ka-sēk′ship), *n.* The position of a cacique or chief.

cack[1], *v.* **II.** † *trans.* To void, as excrement.

cackle[2] (kak′l), *v. t.* *Naut.*, to wind right and left alternately: as, to *cackle* a cable.

cacochylous (kak-ọ-kī′lus), *a.* [Gr. *κακός*, bad, + *χυλός*, juice, chyle.] Relating to or affected with cacochylia; indigestible.

cacochymic, *a.* 2. Dyspeptic.

cacochymical (kak-ọ-kim′i-kal), *a.* Same as *cacochymic*.

cacochymious† (kak-ọ-kim′i-us), *a.* Same as *cacochymic*.

cacochymy (ka-kok′i-mi), *n.* Same as *cachochymia*.

cacodemonia (kak″ọ-dẹ-mō′ni-ą), *n.* [NL., *cacodæmonia*, < Gr. *κακοδαιμονία*, < *κακοδαίμων*, possessed by an evil spirit: see *cacodemon*.] 1. Possession by an evil spirit: possibly originally an alteration of personality.—2. The delusion that one is possessed by an evil spirit.

cacodemoniac (kak-ọ-dẹ-mō′ni-ak), *n.* One possessed by an evil spirit. *N. E. D.*

cacodemonic (kak-ọ-dẹ-mō′nik), *a.* [Gr. *κακοδαιμονικός*, bringing evil fortune, < *κακοδαίμων*, possessed by an evil spirit: see *cacodemon*.] Of or pertaining to a cacodemon.

cacodemonomania (kak″ō-dē-mo-nō-mā′ni-ą), *n.* Same as ★*cacodemonia*.

cacodorous (kak-ō′dọr-us), *a.* [Gr. *κακός*, bad, + L. *odor*, odor, + *-ous*.] Ill-smelling; malodorous.

He paid his shilling at the hideous door of the Alhambra, made his way through a *cacodorous* crowd to the supper-room, and ordered some grilled oysters.
Mortimer Collins, Marq. and Merch. xxii.

cacodoxian (kak-ō-dok′si-ąn), *a.* Same as *cacodoxical*.

cacodyl, *n.*—**Cyanide of cacodyl,** a compound of cyanogen and cacodyl: an extremely poisonous substance, more powerful in its action than prussic acid.

cacodylate (kak-ō-dil′āt), *n.* [*cacodyl(ic)* + *-ate*[1].] A salt of cacodylic (dimethyl arsenic) acid.

Cacodylic acid. This remarkable compound of arsenic is now used, or its salts are used, in medicine, much larger doses than of the ordinary arsenical preparations being prescribed without poisonous effects.

cacoëpistic (kak-ō-e-pis′tik), *a.* [*cacoep-y* + *-ist* + *-ic*.] Characterized by cacoëpy or erroneous pronunciation; mispronounced.

This is a very . . . complex subject which . . . requires entirely new treatment in reference to . . . those abnormal, *cacoepistic*, rare, vulgar, and dialectic forms.
A. J. Ellis, Early Eng. Pron., I. 224.

cacofony, *n.* A simplified spelling of *cacophony*.

cacogalactic (kak-ō-ga-lak′tik), *a.* [*cacogalactia* + *-ic*.] Characterized by cacogalactia or a bad condition of the milk.

cacogenesis, *n.* **2.** The quality, common in mixed breeds, of having a low vitality and of being infertile.

cacografy, *n.* A simplified spelling of *cacography*.

cacographer (ka-kog′ra-fėr), *n.* A bad writer or a bad speller.

cacomagician (kak″ō-mā-jish′an), *n.* [Gr. *κακός*, bad, + E. *magician*.] One who is skilled in the black art; a magician in league with the devil.

The great adversary of Fludd . . who denounced the Rosacrusian to Europe as a *caco-magician*.
I. D'Israeli, Amenities of Lit., II. 281.

cacophonize (ka-kof′ō-nīz), *v. t.*; pret. and pp. *cacophonized*, ppr. *cacophonizing*. [*cacophon-y* + *-ize*.] To render cacophonous or ill-sounding.

cacorhythmic (kak-ō-rith′mik), *a.* [Gr. *κακός*, bad, + *ῥυθμός*, rhythm, *rhythm-y* + *-ic*.] Ill-modulated; characterized by irregularity of rhythm; in bad rhythm: as, a *cacorhythmic* production; a *cacorhythmic* pulse.

cacothanasia (kak″ō-thą-nā′si-ą), *n.* [NL., < Gr. *κακοθανασία*, < *κακός*, bad, + *θάνατος*, death.] A painful or distressing death.

Cacotopia (kak-ō-tō′pi-ą), *n.* [NL., < Gr. *κακός*, bad, + *τόπος*, place; formed in contrast to *Utopia*, prop. 'no place,' but understood and formerly often written as *Eutopia*, 'a place where all is well.'] An imagined place where government is of the worst; the opposite, in the character of its political institutions, of the ideal commonwealth which Sir Thomas More (1516) placed on his imaginary island Utopia ('No-where'). See *Utopia*. [A nonce-word used by Bentham.]

cacotrophia (kak-ō-trof′i-ą), *n.* [NL., < Gr. *κακοτροφία*, < *κακός*, bad, + *τροφή*, nourishment.] Defective nutrition.

cacotrophy (ka-kot′rō-fi), *n.* [NL. *cacotrophia*.] Same as ★*cacotrophia*.

cacotype (kak′ō-tīp), *n.* [Gr. *κακός*, bad, + *τύπος*, type.] A bad type or imperfect reproduction.

How tame my *cacotype* of these words compared with what they were! *C. Reade*, Peg Woffington, p. 54.

Cactales (kak-tā′lēz), *n. pl.* [NL. (Lindley, 1847), < *Cactus* + *-ales*.] An order of dicotyledonous plants containing the family *Cactaceæ* only.

cactoid (kak′toid), *a.* [*cactus* + *-oid*.] Having the aspect of a cactaceous plant: said, for example, of fleshy euphorbias. *Hooker and Ball*, Marocco, p. 328.

Cactus ladybird. See ★*ladybird*.—**Prickly-pear cactus.** Same as *prickly-pear*.—**Russian cactus.** Same as *Russian* ★*thistle*.—**Yucca cactus,** the Joshua-tree, *Yucca arborescens*. See *Yucca*.

cacuminal, *a.* **2.** In *anat.*, relating to the cacumen or upper surface of the vermis of the brain.

cacuminous (ka-kū′mi-nus), *a.* [*cacumen* (*-min-*) + *-ous*.] Having a conical or pointed top.

cad[1], *n.* **1.** (*g*) A young fellow of the town or vicinage who hangs about a college or university and does chance services for the collegians. [Eng.]

cad[2] (kad), *n.* [Appar. a capricious use ('native cads') of *cad*[1]. Not a reduction of *cicada* as pronounced si-cad′ą.] A name in Queensland for the cicada.

From the trees sounds the shrill chirp of large green cicada (native *cads*, as the bushmen call them).
Australasian, Jan. 11, 1896, quoted by *E. E. Morris*, [Austral English.

Cadaveric or **putrefactive alkaloid.** See ★*alkaloid*.

cadaverin (ka-dav′ėr-in), *n.* [Also *cadaverine; cadaver* + *-in*[2].] A ptomaïne first found in decomposing cadavers: a product of bacterial action in most instances, but sometimes formed in the body in the absence of microbes in cases of cystinuria. It is a derivative of lysin, and is known as pentamethylene-diamine ($CH_2(NH_2)(CH_2)_4(NH_2)$).

cadaverize (ka-dav′ėr-īz), *v. t.*; pret. and pp. *cadaverized*, ppr. *cadaverizing*. [*cadaver* + *-ize*.] To make cadaverous or corpse-like.

To effect a temporary suspension of the circulation, and *cadaverise* his countenance.
Fraser's Mag., April, 1841, p. 421.

cad-bit (kad′bit), *n.* Same as *cad-bait*.

cad-bote (kad′bōt), *n.* The caddis-worm. [Prov. Eng.]

cad-catcher (kad′kach-ėr), *n.* A picture intended to 'catch' or attract 'cads' or undiscriminating persons. [Artists' cant.]

caddie[2] (kad′i), *n.* An Australian bushman's name for a slouch hat, usually worn with the brim turned down at the back.

caddie-bag (kad′i-bag), *n.* A bag, about three feet long, usually made of leather or canvas, for carrying golf-clubs.

caddow[2] (kad′ō), *n.* [Also *caddo, caddoe, cadow*; cf. *caddis*[1].] A woolen garment or covering of a rough or coarse texture.

caddy[4], *n.* **4.** A tin can with a lid, for holding water, etc. [U. S.]—**5.** In the tobacco trade, a box 6 to 8 inches square, holding from 10 to 20 pounds. *Stand. Dict.*

cade[2] (kād), *v. t.*; pret. and pp. *caded*, ppr. *cading*. To put into a cade or keg; pack in a cade: as, to *cade* herring. *Nash*.

cadeau (kä-dō′), *n.*: pl. *cadeaux* (dō ′). [F.] A present or gift; a gratuity; a cumshaw.

cadence, *n.* **9.** The modulation or manner of utterance peculiar to a particular locality or language.

I returned an answer in that language, hoping at least that the *cadence* might be more agreeable to his ears.
Swift, Gulliver, III. ii.

10. In *music*, a trill-like ornament, the reverse of the *battement* (which see).—**Immediate cadence,** in *music*, a cadence that is not prolonged or extended; one in which the dominant or subdominant chord passes at once into that of the tonic.—**Inverted cadence,** in *music*, a cadence in which the penultimate chord is inverted.

cadenced (kā′dęnst), *p. a.* Measured; rhythmical; regular; expressed or executed with measured regularity: as, a *cadenced* step; *cadenced* sound; "the *cadenced* surges of an unseen ocean," *Lowell*.

cadent, *a.* **II.** *n.* In *old music*, a grace or embellishment consisting of an after-note one degree below the principal note: as,

cadential (kā-den′shal), *a.* [L. *cadentia*, cadence, + *-ial*.] Relating or pertaining to cadence, or a cadence.

cadet[1], *n.* **5.** A young man who, for the sake of the practical experience to be gained, works with the men on a sheep- or cattle-farm without pay. [Australia.]—**6.** A student in engineering or any of the applied sciences who, in completion of his course (or earlier), seeks practical experience by entering the service of some large establishment where the principles he has been studying are applied, and works there for little or no pay.—**7.** One who prostitutes a woman and lives on her earnings as a prostitute while cohabiting with her; also, one who seduces young women and sells them to houses of prostitution. [New York.]

The most degraded class that ever disgraced the name of man—the creatures who live upon the earnings of individual prostitutes, with whom they cohabit. They are called souteneurs in France, louis in Germany, *cadets* in New York, and by various slang names in Great Britain.
Encyc. Brit., XXXII. 32.

Cadet engineer. See ★*engineer*.

cadette (ka-det′), *n.* [F., fem. of *cadet*, cadet.] A younger daughter or sister; a female cadet. See *cadet*, 2.

cadging (kaj′ing), *n.* The occupation or practices of a cadger.

Cadie gum. See ★*gum*[2].

cadière (kä-dyār′), *n.* [South F. *cadière*, Prov. *cadeira*, < L. *cathedra*, chair: see *chair, chaise*.] A name given to a gold currency of Brittany and to a billon coinage struck under Charles VI. of France for Dauphiny, containing a figure seated on a chair. Compare *chaise*, *n.*, 3.

cadillo (kä-dēl′yō), *n.* [Sp. *cadillo*, a name of several plants bearing burs.] A name in Venezuela of the Cæsar-weed, *Urena lobata*. See ★*Cæsar-weed*, ★*guaxima*, and *Urena*.

cadjan (kaj′an), *n.* [Malay and Jav. *kājang*.] **1.** The matted cocoa-palm leaves used in southern India for thatch.—**2.** A section or strip of palm-leaf prepared for use as writing-material. The leaf generally used for this purpose is that of the palmyra-palm or the talipot (*Corypha umbraculifera*) of Ceylon. [Anglo-Indian in both uses.]

Cadjen (kaj′en), *a.* and *n.* [Also *Cajun*; from F. *l'Acadien*, taken as *Cadien* with the article *la, le*.] An Acadian; a descendant of the French Acadians. [Louisiana.]

cadju (kaj′ö), *n.* Same as *cashew*.

cadmic (kad′mik), *a.* [*cadmium* + *-ic*.] Pertaining to or containing cadmium: as, *cadmic* chlorid or sulphid.

Cadmium cell, a voltaic cell (invented by Weston) in which the metal cadmium is employed for the positive metal. It is extensively used as a standard of electromotive force.—**Cadmium ocher,** cadmium sulphid occurring as a deposit of earthy texture on the surface of other minerals.

Cadogan tea-pot. See ★*tea-pot*.

Cadorine (ka-dō′rin), *a.* Of or pertaining to Cadore (more fully Pieve-di-Cadore), in Northern Italy, the birthplace of the painter Titian.

Cæcal appendage. Same as *appendix vermiformis*.—**Cæcal pouches,** in *entom.*, the cæca of the mid-intestine.

cæciform (sē′si-fôrm), *a.* [NL. *cæcum* + L. *forma*, form.] Of the nature or having the form of a cæcum: as, *cæciform* appendages.

cæcocolic (sē-kō-kol′ik), *a.* Relating to the cæcum and the colon, the *cæcocolic valve* being the valve between the two.

cæcum, *n.*—**Cæca of the mid-intestine,** in *entom.*, a number of blind diverticula from the anterior end of the stomach, differing in shape and number. In the *Locustidæ* they are two in number and are large and short; in the *Blattidæ* there are 8 and in the *Acrididæ* 6. Certain *Diptera* have two long, slender cæca, while in the *Coleoptera* there are very numerous minute villi or tubules. They are probably pancreatic in function. *A. S. Packard*, Text-book of Entom., p. 300.—**Hepatic cæcum,** in *embryol.*, the outpouching or evagination from the embryonic intestine that gives rise to the liver.—**Pyloric cæca.** (*a*) and (*b*) See *pyloric*. (*c*) In starfishes, the bifurcated multilobular prolongations of the pyloric region of the stomach, the walls being glandular and secreting a digestive fluid.—**Siphonal cæcum,** in cephalopods, the blind end of the siphuncular tube.—**Spiral cæcum,** in cephalopods, the cæcal appendage, which in some species is arranged in a more or less spiral manner.

Cælum Sculptorium (sē′lum skulp-tō′ri-um). [NL., 'the sculptor's sky.'] The 'Graver,' a constellation introduced by Lacaille between Eridanus and Columba: not to be confounded with the Sculptor.

cænogenesis, cænogenetic, etc. Same as *kenogenesis, kenogenetic*, etc.

Cænolestes (sē-nō-les′tēz), *n.* [NL., < Gr. *καινός*, recent, + *λῃστής*, robber.] A genus of small diprotodont marsupials, belonging to the family *Epanorthidæ*, having a shrew-like form and long skull. The genus is remarkable from the fact that two species are found living in the highlands of Ecuador and Colombia, while others are found fossil in the Miocene of Patagonia. The genus was first named *Hyracodon*, but this was originally applied to a genus of ungulates and is hence untenable.

Cænopithecus (sē″nō-pi-thē′kus), *n.* [NL., < Gr. *καινός*, recent, + *πίθηκος*, ape.] An extinct genus of lemurid monkeys from the Upper Eocene beds of Switzerland.

cænostylic (sē-nō-stil′ik), *a.* Relating to that condition of the visceral arches known as *cænostyly*.

cænostyly (sē-nos′ti-li), *n.* [Gr. *καινός*, recent, + *στῦλος*, a pillar.] That state or condition of the cephalic skeleton in which the first and second visceral arches do not bear gills, but are modified to serve in taking food and have one or more of their parts attached to the cranium. It occurs in amphibians, chimæras, and sharks. *W. K. Gregory*, 1904.

cænozoölogy, *n.* Same as ★*cenozoölogy*.

Cæoma (sē-ō′mą), *n.* [NL. (Link, 1809), irreg., < Gr. *καίειν*, burn, + *-oma*. The allusion is to its effect in giving a burnt or scorched appearance to the leaves on which it grows.] A

name formerly applied to certain æcidia of the *Uredinales* which lack a peridium about the sorus.

cæomospore (sē-ō′mō-spōr), *n.* [NL., *Cæoma* + σπορά, seed (spore).] A term sometimes applied to the æcidiospores of the form-genus *Cæoma*. See ★*Cæoma*.

Cæretan (sē-rē′tạn), *a.* [L. *Caeretanus*, < *Cærētes* (also *Caerītes*), inhabitants of Cære, < *Cære*, Cære.] Pertaining to Cære, an ancient Etruscan town, now Cerveteri, in Italy: usually applied to a collection of so-called Corinthian vases, discovered in Cerveteri and now in the Louvre.

Cæsalpiniaceæ (ses-al-pin″i-ā′sē-ē), *n. pl.* [NL. (Klotzsch and Garcke, 1862), < *Cæsalpinia* + *-aceæ*.] A family of dicotyledonous choripetalous plants of the order *Rosales*, the senna family, typified by the genus *Cæsalpinia*. It is characterized by clustered, mostly hermaphrodite 5-merous flowers, the petals imbricated in the bud, and alternate stipulate leaves which are sometimes simple and when compound are zygomorphous. There are 107 genera and over 1000 species, trees, shrubs or herbs, chiefly tropical, but including such genera as *Cassia*, *Cercis*, and *Gleditsia* that are found in temperate regions. See *Leguminosæ*.

cæsalpiniaceous (ses″al-pin″i-ā′shius), *a.* Belonging to the plant-family *Cæsalpiniaceæ*.

Cæsar, *n.* **3.** [*l. c.*] A name in the Bahamas of the small grunt or Tom Tate, *Bathystoma rimator*, a food-fish of the family *Hæmulidæ*.

Cæsarist (sē′zär-ist), *n.* An imperialist.

Cæsar-weed (sē′zär-wēd), *n.* A shrubby tropical weed, *Urena lobata*, introduced into Florida, where it is thus called, and where it is sometimes taken for the ramie-plant. See *Urena* and *Spanish* ★*bur*.

Café au lait (ka-fā′ ō lā′) [F., coffee with milk], a light yellowish-gray color.—**Café frappé.** See ★*frappé*.—**Café parfait,** a form of ice-cream consisting chiefly of a well-beaten mixture of yolks of eggs, sugar syrup, and drained whipped cream, flavored with strong coffee and frozen without stirring.

cafeteria (ka-fā-tē′ri-ạ), *n.* [Cf. Sp. *cafetero*, keeper of a coffee-house.] A kind of buffet lunch-room where the patron serves himself to the already prepared food. [Western U. S.]

caffea (ka-fē′ạ), *n.* [NL.: see *coffee*, *café*.] Same as *caffein*.

caffeidine (ka-fē′i-din), *n.* [*caffe(a)* + *-id*[1] + *-ine*[2].] A crystalline alkaloid, $C_7H_{12}ON_4$, formed by the action of barium hydroxid on caffein. It melts at 94° C.

caffeol (kaf′ē-ōl), *n.* [*caffe(a)* + *-ol.*] An oil, $C_8H_{10}O_2$, with a pleasant odor like that of coffee, obtained in roasting the green coffee-berries. It boils at 196° C. Later observers have failed to obtain the compound.

caffuric (ka-fū′rik), *a.* Derived from coffee and related to uric acid.—**Caffuric acid,** a crystalline acid, $C_8H_9O_4N_3$, which is formed, together with apocaffein, by the oxidation of caffein. It is easily soluble in water.

cafuso (kä-fö′sō), *n.* [Brazilian.] In Brazil, an Indian and negro half-breed.

cag[2] (kag), *v. t.*; pret. and pp. *cagged*, ppr. *cagging*. [Origin obscure.] To affront; offend. [Prov. Eng.]

cage, *n.* **7.** A drum or cylinder in a cotton-scutching machine, covered with wire netting, against which the cotton is thrown in the form of a sheet, the dust being removed by a suction-fan.—**8.** In *base-ball*, the mask worn by the catcher.—**Steel cage.** See ★*steel*[1].

cage-mount (kāj′mount), *n.* In ordnance, a gun-mount for light guns in which the lower fixed part is a stand or pedestal having heavy bars radiating in a conical shape downward to the base and roughly resembling a cage.

cage-stand (kāj′stand), *n.* The lower fixed part of a cage-mount.

cageway (cāj′wā), *n.* **1.** The guides for a mine-cage.—**2.** The part of a mine-shaft in which the cage is hoisted and lowered.

cagework (kāj′wėrk), *n.* **1.** Openwork like that of a cage.—**2.** The carved upper works of a ship's hull, especially on the poop and forecastle. [Obsolete.]

caggy (kag′i), *a.* [Cf. *cagmag*.] Decaying; tainted; unwholesome; loathsome. [Vulgar.]

> Mouldy bread, *caggy* mutton.
> *Marryat*, Rattlin the Reefer, xv., *N. E. D.*

cagmag, *n.* **II.** *a.* Unwholesome; decaying; caggy: as, *cagmag* meat; hence, inferior: as, *cagmag* wares. [Vulgar or dialectal.]

cago (kä′gō, Fijian pron. thäng′ō), *n.* [Fijian.] A name in the Fiji Islands of turmeric, *Curcuma longa*. See *Curcuma*, 2, *huldee*, *turmeric*, ★*olena*, and ★*rea*.

cahar (kä′här), *n.* [Jav. and Malayan *kāhar*, < D. *kar* = E. *car*[1].] In Malayan countries, a one-horse carriage or cart; a one-horse spring-cart for the conveyance of passengers. *Forbes*, Nat. Wand. in East. Arch., 1885, p. 51.

Cahenslyism (ka-hens′li-izm), *n.* A plan, proposed in 1891, and attributed to Peter Paul Cahensly (a member of the German Reichstag and president of the Leo Society for the protection of German immigrants in the United States), to appoint to those Roman Catholic sees and parishes in the United States, where there might be a dominant or large foreign population, bishops and priests of the same nationality, in order to preserve their religious traditions and practices; by extension, the propagation of foreignism among Roman Catholics in the United States.

cahincin (ka-hin′sin), *n.* [*cahinca* + *-in*[2].] A glucoside, $C_{40}H_{64}O_{18}$, found in the root-bark of *Chicocca racemosa*. It has an astringent, bitter taste and acid reaction. Also *caincin*.

cahot (kä-hō′), *n.* [*F. cahot*, a jolt or jerk, also dial. as def.; origin unknown, but prob. interjectional, < *ca-*, introductory syllable, + *ho*, interjection.] A bank or ridge of snow which has been heaped up across a road by passing sleighs, leaving a corresponding depression behind; hence, a surface-undulation or ridge-like inequality which, with the corresponding depression, is known in the United States as a '*thank-you-ma'am*.' [Canadian French.]

> Corresponding undulations sometimes produced by sledge-driving on snow-covered roads are familiar in Canada, where they are called *cahots* (jolts). The author saw these in and near Montreal in the winter 1900-1901. They averaged 13 feet in length from crest to crest, and 8 inches appeared to be a not uncommon amplitude.
> *Rep. Brit. Ass'n Advancement of Sci.*, 1902, p. 731.

cahow† (ka-hou′), *n.* [Also *cahowe*; origin unknown.] A local name for a sea-bird, presumably a species of *Puffinus*, formerly abundant on the Bermudas, now supposed to be extinct. By some ornithologists it is considered to be the existing *Puffinus obscurus*.

cahuy (kä-hö′i), *n.* [Tagalog.] A tree; also, wood; fire-wood. [Philippine Is.]

caidos (kä′ē-dōs), *n. pl.* [Sp.] Unpaid or overdue rents or taxes. [Philippine Is.]

cailcedrin (kīl-sed′rin), *n.* [*Cailcedr(a)* + *-in*[2].] A resinous compound present to a minute extent in the bark of the cailcedra.

cailian (kä-i-lē-än′), *n.*; pl. *cailianes* (-ä′nāz). [Philippine Sp. *cailián* (pl. *cailianes*), < Ilocan *caylián*.] Among the Ilocans and Igorrotes of Luzon, a poor man who dwells as a denizen in a commune, without tribal rights, and is in effect a serf or peon.

caillasses (kä-ē-yäs′), *n. pl.* [F., gravels.] In *geol.*, a name given by French geologists to the upper part of the Middle Eocene or Upper Calcaire grossier of the Paris Tertiary basin.

caimito (kī-mē′tō), *n.* [Peruv. *caymita*.] **1.** A tree of the family *Sapotaceæ*, *Pouteria Caimito*, or its fruit, which resembles the marmalade-plum, but is smaller and superior in flavor.—**2.** Sometimes the same as *cainito* (which see) and *star-apple* (see cut).

cainana (kī-nä′nä), *n.* [Given as Braz.] The Brazilian snakeroot, *Chiococca brachiata*, a rubiaceous plant the root of which is used in medicine.

Cainitic (kā-nit′ik), *a.* Of or pertaining to Cain or the Cainites.

cainosite (kī′nō-sīt), *n.* See ★*cenosite*.

cainozoölogy (kī-nō-zō-ol′ō-ji), *n.* See ★*cenozoölogy*.

caiquejee (kī′ēk-jē), *n.* [Turk. *qāyiqji*, < *qāyiq*, caique.] One of the oarsmen of a caique.

cairdman (kārd′man), *n.* Same as *caird*.

Caissa (kā-is′ạ), *n.* [NL., artificially formed from *chess*, appar. on the model of *chase*[2] = F. *caisse*, with *-issa* conforming to the L. and Gr. fem. suffix *-issa* (E. *-ess*).] The goddess of chess: a modern invention of chess-players.

caitif, *n.* A simplified spelling of *caitiff*.

cajeput, *n.* **2.** The spice-tree of California: so named on account of the properties of its oil. See *spice-tree*.—**Essence of cajeput.** See ★*essence*.

cajeputene (kaj′ē-pū-tēn″), *n.* Same as *cajuputene*.

cajeputol (kaj′ē-pū-tōl″), *n.* [*cajeput* + *-ol.*] Same as ★*cineol*.

caji (kä-hē′), *n.* [Cuban, of native origin.] A Cuban name of the snapper, *Lutianus apodus*, called the *schoolmaster*.

cajon, *n.* **2.** In *phys. geog.*, a small basin inclosed on nearly all sides by steep hills or mountains. [Southwestern U. S.]

cajun (kä-hön′), *n.* [Sp. Amer.] A fiber-plant, *Furcræa Cubensis*, of the amaryllis family, a native of tropical America. It yields a strong white fiber used for cordage. Compare ★*cocuiza*.

Cajun, *n.* See ★*Cadjen*.

cajuputol (kaj″jū-pū-tōl′), *n.* [*cajuput* + *-ol.*] Same as ★*cineol*.

cake[1], *n.* **7.** A stupid fellow; a noodle. [Dialectal, Eng.]—**8.** [Figurative extension of def. 2.] A good thing; a dainty or delicacy, as in the phrase 'cakes and ale'.—**Cakes and ale,** dainties; the good things and the enjoyments of life; 'all play and no work or worry.'

> Dost thou think, because thou art virtuous, there shall be no more *cakes and ale*?
> *Shak.*, Twelfth Night, ii. 3.

Genoa cake. (*a*) A currant-cake with almonds on top for ornament. (*b*) A rich cake glazed and filled with nuts.—**Genoese cake,** a sponge-cake, sometimes baked as a layer-cake, or used as a jelly-roll.—**Kungu cake.** See ★*kungu*.—**Savoy cakes,** lady's-fingers.—**Soul-mass cake,** a *soul-cake* (which see).—**The Land o' Cakes,** Scotland. *Burns.*—**To take the cake,** to take the prize; carry off the honors: as, for downright impudence he *takes the cake*. See ★*cake-walk*. [Slang.]—**Venetian cake,** a small almond-cake.

cake-house (kāk′hous), *n.* **1**†. A place where cakes are made or sold. *Pepys*, Diary.—**2.** A place where cakes, as of soap, indigo, etc., are stored.

cake-ink (kāk′ingk), *n.* China or India ink, which is made into cakes or slabs.

cake-meal (kāk′mēl), *n.* Same as *cotton-cake*.

cake-mold (kāk′mōld), *n.* A mold in which cakes, as of ink, soap, lac, etc., are formed.

cake-walk (kāk′wâk), *n.* A promenade or march in which a number of couples walk in competition before judges and an audience, the most graceful, eccentric, or fantastic performers receiving cakes as prizes. It originated among the negroes of the southern United States.

Caking-coal. See ★*coal*.

caky (kā-ki), *a.* [*cake* + *y*[1].] Cake-like; of the nature of or in the form of a cake.

cal. An abbreviation (*a*) of *calory*; (*b*) of *calcium*; (*c*) of *calender*; (*d*) of *calomel*.

calabacilla, *n.* See *calabazilla*.

Calabar swelling. See ★*swelling*.

calabash, *n.* **5.** The head, with an implication of emptiness. [Slang, U. S.]

calabazita (kal-a-bä-zē′tä), *n.* [Mex. Sp. (?), either a parallel form (dim. *-ita*) or a mistake for *calabazilla*.] Same as *calabazilla*.

calabozo (kä-lä-bō′thō), *n.* [Sp.] The Spanish form of *calaboose*.

calabrasella, *n.* The Spanish pack is used, which has no 8's, 9's, or 10's. The cards rank 3, 2, A, K, Q, J, 7, 6, 5, 4. Twelve cards are given to each player, 4 at a time, and 4 are left on the table. There are 35 points to play for, the lower score being deducted from the higher on each hand. There are no trumps. The 6 highest cards in each suit count 1 each, except the ace, which counts 3, and the last trick counts 3, all counts being to those who win the tricks with counting cards in them. Each player in turn declares to play or pass. If he plays he may ask for the 3 of any suit in exchange for one of his own cards. If the 3 asked for is in the stock, the player loses his ask. After asking he may discard from 1 to 4 cards. He then turns the stock face up and takes from it as many as he has discarded. Those left in the stock and the discards go to the winner of the last trick. The eldest hand always leads. If the bidder fails to reach 18 he loses to both adversaries; if he passes 18 he wins from both.

calafate (kä-lä-fä′te), *n.* [Cuban Sp. (also ★*galafate*, q. v.), thief, rogue, lit. 'calker.'] A Cuban name of the black oldwife, *Melichthys piceus*, a fish of the family *Balistidæ*.

calalu (kä-lä-lö′), *n.* [Also *calalue*, *calaloo*, *calaloe*, *caleloe* < Cuban Sp. *calalú*.] A West Indian name for various plants, both wild and cultivated, which are used as pot-herbs and culinary vegetables.—**Branched calalu,** *Solanum nigrum*.—**Prickly calalu,** *Amaranthus spinosus*.—**Spanish calalu,** *Phytolacca octandra*.

calamansanay (kä-lä-män-sä′nī), *n.* [Also *kalamansanai*; < Tagalog *calamansanay*.] A timber-tree of the Philippine Islands.

Calamariaceæ (kal″a-mā-ri-ā′sē-ē), *n. pl.* [NL. (Potonié, 1899), < **Calamaria*, a nominal genus included in *Calamites*, fem. of *Calamarius*, pertaining to a reed (see *calamary*), + *-aceæ*.] A family of Paleozoic plants, the probable ancestors of the modern *Equisetaceæ*, but attaining greater dimensions and often exhibiting an exogenous structure. They are found in great abundance in the coal-measures of all countries, but range from the Devonian to the Permian. A large number of gen-

era are recognized, most of which were formerly included in the group called *Calamites* (which see), but *Annularia* has always been regarded as distinct. See ★*Annularia* and *Asterophyllites*.

calamariaceous (kal″ạ-mā-ri-ā′shius), *a.* Belonging or relating to the *Calamariaceæ*.

Calamariales (kal″ạ-mā-ri-ā′lēz), *n. pl.* [NL. (Potonié, 1900), ⟨ *Calamaria* (see *Calamariaceæ*) + *-ales*.] An order of pteridophytic fossil plants of the class *Equisetineæ*, coördinate with the order *Equisetales*, of which they are the probable ancestors. They are characterized by having their reproduction take place by means of microspores and macrospores, by their superposed leaves, and frequently by an exogenous structure. The order contains the two families *Calamariaceæ* and *Protocalamariaceæ*.

calamarian[2] (kal-ạ-mā′ri-ạn), *a.* [NL. **Calamaria* + *-an*.] Same as ★*calamariaceous*.

calamay (kä-lä-mī′), *n.* [Tagalog.] A dish, made of cocoanut flour or rice, used as a dessert by natives of the Philippine Islands.

calameon (ka-lā′mē-ọn), *n.* [*calamus* + *-eon*, a mere ending.] A neutral crystalline compound, $C_{15}H_{26}O_2$, obtained from the high-boiling fractions of calamus-oil. It melts at 168° C.

calamiform (ka-lam′i-fôrm), *a.* [L. *calamus*, reed, pen, + *forma*, form.] Having the form of a reed or feather.

Calamin brass. See ★*brass*[1].—**Electric calamin**, a name sometimes used to distinguish zinc hydrogen silicate from zinc carbonate as naturally occurring minerals, or ores of zinc. The silicate becomes electric on being heated.

calamin (kal′ạ-min), *v. t.* [*calamin*, *n.*] To wash or coat (pottery) with calamin.

calamine[2] (kal′ạ-min), *n.* [*calamus* + *-ine*[2].] An alkaloid contained in the rhizome of sweet-flag, *Acorus Calamus*, and found to be identical with choline.

calaminthone (kal-ạ-min′thōn), *n.* [*Calamintha* + *-one*.] A ketone, $C_{10}H_{16}O$, obtained from the volatile oil of *Clinopodium Nepeta* or marjolaine, which is found in France. It is a colorless oil which boils at 209° C.

calamitean (kal-ạ-mī′tē-ạn), *a.* [*Calamites* + *-ean*.] Belonging or relating to *Calamites* or to the *Calamariaceæ*.

Thus such transitions are well known, though of a relatively simplified form, in the structure of the *calamitean* stem. *Amer. Nat.*, April, 1904, p. 250.

calamographer (kal″ạ-mog′ra-fẽr), *n.* [Gr. **καλαμογράφος*, implied in *καλαμογραφία*, writing with a reed, ⟨ *κάλαμος*, reed, + *γράφειν*, write.] One who writes with a reed. *G. Smith.*

Calamospermæ (kal″ạ-mō-spẽr′mē), *n. pl.* [NL. (Ward, 1904), ⟨ Gr. *κάλαμος*, a reed, + *σπέρμα*, a seed.] A class of fossil plants of the phylum *Pteridospermaphyta*. They have the external aspect of the *Calamariales*, but bear seeds instead of macrospores. The genus *Arthropitys* seems to be an example, as it probably bore the seeds called *Stephanaspermum*.

calamus, *n.* **8.** [*cap.*] A genus of fishes, the porgies, belonging to the family *Sparidæ*. The group is characterized by the great development of the interhemal bone at the base of the anal spines. This is greatly enlarged and quill-shaped, its open end receiving the posterior end of the large air-bladder. To this structure the Spanish name *pez de pluma* (quill-fish) and the name *Calamus* refer. The species are all confined to tropical America and are all esteemed as food.

calan (kä-län′), *n.* [Philippine Sp. *calan*, ⟨ Tagalog *calan*.] In the Philippine Islands, a native brazier, hearth, fireplace, or kitchen fire.

Calandrinia (kal-an-drin′i-ä), *n.* [NL. (Humboldt, Bonpland, and Kunth, 1823), named in honor of J. L. *Calandrini* (1703-1758), a chief magistrate of Geneva.] An untenable name for *Baitaria*, a genus of plants of the family *Portulacaceæ*.

calantas, *n.* See ★*kalantas*.

calapia, *n.* See ★*kalapia*.

calasag (kä-lä′säg), *n.* [Tagalog.] A large shield used by the natives of Nueva Vizcaya and Benguet in Luzon.

calash, *n.* **4.** A primitive one-horse springless cart of the island of Nantucket, Massachusetts, house-chairs being used for seats. It is still used to a limited extent.—**Calash coach**, a coach having a bow top over the rear seat. The doors are in two parts, hinged separately. It can be converted from a closed into an open carriage.

calash (ka-lash′), *v. t.* [*calash*, *n.*] To furnish with a calash.

Well *callash'd* without, and well bolster'd within.
Irving, Salmagundi, p. 33.

Calathea (kal-ạ-thē′ä), *n.* [NL. (Meyer, 1818), ⟨ Gr. *κάλαθος*, a basket. The Indians of the Essequibo river use the split stems of some of the species for basket-making.] A genus of perennial foliage-plants, of the family *Marantaceæ*, which are commonly cultivated as marantas, from which they differ in having a three-seeded instead of a one-seeded fruit. The genus includes about 60 species, mostly from tropical America, but a few from tropical Africa. The leaves, for which the plants are grown, are marked with shades of green, red, brown, yellow, and white; they are among the handsomest of ornamental stove-plants.

Calathian (ka-lā′thi-ạn), *a.* [L. *Calathiana* (sc. *viola*) in Pliny, otherwise taken as *Calatiana* and *Calatina*, appar. from a proper name, perhaps identical with **Calatina*, fem. of *Calatinus*, in pl. *Calatini*, ⟨ *Calatia*, a town in Campania.] An epithet (see etym.) in *Calathian violet*, a plant-name in Pliny, which modern writers identify with *Gentiana Pneumonanthe*.

calavance (kal-ạ-vàns′), *n.* [Also *callevance*, *callivancy*, etc., *caravance*, etc., orig. *garvance*, ⟨ Sp. *garbanzo*, chick-pea.] In the West Indies, a name for several species of beans belonging to the genus *Dolichos*, especially *D. sphærospermus*.

Calaveras skull. See ★*skull*.

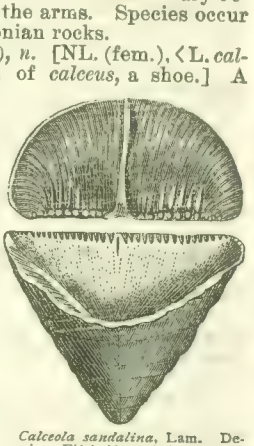
calay (ka-lī′), *n.* [⟨ Ar. *qala'ī*, tin.] Tin; an alloy of tin and lead.

calay (ka-lī′), *v. t.* [⟨ *calay*, *n.*] To coat with tin, as, for example, the inside of copper cooking-utensils.

calcar[1], *n.* **9.** In *entom.*, one of the spines at the tips of the tibiæ of certain insects, especially the *Hymenoptera*. Also called *spur*.

calcarenite (kal-kar′e-nīt), *n.* [L. *calx* (*calc-*), lime, + *arena*, *harena*, sand, + *-ite*[2].] In *petrog.*, a term proposed by A. W. Grabau (1903) for a limestone or dolomite composed of coral- or shell-sand, or of lime-sand derived from the erosion of older limestones. In structure it resembles psammites or silicious sandstones, being generally known by the term *sandstone*.

Calcarine complex, ordinarily synonymous with *hippocampus minor*. G. Elliot Smith applies the term to a triradiate pattern of sulci situated behind the splenium of the corpus callosum; the ventral limb he distinguishes as *calcarine*, the caudal as *retrocalcarine*, and the dorsal as *paracalcarine*.



Calcarius (kal-kā′ri-us), *n.* [NL., ⟨ L. *calcar*, spur.] A genus of fringilline birds whose members have the hind claw exceedingly long. The typical species is the Lapland longspur, *Calcarius lapponicus*.

calcation (kal-kā′shọn), *n.* [NL. **calcatio(n-)*, ⟨ L. *calcare*, trample upon.] The act of trampling under the heel; a treading or stamping. *Blount*.

Calceate fathers, in the *Rom. Cath. Ch.*, those religious fraternities whose members wear shoes, in contradistinction to those whose members go barefooted.

Calceocrinus (kal-sē-ok′ri-nus), *n.* [NL. *calceus*, a slipper, + Gr. *κρίνον*, a lily (see *crinoid*).] A genus of fossil crinoids of the order *Fistulata*, characterized by the sharp flexion of the calyx against the column and the extraordinary development of two of the arms. Species occur in Silurian and Devonian rocks.

Calceola (kal-sē′ọ-lạ), *n.* [NL. (fem.), ⟨ L. *calceolus* (masc.), dim. of *calceus*, a shoe.] A genus of fossil operculate corals growing as simple, slipper-shaped coralla and very abundant in the Middle Devonian rocks of Europe. — **Calceola group**, in *geol.*, a division of the Middle Devonian in the Rhineland, taking its name from the prevalence of the coral *Calceola sandalina*.

Calceola sandalina, Lam. Devonian; Eifel. Natural size. (From Zittel's "Palæontology.")

calceolus (kal-sē′ọ-lus), *n.*; pl. *calceoli* (-lī). [NL. use of L. *calceolus*, dim. of *calceus*, a shoe, a boot: see *calceate*.] One of the sense-organs, possibly olfactory or auditory, on the antennæ of amphipods. *Trans. Linnean Soc. London. Zoöl.*, May, 1897, p. 39.

calcicole, *a.* Same as ★*calcicolous*.

calcicolous (kal-sik′ọ-lus), *a.* [L. *calx* (*calc-*), lime, + *-cola*, ⟨ *colere*, dwell.] In *phytogeog.*, inhabiting calcareous soils.

calcicosis (kal-si-kō′sis), *n.* [NL., irreg. ⟨ L. *calx* (*calc-*), limestone, + *-ic-* + *-osis*.] Pneumonoconiosis occurring in stone-cutters.

Calciferous canals, small canals containing lime salts in cartilage undergoing ossification.—**Calciferous sandrock.** See ★*sandrock*.

calciform[2] (kal′si-fôrm), *a.* [L. *calx* (*calc-*), heel, + *forma*, form.] Having a projection like a heel. *Syd. Soc. Lex.*

calcifugal (kal-sif′ụ-gạl), *a.* Same as *calcifugous*.

calcifuge (kal′si-fūj), *a.* [L. *calx* (*calc-*), lime, + *fugere*, flee.] In *phytogeog.*, avoiding limestone or lime-containing soils; calciphobous; calcifugous.

Calcigerous cells, osteoblasts in which calcareous deposits occur in the process of ossification.

calcilutite (kal-sil′ū-tīt), *n.* [L. *calx* (*calc-*), lime, + *lutum*, mud, + *-ite*[2].] In *petrog.*, a term proposed by A. W. Grabau (1903) for a limestone or dolomite made up of rock-flour, the composition of which is typically non-silicious, though many calcilutites have an intermixture of clayey material. They correspond to the pelites among the silicious rocks. The purest calcilutites have generally a compact structure with a conchoidal fracture.

calcimiric (kal-si-mir′ik), *a.* [*calci(c)* + *m(agnesium)* + *ir(on)* + *-ic*. Cf. ★*miric*.] In *petrog.*, equally calcic and miric, or nearly so; that is, having magnesia and ferrous iron in a ratio to the femic lime between the limits ⟨ $\frac{5}{3}$ ⟩ $\frac{3}{5}$: used in the quantitative system of classifying igneous rocks.

calcination, *n.* **3.** The reduction to ashes of combustible substances by burning; a turning into ashes by combustion. *Bullokar.*—**4.** A calcined state or condition. *Lyell*, Prin. of Geol.—**5.** A product of calcination; a calcinate.

calcinatory, *n.* **II**, *a.* That is or may be used in the process of calcination: as, a *calcinatory* furnace.

calcine, *v. t.* **4.** To consume by burning; burn to ashes.

Calcining the cities of Sodom and Gomorrah condemned them with overthrow.
Farrar, Early Days of Christianity, I. x.

5. To purify or refine by fire.—**6.** To desiccate by subjection to heat so as to destroy contained organisms, etc.: as, to *calcine* air.—**Calcining kiln**, a kiln or furnace in which a metallic ore, as iron ore, is heated, with or without access of air, but without undergoing the reducing or deoxidizing action of the fuel.

calcine (kal′sin), *n.* [*calcine*, *v.*] Fragments of already burnt fire-clay vessels, as the saggars of porcelain manufacture, ground up and used in making new vessels, with addition of fresh fire-clay. Also *chamotte*.—**Calcine plaster.** See ★*plaster*.

Calcinea (kal-sin′ē-ä), *n. pl.* [NL., ⟨ L. *calx* (*calc-*), lime, chalk, + *-in-* + *-ea*.] A subdivision of *Calcarea*, including sponges like the *Clathrinidæ*, having the form reticulate, triradiate spicules equiangular, collar-cells with basal nucleus, and the larva a parenchymula.

calcined (kal′sind), *p. a.* **1.** Reduced by fire to powder or ashes.—**2.** Prepared by calcination: as, *calcined* magnesia; *calcined* ore.—**3.** Refined or purified by subjection to heat or the action of fire: as, *calcined* air.

calciner, *n.*—**Brunton's calciner**, a reverberating furnace for roasting tin ore, in which the bed of fire-brick rests on a cast-iron frame and is turned by power. The bed makes about 1½ revolutions an hour, and the furnace has a capacity of from 2 to 2½ tons of ore in 24 hours. The calciner has been abandoned in many works.

calcino (käl-chē′nō), *n.* [It.] A disease of silkworms, probably synonymous with the French muscardine.

It is a microscopic parasite, composed of white fungoid flocculi, analogous to the Botrytus or parasitic fungus that produces "*calcino*" in the silkworm.
Knowledge, Nov., 1904, p. 261.

calcioferrite (kal″si-ọ-fer′īt), *n.* [*calcium* + *ferric*) + *-ite*[2].] A hydrated phosphate of ferric iron and calcium, occurring in from yellow to green nodular forms.

calciothorite (kal″si-ō-thō′rīt), *n.* [*calcium* + *thorium* + *-ite*[2].] A thorium silicate from Norway. It is near thorite, but contains a considerable amount of calcium.

calciovolborthite (kal″si-ọ-vol′bôr-thīt), *n.* [*calcium* + *volborthite*.] A vanadate of copper and calcium, occurring in green or yellow tabular crystals and in gray granular masses.

calciphilous (kal-sif′i-lus), *a.* [L. *calx* (*calc-*), lime, + Gr. *φιλεῖν*, love.] Lime-loving: said of plants which grow chiefly or wholly in calcareous soils.

calciphobous (kal-sif′ọ-bus), *a.* [L. *calx* (*calc-*), lime, + Gr. *φοβεῖν*, fear.] Averse to lime: said of plants which avoid calcareous soils.

calciphyre (kal′si-fīr), *n.* [L. *calx* (*calc-*), lime, + *(por)phyr(ites)*, porphyry.] A calcareous

rock which has become recrystallized by metamorphism.

calcirudite (kal-sir′ū-dīt), *n.* [L. *calx* (*calc-*), lime, + *rudus*, rubble, + *-ite*[2].] In *petrog.*, a term proposed by A. W. Grabau (1903) for a limestone or dolomite composed of broken or worn fragments of coral or shells or of limestone fragments, the interstices filled with lime-sand or mud and with a lime cement. It corresponds to psephite among the silicious rocks. Calcirudites embrace rocks known as coral-, shell-, or limestone-breccia and conglomerate.

calcisponge (kal′si-spunj), *n.* [L. *calx* (*calc-*), lime, + *spongia*, sponge.] A sponge whose skeleton consists of calcareous spicules; one of the *Calcarea*.

calcitestaceous (kal″si-tes-tā′shius), *a.* [L. *calx* (*calc-*), lime, + *testaceus*, of a shell: see *testaceous*.] Having a shell of lime carbonate. *Amer. Geol.*, April, 1903, p. 202.

Calcium acetate, a substance saved in large quantity as a by-product in the manufacture of wood-alcohol, and employed in making acetone, acetic acid, and the acetates of aluminium and iron used as dyers' mordants.—**Calcium bicarbonate,** a substance, $CaH_2(CO_3)_2$. Calcium carbonate dissolves in much larger proportion in water containing carbon-dioxid gas or carbonic acid than in pure water. It is very commonly assumed that in the former case calcium acid-carbonate or bicarbonate is formed. Such a compound, however, cannot be obtained in a separate state; the solution, on being heated or simply exposed at common temperature, gives off carbon-dioxid gas, and normal calcium carbonate separates in solid form. This separation occurs in the softening of some natural waters by boiling, in the production of one kind of scale on the interior surface of steam-boilers, and in the formation of stalactites in limestone caverns. A like behavior is observed in magnesium bicarbonate (used medicinally), manganese bicarbonate, and iron (ferrous) bicarbonate. The last-named occurs in natural chalybeate waters, which cannot long be kept clear, but must be used at the source or soon after removal from it.—**Calcium bisulphite,** a salt of calcium prepared in solution by passing an excess of sulphur-dioxid gas into milk of lime, largely used in making paper-pulp from wood, as a means of preventing acid fermentation in the manufacture of cane-sugar and in brewing.—**Calcium carbide.** This material is produced on a very large scale by applying the intense heat of an electric furnace to a mixture of anthracite or coke with limestone. The action of water on the product causes an abundant evolution of acetylene gas, which is used for illuminating purposes.—**Calcium carbonate,** a substance, often called *carbonate of lime*, both found in nature (see *calcite* and *limestone*) and artificially prepared. It is of great industrial importance, and finds numerous applications, both mechanical and chemical.—**Calcium chlorid,** a waste-product on a large scale of the Solvay process for making carbonate of soda: not to be confounded with chlorid of lime or bleaching-powder. It is used in the scientific laboratory for drying gases, and to some extent industrially to remove moisture from the air in drying fruits, etc.—**Calcium-chlorid tube.** See ★*tube*.—**Calcium cyanamide,** a recent and probably very valuable product of the electric furnace, obtained by the action of atmospheric nitrogen on a mixture of anthracite or coke with lime. The reaction is $CaO + C_2 + N_2 = CO + CaCN_2$. This substance may by simple treatment be made to yield ammonia or alkaline cyanides, or may itself be used as a fertilizer, furnishing nitrogen in available form for growing plants.—**Calcium fluoride,** a compound occurring in nature as the mineral fluor-spar. It is the chief source from which hydrofluoric acid and other fluorin compounds are obtained.—**Calcium hydroxid.** Same as *slaked lime*.—**Calcium hypochlorite.** See *hypochlorite*.—**Calcium permanganate,** a salt used, under special circumstances, in freeing drinking water from unwholesome organic matter.—**Calcium phosphate,** in *chem.*, a salt in which calcium, the metallic basis of lime, partially or wholly replaces the hydrogen of phosphoric acid. All such salts as found in nature and all those usually met with in commerce are derivatives of orthophosphoric acid. The replacement of 1, 2, and 3 atoms of hydrogen gives rise to monocalcic phosphate ($CaH_4(PO_4)_2$), dicalcic phosphate ($CaHPO_4$), and tricalcic or normal calcium phosphate ($Ca_3(PO_4)_2$). The first of these is pretty freely soluble in water; the second and third are practically insoluble. Monocalcic phosphate is prepared upon a very large scale by the action of sulphuric acid in proper quantity upon the normal phosphate of bones, coprolites, "phosphate rock," etc., and in admixture with the calcium sulphate produced at the same time forms the so-called superphosphate of lime so largely used in agriculture.—**Calcium phosphide,** a compound produced by the action at a red heat of phosphorus on lime. On contact with water it evolves phosphureted hydrogen gas which at once takes fire in the air and burns with a bright light. It has been proposed to make use of this fact in rendering visible the position of a life-buoy thrown overboard at sea.—**Calcium plumbate,** a salt, Ca_2PbO_4, which gives off oxygen on being strongly heated, and has been utilized for the preparation of that gas on a large scale by Kassner's process.—**Calcium silicate,** a substance which forms the essential constituent of hydraulic cement after it has become set and hardened. It also constitutes the binding material which unites the grains of quartz-sand in artificial stone made of a mixture of such sand with a strong solution of sodium silicate, molded into shape, and hardened by immersion in a solution of calcium chlorid. Also called *lime silicate*.—**Calcium sulphate.** See *gypsum*.—**Calcium sulphid,** CaS, a substance which becomes luminous after exposure to sunlight. See *Balmain's* ★*paint*.—**Calcium sulphite.** See ★*calcium bisulphite*.—**Calcium tungstate,** a crystalline powder used to form the fluorescent surface of a screen on which images produced by the Röntgen rays are rendered visible.

calc-nodule (kalk′-noj″ūl), *n.* [L. *calx* (*calc-*), lime, + E. *nodule*.] A nodule of rock composed largely of lime carbonate.

calcoglobulin (kal-kō-glob′ū-lin), *n.* [Irreg. < L. *calx* (*calc-*), lime, + E. *globulin*.] A combination of an albumin with calcium salts formed during ossification. *Rainey.*

calcographic (kal-kō-graf′ik), *a.* Same as *calcographical*.

calcosphæritic (kal″kō-sfē-rit′ik), *a.* [L. *calx* (*calc-*), lime, E. + *sphærite* + *-ic*.] Consisting of lime and spherical: used only in the following phrase.—**Calcosphæritic body,** a concretion sometimes found in the mantle or other tissues of a pearl-producing mollusk, formed apparently by free crystallisation, and not, as a true pearl is formed, in a cuticular sac.

"Concretions" are, again, distinguished from pearls as *calcosphæritic bodies* which have not a cuticular origin from an epithelium, but seem to arise by free crystallisation in the mantle or other tissues.

Nature, Jan. 22, 1903, p. 280.

calcrete (kal′krēt or kal-krēt′), *n.* [*cal*(*careous*) + (*con*)*crete*.] A calcareous mass of considerable size formed on the sea-bottom by calcareous incrusting *Polyzoa* which cement the sand and other loose material together.

In the Gulf of Manaar, calcareous masses ("*calcretes*") of great extent are formed in situ on the sea-bottom by the cementing of sand and other loose material by calcareous incrusting Polyzoa. *Nature*, Oct. 22, 1903, p. 614.

calc-sac (kalk′sak), *n.* [L. *calx* (*calc-*) + E. *sac*.] Same as *dart-sac*. *Proc. Zool. Soc. London*, 1895, p. 247.

calcular (kal′kū-lär), *a.* [*calculus* + *-ar*[3].] In *math.*, of or pertaining to a calculus or algorithm.

calculational (kal-kū-lā′shon-al), *a.* [*calculation* + *-al*[1].] Used in calculations.

Knowing well the numerical value and *calculational* quantity of π. *Piazzi Smyth*, Our Inheritance, I. ii.

calculator, *n.*—**Bar calculator,** any one of a class of computing-machines (rarely performing more than addition and subtraction) in which movable bars bearing inscribed numbers are caused by prescribed movements to actuate dials or figure-wheels in a manner that indicates totals or differences.—**Single-axis calculator,** a sliding-rule mechanism in which the numbered scales are rotated on a single supporting axial shaft or journal, according to a prescribed system. See *sliding rule*.

calculifrage (kal′kū-li-frāj), *n.* [L. *calculus*, a little stone, + *-fragus*, < *frangere*, break.] Same as *lithotrite*.

calculist (kal′kū-list), *n.* [*calculus* + *-ist*.] A computer or calculator.

Mathesis, of which it has been said, many a great *Calculist* has not even a notion.

Carlyle, For. Rev. and Cont. Misc., iv. 138. *N. E. D.*

calculograph (kal′kū-lō-grâf), *n.* [Irreg. < L. *calculare*, calculate, + Gr. *γράφειν*, write.] An apparatus for recording elapsed time, consisting essentially of a clock combined with two printing-stamps operated by means of levers. To record the number of hours and minutes between the beginning and the end of any piece of work or other operation, a card is inserted in the apparatus and by a movement of the first lever is stamped with the exact time at that instant. On the completion of the work the same card is inserted in the apparatus and the second lever is moved, when the card is stamped with the elapsed time, or the difference in hours and minutes between the two printings on the card. In place of the actual elapsed time, the apparatus may be used to record the money value of the time, expressed in dollars and cents, according to any predetermined ratio.

calculus, *n.*—**Alternating calculus,** a urinary calculus formed of successive layers of differing chemical composition.—**Alvine calculi.** See ★*alvine*.—**Calculus of extension,** a special algebra invented by Grassmann for space-analysis.—**Coral calculus,** a calculus formed in the pelvis of the kidney, with branches extending into the calyces.—**Directional calculus.** Same as ★*calculus of extension*.—**Hedonic calculus,** or **calculus of pleasure,** a systematic method of deducing consequences from assumed principles of economics and ethics by exact reasoning, so as to take advantage of mathematical results concerning continuous variations wherever such results are germane. Such a calculus exists, and its results have sometimes been of value; but great caution is needed in interpreting results. Of course, as in the less difficult problems of bridge-building, the steam-engine, and the like, no such calculation can take into account all the features of an actual situation.—**Hemp-seed calculi,** renal calculi of small size and smooth exterior, formed of calcium oxalate.—**Sect calculus,** a geometric algorithm for sects; a graphic algebra for pieces of straight lines.

He constructs a *sect Calculus* in which he shows that the theory of proportion can be founded without the introduction of irrational numbers.

J. W. Withers, Euclid's Parallel Postulate, p. 56.

calcumeter (kal-kū′me-tėr), *n.* [Irreg. < L. *calcu*(*lare*), calculate, + Gr. *μέτρον*, measure.] An adding-machine which has a perforated plate supporting stationary dials superimposed over movable dials operated with a stylus. *Engin. Mag.*, July, 1904, p. 611.

caldarium (kal-dā′ri-um), *n.*; pl. *caldaria* (-ä). [L., also *calidarium*, < *calidus*, *caldus*, hot: see *calid*.] 1. The Roman name for a stove or heating apparatus.—2. A room in the Roman thermæ, or public baths, in which water was heated to the highest temperature. See *bath*[1], 5.

calderilla (käl-de-rēl′yä), *n.* [Sp., dim., also a holy-water pot, dim. of *caldera*, a kettle.] A Spanish copper coin, the cuarto; also, any copper coin current among Spanish-speaking people.

calderite (kal′de-rīt), *n.* A massive iron-garnet from India.

caldron-bottom (kâl′dron-bot″um), *n.* The fossil remains or cast of the trunk of a plant of the genus *Sigillaria* which have remained vertical above or below a coal-bed.

Caldwell's crucible, extractor. See ★*crucible*, ★*extractor*.

calean (kä-lē-än′), *n.* [Also *callean*, *kalean*, etc. Pers. *qaliyān*, also *qaliyūn*, whence E. *calcoon*.] The Persian 'waterpipe' otherwise known as *narghile*.

calendal (kal′end-al), *a.* [*calend* + *-al*[1].] Relating to the calends: as, the most ancient *calendal* system.

Calendar year, the year as given in the accepted or legal calendar, namely, at present, the interval between midnight of December 31–January 1 and the same hour a year later. The beginning of the calendar year has varied widely in different countries and at different times. For many years before 1751 it began in England on March 25. In 1751 a legal enactment placed the beginning at January 1, in accordance with the usage then prevalent in most other Christian nations.—**Greek calendar.** The Greek year was lunar, and consisted of 12 months of 29 or 30 days each—354 days altogether, 11 days short of the solar year. To establish some correspondence between the lunar and solar years, every third, sixth, and eighth year an extra month of 29 or 30 days was inserted, bringing those years to the excessive number of 383 or 384 days. The month itself was divided into three periods of 10 (or 9) days each.—**Mexican calendar,** a combination of an astrological and solar calendar which was in use in Mexico and Yucatan in pre-Columbian times. The days were arranged in groups of 20, each day being designated by the name of an object. There were thirteen numbered periods of this kind, giving an astrological period of 260 days, called *tonalamatl* in Mexico, *ch'ol k'ih* in Guatemala, and *kin katun* by the Maya. Eighteen periods of 20 days each formed a year of 360 days, to which were added 5 days to fill the solar year. While the 360 days were all assigned to certain deities, the 5 remaining days were not so assigned, and were considered unlucky. According to this system the same combination of name and number for the first day of the year occurs every 52 years.—**Perpetual calendar,** a calendar with movable parts, which can be easily adjusted so as to be correct for any date, past, present, or future.

calendarer (kal′en-där-ėr), *n.* One who calendars, or who registers or enters in a calendar.

To a *calendarer* the work of writing a Preface must be something like a holiday in Switzerland to an overworked lawyer. *S. R. Gardiner*, Academy, Jan. 29, 1881, p. 74.

calendarian (kal-en-dā′ri-an), *a.* and *n.* [*calendar* + *-ian*.] **I.** *a.* Of or pertaining to the calendar: as, *calendarian* festivals.

II. *n.* A calendar-maker.

calendaric (kal-en-dar′ik), *a.* Same as *calendary*.

One of the most interesting features of aboriginal culture to the scholars of the world is the series of highly developed *calendaric* systems extending from Mexico on the north to Peru on the south.

Smithsonian Rep., 1900, p. 67.

calendarium (kal-en-dā′ri-um), *n.*; pl. *calendaria* (-ä). [L.] 1. A calendar.—2. An apparatus for showing the variations in the temperature of the air; specifically, the large, crude air-thermometer first erected in the open air by Otto von Guericke, about 1655, at Magdeburg.

calender-house (kal′en-dėr-hous), *n.* An establishment where calendering operations are carried on; a calendry.

calender-mill (kal′en-dėr-mil), *n.* A calendering-machine.

calender-roll (kal′en-dėr-rōl), *n.* Same as ★*calender-roller*.

calender-roller (kal′en-dėr-rō″lėr), *n.* A compression-roller used on textile-machinery to smooth and condense the fleece, lap, sliver, or fabric.

calendry (kal′en-dri), *n.*; pl. *calendries* (-driz). An establishment where the process of calendering is carried on: same as *calender*[1], 2.

calends, *n. pl.* 3†. In some translations of the Old Testament, the Jewish festival of the new moon.

David seide to Jonathan, Loo! *Kalendis* ben to morwe. *Wyclif*, 1 Sam. xx. 5.

4. A calendar or orderly record, primarily of dates, but also sometimes of other facts.

For eternity,
Measured by ages limitless to man,
Has intervals and periods of bliss
And high recurring festivals that stand
On the sidereal *calends* mark'd in light.
Bickersteth, Yesterday, To-day and Forever, xii. 317.

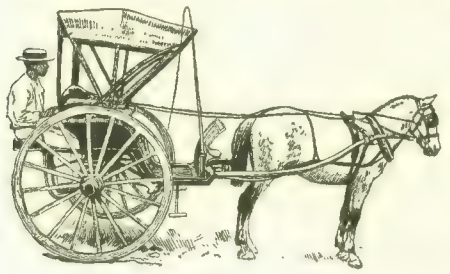
5. An appointed day; a day set for the payment of a debt or the payment of interest due.

While our enemies expect to see the expectation of the Church tired out with dependencies and independencies, how they will compound and in what *calends*.
Milton, Divorce.

calentural (kal'en-ṭū-ral), *a.* [*calenture* + *-al*[1].] Relating to or of the nature of a calenture. *Carlyle.*

calenture, *n.* **2.** Figuratively, fever; burning passion or zeal; heat: as, the "*calenture* of primitive devotion," *Jer. Taylor*; "the *calentures* of baneful lust," *Bp. Ken.*

caleoon (kä-lē-ön'), *n.* [Also *kalioun*; < Pers. *qaliyūn*, var. of *qaliyān.*] Same as ★*calean.*



calepine (kal'e-pin), *n.* [Also *calepin, calapyne*; < F. *calepin*, < *Calepin*, < It. *Calepino*, NL. *Calepinus*, < *Calepio*, a town in Italy (see the def.).] **1.** A dictionary; one's main dictionary or book of reference: in allusion to a polyglot dictionary originally compiled by Ambrogio Calepino, an Augustine friar. It was first printed in 1502, and constituted, in many enlarged editions, one of the lexicographic standards of the sixteenth century. An edition in one huge volume, published in 1590 and 1605, included eleven languages in its scope, English being the very last, after Hungarian and Polish.

Taxations, monopolies, tolls . . . and such impositions as would trouble many *calepines* to give names unto.
Drummond of Hawthornden, Magic Mirror, p. 174.

2. A memorandum-book; a note-book.

calesa (kä-lā'sä), *n.* [Sp. See *calash.*] A springless one-horse vehicle with a bamboo body, used in the Philippine Islands.

calescent (ka-les'ent), *a.* [L. *calescens*, ppr. of *calescere*, grow warm, inceptive of *calere*, be warm.] Increasing in warmth; growing warm.

Calesin.

calesin (kä-lā-sēn'), *n.* [Sp. dim. of *calesa*; see ★*calesa.*] In the Philippine Islands, a two-wheeled chaise or gig.

calesso (kä-les'ō), *n.* [It.: see *calash.*] A modern Italian two-wheeled gig with a bow top.

calf[1], *n.*—**Golden calf,** the idol made by Aaron which the Israelites worshiped (Exod. xxxii), or either of the two similar idols which Jeroboam placed, one at Bethel, and the other at Dan (1 Ki. xii. 28, 29); figuratively, wealth regarded as an object of undue regard.—**In calf,** bound in calf.—**Ooze calf,** leather which is given a plush-like finish on the flesh side.

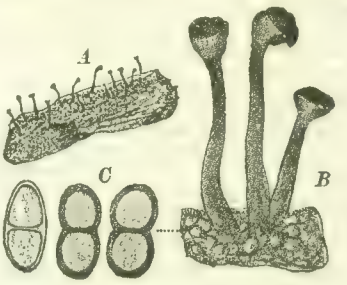
calf[2], *n.* **2.** The part of a stocking which covers the calf of the leg.

calf-kill, *n.* **2.** *Leucothoë Catesbæi*, a shrub of the southern Alleghanies, poisonous to cattle and sheep. Also called ★*dog-hobble* (which see).—**3.** The velvet-grass, *Holcus lanatus.*

calf-lymph (kăf'limf), *n.* The lymph, used in vaccination, obtained from calves.

calhun (kal'hön), *n.* [Aboriginal name in Queensland.] Same as *blue* ★*fig.*

Caliban (kal'i-ban), *n.* [A name either borrowed or formed by Shakspere, prob. originating in *canibal, cannibal.*] In Shakspere's play "The Tempest," a "savage and deformed" slave of Prospero, represented as the offspring of the devil and the witch Sycorax; hence, figuratively, a person of a low, bestial nature.



calibrater (kal'i-brā-tėr), *n.* [*calibrate* + *-er*[1].] An instrument for determining the caliber of any tube, specifically, in *pathol.*, the caliber of the urethra or of its orifice.

Calibration of anemometer, calibration shunt. See ★*anemometer*, ★*shunt.*

calibration-chamber (kal-i-brā'shon-chām″-bėr), *n.* A small vacuous bulb at the top of the stem of a normal mercurial thermometer, in which a part of the mercury may be stored temporarily to facilitate calibration.

Caliciales (ka-li-si-ā'lēz), *n. pl.* [NL., < *Calicium* + *-ales.*] An order of discolichens having crustaceous thalli and usually stipitate black apothecia. See ★*Calicium.*

caliciform, calicinal, calicinated, calicine. See *calyciform, calycinal*, ★*calycinated, calycine.*

Calicium hyperellum.

A, a number of plants showing the habit of growing on decaying wood; *B*, three fruiting bodies; *C*, spores. (From Engler and Prantl's "Pflanzenfamilien.")

Calicium (ka-lis'i-um), *n.* [NL. (Persoon), < L. *calix* (*calic-*), a cup.] A genus of crustaceous lichens of the order *Caliciales*, having black stipitate, gregarious apothecia and two-celled dark-colored spores. The species are widely distributed, occurring chiefly on the bark of trees.

calico disease, marble. See *mosaic* ★*disease*, ★*marble.*

calico-aster (kal'i-kō-as″tėr), *n.* See ★*aster*[1].

calico-back, *n.* **2.** In *entom.*, the harlequin cabbage-bug (which see, under *cabbage-bug*). *Comstock*, Manual of Insects, p. 145.

calico-ball (kal'i-kō-bâl″), *n.* A ball at which the ladies are gowned in calico.

calico-bird (kal'i-kō-bėrd), *n.* Same as *calico-back.*

calicoblast (kal'i-kō-blâst), *n.* [L. *calix* (*calic-*), cup, + Gr. βλαστός, germ.] One of the cells of ectodermic origin which secrete the calcareous particles of the skeleton in *Anthozoa.*

calico-bug (kal'i-kō-bug), *n.* The harlequin cabbage-bug. See *cabbage-bug.*

calico-flower (kal'i-kō-flou″ėr), *n.* Same as *calico-bush.*

calico-jacket (kal'i-kō-jak″et), *n.* Same as *calico-back* and ★*calico-bird.*

calico-salmon (kal'i-kō-sam″un), *n.* A name in Alaska of the dog-salmon, *Oncorhynchus keta*, in allusion to its mottled coloration in the summer, the body being silvery with reddish blotches and obscure blackish crossbands.

calicular. See *calycular.*

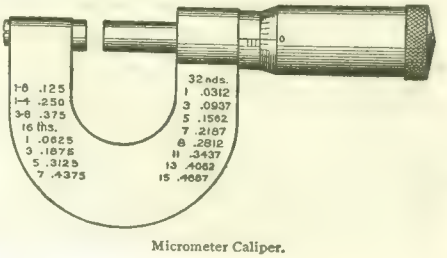
caliculated, *a.* See *calyculated.*

calidarium (kal-i-dā'ri-um), *n.* See ★*caldarium.*

califal, caliphal (kā'lif-al), *a.* [*calif* + *-al.*] Of or pertaining to a calif.

California alder, black walnut, etc. See ★*alder*[1], *black* ★*walnut*, etc.—**Californian centaury.** Same as *canchalagua.*

californite (kal-i-fôr'nīt), *n.* [*California* + *-ite*[2].] A compact, massive variety of vesuvianite, of an olive-green to grass-green color, resembling some kinds of jade. It is found in California and has been used as an ornamental stone.



Caligo corneæ, an opacity of the cornea which obscures vision.—**Caligo lentis,** cataract.—**Caligo pupillæ.** Same as *synizesis*, 1.

cali-nut (kăl'lē-nut), *n.* A flattened circular seed, about one inch in diameter, obtained from the African plant *Mucuna cylindrosperma.* It is occasionally found as an adulterant of Calabar bean, but contains no physostigmine.

caliologist (kal-i-ol'ō-jist), *n.* [*caliology* + *-ist.*] A student of birds' nests.

caliology, *n.* **2.** In *bot.*, the dynamics of the young cell; juvenescence. *J. C. Arthur.*

caliper, *n.* **2.** In *forestry*, an instrument for measuring the diameter of trees or logs. It usually consists of a graduated beam to which are attached one fixed and one sliding arm.—**Combination caliper,** a caliper the legs of which are pivoted at or near the center, one end being used for inside and the other for outside measurements. Usually the pivot is midway between the points of the two ends, so that if an outside measurement be made with one end, the other end will be set to an equal inside dimension.—**Compass caliper,** a two-legged jointed tool having one leg curved as in a caliper, the other straight as in a compass, and pointed. It is used for scribing lines from the edge or outline of a piece of work, the curved leg being slid along in contact with the edge, while the point of the straight leg draws a line parallel therewith; a scriber.—**Double calipers,** calipers having secondary legs pivoted to the end of the first pair of legs.—**Micrometer caliper,** an instrument for measuring thickness (as of wire or sheet-metal) with precision.—**Spherometer caliper.** See ★*spherometer.*

Micrometer Caliper.

calipeva, callipeva (kal-i-pē'vä), *n.* [Also *calipeever, callipiver*, etc.: appar. from a native name.] A mullet, *Mugil curema*, found in the West Indies.

Calippic cycle. Same as *Calippic period* (which see, under *Calippic.*)

calk[1], **caulk** (kâk), *n.* [*calk*[1], v.] A calking; in a slang use, a surreptitious nap; a snooze.

It was my middle watch and I was signal man at the time, so of course I had no time to take a *caulk* if I was inclined. *Marryat*, Peter Simple, p. 284.

calkage (kâ'kāj), *n.* *Naut.*, oakum, cotton fiber, or other material used in calking the seams of a vessel's planking.

calking-boot (kâ'king-böt″), *n.* Same as ★*calking-roll.*

calking-iron, *n.* **2.** A broad-bladed, dull-edged chisel used in driving waterproofing material between the cracks of a stone sidewalk.

calking-roll (kâ'king-rōl), *n.* A horse-boot used to prevent a horse from calking himself. It consists of a heavy leather disk which surrounds the horse's ankle and is secured to it by straps and buckles.

calking-strip (kâ'king-strip″), *n.* A strip of malleable sheet-metal interposed between the body of a wrought- or cast-iron structure and a cast-iron piece attached thereto, which can be upset into the joint by hammering on its edge to make a tight joint. Its employment is rendered necessary by the impossibility of calking the cast-iron itself. Calking-strips are used between boiler-shells and the flanges of brittle cast-iron manhole, safety-valve, and stop-valve seatings.

call[1], *n.*—**A close call,** a narrow escape. [Colloq.]—**Adjutant's call,** See ★*adjutant.*—**Call ball-and-pocket.** See ★*call game.*—**Call game,** in *billiards*, a game in which the striker must name the balls as well as the mode of play before his shot. In *pool* the ball is now called but not the pocket, unless by agreement in special contests or in the opening shot of some games.

calla, *n.*—**Wild calla,** the spoon-flower, *Peltandra sagittæfolia.*

callais (kal'ā-is), *n.* [Gr. κάλλαϊς, or κάλαις, a precious stone of a greenish blue, thought to be turquoise.] A blue- or yellow-green variety of gem found in prehistoric graves of England. It is identified with turquoise, discolored either before or after burial.

callapa (kä-lyä'pä), *n.* [Native name in Bolivia.] A double, long, flat-bottomed raft with low sides, made of balsa-wood, much in use on the streams of the india-rubber districts of central South America. It will accommodate a considerable cargo and is the only craft still used on the smaller rivers of the Beni region in Bolivia.

call-circuit (kâl'sėr'kit), *n.* See ★*circuit.*

call-duck (kâl'duk), *n.* A decoy-duck.

Callechelys (ka-lek'ē-lis), *n.* [NL. for ★*Callenchelys*, < καλλ(ι-), beautiful, + ἔγχελυς, an eel.] A genus of snake-eels of the family *Ophichthyidæ*, comprising a few species widely distributed in tropical seas.

callesthetical (kal-es-thet'i-kal), *a.* Same as *esthetic*: as, *callesthetical* truth. Also *callæsthetical. H. Whewell.*

Callianassa (kal-i-a-nas'ä), *n.* [NL., < Gr. καλλι-, beautiful, + ἄνασσα, queen.] The typical genus of the family *Callianassidæ. C. Stimpsoni* is found in deep burrows along the eastern coast of the United States. *Leach*, 1814.

Callianassidæ (kal-i-a-nas'i-dē), *n. pl.* [NL., < *Callianassa* + *-idæ.*] A family of macrurous decapod crustaceans, having the carapace laterally compressed, the rostrum small or absent, only thoracic gills, and the external maxillipeds operculiform. The typical genus is *Callianassa.*

callianassoid (kal-i-a-nas'oid), *a.* [*Callianassa* + *-oid.*] Resembling or having the form of the *Callianassidæ.*

Calliclinus (kal-i-klī'nus), *n.* [NL., < Gr. καλλι-, beautiful, + NL. *Clinus.*] A genus of blennies, found in tropical seas.

calligrafy, *n.* A simplified spelling of *calligraphy.*

calligraph (kal'i-gràf), *n.* **1.** One skilled in the art of beautiful writing; a calligrapher.—**2.** A transcriber of manuscripts.—**3.** A specimen of beautiful penmanship.

calligraph (kal'i-graf), *v. t.* To write or transcribe in a beautiful manner; produce or reproduce in the best style of the calligrapher's art: as, "a roll finely *calligraphed* and illuminated," *Athenæum*.

calligrapher, *n.* 2. One whose business is the transcribing of manuscripts.

I would have taught him in three weeks a firm, current, clear, and legible hand—he should have been a *calligrapher*. *Scott*, Guy Mannering, xv.

Calliopsis (kal-i-op'sis), *n.* [NL. (Reichenbach, 1824), < Gr. *καλλι-*, beautiful, + *ὄψις*, appearance.] 1. A former genus name of a group of plants of the family *Asteraceæ*, now referred to *Coreopsis*.—2. [*l. c.*] A popular name of various cultivated species of *Coreopsis*, especially *C. tinctoria* (*Calliopsis marmorata* of florists) and *C. lanceolata*.

callisthenical (kal-is-then'i-kal), *a.* [*callisthenic* + *-al.*] Fond of callisthenic exercises; practised in callisthenics.

callithump (kal'i-thump), *n.* [See *callithumpian.*] A charivari (which see). [U. S.]

callithump (kal'i-thump), *v. t.* To treat to a callithumpian concert. [U. S.]

Callitrichaceæ (ka-lit-ri-kā'sē-ē), *n. pl.* [NL. (Lindley, 1836), < *Callitriche* + *-aceæ*.] A family of dicotyledonous achlamydeous plants of the order *Geraniales*, the water-starwort family, containing the genus *Callitriche* only (which see).

callitrolic (ka-li-trol'ik), *a.* [*Callitris* + *-ol* + *-ic.*] Obtained from *Callitris quadrivalvis*. —**Callitrolic acid,** an amorphous acid, $C_{30}H_{48}O_5$, obtained from sandarac.

callitypy (kal'i-tī-pi), *n.* [Gr. *καλλι-*, beautiful, + *τύπος*, type.] A method of forming connected lines by a type-writing machine, applicable to the production of music and other forms of difficult type-setting.

The comparatively difficult and expensive kind of type-composition known as intersecting-rule and rule-and-figure work, which has always been a stumbling block to line-casting and type-setting machines, seems to be the destined particular field of *callitypy*.
Sci. Amer., Sept. 26, 1903, p. 222.

Calliurus (kal-i-ū'rus), *n.* [NL., < Gr. *καλλι-*, beautiful, + *οὐρά*, tail.] An obsolete name of the black bass of the family *Centrarchidæ*.

Callocystites (kal"ō-sis-tī'tēz), *n.* [NL., < Gr. *κάλλος*, beauty, + *κύστις*, a bladder, + *-ίτης*, *-ite*[2].] A genus of *Cystoidea* having four pinnulate arms, three or four pairs of pore-rhombs, and a short tapering stem. It is characteristic of the Upper Silurian of North America.

call-office (kâl'of"is), *n.* In *telephony*, an office or central station where the call-signals from the various telephones of the system are received and transmitted, and where the connections necessary to intercommunication are made.

Callogobius (kal-ō-gō'bi-us), *n.* [NL., < Gr. *καλλι-*, beautiful (*κάλλος*, beauty), + L. *gobius*, goby.] A genus of small gobies found in the East Indies.

callomania (kal-ō-mā'ni-ạ), *n.* [NL., < Gr. *κάλλος*, beauty, + *μανία*, madness.] Excessive love of beauty.

calloo (ka-lö'), *n.* [So called from the sound of its evening call.] The oldwife or long-tailed duck (*Harelda glacialis*) of the arctic regions. See *Harelda*.

Callorhynchus (kal-ō-ring'kus), *n.* [NL., < Gr. *καλλι-*, beautiful (*κάλλος*, beauty), + *ῥύγχος*, snout, beak.] A genus of chimæras found in the antarctic seas. The common species is *C. Callorhynchus*. It ranges northward to Peru.

Callosal fissure. See ★*fissure*.

callosity, *n.*—**Sternal callosity,** a thickening and hardening of the skin beneath the breast-bone, occurring in animals that habitually rest upon the breast, notably the camel and ostrich.

Callovian (ka-lō'vi-ạn), *a.* and *n.* [NL. *Callovia*, E. *Kelloways.*] In *geol.*, noting a division of the Jurassic system, derived from Kelloways in Wiltshire. The term is not as much in use in Great Britain as on the continent of Europe, where it is applied to beds generally regarded as equivalent to the lower part of the Oxford Clay and the Kelloways Rock. In France the Callovian is divided into a lower and an upper (Divesian) division, and its position in the Jurassic series is below the Oxfordian and above the Bathonian, lying at the base of the Middle Oölite.

callow[1], *n.* 2. In *entom.*, an insect just emerged from its cocoon: especially applied to ants.

The queen manifestly recognized the odor borne by the *callows*, and at once snuggled with them. They each recognized in her and in each other the only ant-odor they had ever known, that of their own bodies.
Biol. Bulletin, Oct., 1904, p. 231.

call-slip (kâl'slip), *n.* The slip used by a reader or borrower in a library, in calling for a book or books. It is a blank form with spaces for the name and address of the borrower (or the number of the borrower's card), the shelf-number, a brief title of the book called for, the date, etc.

callum (kal'um), *n.*; pl. *calla* (-ạ). [L. *callum*, a callus: see *callus*.] In the burrowing pelecypod mollusk *Pholas*, a calcareous septum secreted after the completion of the burrow and occupying the pedal gape of the valves.

callunetum (kal-ū-nē'tum), *n.* [*Calluna*, heather, + *-etum.*] In *phytogeog.*, a formation consisting of heather, *Calluna vulgaris*.

callus, *n.*—**Definitive** or **permanent callus,** material exuded between the ends of a broken bone, which later is converted into true osseous tissue.—**Provisional** or **temporary callus,** callus thrown out around the ends of a broken bone and in the medullary cavity, which serves as a splint and is later in great part or wholly absorbed.

callutannic (kal-ū-tan'ik), *a.* [*Callu(na)* + *tannic.*] Derived from *Calluna vulgaris*, and having a tannic relation.—**Callutannic acid,** an amorphous compound, $C_{14}H_{14}O_9$(?), obtained from *Calluna vulgaris*.

call-wire (kâl'wīr), *n.* In *telephony*, a wire over which call-signals between the call-office or central station and any individual instrument or between individual instruments are transmitted; a call-circuit.

calm[1], *n.*—**Calms of Cancer,** the region of high pressure and light wind under the greater part of the tropic of Cancer in the Atlantic and Pacific oceans, but a little north of it over the eastern and western continents. On the Atlantic Ocean this calm region was known to the early English navigators as the *horse latitudes*.

Calomel electrode. See ★*electrode*.

Calonectria (kal-ō-nek'tri-ạ), *n.* [NL. (De Notaris), < Gr. *καλός*, beautiful, + *Nectria*, a genus of fungi.] A genus of pyrenomycetous fungi having membranous, bright-colored perithecia and mostly two or more septate, hyaline spores. *C. pyrochroa* is said to cause the death of young leaves of the sycamore, *Platanus occidentalis*.

calool (kä-löl'), *n.* [Aboriginal name in northern New South Wales.] An Australian tree, *Sterculia quadrifida*. See *Sterculia*, 1.

Caloric theory of heat. See *heat*.

Calorific capacity, the capacity of a body for heat, usually expressed in calories per degree centigrade; thermal capacity.—**Calorific intensity,** the heating effect of a fuel, expressed by means of the temperature that may be attained from it by complete combustion. Also called *pyrometric effect*.—**Calorific power,** the quantity of heat, in gram-calories, obtained by the complete combustion of a gram of a fuel; heat of combustion.—**Calorific value,** the heat-value; the calories or thermal units contained in one unit of the substance, and released when it is burned.

calorifier (ka-lor'i-fī-ėr), *n.* An apparatus for heating fluids.

calorify (ka-lor'i-fī), *v. t.* [L. *calor*, heat, + *-i-fy.*] To make hot; affect with heat.

calorimeter, *n.* The calorimeter is used to determine, in thermal units, the heat liberated or absorbed in the course of any physical or chemical process, such as change of temperature, change of state, the solution of a solid in a liquid, the mixture of liquids, chemical action, or any mechanical, electric or magnetic process involving transformations of energy. The thermal unit almost universally employed is the calory, that is, the amount of heat required to raise one gram, or sometimes one kilogram, of water from 0° C. to 1° C.; but other thermal quantities, the relation of which to the calory is definitely known (such as the heat of fusion of ice, or the heat of vaporization of water), are sometimes used. For the determination of specific heat the calorimeter commonly consists of a metal vessel, the water-equivalent of which is known, containing a known quantity of water of known temperature. The substance the specific heat of which is to be determined is weighed, heated to some carefully measured higher temperature, and plunged into the water, and the change in the temperature of the latter is observed. The most serious error in this operation is that arising from the exchange of heat between the calorimeter and its surroundings, and numerous devices have been employed to reduce this error to a minimum. For this purpose the calorimeter (*C*) is sometimes suspended within an outer chamber (*o*, *o*) by non-conducting supports as shown in Fig. 1. The outer surface of the calorimeter and the inner surface of the containing-vessel, both of which are metal, are highly polished in order to diminish radiation. In the *Waterman calorimeter* the substance to be tested is heated in a vessel surrounded by a coil of wire through which an electric current flows. It is then placed in a cup (*C*, Fig. 2) with double walls, which serves as the bulb of an air-thermometer. Ice-cold water is added in quantity just sufficient to counterbalance the rise of temperature. The mercury column in the manometer tube (*m*) indicates the temperature of the cup. Much more perfect isolation may be obtained by using as a calorimeter a Dewar flask. This consists of a glass vessel (Fig. 3) with double walls, from the space between which the air has been carefully removed. The outer surface of the inner flask and the interior of the outer one are silvered. The exchange of heat under these conditions is exceedingly slow, and such flasks form excellent calorimeters. The determination of specific heats by means of

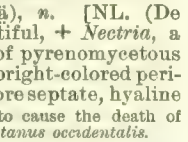


Fig. 1.

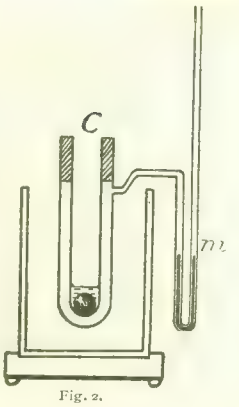

Fig. 2.

Fig. 3. Dewar Flask.

the fusion of ice was first suggested by Black, in the eighteenth century, who employed for this purpose a block of

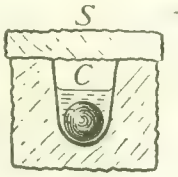

Fig. 4.

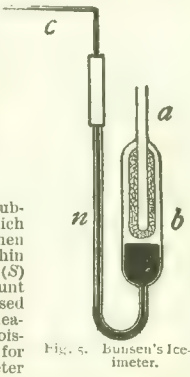

Fig. 5. Bunsen's Ice-calorimeter.

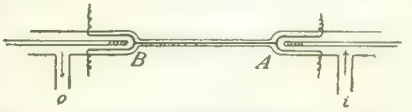
clear ice (Fig. 4). The substance the specific heat of which is desired is heated and then placed in a cavity (*C*) within the block. A slab of ice (*S*) serves as a cover. The amount of water melted by the inclosed body in cooling to 0°C. measures the specific heat. Lavoisier and Laplace substituted for Black's ice-block a calorimeter consisting of an inner cage containing the body to be tested, surrounded by a double-walled vessel packed with broken ice at the melting-point. The ice melted by the heat liberated from the cooling body was collected and weighed. In *Bunsen's ice-calorimeter* the amount of ice melted is determined by the change in volume which that substance undergoes when converted into the liquid form. The apparatus, which is shown in Fig. 5, consists of an inner tube of glass (*a*) sealed into a larger vessel of the same substance (*b*), the neck of which (*n*) is bent upward and ends in a horizontal capillary tube (*c*). The upper portion of the outer vessel surrounding the tube *a* is filled with water, below which is mercury extending continuously through the neck into the capillary tube. By means of a freezing-mixture in *a*, a mantle of ice is formed around the outside of the inner tube, after which the freezing-mixture is removed and the whole apparatus is packed in melting ice. If now a body the specific heat of which is to be determined is introduced into *a*, a portion of the ice-mantle will be melted, and, in consequence of the diminution of volume, the mercury column in the capillary tube will recede toward the neck of the calorimeter. Its movement affords a measure of the volume of ice melted, and thus of the heat liberated by the cooling body. The Bunsen ice-calorimeter is an instrument of great delicacy and is specially adapted for the measurement of very small quantities of heat. Unfortunately, the density of the ice depends somewhat upon the rapidity with which it is formed, and considerable errors are thus introduced. The heat of vaporization of water has been utilized by Joly and others for calorimetric purposes. The *Joly steam-calorimeter* depends upon the determination of the amount of moisture condensed upon the surface of a substance when the latter is plunged into an atmosphere of steam. This apparatus consists of a steam-chamber with thin metal walls, within which, suspended from an arm of a balance, hangs a small platinum scale-pan of conical form. A known weight of the substance the specific heat of which is to be determined is placed on the pan, and its temperature is noted. Steam is then introduced into the chamber, and condensation occurs on the surface of the cool body, adding to its weight. When the substance has attained the temperature of the steam, and condensation is complete, the increase of weight is determined. For the determination of the specific heat of liquids and gases, various forms of calorimeter have been devised. One of these, the *continuous-flow calorimeter* of Callendar and Barnes, which has been employed in the determination of the specific heat of water at various temperatures, is shown diagrammatically in Fig. 6. It consists essentially of a



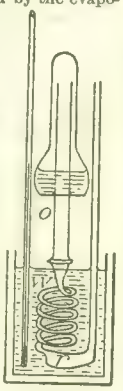


Fig. 6. Continuous-flow Calorimeter of Callendar and Barnes.

capillary tube (*AB*) connecting at the ends with larger tubes and sealed into a glass vacuum-jacket. The liquid the specific heat of which is to be determined enters the tube at *i* and flows out at *o* at a measured rate. By means of a fine wire stretched through the bore of the capillary tube and supplied with a known electric current, heat is imparted to the liquid. The temperatures of the inflowing liquid at *A* and of the outflowing liquid at *B* are de-

termined by means of the resistance of coils of platinum wire inserted in the larger tubes. From the amount of liquid passing in a given time and the amount of heat delivered to it electrically from the heating-wire, together with the difference of temperature at the ends of the tube, the specific heat of the liquid can be determined with great accuracy. For the determination of heats of combustion, heats of solution, and other thermochemical processes, a number of special forms of calorimeter have been devised. Among these are the *Favre and Silberman calorimeter*, in which the heat of a chemical reaction is imparted to mercury contained in a bulb with a capillary neck, and the expansion of the liquid is noted; the *Junker calorimeter* and the *bomb calorimeters* of Berthelot and Stohmann, for the study of heats of combustion; and the *respiration calorimeter*, for the determination of the heat evolved by animals or by human subjects. Other forms, called *electrocalorimeters*, are employed for measuring the heat developed by the electric current.—**Berthelot calorimeter.** (*a*) An apparatus for measuring the latent heat of vaporization. It consists essentially of a glass vessel with central outlet-tube (*o*) connecting with a glass worm (*w*) for condensing the vapor formed by the evaporation of the liquid in the vessel. The worm and receiver (*r*) for the condensed vapor are submerged in a water-bath, the rise of temperature of which is noted. (*b*) A form of bomb calorimeter for the determination of the heat of combustion. See ★*calorimeter*.—**Respiration calorimeter**, a calorimeter for measuring the heat given off by a man or other animal, with appliances for respiration such that the heat and chemical components of the products of respiration which are carried away in the ventilating current of air may be measured; or the carbon dioxid and water-vapor of respiration may be absorbed and removed and a measured quantity of oxygen supplied in lieu of fresh air. The apparatus has been used to investigate problems in physiological chemistry both with man and with domestic animals such as the horse, cow, and sheep. The best-known form of respiration calorimeter is that of Professors Atwater and Rosa, with which they carried out an extended series of investigations at Wesleyan University, Middletown, Connecticut, to verify the law of conservation of energy in the human body. Such a test involves a determination of the total energy received by the body, during a given period, in the food and drink taken, and the total energy given off by the body in the same time, chiefly heat radiated from the body and carried away in respired air, but to some extent contained in the solid and liquid excreta of the body. If muscular work is done by the body, it also must be measured and included in the output of energy. The law of the conservation of energy requires that the total energy supplied to the body in a given time shall equal the total energy given out in the same time, plus whatever increase of energy there may have been in the body during that period, or minus any decrease of energy, as the case may be. A series of experiments extending through several years gave very close balances of income and outgo, and demonstrated, as was of course expected, that the law is fulfilled in animals as well as in inorganic systems. The essential features of the calorimeter are the following: (1) a metal chamber, furnished with a chair, table, and bed, in which the subject of the experiment (usually a man) lives, eats, drinks, sleeps, and sometimes works, during a period of several days and nights. (2) Arrangements for ventilating the chamber and for analyzing and measuring the air supplied to and received from the chamber. (3) Facilities for passing food and drink into the chamber and for removing excreta. These materials are weighed and analyzed by sample, and their heat of combustion determined. (4) Facilities for measuring the heat given off by the body and the heat-equivalent of any muscular work done. The income and outgo of energy of the body are expressed in terms of heat, the total heat of combustion of the food eaten being compared with the total heat given off by the body. The analyses of the food and excreta also show the digestibility of the food; that is, the proportion of the nutrients actually utilized in the body. The complete apparatus is complicated, and each experiment is laborious and expensive. Observations are taken constantly, day and night, by several observers during the entire period of the experiment, usually lasting from four to eight days. The results obtained have been of the highest scientific value.—**Throttling calorimeter**, a device for ascertaining the moisture in steam by throttling the steam and then allowing it to expand to about atmospheric pressure. The expanded steam is somewhat superheated, the degree of superheating depending on the moisture in the steam before throttling.

Berthelot Calorimeter.

Calorimetric bomb. Same as ★*explosion-bomb*.

caloripuncture (kal″ō-ri-pungk′tūr), *n.* [L. *calor*, heat, + *punctura*, puncture.] Same as *ignipuncture*.

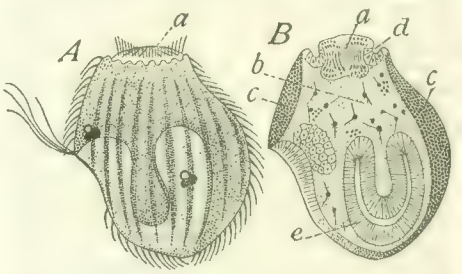
caloristic (kal-ō-ris′tik), *a.* [*calorist* + *-ic*.] Of or pertaining to the calorists, a school of physicists, chiefly of the eighteenth century, who assumed as the basis of their theory of heat the existence of an imponderable fluid called *caloric*.

caloritropic (kal″ō-ri-trop′ik), *a.* [L. *calor*, heat, + Gr. *τρόπος*, a turn: see *tropic*.] Same as *thermotropic*. *Klercker*.

caloritropism (kal-ō-rit′rō-pizm), *n.* [*caloritrop-ic* + *-ism*.] Same as *thermotropism*. *Klercker*.

calorizator (kal″ō-ri-zā′tor), *n.* [L. *calor*, heat, + *-ize* + *-ator*.] A cylinder, used in the diffusion process for the extraction of sugar from beets, which serves to warm the juice to the proper temperature in passing from one diffusion-cylinder to another. *Sadtler*, Handbook of Indust. Chem., p. 139.

calory, *n.*—**15° water calory,** a calory in which the water used as a standard of thermal capacity is taken at 15° C., mean temperature, and the thermometric scale is that of the hydrogen thermometer.—**Gram-calory.** See *lesser* ★*calory*.—**Greater calory,** the quantity of heat necessary to raise a kilogram of water from 0° to 1° C.; 1,000 gram-calories.—**Kilogram calory,** a unit of heat in which the quantity of heat designated is that necessary to raise one kilogram of water 1° C. Usually called a *large* or *greater calory* as distinguished from the *gram-calory* or *lesser calory*.—**Lesser calory,** the quantity of heat necessary to raise a gram of water from 0° to 1° C. Also called *small calory* and *gram-calory*. See *calory*.—**Ostwald calory,** the amount of heat required to heat one gram of water from the freezing-point to the boiling-point: a unit called by Ostwald the *rational calory*, which is nearly equal to one hundred common calories.



Calosoma, *n.*—**Copper-colored Calosoma.** Same as ★*copper-spot* (which see).

Calosphæria (ka-lō-sfē′ri-ä), *n.* [NL. (Tulasne), ⟨Gr. *καλός*, beautiful, + *σφαῖρα*, sphere (cf. *Sphæria*).] A genus of pyrenomycetous fungi having the perithecia arranged in groups beneath the outer bark of the host. The spores are one-celled, hyaline, and sausage-shaped. About 35 species have been described. *C. princeps* is common on the cherry and plum in Europe and America.

Calostoma (ka-los′tō-mä), *n.* [NL. (Desvaux), ⟨ Gr. *καλός*, beautiful, + *στόμα*, mouth.] A genus of tericolous puffballs of the order *Lycoperdales*, having the peridium at the apex of a stalk composed of interlaced strands of gelatinous hyphæ and opening by means of a stellate mouth which is bright-colored in one species, *C. cinnabarinum*.

Calostoma lutescens. A fruiting body showing the habit in the developed state. (From Engler and Prantl's "Pflanzenfamilien.")

calotte, *n.* 6. In *geol.*, an ice-cap or a glacier covering a large land area. *J. Geikie*, The Great Ice Age, p. 711.—7. In *zoöl.*: (*a*) The pole of attachment of *Dicyemidæ* which are parasitic in the kidneys of certain cephalopods; the polar cap. (*b*) In *Polyzoa*, a retractile disk formed at the aboral pole in the developing larva.

A, Larva of *Bugula plumosa*: *B*, Sagittal Section of Larva of *Bugula* (diagrammatic). *a*, calotte or retractile disk; *b*, parenchyma; *c*, corona; *d*, ectodermal groove; *e*, sucker. (From Parker and Haswell's "Zoology," after Korschelt and Heider.)

calotypic (kal-ō-tip′ik), *a.* [*calotype* + *-ic*.] Of or pertaining to a calotype picture: as, *calotypic* impressions.

Calpicarpum (kal-pi-kär′pum), *n.* [NL. (G. Don, 1838), ⟨ Gr. *κάλπις*, pitcher, urn, + *καρπός*, fruit.] A genus of dicotyledonous plants of the family *Apocynaceæ*. The fruit consists of two obovoid, obliquely quadrate, coriaceous, or somewhat fleshy carpels. See *Kopsia*.

calpis, *n.* See *kalpis*.

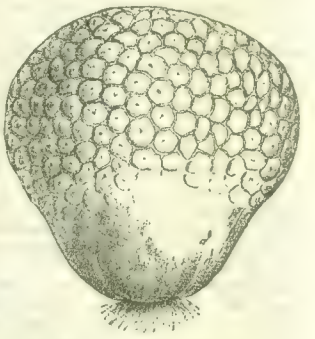
calpulli (käl-pöl′yē), *n.* [Nahuatl, aug. of *calli*, house.] A quarter of a town; a district; also, the people inhabiting a quarter of a town.

caltrop, *n.* 4. In the nomenclature of the spicular elements of sponges, a tetraxial spicule having the form of a caltrop, with four equal simple smooth arms radiating from a central point.—5. *pl.* In *entom.*, the short, sharp, curved spines which occur in scattered groups in the integument of certain lepidopterous larvæ of the family *Limacodidæ*, and which are responsible for the urticating effect produced on the human skin by these larvæ. *A. S. Packard*, Text-book of Entom., p. 189.

calumba, *n.*—**American calumba.** Same as *American columbo* (which see, under *columbo*).

calumbin (ka-lum′bin), *n.* Same as *columbin*.

calumny, *n.*—**Oath of calumny.** See ★*oath*.



calumpang (kä-lum′päng), *n.* [Also *kalumpang*; Philippine Sp. *calumpang, calompang, calumpan*; ⟨ Pampanga *calumpang*.] See ★*kalumpang*.

calumpit (kä-lùm-pēt′), *n.* [Also *kalumpit*; Philippine Sp., from an untraced native name.] See ★*kalumpit*.

calut (kä-löt′), *n.* [Philippine Sp. *calut*, also *carut, carot* (see ★*carot*), ⟨ *Pampanga calut*.] A plant (*Dioscorea triphylla*) of the Philippine Islands the root of which is sometimes cooked and eaten, and in times of scarcity may become the staple article of food among the mountaineers. Also *carote* and *nami*.

calvarial (kal-vā′ri-äl), *a.* [L. *calvaria*, the skull, + *-al*.] Of or pertaining to that portion of the skull which is known as the calvarium, or calvaria: as, the *calvarial* sutures; cranial.

Calvatia (kal-vā′shiä), *n.* [NL., (Fries, 1849), ⟨ L. *calvus*, bald, from the manner in which the mass of spores is laid bare.] A genus of gasteromycetous fungi of the order *Lycoperdales*. The peridium is sessile and has a more or less thickened sterile base, which at maturity breaks away in angular fragments from the top, leaving exposed the powdery mass of spores. This genus includes the largest of the puffballs. *C. maxima*, an edible species, sometimes called the *giant puffball*, has been reported as attaining a size of three feet in diameter. *C. cælata* and *C. cyathiformis* are common species growing in old pastures.

Calvatia cælata. Fruiting body, three quarters natural size. (From Engler and Prantl's "Pflanzenfamilien.")

Calvinistic Methodists. See ★*Methodists*.

calx[1], *n.*—**Blue calx,** a kind of Thenard's blue made by roasting a mixture of cobalt oxid with a china-clay and quartz, and grinding the resulting mass to great fineness in water. *Langenbeck*, Chem. of Pottery, p. 120.

calycanth (kal′i-kanth), *n.* A plant of the genus *Butneria* (*Calycanthus*) or family *Calycanthaceæ*.

calycanthaceous (kal″i-kan-thā′shius), *a.* [*Calycanthaceæ* + *-ous*.] Belonging to the plant family *Calycanthaceæ*.

calycanthin (kal-i-kan′thin), *n.* [*Calycanth-us* + *-in*[2].] A glucoside, $C_{25}H_{28}O_7$, found in *Butneria florida* (*Calycanthus floridus*). It is easily soluble in water, giving a fluorescent solution.

calycanthine (kal-i-kan′thin), *n.* [*calycanthus* + *-ine*[2].] An alkaloid, $C_{11}H_{14}N_2 + \frac{1}{2}H_2O$, found in *Butneria* (*Calycanthus*) *fertilis*. It is a monacid base and is a violent poison, somewhat resembling strychnine in its action. The anhydrous alkaloid melts at 244° C.

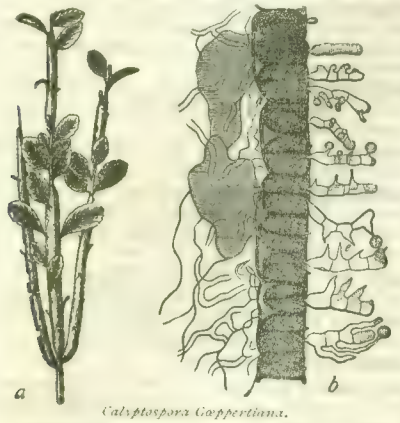
Calycilepidotus (kal″i-si-lep″i-dō′tus), *n.* [NL., ⟨ Gr. *κάλυξ*, cup, + *λεπιδωτός*, scaled, scaly.] A genus of sculpins with rough scales, found on the coast of California. The known species is *C. spinosus*.

calycin (kal′i-sin), *n.* [Gr. *κάλυξ* (*καλυκ-*), cup, + *-in*[2].] A crystalline reddish-yellow compound, $C_{18}H_{12}O_5$, found in a number of lichens. It melts at 243° C.

Calycina (kal-i-sī′nä), *n. pl.* [NL.: see *calycine*.] A suborder of *Diademoida* in which the apical system is very large and includes one or more supplementary supra-anal plates.

Calycinal gemmation, in the *Anthozoa*, the production of new individuals by the process of budding within the calice of the parent polyp. This may be effected in two ways: either certain septa become enlarged and produced so that they inclose a new calycinal disk (septal gemmation) or tabulæ are produced upward in the form of pockets from which new calices are developed (tabular gemmation).—**Calycinal theory,** a theory of the origin of the echinoderms based upon the opinion that they all show evidence of the presence, or former presence, of a system of symmetrically placed polygonal calcareous plates comparable to, or homologous with, the calycinal system of a stalked crinoid. According to this theory all the classes are the more or less modified descendants of a primitive, probably stalked, ancestral form which is best exemplified in the stalked crinoids, which are held to be the most primitive of all known echinoderms. See ★*Pentactæa theory*, ★*Pelmatozoic theory*.

calycinated (ka-lis′i-nā-ted), *p. a.* [*calycine* + *-ate*[1] + *-ed*[2].] Made cup-shaped; fashioned in the form of a cup.



Calyconectæ (kal″i-kō-nek′tē), *n. pl.* [NL., ⟨ Gr. *κάλυξ*, cup, + *νήκτης*, swimmer.] A section

or suborder of siphonanthous *Siphonophora*, having one or more nectocalyxes, no pneumatocyst or palpons, and with the cormidia ordinate.

calyculate, *a.* **2.** In *zoöl.*: (*b*) Having the surface furnished with depressions formed by the reticulate folding of the skin: specifically applied by Cope to the structure of the hemipenes of various snakes.

"Hemipenis *calyculate*, spinous; sulcus simple; no disc . . . *Colubrinæ*."
Cope, in Rep. U. S. Nat. Mus., 1898, p. 732.

Calyptospora (ka-lip-tos′pō-rä), *n.* [NL. (J. Kuhn), < Gr. *καλυπτός*, covered, + *σπορά*, seed (spore).] A genus of fungi of the order *Uredinales*. The æcidial stage occurs on leaves of conifers, especially *Abies Picea* in Europe. The teleutospore form attacks the branches of various species of *Vaccinium*, forming a smooth brown elevated layer. The single species, *C. Gæppertiana*, is widely distributed in Europe and North America.

Calyptospora Gœppertiana.

a, branch of the cranberry deformed by the fungus; *b*, longitudinal radial section through the bark of a stem of the cranberry showing the germinating teleutospores. (From Engler and Prantl's "Pflanzenfamilien.")

calyptrogen, *n.* (*b*) The layer of tissue covering the young embryo, as in ferns. *Jackson*, Glossary.

Calystegia (kal-i-stē′ji-ä), *n.* [NL. (Robert Brown, 1810), irreg. < Gr. *κάλυξ*, calyx, + *στέγη*, roof, covering. The name alludes to the two large bracts covering the base of the calyx.] **1.** A former genus name of several plants of the family *Convolvulaceæ*, now referred to *Convolvulus*.—**2.** [*l. c.*] A plant of this group. The species are annual or perennial herbs, sometimes suffrutescent, twining, trailing, erect, or ascending, with filiform creeping rootstocks. The commonest cultivated plants of this group are the California rose (*Convolvulus Japonicus*) and Rutland beauty (*C. sepium*), both herbaceous perennial twiners with pink or white flowers, resembling in form those of the morning-glory.

calyx, *n.*, **3.** (*f*) The expanded, cup-like, deciduous structure on the ends of the stems of certain entoproctous *Polyzoa*, containing most of the organs and hence practically an individual. (*g*) A depression formed by the more or less reticulate folding of the skin, as in the intromittent organs of snakes.

"The surface is reticulate like tripe, the inclosed areas forming *calyces*, which may have a suctorial function." *Cope*, in Rep. U. S. Nat. Mus., 1898, p. 701.

4. A cup-shaped excavation on the surface of the ovary which remains after the rupture of a Graafian vesicle.—**5.** Any circular piece which resembles in form the calyx of a flower.—**Calyx drill.** See ★*drill*¹.—**Calyx of the brain,** in *entom.*, the cap of one of the mushroom bodies. See *mushroom* ★*body*. *A. S. Packard*, Text-book of Entom., p. 233.

calzada (käl-thä′dä), *n.* [Sp.: see *causey, causeway.*] A paved road or highway; a causeway.

cama² (kä′mä), *n.* [Sp., a couch, lair.] In *phys. geog.*, a prairie-like basin-floor inclosed by hills or uplands. [Western U. S.]

camagon, *n.* See ★*kamagon*.

Camaldolensian (ka-mal′dō-len′si-an), *a.* and *n.* [ML., **Camaldulensis*, adj., < *Camaldules*, name of the order. See *Camaldolite*.] **I.** *a.* Of or pertaining to the Camaldolites.

II. *n.* A Camaldolite.

Camaldolese (ka-mal-dō-lēs′ or -lēz), *n.* and *a.* **I.** *n.* Same as *Camaldolite*.

II. *a.* Of or pertaining to the Camaldolites.

Camaldoli (ka-mal′dō-lī), *n. pl.* [ML. See *Camaldolite*.] Same as *Camaldolites*.

camalig (kä-mä-lig′), *n.* [Tagalog.] In the Philippine Islands, a warehouse for storing goods; also a small house or cabin.

camanchile (kä-män-chē′le), *n.* A Mexican tree introduced into the Philippines. See ★*kamachiles*.

camansi (kä-män′sē), *n.* See ★*kamangsi*.

camarasaur (kam′a-ra-sâr), *n.* A member of the genus *Camarasaurus*.

Camares ware. See ★*ware*².

camarilla, *n.* **2.** A small chamber or cell, as in the brain. *Emerson*.

camaron (kä-mä-rōn′), *n.* [Sp., < *camaro*, < L. *cammarus, camarus*, a sea-crab.] Same as *cammaron*. [West Indies.]

camarostome (kam′a-rō-stōm), *n.* [Gr. *καμάρα*, a vault, + *στόμα*, mouth.] Same as *labrum*: used by writers on the *Arachnida*.

camass, *n.*—**Poison camass, white camass,** the death camass, *Zigadenus venenosus*, a plant which causes severe losses of sheep in Montana and elsewhere. In cases of poisoning, a solution of permanganate of potash and sulphate of aluminium has been found an effective remedy. According to some the death camass includes several species.

cambism (kam′bizm), *n.* The theory and practice of exchange. See *cambist*.

Cambodian (kam-bō′di-an), *a.* and *n.* [*Cambodia* + *-an*.] **I.** *a.* Of or pertaining to Cambodia, a French dependency in southeastern Asia.

II. *n.* A native of Cambodia.

cam-box (kam′boks), *n.* **1.** A frame surrounding a cam and designed to compel the rod which the cam drives to follow the return motion of the projecting lobe.—**2.** A casing inclosing the cam and its rollers in order that copious lubrication may be secured by having the cams revolve in a bath of oil.

Cambridge cheese, greensand. See ★*cheese*¹, ★*greensand*.

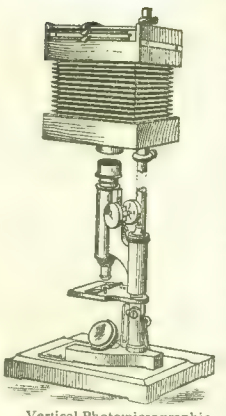
cameist (kam′ē-ist), *n.* [*cameo* + *-ist*.] A gem-engraver; one who cuts or carves cameos; also, one who is a collector or connoisseur of cameos.

camel, *n.*—**Giraffe camel, giraffe-necked camel,** an extinct species of camel, having the neck and leg-bones as long as those of a giraffe. Remains of it are found in the White River Oligocene.

camel-back (kam′el-bak), *n.* **1.** A form of steam-boiler, of large water-capacity, in which a second drum or shell is placed over the principal one, somewhat as is done in an elephant-boiler.—**2.** A form of locomotive engine in which the fire-box has an unusual width so as to secure a low rate of combustion per square foot of grate. The engineer's cab has to be placed in front of the fire-box, and is somewhat in the same relative position on the boiler as is the hump of the camel on its back.

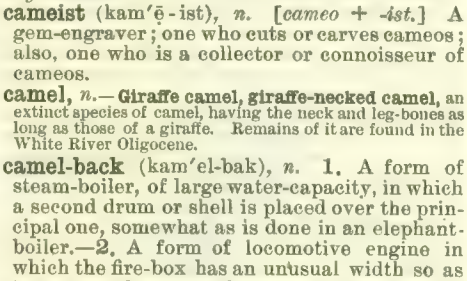
Camelina oil. See ★*oil*.

camel-kneed (kam′el-nēd), *a.* Having callosities on the knees like those of a camel.



Camellia scale. See ★*scale*¹.

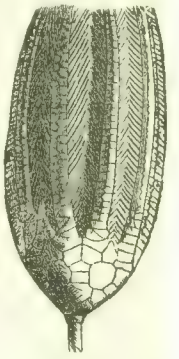
camellin (ka-mel′in), *n.* [*Camellia* + *-in*².] A glucoside, $C_{53}H_{84}O_{19}$ (?), found in the seeds of *Thea* (*Camellia*) *Japonica*.



camelopard, *n.* **3.** [*cap.*] In *astron.*, the constellation *Camelopardalis* or *Camelopardus*.

camel-wasp (kam′el-wosp), *n.* Any one of the horntails of the genus *Xiphydria*. All have large heads and long necks.

camera, *n.* **5.** A chamber, as of a house, a mine, a gun, etc.; any inclosure with a roof. —**6.** A box-shaped device for viewing tubes containing colored solutions by transmitted light, the eyes being shielded from other light. —**7.** In *zoöl.*, same as ★*air-chamber*, 4.—**Binocular camera,** a photographic camera with two objectives, used in obtaining stereoscopic pictures.—**Cyclorama camera,** a camera designed to make a complete panoramic picture at one exposure. This is accomplished by means of a mechanism which revolves the camera in one direction about a pivot directly below the center of the lens, while the film is simultaneously moved by clockwork in the opposite direction.—**Kite-camera,** a photographic camera attached to a kite for taking views from an elevation. The shutter is operated through the burning of a fuse.—**Magazine-camera,** a camera in which batches of sensitive plates are inserted and exposed in succession.—**Panoramic camera.** See *panoramic*.—**Photomicrographic camera,** a photographic camera used in conjunction with a microscope, the image of the object under the microscope being focused on the sensitive plate.—**Pinhole camera,** a photographic camera in which a pinhole in the front board replaces the objective, the rays of light being brought to a focus on the ground glass or sensitive surface and producing an image.—**Polariscopic camera,** a camera provided with polarizing apparatus, usually a double-image prism interposed in the path of the light-rays, and used to investigate the polarization of the light from an object: especially used in investigating the solar corona.—**Prismatic** or **spectroscopic camera,** a form of objective prism spectroscope (which see), consisting of a photographic camera with a lens of rather long focus, and a prism or series of prisms in front of the lens. It is of especial use in photographing the phenomena of a solar eclipse during the time of total obscuration.—**Watch-camera,** a camera of the size and shape of a watch.



Vertical Photomicrographic Camera.

Binocular Camera.
Draw-slides out, plates exposed.

Camerata (kam-ē-rā′tä), *n. pl.* [NL., neut. pl. of L. *cameratus*, arched, vaulted.] In Wachsmuth and Springer's classification of the *Crinoidea*, now generally adopted, the second and largest of the five orders of these organisms. It is characterized by having the lower radial plates incorporated into the dorsal cup, the tegmen vaulted, with mouth and food-grooves covered, and the anal opening frequently at the end of a proboscis-like tube inclosed by the free arms. These forms occur only in the Paleozoic rocks. The accompanying illustration shows a fossil crinoid, *Patelliocrinus leptodactylus* (Angelin), of the Silurian system, and order *Camerata*.

Patelliocrinus leptodactylus. Ang. sp. Silurian; Gotland.

Natural size (after Angelin). (From Zittel's "Palæontology.")

camerate (kam′ē-rāt), *a.* [L. *cameratus*, vaulted: see *camerate, v.*] Same as *camerated*.

camerated, *p. a.* **3.** Bearing cameras, as the shells of the *Cephalopoda, Foraminifera*, etc.

camerist (kam′ē-rist), *n.* [*camera* + *-ist*.] One who operates a photographic camera; a photographer.

Then, when a high wind is encountered, the cloth at one end can be buttoned around the camera, and at the other around the head or face of the *camerist*.
Boston Transcript, Feb. 23, 1900.

camfene, *n.* A simplified spelling of *camphene*.

camfor, *n.* A simplified spelling of *camphor*.

cam-gear (kam′gēr), *n.* A gear which is set eccentrically on the shaft; a gear the outline of which is not circular.

camik (kä′mik), *n.* [Eskimo *kamik*, a pair of boots.] A native boot made of soft sealskin, used by the Labrador and New England whalers.

Camillus shale. See *Salina* ★*beds*.

camino (kä-mē′nō), *n.* [Sp. = F. *chemin*, a road.] A road.

camisa (kä-mē′sä), *n.* [Sp.: see *camis, chemise.*] A shirt; a chemise; specifically, a waist made of piña, white or dyed, embroidered, and with loose sleeves, worn by the native women of the Philippine Islands.

camlee, camly (kum′li), *n.* [Hind. *kamli*, < Skt. *kambala*.] Same as *cumbly*.

camlet-fly† (kam′let-flī), *n.* A fly with mottled wings. *N. E. D.*

camline (kam′lin), *n.* [Shortened from *camelina*: see *camelina*³ and *cameline*³.] The false flax, *Camelina sativa*.

cam-loom (kam′lōm), *n.* A loom whose heddle-shafts are operated by means of cams.

cammac (kam′ak), *n.* A copper halfpenny current in Ireland in the early part of the nineteenth century: so called from the name of the maker, a proprietor of copper-mines.

Cammarum (kam′a-rum), *n.* [NL. (Hill, 1756), < Gr. *κάμμαρος*, a kind of aconite.] A genus of dicotyledonous plants of the family *Ranunculaceæ*. See *Eranthis*.

camomile, *n.*—**False camomile.** Same as ★*Boltonia*.

camomile-oil (kam′ō-mīl-oil), *n.* A light-blue volatile oil of strong but pleasant odor, obtained by the distillation of the flower-heads of Roman camomile, *Anthemis nobilis*. Under the influence of light and air it changes to greenish and brownish yellow.

camomile-shark (kam′ō-mīl-shärk), *n.* A British collectors' name for a noctuid moth, *Cucullia chamomillæ*, whose larva feeds on the wild camomile or feverfew.

camote (kä-mō′te), *n.* [Mex. Sp., < Nahuatl *camotli*.] A name in Mexico and other Spanish-speaking countries of the sweet potato, *Ipomœa Batatas*.

camp[1], *v.* **II.** *trans.* To surpass, excel, or outrank (others) in a contest. Compare *kemp*[1]. [Australia.]

camp[2], *n.* **4.** A mustering-place for cattle. [Australia.]—**5.** [*cap.*] In the early history of Australian colonization, the name popularly applied to Sydney, New South Wales, and to Hobart in Tasmania, the British forces being stationed in those places.

It is the old resident— . . . who still calls Sydney . . . the *Camp*,—that can appreciate these things.
P. Cunningham, Two Years in New South Wales, II. 70.

6. A camping-out expedition, as for fishing, shooting, recreation, or the like; a camp-out. [Australia.]—**Camp diarrhea.** See ★*diarrhea*.—**Camp duty**, the special duties, guard and police, which devolve on soldiers in camp.—**Camp royal**, the main body of an army when under the direct orders of the commander-in-chief; the chief body of troops with the commander-in-chief; hence, a large number; a host: as, a *camp royal* of false witnesses. *Nashe*.—**Concentration camp**, a camp in which are collected the hostile non-combatants of a country to prevent them from giving aid and information to the hostile armed forces.

campagna (käm-pän′yä), *n.* [It.: see *campaign, champaign, campania*.] **1**†. The open country; the plain.

To Marino, 6 miles through the like flat *campagna*, though ascending insensibly. *Berkeley*, Works, IV. 568.

2†. Same as *campaign*, *n.*, 2.—**Campagna di Roma.** See the Century Cyclopedia of Names.

campaign, *n.* **5.** A more or less extended trip, excursion, or journey for a definite purpose, such as for botanizing or geologizing.—**Astrophotographic campaign.** See ★*astrophotographic*.

campaigned (kam-pānd′), *p. a.* That has been sent on or has taken part in military campaigns: as, "an old soldier . . . *campaigned* . . . to death in the service," *Sterne*, Sentimental Journey.

campanarian (kam-pa-nā′ri-an), *a.* [LL. *campanarius*, a bell-maker (< L. *campana*, a bell), + *-an*.] Pertaining to the making or the use of bells.

Campanian[2] (kam-pā′ni-an), *a.* and *n.* [ML. *Campania*, F. *Champagne*.] **I.** *a.* Of or pertaining to Campania (modern Champagne): applied specifically to a geological formation.

II. *n.* In the extensive development of the Cretaceous system in France and Belgium, the uppermost division of the Senonian, equivalent to the uppermost Cretaceous of Great Britain, where the final stage, the Danian, is wanting.

campanist (kam′pa-nist), *n.* [L. *campana*, a bell, + *-ist*.] Same as *campanologist*.

campanistic (kam-pa-nis′tik), *a.* Of or pertaining to a campanist or to campanology.

campanologer (kam-pa-nol′ō-jėr), *n.* Same as *campanologist*.

campanological (kam-pa-nō-loj′i-kal), *a.* Of or pertaining to campanology or to campanologers: as, *campanological* literature.

Campanulales (kam-pan-ū-lā′lēz), *n. pl.* [NL. (Britton, 1901), < *Campanula* + *-ales*.] An order of dicotyledonous sympetalous plants, regarded as the most highly developed in the vegetable kingdom and last to make their appearance in the geological history of the globe. It is characterized by 5-merous flowers, the stamens connivent and frequently united (syngenesious). It contains the families *Cucurbitaceæ*, *Campanulaceæ*, *Goodeniaceæ*, *Candolleaceæ*, *Calyceraceæ*, *Cichoriaceæ*, *Ambrosiaceæ*, and *Asteraceæ*. They are chiefly herbs, but occasionally shrubs, and occur in all warm and temperate regions.

campanular (kam-pan′ū-lär), *a.* [NL. **campanularis*, < ML. *campanula*, a bell: see *campanula*.] Same as *campanulate*.

campanulated (kam-pan′ū-lāt-ed), *a.* Same as *campanulate*.

campanulin (kam-pan′ū-lin), *n.* [*campanula* + *-in*[2].] A basic coal-tar color: same as ★*muscarine*, 2.

campanulous (kam-pan′ū-lus), *a.* Same as *campanulate*.

Camper's angle. Same as *facial angle of Camper*. See *craniometry*.

campestrian, *a.* **II.** *n.* [*cap.*] A zoögeographic region proposed by J. A. Allen as a subprovince of the arid or western province of North America.

camphane (kam-fān′), *n.* [*camph(or)* + *-ane*.] A hypothetical hydrocarbon, $C_{10}H_{18}$, known only by its derivatives. It is assumed to be constituted by the substitution of two hydrogen atoms for the oxygen atom of camphor.

camphanic (kam-fan′ik), *a.* [*camphane* + *-ic*.] Derived from camphane.—**Camphanic acid**, the lactone or anhydrid, $C_{10}H_{14}O_4$, of hydroxycamphoric acid. It is formed by the oxidation of camphoric acid, or by treating bromcamphoric anhydrid with water. It melts at 201° C.

camphene, *n.* **1.** *Dextrocamphene* (*austracamphene*) and *levocamphene* (*terecamphene*) are made by heating oil of turpentine, saturated with hydrochloric-acid gas, with alcoholic potash. They are crystalline and melt at 51–52° C. They rotate plane-polarized light in opposite directions. *Inactive α-camphene* is similar to the preceding, but it is optically inactive and melts at 47° C.—**Borneo camphene** or **camphor camphene**, camphene made from Borneo camphor or from ordinary camphor. It melts at 53.5–54° C., and is optically inactive. When fused it is dextrorotatory.

camphidone (kam′fi-dōn), *n.* [*camph(or)* + *-id*[1] + *-one*.] A crystalline compound, $C_8H_{14}\langle^{CO}_{CH_2}\rangle NH$, obtained by the electrolytic reduction of camphoric imide in acid solution, using a lead cathode. It has a faint odor like that of camphor and melts at 220° C.

camphoid (kam′foid), *n.* A thick colorless liquid obtained by dissolving 1 part of guncotton (pyroxylin) in a saturated alcoholic solution of 20 parts of camphor. It dries rapidly, leaving a thin elastic film when applied to the skin, and is used as a vehicle for tannic acid, iodoform, etc.

campholene (kam′fō-lēn), *n.* [*camphol* + *-ene*.] A hydrocarbon, C_9H_{16}, obtained by the decomposition of campholenic acid. It is an oil which boils at 134° C. and has an odor like that of turpentine.

campholenic (kam-fō-len′ik), *a.* [*campholene* + *-ic*.] Pertaining to or derived from *campholene*: as, *campholenic* acid.—**Alpha-campholenic acid**, an acid, $C_9H_{15}CO_2H$, obtained by saponifying the nitrile formed by the action of dilute sulphuric acid on camphoroxime. It is an oil which boils at 256° C.—**Beta-campholenic acid**, an isomeric compound obtained by saponifying the β-nitrile which is formed by the action of acids on the α-nitrile. It melts at 53° C. and boils at 248° C.

campholid, campholide (kam′fol-id), *n.* [*camphol* + *-id*.] A crystalline compound, $C_8H_{14}\langle^{CH_2}_{CO}\rangle O$, obtained by the oxidation of camphor. It melts at 211° C.

campholytic (kam-fō-lit′ik), *a.* [*camph(or)* + *(electro)lytic*.] Obtained from camphor by an electrolytic method.—**Alpha-campholytic acid**, an acid obtained in its optically active form by the decomposition of dihydroamino-campholytic acid with nitrous acid. It is an oil which boils at 240–242° C.—**Beta-campholytic acid**, an isomer which melts at 133° C. and boils at 256° C.

camphor, *n.*—**Anemone camphor**, a crystalline substance found in *Anemone pulsatilla*. It has a strong, pungent odor and decomposes spontaneously into anemonic and isoanemonic acid.—**Asarum camphor.** Same as *asarin*.—**Barosma camphor.** Same as ★*diosphenol*.—**Barus camphor.** Same as *Borneo camphor*.—**Buchu camphor.** Same as ★*diosphenol*.—**Cedar camphor.** Same as *cedrene camphor* (which see, under *camphor*).—**Chloral camphor**, a thick, somewhat pungent, colorless liquid resulting when equal parts of chloral hydrate and camphor are mixed. Upon addition of water, camphor is thrown out of solution. It is used externally for neuralgia and internally as a nerve sedative.—**Colophene camphor**, a crystalline compound, $C_{10}H_{18}O$, resembling Borneo camphor, which separates from that portion of the product of the action of sulphuric acid on turpentine which is volatilized with steam.—**Cubeb camphor**, a colorless, crystalline compound, $C_{15}H_{26}O$, which separates from old oil of cubeb on refrigeration.—**Inactive camphor**, a substance obtained by mixing equal parts of dextro- or ordinary camphor and levo-camphor in alcoholic solution, or by oxidizing inactive camphene and borneol. It melts at 178.6° C.—**Inula camphor.** Same as *alant camphor* (which see, under *camphor*).—**Ledum camphor**, a colorless, feebly dextrorotatory, alcoholic sesquiterpene, $C_{15}H_{26}O$, contained in oil-of-Labrador tea from *Ledum palustre, Lin.* It crystallizes in long needles, melts at 104–105° C., and boils at 282–283° C.—**Matico camphor**, a white, nearly odorless, crystalline compound, $C_{12}H_{20}O$, which separates from matico-oil, obtained from *Piper angustifolium*. It melts at 94° C.—**Mentha camphor.** Same as *menthol*.—**Patchouli camphor**, a name formerly applied to patchouli alcohol.—**Pichurim camphor**, an oleoresin, consisting mainly of laurostearin, which is found in Pichurim beans. Also called *Pichurim fat*.—**Pyrethrum camphor.** Same as ★*pyrethrin*.—**Sage camphor**, a term first applied to a stearoptene which Geoffroy separated from oil of sage in 1720. It is now applied to a borneol-like substance which is derived from and probably also exists in oil of sage, *Salvia officinalis*.—**Salol camphor**, an aromatic, colorless liquid resulting when 20 parts of camphor are intimately mixed with 30 parts of salol and warmed: a stimulating antiseptic.—**Sandalwood camphor**, a compound, $C_{15}H_{24}O_2$, contained in the oil of sandalwood. It melts at 104–105° C.—**Tar camphor.** Same as *naphthalene*.—**Thyme camphor**, a term sometimes applied to *thymol*.

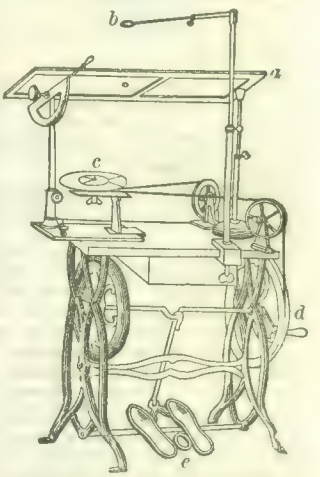
camphorated (kam′fo-rā-ted), *p. a.* Impregnated or treated with camphor.

camphor-glass (kam′fọr-glàs), *n.* A small glass tube filled with a solution of camphor or other chemicals and hermetically sealed so that neither hygrometric nor barometric changes can affect it. The camphor becomes flocculent at low temperatures and dissolves at high temperatures, so that the camphor-glass is essentially a thermoscope or crude thermometer.

camphorid (kam′fo-rid), *n.* A yellow, crystalline compound, $C_{18}H_{12}O_6 + H_2O$, found in galangal root. It melts at 229° C.

camphorize (kam′fo-rīz), *v. t.*; pret. and pp. *camphorized*, ppr. *camphorizing*. To impregnate or medicate with camphor: as, *camphorized* tincture of opium.

camphorous (kam′fọr-us), *a.* [*camphor* + *-ous*.] Camphor-like; resembling camphor: as, a *camphorous* smell.



camphory (kam′fọr-i), *a.* [*camphor* + *-y*[1].] Somewhat camphor-like.

camphylamine (kam-fil-am′in), *n.* [*camphyl* + *amine*.] A base, $C_{10}H_{17}NH_2$, formed by the reduction of campholenic nitrile. It is an oil which boils at 196° C.

campilan (käm-pi-län′), *n.* [Tagalog.] In the Philippine Islands, a sword of the Tagalogs, having a straight single-edged blade, a broad back, and a triangular point.

Campil beds. See ★*bed*[1].

campimeter (kam-pim′ē-tėr), *n.* [L. *campus*, field, + Gr. *μέτρον*, measure.] In *psychol.*, a vertical or horizontal screen for the mapping, in plane projection, of the area of the blind spot of the eye, the range of color-sensitivity of the retina, etc. The campimeter is related to the perimeter as the plane-table is to the theodolite.

The Hering Campimeter with Color-mixer.
a, campimeter screen; *b*, eye-rest; *c*, disks mounted on color-mixer, which may be rotated by hand (*d*) or foot (*e*).

campimetry (kam-pim′e-tri), *n.* In *psychol.*, the mapping, in plane projection, of retinal zones or areas; the use of the campimeter. *E. B. Titchener*, Exper. Psychol., I. ii. 17.

Campinian (kam-pin′i-an), *a.* [F. *Campine*, Flem., *Kempenland*, in Belgium.] Of or pertaining to Campine (see the etymology).—**Campinian sands**, in *geol.*, a division of the Quaternary deposits of Belgium.

campit (käm-pēt′), *n.* [Tagalog *campit*.] In Luzon, a short knife.

cam-plate (kam′plāt), *n.* A plate having an irregular outline which gives an irregular motion to the elements which it drives; a plate having projections on its face which act as cams; a cam.

camp-marshal† (kamp′mär″shal), *n.* An officer who supervised the camp or quarters of an army; a quartermaster-general.

Campobello yellow. Same as ★*chryseinic acid*.

campodean (kam-pō′dē-an), *a.* [*Campodea* + *-an*.] Resembling or belonging to the genus *Campodea*.

campodeiform (kam-pō-dē′i-fôrm), *a.* Resembling the thysanurous insects of the genus *Campodea* or family *Campodeidæ* (which see).

campodeoid (kam-pō′dē-oid), *a.* [*Campodea* + *-oid*.] Same as ★*campodeiform*. *A. S. Packard*, Text-book of Entom., p. 600.

campoo (kam-pō′), *n.* [Hind. *kampū*, < Pg. *campo*, a camp: see *camp*[2].] **1.** A camp.—**2**†. A brigade of native Mahratta troops drilled and commanded by European officers. [Anglo-Indian.]

camp-robber (kamp′rob″ėr), *n.* A local name of the Canada jay, *Perisoreus canadensis*.

camp-shed (kamp'shed), *v. t.* To face or bank up with piles and planks, as the soft bank of a river, the foot of an embankment, etc.; protect by piles and planks. See *camp-sheathing.*

campsho, *n.* See ★*camshoch.*

camptodrome (kamp'tō-drōm), *a.* [Gr. *καμπτός,* curved, + *-δρομος,* ‹ *δραμεῖν,* run.] Having a curved course: said of the nerves of a leaf. See *nervation* (*a*) (2), with cut (Fig. 1).

camptodromous (kamp-tod'rō-mus), *a.* Same as ★*camptodrome.*

camptonite (kamp'tǫn-īt), *n.* [*Campton,* a township in the Pemigewasset valley, New Hampshire, + *-ite*2.] In *petrog.,* a name given by Rosenbusch (1887) to certain porphyries and aphanitic rocks composed of abundant hornblende and lime-soda feldspars, with augite and sometimes biotite. When porphyritic the phenocrysts are chiefly hornblende, with subordinate biotite and augite. The feldspar is confined to the ground-mass, and is generally andesine or a more calcic variety. Camptonite usually occurs in dikes.

Camptosaurus (kamp-tō-sâ'rus), *n.* [NL., ‹ Gr. *καμπτός,* curved, + *σαῦρος,* a lizard.] A genus of extinct iguanodont dinosaurian reptiles, of great size, found in the Upper Jurassic rocks of Colorado and Wyoming and also in England. The genus had short cervical ribs, amphiplatyan dorsal vertebræ, the sacrals not ankylosed, and large pendent inner fourth trochanter of femur. It is described by Marsh.

camptotrich (kamp'tō-trik), *n.* [Gr. *καμπτός,* bent, + *θρίξ* (*τριχ-*), hair.] A bony, branched, jointed, dermal fin-ray of the *Dipnoi. E. S. Goodrich,* Quart. Jour. Micros. Sci., March, 1904, p. 486.

Campylaspidæ (kam-pi-las'pi-dē), *n. pl.* [NL., ‹ *Campylaspis* + *-idæ.*] A family of sessile-eyed crustaceans having a strongly vaulted carapace, which sometimes partly overarches some of the free segments of the trunk, and no telson. The typical and sole genus is *Campylaspis.*

Campylaspididæ (kam″pi-las-pid'i-dē), *n. pl.* [NL., ‹ *Campylaspis* (*aspid-*) + *-idæ.*] Same as ★*Campylaspidæ.*

Campylaspis (kam-pi-las'pis), *n.* [NL., ‹ Gr. *καμπύλος,* bent, + *ἀσπίς,* shield.] The typical genus of the family *Campylaspidæ. Sars,* 1865.

campylodrome (kam'pi-lō-drōm), *a.* [Gr. *καμπύλος,* bent, + *-δρομος,* ‹ *δραμεῖν,* run.] Curving gently outward and inward from the base to the apex of a leaf: said of nerves. See *nervation* (*a*) (10), with cut (Fig. 9).

campylodromous (kam-pi-lod'rǫ-mus), *a.* Same as ★*campylodrome.*

campylograph (kam-pil'ǫ-graf), *n.* [Gr. *καμπύλος,* bent, + *γράφειν,* write.] An instrument designed for drawing geometric figures and algebraic curves.

Campyloneuron (kam″pi-lǫ-nū'ron), *n.* [NL. (Presl, 1836), ‹ Gr. *καμπύλος,* arched, + *νεῦρον,* nerve, from the character of the nervation.] A genus of polypodiaceous ferns, related to *Polypodium.* In most of the species the fronds are simple, linear-lanceolate or somewhat elliptical, 1 to 3 feet long, the parallel primary veins being connected by numerous transverse veins, with one or several once-soriferous, excurrent, free veinlets included within each areola. The genus is essentially middle American. *C. Phyllitidis* and *C. angustifolium* occur in Florida.

campylorhynchous (kam″pi-lǫ-ring'kus), *a.* [Gr. *καμπύλος,* curved, + *ῥύγχος,* a snout.] Having a curved snout or mandible, as some extinct saurians.

camshachle (kam-shä'ċhl), *v. t.* [Also *camshauchel;* ‹ *cam*2 + Sc. *shachle,* distort.] To twist out of shape; distort; make crooked. [Scotch.]

camshell (kam'shel), *n.* [Also *camshall;* origin not ascertained.] Cuttlefish-bone. [Orkney and Shetland Islands.]

camsho, *n.* See ★*camshoch.*

camshoch (kam'shoċh), *a.* [Also *camsheugh, camsho,* etc.; ‹ *cam*2 + *-shoch,* perhaps ‹ AS. *sceoh,* skew (cf. Sc. *shachle, shochle,* distort); see *skew*1.] 1. Camshachled; crooked; deformed.—2. Perverse; contrary. [Scotch in both uses.]

camsin, *n.* See *khamsin.*

camstone (kam'stōn), *n.* 1. A term used in Scotland for a common compact, whitish limestone.—2. A white or bluish-white clay used for whiting purposes on hearths, door-steps, etc.

Can you? in *Eng. long whist,* when one side is within 2 points of game, and either partner holds 2 honors, the conventional question asked by him of his partner, meaning, 'Have you a third?' If he has, the two partners win the game.—**Can you one?** Same as ★*can you?*

can2, *n.* 4. A chimney-pot.

can. An abbreviation (*a*) of *canon;* (*b*) of *canto;* (*c*) of *cantoris.*

Canada ashes. See ★*ash*2.

Canadian, *a.* 2. In *Amer. geol.,* noting a period which includes the epochs of the calciferous sandrock (Beekmantown limestone) and the Chazy limestone, and constitutes the earliest time-division of the Silurian: it also notes the rock-formations of this period.—**Canadian blue-grass, skipper.** See ★*blue-grass,* ★*skipper*1.

canadine (kan'a-din), *n.* [*Canad(ensis)* + *-ine*2.] A crystalline alkaloid, $C_{20}H_{21}O_4N$, found in small amounts in *Hydrastis Canadensis.* It melts at 132.5°C., and is related in structure to berberine.

canadol (kan'a-dol), *n.* A trade-name for gasolene or petroleum ether having a boiling-point of 70–90° C.

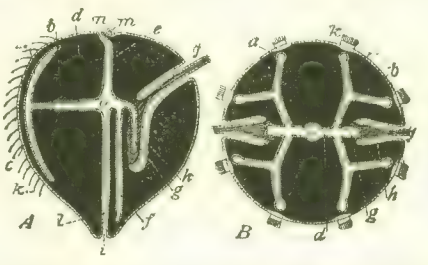
cañafistula (kän-vä-fis'tū-lä), *n.* [Sp. adaptation of the botanical name.] A name applied in Guam and the Philippine Islands, and in other tropical countries settled by the Spanish, to the purging cassia (*Cassia fistula*). See *Cassia,* 1, and cut.

canage (kān'āj), *n.* [*cane*2, *n.,* + *-age.*] 1. In Scotland, the payment of rent in kind (now discontinued), or the amount so paid.—2. The exaction of the tax or duty called *cane:* as, the *canage* of wool or hides. See *cane*2.

canaglia (kä-nä'lyä), *n.* [It.] Same as ★*canaille,* 3. *B. Jonson,* Volpone, ii. 1.

canagua (ka-nä'gwą), *n.* A shiny earth of volcanic origin found in certain South American localities. Also called *koth.*

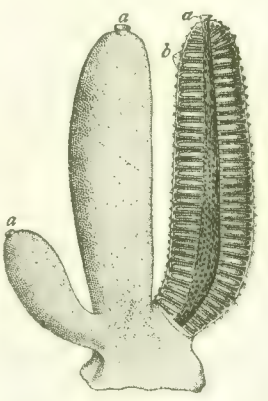
canaigre, *n.* It is native on the arid plains from Texas to California, and has become prominent as a commercial source of tannin. The tuberous roots contain about 35



Canaigre (*Rumex hymenosepalus*).
Plant, one-eighth natural size. Fruit, three-fourths natural size.

per cent. of tannic acid. These had long been utilized by the Mexicans as a medicine and for tanning saddle-leather when an export trade in them was started, at first in bulk, then as dried chips, then as extract. The natural supply being insufficient, cultivation with irrigation has been undertaken on a large scale.

canaille, *n.* 3. A pack (as of hounds): as, the whole *canaille* of miscreants; a *canaille* (or canaglia) of poltroons.



canal1, *n.* 6. A long, narrow arm of the sea penetrating far inland: as, Lynn *canal,* Portland *canal,* etc.—**Apertural canal,** in *biol.,* a canal found in some *Gasteropoda,* for example *Ataria,* extending from the anterior peristome: caused by an inbending of the margin and serving for the lodgment of the siphon.—**Arnold's canal,** a canal in the petrous portion of the temporal bone through which passes Arnold's nerve.—**Biliary canal.** Same as *hepatic duct* (which see, under *duct*).—**Calciferous canals.** See ★*calciferous.*—**Canal of Botal.** Same as *ductus Botalli.*—**Canal of Cuvier.** Same as *ductus Cuvieri.*—**Canal of Ferrein,** a channel formed between the edges of the eyelids, when closed, and the eyeball.—**Canal of Hensen,** a minute communication between the ductus cochlearis and the sacculus in the membranous labyrinth of the ear: also called *canalis reuniens.*—**Canal of Laurer,** in certain platyhelminths, a canal leading from the oviduct to the dorsal surface,

where it opens by a minute pore.—**Canal rays.** See ★*ray*1.—**Canals of Mars,** certain long, narrow dark lines upon the surface of the planet discovered by Schiaparelli in 1878. At one time they were imagined by some to be actual artificial canals. Their real nature is quite unknown.—**Canals of Recklinghausen.** (*a*) The system of canals in the cornea. (*b*) The juice-canals or ultimate radicals of the lymph-vessels.—**Canals of Schiaparelli,** Schiaparellian canals. See ★*canals of Mars.*—**Canal system.** (*a*) In corals, the network of canals permeating the porous thecæ and placing the cavities of the various zoöids in communication with one another. (*b*) In sponges, all of the cavities of the body, taken collectively, traversed by the currents of water which nourish the sponge from the time they enter at the pores until they pass out at the osculum.—**Catapophysial canal.** See ★*catapophysial.*—**Centripetal canals,** in *Hydromedusæ,* canals which, in old specimens of many species, grow backward from the circular canal toward the apex of the bell but end blindly and never reach the gastric cavity.—**Cervical canal,** the passage through the neck of the womb.—**Circular canal,** in medusoids of the *Hydromedusæ,* a canal which runs around the circumference of the bell and communicates with the gastric cavity through the four perradial canals.—**Cystic canal.** Same as *cystic duct* (which see, under *duct*).—**Dorsal canal,** in the arms of crinoids, the canal in which lies the nerve known as the *axial cord.*—**Hemal canal.** (*a*) The canal in the vertebrate tail inclosed by the hemal ridges on the ventral side of the perichordal tube. The hemal canal contains the caudal artery and caudal vein, and in some of the lower vertebrates also a vestige of the postanal gut. See *hemal cavity.* (*b*) A channel which passes through the series of hemal arches beneath the backbone of a fish.—**Infundibular canal,** in certain ctenophorans, a tube leading from the infundibulum to the aboral pole where it branches and opens to the exterior through excretory pores.—**Jacobson's canal,** a canal in the petrous portion of the temporal bone giving passage to Jacobson's nerve.—**Juice-canals,** minute channels in the connective tissue, believed to constitute the ultimate radicals of the lymphatic system.—**Laurer's canal,** in trematodes, a small paired or unpaired canal, of undetermined function, opening externally in the dorsal middle line by a minute pore or laterally through two warts on the sides of the body, and internally into the oviduct, where it joins the yolk-ducts, or into the yolk-ducts near this point.—**Medullary canal.** Same as *medullary cavity* (*b*).—**Meridional canal,** in ctenophorans, one of the branches of

Meridional Canal, *Hormiphora plumosa,* diagrammatic longitudinal (*A*) and transverse (*B*) sections. The ectoderm is dotted, the endoderm striated, the mesoglœa black, and the muscular axis of the tentacles gray. *a,* meridional canal; *b,* interradial canal; *c,* adradial canal; *d,* preradial canal; *e,* infundibular canal; *f,* stomodeal canal; *g,* tentacular canal; *h,* tentacular sheath; *i,* mouth; *j,* tentacle; *k,* swimming-plate; *l,* stomodæum; *m,* sense-organ; *n,* excretory pore; *o,* infundibulum. (From Parker and Haswell's "Zoölogy.")

the enteric system extending upward and downward beneath the corresponding swimming-plate.—**Nutrient canal.** Same as *Haversian canal.*—**Obstetric** or **parturient canal,** the channel formed, after complete dilatation of the os, by the cavity of the uterus and the vagina.—**Pore-canal,** a canal leading from the cavity of the proboscis, collar, or other part of the body of *Adelochorda* and opening to the exterior by a pore.—**Pulp-canal,** the canal which runs through the root of a tooth and gives passage to the nerves and blood-vessels of the pulp-cavity.—**Radial canal.** (*a*) In echinoderms, one of the aquiferous canals running from the circumoral water-canal to the tube-feet. (*b*) In sponges, one of the canals which are continuous with the paragastric cavity, as distinguished from an incurrent canal.—**Sensory canal,** any of the numerous tubes found just beneath the skin of fishes, as the lateral-line canal. They contain nerve-endings and are usually filled with mucus. *Proc. Zool. Soc. London,* 1897, p. 271.—**Serous canals.** Same as *juice-*★*canals.*—**Stomodeal canal,** in ctenophorans, one of the two canals given off by the perradial canals and passing downward, parallel to and in close contact with the stomodæum.—**Subtentacular canal,** in crinoids, one of a pair of canals, prolongations of the cœlom into the arms and pinnules, separated from each other by a median septum underlying the ambulacral groove.—**Tentacular**

Radial Canal, *Sycon gelatinosum,* a portion slightly magnified; one cylinder (that to the right) bisected longitudinally to show the central paragastric cavity opening on the exterior by the osculum, and the position of the incurrent and radial canals; the former indicated by the black bands, the latter dotted. *b* marks the position of three of the groups of inhalent pores at the outer ends of the incurrent canals; *a,* the osculum. (From Parker and Haswell's "Zoölogy.")

canal. (*a*) See *tentacular*. (*b*) In ctenophorans, a branch of the perradial canal extending into the base of the corresponding tentacle.—**Tympanic canal.** Same as *Jacobson's* ★*canal*. **Vestibular canal.** Same as *urogenital sinus*. —**Volkmann's canal,** one of the nutrient canals in the periosteal layer of bone which does not form the center of a Haversian system.

canalage (ka-nal'āj), *n.* [*canal* + *-age*.] 1. Canals as a means of transportation.—2. Canal dues.—3. The cost of transportation by canal.

canal-boat, *n.*—**Canal-boat scales,** an arrangement of a canal-lock which makes it possible to weigh a canal-boat.

canal-cell (ka-nal'sel), *n.* See ★*cell*.

canaler, canaller (ka-nal'ėr), *n.* [*canal* + *-er*[1].] 1. A canal-boat.

At the wharf-boat were one or two dim lanterns, and near the bow of each *canaler* was a lantern of uncertain hue, but intended to be white.
The Century, Aug., 1887, p. 487.

2. One employed on a canal-boat or engaged in the business of canal transportation.

After making a tour of the water front with Captain C., the old-time *canaller*, Mr. C. announced that he would call a meeting of maritime interests next week to frame a petition to the special session of the Legislature.
N. Y. Times, June 29, 1905.

canalete (kä-nä-lā'tā), *n.* [Venezuelan.] Same as *paddlewood*.

canaliculation (kan-a-lik″ū-lā'shon), *n.* A minutely grooved or chambered formation.

canalicule (ka-nal'i-kūl), *n.* [L. *canaliculus*, a small channel.] A small canal.

canaliculization (kan-a-lik″ū-li-zā'shon), *n.* [*canaliculus* + *-ize* + *-ation*.] The formation of canaliculi in cartilage, constituting the preliminary stage of ossification.

Canaliculus laqueiformis, the loop-tubule of Henle; that part of the uriniferous tubule which bends upon itself.

canaliform (ka-nal'i-fôrm), *a.* [L. *canalis*, a canal, + *forma*, form.] Having the form of a canal or of a tube.

canalization, *n.* 3. In *neurol.*, figuratively, the formation or opening of a path of nervous conduction or nervous discharge.

Under suitable conditions, the stimulation may strike out new paths within the central substance; we may accordingly designate this latter effect of practice, in contradistinction to direct practice by repetition of function, as path-making or *canalization*.
W. Wundt (trans.), Physiol. Psychol., p. 100.

4. In *surg.*, drainage by means of artificially formed channels without the insertion of tubes.

canalize, *v.* **II.** *intrans.* To form a channel or canal. *Buck*, Med. Handbook, II. 255.

canaller, *n.* See ★*canaler*.

canapés (kan-ä-pā'), *n. pl.* [F., lit. 'canopies': see *canopy*.] Narrow slices of thin bread toasted or fried in hot fat or dipped in melted butter, browned in the oven, and then covered with a seasoned mixture of cheese, ham, sardines, or anchovy and served hot.

canard (ka-närd'), *v. i.* [F. *canarder*, < *canard*, duck, false report: see *canard*, *n.*] 1. To fly or float about, or circulate as a canard or false report: as, certain stories *canarding* about the hotels.—2. To imitate or produce the peculiar harsh cry of the duck, as an unskilled player on a wind-instrument.

Right before the window . . . is a ragged starveling *canarding* on a clarionet. *Fraser's Mag.*, XXIII. 399.

canary. **I.** *n.* 8. In Australia, a name of *Clitonyx ochrocephala*, a relative of the lyre-bird.—**Belgian canary,** a breed of canary-birds of Dutch origin, bred chiefly for shape and pose, and having a small head and a long body.—**Norwich canary,** a breed of canary-birds named from Norwich, England, bred for size and color rather than for song. There are three varieties, the clear yellow, the variegated, and the crested.

II. *a.*—**Canary archil.** See ★*archil*.

canary-grass, *n.* The reed canary-grass (also called *reed-grass*) is widely diffused in wet places over the northern hemisphere. In the northwestern United States it is called *crazy-grass*, on account of its supposed effect on horses, which, however, is probably due to ergot with which it is infested. The *Southern* or *American canary-grass*, *Phalaris Caroliniana*, ranging through the Southern States to California, is regarded in the Eastern States as valuable for winter and spring pasture. This, or a form with an inflorescence appearing much like *Phleum*, is called *Southern* or *Apache timothy*. The blue or purple canary-grass is *Phalaris amethystina*, a native Californian species of moderate value. *P. minor* and *P. paradoxa* are Mediterranean species introduced into California.

canary-vine (ka-nā'ri-vīn), *n.* [Supposed to have been brought from the Canary Islands.] The climbing fumitory, *Adlumia fungosa*. See *Adlumia*.

canaut, kanaut (ka-nât'), *n.* [Hind., Ar. *qanāt*.] The side of a tent, or of a canvas inclosure. *Yule and Burnell*. [Anglo-Indian.]

cancan (kan'kan), *v. i.*; pret. and pp. *cancanned*, ppr. *cancanning*. [*cancan*, *n.*] To perform the dance known as the *cancan* (which see).

cancel, *n.* 4. An order canceling or countermanding a previous order.

If an order is fairly executed it is a rare thing to receive a *cancel*. *Manchester Examiner*, May 12, 1884.

cancel, *v. t.* 5. (*a*) In *printing*, to mark on copy or proof (words or lines that are to be omitted). (*b*) In *bookbinding*, to destroy (a leaf or section that is to be entirely suppressed).

cancelable, cancellable (kan'sel-a-bl), *a.* That may be canceled; capable of being canceled, crossed out, or rendered null or void.

canceleer†, *v. i.* 2. Figuratively, to turn aside; digress.

canceling-press (kan'sel-ing-pres″), *n.* A machine for defacing the stamps on letters or postal matter in order to prevent their re-use.

cancellation, *n.* 3. In gastropods, the system of intersecting ridges on the surface of the shell.

Of the ten or twelve examples we have examined, two only possess the epidermis; this is dark fuscous, covering the whole surface, and emitting a bristle at regular intervals on the three spiral ribs, viz. at the point of junction with the *cancellations*.
Proc. Zool. Soc. London, 1901, II. 361.

cancer, *n.* 3. The term *cancer*, as commonly employed, includes those new growths which possess certain attributes that render them especially dangerous to life, and which are therefore called *malignant*. Malignant tumors growby infiltration and destruction of the surrounding tissues, and are characterized by a tendency to recur after removal, by the property of spreading to other parts of the body by a process of dissemination known as *metastasis*, and by producing a general disturbance of health termed *cachexia*. From the standpoint of the pathologist two chief groups of cancerous tumors are recognized: the carcinomata, or true cancers, and the sarcomata. The fundamental difference between these two is the fact that carcinoma originates in the epithelial tissues of the body, whereas sarcoma develops from the connective tissues. This difference in origin gives rise to certain structural characteristics which enable the microscopist readily to distinguish one type from the other. Carcinoma is rare before the age of thirty; it is somewhat commoner in women than in men; and it is most often seen in the uterus, skin, breast, and stomach. Sarcoma is a disease of early adult life, is more prone to attack men than women, and is commonly found in the subcutaneous tissue, bony structures, and lymph-nodes. Carcinoma is conveyed from one part of the body to another through the lymphatic vessels, sarcoma by way of the blood-stream. In spite of an enormous amount of research devoted to this subject, the exciting cause of cancer is still unknown. The influences of heredity, climate, food, race, social condition, and local injury have all been invoked as factors concerned, but without arriving at any degree of certainty. The theory referring the development of malignant tumors to the presence of minute animal or vegetable organisms has numerous adherents, but it has not been definitely established, and many prominent authorities consider that the explanation is to be sought for in a disturbance of some still undiscovered fundamental law governing the growth of cells. Although it appears that cancer is increasing somewhat in frequency, the percentage of cures is increasing much more rapidly, owing to the earlier diagnoses and more thorough operations which are now possible. Extirpation by the knife as promptly and as completely as possible, when the growth is accessible, is regarded as the method of treatment that offers the greatest hope of a cure; but the employment of the X-rays or other form of radioactivity has in a number of instances given excellent results.

5. Figuratively, a moral or social evil likened to a cancer in its malignant character and corroding tendency: as, "sloth is a *cancer*," *Bp. Ken*.—**Acinous cancer,** a malignant growth originating in the epithelium of acinous glands.—**Areolar cancer.** Same as *colloid cancer*.—**Calms of Cancer.** See ★*calm*[1].—**Cancer aquaticus.** Same as *noma*.—**Cancer en cuirasse** or **cuirass cancer,** a superficial scirrhous cancer involving a wide area of the anterior chest-wall: it resembles remotely a shield.—**Cancer Galeni.** Same as *Galen's* ★*bandage*.—**Cellular cancer, cerebriform cancer.** Same as *encephaloid cancer*.—**Chimney-sweeps' cancer,** epithelioma of the scrotum.—**Chondroid cancer,** a form of scirrhous cancer having a texture like that of cartilage.—**Cylinder-cell cancer.** Same as *cylindroma*.—**Cystic cancer.** Same as *colloid cancer*.—**Dendritic cancer,** malignant papilloma.—**Epithelial cancer,** a malignant growth originating in squamous or cylindrical epithelium; epithelioma.—**Fungous cancer.** Same as *fungus hematodes*.—**Glandular cancer.** Same as *adenocarcinoma* and *adenosarcoma*.—**Green cancer.** Same as *chloroma*.—**Hard cancer.** Same as *scirrhus*.—**Hematoid cancer.** Same as *fungus hematodes*.—**Mucous cancer.** Same as *colloid cancer*.—**Papillary cancer,** malignant papilloma.—**Pigmentary cancer.** Same as *melanocarcinoma* and *melanosarcoma*.—**Rodent cancer.** Same as *rodent* ★*ulcer*.—**Soft cancer.** Same as *encephaloid cancer*.—**Spider cancer,** a form of nævus marked by a central red area with red lines radiating from it. It is not of a cancerous or malignant nature. Also called *spider nævus*.—**Tubular cancer.** Same as *cylindroma*.

cancer (kan'sėr), *v. t.* To corrode or eat into, in the manner and with the steadily destructive persistency of a cancer.

Other things advance per saltum—they do not silently *cancer* their way onwards.
De Quincey, Works, III. 280.

cancer-drops (kan'sėr-drops), *n. pl.* Same as *beech-drops*.

cancered (kan'sėrd), *a.* Affected with a cancer.

Your lordship must have taken notice of a paragraph in the papers with regard to the application of toads to a *cancered* breast.
Goldsmith, Hist. Fishes, Reptiles, Insects, p. 215.

cancer-jalap (kan″sėr-jal'ap), *n.* The pokeweed, *Phytolacca Americana*.

cancer-nest (kan'sėr-nest), *n.* A rounded mass of concentrically arranged cells found in certain cancerous growths.

The second is the finding of *cancer nests* in the stomach contents; but several of these should be found before a positive diagnosis is made.
Med. Record, Feb. 14, 1903, p. 280.

Cancerous cachexia. See ★*cachexia*.

cancer-parasite (kan'sėr-par″a-sīt), *n.* A general name, of no classificatory value, given by different observers to various bodies found in or among the cells of cancerous growths, on the supposition that they were parasitic organisms and the cause of the growths.

cancer-serum (kan'sėr-sē″rum), *n.* An antitoxic serum supposed to be curative of cancer.

cancha (kän'chä), *n.* [Quichua (of Peru and Bolivia) *cancha*, a yard, cattle-yard, churchyard, etc. (Tschudi).] An inclosure for cattle, etc.

cancrite (kang'krīt), *n.* [L. *cancer*, a crab, + *-ite*[2].] A fossil crab or other crustacean, or a fossil body resembling a crab.

cancro, *interj.* [It.] An imprecation meaning originally 'the cancer (take you)!'

Cancro! What, thy husband's body?
Chapman, Widow's Tears, vi. 1.

Cancroid corpuscles. Same as ★*cancer-nests*.

c. and b. In *cricket*, an abbreviation of *caught and bowled*, a phrase applied to the batsman when he is caught out by the bowler.

candescence, *n.* 2. The luminescence of radioactive substances; autoluminescence. *The Reader*, May, 1904, p. 620.

Candia carrot. See ★*carrot*.

candicans (kan'di-kanz), *n.* [L., ppr. of *candicare*, be whitish, < *candere*, be white: see *candent*, *candid*.] Same as *albicans*.

candid, *a.* 4. Pure; clear; fair.

Where does the figment touch her *candid* fame?
Browning, Ring and Book, ix. 475.

candidate, *n.* 2. One who seeks or is an aspirant for something other than office or preferment: as, a *candidate* for literary fame; "a *candidate* of heaven," *Dryden*.

And whether the happiness of a *candidate* for literary fame be not subject to the same uncertainty.
Johnson, Rambler, No. 21

3†. A member of the white-robed body-guard of the Roman emperors, established about 237 A. D. by Gordianus the Younger. *Blount*.

candier (kan'di-ėr), *n.* One who candies. *Florio*.

candil (kän-dēl'), *n.* [Sp., a lamp, < Ar. *qandīl*, a lamp, < L. *candēla*, a candle: see *candle*.] In the West Indies, a Spanish name of the flame-colored fish *Myripristis jacobus*, of the family *Holocentridæ*. The name is also applied to the common red soldier-fish or squirrel-fish, *Holocentrus ascensionis*.

can-disk (kan'disk), *n.* In *cotton-manuf.*, the revolving plate on which a sliver-can is placed as part of the coiler-motion.

candle, *n.*—**Association candle.** Same as *German candle*. See *standard* ★*candle*.—**British standard candle.** See *standard* ★*candle*.—**Composite candle,** a candle made of two materials of different fusibility, as hard stearic acid from tallow and stearin from cocoanut-oil.—**Decimal candle.** Same as *bougie décimale* (which see, under ★*light standard*).—**Drawn candle,** a candle made by winding a long wick off one cylindrical drum to another, drawing it through a pan of melted wax, and stripping off the excess of wax which adheres to the wick by passing it through holes of proper diameter in a perforated plate. The process is applied chiefly to the manufacture of lighting-tapers, or spills, and the small candles used on Christmas trees, and for these stearic acid or paraffin is often substituted for wax.—**English candle.** See *standard* ★*candle*.—**German standard candle.** See *standard* ★*candle*.—**Green candle,** in *photom.*, a standard of light sometimes used in the comparison of dissimilar light-sources. It consists of a standard candle the rays from which pass through a screen of green glass.—**Hemispherical candle,** a unit of light-flux in which the source is a standard candle and the unit of solid angle is the angle subtended by a hemisphere. The British hemispherical candle is approximately 7.14 lumens. The term is sometimes used as the equivalent of *mean hemispherical intensity*, in which case the mean radius vector of the surface of hemispherical distribution is meant. See ★*illumination*.—**Iodine candle,** a candle in which iodine has been intermixed with the grease or paraffin, so that as the candle burns the disinfecting vapor of iodine is given off.—**Medicated candle,** a candle made from combustible material to which some substance,

such as iodine or eucalyptus-oil, has been added, in order to evoke disinfectant vapor when the candle is burned in a sick-room.—**Munich candle.** See *standard* ★*candle*.—**Red candle,** a photometric candle screened with red glass to permit an unpractised eye more readily to compare the relative intensity of lights.—**Spherical candle,** a unit of light-flux in which the source is a standard candle and the unit of solid angle is the angle subtended by a sphere. The British spherical candle is approximately 14.28 lumens. The term is sometimes used as the equivalent of *mean spherical intensity*, in which case the mean radius vector of the surface of spherical distribution is meant. See ★*illumination*.—**Standard candle,** a candle used in photometry as a standard of illuminating power. For many years the recognized legal standard in England and the United States has been the light of the British standard candle, and in Prussia that of a standard candle known as the 'union-candle' (*Vereinskerze*). In France a standard candle called the 'star-candle' (*bougie de l'étoile*) has been much used in photometry. The British standard candle is made of spermaceti wax extracted from crude sperm-oil and having a melting-point between 112° and 115° F. A sufficient quantity of beeswax is added to prevent undue brittleness. The candle is made in a conical mold 10 inches long and .9 inch in diameter at the bottom and .8 inch in diameter at the top. The wick is of plaited cotton so constructed as to supply 120 grains of the melted wax per hour, under normal conditions of burning. The German candle (*Vereinskerze*) is made of paraffin having a melting-point of 55° C. It has a diameter of 20 millimeters and is 314 millimeters long. The wick is of twisted cotton consisting of 25 threads, and when burning under normal conditions the height of the flame should be 50 millimeters. Another standard candle, formerly used in Germany, is the Munich candle. It is a conical candle of stearin, 20.5 millimeters in diameter at the top and 23 millimeters at the base. The wick is made of 50 strands. The normal consumption is from 10.2 to 10.6 grams an hour and the normal flame-height 56 millimeters. The French star-candle is also of stearin, of which material it should burn 10 grams an hour and have a flame-height of 52.4 millimeters. It is impossible to give a definite comparison of the various standard candles, on account of the variable performance of these sources of light. Candles taken from the same package often differ in brightness by from 10 to 15 per cent. The following table contains the results of the attempts of three well-known observers to compare the candles used in different countries, taking the Munich candle as a unit. (The data are from Palaz, "Industrial Photometry," p. 131.)

Candle.	Schilling.	Krüss.	Voit.
Munich	100.00	100.00	100.00
German (*Vereinskerze*)	88.7	97.6	96.5
British	90.7	85.8	94.4

For other standards of photometric intensity, see ★*light standard*.—**Star-candle.** See *standard* ★*candle*.—**Sulphur-candle,** a medicated candle with the fatty material of which sulphur has been mixed, so that as the candle burns sulphur dioxid is given off, serving as an atmospheric disinfectant. For this purpose cylinders made of sulphur and charcoal in powder, with the addition of a very little niter, are also sometimes used.

candle (kan'dl), *v. t.*; pret. and pp. *candled*, ppr. *candling*. To examine (an egg) in an egg-tester by means of a lighted candle to determine its freshness. See ★*egg-candling*.

candle-carriage (kan'dl-kar″āj), *n.* In *photometry*, a carriage supporting the standard candle or pair of candles. *W. L. Dibdin*, Public Lighting, p. 48.

candled (kan'dld), *p. a.* Tested by means of a lighted candle: as, *candled* eggs.

candle-foot (kan'dl-fůt), *n.* A unit of illumination; the illumination from one standard candle at a distance of one foot. The British candle-foot is about 12.2 luxes. See ★*illumination*, 1. Also *foot-candle*.

candle-hour (kan'dl-our), *n.* In *photom.*, a unit of quantity of light; the energy derived in one hour from the total light-flux from a source of light of one candle-power.

candle-meter (kan'dl-mē″tėr), *n.* A unit of illumination; the illumination from a standard candle at a distance of one meter. See ★*illumination*, 1. Also called *meter-candle*.

candlenut-oil (kan'dl-nut-oil), *n.* A limpid fixed oil with properties similar to castor-oil, obtained from the nuts of *Aleurites Molluccana* (*Euphorbiaceæ*), a tree growing in the tropics. The natives of the South Sea Islands tie the nuts, which contain over 50 per cent. of oil, on the ends of sticks and use them as candles. Also known as *eboe-oil*, *artist's oil*, and *country-walnut oil*.

candle-power, *n.*—**Horizontal candle-power,** the intensity of a source of light as determined by photometric measurements in the horizontal plane.—**Mean horizontal candle-power,** the mean value of the radius vector of the polar curve of horizontal distribution of light; the average value, expressed in candle-power, of the horizontal intensity of a source of light.—**Mean spherical candle-power,** the mean spherical intensity of a source of light, expressed in candle-power; the mean radius vector of the surface of spherical light-distribution of a source of light. See ★*illumination*.—**Spherical candle-power.** See ★*light standard*.—**Zonal candle-power,** the photometric intensity, in candles, of a source of light, averaged for a given zone upon the imaginary sphere of which the source is the center; the zonal light-flux from a source divided by the area of the zone.

candler (kan'dlėr), *n.* One who candles (eggs). See ★*egg-candler*.

candle-snuff (kan'dl-snuf), *n.* The burnt wick of a candle.

candle-waster, *n.* 2. A small part of burnt wick that comes into contact with the melting wax or tallow of a candle and causes it to run.

candle-wick (kan'dl-wik), *n.* [ME. *candylweke*, AS. *candelweoca*.] The wick of a candle.

> Beg my pardon, or be sure a kindly bullet through your skull
> Lets in light and teaches manners to what brain it finds; Choose quick—
> Have your life snuffed out or, kneeling, pray me trim yon *candle-wick!* *Browning*, Clive, l. 124.

candlewood, *n.* 3. Any resinous wood used for torches or as a substitute for candles.

Candollea (kan-dō'lē-ą), *n.* [NL. (Labillardière, 1805), named after the Swiss botanist Augustin Pyramus de Candolle (1778–1841).] A genus of dicotyledonous plants belonging to the family *Candolleaceæ*, of which it is the type. See *Stylidium*.

Candolleaceæ (kan-dō-lē-ā'sē-ē), *n. pl.* [NL. (Schönland, 1889), ‹ *Candollea* + *-aceæ*.] A family of dicotyledonous sympetalous plants of the order *Campanulales*, typified by the genus *Candollea*.

candolleaceous (kan-dō-lē-ā'shius), *a.* Belonging to the plant-family *Candolleaceæ*.

cane[1], *n.* 6. A slender stick or rod of some substance such as sealing-wax, sulphur, glass, or tobacco.

> Letters . . . concerning the effects of a *Cane* of black sealing-wax, and a *Cane* of brimstone in Electrical Experiments. *Philos. Trans.*, XLIV. i. 27.

African cane, the pearl-millet, *Pennisetum spicatum*.—**Maiden cane,** a panic-grass, *Panicum digitarioides*, affording good grazing in wet places in the southern United States.—**Mutton cane.** (*a*) The seedlings of the large and small canes which furnish good pasture and which are specially sought by bears. [Alabama.] (*b*) A slender panic-grass, *Panicum dichotomum*, a valuable native forage for sheep in the southern United States.—**Ribbon-cane,** a variety of sugar-cane native to America in which the stems are striped longitudinally with red and purple.—**Spanish-cane,** the reed *Arundo Donax*.—**Sweet-cane.** Same as *sweet-flag*.

cane-ash (kān'ash), *n.* See ★*ash*[1].

cane-blight (kān'blīt), *n.* A disease which attacks the canes or branches of small fruits, such as currants or raspberries, ascribed to fungus parasites.

cane-borer (kān'bōr-ėr), *n.* An insect which bores in the canes of plants.—**Blackberry cane-borer,** an American buprestid beetle, *Agrilus ruficollis*, which bores the canes of the raspberry, forming swellings known as gouty-galls. See *Agrilus*, with cut.—**Raspberry cane-borer,** an American longicorn beetle, *Oberea bimaculata*, whose larva bores in the canes of the raspberry and the blackberry.

Cane-brake region, specifically, an extensive belt in central Alabama and extending into Mississippi, formerly dominated by cane-brakes, but highly adapted to agriculture, and especially celebrated for the production of cotton. Also called the *black belt*, on account of the color of the soil, and (also chiefly from the character of the soil) the *prairie region*.—**Cane-brake soil,** the soil of the cane-brake region, consisting typically of disintegrated rotten limestone combined with abundant humus, giving it a very black color.

cane-fruit (kān'frōt), *n.* A commercial name for fruits borne by plants of the genus *Rubus*, chiefly blackberries and raspberries.

cane-knife (kān'nif), *n.* A large knife, with a wide blade and a sharp barb or hook at the back of the blade, used in cutting sugar-cane.

canellin (ka-nel'in), *n.* [*canella* + *-in*[2].] A name given to the mannite found in *Canalla alba* by Petros and Roninet, who mistook it for a peculiar kind of sugar.

canello (kä-nel'ō), *n.* [Pg. *canelo*, piece of a horseshoe, ‹ *canela*, *canella*, cinnamon: see *cannel*[2].] A name at Goa for the pataca, equal to 4 crusados.

canephora (ka-nef'ọ-rą), *n.* [L.] Same as *canephore*.

cane-press (kān'pres), *n.* In *sugar-manuf.*, a cane-mill. See *sugar-mill*.

cane-rush (kān'rush), *n.* In some American colleges, a concerted tussle between two classes in which they struggle for the retention or capture of a cane.

cane-rust (kān'rust), *n.* 1. The anthracnose of blackberry and raspberry. See ★*anthracnose*.—2. The red rust of blackberries, due to the ædicial stage of *Puccinia interstitialis*.

canestrella (kan-es-trel'ą), *n.* [It., fem., ‹ *canestrello*, m., dim. of *canestro*, ‹ L. *canistrum*, a basket: see *canister*.] A majolica fruit-basket, usually with openwork sides.

Canes venatici (kā'nēz vē-nat'i-sī). [L.] The hunting dogs or hounds, Asterion and Cleara, a modern constellation formed by Hevelius between Boötes and Ursa Major.

Canet gun. See ★*gun*[1].

canework (kān'wėrk), *n.* 1. Interwoven or braided strips of cane used to form or fill in the seats or backs of chairs or settles, panels in carriage-bodies, etc.—2. In *carriage-painting*, an imitation of braided cane painted upon a carriage-panel.

canfieldite (kan'fēld-īt), *n.* [Named after F. A. *Canfield* of Dover, New Jersey, a mining engineer.] A rare sulphid of tin and silver, containing also a small amount of germanium, found in black octahedrons with brilliant metallic luster at La Paz, Bolivia.

can-filler (kan'fil'ėr), *n.* A machine used for filling cans, as with soups or vegetables, prepared paints, etc. The tank may also be fixed in one position and the cans placed on a traveling-apron or conveyer and pass under the tank to be filled.

cangenett, *n.* A distortion or misprint of *canzonet*. *Shak.*, L. L. L., iv. 2.

cangiante (kän-jē-än'te), *a.* [It. *cangiante*, changing in color.] Changeable; in *ceram.*, noting a metallic luster of changing tints, when viewed from different points, found on old Moorish and majolica wares.

cangue (kang), *v. t.*; pret. and pp. *cangued*, ppr. *canguing*. To sentence to the cangue.

can-hoop (kan'höp), *n.* An American shrub, the smooth winterberry. Also called *hoop-wood*.

canicide (kan'i-sīd), *n.* [NL. **canicida*, ‹ L. *canis*, dog, + *-cida*, ‹ *cædere*, kill.] A dog-killer.

> The dead dog is hung by his heels, so that his nose just touches the ground, and the *canicide* is compelled to heap wheat about him, till he is entirely covered. *N. P. Willis*, Summer Cruise in Medit., xli.

canicular, *a.* 2. Relating to the dog: as, a *canicular* tale.

> It is well if your friend or mistress be content with these *canicular* probations. *Lamb*, Essays of Elia, Pop. Fallacies.

Canicular cycle or **period,** otherwise **Sothiac** or **Sothic period** [tr. Gr. Σωθιακὴ περίοδος, 'the dog-star period,' ‹ Σῶθις or Σῶθέ, the Egyptian name of the dog-star], a cycle recognized in ancient Egypt, equal to 1,461 years of 365 days each, or 1,460 Julian years of 365¼ days each.

canin (kä'nēn), *n.* [Tagalog *canin*, food, bread.] Rice boiled in water, eaten by the natives in place of bread. [Philippine Is.]

canine, *n.* 4. One of the sharp teeth which project beyond the others in the jaw of a fish.

caninity (kạ-nin'i-ti), *n.* Canine nature; a canine trait.

canivorous (kạ-niv'ọ-rus), *a.* [L. *canis*, dog, + *-vorus*, ‹ *vorare*, devour.] Dog-devouring. *N. E. D.*

canjar (kän'jär or kun'jär), *n.* [Also canjiar, cangiar, *cunjur*, *cunger*, ‹ Hind. **khangar*, ‹ Ar. *khanjar*, a dagger. The Ar. word also appears in European use as *handjar*.] A small two-edged Arab cutlass or poniard.

> The marabout . . . sprung forward with the bound of a tiger, . . . and brandished aloft the *cangiar*, or poniard, which he had hidden in his sleeve. *Scott*, Talisman, xxi.

canker, *n.* 1. (*b*) (2) An irregular excrescence on the trunks or branches of woody plants, caused by the perennial effort of the tissues to overcome an injury. Cankers may be originated by various causes, such as accidental wounds, injuries by frost, insects, fungi or bacteria, or various combinations of these.

> But undoubtedly the most important of the woody excrescences on trees are *cankers*. A *canker* is the result of repeated frustrated attempts on the part of the callus to heal up a wound. . . . The dead parts, of course, remain unthickened, and the portion in which the Fungus is at work may for the time being grow more rapidly. Such *cankers* often commence in mere insect punctures, frosted buds, cracks in the cortex, &c., into which a germinating spore sends its hypha. *Encyc. Brit.*, XXXI. 577.

(*d*) A disease of fowls affecting the mouth and windpipe. It produces ulceration and often ends in death.—**Apple-tree canker,** a disease of the apple-tree which usually causes the rupture of the bark and the death of larger or smaller areas of the wood. One form is attributed to the fungus *Sphæropsis Malorum*, another to *Nectria ditissima*. It has been shown that some cankers are produced by bacteria.—**Hemp canker,** a destructive disease of hemp due to a species of *Sclerotinia*.—**Ivy canker,** a disease of unknown origin producing cankerous growths upon ivy twigs, which may result in the death of the plant.—**Larch canker,** a cankerous formation on the larch, said to be due to the discomycetous fungus *Dasyscypha Willkommii*.—**Oak canker,** a disease of twigs and young stems of oak, attributed to the pyrenomycetous fungus *Diaporthe Taleola*.—**Plum canker,** a disease of plum-trees, said to be due to *Nectria ditissima*.

canker-sore (kang'kėr-sōr), *n.* Aphthous ulcer of the mucous membrane in the angle between the lip and the gum.

cannabin, *n.* 2. A brown liquid alkaloid said to be isolated from Indian hemp, *Cannabis Indica*. It is hypnotic.—**Cannabin tan-**

nate, a yellowish-gray bitter and astringent powder of undetermined composition, prepared by precipitating a solution of cannabin with tannic acid. It is hypnotic and narcotic.

cannabinaceous (kan″a-bi-nā′shius), *a.* Of the nature of or resembling plants of the hemp family.

cannabindone (kan-a-bin′dōn), *n.* [Appar. < NL. *cannal(is) ind(ica)* + *-one.*] A red syrup-like compound, $C_8H_{12}O$, obtained from Indian hemp. It has a narcotic effect.

cannabinine (kan-a-bin′in), *n.* [*cannabin* + *-ine*[2].] A volatile alkaloid found in small quantities in Indian hemp.

cannabinol (kan′a-bi-nōl), *n.* [*cannabin* + *-ol.*] A colorless resinous and very poisonous compound, $C_{21}H_{26}O_2$, found in Indian hemp (*Cannabis Indica*).

cannabism (kan′a-bizm), *n.* [L. *cannab(is)* + *-ism.*] Addiction to the use of Indian hemp or hashish.

Cannaceæ (ka-nā′sē-ē), *n. pl.* [NL. (Link, 1821), < *Canna* + *-aceæ.*] A family of monocotyledonous plants of the order *Scitaminales*, the canna family, containing the single genus *Canna* (which see).

canna-disease (kan′a-di-zēz″), *n.* See ★*disease.*

canned (kand), *p. a.* Packed in cans or tin boxes.—**Canned goods**, articles of food, chiefly meats, fish, vegetables, and fruit, preserved by inclosure in tin cans or other vessels, which are heated to or somewhat beyond the boiling-point of water and while at that temperature are sealed, generally by soldering, thus destroying the vitality of ferment-organisms and excluding air. The manufacture of such goods is now very extensive, some 72,000,000 cans of peas, 235,000,000 cans of tomatoes, 264,000,000 cans of sweet corn, and 206,000,000 cans of salmon alone being put up annually in the United States. Called in Great Britain *tinned goods.*

cannelon (kä-nel-oṅ′), *n.* [F. *cannelon*, a channeled mold for cheese; Pg. *canelões*, pl. (see def. 2) < *canela*, cinnamon: see *cannel*[2].] **1.** Puff-paste baked in the form of a cane.—**2.** A sort of cake. See the extract.

> *Canelões*, s. pl. *canelons*, great long comfits, with pieces of cinnamon mixed in them; so they also called the pieces of citron covered with sugar and some other dainties which made part of a festival.
> *Lacerda*, New Dict. Port. and Eng. Lang., p. 191.

canner (kan′ėr), *n.* One who cans fish, meat, fruit, or other things for preservation.

Cannibal apple. See ★*apple.*

cannibal-bug (kan′i-bal-bug), *n.* Any one of the predatory heteropterous insects of the family *Reduviidæ*. Also called *pirate-bug* and *assassin-bug.* Familiar examples are the 'cone-noses' (*Conorhinus*), and the 'kissing-bug.'

cannibalic (kan-i-bal′ik), *a.* Of or pertaining to a cannibal; characteristic of a cannibal.

cannibality (kan-i-bal′i-ti), *n.* Cannibalism; the eating of human flesh. *N. E. D.*

Cannon dollar. See ★*dollar.*—**Nursery cannons**, in English *billiards*, caroming by keeping the balls together. **Revolving cannon.** See *machine-gun.*

cannon, *v.* **II.** *trans.* In loading logs by steam- or horse-power, to send up (a log) so that it swings crosswise, instead of parallel to the load.

cannonarchy (kan′on-är″ki), *n.* [*cannon* + Gr. *-αρχία*, rule.] Government by military force: as, "the *cannonarchy* of Napoleon," *Mrs. Gore.* [Rare.]

cannoned (kan′ond), *p. a.* Furnished with or defended by cannon.

> There, where Gibraltar's *cannon'd* steep
> O'erfrowns the wave.
> *M. Arnold*, Southern Night, st. 6.

Cannstatt skull. See ★*skull*[1].

Canoe landau. See ★*landau.*—**Double canoe**, a peculiar form of canoe used in some of the Polynesian islands, consisting of two canoes connected by a platform. Only one of the canoes is provided with a sail, while the other serves the purpose of an outrigger.

canoe-burial (ka-nö′ber″i-al), *n.* The custom of depositing corpses in canoes, practised by the Indians of the coast of Washington.

canomai (kä-nō′mī), *n.* [Bisaya.] In the Philippine Islands, a tree, *Diospyros multiflora*, belonging to the ebony family, having dark, ebony-like heart-wood striped with lighter bands. The fruit is used by the natives to intoxicate fish.

canon[1], *n.*—**Double canon**, in *music*, a canon with two subjects used nearly simultaneously.—**Infinite canon.** Same as *circular canon* (which see, under *canon*[1]).

Cañon spring. See ★*spring.*

cañon, *v. i.* **2.** To become narrow and steep-walled: said of a valley.

cañon-finch (kan′yon-finch), *n.* The southwestern towhee, *Pipilo fuscus mesoleucus.* Also called *cañon-towhee.*

canonic, *n.* **2.** (*a*) The theory of music. (*b*) One who practises music.

Canonical distribution, in *math.*, a distribution of groups of systems, in statistical mechanics, such that the index of probability of phase is a linear function of the energy.

> This distribution, on account of its unique importance in the theory of statistical equilibrium, I have ventured to call *canonical.* *J. W. Gibbs*, Statistical Mech., p. xi.

Canonical ensemble, in *statistical mechanics*, an ensemble of systems so distributed that the index of probability of phase is a linear function of the energy.

canonics (ka-non′iks), *n.* In *theol.*, the study of the formation and authority of the canon of Scripture.

canonist, *n.* **2.** One who lays down canons or laws for guidance in the systematic or scientific treatment of a subject. *Horne Tooke.*

canonistical (kan-o-nis′ti-kal), *a.* Relating to canonists or to their expositions of the canons.

cañon-towhee (kan′yon-tou″hē), *n.* Same as ★*cañon-finch.*

cañon-valley (kan′yon-val″i), *n.* A narrow, steep-walled valley.

> Mother-Lode (Cal., Ransome) exhibits parts of the uplifted and dissected peneplain of the Sierra Nevada; it was strewn with gravels and flooded with lavas and volcanic conglomerates before uplift; it is now trenched by *canyon-valleys.* *Science*, June 14, 1901, p. 950.

canoodle (ka-nö′dl), *v.*; pret. and pp. *canoodled*, ppr. *canoodling.* [Origin obscure.] **I.** *trans.* **1.** To pet; fondle.—**2.** To paddle (a canoe). [A punning use.]

II. *intrans.* **1.** To bill and coo; spoon.

> Now Emperor William wants to kiss his majesty, the Sultan, who he says is a daisy of moderation. The first thing Germany knows, William will be rushing off to *canoodle* with Mr. Gladstone's "Assassin!"
> *Daily Newspaper.*

2. To go snacks; share the profits. [Slang in all uses.]

canoodler (ka-nöd′lėr), *n.* One who canoodles. [Slang.]

canope (ka-nōp′), *n.* Same as ★*canopus*[2].

> Under a block of stone I came across a chest containing *canopes.* *J. de Morgan*, Smithsonian Rep., 1896, p. 602.

canophilist (ka-nof′i-list), *n.* [L. *canis*, dog, + Gr. *φιλεῖν*, love, + *-ist.*] One who loves dogs.

> A distinguished author, well known as a *canophilist.*
> *Lindsay*, Mind in the Lower Animals, I. 24.

canopus[2] (ka-nō′pus), *n.* [NL., also *canopos*; a back-formation from *Canopicus*, Canopic: see *Canopic.*] In *Gr. archæol.*, a modern name for a cinerary jar representing the human figure, somewhat like the ancient Egyptian Canopic vases.

Canopy standard, in *carriage-making*, a light iron or steel post with bolts and nuts on the lower end and flat-turned lugs at the top.—**Canopy top**, in *carriage-making*, a light top made with ribs like an umbrella, or on a light frame, and attached to the carriage-body by one or more iron posts.

canroy (kan′roi), *n.* [Origin not ascertained.] A machine for brushing the lint from the surface of cotton cloth: used in calico-printing establishments preparatory to printing. *G. Duerr*, Bleaching and Calico-printing, p. 26.

cant[1], *n.* **10.** An oblique line which cuts off a corner of a rectangle; an oblique side of a polygon; an oblique plane which cuts off the corner of a cuboid; an oblique face of a crystal; a slanting face of a bank.—**11.** A sudden movement, as on board ship, resulting in a tilting up.—**12.** One of the pieces which form the ends of the buckets on a water-wheel.

cant[1], *v. t.*—**Canting motion.** See ★*motion.*

cant[2], *n.* **6.** A canting person.

cant[6] (kant), *n.* **1.** A portion, share, or division; a parcel or bundle: as, a *cant* of hay; a *cant* of growing grain assigned to a reaper. [Chiefly dialectal.]—**2.** In *civil law*, a method of partitioning property the title to which is vested in two or more parties in common.

Cant. An abbreviation of *Canticles.*

cantabile, *a.* **II.** *n.* A piece or passage of music in a flowing, song-like style.

Cantabrize (kan′ta-brīz), *v. i.* [NL. *Cantabr(igia)*, Cambridge, + *-ize.*] To imitate or pattern after Cambridge or its university. *Fuller*, Ch. Hist., IX. vii. § 47.

Cantal cheese. See ★*cheese*[1].

Cantaliver crane. See ★*crane*[2].

cantankerate (kan-tang′kė-rāt), *v. t.*; pret. and pp. *cantankerated*, ppr. *cantankerating.* To make cantankerous; provoke to anger; 'rile.'

> You may happify your enemies, *cantankerate* your opponents, and injure your own cause by it.
> *Haliburton*, Clockmaker, XXIV.

cantankersome (kan-tang′kėr-sum), *a.* Cantankerous. [U. S.]

cantaro (kän′tä-rō), *n.* [Sp. *cántaro* = It. *cantaro*, < L. *cantharus*, < Gr. *κάνθαρος*, a pot, tankard: see *cantharus.*] A vessel of hammered brass or copper used in Spain for holding or carrying water.

Cantaro.

Cantate Sunday. See ★*Sunday.*

cantator (kan′tā-tōr), *n.* [L.] A male singer. [Rare.]

cantatorium (kan-ta-tō′ri-um), *n.*; pl. *cantatoria* (-ä). [ML.] A Roman Catholic service-book including the antiphons and the gradual.

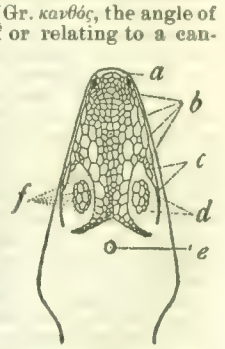
cant-board, *n.* **2.** In *carriage-making*, a board upon which are placed the geometrical lines that govern the framing and the exterior curved surface of a coach or other carriage-body of a similar character.

cantem, kantem (kan′tem), *n.* [Belgian, appar. from a Picard form of F. *centime.*] The Belgian centime.

canter[1], *v. i.*—**Cantering rhythm.** See ★*rhythm.*

canter[4] (kan′tėr), *n.* In a *sawmill*, a machine placed over the carriage and used to cant or roll over the log on the carriage in making the first cuts; a canting-machine. It consists of a chain wound round a drum or shaft and carrying, at the end, a cant-hook that engages the log, the revolution of the shaft lifting the chain and hook and turning the log.

Canterburian (kan-tėr-bū′ri-an), *a.* **1.** Of or pertaining to the city of Canterbury in England, the seat of the Anglican archbishop who is also the Primate of all England.—**2.** Of or pertaining to the archiepiscopal see itself.



Canterburianism (kan-tėr-bū′ri-an-izm), *n.* [*Canterburian* + *-ism.*] The High-churchism of England during the seventeenth century as represented by the see of Canterbury.

> The *Canterburianism* of the times of Charles the First did that hapless monarch much harm.
> *Hugh Miller*, First Impressions, xx.

Canterbury tale. See ★*tale*[1].

canteroy (kan′te-roi), *n.* [In Mysore *Kanṭhiravi hun*, named from *Kanṭhiravā Rāyā*, 'the lion-voiced king,' who reigned in Mysore from 1638 to 1659 (Skt. *kanṭhīrava*, lion, < *kantha*, throat, + *rava*, noise).] A name in Mysore for an Indian gold coin, the sultani fanam.

canthal (kan′thal), *a.* [Gr. *κανθός*, the angle of the eye, + *-al*[1].] **1.** Of or relating to a canthus, in any use of that word.

Scutellation of Top of Head of Anolis.

a, rostral; *b*, canthus rostralis; *c*, superciliaries; *d*, supraocular disk; *e*, occipital; *f*, supraorbital semicircle.

> A black *canthal* and temporal streak [is] sometimes present.
> *Proc. Zool. Soc. London*, 1903, [p. 126.

Canthal scale, canthal shield, a scale covering or lying on the *canthus rostralis*, that angular part of a reptile's head which lies in front of the eye and between the top and side of the head. The relations of this scale or scales are much used in giving the characters of reptiles.

cantharene (kan′tha-rēn), *n.* [*canthar(ic)* + *-ene.*] Dihydro-orthoxylene, $C_6H_6(CH_3)_2$. It is obtained by heating cantharic acid with lime. It has an odor like that of turpentine and camphor and boils at 135° C.

cantharic (kan-thar′ik), *a.* [*canthar(is)* + *-ic.*] Pertaining to or derived from cantharidin.—**Cantharic acid**, a crystalline, monobasic acid, $C_{10}H_{12}O_4$, obtained by treating cantharidin with hydriodic acid. It melts at 278° C.

Cantharidal collodion. See ★*collodion.*

cantharidate (kan-thar′i-dāt), *v. t.*; pret. and pp. *cantharidated*, ppr. *cantharidating.* [*cantharid* + *-ate*[2].] To treat or impregnate with cantharides or any of its preparations.

cantharidated (kan-thar′i-dā-ted), *p. a.* Containing cantharides.

cantharidism (kan-thar'i-dizm), *n.* [*cantharid* + *-ism.*] A state induced by the use of cantharides in poisonous amount, the chief symptoms of which are strangury and the passage of blood in the urine.

cantharidize (kan-thar'i-dīz), *v. t.*; pret. and pp. *cantharidized*, ppr. *cantharidizing*. [*cantharid* + *-ize.*] To treat with cantharides.

cantharoid (kan'thạ-roid), *a.* Resembling a cantharus, or large two-handled cup: said of Greek vases. See *cantharus*, 1.

cantharophilous (kan-thạ-rof'i-lus), *a.* [Gr. *κάνθαρος*, beetle (see *Cantharis*), + *φίλος*, loving.] In *bot.*, pollinated, or having the flowers pollinated, by beetles.

cantharus, *n.* **5.** A chandelier used in churches, described as a disk of metal having candles fixed upon it.

canthectomy (kan-thek'tọ-mi), *n.* [Gr. *κανθός*, the corner of the eye, + *ἐκτομή*, excision.] In *surg.*, excision of a portion of the canthus of the eye.

Cantherines (kan-thẹ-rī'nēz), *n.* [NL., prop. *Canthorhinus*, < Gr. *κάνθων* (?), pack-ass, or *ἀκανθα* (?), spine, + *ῥίς* (*ῥιν-*), nose.] A genus of file-fishes of the family *Monacanthidæ*, found in the tropical seas, distinguished by the smooth dorsal spine. *C. sandwichensis* of the Hawaiian Islands is the typical species.

cantholysis (kan-thol'i-sis), *n.* [NL., < Gr. *κανθός*, the corner of the eye, + *λύσις*, dissolution.] An operation for division of the canthus.

canthorrhaphy (kan-thor'ạ-fi), *n.* [Gr. *κανθός*, the corner of the eye, + *ῥαφή*, sewing, stitching.] The stitching together of the two edges of the divided canthus of the eye.

canthotomy (kan-thot'ọ-mi), *n.* [Gr. *κανθός*, the corner of the eye, + *-τομία*, < *ταμεῖν*, cut.] In *surg.*, division of either canthus of the eye.

Canthus rostralis, the angular portion of the head of a reptile in front of the eye and between the top and side of the head.

canticle, *n.* **5.** Any song or hymn, properly one that is brief and simple.

cantico, canticoy, *n.* See *kantikoy.*

canting, *p. a.* **3.** Of the nature of professional cant or jargon: used by or peculiar to a particular class, profession, or subject: as, *canting* terms; *canting* language.—**Canting coat.** (*b*) A term opprobriously applied in the seventeenth century to the Geneva gown worn by Presbyterian ministers and others.

canting (kan'ting), *n.* [*cant*[2], *v.*, + *-ing*[2].] **1.** The act of speaking in a whining tone; an apparently insincere use of religious or pious phraseology.—**2.** The use of the terms or phraseology of a particular class, as of beggars, thieves, gipsies, tramps, etc., or of a particular profession or subject.—**3.** Sale by auction.

canting-machine (kan'ting-mạ-shēn'), *n.* Same as ★*canter*[4].

cantiont, *n.* **2.** Incantation; a magic spell.

> The Arcane *Cantion* . . . harps much upon this Point. *Cudworth*, Intell. Syst., I. 349.

cantline (kant'lin), *n.* *Naut.*, the space between the sides or ends of barrels when they are stowed side by side. Should the bilge of one barrel be stowed so that it rests in the cantline of two other barrels, it would be said to be stowed *bilge and cantline.* Also called *cutline.*

canton[1], *n.* **6.** In *arch.*, a thickened or emphasized corner of a building, as where two pilasters are set one on each side of the extreme angle. See *cantoned* (with cut).

canton[1], *v.* **I.** *trans.* **3.** In *her.*, to furnish with a canton, or furnish a canton with: as, a cross argent *cantoned* with four scallop-shells.

II. *intrans.* To quarter one's self in a temporary hut or cantonment.

cantonalism (kan'tọn-al-izm), *n.* [*cantonal* + *-ism.*] The cantonal system of administrative government. See *canton*[1], *n.*, 3.

Canton china. See ★*china.*

Cantonese (kan-tọn-ēs'), *a.* and *n.* **I.** *a.* Of or pertaining to Canton.

II. *n.* **1.** A native of Canton.—**2.** The Chinese dialect of Canton.—**3.** A person who speaks the Cantonese dialect.

cantonist (kan'tọn-ist), *n.* A child born in a Russian military cantonment. *N. E. D.*

> The so-called military *cantonists*, who supply a yearly contingent of recruits. *Fraser's Mag.*, L. 481.

cantonment, *n.* **3.** The placing of troops in temporary quarters.

Canton's phosphorus. See ★*phosphorus.*

cantor, *n.* **2.** Specifically, in Germany, the music-master in a choir-school or similar institution, or the kapellmeister of a church. See *kapellmeister.*

Cantorian (kan-tō'ri-ạn), *a.* Of or pertaining to Dr. Georg Cantor, mathematical professor in the University of Halle-on-the-Saale.—**Cantorian ordinal number,** one of a collection of designations which distinguish individually all the positions of members in each Cantorian series, the first number designating the first position both between all the numbers and all the positions and between any part of the numbers and the positions designated by them. The first class of Cantorian ordinals consists of those numbers of the series which are not preceded by innumerable others. The second class is composed of those numbers of the series only each of which is preceded by a denumeral collection of others.—**Cantorian series,** a series of objects, called its *members*, so arranged that every part of the series has a first member: called by Cantor himself a *well-ordered collection* (*wohlgeordnete Menge*).

cant-purchase (kant'pėr″chās), *n.* *Naut.*, a tackle having one of its blocks secured to the masthead and the other to the hook in the blubber of a dead whale alongside: used for turning the whale over while it is being stripped or flensed.

cant-rail, *n.* **4.** The top rail of a coach- or other heavy carriage-body. The outer side determines the curve lengthwise, and by it the turn-under of the standing pillars and all other curves of the body are defined.

cant-splice (kant'splīs), *n.* Same as *contsplice.*

Cantuar. An abbreviation of the Latin *Cantuarensis*, 'of Canterbury': used, for example, in the abbreviated signature of the Archbishop of Canterbury.

cantuta (kan-tō'tạ), *n.* [Also *kantuta.* Peruvian (Quichua and Aymará).] A flowering shrub, *Kantuta buxifolia*, from the high plateaus of southern Peru and Bolivia, where it grows in clusters in altitudes not exceeding 13,000 feet. There are red, scarlet, yellow, and white varieties. The flower is often represented on ancient pottery and textiles.

cant-window (kant'win″dō), *n.* A projecting bay- or oriel-window the sides of which are canted, that is, sloped with relation to the main wall.

canun, *n.* Same as *kanun.*

canvas, *n.*, **1.** (*c*) In *cricket*, a sheet of white canvas stretched on the boundary as a background behind the bowler, to aid the batsman in seeing the ball. [Colloq.]—**4.** A painting executed on canvas.

> A much damaged *canvas* of this subject in the Wallace collection, at Hertford House, may be the larger of these. *Claude Phillips*, in Portfolio, N. S., XXV. 99.

5. Words written to an air without reference to the sense, simply to indicate to the poet or song-writer the measure of the verses he is to supply. [Chiefly French.]—**Roofing-canvas,** a thick, heavy duck used to cover the roofs of street-cars, the decks of steamboats, etc. It is nailed down on thick fresh paint and is given several coats of paint to make it water-tight.—**Willesden canvas,** a compact waterproof and rot-proof canvas prepared by passing ordinary canvas through a bath of Schweitzer's reagent and then drying it. It is of a green color.

caoutchouc, *n.* Products more or less resembling caoutchouc are obtained by the application of the vulcanizing process to colza and other oils, and are employed to mix with or partly replace real india-rubber. A substance which seems to be identical with natural caoutchouc has been obtained in the scientific laboratory by polymerization of isoprene, a hydrocarbon derived from turpentine; but the process has not become commercially practical.—**Caoutchouc naphtha,** a mixture of liquid hydrocarbons obtained by subjecting india-rubber to destructive distillation.

caoutchouc-oil (kō'chůk-oil), *n.* A mixture of hydrocarbons obtained by the destructive distillation of caoutchouc, and consisting of isoprene (C_5H_8), kautschin ($C_{10}H_{16}$), and hevene (C_5H_8).

cap[1], *n.*, **2.** (*a*) (2) The calyptra of a moss. (*m*) A cover of leather or other material for the lens of a camera to exclude light and dust. If a shutter is not used, the exposure is usually made by removing and replacing the cap. (*n*) In *carriage-trimming*, a funnel-shaped leather pocket used to cover the lower ends of carriage-bows and the ends of the bow-irons. (*o*) In *arch.*: (1) Same as *capital:* in common use among masons. (2) A coping or other finish of the top of a post or pier or wall, especially anything projecting slightly beyond the vertical faces. Hence—(3) The horizontal molding finishing at the top a window-trim, door-trim or architrave. (4) The uppermost member of a hand-rail, as in a balustrade or the like; that part of a hand-rail which is molded to allow the hand to grasp it. (*p*) One of the white spots which appear at the poles of Mars and increase and decrease with the changes of the planet's seasons. (*q*) In *steam-skidding*, a cone of sheet-iron or steel, with a hole in the end through which a chain passes, which is fitted over the end of a log before snaking it, to prevent it from catching on stumps, roots, or other obstacles. (*r*) In *mining*, a horizontal timber resting on a prop or on one or more legs, used to support the roof.—**Cap and bells.** (*a*) A head-dress consisting of a cap set with bells, worn by court fools in the middle ages. (*b*) Same as *marotte.*—**Cap and gown,** the cap (mortar-board) and scholastic gown worn by students in English and some American universities and colleges; hence, a scholar or professional man.—**If the cap fits,** if the remark applies.—**Invisible cap,** a cap the wearing of which is supposed to render one invisible.—**Nuclear cap.** In *neurol.*, a mass of staining-substance found on one side of the nucleus in nerve-cells.—**Pitch cap,** a firm pitch plaster applied to the scalp until it is set, and then quickly torn off: used formerly as a rapid depilatory.—**Polar cap of cold air,** the mass of cold air which covers the north or the south polar region of the earth, flowing equator-ward into the westerly currents and combining with them to make the general circulation of the atmosphere.—**Polar cap of Mars.** See ★*cap*[1], 2 (*p*).—**To put on one's thinking** (or **considering**) **cap,** to pause and consider carefully before deciding or acting.

cap[1], *v. t.*—**To cap all,** to crown all; in addition to everything else.—**To cap the hocks,** so to injure the hocks of a horse as to cause the formation of swellings over their prominences behind.

cap[2], *n.*—**To kiss caps with,** to drink out of the same cup or bowl with. [Scotch.]

capacitance (kā-pas'i-tạns), *n.* [*capacit(y)* + *-ance.*] In *elect.*, a term proposed for capacity reactance. See *capacity of a conductor* and ★*reactance.*

capacity, *n.* **7.** The ability of a stream to transport land-waste, measured by the quantity carried past a given point in a given time.—**Atomic capacity.** See ★*atomic.*—**Calorific capacity.** See ★*calorific.*—**Capacity for vapor.** See ★*vapor.*—**Capacity ratio,** ratio of volume; ratio of cubic contents: used in referring to the relative volume of engine-cylinders.—**Capillary storage capacity.** See ★*storage.*—**Dynamical capacity.** See ★*dynamical.*—**Evaporative capacity.** See ★*evaporative.*—**Testamentary capacity,** legal ability to make a valid will.

cap-bar (kap'bär), *n.* In *cotton-spinning*, an attachment to a drawing-frame for supporting the bearings of draft-rolls.

cap-cell (kap'sel), *n.* See ★*cell.*

cap-cloud (kap'kloud), *n.* A smooth white cloud surmounting the summit of a mountain; a cloud-cap.

cape[2], *n.* **3.** A Cape diamond.—**Cape artichoke-flower,** *Leucadendron Cinaroides.* See *Leucadendron.*—**Cape bar, bass, boys, box, cart, cotton, cowslip, honeysuckle.** See ★*bar*[1], etc.—**Cape diamonds,** diamonds from the Cape of Good Hope (South Africa): distinguished elliptically as *Cape, fine Cape, silver Cape.*—**Cape Girardeau sandstone.** See ★*sandstone.*—**Cape gum, hansom, harness.** See ★*gum*[2], etc.

capeador (kä″pā-ä-dōr'), *n.* [Sp., < *capear*, < *capa*, cape: see *cape*[1].] In bull-fights, the person who excites the bull and distracts his attention by using a red cape.

cape-chisel (kāp'chiz″el), *n.* [**cape* for *chape* + *chisel.*] A narrow cold-chisel; a narrow chisel used for cutting grooves or slots in metal.

cape-cloud (kāp'kloud), *n.* A stationary cloud or cloud-mass above a cape or promontory, at the summit of a standing wave of air pushed up by the resistance of the cape to the wind; specifically [*cap.*], the cloud-bank around the Cape of Agulhas at the southern end of Africa.

cape-hen (kāp'hen), *n.* A name given by sailors to the giant fulmar, *Ossifraga gigantea*, and to the great southern skua, *Megalestris antarcticus.*

capellone (kä-pel-lō'ne), *n.* [It. dial., < *capello*, < L. *capillus*, hair.] A silver coin of Modena, equal to 6 soldi or 8 denarii.

capelocracy (kap-e-lok'ra-si), *n.* [Gr. *κάπηλος*, atradesman, huckster, chapman, + *-κρατια*, < *κρατεῖν*, rule.] The shopkeeping class or their interests. *Bulwer.*

cape-net (kāp'net), *n.* [*cape*[1] + *net*[1].] A kind of netting similar to bobbinet.

caper-berry (kā'pėr-ber″i), *n.* The fruit of the common caper-bush, *Capparis spinosa*, or of an African species, *C. decidua:* sometimes used like capers.

caperer, *n.* **2.** The caddis-fly: so named from its dancing flight.

caperidin (ka-per'i-din), *n.* [*caper(ata)* (see def.) + *-id* + *-in*[2].] A crystalline neutral compound, $C_{24}H_{40}O_2$, obtained from the lichen *Parmelia caperata.* It melts at 262° C.

caperin (kā'pe-rin), *n.* [*caper(ata)* + *-in*[2].] A crystalline compound, $C_{36}H_{60}O_3$, found in the lichen *Parmelia caperata.* It melts at 243° C.

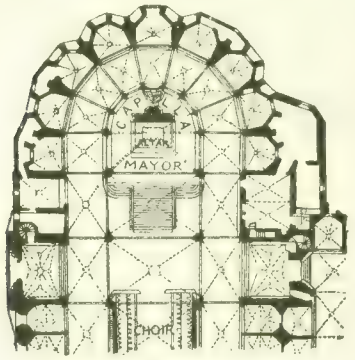
Capernaism (ka-pėr'na-izm), *n.* The materialistic doctrine of transubstantiation held by the Capernaites. Also *Capharnaism.*

Capernaite (ka-pėr'na-īt), *n.* [NL. **Capernaites*, < L. *Capernaum*, Gr. *Καφαρναούμ.*] **1.** An inhabitant of Capernaum.—**2.** A designation applied figuratively, in the sixteenth and seventeenth centuries, to those who, from John vi. 52, 59, held to the doctrine of transubstantiation in its gross form. Also *Capharnaite.*

Capernaitic (ka-pėr-na-it'ik), *a.* Characterized by materialistic conceptions like those of the Capernaites.

Capernaitical (ka-pėr-na-it'i-kal), *a.* Same as *Capernaitic.*

Capernaitically (ka-pėr-nạ-it'i-kạl-i), *adv.* After the manner of the Capernaites.



caper-tree, *n.*— **Florida caper-tree,** *Capparis Jamaicensis,* a shrub or small tree of peninsular Florida and the Keys, ranging to Jamaica.

cap-fungus (kap'fung″gus), *n.* A fungus having an expanded pileus or cap at the apex of the stipe or stem, as an agaric or mushroom.

Capharnaitic (ka-fär-nạ-it'ik), *a.* Same as ★*Capernaitic.*

Capias ad audiendum judicium, a writ to bring a prisoner to judgment after conviction of a misdemeanor, if he is not in court when called.—**Capias ad testificandum,** a writ to compel the attendance of a witness who has refused or neglected to obey a subpœna.—**Capias utlagatum,** in *old Eng. law,* a writ to arrest an outlaw: when general it directs the outlaw to be brought to court on a general return-day; when special it directs, in addition to the arrest, the seizure of the property of the outlaw, and the summoning of a jury to assess its value. *Bouvier,* Law Dict.

capilla mayor (kä-pēl'yä mä-yōr'). [Sp., larger chapel.] In Spanish churches, a secondary choir, or else the eastward part of the

Capilla Mayor, Barcelona Cathedral.

choir, separated from the western part usually by the whole width of the transept, which is left open. In no other land is this feature common. The high altar stands in the capilla mayor, which is raised by steps above the aisles, while the choir proper remains on their level, as at Barcelona, Avila, and Leon. Also called *back-choir.*

capillaritis (kap″i-la-rī'tis), *n.* [NL., < L. *capillaris* + *-itis.*] Inflammation of the capillary vessels.

capillarity, *n.*— **Constant of capillarity.** See *capillary* ★*constant.*—**Laplace's theory of capillarity,** a mathematical theory of surface-tension based upon the assumption of molecular attraction, very intense at small distances, but diminishing rapidly as the distance increases. At a certain distance, called the range of molecular attraction, it becomes negligible. Laplace's work forms the basis of nearly all modern theories.

Capillary analysis. See ★*analysis.*—**Capillary circulation,** the passage of blood through the capillaries from the arteries to the veins during which it gives up its oxygen to the tissues and takes from them the waste products.—**Capillary depression of the barometer.** See ★*barometer.*—**Capillary dimple.** See ★*dimple.*—**Capillary lake,** the entire mass of blood contained within the capillary vessels of the body.—**Capillary nævus, pulse,** etc. See ★*nævus,* ★*pulse*[1], etc.

capilliculture (ka-pil'i-kul-tūr), *n.* [L. *capillus,* hair, + *cultura,* culture.] Methodical care of the hair.

capischol (kap'i-skōl), *n.* Same as ★*capischolus.*

capischolus (kạ-pis'kō-lus), *n.* [ML., also *capiscolus,* a popular form of *caput scholæ,* head of the school.] A precentor or kapellmeister. Also *capiscolus.*

capital[3], *n.*— **Lotus capital** or **column,** in *Egypt. arch.,* a capital or column the form or decoration of which is suggested by the blue lotus of the Nile. There are two common types, the open or bell-shaped and the closed or bud-shaped. See *lotus,* 3.

In 1885 Marcel Dieulafoy made the first systematic effort to connect the volutes of the Egyptian *lotus capitals* with the volutes of the Greek Ionic.

Goodyear, Grammar of the Lotus, p. 72.

Syrian capital, a corbeled capital of one of the forms used in Syria during the fourth century and later. *H. C. Butler,* Arch. and Other Arts, p. 29.—**Tuscan capital,** a capital of the *Tuscan order* (which see).

capitan (käp-i-tän'), *n.* [Sp.: see *captain.*] **1.** A leader; a captain.—**2.** Same as *capitaine.*

capitate (kap'i-tāt), *v. t.*; pret. and pp. *capitated,* ppr. *capitating.* [See *capitate, a.*] To put a head upon; specifically, in *math.,* to prefix to (a symbol) a number not less than the highest digit contained in it: thus 12 may be *capitated* into 212.

Capitelliformia (kap″i-tel-i-fôr'mi-ạ), *n. pl.* [NL., < L. *capitellum,* a capital (in architecture), + *forma,* form.] A suborder of *Polychæta.* They have a conical prestomium, without prestomial processes, but with a pair of large retractile ciliated organs, no cirri, buccal region eversible, pharynx not armed, and setæ unjointed. They are blood-red burrowing worms.

Capitolina (kap-i-tō-lī'nạ), *n. pl.* [L.] Same as *Capitoline games.*

capitoul (kä-pi-töl'), *n.* [Pr.] The head or chief of the Félibres in the south of France.

capitular, *a.*—**Vicar capitular.** See ★*vicar.*

capitulum, *n.* **6.** In actinians, the upper part of the column as distinguished from the scapus.

cap-jewel (kap'jö″el), *n.* Same as *end-stone.*

Capnodium (kap-nō'di-um), *n.* [NL., alluding to the color, < Gr. *καπνώδης,* smoky, < *καπνός,* smoke.] A genus of fungi proposed by Montagne, apparently not distinct from *Apiosporium.*

Capnoides (kap-nō-ī'dēz), *n.* [NL. (Adanson, 1763, adopted from Tournefort, 1700), < Gr. *καπνός,* smoke, the name applied by Theophrastus and Dioscorides to the fumitory plant on account of its sooty odor, + *εἶδος,* form.] A genus of dicotyledonous plants of the family *Papaveraceæ.* See *Corydalis.*

caporal (kä-pō-räl'), *n.* [Sp. and F.: see *corporal*[2].] **1.** A chief; a leader.—**2.** An overseer; one who has charge of a cattle-ranch. [Mexico.]—**3.** A brand of tobacco (alluding perhaps to *le petit caporal,* "the little corporal," a nickname of Napoleon): often qualified as *sweet caporal.*

Couldn't find a bit of tobacco fit to smoke till we came to Strasburg, where I got some *Caporal.*

Thackeray, Pendennis, II. xxxi.

capote, *n.* **3.** A small bonnet, shaped somewhat like a nightcap.

capotement (ka-pōt'mẹnt), *n.* [F. **capotement,* < *capoter,* upset.] A splashing sound sometimes heard in cases of dilatation of the stomach.

capped (kapt), *p. a.* Having a cap; covered with a cap.—**Capped elbow,** in *vet. surg.,* a swelling composed of fibrous tissue, occurring at the point of the elbow. It is caused by repeated injuries from lying on hard floors or with the front feet doubled under the body. See ★*shoe-boil.*—**Capped hock,** a swelling at the point of the hock, due to injury.—**Capped knee,** in *vet. surg.,* an abnormal condition of the knee following an injury. It consists of a swelling due first to a collection of inflammatory serum under the skin, and later to fibrous tissue formation.—**Capped nut.** See ★*nut.*—**Capped shot** or **shell,** a projectile to the point of which a short cylindrical piece of soft steel is fastened, to facilitate penetration of armor.

cappelenite (ka-pel'ē-nīt), *n.* [Named after D. *Cappelen* of Holden, Norway.] A borosilicate of yttrium and barium occurring in greenish-brown hexagonal crystals: found in Norway.

capper[1], *n.* **3.** The workman who takes the filled molds away from a brick-machine.

capping (kap'ing), *n.* **1.** A cover used to finish or protect anything; in *building,* a coping.—**2.** In *mining,* the rock between a vein of ore and the overlying soil.—**3.** In *geol.,* the uppermost formation of an area, usually a more resistant stratum than those immediately underlying: sometimes used also to designate the Quaternary covering of drift or alluvium.

The gravel *capping* of the Navesink Highlands, with a maximum altitude of about 300 feet, is to be correlated with that of the other localities mentioned.

R. D. Salisbury, Geol. Surv. of New Jersey, 1893, p. 40.

Caprellidea (ka-pre-lid'ē-ạ), *n. pl.* [NL., < *Caprella* + *-id-ea.*] A tribe of amphipodous crustaceans having the maxillipeds elongated and palpiform and the abdomen obsolete.

Capri blue, green, etc. See ★*blue,* ★*green,* etc.

Capricorn, *n.* **3.** [*l. c.*] A member of the coleopterous family *Cerambycidæ.*

II. *a.* [*l. c.*] Of or belonging to the coleopterous family *Cerambycidæ.*

caprilic (ka-pril'ik), *a.* [*capr(ic)* + *-il* + *-ic.*] Derived from a like source with capric acid.—**Caprilic acid,** a colorless, crystalline compound, $CH_3(CH_2)_6COOH$, found, in combination with glycerol, in butter, cocoanut-oil, Limburger cheese, and fusel-oil. It melts at 17° C. and boils at 237° C. Also called *octoic acid.*

Caprimulgi (kap-ri-mul'jī), *n. pl.* [NL., pl. of *Caprimulgus.*] The goatsuckers considered as a superfamily or suborder.

Caprina limestone. See ★*limestone.*

Capriola (ka-prī'ō-lạ), *n.* [NL. (Adanson, 1763), a name among early botanical writers for Bermuda grass, < L. *caper,* goat; cf. *capriole.*] A genus of monocotyledonous plants belonging to the family *Poaceæ.* See *Cynodon.*

Caprodon (kap'rō-don), *n.* [NL., < Gr. *κάπρος,* boar, + *ὀδούς* (*ὀδοντ-*), tooth.] A genus of fishes belonging to the family *Serranidæ,* found in the Pacific Ocean.

Capriola Dactylon.

a, top of a plant, showing the digitate spikes; *b,* a single flower; *c,* longitudinal section through a portion of a spike, enlarged; *d,* exterior view of a portion of a spike, enlarged. (Drawn from Engler and Prantl's "Pflanzenfamilien.")

Caproidea (ka-prō-id'ē-ạ), *n. pl.* [NL., < Gr. *κάπρος,* a sea-fish, + *-oidea.*] A group of fishes containing a single family, *Antigonidæ.* They are probably related to the chætodonts, but their affinities are somewhat uncertain. Also called *Caproidæ,* or *boar-fishes.*

Caprotina limestone. See ★*limestone.*

caproylamine (kap″rō-il-am'in), *n.* [*capro(ic)* + *-yl* + *amine.*] Same as ★*hexylamine.*

caprylene (kap'ri-lēn), *n.* [*capr(ic)* + *-yl* + *-ene.*] Same as *octylene* or ★*octene.*

caps. An abbreviation of *capitals.*

capsacutin (kap-sạ-kū'tin), *n.* [*caps(icum)* + *acute* + *-in*[2].] A crystalline, neutral compound, $C_{35}H_{54}O_4N_3$, extracted from *Capsicum annuum,* or Spanish pepper. It has a very sharp taste.

capsaicin (kap-sā'i-sin), *n.* The crystalline, active principle ($C_{18}H_{27}NO_3$) of Spanish and Cayenne pepper (*Capsicum annuum* and *C. minimum*).

capsitis (kap-sī'tis), *n.* [*caps(ule)* + *-itis.*] Inflammation of the capsule of the crystalline lens of the eye.

capsizal (kap-sīz'ạl), *n.* [*capsize* + *-al*[1].] The act or the fact of capsizing; overturning; an upset; a capsize.

capsize, *v. i.* **2.** See the extract.

Sometimes a wine will "*capsize*": the alcohol and the acid disappear and what was wine becomes an insipid undrinkable liquid. *Encyc. Brit.,* XXIV. 603.

capsomania (kap-sō-mā'ni-ạ), *n.* [Gr. *κάψα,* a box (taken for an ovary or pistil), + *μανία,* mania.] In *bot.,* an abnormal multiplication of pistils.

cap-spinning (kap'spin″ing), *n.* A method of spinning worsted yarn with a cap or cup over the spindle and bobbin.

capstan, *n.*— **Electric capstan,** a dock capstan operated by an electric motor inclosed in a suitable structure below the level of the dock, the motor being geared directly to the base of the capstan. It can also be used in a railroad-yard for hauling cars for short distances.

capstan-lathe (kap'stạn-lāᵺH), *n.* A lathe having a revolving tool-head; a turret-lathe.

capstan-screw (kap'stạn-skrö), *n.* An elevating screw; a small screw provided with a collar having holes in its periphery in which a wrench or pin may be inserted: used for leveling a plate or an instrument. There are usually three or four such screws for one plate.

capsular, *a.* **2.** In *bot.,* having for fruit a dry dehiscent seed-vessel or capsule: as, a capsular plant.

capsulation (kap-sụ-lā'shọn), *n.* [*capsulate* + *-ion.*] The act of inclosing a drug in a capsule in order that it may be swallowed more easily.

capsule, *n.*—**Auditory capsule.** See ★*auditory.*—**Capsule of Müller.** Same as *Bowman's capsule.*—**Nasal capsule.** Same as *olfactory* ★*capsule.*—**Olfactory capsule,** in *embryol.,* the cartilaginous case inclosing the olfactory bulbs in sharks and in the embryos of higher vertebrates.—**Optic capsule,** in *embryol.,* the cartilaginous case inclosing the eye in sharks and the embryos of the higher vertebrates.—**Spermatic capsule,** a capsule ejected by the males of certain gamasid mites in copulation, containing a liquid and also minute spermatophores or spermatocysts. *Michael,* 1892.—**Stinging-capsule.** Same as *urticating capsule* and *stinging-cell.*

capsule (kap′sūl), *v. t.*; pret. and pp. *capsuled*, ppr. *capsuling*. [*capsule, n.*] To furnish (a bottle, medicinal powder, etc.) with a capsule.

capsuligenous (kap-sū-lij′e-nus), *a.* [NL. *capsula*, capsule, + L. *-genus*, -producing.] In *bot.*, producing capsules.

capsulotome (kap′sū-lō-tōm), *n.* [L. *capsula*, capsule, + Gr. *-τομος*, ‹ *ταμεῖν*, cut.] A small knife used to divide the capsule of the crystalline lens in operations for cataract.

captaculum (kap-tak′ū-lum), *n.*; pl. *captacula* (-lä). [NL., ‹ L. *captare*, take, + *-culum*, as in NL. *tentaculum*, tentacle.] One of the numerous ciliated, contractile filaments, swollen at the end, which spring from each side of the mouth in *Dentalium*. They appear to act as tactile organs for seizing the food.

captain, *n.*, **1.** (*g*) In *archery:* (1) The winner of a captaincy at a shooting-match. (2) A competitor at a shooting-match or public meeting assigned to a particular target to score for the other archers and to keep order. —**Captain of industry,** an employer of many laborers; one who controls a large industrial establishment; a leader in the industrial world.

The Leaders of Industry, if Industry is ever to be led, are virtually the Captains of the World; if there be no nobleness in them, there will never be an Aristocracy more. But let the *Captains of Industry* consider.
Carlyle, Past and Present, iv. 4.

captaincy, *n.* **2.** In *archery*, a rank or prize usually awarded to the archer who makes the most hits in a shooting-match, without regard to his score, or who first hits the innermost circle or the gold.

captation, *n.* **3.** In *French law*, influence brought to bear upon one party by another so that the will of the former becomes subject to that of the latter: generally used in an opprobrious sense.

captioned (kap′shond), *a.* Headed; entitled; having the heading or title of: as, an effective poem *captioned* the "Song of the Innuit." *Science*, Nov. 22, 1901, p. 808.

captivative (kap′ti-vā-tiv), *a.* [*captivate* + *-ive.*] Serving or fitted to captivate.

captol (kap′tōl), *n.* [L. *cap(u)t*, head, + *-ol.*] A dark-brown powder soluble in water and alcohol, a condensation-product of tannic acid and chloral: used in the form of a lotion or wash to remove dandruff.

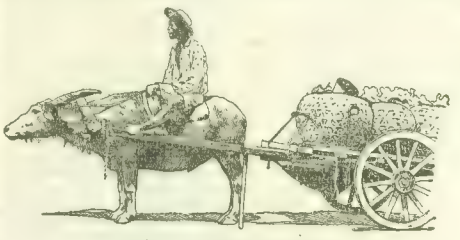
capture, *n.* **3.** In *phys. geog.*, the process by which a stream, lengthening its valley by headward erosion and thus encroaching upon a neighboring drainage-basin of greater altitude, eventually taps another stream, whose upper waters are thus diverted and whose lower waters are left 'beheaded': said also of glaciers.

M. Meunier explains the distribution of erratics in the neighbourhood of the Alps by the "*capture*" of one glacier by another, the head of which was eaten back through the dividing wall, and thus tapped the ice-supply.
Geog. Jour. (R. G. S.), XI. 441.

capture, *v. t.* **3.** In *phys. geog.*, to divert part of (a river) to a new course: said of the action of a stream that erodes its valley headward into the basin of another river and thus captures or diverts the upper waters of the latter to its own course.

It may then have happened that whole basins, like that of Lake Mascardi, drained formerly towards Nahuelhuapi, have been *captured* towards the Pacific slopes.
Geog. Jour. (R. G. S.), XVI. 36.

Caput Draconis, in *astrol.*, the ascending node of the moon; also, a figure in geomancy. See *dragon's head and tail* (under *dragon*).



car[1], *n.* —**Alexandra car,** a dos-à-dos pleasure-cart in which the body has a cut-under, to permit it to be hung very low without coming in contact with the axle.—**Combination car,** on a railroad, any car designed to be used for more than one purpose, as a combined day-coach and baggage-car, a smoker and express-and-baggage car. A *combination baggage-car* is one having compartments for mail or express matter.—**Convertible car,** an electric street or surburban car of which the sides are divided into sliding-panels which can be pushed up into pockets in the roof, thus changing it from a closed to an open car.—**Double-decked car,** a car having seats on top as well as inside; one having a second or upper deck for carrying passengers or live stock. See also *double-decker*, 3.—**Electric car,** any car which is operated by electric power.—**Foreign car,** a railroad car which does not belong to the company operating the line, but is borrowed or hired for temporary use.—**Governess car,** a two-wheeled vehicle with side seats but no outside seat, the driver sitting sidewise inside; a pony-carriage. The body is generally of basketwork and the entrance is at the back.—**Pile-driver car,** See ★*pile-driver.*—**Private car,** a passenger- or freight-car owned by private persons or by corporations other than the railroad companies who haul them for specified payment.—**Push-pole car,** a flat-car having a permanent push-pole hinged to the sill and used between the engine and the cars to be drilled by poling.—**Refreshment car,** a buffet- or dining-car on a railway.—**Tourist car.** See ★*tourist.*

car[1] (kär), *v.* **I.** *trans.* To carry or transport on a car.

II. *intrans.* To travel by car; go in a car: sometimes with an indefinite *it*.

car[6] (kär), *n.* [Perhaps another use of *car*[3].] A yellowish brown sediment deposited from water which contains salts of iron, as in the drainage from coal-mines. Also *carr.* [North of Eng.]

carabao (kä-rä-bä′ō), *n.* [Philippine Sp. *carabao*, Bisaya *calabao*, ‹ Malay *kerbau.*] The

Carabao (*Bos* (*Bubalus*) *buffelus*).

common local name of the small water-buffalo, *Bos* (*Bubalus*) *buffelus*, peculiar to the Philippine Islands.

carabinero (kä-rä-bi-nā′rō), *n.* [Sp.] **1.** A carbineer.—**2.** A soldier appointed to prevent smuggling; a custom-house guard or coast-guard. [Philippine Is.]

caracho (kä-rä′chō), *n.* [Porto Rican.] A kind of musical instrument made from a gourd, *Lagenaria lagenaria*, on which have been cut a number of grooves.

caracoa (kä-rä-kō′ä), *n.* [Philippine Sp., ‹ Malay *kōrakōra*, etc.] A large, fast boat used particularly in the southern parts of the Philippine Islands.

caracolillo (kä-rä-kō-lēl′yō), *n.* [Sp., dim. of *caracol*, a snail: see *caracole.*] **1.** Coffee-seeds which are round instead of having the ordinary flat form. This is the form taken by the seed when but one develops in the berry. Also called *peaberry coffee.*—**2.** A Porto Rican leguminous shrub, *Sabinea punicea.*

Caradoc group. See *Bala* ★*group.*

caraguata (kä-rä-guä-tä′), *n.* [Tupi, also written *caragoatá*, *caraquatá*, *caraotá*, said to mean 'scratcher of wayfarers,' ‹ *caránhe*, scratch, prick, + *goatá*, *oatá*, go.] The name in Paraguay and northwestern Argentina for a plant of the pineapple family, *Bromelia Serra*, which yields a long silky fiber resembling pineapple fiber. It is used by the natives for making cordage, sacks, etc.

carambole, *n.* **2.** [F.] The écu of Flanders struck by Louis XIV. for 80 sols, with the quartered arms of France and Burgundy.

caramel (kar′a-mel), *v. i.* and *t.* In *candy-* and *cheese-making*, to become burned and browned: said of the sugar dissolved in milk or syrups under the influence of heat; caramelize. See *caramel, n.*

The sugar in the milk *caramels* in baking and browns the crust. *Yearbook U. S. Dept. Agr.*, 1897, p. 515.

caramel-cutter (kar′a-mel-kut″ėr), *n.* In *candy-making*, a machine for cutting flat cakes of caramel, or other confection, into blocks, squares, dominoes, and other forms. It consists of revolving circular knives placed side by side on an arbor over a traveling apron or table.

caramousal, *n.* See ★*caramusal.*

caramusal (kä-rä″mö-säl′), *n.* [Also *caramousal*, *caramoussal*, *caramuzel*, *caramozil*, etc.; also *carmousal*, *carmizale*, *carmozell*, etc.; F. *carmoussal;* Sp. *caramuzal;* Cat. *caramussal;* It. *caramusali*, *caramusalino;* ML. *caramussallus;* Turk. *qarāmūsāl:* ult. origin uncertain.] A Turkish merchant vessel.

When you are alongside, if you see the *caramuzel's* mainsail being furled. *Poole*, Barbary Corsairs, p. 231.

carang (kä′räng), *n.* [Tagalog, a cover.] In the Philippine Islands, a mat woven of palm leaves, used as a cover for the banca or dug-out canoe.

Carangoides (ka-rang-gō-ī′dēz), *n.* [NL., ‹ *Caranx* + Gr. *εἶδος*, form.] A genus of fishes of the family *Carangidæ*, differing from *Carangus* in the weak teeth.

Carangops (ka-rang′gops), *n.* [NL., ‹ *Carangus* + Gr. *ὤψ* (*ὠπ-*), face.] A genus of fishes of the family *Carangidæ*, allied to *Carangus.*

Carangus (ka-rang′gus), *n.* [NL., ‹ Sp. *carangue*, *caranga*, Pg. *caranga.*] A genus of fishes of large size, widely distributed throughout the tropics, some of them excellent as food-fishes. *C. hippos* and *C. latus*, called *horse-mackerel* or *cavally*, are abundant in the western Atlantic. *C. forsteri* is the ulua of the Pacific, one of the best and most valued of food-fishes. The genus is often called *Caranx*, but the original type of the latter, *C. speciosus*, is without teeth and belongs to a different genus.

carapacic (kar-a-pā′sik), *a.* Of or relating to the carapace: as, the *carapacic* portion of the dorsal scute. *Annals and Mag. Nat. Hist.*, 1903, p. 442.

carapato (kä-rä-pä′tō), *n.* Same as *garapata.* —**Carapato disease,** a disease of tropical Africa, probably due to the presence of a protozoan organism in the blood. *Jour. Trop. Med.*, Nov. 2, 1903, p. 341.

carapo (kä-rä′pō), *n.* [Tupi.] The Brazilian name of *Giton fasciatus*, a fish of the family *Gymnotidæ.*

Carapus (kar′a-pus), *n.* [NL., ‹ Tupi *carapo.*] **1.** The obsolete generic name of a Brazilian fish of the family *Gymnotidæ*, properly *Sternarchus.*—**2.** A generic name of the pearl-fishes commonly called *Fierasfer.*

carasa (kä-rä′sä), *n.* [Philippine Sp. *carasa*, also *caraza* (Morga), also *calasag*, ‹ Bisaya *calasag*, Igorrote *calata* (Blumentritt).] In the Philippine Islands, a light wooden shield with fixed handles.

carassin (ka-ras′in), *n.* [F. *carassin, carrassin*: see *carassius.*] A name of *Carassius vulgaris*, a carp found in the fresh waters of central and northern Europe and closely related to the common goldfish.

carat, *n.* **5.** An Arabian coin of base silver, current in Mecca, Medina, and Mocha.

caratch† (ka-rach′), *n.* [Prop. **kharaj*, ‹ Turk. *kharāj*, tribute.] Tribute exacted by the Turks from their Christian subjects and from heretical Mohammedans.

carat-goods (kar′at-gůdz), *n. pl.* Parcels of diamonds which are of an average weight of about one carat each. *M. Bauer*, (trans.) Precious Stones, p. 242.

carau (kä-rä-ö′), *n.* [Tupi *caraú*, otherwise recorded as *coraú*, *carao*, *caráo.*] A South American bird, the courlan.

caravel, *n.* **2.** The floating marine gastropod *Ianthina. N. E. D.*

caraway-worm (kar′a-wā-wėrm″), *n.* The larva of an American papilionid butterfly, *Papilio polyxenes*, which feeds on caraway, celery, parsley, wild carrot, and other umbelliferous plants.

carballylic (kär-ba-lil′ik), *a.* [*carb(on)* + *allyl* + *-ic.*] Same as ★*tricarballylic.*

Carbamic (or carbaminic) chlorid, the chlorid of carbamic acid, NH_2COCl. Also called *chloroformamide.*

carbamidin (kär-bam′i-din), *n.* [*carb(on)* + *amide* + *-in*[2].] Same as ★*guanidin*, the amidin of carbonic acid.

carbamine (kärb-am′in), *n.* Same as ★*isocyanide.* The name was due to an erroneous belief that the isocyanides are bases. Also called *carbylamine* and *isonitrile.*

carbaminic (kärb-a-min′ik), *a.* Same as *carbamic.*

carbanil (kär′ba-nil), *n.* [*carb(on)* + *anil.*] The anil of carbonic acid, $C_6H_5N{:}CO$. It is an oil with a powerful, irritating odor. It boils at 166° C. Also called *phenyl carbimide* or *carbonimide* and *phenyl isocyanate.*

carbanilic (kär-ba-nil′ik), *a.* [*carbanil* + *-ic.*] Derived from carbonic acid and aniline.—**Carbanilic acid,** the half-anilide of carbonic acid, $HO.CO.NHC_6H_5$. It exists only in the form of its esters. Also called *phenyl carbamic acid.*

carbanilide (kärb-an′i-lid), *n.* [*carb(on)* + *anilide.*] The anilide of carbonic acid, $CO(NHC_6H_5)_2$. It is crystalline and difficultly soluble in water. It melts at 235° C. Also called *symmetric diphenyl urea.*

carbazide (kär′ba-zīd), *n.* [*carb(on)* + *az(ote)* + *-ide*[2].] A crystalline, volatile, and very explosive compound, $CO(N_3)_2$, formed by the action of sodium nitrite on the hydrochlorid of carbohydrazide.

carbazin (kär′ba-zin), *n.* [*carb(on)* + *az(ote)* + *-in*[2].] A hypothetical compound, $CO\langle \begin{matrix} NH \\ | \\ NH \end{matrix}$, whose derivatives were once supposed to have been formed by the action of phosgen on derivatives of phenyl hydrazin.

carbazol (kär′ba-zōl), *n.* [Also *carbazole;* ‹ *carb(on)* + *az(ote)* + *-ol.*] A substance, $C_{12}H_8.NH$, which occurs in colorless, easily sublimable plates obtained in the distillation of coal-tar in the fractions between 320° C. and 360° C.—**Carbazol yellow.** See ★*yellow.*

carbazoline (kär-ba-zō'lin), *n.* [*carbazol* + *-ine*[2].] A base, $C_{12}H_{15}N$, formed by the reduction of carbazol with hydriodic acid and phosphorus. It melts at 99° C. and boils at 296° C.

Carbide black. See ★*black.*—**Carbide of iron.** See ★*iron.*—**Iron carbide,** a chemical compound of iron with carbon. More than one such compound exists in ordinary cast-iron and in steel.

carbimide (kär'bi-mid), *n.* [*carb(on)* + *imide.*] Isocyanic acid or the imide of carbonic acid, CO:NH. It is uncertain whether free cyanic acid has this or an isomeric structure, or is a mixture of both forms. The esters of isocyanic acid are derivatives of a compound of the structure given. Also called *carbonimide.*

carbinol (kär'bi-nōl), *n.* [*carb(on)* + *-in* + *-ol.*] Methyl alcohol, CH_3OH. The name is used almost exclusively in designating derivatives of methyl alcohol: as, triphenyl *carbinol*, $(C_6H_5)_3COH$.

carbinyl (kär'bi-nil), *n.* [*carb(on)* + *-in* + *-yl.*] A designation for an alkyl or aryl corresponding to a carbinol: as, triphenyl *carbinyl*, $(C_6H_5)C$.

carblot (kär-blō'), *n.* A cartridge containing calcium carbide for use in acetylene lamps. *Sci. Amer.*, April 15, 1899.

carbo, *n.* **2.** In *phar.*, charcoal.—**Carbo animalis,** animal charcoal; bone-black, or ivory-black.—**Carbo ligni** or **vegetabilis,** wood charcoal.

carbo-azotin (kär-bō-az'ō-tin), *n.* [*carbo(n)* + *azote* + *-in*[2].] A trade-name for an explosive designed to be used in blasting. It consists of potassium nitrate, sulphur, lampblack, sawdust, and ferrous sulphate.

carbocyclic (kär-bō-sik'lik), *a.* [*carbo(n)* + *cyclic.*] Containing a ring of carbon atoms: used especially of carbon compounds, which contain rings composed exclusively of carbon atoms, as distinguished from *heterocyclic* compounds, which contain rings composed of the atoms of two or more elements. Also called *isocyclic* compounds.

The second part of the work is concerned with stereochemistry unaccompanied by stereoisomerism, under which head are treated such matters as the stability of *carbocyclic* and heterocyclic chains.
Nature, Aug. 11, 1904, p. 341.

carbodynamite (kär-bō-dī'na-mīt), *n.* [*carbo(n)* + *dynamite.*] A patented explosive for use in blasting, consisting of 90 parts (or less, for lower grades) of nitroglycerin and 10 parts of a very absorbent charcoal made from cork, to which are added for each 100 parts of the explosive 1½ parts of sodium or ammonium carbonate.

carbogelatin (kär-bō-jel'a-tin), *n.* A low-grade dynamite containing from 37 to 40 per cent. of nitrocellulose and nitroglycerin.

carbohemoglobin (kär″bō-hem-ō-glō'bin), *n.* [*carbo(n)* + *hemoglobin.*] A compound of carbon dioxid with hemoglobin. Also *carbohæmoglobin.*

carbohydrazide (kär-bō-hī'dra-zīd), *n.* [*carbo(n-)* + *hydr(ogen)* + *az(ote)* + *-ide*[1].] Same as ★*carbazide.*

carbolate (kär'bō-lāt), *n.* [*carbol(ic)* + *-ate*[1].] A salt of carbolic acid.

carbol-broth (kär'bōl-brôth), *n.* A medium occasionally used in testing water for sewage-bacteria. It consists of ordinary meat-broth to which about one tenth of one per cent. of carbolic acid is added. The carbolic acid inhibits the growth of many common water-bacteria and permits the development of *Bacillus coli.*

carbol-fuchsin (kär″bōl-fōk'sin), *n.* A solution of basic fuchsin in which the staining power of the dye has been enforced by the addition of carbolic acid. As a rule, the solution has the composition: 1 part of fuchsin, 100 parts of a 5-per-cent. aqueous solution of carbolic acid, and 10 parts of absolute alcohol.

carbolineum (kär-bō-lin'ē-um), *n.* [*carboline* + L. *-eum.*] Anthracene oil which has been heated and treated with chlorin. It is used, especially in Germany, for preserving wood. *Sci. Amer.*, Jan. 31, 1903, p. 73.

carbolism (kär'bō-izm), *n.* [*carbol(ic)* + *-ism.*] Poisoning with carbolic acid.

carbolite (kär'bō-līt), *n.* [*carbol* + *-ite*[2].] A product obtained by the interaction of blast-furnace slag and coke in an electric furnace, patented as a mixture of the carbides of calcium, aluminium, and silicon: a substitute for calcium carbide.

carbolutite (kär-bō-lū'tīt), *n.* [L. *carbo(n-)*, coal, + *lutum*, clay, mud, + *-ite*[2].] A clastic rock of very fine grain and carbonaceous composition; a bed of coal-dust or mud.

carbolxylol (kär-bōl-zī'lōl), *n.* [*carbol* + *xylol.*] A mixture of phenol and xylene.

carbon, *n.*—**Asymmetric carbon atom.** See ★*asymmetric.*—**Carbon dioxid.** This term is very commonly used as synonymous with *carbonic acid.* In modern chemistry, however, carbon dioxid (CO_2) is assumed to form carbonic acid (H_2CO_3) by union with the elements of water, and the term *carbonic acid* should be restricted to the product of such union.—**Carbon disulphid.** See ★*disulphid.*—**Carbon monoxid.** Same as *carbonic* or *carbonous oxid.*—**Carbon pencils.** Same as *carbon-points* (which see under *carbon*).—**Carbon stars.** See ★*star*[1].—**Carbon temper.** See *temper.*—**Carbon tetrachlorid,** CCl_4, a compound of great value as a non-inflammable solvent for grease, paint, etc.: used also as a surgical anesthetic, though not as available for this purpose as chloroform or ether.—**Carbon theory,** in *biol.*, the theory that living substance or protoplasm arose from inorganic carbonates.—**Carbon wool,** a material, composed of a mass of fine thread-like filaments of carbon, which is obtained as a by-product from some forms of coke-furnaces.—**Combined carbon,** carbon in a state of chemical combination with some other element or elements; specifically, the carbon of iron carbide (see ★*cementite*). If the carbon exists in solid solution in iron or steel it is not usually designated as combined carbon, although the state of solution is in one sense a form of chemical combination. The dissolved state is distinguished from the chemically combined state by the fact that the carbon may be in any proportion from zero to 2 per cent. and sometimes up to 4 per cent. or slightly more, under special conditions, while cementite has a constant percentage of carbon and iron. The combination is effected either by heating the iron in contact with gaseous fuel, or by exposing it to a high temperature in contact with solid carbon. Pig iron containing carbon chiefly in the combined form is known as 'white iron'; if free carbon, or graphite, is predominant, it is called 'gray iron.' In some varieties of iron the carbon is partly combined and partly free, and the fractured iron has a speckled appearance and is known as 'mottled iron.'—**Effect-carbon, flame-carbon.** See *electric* ★*arc.*—**Graphitic carbon,** carbon crystallized in rhombohedral forms and having the other properties of natural graphite. It separates from solution in metallic iron on cooling, and hence is found in gray cast-iron, and often in masses of considerable size in the slag of blast-furnaces: now manufactured on a commercial scale by intensely heating amorphous carbon in an electric furnace.—**Retort-carbon.** Same as *gas-carbon* (which see, under *carbon*).

carbon (kär'bon) *v. t.* [*carbon, n.*] To put carbons in (an arc lamp). *W. L. Dibdin*, Public Lighting, p. 445.

carbonate, *n.*—**Lead carbonate,** the chief constituent in white lead as used by painters: this pigment contains also lead hydroxid.

carbonating-column (kär'bo-nā-ting-kol″um), *n.* A part of the plant for making carbonate of soda from common salt by the Solvay or ammonia process. It consists of an iron cylinder, 40 or 50 feet high and 6 or 7 feet in diameter, containing a number of dome-shaped partitions perforated with small holes. It is filled with strong brine charged with ammonia, and carbon-dioxid gas is then forced in at the bottom, which forms and precipitates the acid carbonate of soda to be afterward converted by heating into the normal carbonate.

carbonating-tower (kär'bo-nā-ting-tou″er), *n.* Same as ★*carbonating-column.*

carbonation, *n.* **2.** In the Leblanc process for the manufacture of carbonate of soda, the treatment with carbon-dioxid gas of the crude liquor obtained by leaching the black ash, or, after evaporation of this crude liquor to dryness, the roasting of the residue, to which sawdust has been added. The object of the process is the conversion of some caustic soda and sodium sulphid present into sodium carbonate.—**3.** In *petrog.*, the union of carbonic acid and a base, or the substitution of carbonic acid for another combined acid, in either case producing carbonates.

carbonatization (kär″bo-nā-ti-zā'shon), *n.* The process by which, from the action of circulating subterranean waters containing carbonates, the feldspars and other rock-forming silicates are replaced by calcite, dolomite, or some other carbonate.

carbonemia (kär-bō-nē'mi-a), *n.* [NL., *carbonæmia*, < L. *carbo(n-)*, coal (carbon), + Gr. *αἷμα*, blood.] Poisoning with carbonic oxid.

carbonero (kär-bō-nā'rō), *n.* [Sp., charcoal-man, coal-man.] A Cuban name of the fish *Carangus ruber.*

Carbonic acid. This gas, liquefied by pressure and transported in strong steel cylinders, is now prepared on a commercial scale, chiefly as a by-product of brewing, and is used in rendering beverages effervescent, as a means of extinguishing fire, in making aërated bread, and for various other purposes.—**Carbonic-acid apparatus.** See ★*apparatus.*—**Carbonic anhydrid.** Same as ★*carbon dioxid.*—**Skatol carbonic acid,** $C_{10}H_9NO_2$, a product of albuminous putrefaction: a derivative of skatol.

carbonification (kär″bo-nif-i-kā'shon), *n.* Conversion into carbon or coal.

carbonify (kär-bon'i-fī), *v. t.* [*carbon* + *-i-fy.*] Same as *carbonize.*

carbonigenous (kär-bo-nij'e-nus), *a.* [*carbon* + L. *-genus*, -producing.] Producing carbon.

carbonimide (kär-bon-ī'mid), *n.* [*carbon* + *imide.*] Same as ★*carbimide.*

carbonist (kär'bo-nist), *n.* [*carbon* + *-ist.*] One who holds a certain theory with regard to carbon; specifically, an advocate of the theory that the hardness of quickly cooled steel is due altogether to the carbon contained therein, as opposed to an ★*allotropist* (which see). At the present time there are very few metallurgists who are either allotropists or carbonists; the majority agree that the hardness of quickly cooled steel is due both to allotropic modifications of iron and the influence of carbon. *Nature*, May 5, 1904, p. 2.

carbonite (kär'bo-nīt), *n.* [*carbon* + *-ite*[2].] **1.** A trade-name of an explosive for use in blasting, consisting of nitroglycerin, sodium nitrate, wood-meal, and a little sodium carbonate.—**2.** Same as *native* ★*coke.*

carbonitride (kär-bo-nī'trid), *n.* [*carbo(n)* + *nitr(ogen)* + *-ide*[1].] A compound of carbon and nitrogen with some other element: as, silicon *carbonitride*, Si_2C_2N, which is formed by heating silicon, carbon, and nitrogen together.

carbonizable (kär'bo-nī-za-bl), *a.* [*carbonize* + *-able.*] Capable of conversion into charcoal.

carbonization, *n.* **4.** In *cytol.*, a method of reducing the cell-wall in plants by charring.

carbonize, *v. t.* **4.** To destroy (the vegetable matter mixed with wool or other animal fibers) by chemical means (as a dilute solution of sulphuric or hydrochloric acid) and high temperature (210° F.).—**Carbonizing-furnace.** (*b*) A gas-furnace used for carbonizing the filaments of electric lamps. The filaments are placed in an air-tight fire-clay retort which is put in the furnace and raised to a high temperature by the gas-flames.

carbonizing (kär'bo-nī-zing), *n.* Specifically, in the treatment of textile materials, the process by which wool and similar animal fibers are freed from vegetable matter such as cotton, burs, straw, etc. It consists in saturating the material with a solution of some acid (as sulphuric acid) or other chemical compound (as aluminium chlorid), and drying it at a high temperature while thus saturated. As a result the vegetable matter becomes carbonized and drops away from the wool as a gray powder. This is known as *wet carbonizing. Dry carbonizing* consists in subjecting the material for some time to the action of dry hydrochloric-acid gas at a temperature of 100° C. Dry carbonizing is chiefly employed for the carbonization of rags in the preparation of shoddy.

carbon-printing (kär'bon-prin″ting), *n.* Same as *carbon process* (which see, under *carbon*).

carbonyl, *n.*—**Iron carbonyl.** See ★*iron.*—**Nickel carbonyl.** See ★*nickel.*

carbopyridic (kär″bō-pi-rid'ik), *a.* [*carbo(n)* + *pyrid(ine)* + *-ic.*] Pertaining to pyridine and carbon.—**Carbopyridic acid.** Same as ★*pyridinecarboxylic acid.*

carbora (kär bō'rä), *n.* [Native Australian.] A wood-burrowing worm which lives between high and low water in a tidal river. [Australia.]

carborudite (kär-bō-rū'dīt), *n.* [L. *carbo(n-)*, coal, + *rudus*, rubble, + *-ite*[2].] A coarse fragmental rock of carbonaceous matter; a coal-breccia or conglomerate.

carborundum (kär-bō-run'dum), *n.* [*carbo(n)* + *(co)rundum.*] Silicon carbide, SiC, a product of the electric furnace used as an abrasive material. The reaction of the furnace is $SiO_2+3C = SiC+2CO$. This substance is manufactured in powerful electric furnaces upon a large scale. It is used as a powder of various degrees of fineness and is also consolidated into blocks for grinding-wheels. Carborundum is substituted for ferrosilicon in steel-making and is mixed with a strong solution of water-glass (sodium silicate) to form a paste for application to the lining of a furnace, protecting it from injury by very high temperature. It has been identified in the meteoric iron of Cañon Diablo, Arizona, and named *moissanite.*

carbosilicon (kär-bō-sil'i-kon), *n.* A trade-name for a fused material consisting of silicon and silicon carbide (carborundum), possibly combined, more probably merely mixed with each other. It is compact and very tough.

carboxid (kär-bok'sid), *n.* [*carb(on)* + *oxid.*] In *chem.*, a compound consisting of carbonyl or carbon monoxid united to an electropositive metal.

carboxylic (kär-bok-sil'ik), *a.* [*carboxyl* + *-ic.*] Containing carboxyl, CO.OH.—**Carboxylic acid,** an acid containing the carboxyl group.

carbuncle, *n.*—**Contagious carbuncle.** Same as *malignant pustule.*

carbunculo (kar-bön'kö-lō), *n.* [Sp.: see *carbuncle.*] A fabulous animal, the existence of which is generally believed in some parts of South America. The myth is of Spanish introduction, but the Indians believe in it even more than the mestizos. The animal is represented as a large wildcat having in its forehead a carbuncle-stone of large size, or a red gem of great value. This gem the animal covers up at will with a lid. At night the stone, when uncovered, is believed to emit a brilliant light like that of a red lantern.

carbunculosis (kär-bung-kū-lō′sis), *n.* [NL. *carbunculus* + *-osis.*] The morbid state characterized by the occurrence of carbuncles.

carbunculus (kär-bung′kū-lus), *n.*; pl. *carbunculi* (-lī). [NL.] Same as *carbuncle.*

carburant (kär′bū-rant), *n.* [*carbur(et)* + *-ant*[1].] A substance, supplied as gas or vapor, serving to add carbon to a gaseous mixture to be burned, with a view to either the production of light or, as in internal-combustion engines, the production of mechanical energy.

carburation (kär-bū-rā′shon), *n.* [*carbur(et)* + *-ation.*] The process of impregnating with a mist of particles of liquid hydrocarbon, which vaporize in their finely divided state either at atmospheric temperatures or on heating. Atmospheric air so impregnated forms a gas which may be ignited and used in internal-combustion motors. See ★*carbureter.*

carbureter, *n.* 1. Carbureters are also used for impregnating a current of atmospheric air with a mist or vapor from a liquid hydrocarbon so that it becomes a combustible or explosive mixture suitable for use in internal-combustion motors. In the early forms of carbureter the air moved over a surface like a wick, by the capillary action in which gasolene was evaporated into the air. In later forms the air was caused to bubble through a thin layer of liquid gasolene, or was blown over the surface of the latter. In those now in use a small jet of gasolene is forced through a needle-hole, by difference of pressure, into the current of moving air at each aspiration of the working cylinder. In the float-carbureters the level of gasolene in the jet-tube is kept constant by a float which closes the passage to the jet at an adjusted position, both when the car is level and when on a grade. In others the area of the fuel-nozle is also adjusted as the demand for fuel varies. Carbureters may use alcohol or kerosene as sources of carbon, but with the less volatile liquids the carbureters must be vaporizers as well as atomizers, that the fuel may not separate from the air by liquation or condensation. This vaporization is effected by using heat above that of the atmosphere, either from an outside flame or by conducting waste heat from exhaust gases. When the carbureter supplies too much fuel, the mixture burns badly in the cylinder, and unburned fuel in the exhaust gases makes them visible as smoke and produces an offensive odor. When the needle-hole becomes clogged, the motor gets no fuel and will not run.—**Compensating carbureter,** a carbureter which automatically regulates the amount of fuel supplied to the engine as the demand for fuel varies with the speed or the power of the motor.

carbylamine (kär-bil-am′in), *n.* [*carb(on)* + *-yl* + *amine.*] A basic substance found in the venom of toads.

carcake (kär′kāk), *n.* [Also *carecake, kercake:* < *care,* as in *Care Sunday,* + *cake.*] A small cake baked on a griddle and eaten on Shrove Tuesday in parts of Scotland.—**Blood carcake,** a cake made of blood and oatmeal, formerly used in the south of Scotland. *Jamieson.*

carcana (kär-kä′nä), *n.* [Also *carconna, karkana;* < Hind., *kārkhāna* < Pers. *kārkhāna,* < *kār,* work, business, + *khāna,* house.] A workshop; a departmental establishment in the military service. [Anglo-Indian.]

carcass (kär′kas), *v. t.* To erect or set up the carcass or framework of a building or a ship.

carcel (kär-sel′), *n.* [See *Carcel lamp.*] A French unit of illuminating power, equal to the light emitted by a standard lamp with a flame 40 millimeters high and burning 42 grams of colza-oil an hour.

carcel-hour (kär-sel′our), *n.* A unit of luminous energy; the quantity of light-energy emitted in one hour by a source whose light-flux equals that from a Carcel standard lamp.

carcel-meter (kär-sel′mē″tėr), *n.* A unit of illumination in which the source of light is the flame of a Carcel lamp placed at a distance of one meter. The carcel-meter is approximately 10.9 *luxes.* See ★*illumination.*

carcel-second (kär-sel′sek″und), *n.* A unit of luminous energy in which the Carcel lamp is taken as the standard of intensity.

carcer (kär′sėr), *n.* L. pl. *carceres* (-ēz) [L.] 1. A prison; a lock-up; especially, one in a German school or university.—2. One of the 8 to 12 stalls, closed with bars, from which races were started in a Roman circus. They were arranged with slanting axes in order not to give an unfair advantage to any competitor.

carceration (kär-sē-rā′shon), *n.* [See *incarceration.*] Incarceration; imprisonment. *Trollope.*

Carcharodontinæ (kär-kar″ō-don-tī′nē), *n. pl.* [*Carcharodon(t-)* + *-inæ.*] A subfamily of sharks, including the great man-eater, typified by the genus *Carcharodon.*

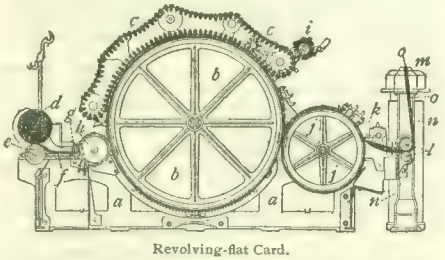
carcinemia (kär-si-nē′mi-ä), *n.* [NL. *carcinæmia,* < Gr. *καρκίνος,* cancer, + *αἷμα,* blood.] Cancerous cachexia.

carcinoma, *n.* 2. In *bot.,* a disease of trees characterized by the separation of the bark and the exudation of an acrid sap. *Treas. Bot.*

carcinomatoid (kär-si-nom′a-toid), *a.* [Gr. *καρκίνωμα(τ-),* carcinoma, + *εἶδος,* form.] Resembling carcinoma. *Med. Record,* Feb. 14, 1903, p. 271.

carcinomatosis (kär-si-nō-ma-tō′sis), *n.* [NL., < *carcinoma(t-)* + *-osis.*] Generalized cancer disseminated throughout the body. Also called *carcinosis.*

carcinosis (kär-si-nō′sis), *n.* [NL., < Gr. *καρκίνος,* cancer, + *-osis.*] Same as ★*carcinomatosis.*



carcinous (kär′si-nus), *a.* [Gr. *καρκίνος,* cancer, + *-ous.*] Cancerous.

carcoon (kär-kön′), *n.* [Also *corcon, corcone;* < Mahr. *kārkūn,* Pers. *kārkun.*] A clerk. [Anglo-Indian.]

car-cylinder (kär′sil″in-dėr), *n.* The cylinder for an air-brake system in which air under pressure is stored under each car.

card[1], *n.*—**Birthday card,** a complimentary card, usually of an artistic design, sent to one on the anniversary of his birthday.—**Burnt card,** the card which is turned face up on the bottom of the pack, in some banking games. In baccara the banker may burn two cards if he pleases.—**By cards,** in *whist* and *bridge,* noting the number of tricks over the book won by the same side: as, two *by cards* at no trump.—**Card of reëntry,** in *whist* and *bridge,* a winning card in one suit which will bring the established cards of another suit into play.—**Card-repeating machine,** a machine for copying or repeating a set of pattern-cards for a Jacquard loom after they have been cut by the piano-machine.—**Christmas card.** See *Christmas.*—**Doubtful card,** in *whist,* a card led which may or may not win the trick.—**Dumb-card,** a compass-card to which no magnetic needle is attached.—**Easter card,** a card containing suitable emblems and greetings sent to friends and presented to Sunday-school scholars, etc., at Easter.—**Established cards,** cards which have become the best of the suit from the fact that the higher cards have been played.—**Exposed card,** any card played in error or dropped on the table, which must be left on the table and can be called by the adversary in a partnership game.—**Faced card.** See ★*faced.*—**False card,** any card played with the object of deceiving the adversary as to the true holding in the suit: as, to win a trick at bridge with the ace while holding the king.—**Glass card,** a transparency of gelatin in the form of a card.—**Hockelty-card.** See *soda* ★*card.*—**Indifferent cards,** cards of the same value, so far as winning tricks is concerned: as the king and queen.—**King-card.** See *master* ★*card.*—**Long cards,** all the cards of a suit that are left, when they are in the hand of one player.—**Losing cards,** in *whist* and *bridge,* cards which will lose tricks if they are not got rid of early.—**Master card,** the best remaining card of a suit in which the better cards have been played.—**New-year card,** a more or less elaborately ornamental complimentary card with the season's greetings and best wishes for the New-year.—**Short-card player.** See ★*player.*—**Soda card,** in *faro,* the card which shows face up in the box before the deal begins: the opposite of *hockelty-card.*—**Strengthening card,** in *whist* and *bridge,* a card led from one hand for the purpose of giving the third hand some advantage, as a jack led through dummy's queen or king.—**Sure card,** something which when called into play will insure success.—**The card,** the correct thing.—**Thirds card,** the usual size in the United Kingdom for a man's calling-card—3 inches in length and 1¼ in breadth.—**To be put to a card,** said of a player when he is obliged to discard one of two cards and does not know which to keep.—**To have the cards in one's own hand,** to possess the means of winning if they are rightly used.—**To play one's best card,** to use one's best endeavor; take the step which it is thought will be most likely to result in success.—**To play one's cards well,** to make a judicious use of the means at one's command.—**To throw up one's cards,** to abandon the game (or the hand) through lack of winning cards or of the means of attaining success.—**Wide cards,** in *cribbage,* cards which cannot be connected so as to form sequences by the play of any intermediate card.

card[2], *n.*—**Revolving-flat card,** a cotton-carding machine in which the top flats revolve or travel over the top

Revolving-flat Card.

a, frame; *b,* main cylinder; *c,* flats; *d,* lap of cotton; *e,* lap-roller; *f,* dish-plate; *g,* feed-roll; *h,* taker-in; *i,* brush; *j,* doffer; *k,* comb; *l,* calender-rollers; *m,* coiler; *n,* can; *o,* sliver.

of the main cylinder.—**Roller-and-clearer card,** a cotton-carding machine equipped with revolving rollers or cylinders for working the stock: chiefly used for carding cotton waste and coarse yarns.—**Set of cards,** a series of two or more carding-engines consisting, if of three (which is the usual number), of a breaker, a second breaker or intermediate, and a finisher. This series is the statistical unit or unit of capacity of a woolen-factory.—**Stationary flat card,** a cotton-carding machine having its top carding-surfaces or flats stationary.

Card. An abbreviation of *cardinal.*

cardamine, cardamin (kär′da-min), *n.* A plant of the genus *Cardamine* (which see).

Cardan joint, shaft. See ★*joint,* ★*shaft*[1].

Cardanic (kär-dan′ik), *a.* Of, pertaining to, or devised by Cardan (Girolamo Cardano, 1501–1576), a noted physician, mathematician, and astrologer of Italy: as, *Cardanic* suspension (suspension from gimbals).

card-board[2] (kärd′bōrd), *n.* A thin board, with a short handle, 5 inches wide and 12 inches long, to which is fastened card-clothing for carding wool, cotton, and the like by hand.

cardboard-press (kärd′bōrd-pres), *n.* Calendering-rolls for surfacing and finishing pressboard or smooth, hard cardboard used for book-covers and Jacquard cards.

card-case, *n.* 2. A case of drawers in which catalogue-cards are arranged.

card-cheat (kärd′chēt), *n.* One who cheats at cards.

card-cradle (kärd′krā″dl), *n.* A curved metal frame secured beneath the card-cylinder of a Jacquard loom to receive the cards as they are discharged from the cylinder.

card-cutter, *n.* 2. One who operates a machine for cutting pattern-cards for a Jacquard loom.

card-cylinder (kärd′sil″in-dėr), *n.* Same as *cylinder,* 2 (*h*).

cardenal (kär-de-näl′), *n.* [Sp.] See ★*cardinal-fish.*

carder[2], *n.* 3. Same as *carder-bee* (which see).

card-gatherer (kärd′gaᵀᴴ″ėr-ėr), *n.* A gatherer of teazels or carding-thistles.

Cardiac diuretic, dropsy, etc. See ★*diuretic,* ★*dropsy,* etc.—**Cardiac inadequacy.** Same as ★*cardiac insufficiency.*—**Cardiac insufficiency,** inability of the heart to perform its function of maintaining the circulation of the blood in an adequate manner.—**Cardiac neuralgia.** See ★*neuralgia.*—**Cardiac sac.** (*b*) In *Annulata,* a bulb-like contractile portion of the dorsal blood-vessel.—**Cardiac valvule,** in *entom.,* an invagination of the esophagus into the proventriculus, producing a valvule which prevents the larger bits of food from passing into the chylific stomach. *A. S. Packard,* Text-book of Entom., p. 312.

Cardiacea, *n. pl.* 3. A suborder of *Eulamellibranchiata,* having the gills much folded, foot cylindric and more or less elongate, and siphons generally lacking. It contains the families *Cardiidæ, Tridacnidæ, Chamidæ,* and others.

cardiacean (kär-di-ā′sē-an), *a.* and *n.* **I.** *a.* Having the characters of the *Cardiacea.*

II. *n.* A bivalve mollusk belonging to the suborder *Cardiacea.*

cardiagraph (kär′di-a-gråf), *n.* Same as *cardiograph.*

cardial (kär′di-al), *a.* [Gr. *καρδία,* heart, + *-al*[1].] Of or pertaining to the heart; cardiac.

cardialgic (kär-di-al′jik), *a.* Relating to or suffering from cardialgia.

cardiameter (kär-di-am′e-tėr), *n.* Same as ★*cardiometer.*

cardianeuria (kär-di-a-nū′ri-ä), *n.* [NL., < Gr. *καρδία,* heart, + *ἀνευρος,* without sinews or nerves, < *ἀ-* priv. + *νεῦρον,* sinew, nerve.] In *pathol.,* lack of tone in the heart.

cardiant (kär′di-ant), *n.* [Gr. *καρδία,* heart, + *-ant.*] A remedy which acts upon the heart.

cardiataxia (kär-di-a-tak′si-ä), *n.* [Gr. *καρδία,* heart, + *ἀταξία,* disorder: see *ataxy.*] Irregular action of the heart.

cardiatrophy (kär-di-at′rō-fi), *n.* Same as *cardiatrophia.*

cardinal. **I.** *a.*—**Cardinal area,** in the structure of the shells of the *Brachiopoda,* a flattened or curved triangular area between the hinge-line and the beaks of the valves, specially prominent on the ventral valve, and medially divided by the delthyrial opening. A true cardinal area is not present in all orders of *Brachiopoda,* but in the orders *Atremata* and *Neotremata* it is represented by a posterior flattening of the valves termed a *false cardinal area.*—**Cardinal number.** (*b*) Multitude; the degree in which the members of a collection are many: so used erroneously by some logicomathematicians.—**Cardinal point.** See ★*point*[1].—**Cardinal process,** in brachiopods, a projection at the posterior edge of the dorsal valve which interlocks with the hinge-teeth on the ventral valve, thus forming the hinge.—**Cardinal septa.** See ★*septum.*—**Cardinal value.** See ★*value.*

Cyrtina heteroclyta, Defr. sp.

Dorsal view showing high area and pseudodeltidium of ventral valve. (From Zittel's "Palæontology.")

II. *n.*—**Alizarin cardinal.** Same as *alizarin* ★*garnet.*—**Cardinal in petto,** one whom the Pope intends to create a cardinal, but whose name has not been formally published.

cardinal-fish (kär′di-nal-fish″), *n.* A fish of the family *Apogonidæ,* the red species of which is called *cardenal* in Spanish: they are found

in tropical waters, and are especially abundant in the East Indies.

cardinalic (kär-di-nal'ik), *a.* Of or pertaining to the office of a cardinal; like a cardinal.

cardinalism (kär'di-nal-izm), *n.* [*cardinal* + *-ism.*] The system of the college of cardinals; the theory of the institution of the college of cardinals.

cardinalist (kär'di-nal-ist), *n.* **1.** An advocate or adherent of the system of the college of cardinals.—**2.** A follower of Cardinal Antoine Perrenot, prime minister to Margaret of Parma in the sixteenth century.

cardinalitian (kä″di-na-lish'iạn), *a.* Same as *cardinalitial.*

card-index (kärd'in″deks), *n.* An index consisting of cards arranged alphabetically.

carding-scale (kär'ding-skāl), *n.* A scale or table, used by those who card wool on commission, giving the amount of carding to be done and the relative price.

carding-stock (kär'ding-stok), *n.* A bench, upon one end of which is nailed card-clothing, the other end serving as a seat for the operator in carding fibrous material, as wool and cotton, with hand-cards in conjunction with the fixed card.

carding-surface (kär'ding-sėr″fās), *n.* In *textile-manuf.*, the extremities of the card-clothing teeth on the carding-machine that card the stock.

cardio-arterial (kär″di-ō-är-tē'ri-al), *a.* Relating to both the heart and the arteries. —**Cardio-arterial interval**, the difference in time, sometimes quite appreciable, between the apex-beat of the heart and the pulse at the wrist or elsewhere.

cardioblast (kär'di-ō-blást), *n.* [Gr. *καρδία*, heart, + *βλαστός*, germ.] In *insect embryol.*, any one of a long row of cells bordering the mesodermal layer of the primitive band and affording the first indication of the dorsal vessel. *A. S. Packard*, Text-book of Entom., p. 572.

cardioclasis (kär″di-ok'la-sis), *n.* [Gr. *καρδία*, heart, + *κλάσις*, breaking.] Rupture of the heart.

cardiocœlomic (kär″di-ō-sē-lom'ik), *a.* In *insect anat.*, pertaining to the pericardial cœloma or heart-cavity.

These openings, called *cardio-cœlomic* apertures, are visible to the naked eye, being situated on conical papillæ of the walls of the heart.
A. S. Packard, Text-book of Entom., p. 400.

cardioconch (kär'di-ō-kongk), *n.* [Gr. *καρδία*, heart, + *κόγχη*, a molluscan shell.] One of the so-called *Cardioconchæ.*

Cardioconchæ (kär-di-ō-kong'kē), *n. pl.* A factitious group of pelecypod mollusks characterized by their tenuous shells and the absence of dentition and other critical structures. It was conceived by Neumayr that this apparently primitive condition was actual, and he designated the group by the name *Palæoconchæ*, which was subsequently changed by Benshausen to *Cardioconchæ* because shells of this type are not of primitive age. Clarke has shown that the *Cardioconchæ* or *Palæoconchæ* represent merely a condition of degeneration or convergence largely due to pelagic life, and similarly affecting genera of diverse phylogeny. Such pelecypods are specially characteristic of the Bohemian Upper Silurian and of the lower Upper Devonian throughout the northern hemisphere.

cardiogram, *n.* **Electric cardiogram,** a tracing showing the electric currents which traverse the animal body with every heart-beat.

cardiographic (kär″di-ō-graf'ik), *a.* Of or pertaining to cardiography.

cardio-inhibition (kär″di-ō-in-hi-bish'ọn), *n.* Slowing of the action of the heart. *Philos. Trans. Roy. Soc.* (London), ser. B, 182. 242.

cardiokinetic (kär″di-ō-ki-net'ik), *a.* [Gr. *καρδία*, heart, + *κινητός*, ‹ *κινεῖν*, move.] Causing or accelerating the action of the heart.

cardiolith (kär'di-ō-lith), *n.* [Gr. *καρδία*, heart, + *λίθος*, stone.] A calcareous deposit in or upon the heart.

cardiolysin (kär-di-ol'i-sin), *n.* [*cardiolysis* + *-in*[2].] A cytotoxin directed against heart-muscle tissue.

cardiolysis (kär-di-ol'i-sis), *n.* [NL., ‹ Gr. *καρδία*, heart, + *λύσις*, dissolution.] Resection of a portion of the sternum and of the costal cartilages in the cardiac area, in order to permit of greater freedom of movement in cases of adhesions following chronic mediastinopericarditis. *Lancet*, July 18, 1903, p. 188.

cardiometer (kär-di-om'e-tėr), *n.* [Gr. *καρδία*, heart, + *μέτρον*, measure.] **1.** An instrument for measuring the intracardiac blood-pressure. —**2.** An instrument for recording the extent and frequency of the cardiac pulsations.

cardiometric (kär″di-ō-met'rik), *a.* Of or pertaining to cardiometry. *Nature*, May 26, 1904, p. 88.

cardiometry, *n.* **2.** Measurement of the blood-pressure.

cardiopathy (kär-di-op'a-thi), *n.* [Gr. *καρδία*, heart, + *-πάθεια*, ‹ *πάθος*, disease.] Disease of the heart. *Phil. Med. Jour.*, Jan. 31, 1903, p. 207.

cardioplegia (kär″di-ō-plē'ji-ä), *n.* [Gr. *καρδία*, heart, + *πληγή*, stroke. Cf. *apoplexy.*] **1.** Paralysis of the heart muscles.—**2.** Irregular muscular contractions of the esophageal orifice of the stomach.

cardioptosis (kär-di-op-tō'sis), *n.* [NL., ‹ Gr. *καρδία*, heart, + *πτῶσις*, falling.] Downward dislocation of the heart. *Med. Record*, Jan. 24, 1903, p. 157.

cardiopuncture (kär″di-ō-pungk'tūr), *n.* [Gr. *καρδία*, heart, + L. *punctura*, puncture.] Same as *cardiocentesis.*

cardiorespiratory (kär″di-ō-rē-spīr'ä- or res'-pi-rā-tō-ri), *a.* [Gr. *καρδία*, heart, + E. *respiratory.*] Relating to change in the rhythm and frequency of respiration dependent upon varying heart-action; relating to or caused by both respiratory and cardiac movements: as, a *cardiorespiratory* murmur. *Med. Record*, Feb. 7, 1903, p. 202.

cardiosclerosis (kär″di-ō-sklē-rō'sis), *n.* [NL., ‹ Gr. *καρδία*, heart, + *σκλήρωσις*, hardening.] Overgrowth of fibrous connective tissue in the walls of the heart.

cardiospasm (kär'di-ō-spazm), *n.* [Gr. *καρδία*, heart, + *σπασμός*, contraction: see *spasm.*] Irregular muscular contractions at the esophageal opening of the stomach.

Cardiospermum (kär″di-ō-spėr'mum), *n.* [NL. (Linnæus, 1735–53), ‹ Gr. *καρδία*, heart, + *σπέρμα*, seed. The name alludes to the heart-shaped aril on the seeds of some species.] A genus of plants of the family *Sapindaceæ*, which comprises about 30 tropical American species of climbing herbs, with alternate biternate leaves, coarsely serrate leaflets, and small white flowers. The most popular species is the balloon-vine (*C. Halicacabum*), a rapid-growing, easily cultivated tender annual, curious for its inflated seed-vessels. See *balloon-vine* (cut), *Indian-heart*, and *heartseed.*

cardiosphygmograph (kär″di-ō-sfig'mō-gràf) *n.* [Gr. *καρδία*, heart, + E. *sphygmograph.*] A combined cardiograph and sphygmograph.

cardiostenoma (kär″di-ō-stē-nō'mạ), *n.* [NL., ‹ Gr. *καρδία*, heart, + *στένωμα*, a narrow place, ‹ *στενόειν*, make narrow, ‹ *στενός*, narrow.] Same as *cardiostenosis.*

cardiotoxic (kär″di-ō-tok'sik), *a.* [Gr. *καρδία*, heart, + *τοξικόν*, poison.] Having a poisonous effect upon the heart.

cardiovalvulitis (kär″di-ō-val-vū-lī'tis), *n.* [NL., ‹ Gr. *καρδία*, heart, + NL. *valvula*, valve, + *-itis.*] Inflammation of the valves of the heart.

cardiovasal (kär'di-ō-vā'sal), *a.* [Gr. *καρδία*, heart, + L. *vas*, vessel, + *-al*[1].] Same as ★*cardiovascular.*

cardiovascular (kär″di-ō-vas'kū-lär), *a.* [Gr. *καρδία*, heart, + L. *vasculum*, a vessel: see *vascular.*] Relating to both the heart and the blood-vessels. *Med. Record*, March 28, 1903, p. 508.

cardiovisceral (kär″di-ō-vis'ẹ-ral), *a.* Connected with the heart and the viscera.—**Cardiovisceral vessel**, in ascidians, a vessel arising from the dorsal end of the heart and breaking up into branches which run over the surface of the alimentary canal and other organs.

Cardita (kär-dī'tạ), *n.* [NL., ‹ Gr. *καρδία*, heart, + *-ιτης*, E. *-ite*[2].] The typical genus of the family *Carditidæ.* *Bruguières*, 1791.

cardite (kär'dīt), *n.* [NL. *Cardita.*] A bivalve mollusk of the genus *Cardita.*

carditian (kär-dit'i-ạn), *a.* Of or allied to the genus *Cardita.*

Carditidæ (kär-dit'i-dē), *n. pl.* [NL., ‹ *Cardita* + *-idæ.*] **1.** A family of *Pelecypoda* with a cockle-like shell, external parivincular ligament, and fully developed hinge with long posterior cardinal tooth. The genera are all marine. They began their existence in the Triassic and have continued to the present.—**2.** A family of bivalve mollusks of the order *Eulamelli-branchiata.* They have a single mantle-fusion, branchiæ large and unequal, the foot keeled and often byssiferous, and the shell radiately grooved. The family includes the genera *Cardita, Carditella, Venericardia*, and others.

Cardium clay, in *geol.*, a late division of the Pleistocene deposits in Scandinavia containing fossils of the genus *Cardium.*

card-lacing (kärd'lā″sing), *n.* The act of tying together the pattern-cards of a Jacquard ready for the loom.

card-money (kärd'mun″i), *n.* A kind of paper-currency issued by the French in Canada in 1685.

card-nippers (kärd'nip″ėrz), *n. pl.* A hand-punch for making holes in the pattern-cards of a Jacquard loom.

cardo, *n.* **4.** In the pelecypod mollusks, the primitive hinge: contrasted with the *articulus* or adult hinge.—**5.** One of the two intersecting central streets of the Roman military camp or castrum, the other being the decumanus. A similar arrangement is found in the prehistoric pile-settlements of northern Italy.

First a rectangular space was marked out with the help of two straight lines (the *Cardo* and Decumanus) intersecting at right angles, their direction being probably determined by some simple astronomical observations.
F. von Duhn, in Jour. Hellenic Studies, XVI. 129.

cardol, *n.* **2.** Tribrom-salol, made by the action of bromine, in excess, upon salol. It is a crystalline substance used for allaying gastric uneasiness, cramps, etc.

cardon (kär-dōn'), *n.* [Mex. use of Sp. *cardón*, teazel: see *cardoon.*] Either of two species of giant cactus, *Cereus pecten-aboriginum* and *C. Pringlei*, which in the arid cape region of Lower California form extensive leafless forests known as *cardon forests.* The dead wood is used for fuel, etc., and the seeds are ground to mix with meal.

card-pocket (kärd'pok″et), *n.* A pocket for carrying cards; specifically, a pocket in the inside cover of a book for holding the reader's library-card.

card-recorder (kärd'rē-kôr″dėr), *n.* A clock which is correlated with mechanism for recording on cards the time spent in any special piece of work: used in card-systems of industrial cost-keeping.

card-room (kärd'röm), *n.* A room devoted to card-playing or in which card-playing is carried on.

card-sharping (kärd'shär″ping), *n.* The practice of cheating at cards; the profession of the card-sharper.

card-system (kärd'sis″tem), *n.* **1.** A system of keeping records, in which each item is entered on a separate card. The cards for any series are of uniform size, are arranged in alphabetic order, and, in series of any length, are marked by division-cards at appropriate points. Cards (items) can be inserted or withdrawn at will.

card-teazel (kärd'tē″zl), *n.* The wild teazel, *Dipsacus sylvestris.*

card-thistle (kärd'this″l), *n.* Same as ★*card-teazel.*

Carduaceæ (kär-dū-ā'sē-ē), *n. pl.* [NL. (Necker, 1770), ‹ *Carduus* + *-aceæ.*] The name adopted for the plant-family *Asteraceæ* by authors who take the genus *Carduus* as the type of the family. It has priority over all other properly formed names, but *Carduus* is not typical, and would require it to be called the thistle family. See ★*Asteraceæ*, 2, and *Compositæ*[1].

card-wiring (kärd'wīr″ing), *n.* The insertion of straight wires at regular intervals between the pattern-cards of a Jacquard loom, in such a manner as to cause the cards to be suspended from the card-cradle.

careen, *n.* **2.** The submerged figure or body which is cut off from a floating vessel by the plane of the surface of the water; the submerged portion of a floating vessel; a figure bounded by the plane of the surface of the water and the wetted surface of a floating body. —**3.** A careening or lurching motion or movement; a lurch.

The charm [of the camel] is not in the figure . . . nor in the movement, the noiseless stepping, or the broad *careen.*
L. Wallace, Ben-Hur, I. i.

careless-weed (kãr'les-wēd), *n.* One of several coarse species of amaranth springing up in neglected gardens, as *Amaranthus retroflexus* (pigweed) and *A. hybridus.* The spiny careless-weed is the same as the spiny amaranth, *A. spinosus.*

Careliparis (kar-ẹ-lip'a-ris), *n.* [NL., ‹ Gr. *κάρα*, (Ionic *κάρη*), head, + *Liparis.*] A subgenus of snail-fishes of the genus *Liparis.*

Caremitra (kar-ẹ-mī'trạ), *n.* [NL., ‹ Gr. *κάρα* (Ionic *κάρη*), head, + *μίτρα*, girdle.] A subgenus of snail-fishes of the genus *Careproctus.*

Carenchelyi (ka-reng-kē'li-ī), *n. pl.* [NL., ‹ Gr. *κάρα*, head, + *ἐγχελυς*, eel.] An order of long-necked eels found in the deep sea: distinguished by the well-developed bones of the

jaw, which are joined immovably to the cranium. Only one species is known, *Derichthys serpentinus*, constituting the family *Derichthyidæ*.

Carentonian (kar-en-tō′ni-an), *a.* [ML. *Carantonus*, Charente, + *-ian*.] In the geology of northern France and Belgium, noting a substage of the Middle Cretaceous or Cenomanian: named from the river Charente. It is in part equivalent to the Lower Chalk of England. Also used substantively.

Careproctus (kar-ē-prok′tus), *n.* [NL., < Gr. *κάρα*, (Ionic *κάρη*), head, + *πρωκτός*, anus.] A genus of snail-fishes, of the family of *Liparidæ*, distinguished by the attenuated body and small disk.

ca. resp. An abbreviation of the Latin *capias ad respondendum*. See *capias*.

caressant (ka-res′ant), *a.* Caressing: as, the *caressant* airs of heaven. *N. E. D.*

caressive (ka-res′iv), *a.* Of the nature of a caress or caresses; caressing.

carette (kär-et′), *n.* [Irreg. < *-car*[1] + *-ette*.] 1. A street-car consisting essentially of the body of an ordinary street-car mounted on wooden spoke-wheels, with crank-axles. It is low, runs easily, and does not require rails.—2. A motor-vehicle like a wagonette. There are seats on both sides of the body, with a door at the rear, and the operator's seat is in front.

Carey act. See ★*act*.

carferal (kär′fē-ral), *n.* [L. *car(bo)*, charcoal, + *fer(re)*, bear, + *al(umina)*.] A trade-name for a mixture of charcoal, metallic iron, and clay intended for filtering and purifying sewage and also drinking-water.

Cargile membrane. See ★*membrane*.

cargo-book (kär′gō-bůk), *n.* The book in which are entered the particulars of a ship's cargo.

cargo-port (kär′gō-pōrt), *n.* A large rectangular port or opening in a ship's side for use in loading or discharging cargo.

car-haul (kär′hâl), *n.* In *transportation*, any short industrial railroad in which the cars, or skips, are hauled by means of endless cables or chain-belts running on sheaves laid directly on the surface between the rails. The cars are pushed or pulled along by lugs on the chain that engages the body of the car. On inclines, as in coal-breakers, the lug may drag the car up the incline or merely hold it back from running away as it is lowered by the moving chain. In standard-gage drill-yards an endless wire cable car-haul is often used in moving cars or to bring coal-cars to the elevator of a coal-storage plant. The cable runs over sheaves placed beside the track, a clip and rope or other device being used to connect the cars with the traveling-cable.—**Carhaul chain**, a special type of chain having lugs or projections inserted at intervals among the links.

Carib basket. See ★*pegall*.

carib-fish (kar′ib-fish), *n.* Same as *caribe*.

caribou, *n.* No fewer than 10 species of caribou have been described from North America, some being restricted to a comparatively limited area. Such are *Rangifer terranovæ* of Newfoundland and *R. dawsoni* from the Queen Charlotte Islands. The most eastern species is *R. grœnlandicus* from Greenland, the westernmost *R. granti* from the end of the Alaska peninsula.

caricatural (kar′i-ka-tūr-al), *a.* Of the nature of caricature; caricature-like: as, a *caricatural* biography.

Caricature photograph. See ★*photograph*.

caricology (kar-i-kol′ō-ji), *n.* [L. *carex* (*caric-*), sedge, + Gr. *-λογια*, < *λέγειν*, speak.] That department of botany which is concerned with a study of the sedge family. See *caricography* and *caricologist*.

Caricyphidæ (kar-i-sif′i-dē), *n. pl.* [NL., < *Caricyphus* + *-idæ*.] An ill-defined family of macrurous decapod crustaceans containing the genera *Caricyphus*, *Rhomaleocaris*, and *Anebocaris*, of which the first is the type.

Caricyphus (kar-i-sī′fus), *n.* [NL., < Gr. *καρίς*, a small crustacean, prob. a shrimp or prawn, + *κυφός*, bent, humped.] The typical genus of the family *Caricyphidæ*. *C. Spence Bate*, 1888.

caridoid (kar′i-doid), *a.* [Gr. *καρίς* (*καριδ-*), a small crustacean, prob. a shrimp or prawn, + *εἶδος*, form.] Resembling in form the shrimps or members of the crustacean family *Caridida*.

caries, *n.*—**Dry caries** or **caries sicca**, molecular disintegration of bone not attended by suppuration.

carillonneur (kä-ri-lon-nėr′), *n.* [F., < *carillonner*, *v.*, < *carillon*, a carillon.] A bell-ringer or player on a carillon or chime.

carina, *n.*, 1. (*c*) [*cap.*] In *astron.*, one of the four parts into which the constellation Argo is divided. See *Argo*.

3. One of the vertical cross-bars on the septa of a coral.—4. In *entom.*, any keel-like elevation of the body-wall of an insect, as the pronotal carina of many grasshoppers. *Proc. Zool. Soc. London*, March, 1899, p. 340.—**Carina tracheæ**, the projecting ridge at the point of bifurcation of the trachea.

Carinate folds, in *geol.*, isoclinal folds.

carinately (kar′i-nāt-li), *adv.* In a keeled or carinate manner; with a carina or keel.

carination (kar-i-nā′shon), *n.* [*carinate* + *-ion*.] A keeled condition: used in descriptive biology and anatomy to express the existence of ridges or carinæ on the organic body or test.

Behind they are long and narrow, showing a double *carination* with a concavity dividing them.
Amer. Nat., Jan., 1904, p. 28.

Carinthian process, stage. See *Bleiberg* ★*process*, ★*stage*.

carisquis, *n.* See ★*kariskis*.

carking, *p. a.* 2. Worrying; fretful; anxious; solicitous.

Every where you may find the selfish and the sensual, the *carking* and the careful, the cunning and the credulous, the worldling and the reckless. *Southey*, Doctor, lxv.

carline[5] (kär′lin), *n.* A Russian game of billiards which employs five balls, one of them blue and another black or yellow. It scores for both caroms and pockets and is cumulative in its counts and penalties. It was a favorite in the United States when pocket tables were in fashion.

carline-box (kär′lin-boks), *n.* A shallow, portable box, for storage of miscellaneous articles, secured under the deck of a ship, in the rectangular spaces between the beams and the carlines.

car-loader (kär′lō″dėr), *n.* In *transportation*, any machine used in loading a freight-car with grain, coke, sand, coal, or other material in bulk. The most common form is a combined delivery- and trimming-spout, used in loading a box-car with wheat, corn, etc. It may be a single flexible spout or a two-way spout for filling both ends of the car at the same time. In one type a pair of fans placed at the end of the delivery-pipe is used to blow the grain in equal quantities into each end of the car, trimming the load as fast as delivered. It will load 6,000 bushels an hour. Belt- and bucket-conveyers, fitted to a swinging-boom, are also used as car-loaders. In loading flat- or hopper-cars with sand or broken stone a short conveyer may extend from the ground to the car to deliver the material to the car as fast as it is shoveled into the conveyer. Conveyers, supported on swinging-booms over a hopper-car or in the door of a box-car, are also used to load coke, ashes, coal, etc., upon cars. See ★*conveyer*, ★*coaling-station*, and ★*coal-storage*.

Carlylesque (kär-līl-esk′), *a.* [*Carlyle* + *-esque*.] Characteristic of Thomas Carlyle or his style.

Carmelitess (kär′mel-ī-tes), *n.* [*Carmelite* + *-ess*.] A member of the Carmelite order of women.

carmeloite (kär-mel′ō-īt), *n.* [*Carmelo* Bay, California, + *-ite*[2].] A name given by A. C. Lawson to eruptive rocks at Carmelo Bay, California, having the character of andesitic basalt. The texture is like that common in andesite, the phenocrysts being pyroxene, lime-soda feldspar, and olivin altered to iddingsite.

car-mile (kär′mīl), *n.* The unit in which the number of miles covered by the rolling-stock of a railway system within a certain time is measured.

carmilion (kär-mil′yon), *n.* [*carm(ine)* + (*verm*)*ilion*.] A carmine preparation in which the coloring properties are not brought to a dry state, as with other pigments.

carminaph (kär′mi-naf), *n.* [Also *carminnaph*: < *carmi(ne)* + *naph(tha)*.] Same as ★*Sudan I*.—**Carminaph garnet.** Same as *alpha-naphthylamine* ★*red*.

carmine, *n.*—**Alizarin carmine**, a mordant coal-tar color related to anthracene. It is the sodium salt of alizarin monosulphonic acid, and is prepared by the action of fuming sulphuric acid upon alizarin. Also called *alizarin red S* and *alizarin powder*.—**Carmine lake**, a pigment made from the second washing of carmine.—**Carmine red.** See ★*red*[1].—**Orseille carmine**, a dyestuff made by treating lichens with an aqueous solution of ammonia, exposing the liquid to the air until a crimson color has developed, and heating with alum.

carmoisin, carmoisine (kär′mō-i-sin), *n.* [*car(mine)* + (*cra*)*mois*(*y*) + *-in*[2].] An acid coal-tar color: same as *fast* ★*red C*.

carmoot (kär-mōt′), *n.* [Ar. *garmūt*.] A fish, *Clarias anguillaris*, found in the Nile.

carnation[1], *n.*—**Bacteriosis of carnation.** See ★*bacteriosis*.—**Carnation disease.** See ★*disease*.—**Carnation fairy-ring.** See ★*Heterosporium*.

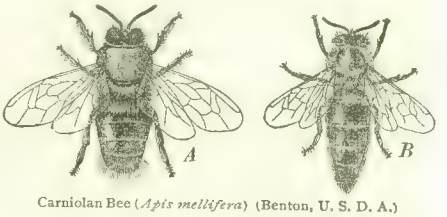
carnelian, *n.* 2. The beautiful red or reddish color of this stone. The distinctive colors of Cornell University are *carnelian* and white.

carnic (kär′nik), *a.* [L. *caro* (*carn-*), flesh, + *-ic*.] Pertaining to or derived from flesh.—**Carnic acid**, a substance, $C_{10}H_{15}O_5N_3$, isolated by Siegfried from the end-products of proteolytic digestion.

carniferous (kär-nif′ē-rus), *a.* [L. *caro* (*carn-*), flesh, + *-ferus*, < *ferre*, bear.] Flesh-bearing.

There is also a milk tree; but we nowhere find a *carniferous*, a flesh-bearing tree.
Leigh Hunt, Seer, p. 27. *N. E. D.*

carniferrin (kär-ni-fer′in), *n.* [L. *caro* (*carn-*), flesh, + *ferrum*, iron, + *-in*[2].] A bland, tasteless powder said to be a compound of iron and phosphocarnic acid containing 30 per cent. of iron.



carnificial (kär-ni-fish′al), *a.* [L. *carnifex* (*-fic-*) + *-ial*.] Of or pertaining to a carnifex or executioner, or a butcher.

See my poor dexter, abridged to one thumb, one finger and a stump,—by the blow of my adversary's weapon, however, and not by any *carnificial* knife.
Scott, Fortunes of Nigel, II. xiii.

carniform (kär′ni-fôrm), *a.* [L. *caro* (*carn-*), flesh, + *forma*, form.] Flesh-like; resembling flesh.

Carniolan (kär-ni-ō′lan), *a.* [*Carniola* + *-an*.] Of or pertaining to Carniola, an elevated Alpine province of Austria.—**Carniolan bee**, one of a race of very gentle large gray honey-bees from Carniola. The abdomen presents a ringed appearance due to bands of silvery-white hairs.

Carnosa (kär-nō′sä), *n. pl.* [NL., neut. pl. of *carnosus*, fleshy: see *carnose*.] An order of *Demospongiæ* containing *Tetraxonida* with spicules greatly reduced in size or wanting, and no diactinal megascleres or triænes with long rhabdomes. It contains the families *Corticidæ*, *Plakinidæ*, *Chondrosidæ*, and others.

Carniolan Bee (*Apis mellifera*) (Benton, U. S. D. A.)
A, drone; *B*, queen.

carnosin (kär′nō-sin), *n.* [*carnose* + *-in*[2].] A leucomaine ($C_9H_{14}N_4O_3$) belonging to the purin group.

carnotine (kär′nō-tin), *n.* [A. *Carnot*, a member of the School of Mines, Paris, + *-ine*[2].] Same as ★*primulin*.

carnotite (kär′nō-tīt), *n.* [A. *Carnot* (see *carnotine*) + *-ite*[2].] A more or less impure hydrated vanadate of uranium and potash, occurring somewhat abundantly in Montrose county and elsewhere in Colorado: found as a yellow crystalline powder or in loosely coherent masses. It contains radium and is said to be highly radio-active.

caro (kä′rō), *n.* [Porto Rican.] Any one of several vines indigenous to Porto Rico, belonging to the genus *Cissus*, as *C. sicyoides*.

caroba (kä-rō′bä), *n.* [Braz.] The name of several Brazilian trees of the family *Bignoniaceæ*, especially *Jacaranda procera* and *J. Caroba*. The leaves are bitter and astringent and are used in the treatment of syphilitic and scrofulous affections.

carobin (kar′ō-bin), *n.* [*caroba* + *-in*[2].] A crystalline constituent, not well studied, contained in the leaves of caroba (*Jacaranda Caroba* and *J. procera*), a tree native to Guiana and belonging to the family *Bignoniaceæ*.

caroid (kar′oid), *n.* [*Car*(*ica*) + *-oid*.] A medicinal preparation containing a proteolytic ferment, papayotin. It is obtained from the fruit of *Carica Papaya* (papaw).

Carolina beech-drops, locust. See ★*beech-drops*, ★*locust*[1].

Caroline, *a.* **II.** *n.* [*l. c.*] 1. A small éclair with coffee filling and fondant icing.—2. A Swedish silver coin of the value of about 38 United States cents.

Caroline Books. See ★*book*.

Carolinian area, satyr. See ★*area*, ★*satyr*[1].

carolinium (kar-ō-lin′i-um), *n.* [NL. *Carolina* (North Carolina) + *-ium*.] A name given by Baskerville to a supposed element of which the chlorid was obtained by heating in chlorin a mixture of carbon and what had generally been regarded as the oxid of thorium. A second new substance, which has been named berzelium, was at the same time separated as chlorid, so that the thorium of earlier chemistry apparently contains these two supposed elements, along with a third, for which the name *thorium* is retained. The atomic weight of carolinium is apparently higher than that of either of the others. The oxid is said to have a pinkish color.

Carolus dollar. See ★*dollar.*

caromata, *n.* Same as ★*carromata.*

caromic (ka-rom'ik), *a.* In *billiards,* of or pertaining to caroms or the making of caroms.

carone (kar'ōn), *n.* A ketone, $C_{10}H_{16}O$, prepared by the addition of hydrochloric acid to dihydrocarvone and its subsequent removal by alcoholic sodium hydroxid.

carosa (kä-rō'sä), *n.* [Philippine Sp. (?), < Sulu *karosah,* a cart, a wagon, < Sp. *carroza,* a coach: see *caroche.*] In the Philippine Islands, a sled for conveying goods, used particularly in the country.

carot (kä-rōt'), *n.* [Philippine Sp. ★*carot,* < Bisaya ★*calot* (= Pampanga *calut*) Ilocan *carót,* a root eaten after steeping in water to improve it.] In the Philippine Islands, a tuber which is steeped or cooked and eaten by the natives.

caroticum (ka-rot'i-kum), *n.*; pl. *carotica* (-kä). [NL.] In *craniom.,* the extreme medial or lateral point of the carotid canal on the outer surface of the skull. *Von Török.*

Carotid triangles. See ★*triangle.*

carotidean (kar-ō-tid'ē-an), *a.* and *n.* [*carotid* + *-e-an.*] Same as *carotid.*

carotte (ka-rot'), *n.* [French Creole, introduced through Louisiana.] Same as *carrot,* 4.

carp[2], *n.* **6.** A name of various fishes of the genus *Chilodactylus* in Australia, New Zealand, and Tasmania. These fishes are not related to the European carp, which is a cyprinoid fish.—**Lake-carp,** a sucker, *Carpiodes thompsoni,* found in the Great Lakes.—**Looking-glass carp,** a variety of the true carp having a few large scales scattered irregularly over the body.—**Murray carp,** a common name of *Murrayia cyprinoides,* a percoid fish found in Australia.

carp[3] (kärp), *v. i.* To prepare teazels for the napping-machine for dressing woolen cloth.

carpaine (kär'pā-in), *n.* [*Car(ica) Pa(paya)* + *-ine*[2].] A crystalline, intensely bitter alkaloid, $C_{14}H_{25}NO_2$, found in the leaves of *Carica Papaya,* the melon-tree of South America. It is a not very powerful poison affecting the heart, spinal cord, and respiration.

carpal. I. *a.*—**Carpal arches,** various small arteries which supply the region of the wrist.

II. *n.* **2.** In *ichth.,* same as *actinost.*

Carpathian balsam. See *stone-pine* (*b*), under *pine*[1] and ★*balsam.*

carpellized (kär'pel-īzd), *a.* In *bot.,* converted or transformed into carpels: said of other organs of a flower.

Carpellised stamens of the wall-flower.
Nature, July 28, 1904, p. 312.

carpene (kär'pēn), *n.* [(*podo*)*carp*(*ic*) + *-ene.*] A hydrocarbon, C_9H_{14}, prepared by distilling the calcium salt of podocarpic acid. It boils at 156° C.

carpenter, *n.* **3.** In *entom.,* same as ★*carpenter-ant* or *carpenter-bee.*—**Carpenters' gage, rule of three-four-five.** See ★*gage*[2], ★*rule*[1].

carpenter-ant (kär'pen-tėr-ant″) *n.* Any wood-working ant, such as *Camponotus æthiops, Lasius flavus,* or *L. fuliginosus* of Europe, or *C. Pennsylvanicus* of America.—**Black carpenter-ant,** *Camponotus Pennsylvanicus,* a common species in the United States, where it forms large colonies in dead trees, stumps, and logs, and sometimes even in the large beams of buildings.—**Pennsylvania carpenter-ant.** Same as *black* ★*carpenter-ant.*

carpenter-bird (kär'pen-tėr-bėrd″), *n.* The California red-headed woodpecker, *Melanerpes formicivorus,* which cuts holes in dead branches, in which it inserts acorns.

carpenter's-herb, *n.* **2.** The name of several labiate plants, as *Ajuga reptans* (bugle), *Lycopus Virginicus* (bugleweed), and the rougeberry, *Rivina humilis.*

carpenter-worm (kär'pen-tėr-wėrm), *n.* The wood-boring larva of a lepidopterous insect of the family *Cossidæ* (the goat-moths).

carper[2] (kär'pėr), *n.* One who prepares thistle-teazels for the cloth-napping machine.

carpet, *n.* **4.** A British collectors' name for any one of several species of geometrid moths whose wings bear a carpet-like design, as the *flame-carpet* (*Coremia propugnata*) and the *hazel-carpet* (*Cidaria corylata*).

carpet-baggery (kär'pet-bag″ę-ri), *n.* Same as *carpet-baggism.*

carpet-beetle, *n.*—**Black carpet-beetle.** Same as ★*tapestry-beetle.*

carpet-bug (kär'pet-bug), *n.* Same as *carpet-beetle.*

carpet-grass (kär'pet-gras), *n.* A grass, *Axonopus compressus,* of a dense spreading growth, highly valued in the southern United States for pasture and lawns. The name is also applied to the ★smut-grass (which see), to *Panicum ciliatissimum* of Texas, and probably to other grasses of a matted habit.

carpet-loom (kär'pet-lōm), *n.* A loom for weaving carpets, usually having a Jacquard equipment.

carpet-pick (kär'pet-pik), *n.* In *weaving,* a form of picking-motion directly connected with the crank-shaft for throwing the shuttle across the loom.

carpet-sewing machine. See ★*sewing-machine.*

carpet-shark (kär'pet-shärk), *n.* A shark, *Orectolobus barbatus,* of the family *Hemiscylliidæ:* found in Australia.

carpet-shell (kär'pet-shel), *n.* A small edible clam, *Tapes staminea,* found along the Pacific coast.

carpet-stitch (kär'pet-stich), *n.* A stitch used in sewing carpets: for ingrain an over-and-over stitch, for Brussels a through-and-through stitch.

carphospore (kär'fō-spōr), *n.* [Gr. *κάρφος,* a stalk, chip, bit, + *σπορά,* seed (spore).] In *phytogeog.,* a plant bearing achenes with a scaly or chaffy pappus which aids in dissemination. *F. E. Clements.*

Carpiodes (kär-pi-ō'dēz), *n.* [NL., < *carpio,* carp, + Gr. *-ώδης,* -like.] The generic name of the group of fishes called carp-suckers, of the family *Catostomidæ. C. cyprinus* is found in the Potomac, and several other species in the Mississippi valley streams.

carpitis (kär-pī'tis), *n.* [NL., < *carp*(*us*) + *-itis.*] An inflammation of the synovial membranes covering the articular surfaces of the bones of the carpus or knee-joint of domestic animals (wrist of man), causing pain, swelling, and lameness.

Carpoasci (kär-pō-as'ī), *n. pl.* [NL., < *καρπός,* fruit, + *ἀσκός,* a sac: see *ascus.*] A group of ascomycetous fungi including all those provided with a sporocarp, as the *Pyrenomycetes* and the *Discomycetes.*

carpoascous (kär-pō-as'kus), *a.* [*Carpoasc*(*i*) + *-ous.*] Belonging to the fungus-group *Carpoasci.*

Asci enclosed in "fructifications," i. e., *carpoascous.*
Encyc. Brit., XXVIII. 558.

carpocarpal (kär-pō-kär'pal), *a.* [*carpus* + *carp*(*us*) + *-al.*] Relating to two parts of the carpus: said of the articulation between the two rows of carpal bones.

carpodermis (kär-pō-dėr'mis), *n.* [NL., < Gr. *καρπός,* fruit, + *δέρμα,* skin.] Same as *pericarp. Bischoff.*

carpodite (kär'pō-dīt), *n.* [*car*(*po*)*podite.*] Same as *carpopodite.*

carpogam (kär'pō-gam), *n.* [Gr. *καρπός,* fruit, + *γάμος,* marriage.] In *bot.,* the organ of a procarp which produces the cystocarp.

carpogamy (kär-pog'a-mi), *n.* [Gr. *καρπός,* fruit, + *-γαμια,* < *γάμος,* marriage.] In *bot.,* the process in the procarp which produces the cystocarp.

carpognathite (kär-pog'na-thīt), *n.* [*carpus* + *gnathite.*] In *crustaceans,* the fifth joint of a gnathite.

carpogonial (kär-pō-gō'ni-al), *a.* [*carpogonium* + *-al.*] Of or pertaining to the carpogonium of the red seaweeds.

carpolith (kär'pō-lith), *n.* [NL. *Carpolithus,* < Gr. *καρπός,* fruit, + *λίθος,* stone.] Same as *carpolite.*

Carpolithus (kär-pol'i-thus), *n.* [NL. (Allioni, 1757), < Gr. *καρπός,* fruit, + *λίθος,* stone.] A genus name for fossil fruits, originally based on specimens from the Upper Miocene of Piedmont, Italy, probably belonging to the genus *Juglans,* and perhaps identical with *J. Nux-Taurinensis,* later described by Brongniart. The name has since been indiscriminately but unwarrantably applied to fossil fruits in general.

carpomania (kär-pō-mā'ni-a), *n.* [NL., < Gr. *καρπός,* fruit, + *μανία,* mania.] In *agri.* and *hort.,* the excessive bearing of fruit. [Rare.]

carpophalangeal (kär″pō-fā-lan'jē-al), *a.* [*carpus* + *phalanges* + *-al.*] Relating to the wrist and the phalanges: as, the *carpophalangeal* articulation. *Buck,* Med. Handbook, I. 547.

carpophyte (kär'pō-fīt), *n.* [Gr. *καρπός,* fruit, + *φυτόν,* plant.] In *bot.,* same as *phanerogam.* See *Phanerogamia* and ★*Spermatophyta.*

carpos (kär'pos), *n.* [NL., < Gr. *καρπός,* fruit.] Same as *carpopodite.*

carposperm (kär'pō-spėrm), *n.* [Gr. *καρπός,* fruit, + *σπέρμα,* seed.] In algæ, same as *carpospore.*

carposporangial (kär-pō-spō-ran'ji-al), *a.* [*carposporangium* + *-al*[1].] **1.** In *algæ,* bearing carpospores.—**2.** In *mycol.,* having the sporogenic organs furnished with an integument of hyphæ, as fungi of the family *Mortierellaceæ.* Compare ★*exosporangial.*

carposporangium (kär-pō-spō-ran'ji-um), *n.*; pl. *carposporangia* (-ä). [NL., < Gr. *καρπός,* fruit, + E. *sporangium.*] A specially differentiated body containing sexually formed spores in certain of the red algæ.

carposporous (kär-pō-spō'rus), *a.* In *bot.,* producing carpospores, as certain red algæ.

carpostrote (kär'pō-strōt), *n.* [Gr. *καρπός,* fruit, + *στρωτός,* strewn.] In *phytogeog.,* a plant in which the fruit (achene, perigynium, etc.) is the unit of distribution. *F. E. Clements.*

carpotropic (kär-pō-trop'ik), *a.* [Gr. *καρπός,* fruit, + *τροπικός,* of or pertaining to a turn or change.] In *bot.,* executed for the protection of fruit or the dissemination of seed: said of certain changes in the position of flower-stalks made only once.

car-puller (kär'půl″ėr), *n.* In *transportation,* a small portable capstan having a horizontal winding-drum, used in hauling grain-cars in the yard of a grain-elevator; a ★car-haul (which see). It is operated by means of a belt from the elevator and has winding-ropes to control the cars.

carpus, *n.* **4.** In *entom.*: (*b*) The club of the stigmal vein in the fore wing of an insect of the family *Chalcididæ.*—**5.** In *ichth,* same as *actinost.*

car-pusher (kär'půsh″ėr), *n.* **1.** A hand-lever having a pivoted fulcrum, used as a pinch-bar to move a railroad-car by pinching the face of a wheel and causing it to revolve slowly.—**2.** A machine used to push heavy cars; specifically, a machine used to push cars carrying very hot material, such as steel ingots which have just been poured. In its ordinary form it is a hydraulic machine having a ram or head which pushes the cars carrying the ingot-molds in front of the steel furnace. It can be worked by other than hydraulic power, electricity being sometimes used, and it is operated from a convenient platform at some distance from the machine.

carrao (kä-rä'ō), *n.* Same as ★*carau.*

carré, *n.* **2.** In *roulette,* a bet that takes in four numbers in a square, the money being placed on the intersecting lines.

carreau, *n.* **4.** A kind of cushion upon which lace is made. It has the front part lower than the back and holds from 6 to 28 pairs of small spools or spindles, the lace as it is made being wound on a cylinder. *Sci. Amer. Sup.,* June 25, 1904, p. 23817.

car-replacer (kär'rē-plā″sėr), *n.* See *replacer.*

carreta (kä-rā'tä), *n.* [Sp., a narrow cart, < *carro,* a car, cart: see *car*[1].] A rudely built cart having a long bottom-frame provided with large rings for ropes that hold the load in place: used in the southwestern United States and Mexico.

carretela (kä-re-tā'lä), *n.* [Sp. ★*carretela* (in Philippine Islands ?), < *carreta,* a narrow cart: see ★*carreta.*] A carriage or coach.—**Carretela de Pasay,** a name given in the Philippine Islands to a two-wheeled cart used by the natives of Luzon. Also called *flecha.*

carretera (kä-re-tā'rä), *n.* [Sp., < *carreta:* see ★*carreta.*] In Spanish-speaking countries, a wagon-road or highway.

carreton (kä-re-tōn'), *n.* [Sp., aug. of *carreta,* a cart: see ★*carreta.*] A heavy two-wheeled cart or dray used in Spanish-speaking countries.

carretonero (kä-rā-tō-nā'rō), *n.* [Sp., < *carreton:* see ★*carreton.*] The driver of a carreton. [Philippine Is.]

carriage, *n.* **15.** In *saddlery,* a long handle fitted at one end with a knob and at the other with a branch for receiving a small circular tool: used for ornamenting leather.—**Hydraulic-recoil carriage,** a gun-carriage provided with one or more cylinders filled with glycerin and water, and having pistons attached to the carriage and its slide so as to take up the recoil of the gun.—**Motor-carriage,** an automobile carriage.

carriage-bridle (kar'āj-brī″dl), *n.* A very light bridle with square winkers and without a nose-band or chin-piece.

carriage-cloth (kar'āj-klôth), *n.* A woven fabric with a short, stiff nap, differing from other nap-cloths in that the nap cannot be brushed down smooth.

carriage-gain (kar′āj-gān), *n.* In *mule-spinning*, the gain over the delivery of the roving in the outward traverse of the carriage which carries the spindles.

carriage-gear (kar′āj-gēr), *n.* The various pieces of wood used in building a carriage, cut to shape but not ironed.

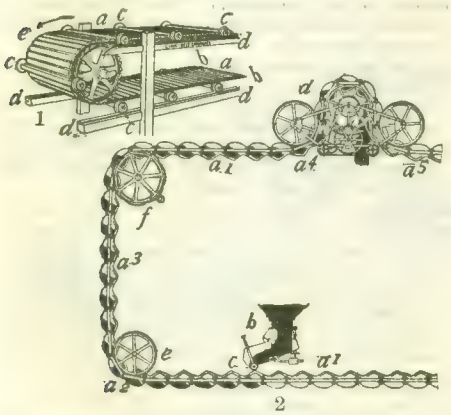
carriage-hoist (kar′āj-hoist), *n.* A set of sheers for lifting locomotives or car-bodies from their trucks to facilitate making repairs. In the United States, a gauntree or traveling-crane is generally used for the same purpose.

carriage-horse (kar′āj-hôrs), *n.* A horse more lightly built than a draft-horse, and suitable for use with a carriage. The typical carriage-horse stands 15.1–15.3 hands high and weighs 950–1,150 pounds.

carriage-jack (kar′āj-jak), *n.* A special type of wagon-jack adapted to lifting light carriages: made in several forms. See *wagon-jack*.

carriage-lamp (kar′āj-lamp), *n.* Any form of lamp designed to be carried on a carriage. Such lamps are made, in many forms, to burn candles, oil, or acetylene gas, or to employ electricity.

carriage-porch (kar′āj-pōrch), *n.* A porch projecting over the carriage-drive at the entrance-doorway of a building. It differs from the marquise in being a solid structure, usually of masonry. The ground story of a tower sometimes serves as a carriage-porch.



carriage-robe (kar′āj-rōb), *n.* A robe or blanket for use in carriages, made either of furs or of textile materials.

carriage-varnish (kar′āj-vär″nish), *n.* Any varnish used for carriages. The name does not designate varnish of a special composition.

Carrickmacross lace. See ★*lace*.

carricoche (kä-ri-kō′che), *n.* [Sp., < *carro*, cart, + *coche*, coach.] A two-wheeled vehicle common in Buenos Aires. The body resembles the square coach. It has a door at the rear and sliding windows in the sides, and is suspended upon ropes made of untanned hides. When used in towns it is drawn by one or two horses, with a postilion. It has accommodations for six passengers, sitting three on a side as in an omnibus.

carrier[1], *n.*, **5.** (*g*) In *transportation*, a system of endless traveling-chains supporting slats, trays, or buckets, used in transporting various materials or articles in bulk or in packages over short distances, as in a factory. The most simple or *platform* type consists of two chains supported by flanged wheels running upon rails at each side and carrying steel or wooden slats that form a moving platform on which the load is placed. See fig. 1. The traveling-sidewalk and the ramp are carriers of this type. Another form consists of a series of platform-trucks moving upon rails, the trucks being secured to a single chain which travels between the rails, hauling the trucks in either direction, carrying them round the wheel at the turn of the carrier (see wheel in fig. 1), and, when reversed, on the return trip. Other types have broad slats which lap one over another to prevent the material from falling between them. Buckets of various shapes are used in place of slats, either fixed to the chains or suspended from pivots on the chains and free to adjust themselves to changes in the travel from a horizontal to a vertical direction. The buckets, when moving in a horizontal direction,

1. Platform-carrier. *a*, endless band of wooden slats fastened to link-belt chains; *b*, chains; *c*, flanged wheels in pairs; *d*, tracks; *e*, driving-wheel and point of discharge of load. Arrow shows travel of load. 2. Bucket-carrier. *a*, buckets pivoted to link-belt chain: a^1, moving horizontally; a^2, changing position and direction; a^3, traveling vertically; a^4, passing through discharger; a^5, inverted, returning empty; *b*, automatic feed; *c*, guide-wheel controlling feed-gate; *d*, automatic discharger or dumper; *e*, guide-wheel; *f*, equalizing gear controlling chains. Flanged wheels on chains travel on horizontal tracks not shown.

overlap to form a continuous series, and are of various shapes to prevent the spilling of the load when changing direction of travel. This is clearly shown in fig. 2, where the loaded buckets are seen moving in three different directions between the feeding-point and the point of discharge. This use of pivoted buckets allies the carrier to both the conveyer and the elevator, and makes it possible to use one system or machine as a conveyer in a horizontal direction and as an elevator in a vertical direction. In one type of bucket-carrier, used in handling coal, the buckets are provided with a hinged bottom for convenience in unloading and a tipping device causing each bucket to open and discharge its load at any desired point. All types of carriers are fed at intervals or continuously, and by hand or by means of automatic feeders, and all are automatic unloaders or are fitted with tripping and discharging appliances. See fig. 2. Carriers are given, various names, as *apron-carrier*, *pivoted bucket-carrier*, *slat-carrier*, etc. See ★*conveyer*, ★*elevator*, ★*ramp*, ★*feeder*, and ★*discharger*. (*h*) In tube systems for post-office or store use, the cylindrical vessel or holder in which the letters or packages are inclosed. The holder, being inserted into the tube, is forced by air-pressure to the intended point.—**7.** In *photog.*: (*a*) A device for holding films or sensitive paper for exposure in a camera. (*b*) A framework which adapts the holder for carrying a smaller-sized plate than that for which the camera is intended.—**8.** A local name in Australia for a water-bag so contrived as to be suitable for transportation on the back of a pack-animal, with or without a pack-saddle.—**9.** Same as *carriage*, 13.—**10.** One who serves as a scout for robbers and highwaymen, and who carries information to them in regard to likely victims; a robbers' lookout. [Thieves' cant.]

carrier-pigeon, *n.* **2.** A breed of domesticated pigeon, having as its most apparent characteristic a huge wattle, like a miniature cauliflower, about the base of the stout beak, and a small wattle around the eye. The skull is narrow, the general build slender, and the length about 17 inches. The favorite color is solid black or dun; but there are silver and blue breeds. This breed does not carry messages, being bred for points only; not only does the bird fly indifferently, but its sight is partly obscured by the wattles. The birds used during the Franco-German war were largely Antwerps, and the birds now trained for long-distance flights are homers.

carrier-pulley (kar′i-ėr-půl″i), *n.* A pulley or band-wheel, intermediate between shafts which are connected by an endless driving-belt, used to support the weight of the belt and prevent undue sagging; in belt-conveying machinery, a supporting wheel which steadies and guides the endless moving belt and its load.

Carrington's law of solar rotation. See ★*law*[1].

carriole (kar′i-ōl), *n.* [F.: see *cariole*.] A cart for passengers, used in the north of France. The body is suspended upon long poles which serve both as shafts and as springs.

carrion-beetle, *n.*—**Beet carrion-beetle,** a European silphid beetle, *Silpha opaca*, which feeds on the leaves of mangolds.

carritch, *n.*—**To give one his carritch,** to put one through his catechism or give him a scolding. [Scotch.]

carritch (kar′ich), *v. t.* To catechize: as, to *carritch* the bairns. [Scotch.]

carroche, carroch, *n.* Same as *caroche*. *Browning*.

carromata (kä-rō-mä′tä), *n.* [Philippine Sp. *carromata* (fem.), an insular form (cf. Bisaya *calomáta*, a brooch) of Sp. *carromato*,

Carromata.

a one-horse vehicle, a long, narrow cart, < *carro*, cart, + *mato*, rough, coarse, poor: see *mate*[2].] A light, two-wheeled covered vehicle, usually drawn by a single horse. [Philippine Is.]

Recourse [in the Philippines] was therefore had to light native wagons, *carromatas*, and to litters carried by hired coolies. *Buck*, Med. Handbook, I. 481.

carrot, *n.*—**Candia carrot.** Same as *Candy carrot*, under *carrot*, which is a corruption of *Candia carrot*.—**Carrot rust-fly.** See ★*rust-fly*.—**Cuban carrot,** a carrot of tobacco-leaves consisting of four hands tied with Cuba bast.—**Peruvian carrot,** the arracacha, *Arracacia Arracacha*. See *arracacha*.

carrot, *v. t.* **2.** To prepare, for felting purposes, plucked fur on skins by subjecting it to a solution of quicksilver and nitric acid or

Carrot-beetle (*Ligyrus gibbosus*). Adult, enlarged. (Chittenden, U. S. D. A.)

chlorid of mercury, and then drying it by exposure to the open air or by artificial heat, the former method of drying producing a whitish color (white carrot), and the latter method a yellowish color (yellow carrot). *Sci. Amer. Sup.*, June 4, 1904, p. 23767.

carrot-beetle (kar″ọt-bē′tl), *n.* A scarabæid beetle, *Ligyrus gibbosus*, whose larva damages the tubers of the carrot.

carrot-disease (kar′ọt-di-zēz″), *n.* See ★*disease*.

carrot-fly (kar′ọt-flī), *n.* Same as *carrot* ★*rust-fly*.

carrotin, *n.* Same as *carotin*.

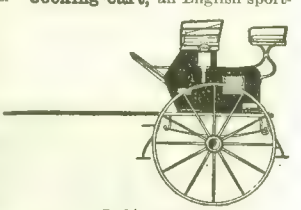
carrot-weed (kar′ọt-wēd), *n.* The common ragweed, *Ambrosia artemisiæfolia*: so called from some resemblance in the foliage to that of the carrot.

carry, *v.* **I.** *trans.*—**To carry down.** In *chem.*, when a precipitated saline or other solid substance is found to be accompanied by another solid, of itself soluble in the liquid, the former is said *to have carried down* the latter. Thus barium sulphate when formed by precipitation is apt to be accompanied by small quantities of salts of iron and other metals, although these salts are soluble when alone.—**To carry up,** to extend upward as by the addition of successive courses: as, the building was *carried up* as high as the law allows.—**To carry weight.** (*a*) To have influence. (*b*) To be handicapped by carrying additional weight, as in horse-racing.

II. *intrans.*—**To carry through,** in *golf* and *tennis*, to allow the bat or club, in making a stroke, to 'follow' the ball, that is, to keep it in contact with the ball as long as possible.

carry, *n.* **8.** In *golf*, the distance from the spot from which a ball is driven to the place where it first alights. *W. Park, Jr.*

carse-clay (kärs′klā), *n.* The clay deposited at the bottom of a fen; swamp-clay. See ★*carse-deposit*.



carse-deposit (kärs′dē-poz″it), *n.* An estuarine deposit, partly refilling an erosion valley. The chief constituents are clay and silt, and on the upstream margin they pass gradually into fluviatile deposits of sand, gravel, and silt. *J. Geikie*, The Great Ice Age, p. 295.

carse-land (kärs′land), *n.* The land surface formed by the reëlevation of a drowned valley; an emerged carse-deposit. *J. Geikie*, The Great Ice Age, p. 291.

car-sickness (kär′sik″nes), *n.* A condition analogous to seasickness sometimes affecting travelers on a railway.

Carstone (kär′stōn), *n.* [*Carstone*, a local name.] In *geol.*, a minor division of the Cretaceous system in Norfolk and Lincolnshire, England, constituting the uppermost member of the Neocomian or Lower Cretaceous.

cart, *n.*—**Battlesden cart,** a two-wheeled pleasure-vehicle of English origin.—**Cape cart,** a two-wheeled vehicle peculiar to South Africa. The body is generally of the dog-cart type, the seat being made to slide, and is provided with a canvas-covered bow-top. It is fitted with a pole for two horses.—**Cocking-cart,** an English sporting-cart with a short body: originally fitted to carry game-cocks to the pits. It was built very high from the ground and used only for tandem.

Cocking-cart.

cartan (kär-tän′), *n.* [Native name.] Same as ★*balaustre*.

Carth. An abbreviation of *Carthaginian*.

carthamin, *n.*—**Plate carthamin,** the trade-name of an extract of safflower of superior quality which has been dried as a film or crust on the surface of an earthenware plate.

cartilage, *n.*—**Aortic cartilage.** See ★*aortic*.—**Auricular cartilage,** cartilage of the pinna of the ear.—**Branchial cartilage.** See ★*branchial*.—**Calcified cartilage,** cartilage hardened by the deposition in or on it of spicules of bone, as in the sternal ribs of old mammals or the crania of sharks. It has a granular structure very different from true bone.—**Cartilage of ossification.** Same as *temporary cartilage*.—**Cephalic cartilage.** Same as *cranial* ★*cartilage*.—**Ciliary cartilage.** Same as *tarsal cartilage*.—**Cranial cartilage,** in cephalopods, a portion of the internal skeleton that protects the principal nerve-centers, incloses the auditory organ, and gives support to the eyes. Also called *cephalic cartilage*.—**Investing cartilage.** Same as *articular cartilage*.—**Jacobson's cartilage,** a small independent cartilage in the nasal septum.—**Luschka's cartilages,** small cartilaginous nodules in the vocal cords.—**Nasal cartilages.** See ★*nasal*.—**Nuchal cartilage.** See *nuchicartilage*.—**Reichert's cartilage,** a cartilage in the fetus from which

is developed a part of the hyoid bone.—**Septal cartilage,** the cartilaginous portion of the nasal septum.—**Sternal cartilage,** in man, one of the seven costal cartilages on each side articulating with the sternum.—**True cartilage.** Same as *hyaline cartilage.*

cartilage-pit (kär′ti-lāj-pit), *n.* In the pelecypod mollusks, one of the resilifers, or concave, often spoon-shaped, depressions into which are fitted the ends of the resilium or internal ligament.

cartilaginiform (kär″ti-lā-jin′i-fôrm), *a.* [L. *cartilago (-gin-),* cartilage, + *forma,* form.] Same as *cartilaginoid.*

cartographical, cartographically. See *chartographical, chartographically.*

cartographist, *n.* See ★*chartographist.*

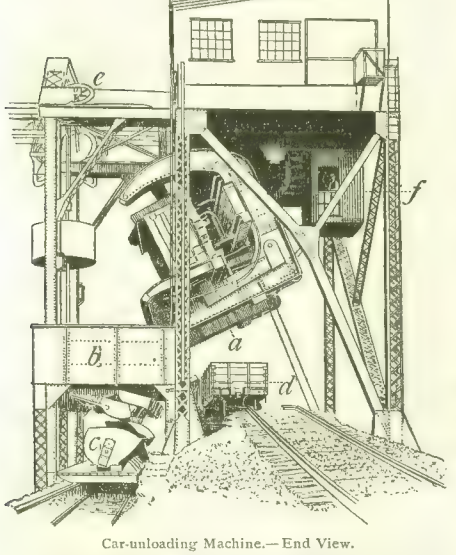
cartridge, *n.* **2.** A case of metal, paper, or other material containing some chemical preparation used in photography, such as magnesium mixture for flash-light or material for developing, toning, or fixing solutions.—**Hydraulic mining-cartridge,** a device for breaking down coal in mines by the application of hydraulic pressure, thus avoiding the danger attending the use of explosives for this purpose.

cartridge-clip (kär′trij-klip), *n.* A light sheet-metal device for clasping several cartridges at the base and so arranged as to permit the quick insertion of all the cartridges into the magazine of a repeating firearm.

cartridge-fuse (kär′trij-fūz), *n.* In *elect.,* a fuse consisting of a conductor which at overload melts and so opens the circuit. It is inclosed in a cartridge-like insulating-tube, usually of fiber, intended as a protection from the melted metal which, when the fuse blows out, would be thrown around.

cartridge-stick (kär′trij-stik), *n.* In *mining,* a round stick on which cartridge-paper is rolled to form a case for blasting-powder.

cart-wheel (kärt′hwēl), *n.* A wheel of a cart, or, figuratively, something resembling one, as, by exaggeration, the United States silver dollar (1873–1900).—**To turn** (or **make**) **a cart-wheel,** to move like a rotating wheel, by turning somersaults sidewise, touching alternately upon the hands and feet.



cart-whip (kärt′hwip), *n.* A teamster's whip, made with a short, stiff handle and heavy thong.

carua (kä-rō′ä), *n.* [S. Amer.] A plant of the pineapple family, *Neoglaziovia variegata,* found in northern Brazil, and yielding an important fiber called by the same name.

carubio (kä-rō′bē-ō), *n.* [Porto Rican.] Same as ★*bosua.*

caruncle, *n.,* **2.** (*b*) A small horny protuberance, at the tip of a young bird's beak, which serves to break the egg-shell at the time of hatching: same as *egg-tooth.*—**5.** A peculiar leaf-like sense-organ found on the dorsal side of the segments at the anterior end of certain polychætous annelids, especially those belonging to the family *Amphinomidæ.*

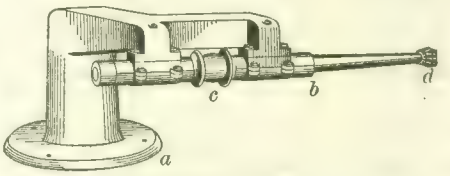
car-unloader (kär′un-lō″dėr), *n.* In *railroading,* a machine for unloading flat- or gondola-cars. Two types are in use, one in which the load is pushed or plowed off the car while it is at rest or in motion, and another in which the car itself is tilted up or turned over to discharge the load. The first type is used in railroad construction and the second to unload ore- and coal-cars. The railroad-construction machine consists of a double-share or single-share plow, as wide as the top of the car, which is drawn along the whole length of a train by means of a cable. The gondola-cars are made without end-frames and have the brake-wheel at the side, and the side-frames have doors which are hinged at the top and swing outward, a train thus forming, with the flat iron bridges between the cars, a continuous trough for its whole length. A complete train consists of a locomotive, a flat-car carrying a winding-engine (using steam from the locomotive), sixteen or more cars, and the plow and its cable. When the filled train reaches the point of discharge, it may stop to distribute the load along the length of the train, or may be kept in motion to deposit the load over a greater distance, or may be backed at the same speed as the unloading, when the entire train-load will be deposited at one point. Whatever plan is used, the operation of the machine is the same, the winding-engine by means of the cable dragging the plow along the length of the train, and the two plow-shares throwing off the load, through the swinging doors, on each side of the track. With flat-cars a plow having one share is used, which discharges the load on one side only. Another plan is to place a guide-rail on the top of a train of flat-cars and to use a double plow, the locomotive being detached and the train anchored. The engine then drags the plow along the train by means of the cable. The car-unloading machines are massive structures supporting a section of track upon a cradle. The loaded car is run into the machine, locked in the cradle, and then turned over to discharge the load.

Car-unloading Machine.—End View.

a, cradle containing loaded car tilted and discharging its load into the hopper; *b,* the hopper with chutes; *c,* buckets on flat-car; *d,* the next car to be unloaded which pushes empty car out of cradle (after it has assumed its normal position) which runs by gravity out of the machine; *e,* machinery handling the cradle; *f,* point of control.

carv, *v.* A simplified spelling of *carve.*

carve[1]. **I.** *trans.* **7†.** To make a private sign to, at table. See II., 3.



II. *intrans.* **3†.** To make a private sign with the little finger at table, as when one carves (def. II., 2) or pretends to carve, or raises a glass to one's lips.

> He can *carue* too, and lispe: Why this is he
> That kist away his hand in courtesie.
> *Shak.,* L. L. L., v. 2 (ed. 1623).

carvenone (kär′vē-nōn), *n.* [G. *carve,* caraway (see *carvy*), + *-ene* + *-one.*] A ketone, $C_{10}H_{16}O$, prepared by dropping dihydrocarvone into cold concentrated sulphuric acid and diluting the solution with ice-water. It may also be prepared from camphor. It is an oil which boils at 237° C.

carver, *n.* **3.** A carving-machine.—**Panel carver and friezer,** a carving- or shaping-machine consisting of a table on which the work is laid and a vertical cutter-head carrying the cutters, hung from a bracket over the table. See *shaper,* 4.

carving-machine (kär′ving-ma-shēn″), *n.* In *wood-working,* a machine for making ornamental carvings in wood.—**Spindle carving-machine,** the most simple form of carving-machine, consisting of a horizontal spindle supported in bearings at the top of a column or a bench-stand, and carrying at the end a cutting-tool which may be of any form required in carving foliage, scrolls, flutings, rosettes, etc. The cutters resemble, except in size, the cutters of a milling-machine. It may be operated at a speed of 7,000 revolutions a minute. Larger machines are practically shapers (which see).

Spindle Carving-machine.

a, bench-stand supporting horizontal spindle; *b,* spindle; *c,* place where the belt is applied; *d,* cutter.

carving-table (kär′ving-tā″bl), *n.* A heated table on which meats are kept warm.

carvone (kär′vōn), *n.* [G. *carve,* caraway, + *-one.*] A ketone, $C_{10}H_{14}O$, which occurs in the two optically active forms—the dextrogyrate form in the oils of dill and caraway, and the levogyrate form in the oils of spearmint and kuromoji. It is an oil which smells of caraway and boils at 228° C. Formerly called *carvol.*

carvotanacetone (kär″vō-tan-as′ē-tōn), *n.* [G. *carve,* caraway, + *tan(nic),* + *acetone.*] A ketone, $C_{10}H_{16}O$, prepared by the reduction of carvonehydrobromide. It is an oil which boils at 228° C.

caryatidal (kar-i-at′i-dal), *a.* Having the characteristics of a caryatid: as, a *caryatidal* figure or statue.

caryatidic (kar i-a-tid′ik), *a.* Same as ★*caryatidal.*

Caryocaraceæ (kar-i-ō-ka-rā′sē-ē), *n. pl.* [NL. (Szyszylowicz, 1893), ‹ *Caryocar* + *-aceæ.*] A family of dicotyledonous, archichlamydeous plants of the order *Hypericales,* typified by the genus *Caryocar* (which see), and containing one other tropical American genus. It was formerly included in the family *Theaceæ,* from which it differs in its coherent petals and separate styles.

caryocerite (kar″i-ō-sē′rīt), *n.* [Gr. *κάρυον,* nut, + *cer-ium* + *-ite*[2].] A silicate of thorium, the cerium metals, yttrium, and other elements, found in Norway.

caryochrome (kar′i-ō-krōm), *a.* and *n.* [Gr. *κάρυον,* nut, kernel (nucleus), + *χρῶμα,* color.] **I.** *a.* In *neurol.,* staining when treated by the Nissl method.

II. *n.* In *neurol.,* a term applied to certain nerve-cells in the cerebellum, reticular membrane, and olfactory bulbs which exhibit a staining of the nucleus only when treated by the Nissl method.

Caryocrinus (kar-i-ok′ri-nus), *n.* [NL., ‹ Gr. *κάρυον,* a nut, + *κρίνον,* a lily.] A genus of cystid *Echinodermata* or cystideans established by Say and highly characteristic of the Upper Silurian beds of New York and Tennessee. They are nut-shaped bodies, the calyx plates being large and generally perforate. The summit bears a crown of short, feeble arms, and the stem is long and free.

caryolymph (kar′i-ō-limf), *n.* [Gr. *κάρυον,* nut, + L. *lympha,* lymph.] The liquid portion of the substance of the nucleus of a cell; the nuclear sap. *Haeckel* (trans.), Wonders of Life, p. 141.

caryolysis (kar-i-ol′i-sis), *n.* [NL., ‹ Gr. *κάρυον,* nut, kernel (nucleus), + *λύσις,* dissolution.] Same as *caryocinesis.*

caryomicrosome (kar″i-ō-mī′krō-sōm), *n.* [Gr. *κάρυον,* nut, kernel (nucleus), + *μικρός,* small, + *σῶμα,* body.] In *cytol.,* one of the minute granules of which the nucleus of the cell is supposed to consist.

caryophyllic (kar″i-ō-fil′ik), *a.* [*caryophyll-in* + *-ic.*] Derived from caryophyllin.—**Caryophyllic acid,** a crystalline, bibasic acid, $C_{20}H_{32}O_6$, obtained by oxidizing caryophyllin with nitric acid.

caryoplasm, *n.* Same as *karyoplasm.*

Caryopteris (kar-i-op′te-ris), *n.* [NL. (Bunge, 1835), in allusion to the wings on the fruit-carpels; ‹ Gr. *κάρυον,* nut, + *πτερόν,* wing.] A genus of plants of the family *Verbenaceæ,* containing about 10 species, native in Japan, China, and the Himalayas. They are shrubby or suffrutescent, with opposite, entire or toothed leaves, and cymes of blue, violet, or red flowers situated either in the axils of the leaves or grouped opposite each other toward the ends of the branches. The four carpels of the fruit have one margin incurved about the seed, the other forming a wing. *C. incana* is in cultivation under the name *Japanese beni,* which see, under ★*beni.*

caryorrhexis (kar″i-ō-rek′sis), *n.* [NL., ‹ Gr. *κάρυον,* nut, + *ῥῆξις,* breaking.] Rupture of the cell-nucleus.

caryotheca (kar″i-ō-thē′kä), *n.*; pl. *caryothecæ* (-sē). [Gr. *κάρυον,* nut, kernel (nucleus), + *θήκη,* case, box.] In *cytol.,* the wall of the nucleus in the animal or plant cell. Also *karyotheca.*

caryozymogen (kar″i-ō-zī′mō-jen), *n.* [Gr. *κάρυον,* a nut, kernel (nucleus), + *zymogen.*] Small masses of nuclear material which enter into the composition of the zymogens.

C. A. S. An abbreviation of *Fellow of the Connecticut Academy of Arts and Sciences.*

casabe (kä-sä′be), *n.* [Cuban Sp., prob. ‹ *casabe, cazabe,* cassava.] The Cuban name of *Chloroscombrus chrysurus,* a small fish of the family *Carangidæ.*

casanthrol (ka-san′thrōl), *n.* [*cas(ein)* + *anthr(acene)* + *-ol.*] A thick, neutral, gelatinous emulsion consisting of casein ointment and certain constituents of coal-tar soluble in benzol and ether. It constitutes a water-soluble varnish applied to the skin in chronic eczema and other skin affections.

cascade[1], *n.* **5.** In *manuf. chem.,* a series of vessels, frequently of stoneware, from one to the next of which a liquid successively overflows, thus presenting a large absorbing surface to a gas with which it is to be charged.—**Cascade method,** in the liquefaction of gases, the method of continuous cooling by means of a refrigerant such as carbon dioxid. The refrigerant, compressed and subsequently cooled, is caused to flow around the receptacle containing the gas to be liquefied until the lowest temperature thus attainable is reached. The final cooling, necessary to liquefaction, is then produced by the sudden expansion of the gas itself.

cascade-bottle (kas-kād′bot″l), *n.* In *manuf. chem.,* a hollow vessel, commonly of stoneware, having an opening at the top through which passes a moderately wide tube filled with coke or other suitable porous material, over which water or some other liquid flows so as to become charged with a gas or vapor passed through the vessel.

casca-doce (käs-kä-dō′sā), *n.* [Pg. *casca,* bark, + *doce,* sweet, ‹ L. *dulcis,* sweet.] Same as ★*buranhem.*

cascalote (käs-kä-lō′tā), *n.* [Sp. Amer.] Same as *divi-divi*, 1.

Cascara buckthorn. See ★*buckthorn*.

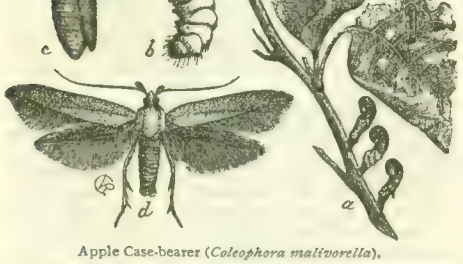
cascara[2] (käs′kä-rä), *n.* [Sp. *cáscara*, bark.] A bark canoe. [Spanish America.]

cascarin (kas′kạ-rin), *n.* [*cascara* + *-in*[2].] A name given to a compound, $C_{12}H_{10}O_5$, supposed to be found in cascara sagrada. Later investigators question its identity.

cascaron (käs-kä-rōn′), *n.* [S. Amer. Sp., appar. < Sp. *cascarón*, an egg-shell.] A tall leguminous tree of Argentina, *Cascaronia astragalina*, having a corky bark under which is found a red gum. Its leaves, flowers, and pods possess a strong odor of rue.

case[1], *n.* **9.** In the tobacco trade, the state of the leaf, during and after the process of curing, with respect to moisture-content and pliability: common in such phrases as *in case* (more or less moist), *in good case* (with the right degree of moisture), *too high case*, etc. See ★*order*, 17.

It must be stretched gently over the ends of the fingers and knuckles, and if it is *in good case*, i. e. plight, or condition, it will discover an elastic capacity, etc.
W. Tatham, Cult. and Com. of Tobacco, p. 37.



Case system, an inductive method of teaching law. It was first introduced at the Harvard Law School in 1869 by Professor Langdell and has since been widely adopted by various law schools. By this system students are required to deduce legal principles from the study of reported cases, rather than taught such principles by the use of text-books and commentaries. Also called *Langdell system*.—**Leading case**, a reported case which is regarded by the legal profession generally as finally establishing or settling the point or points determined in the case.—**Test case.** (*a*) One of several causes pending in the same court the determination of which will be held to apply to the several causes. (*b*) An action brought, usually by agreement between parties, in which the constitutionality or validity of an act will be brought in question and judicially determined.

case[1], *v. t.* **2.** To bring into the desired 'case' or condition; specifically, in the tobacco trade, to bring the leaf into the desired condition as to moisture and pliability, and the admixture of ingredients to give flavor, etc. See ★*case*[1], *n.*, 9, ★*caser*, *n.*, and ★*casing*[2], *n.* Also spelled in the trade, *kase*.

case[2], *n.* **16.** In the *postal service*, a series of open boxes or large pigeonholes in which letters are placed in assorting them for distribution. Each box is for a particular place, and the distributor, standing at a table in a post-office or railway postal car, throws each letter into the proper box in the case.—**17.** *Naut.*, the outside planking of a vessel.—**18.** In *whaling*, the well or hole in the head of a sperm-whale, which contains, in a free state, the most valuable oil given by it.—**19.** In *faro*, a card when it is the only one of its denomination remaining in the dealing-box.—**Case examination**, in civil-service examinations, a test of the ability of an applicant for the position of postal clerk to read the addresses of letters and to distribute the letters in a case rapidly and accurately.

casease (kā′sē-ās), *n.* [*case(in)* + *-ase.*] A proteolytic ferment, found in the cell-sap of many plants and in the culture-fluids of *Tyrothrix*, capable of digesting casein beyond the peptone to the acid amide stage.

case-bearer, *n.*—**Apple case-bearer**, *Coleophora malivorella*, a moth of the family *Elachistidæ*, whose

Apple Case-bearer (*Coleophora malivorella*).
a, cases on leaves and twigs, slightly reduced; *b*, larva; *c*, pupa; *d*, moth—enlarged. (Riley.)

case-bearing larva sometimes skeletonizes the leaves of the apple in the eastern United States. Also *pistol case-bearer*.—**Cigar case-bearer**, the larva of an American tineid moth, *Coleophora fletcherella*, which feeds on the foliage of the apple and pear and constructs for itself a cigar-shaped case which protects it from its natural enemies.

case-book (kās′bůk), *n.* A book in which a physician keeps the medical record of his cases.

case-fly (kās′flī), *n.* A caddis-fly.

casefy (kā′sē-fī), *v. t.* and *i.*; pret. and pp. *casefied*, ppr. *casefying*. [L. *caseus*, cheese, + *ficare*, make.] To render or become cheesy.

case-hardening, *n.* **2.** A process of induration affecting surfaces of rocks. It accompanies evaporation of moisture from the capillary system of exposed surfaces, and consequent deposition of such mineral matter as is held in solution. The result is a hard film or layer produced by extra cementation. In arid regions such hardened films, polished by blown sand, are known as *desert varnish*. *Van Hise*, U. S. Geol. Surv., Monograph 47, p. 547.

caseid (kā′sē-id), *n.* [*case(in)* + *-id.*] A name given to any of those nitrogenous compounds contained in cheese which remain after the water and fat have been removed.

caseiform (kā′sē-i-fôrm), *a.* [L. *caseus*, cheese, + *forma*, form.] Same as *caseous*.

Casein lime, a preparation made from inferior skim-milk cheese and used in the arts as a glue. It consists of dried and powdered cheese mixed with burnt chalk. Also called *casein cement*.—**Casein ointment.** See ★*ointment*.

casein-dyspeptone (kā″sē-in-dis-pep′tōn), *n.* An insoluble substance obtained when milk-casein is digested with pepsin and hydrochloric acid.

caseinogen (kā-sē-in′ō-jen), *n.* [*casein* + L. *-gen*, -producing.] A substance contained in milk which forms casein in the presence of a digestive ferment.

case-keeper (kās′kē″pėr), *n.* In *faro*, the player who marks the cards as they come from the dealing-box, so that the number of each card still to come shall be known. Small buttons are pushed along wires for this purpose, as in an abacus.

casement, *n.*—**French casement**, a casement or a casement-window fitted with an espagnolette and opening nearly to the floor.

case-mold (kās′mōld), *n.* In *ceram.*, an exact replica of an original clay model, as a jug, covered dish, etc., made in clay or plaster from the block-mold or hollow cast of the model. From this case or case-mold, plaster casts, or working-molds, are taken as frequently as they are needed. See ★*block-mold* and ★*working-mold*.

caseoiodine (kā″sē-ō-ī′ō-din), *n.* [L. *caseus*, cheese, + E. *iodine*.] A white powder, similar to thyroiodine, prepared from periodocasein and containing 8.7 per cent. of iodine: used internally in myxedema.

caseone (kā′sē-ōn), *n.* [L. *caseus*, cheese, + *-one*.] A name given to those compounds in cheese which are extracted by strong alcohol and by water. A recent authority proposes to apply the name to the compounds extracted by alcohol only. The amount of these compounds is an indication of the progress of the ripening of the cheese.

caseose (kā′sē-ōs), *n.* [*case(in)* + *-ose.*] An albumose resulting from casein.

caseoserum (kā″sē-ō-sē′rum), *n.* An antiserum which results on immunization with casein.

Caseous pneumonia. See ★*pneumonia*.

caser (kā′sėr), *n.* [Also spelled, in the trade, *kaser*; < *case*[1], *v. t.*, 2, + *-er*[1].] In the tobacco trade, a device for moistening the tobacco leaf. See ★*case*[1], *v. t.*, 2, and ★*casing*[2].

case-smoother (kās′smö″ŦHėr), *n.* A machine which passes glued cloth and its stiffening-board between calendering-rollers, and firmly attaches them together.

cash[2], *n.*—**Spot cash**, cash paid or to be paid on the spot, upon actual or constructive delivery of the thing sold; cash 'on the nail.' See *nail*.

cash. An abbreviation of *cashier*.

Cashaqua shale. See ★*shale*[2].

cashaw[2] (ka-shâ′), *n.* See ★*cushaw*.

cashew[2], *n.* See ★*cushaw*.

cashew-apple (ka-shö′ap″l), *n.* The pear-shaped edible stalk which bears the cashew-nut. See *Anacardium* and *cashew-nut*.

Cashmere goat. See ★*goat*[1].

cash-register (kash′rej″is-tėr), *n.* A cash-box fitted with a hand-operated mechanism for exhibiting to the purchaser the amount of his purchase, unlocking and opening the cash drawer and recording and adding up all sums deposited in the drawer. Some machines also record and add up sums paid out. Closing the drawer locks the mechanism. The autographic cash-register is a small cabinet containing a cash-drawer and a recording-ribbon placed upon a spool in the cabinet and carried under a narrow opening in the top of the cabinet to a second spool which is controlled by a hand-lever. After a sale, or other transaction, a record is made in pencil on the ribbon through the opening; then, on moving the lever, the cash-drawer is unlocked and automatically opened and the ribbon is moved onward under a glass plate where it can be read but cannot be changed; on closing the cash-drawer the cabinet is locked and cannot be used again until a new record is made or the lever moved. In some registers, combination locks control the lever and the record may be duplicated or manifolded, one record being delivered outside the cabinet as a receipt or bill of sale, and another being retained in the cabinet. More complicated machines have one or more drawers controlled by separate locks, for one or more salesmen. Larger machines employ keys or levers of various forms for recording sales on accounts or other data.—**Cash-register bank**, a steel box for small savings in which the value of each coin is registered as it is deposited in the box, the index on the outside showing the total sum in the box.

cash-sword (kash′sōrd), *n.* A Chinese ornament or charm made of coins or cash tied with cord.

cash-tree (kash′trē), *n.* A number of Chinese coins united by connecting bands of metal, as originally cast in stone or metal molds.

This, indeed, appears also to be the case with a large number of the specimens of tin cash. They are cast in the form of trees, which are called *cash-trees*, the three specimens of which, obtained by the expedition, are, I believe, unique in this country. The general type is that of the round cash, with a circular hole in the centre, though one kind, the half-cash of Trengganu, is a solid round coin (without the hole).
Rep. Brit. Ass'n Advancement of Sci., 1901, p. 420.

Casimiroa (kaz-i-mir′ō-ä), *n.* [NL. (La Lave, 1825), named in honor of *Casimiro* Gomez Ortega (1740–1818), a Spanish botanist.] A genus of trees of the family *Rutaceæ*. There are four species, native in Mexico and Nicaragua. They have alternate digitately 3–7-foliolate leaves with stalked leaflets, and small greenish flowers in short axillary panicles. For *Casimiroa edulis*, see ★*cochilsapote*.

casing[2] (kā′sing), *n.* [Also spelled, in the trade, *kasing*; < *case*[1], *v. t.*, 2, + *-ing*[2].] The process of putting tobacco leaf into the desired 'case' or condition, namely by moistening, and adding the ingredients used to give flavor, etc. See ★*case*[1], *n.*, 9.

casing-boards (kā′sing-bōrdz), *n. pl.* In *mining*, planks spiked to buntons or dividing-timbers to form a partition or brattice in a mine-shaft. *C. Le N. Foster*, Ore and Stone Mining, p. 238.

casino, *n.*—**Royal casino**, a variety of casino in which the king, queen, and jack have a pip-value of 13, 12, and 11, respectively, and may be combined with smaller cards, or may win them,—a jack, for instance, winning a 9 and 2.—**Spade casino**, a variety of casino in which every spade counts a point and the scores are pegged as fast as made, usually on a cribbage-board, 61 points being game.—**Twenty-one-point casino**, a variety of casino in which the game is twenty-one points, the points going out in order if it is a tie at the end, cards first, then spades, big casino, little casino, aces, and sweeps. If the aces have to decide it, their order is: spades, clubs, hearts, and diamonds.

casoy, *n.* See ★*kasoi*.

cassabanana (kas″a-ba-nan′ä), *n.* A plant of the family *Cucurbitaceæ* (*Sicana odorifera*), a native of the American tropics, and sometimes grown as an herbaceous arbor-plant in the Southern States. The fruit is sometimes two feet long, and squash-like, orange or crimson in color, and with a very aromatic odor. There are two or three related species, all tall-climbing by means of tendrils.

cassage (ka-säzh′), *n.* The process of change known as 'casse' which wine sometimes undergoes. See ★*casse*[2], 3.

casse[2] (kas), *n.* [F. *casse*, breaking, < *casser*, break.] **1.** A bridle for a kite; also, a check-piece or fastener by which the string of a subordinate kite is attached to the line of the main kite.—**2.** A safety-line; technically, a small copper wire inserted into the bridle of a kite by Marvin, in order that when the strain becomes too great in strong winds the wire may break and save the main structure of the kite and the line-wire. See ★*bridle*, 10.—**3.** The breaking down or incipient souring of wine, even in closed vessels.

Cassel earth. See ★*earth*[1].

cassette, *n.* **2.** In *photog.*, a flat box holding one or two plates which are to be exposed in a camera; a plate-holder.

Cassia-flower oil. See ★*oil*.

Cassidulina (ka-si-dụ̄-lī′nä), *n.* [NL., < *Cassidula* + *-ina.*] The typical genus of the family *Cassidulinidæ*. *D'Orbigny*, 1839.

Cassidulinidæ (ka-si-dụ̄-lin′i-dē), *n. pl.* [NL., < *Cassidulina* + *-idæ.*] A family of *Foraminifera*, of the order *Textularidea*. The test consists of a series of alternating chambers, more or less coiled upon itself in a planispiral manner. It contains the genera *Cassidulina* and *Ehrenbergia*.

cassiduloid (ka-siḍ′ụ̄-loid), *n.* and *a.* **I.** *n.* An echinoid or sea-urchin allied or belonging to the family *Cassidulidæ*.

II. *a.* Resembling sea-urchins of the family *Cassidulidæ*.

cassie (kas′ē), *n.* [F. *cassie* < Prov. *cacio* < L. *acacia*; see *Acacia*.] In the southern United States and in France, the flower-heads of *Acacia Farnesiana*. See *Acacia* and *sponge-tree*.

cassimere-twill (kas'i-mēr-twil″), *n.* A four-harness twill-weave. Also called *blanket-, crow-, Florentine, kerseymere-, serge-, swan's-down- (etc.) twill.*

cassine[2] (ka-sēn'), *n.* [N. Amer. Ind.] A ceremonial drink of the Indians of eastern North America.

Cassini division. See ★*division.*

cassio-berry (kas'i-ō-ber″i), *n.* A shrub, *Viburnum obovatum*, of the southeastern United States, with shining evergreen leaves and black, edible drupes. The yapon, *Ilex vomitoria*, which somewhat resembles it, is called *cassio-berry bush* in South Carolina, and that name has been applied to the smooth winterberry, *Ilex lævigata.*

cassonic (ka-son'ik), *a.* Noting a bibasic, noncrystalline acid, $C_5H_8O_7$, formed by the oxidation of cane-sugar.

cast[1], *v. t.* **21.** In *agri.*, to replow (old ridges) with the furrows all in one direction. See ★*casting*, 13. [Great Britain.]—**Casting-and-setting machine**, that part of the monotype type-setting and -casting machine which casts the types, sets the letters in the proper sequence to form the words of the copy, spaces and justifies the lines, and places the finished line on the galley. It weighs about 1,500 pounds, and occupies a floor space of about 4 by 5 feet.—**Casting of the withers**, eversion of the womb in a mare after foaling. —**To cast on end**, to make (iron castings) with the long dimension vertical. This is usually done in the case of cast-iron pipes or other long, hollow pieces, because it is easier to hold the core in position than when casting on the side, and also because the castings are sounder. When castings are made in this manner, it is customary to pour the iron into a vertical gate at one side of the mold and let it flow into the mold at the bottom. This method is less liable to injure the mold than that of pouring direct, and gives a chance for air carried down by the falling iron to escape.

cast[1], *n.* **14.** Specifically, the impression of the interior surface of the test or skeleton of an organism, usually animal: contradistinguished from *mold* or *imprint*, which is the impression of the exterior. By the removal, through solution, of the substance of the fossil the filling of the cavity from within may produce an impression of the interior carrying also some of the features of the exterior surface, and this combination is termed a *sculpture-cast.*

29. In *archery*, the act or property of throwing or propelling an arrow: thus a bow is said to have a good or a bad *cast.*—**Fatty casts**, renal tube-casts containing oil-globules.

cast[3], *n.* A simplified spelling of *caste*[2].

castagnole (kȧs-tȧn-yōl'), *n.* [F.] The *Brama rayi.* See *pomfret*, 3.

Castalia, *n.* **5.** (Salisbury, 1805.) In *bot.*, see *Nymphæa*, 2.

castanean (kas-tā'nē-ạn), *a.* [*Castanea* + *-an.*] Belonging to the genus *Castanea*, or relating in any way to the chestnut.

castaneopiceous (kas-tā″nē-ō-pish'ius), *a.* [L. *castanea*, chestnut, + *piceus*, pitchy.] Blackish-chestnut or blackish-brown in color. *Proc. Zool. Soc. London*, 1901, II. 523.

castanha-nut (käs-tän'yȧ-nut), *n.* [Pg. *castanha*, chestnut: see *chestien.*] Same as *Brazil-nut.*

castanin (kas'tạ-nin), *n.* [L. *castanea*, chestnut, + *-in*[2].] A globulin found in Spanish chestnuts.

castanite (kas'tạ-nīt), *n.* [L. *castanea*, a chestnut, + E. *-ite*[1].] A hydrated ferric sulphate occurring in chestnut-brown prismatic crystals and crystalline aggregates: found in Chile.

caste[2], *n.* **3.** In *entom.*, any one of the distinct forms found among the polymorphic social insects, especially the true ants and the white ants or termites.—**4.** Same as *half-caste.*—**Caste production**, the producing or intensifying of polymorphism among social insects, caused by the workers through differentiation of the food given to the young.

Castellanos powder. See ★*powder.*

castellate (kas'te-lāt), *v.*; pret. and pp. *castellated*, ppr. *castellating.* **I.** *trans.* To give a castle-like form or appearance to; furnish with turrets and battlements in the manner of a castle.

II. *intrans.* To assume castle-like forms, as moving clouds.

castellate (kas'te-lāt), *a.* Same as *castellated.*

caster, *n.*, **1.** (*e*) In *angling*, one who casts the fly as distinguished from one who fishes with bait.

It is more successful; your fish will average larger, and although at times you will not get a long string, you will get sufficient to reward your patience and skill. The big fish is what we are all after, and the *caster* gets them if any one does. *Forest and Stream*, Feb. 21, 1903, p. 150.

6. One of the small callosities on the inner side of a horse's leg: more commonly known as *chestnut.*

More remarkable still are the callosities, "chestnuts" or "*castors*" found on the inner sides of both limbs in the horse, but only on the forelegs of other species, which are likewise rudimentary, or vestigial, structures.

Amer. Inventor, June 1, 1904, p. 250.

caster-and-setter (kȧs″tèr-and-set'êr), *n.* In *printing*, a machine (or two mutually dependent machines) that casts and composes type. The linotype combines the two operations in one machine; the Lanston, the Goodson, and others require two separate machines. *Census Bulletin* 216, June 28, 1902, p. 59.

caster-sugar (kas'tèr-shủg″ȧr), *n.* Powdered sugar: so called from the caster with a perforated top in which it is sometimes served. *N. and Q.*, IX. 418.

castigable (kas'ti-gā-bl), *a.* Worthy or deserving of castigation or chastisement.

castigative (kas'ti-gā-tiv), *a.* Of or pertaining to castigation or chastisement; castigatory.

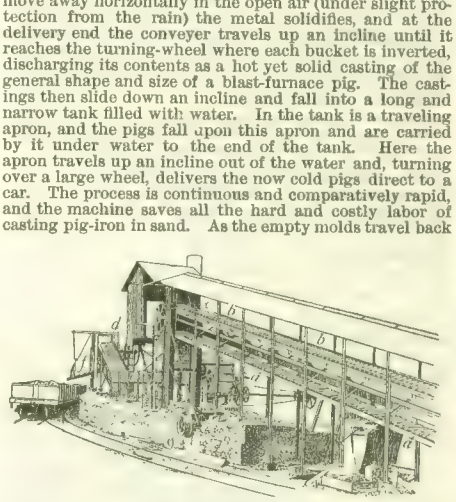
Castila (käs-tē'lä), *n.* [Philippine Sp.] A Spaniard; also, any person of white race. [Philippine Is.]

castillon (käs-tēl-yōn'), *n.* [Sp.] A Spanish gold coin: probably so named from its bearing the arms of Castile.

casting, *n.* **11.** *pl.* The pellets of hair and bones cast up by owls and hawks.—**12.** A premature shedding or falling of leaves which may be due to any one of various causes, but especially to drought, crowding of plants, or the attacks of parasitic fungi. See ★*Lophodermium.*

Casting or premature withering and fall of needles is not uncommon in nurseries of pine.

Jubeuf and Smith, Diseases of Plants, p. 236.



13. In the *fine arts*, the arrangement of draperies and accessories.

Note, in the draped female statues, the *casting* of the drapery; surely that was not copied from the folds which the garment made as it was worn in daily life.

R. Sturgis, Appreciation of Sculpture, p. 25.

14. In *agri.*, replowing old 'ridges' or 'lands,' with all the furrows of each in one direction. By this method two adjoining ridges are made into a single broad one, the crown occupying the place of the old water-furrow; or each retains its form, the water-furrow being kept clear. [Great Britain.]—**Casting hall roller**, in *glass-manuf.*, same as *running-roll* (which see).—**Dry-fly casting.** See ★*dry-fly.*—**Inlay casting**, in *ceram.*, the process of painting designs in the interior of a mold with a slip of a different color from that of the body slip. When the latter is poured into the mold it takes up the colored design, which appears in the cast piece as an inlay of a different color. See ★*thimble surface.*—**Malleable castings**, small articles made by pouring into suitable molds cast-iron, which is afterward made soft and tough by heating to redness while embedded in a material, commonly oxid of iron, which furnishes oxygen to combine with and remove carbon from the casting, thus converting it into wrought-iron from the surface inward.

casting-machine (kȧs'ting-mạ-shēn″), *n.* **1.** A machine for casting molten iron from a blast-furnace into pigs. Several types are in use. One is a conveyer, controlled by means of endless chains, and having overlapping, pressed-steel buckets, supported by wheels which travel on a track, each bucket being a mold for the metal. The machine may be placed in the casting-house and fed directly from the furnace, or it may be placed outside in any convenient place that can be reached by a ladle-car on an industrial railroad. When ready for operation the conveyer is set in motion, and the buckets pass under the pouring-spout of the ladle at a speed that enables the operator to fill each in turn with the hot metal. As the filled buckets move away horizontally in the open air (under slight protection from the rain) the metal solidifies, and at the delivery end the conveyer travels up an incline until it reaches the turning-wheel where each bucket is inverted, discharging its contents as a hot yet solid casting of the general shape and size of a blast-furnace pig. The castings then slide down an incline and fall into a long and narrow tank filled with water. In the tank is a traveling apron, and the pigs fall upon this apron and are carried by it under water to the end of the tank. Here the apron travels up an incline out of the water and, turning over a large wheel, delivers the now cold pigs direct to a car. The process is continuous and comparatively rapid, and the machine saves all the hard and costly labor of casting pig-iron in sand. As the empty molds travel back

Casting-machine.

a, conveyer composed of molds, traveling on flanged wheels, just filled with hot metal, at right (point not shown); *b*, returning, inverted, empty molds; *c*, point of discharge to second conveyer; *d*, second conveyer traversing long water-tank (to cool pigs) and then upward to point of discharge to chute; *e*, water-tank; *f*, chute delivering cold pigs to car.

to the feeding-point they are passed through a smoky fire or treated by some other process to coat the inside of each with a refractory film to prevent the hot metal from clinging to the molds. The process of cooling the pigs is also hastened by spraying the castings with cold water while in the molds. A second type employs a conveyer having sheet-steel molds. As fast as they are filled the molds are gradually submerged in water under which they travel until the pigs are sufficiently solid to be delivered. When the metal is solid, the buckets are caused to travel up an incline to the delivery-point where they are upset and deliver the castings directly to the car. A third type employs a large number of molds which are placed radially on the edge of a large, horizontal turntable. The turning of the table causes the molds to pass in order under the ladle-car to be filled, when they travel in a circular path until the castings are sufficiently solid to be discharged by the upsetting of the molds. Pig-iron cast in such machines is said to be cleaner and in better condition for immediate use than that cast by hand labor in sand. The name is also sometimes given to small machines used in casting metals in foundries. Such machines are properly called *molding-machines* (which see).

2. A mechanism which founds types.

The monotype produces single types cast in the order of their use, and set in automatically justified lines. It consists of two machines—a perforating device operated by a keyboard, and a *casting-machine.*

Census Bulletin 216, June 28, 1902, p. 58.

casting-on (kas'ting-on), *n.* The process of casting iron around a wrought-iron core or of making a cast-iron addition to a forging.

cast-iron, *n.*—**Malleable cast-iron.** See *malleable iron-castings*, under *iron.*

castle, *n.*—**The Castle**, Dublin Castle, the seat of the viceroy of Ireland, and of the high officials who are at the head of the administrative machinery of the country; hence, the governmental authority centered there. Frequently used attributively: as, *Castle* influence; *Castle* government. [Anglo-Irish.]

Castleford ware. See ★*ware*[2].

cast-line (kȧst'līn), *n.* Same as *casting-line.* See *line*[2].

cast-me-down (kȧst'mē-doun), *n.* [A corruption of *cassidony:* see *cassidony*[2].] Same as *cassidony*[2]. From this transformed name corresponding properties were ascribed to the plant.

Castner process. See ★*process.*

castor[1], *n.* **6.** Glove-leather made from goat-skins. The grain of the skin is removed and it is given a very soft finish, usually gray in color. *Flemming*, Practical Tanning, p. 55.

Castor ware. See ★*ware*[2].

Castor-bean tick. See ★*tick*[2].

castoromorph (kas'tọ-rō-môrf), *a.* [Gr. κάστωρ, a beaver, + μορφή, form.] Having characters similar to those of the beavers.

The *Castoromorph* characters, on the other hand, appear to be such as would indicate real relationship. . . .

Bulletin Amer. Mus. Nat. Hist., XVI. 295.

castor-pomace (kȧs'tọr-pum″ās), *n.* Same as *pomace*, 3. Castor-pomace is sold as a nitrogenous fertilizer.

castral (kas'tral), *a.* [L. *castra*, camp.] Of, characteristic of, or peculiar to, a camp: as, *castral* life; *castral* arrangements. *Kinglake.*

castration, *n.* **2.** In *bot.*: (*a*) The removal of anthers in the artificial crossing of plants. (*b*) The destruction of the pollen in the anthers of certain flowers by parasitic fungi, as in the case of *Lychnis dioica* and other silenaceous plants attacked by the smut, *Ustilago violacea.*

castrator (kas'trā-tọr), *n.* Same as *castrater. Southey.*

castrensic (kas-tren'sik), *a.* [L. *castrensis*, belonging to a camp.] Of or pertaining to a camp.

cast-steel, *n.*—**Cast-steel furnace**, a furnace capable of bringing iron containing carbon to a temperature of fusion, and keeping the metal molten long enough for the chemical reactions and mechanical separation of impurities to take place.—**Soft cast-steel**, a form of iron made by a fusion process, such as the open-hearth or Bessemer process, in which the percentage of carbon or other hardening elements is so low that the metal is ductile or non-brittle and has a low modulus of elasticity: suitable for use where shocks or deforming strains must be resisted, rather than where hardness of surface or edge is required.

Casual water, in *golf*, any temporary accumulation of water (whether caused by rainfall or otherwise) which is not one of the ordinary and recognized hazards of the course.

casualty, *n.* **4.** *pl.* In the military service, the losses in a command due to any cause whatsoever, as resignation, discharge, dismissal, desertion, capture, wounds, or death.

casuarinaceous (kas-ū-ar-i-nā'shius), *a.* [*Casuarinaceæ* + *-ous.*] Belonging to the plant family *Casuarinaceæ;* resembling the genus *Casuarina.* Also *casuarineous.*

Casuarinales (kas-ū-ar-i-nā'lēz), *n. pl.* [NL. (Britton, 1901), < *Casuarina* + *-ales.*] An order of dicotyledonous, archichlamydeous plants. It is characterized by monœcious flowers, the staminate, with two sepal-like organs and one central stamen, arranged in terminal spikes or catkins; the fertile, destitute of floral envelops, arranged in short heads at the ends of lateral branchlets. The order is coextensive with the family *Casuarinaceæ*, which contains the genus *Casuarina* only, with about 23 species, chiefly Australa-

sian, but found also in tropical Asia and the Sunda and Mascarene islands. One species, *Casuarina equisetifolia*, has become established in many tropical countries and occurs in peninsular Florida and the Keys.

casuarineous (kas″ū-a-rin′ē-us), *a.* Same as ★*casuarinaceous*.

casuistics, *n.* 2. The record and study of individual cases of disease.

On the *casuistics* of malignant growths of the abdominal cavity. *Phil. Med. Jour.*, Jan. 31, 1903, p. 203.

casuistry, *n.* 3. In *med.*, a recent, rare, and improper use for *casuistics*.

casus (kā′sus), *n.* [L.] In *law*, a chance, an accident, or an event: used frequently with other words to express some technical meaning. —**Casus fœderis.** (*a*) In *international law*, the precise situation, event, or occurrence contemplated by a treaty, stipulated for in a treaty, or made to come within its terms. (*b*) In *commercial law*, that which is contemplated by the parties to a contract, or that which is stipulated for or brought within the terms of the contract.—**Casus fortuitus,** in *civil law*, inevitable accident; an act of God; the happening of an event that could not be foreseen and guarded against by the highest exercise of prudence or care.—**Casus major,** in *civil law*, an extraordinary accident, as shipwreck, fire, etc.—**Casus omissus,** a case not provided for; an event or contingency not covered by a statute on the general subject, and which must be left to be governed by the common law.

caswellite (kaz′wel-īt), *n.* [After John H. *Caswell* of New York.] A copper-red micaceous mineral of bronze-like luster, probably derived from the alteration of biotite: found at Franklin Furnace, New Jersey.

cat[1], *n.* 18. In *medieval warfare*, a machine resembling the pluteus, under the protection of which soldiers worked in sapping walls and fosses.—19. *pl.* In *mining*, burnt clay used for tamping. [Scotch.]—**Bashaw cat,** the long-jawed catfish, *Leptops olivaris*.—**Brown cat,** a species of catfish, *Ameiurus platycephalus*, of the family *Siluridæ*, found in streams of the Carolinas and Georgia.—**Cat's auricle.** See ★*auricle*.—**Chartreuse cat,** a variety of cat said to have been developed by the monks of Chartreuse. It is of a bluish-gray or Maltese color.—**Chinese cat,** a variety of cat with hanging ears.—**Chuckle-headed cat,** the fork-tailed channel catfish, *Ictalurus furcatus*.—**Flat-headed cat,** the mud catfish of Carolina, *Ameiurus platycephalus*.—**Florida cat,** in Florida, the channel catfish, *Ictalurus furcatus*.—**Gay cat,** that member of a bank-burglar gang whose business it is to enter a bank as a crippled beggar, peddler, or the like, in order to ascertain if the bank is protected by burglar-alarms, etc.; a burglar's 'pathfinder.' See ★*yeggman*. [Thieves' cant.]—**Great forktailed cat,** the great catfish of the Lakes, *Ameiurus lacustris*.—**Little yellow cat,** a common name of *Noturus flavus*, a catfish found in the Great Lake region and south and westward to Montana, Wyoming, and Texas.—**Malay cat,** a variety of cat from the Malay Peninsula having a peculiar bend, or kink in the tail as if it had been broken.—**Mississippi cat.** Same as *chuckle-headed* ★*cat*.—**One old cat,** a game of ball in which only a pitcher, catcher, and batsman are necessary, though more may play.—**Opelousas cat,** the long-jawed catfish, *Leptops olivaris*.—**Pied cat.** Same as *Opelousas* ★*cat*.—**Potomac cat,** the common fork-tailed catfish of the Potomac river, *Ameiurus catus*.—**Russian cat.** Same as *Opelousas* ★*cat*.—**Sacramento cat,** the catfish or horn-pout, *Ameiurus nebulosus*, introduced from the Potomac into the Sacramento.—**Schuylkill cat,** the common horn-pout or small catfish of the northeastern United States, *Ameiurus nebulosus*.—**Siamese cat,** a variety of cat said to be bred by the nobility of Siam, of small size, fawn-colored body, and chocolate-colored face and legs. Occasionally the entire animal is chocolate-colored.—**Spanish cat.** Same as *tortoise-shell* ★*cat*.—**Spotted cat.** (*a*) See *spotted*. (*b*) Same as *channel-cat*.—**Thieves' cat,** the cat-o'-nine-tails.—**To let the old cat die,** to let a swing stop of itself: a phrase used by children.—**Tortoise-shell cat,** a variety of cat marbled with black, yellow, and white. Occasionally called *Spanish cat*.—**Yellow cat,** *Ameiurus natalis*, a catfish found from the Great Lakes southward to Texas.

cat[1], *v.* I. *trans.*—**To cat and fish,** to lift (the anchor of a vessel) to the cat-head and draw up its fluke so that the latter rests on the rail or on the anchor-rest.

II. *intrans.* 2. To act after the manner of soft clay or mortar in filling crevices.

Similar lesions cannot be produced by the injection of tuberculin into the lungs of a healthy animal; in animals, it is true, the conditions are different. The tuberculin when injected is rapidly absorbed, and produces generally toxic instead of local lesions. The material which *cats* here is in a state not capable of ready absorption, and must act locally. It represents the soluble products mixed with mucus, possibly with particles of tissue.
Buck, Med. Handbook, VII. 901.

Cat. An abbreviation (*a*) of *Catalan*; (*b*) [*l. c.*] of *catalogue*; (*c*) of *catechism*.

cata. An abbreviation of *catalogue*.

catabasial (kat-a-bā′si-al), *a.* [Gr. *κατά*, down, + *βάσις*, basis (see *basion*), + *-al*[1].] In *anthrop.*, having a skull-base in which the basion is lower under the assumed horizontal than the opisthion.

catabatic (kat-a-bat′ik), *a.* [Gr. *καταβατικός*, < *κατάβασις*, descent: see *catabasis*.] Declining: said of the stage of defervescence of an acute disease.

catabibazon (kat″a-bi-bā′zon), *n.* [Gr. *καταβιβάζων*, ppr. of *καταβιβάζειν*, bring down, cause to go down, < *κατά*, down, + *βιβάζειν*, cause to go, < *βαίνειν*, go: see *basis*.] In *astrol.*, the moon's descending node; the dragon's tail. See *dragon*. *Lilly*.

catabiosis (kat″a-bī-ō′sis), *n.* [NL., < Gr. *καταβίωσις*, passing life, living, < *κατά*, down, + *βίωσις*, mode of life.] In *physiol.*, that property of living substance which enables it to make adjoining cells or structures develop adaptively or in harmony with itself.

catabiotic (kat″a-bī-ot′ik), *a.* Of or pertaining to catabiosis.

catachthonian (kat-ak-thō′ni-an), *a.* [Gr. *καταχθόνιος*, underground, < *κατά*, down, + *χθόνιος*, < *χθών*, the ground: see *chthonic*.] Underground; subterranean.

cataclasm (kat′a-klazm), *n.* [Gr. *κατάκλασμα*, a breakage, < *κατακλᾶν*, break down, break off, < *κατά*, down, + *κλᾶν*, break.] A violent disruption or breaking up. *Southey*.

cataclastic (kat-a-klas′tik), *a.* and *n.* [Gr. *κατακλαστός*, broken (see ★*cataclasm*), + *-ic*.] I. *a.* 1. Of, pertaining to, or resulting from, a cataclasm.—2. In *petrog.*, noting a structure produced in rocks by crushing or shearing, whereby the minerals are broken into fragments. *Kjerulf*.

II. *n.* A fragmental texture in a rock or mineral produced by crushing instead of sedimentation. *Geikie*, Textbook of Geol., p. 135.

cataclinal (kat-a-klī′nal), *a.* [Gr. *κατακλινής*, sloping, + *-al*[1].] Sloping: a descriptive term applied to a dip-slope; that is, a land-surface which follows the dip of the underlying strata. —**Cataclinal valley,** a valley whose course follows the dip of the strata.

cataclysmatic (kat″a-kliz-mat′ik), *a.* Of the nature of a cataclysm; of or relating to the cataclysmists or their theories.

Cataclysmic theory, in *geol.*, a theory promulgated by Cuvier, and generally accepted in the early days of the science, which maintained that "each period in the earth's history is marked by distinctively characteristic faunas and floras; that no species is common to two successive periods; that tremendous convulsions of nature (cataclysms) occurred at the close of each cycle and annihilated the whole organic world; and that by means of special creative acts the renovated earth became time and again populated with new animals and plants which bore absolutely no connection either with previous or with subsequently introduced types." *Zittel* (trans.), Textbook of Paleon., I. i. Also *theory of cataclysms* (which see, under *cataclysm*).

Catacrotic pulse. See ★*pulse*[1].

catacrotism (kat-ak′rō-tizm), *n.* [*catacrot(ic)* + *-ism*.] The occurrence of a catacrotic pulse.

catacumbal (kat-a-kum′bal), *a.* [LL. *catacumba*, catacomb, + *-al*[1].] Of, pertaining to, resembling, or characteristic of, a catacomb. [Rare.]

Catadicrotic pulse. See ★*pulse*[1].

catadicrotism (kat-a-dik′rō-tizm), *n.* [Gr. *κατά*, down, + *δι-*, two-, + *κρότος*, beating, pulse, + *-ism*.] The condition of the pulse in which the descending line of the sphygmographic tracing is broken by an upward notch representing a faint beat following the main pulsation.

catadidymus (kat-a-did′i-mus), *n.*; pl. *catadidymi* (-mī). [NL., < Gr. *κατά*, down, + *δίδυμος*, double.] In *teratol.*, a monster double below but single above.

catadromous, *a.* 2. In *bot.*, having the first set of nerves (in each segment of a fern frond) given off on the basal side of the midrib, as in *Osmunda*. Compare *anadromous* (*b*).

Catætyx (ka-tē′tiks), *n.* [NL.] A genus of deep-sea fishes of the family *Brotulidæ*.

cataforite, *n.* Same as ★*cataphorite*.

catagenetic (kat″a-jē-net′ik), *a.* Of or pertaining to catagenesis.

The *catagenetic* energies tend to the creation of a stable equilibrium. *A. Hyatt*, Biol. Lect., p. 146.

catalase (kat′a-lās), *n.* [Also *katalase*; < *catal(ysis)* + *-ase*.] An oxidation-ferment which decomposes hydrogen peroxid catalytically with the liberation of oxygen.

catalects (kat′a-lekts), *n. pl.* [L. *catalecta*.] A collection of short poems ascribed to Vergil; in general, short pieces or fragments of literature. *Holland*.

catalina (kä-tä-lē′nä), *n.* [Mex. Sp., from the fem. name *Catalina*.] The Mexican name of *Anisotremus tæniatus*, a fish of the Pacific coast allied to the pork-fish of the Atlantic.

catalineta (kä-tä-li-nā′tä), *n.* [Cuban Sp., dim. of the fem. name *Catalina*.] 1. The Cuban name of the striped pork-fish, *Anisotremus virginicus*, of the family *Hæmulidæ*.—2. Any of the fishes belonging to the genus *Holacanthus*.

catallactic (kat-a-lak′tik), *a.* [See *catallactics*.] Pertaining to exchange, or to the science of exchanges.

catalo (kat′a-lō), *n.* [*cat(tle)* + (*buff*)*alo*.] The offspring of a cross between the American bison and domesticated cattle: in common use in the southwestern United States.

Vernon Bailey spoke on 'The Goodnight Herd of Buffaloes and *Cataloes* in Texas,' saying that this comprised fifty buffaloes and about seventy *cataloes*, or crosses between the buffalo and domesticated cattle.
Science, March 6, 1903, p. 386.

catalogd, *pp.* A simplified spelling of *catalogued*.

cataloger, *n.* A simplified spelling of *cataloguer*.

catalogic (kat-a-loj′ik), *a.* Of the nature of or pertaining to a catalogue.

catalogical (kat-a-loj′i-kal), *a.* Same as ★*catalogic*.

catalogistic (kat-a-lō-jis′tik), *a.* Enumerative: as, "the Sankhya, the *catalogistic* philosophy," *W. H. Mill*: so called from its numerical classifications, and the importance attached by Sankhyans to the establishment of their twenty-five principles. See *Sankhya*.

catalogue, *n.*—**Argentine General Catalogue,** a star-catalogue made from observations at the National Observatory of Argentina (at Cordoba), and including stars in all portions of the southern heavens: in distinction to the "zones," catalogues which are limited to certain belts of the celestial sphere.—**Author-catalogue,** a catalogue in which the various works composing a library are arranged alphabetically according to their authors.—**Dictionary catalogue,** a catalogue arranged alphabetically.—**Subject-catalogue,** a catalogue of books or the like arranged according to subjects.—**Systematic catalogue,** a catalogue which is logically arranged.

catalona (kä-tä-lō′nä), *n.* [Philippine Sp., taken as fem. of *catalonan*, which is then treated as masc.: see ★*catalonan*.] Tagalog sorceress or witch.

catalonan (kä-tä-lō′nän), *n.* [Philippine Sp., < Tagalog *catalonan*, a sorceress or witch.] Among the pagan Tagalogs, a sorceress or witch; also (in Spanish use), a male sorcerer or priest.

catalpic (ka-tal′pik), *a.* [*catalpa* + *-ic*.] Pertaining to or derived from the catalpa.—**Catalpic acid,** a crystalline bibasic acid, $C_{14}H_{14}O_8$, found in the unripe seeds of *Catalpa bignonioides*. It melts at 207° C.

catalpin (ka-tal′pin), *n.* [*catalpa* + *-in*[2].] A crystalline glucoside obtained from the seeds and bark of *Catalpa bignonioides*.

catalufa (kä-tä-lō′fä), *n.* [Cuban Sp. use of Sp. *catalufa*, a kind of carpet, = Pg. *catalufa*, a sort of woolen cloth.] A Spanish name of a bright red bass-like fish of the genus *Priacanthus*, known in English as the big-eye.—**Catalufa de lo alto,** a name applied to species of the genus *Pempheris*, deep-water fishes of a red color which bear a superficial resemblance to *Priacanthus*.

catalysotype (kat-a-lis′ō-tīp), *v. t.*; pret. and pp. *catalysotyped*, ppr. *catalysotyping*. Same as ★*catatype*.

catalyst (kat′a-list), *n.* [*cataly(sis)* + *-(i)st*.] In *phys. chem.* Same as *catalytic agent* (which see).

The change, however, does not occur spontaneously, but is undoubtedly dependent on the presence of a *catalyst*, as equilibrium is established with great rapidity if a trace of alkali be added. *Nature*, Sept. 3, 1903, p. 431.

catalytic, *a.* 2. A term applied to evolutionary stages or conditions in which organisms are degenerating toward sterility, as a result either of too wide cross-breeding or of too narrow inbreeding. Aberrant or mutative hybrids and abrupt mutative variations or sports appear in the catalytic stages. Compare ★*dialytic*, 4, ★*hemilytic*, and ★*prostholytic*. *O. F. Cook*.

II. *n.* Same as *catalytic agent*.

catalyzator (kat″a-li-zā′tor), *n.* [*catalyze* + *-ator*.] A substance which acts catalytically, causing by its presence chemical changes while apparently remaining itself unchanged: a catalytic agent. Also *catalysator*.

Free hydrogen-ions are therefore without doubt exceedingly active *catalysators* of a general character.
Smithsonian Rep., 1893, p. 237.

catalyze (kat′a-līz), *v. t.*; pret. and pp. *catalyzed*, ppr. *catalyzing*. [Also *catalyse*; < *catalysis* (cf. *analyze*).] In *phys. chem.*, to act upon by catalysis: said of a substance which accelerates a chemical reaction while it is itself left unchanged at the end of the reaction.

. . . the prevalent view that an enzyme acts as a *catalyzing* agent and that the action of a catalyzer is the formation

of a labile intermediate product which instantly decomposes, restoring the catalyzer to its original condition. *Science*, April 3, 1903, p. 338.

catalyzer (kat′ạ-lī-zẽr), *n.* In *phys. chem.*, a catalytic agent; a catalyzator.

Measurements were made of the effect of *catalyzers* on the formation of C_6H_5Cl and $C_6H_6Cl_6$ from benzene and chlorine. *Jour. Phys. Chem.*, May, 1904, p. 373.

catamaran, *n.* **4.** In *lumbering*, a small raft carrying a windlass and grapple, used to recover sunken logs. [U. S.]

Catamblyrhynchidæ (kat-am-bli-ring′ki-dē), *n. pl.* [NL., < *Catamblyrhyncus* (< Gr. *κατά*, down, + *ἀμβλύς*, blunt, + *ῥύγχος*, snout, beak) + *-idæ.*] A family of South American passerine birds related to the sparrows.

catan (kä-tän′), *n.* [Philippine Sp. *catán* (Morga), < Jap. *katana*, a sword, a knife.] A kind of Japanese or Chinese cutlas.

catapetasma (kat″ạ-pe-taz′mạ), *n.* [Also *katapetasma;* < Gr. *καταπέτασμα*, a veil, < *καταπετανύναι*, spread out, < *κατά*, down, + *πετανύναι*, spread out.] **1.** In the *Gr. Ch.*, the veil or curtain of the holy doors.—**2.** The veil which is used in Oriental churches to cover the chalice and paten.—**3.** In the *Gr. Ch.*, the veil which is hung on the canopy standing over the altar.

cataphebe (kat′ạ-fēb), *n.* [Origin unknown.] *Hypoplectrus unicolor*, a serranoid fish of the West Indies. Also called *vaca.*

cataphoresis (kat″ạ-fō-rē′sis), *n.* [NL., < Gr. *καταφορεῖν*, carry down, < *κατά*, down, + *φέρειν*, carry.] The action of conveying something downward or through something else; specifically, electrical endosmosis, especially electric endosmosis employed to cause medicinal substances (such as cocaine, quinine, or the like) to pass through or into living tissues in the direction of flow of a positive electric current, or from the anode to the cathode. See *endosmosis.*—**Anemic cataphoresis,** cataphoresis in which the action of the remedy is limited to the seat of application, in consequence of the temporary arrest of the blood-supply to the part.

cataphoretic (kat″ạ-fō-ret′ik), *a.* [*cataphoresis* (*-ret-*) + *-ic.*] Pertaining to or of the nature of cataphoresis; cataphoric.—**Cataphoretic demedication,** the withdrawal of foreign material from the tissues by cataphoresis.—**Cataphoretic medication,** the impregnation of the tissues of a part with any material by cataphoresis.

cataphoria (kat-ạ-fō′ri-ạ), *n.* [NL., < Gr. *καταφορος*, bearing or going down, < *καταφορεῖν*, bear down, < *κατά*, down, + *φέρειν*, bear.] Inclination of the visual axis below the horizontal plane.

cataphoric, *a.* **2.** Relating to ★cataphoresis, to ★cataphoria. See these words.

The *cataphoric* electrode, covered with a thickness of lintine, or similar material saturated with adrenalin, is connected with the positive pole of the battery, or other electric source. *Med. Record*, March 7, 1903, p. 363.

cataphorite (ka-taf′ō-rīt), *n.* [Gr. *κατάφορος*, bearing or going down, + *-ite*[2].] An alkali-iron amphibole near barkevikite, first described from Norway. Also written *kataphorite.*

cataplasis (ka-tap′lạ-sis), *n.* [NL., < Gr. *κατά*, down, + *πλάσις*, < *πλάσσειν*, form, mold.] In *evolution*, the stage of the decline or decadence of an organic type, in distinction from the stage of its rise (*anaplasis*) and the stage of its full vigor (*metaplasis*). *Haeckel.*

catapophysial (kat″ạ-pō-fiz′i-ạl), *a.* [*catapophysis* + *-al.*] Of or pertaining to a catapophysis.—**Catapophysial canal,** in *ornith.*, the canal on the ventral face of the cervical vertebræ, bounded by the catapophyses and containing the carotid artery. *Proc. Zool. Soc. London*, 1901, I. 370.

catapophysis (kat-ạ-pof′i-sis), *n.*; pl. *catapophyses* (-sēz). [NL., < Gr. *κατά*, down, + *ἀπόφυσις*, an outgrowth, a process.] **1.** In *anat.*, any process, usually of bone or of brain tissue. Also called *hypapophysis.*—**2.** One of a pair of processes developed on the sides of the ventral face of the cervical vertebræ in birds. They vary in size from a slight projection near the base of a transverse process to a long incurved process that almost or quite meets its fellow of the opposite side to form the catapophysial canal. On the posterior cervicals the catapophyses may be moved downward on to the hypapophysis. *Proc. Zool. Soc. London*, March, 1899, p. 406.

Catapult fruit. Same as ★*ballistic fruit.*

catapult (kat′ạ-pult), *v.* **I.** *trans.* **1.** To hurl, as a missile, as from a catapult.

At last . . . the throne itself was *catapulted* into the square, and the last symbol of royalty reduced to a heap of ashes. *Blackwood's Mag.*, LXIII. 499.

2. To shoot at with a catapult: as, to *catapult* **birds.**

II. *intrans.* To use a catapult in hurling missiles.

cataract, *n.* **7.** In *mech.*, a device for regulating the number of strokes per minute in a Cornish pumping-engine, in which the velocity of a falling weight, or a spring-weighted piston, is governed by the flow of water through a variable opening, whose cross-section can be controlled at will, so that the period of the stroke or the interval between strokes can be made longer or shorter.—**Black cataract,** opacity of the crystalline lens discolored by the absorption of pigment from the blood.—**Cortical cataract,** opacity of the crystalline lens beginning at the margin and extending toward the center.—**Diabetic cataract,** a cataract occurring prematurely in one suffering from diabetes.—**Glacier cataract,** an abrupt precipitous descent in the course of a glacier, analogous to a cataract in a river. *Dana*, Manual of Geol., 4th ed., p. 238.—**Lamellar cataract.** Same as *zonular cataract* (which see, under *zonular*).—**Senile cataract,** a hard opacity of the lens-nucleus of the eye, occurring not infrequently in the aged.—**Soft cataract,** a cataract of the eye in which the opaque lens is of semi-fluid consistency, as happens when the opacity occurs before the nucleus of the lens has formed.—**Zonular cataract.** See *zonular.*

cataract (kat′ạ-rakt), *v.* **I.** *intrans.* To form cataracts.

II. *trans.* To pour, like a cataract.

My poems have been reviewed. The Monthly has *cataracted* panegyric on me; the Critical cascaded it, and the Analytical dribbled it with civility. *Coleridge*, Letter in Sup. Biographia Literaria, II. 739.

cataract-box (kat′ạ-rakt-boks), *n.* A dashpot; a damper or retarder in the form of a piston which must move a liquid whenever it changes position. The movement of the liquid through an orifice of adjusted size determines the rate at which the piston moves.

cataract-knife (kat′ạ-rakt-nīf″), *n.* A knife for section of the cornea in operations for cataract: it is so shaped as to prevent the escape of the aqueous humor while the incision is being made and the knife remains in the wound.

cataract-lens (kat′ạ-rakt-lenz), *n.* A powerful spectacle-lens used after an operation for cataract.

cataract-needle (kat′ạ-rakt-nē″dl), *n.* A fine steel rod, set in a handle, with a pointed or lance-shaped extremity: used to disintegrate a lenticular cataract and so promote its absorption.

catarinite (kat′ạ-rin-īt), *n.* See ★*meteorite.*

catarrh, *n.*—**Acute nasal catarrh,** coryza.—**Atrophic nasal catarrh,** chronic inflammation of the nasal mucous membrane leading to atrophy: usually the underlying condition of ozæna.—**Autumnal catarrh,** hay-fever.—**Bronchial catarrh,** bronchitis.—**Epidemic catarrh,** influenza.—**Gastric catarrh,** simple inflammation of the mucous membrane of the stomach.—**Lightning catarrh,** a severe and rapidly developing nasal catarrh.—**Nasal catarrh.** Same as *coryza* (acute form) and *ozæna* (chronic fetid form).—**Russian catarrh,** influenza.—**Suffocative catarrh,** capillary bronchitis.—**Vernal catarrh,** a form of conjunctivitis which prevails in the spring.

catarrhal croup, gastritis, jaundice. See ★*croup*[1], *gastric* ★*catarrh,* ★*jaundice.*

Catasetum (kat-ạ-sē′tum), *n.* [NL. (L. C. Richard, 1822).] A genus of plants of the family *Orchidaceæ*, several species of which are grown in choice collections. They have globose expanded flowers and plaited membranaceous leaves; the flowers are in racemes, and the columns are provided with sensitive appendages which, when touched, cause the pollen-masses to fly out. There are some 30 species in the American tropics, either terrestrial or epiphytic. *C. Bungerothi, C. macrocarpum, C. discolor,* and others are under cultivation. They require a high temperature.

catasta (ka-tas′tạ), *n.* [L., a corruption of Gr. *κατάστασις*, a setting down: see *catastasis.*] **1.** A stage or block on which slaves were formerly exposed for sale.

She will be taken to Rome, and sold as a slave. And in spite of a few discomforts in the transfer, and the prejudice . . . against standing an hour on the *catasta* to be handled from head to foot in the minimum of clothing, she will most probably end in being far better housed. *Kingsley*, Hypatia, xiii.

2. A bed or rack of torture.—**3.** An obsolete English name for the stocks.

catastrofe, *n.* A simplified spelling of *catastrophe.*

catastrophal (kạ-tas′trō-fạl), *a.* Same as *catastrophic.*

catastrophical (kat-ạs-trof′i-kạl), *a.* Same as *catastrophic.*

catastrophically (kat-ạs-trof′i-kạl-i), *adv.* In a catastrophic manner; with the suddenness and the disastrous effect of a catastrophe.

catasyllogism (kat-ạ-sil′ō-jizm), *n.* [ML. *catasyllogismus* (cf. Gr. *κατασυλλογίζεσθαι*, have a conclusion drawn against one), < Gr. *κατά*, down, + *συλλογισμός*, syllogism.] A syllogism by which the principal contention of an opponent is absolutely refuted from premises supplied by him. Eisler attributes the introduction of the term to John of Salisbury; but, in fact, Boethius has it, the corresponding infinitive having been used by Aristotle in the nineteenth chapter of the second "Prior Analytics."

catatasis (kat-at′ạ-sis), *n.* [NL., < Gr. *κατάτασις*, stretching, straining, extension, < *κατατείνειν*, stretch, strain, draw tight, < *κατά*, down, + *τείνειν*, stretch.] Extension employed in the reduction of a dislocation or of the deformity attending fracture of one of the long bones.

catatonia, *n.* See *katatonia.*

catatonic, *a.* See ★*katatonic.*

catatrichrotism (kat-ạ-trik′rō-tizm), *n.* [Gr. *κατά*, down, + *τρι-*, three-, + *κρότος*, a beating, clapping (pulse), + *-ism.*] A condition of the pulse in which the descending line of the sphygmographic tracing is broken by two upward notches representing two faint beats after the main pulsation.

catattut (kä-tä′tōt), *n.* [Said to be a native name in Amboina.] The cocoanut crab, *Birgus latro.*

catatype (kat′ạ-tīp), *n.* [Also *katatype;* < Gr. *κατά*, down, + *τύπος*, type.] In *photog.*, a print made from a negative without the aid of light, but by the use of a chemical catalyzer or accelerator. Ostwald and Gros of Leipzig found that by flowing a negative with an ethereal solution of hydrogen peroxid the peroxid is instantly decomposed more or less completely wherever it comes in contact with the silver of the film, which acts as a catalyte, and on the evaporation of the resulting water leaves on the plate an invisible picture in unaltered peroxid which is densest where the negative is least dense, and is therefore a positive. The negative is next pressed on paper flowed with ferrous sulphate, which is then washed and developed by gallic acid to produce a dark-violet picture in writing-ink. Other chemicals, as manganese salts, may be used instead of the iron solution. A similar process is employed for the production of gelatin plates for printing in lithographic ink. *Sci. Amer.*, Nov. 28, 1903, p. 382.

catatypic (kat-ạ-tip′ik), *a.* [*catatype* + *-ic.*] In *photog.*, of or pertaining to a catatype, or to the process of inducing chemical change without the use of light.

catatypy (kat′ạ-tī-pi), *n.* [*catatype* + *-y*[3].] In *photog.*, a printing process which utilizes the chemical agents which act as does light to accelerate changes of a chemical character. See ★*catatype. Sci. Amer. Sup.*, Aug. 1, 1903, p. 23,055.

catavertebral (kat-ạ-vėr′tē-bral), *a.* [Gr. *κατά*, down, + E. *vertebral.*] Situated below the centrum of the vertebræ.—**Catavertebral element,** in *ichth.*: (*a*) One of the bones attached to the sides of the vertebræ, usually surrounding the abdominal cavity. (*b*) The hemapophysis, or arch below the centrum of the vertebræ.

catawampous (kat-ạ-wom′pus), *a.* [A made word, from *cata-* + *wamp-*, vaguely imitative (cf. *wap, whop*), + *-ous.*] Fierce; voracious; devouring; destructive. [Slang, U. S.].

catberry (kat′ber′i), *n.* **1.** The mountain holly, *Nemopanthes mucronata.*—**2.** The wild gooseberry.

catbird, *n.* **2.** An Australian name of members of the genus *Ælurœdus:* so called on account of the resemblance of their notes to the calls of a cat.

The *cat-bird* (*Ælurœdus maculosus*) which makes its appearance towards evening, and has a voice strikingly like the mewing of a cat. *C. Lumholtz*, Among Cannibals, vii.

catch[1], *v. i.* **8.** In *agri.*, to germinate and grow, as a crop: as, the wheat will *catch* if the seed and season are good and the land well prepared.—**To catch and bowl,** in *cricket*, to bowl the ball to a batsman and catch him out on the hit: said of the bowler.

catch[1], *n.* **13.** In *agri.*, the extent or condition of the germination of a crop: as, a good *catch* of clover; if a good *catch* continues to thrive it will result in a good stand.—**14.** In *lock-making*, a small lock-case containing a sliding bolt but having no key. The beveled- or latch-bolt is kept in an extended position by a spring or by gravity, and is controlled by a knob which slides in a slot in the case.—**Dolly catch,** a ball mis-hit by the batsman, which goes slowly in the air to one of the fielders; an apparently easy catch. [Cricket slang.]—**Fair catch,** in *foot-ball*, a ball so caught as to entitle the catcher's side to a free kick.—**Holding-out catch,** a device attached to a spinning-mule for retaining the carriage in position at the end of its outward run.—**Knocking-off catch,** a tappet; stop; trip; part of a machine used to strike another piece at a particular time in its travel, so as to operate a stop or reverse.

catch-block (kach′blok), *n.* A block having teeth which engage with teeth on another part of the mechanism to form a temporary connection: sometimes used on the valve-gear of certain automatic cut-off engines.

catch-bolt, *n.* 2. The pin or bolt on the valve-arm of the admission-valve of a Corliss engine which is caught by the crab or claw.

catch-boom (kach'bōm), *n.* A boom fastened across a stream to catch and hold floating logs.

catch-box (kach'boks), *n.* A clutch in which one element enters a box-like cavity and is there caught by projections which cause one part to drive the other. *Nasmith,* Cotton Spinning, p. 320.

catch-cropping (kach'krop-ing), *n.* The employment of a catch crop in a system of fallowing. See *catch* ★*crop.*

catch-fake (kach'fāk), *n. Naut.,* an accidental turn or tangle in a poorly coiled rope.

catch-pan (kach'pan), *n.* A pan, usually of thin sheet-metal, placed under a machine to catch the oil or water which drips from it.

catch-pawl (kach'pâl), *n.* A swinging catch provided on a winch to hold the crank-shaft endwise in either of its two possible positions. Also used to hold the feed-shafts of some machines in either the ahead or the reverse position.

catch-piece (kach'pēs), *n.* A stop; a buffer; a spring-bumper used to limit the stroke of a Cornish pump.

catch-pit (kach'pit), *n.* A pit or depression in which water is collected; a deep catch-basin.

The late Devonian subsidence then culminated in the formation of a profound *catchpit,* where sank the coarse sand and pebbles. *Amer. Geol.,* Aug., 1903, p. 104.

catch-plate (kach'plāt), *n.* 1. A plate or block so placed as to be caught by a claw when the latter reaches a certain position. Such a part is used on many forms of tripping-valve gear.—2. A small face-plate used on a lathe to carry a pin which engages a straight-tailed dog and so drives the piece to be turned.

catch-rack (kach'rak), *n.* A form of straight-toothed rack into the teeth of which a wheel may be slid from the side, so that the teeth engage and the wheel drives the rack, or the reverse.

catch-rod (kach'rod), *n.* A horizontal connecting-rod; part of the arrangement for holding the carriage of a spinning-mule in position when at the end of its outward run.

catch-siding (kach'sī-ding), *n.* A siding along a steep railway grade so placed as to catch runaway cars. [Eng.]

catch-station (kach'stā-shọn), *n.* A railroad way-station where mail-pouches are dropped from passing trains.

catchwater, *n.* 2. In *phys.,* a conical receiver placed beneath a bulb, flask, or other vessel to catch the water which is condensed upon its outer surface. *M. W. Travers,* Exper. Study of Gases, p. 33.

catch-wheel (kach'hwēl), *n.* A ratchet-wheel; a wheel having a catch to prevent it from turning in one direction.

Catchword entry, an entry of a book in a library-catalogue by some prominent word in the title which can be easily remembered and which will readily catch the eye of a reader who is not quite certain of the exact title.

catchwork, *n.* 2. Any mechanical appliance used to arrest motion by means of ratchets, pawls, dogs, and friction gripping-surfaces. Such are elevator safety-appliances which come into action when cables break, overwinding safety-devices in collieries, pile-driving weight-clutches, and the like.

catchy (kach'i), *a.* Same as *catching,* 2. [Colloq.]

cat-crane (kat'krān), *n. Naut.,* an overhanging iron beam stepped like a boat-davit, situated on the forecastle. It takes the place of a cat-head in catting the anchor.

cat-davit (kat'dav″it), *n.* Same as ★*cat-crane.*

catechesis (kat-ē-kē'sis), *n.* [LL. *catechesis,* < Gr. *κατήχησις,* oral instruction, < *κατηχεῖν,* teach by word of mouth: see *catechism.*] 1. Oral instruction given in the early church to candidates for baptism. It consisted of lectures or addresses, chiefly on the ten commandments, the Apostles' Creed, and the Lord's Prayer, and formed a kind of outline or summary of Christian doctrine.

2. A book prepared for such instruction, as the sixteen books of catechetical discourses by Cyril of Jerusalem.

Specimens of these addresses and their contents are preserved in the *Catechesis* of Cyril of Jerusalem (315–386 A. D.). *Riddle,* Christian Antiquities, p. 460.

catechin, *n.*—**Diamine catechin B** and **G,** two direct cotton coal-tar colors of unpublished composition which dye unmordanted cotton brown in a salt bath. An after-treatment with potassium bichromate or copper sulphate renders the brown faster.

catechizable (kat'ē-kī″za-bl), *a.* That may be catechized or instructed catechetically: as, *catechizable* persons.

catechol (kat'e-chōl), *n.* Same as ★*pyrocatechol* or ★*pyrocatechin.*

catechu, *n.* It is used extensively in cotton-dyeing, under the name of *cutch,* for the production of tan shades. It consists chiefly of two principles, catechu-tannic acid, and catechin or catechuic acid, which are accompanied by a brown amorphous substance called *japonic acid.* Japonic acid is the final oxidation-product of catechuic acid, and catechu-tannic acid is an intermediate oxidation-product. *Bombay catechu,* obtained from the heart-wood of the catechu palm, *Areca Catechu,* is considered the best quality for dyeing purposes; its principal constituent is catechu-tannic acid. *Bengal catechu,* obtained from the pods and twigs of the acacia, is less soluble than Bombay catechu. *Cube catechu* is the same as *gambier catechu,* which is a product of the leaves of *Ouronparia Gambier* and is sold in the form of yellow cubes.—**Catechu brown.** See ★*brown.*—**Terra catechu.** Same as *catechu.*

catechumenism (kat-ē-kū'men-izm), *n.* The system of instruction and discipline preparatory to the reception of baptism.

catechumenize (kat-ē-kū'me-nīz), *v. t.*; pret. and pp. *catechumenized,* ppr. *catechumenizing.* [*catechumen* + *-ize.*] To instruct in the doctrines and practices of the church in preparation for baptism.

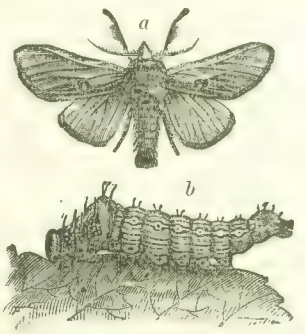
catechumenship (kat-ē-kū'men-ship), *n.* The state of being a catechumen.

catechu-tannic (kat″e-chō-tan'ik), *a.* Pertaining to catechu and tannin.—**Catechu-tannic acid,** a tannin, $C_{13}H_{12}O_5$, found in catechu and forming about one half its weight. See ★*catechu.*

categoric (kat-ē-gor'ik), *a.* and *n.* Same as *categorical.*

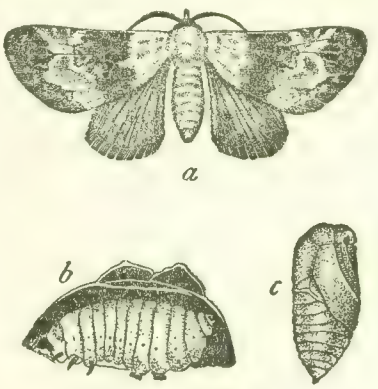
categorico-alternative (kat-ē-gor″i-kō-al-tėr'-nā-tiv), *a.* Having for its premises an alternative proposition and a categorical proposition which denies one of the members of the former. The term was introduced in 1890 by E. E. Constance Jones. A categorico-alternative inference is what is ordinarily called a *disjunctive syllogism.*

category, *n.* 1. The categories are those general concepts or ideas which mark the most fundamental distinctions. Such are those of different attitudes of thought which may, or may not, be supposed to correspond to differences in things, regardless of how anybody thinks. The different schemes of categories that are influential in philosophy may be classified according as they make divisions into two, three, four, or more members. Of dualistic, or dyadic, schemes, those which distinguish two modes of thought have never been successfully attacked; especially the distinction between affirmation and negation, under which head are to be ranged a multitude of dyadic distinctions, such as the *true* and the *false,* the *good* and the *bad.* Other dyadic distinctions of fundamental importance depend upon special metaphysical theories, such as the distinction of *body* and *soul.* Still others are open to doubt on the ground that one of the two members may be a name for a heterogeneous collection, such as the distinction of *things* and *thought,* where, under 'thought, there may be included both physical phenomena and general agencies, not in themselves phenomena and yet not things. Of triadic systems of categories, the most remarkable is that of Hegel, which very few students now accept in all its details, but which is marked throughout by profound analyses. Hegel's governing idea is a philosophical unitarianism. As soon as he finds himself forced to admit that absolute reality involves a rational element, this unitarianism compels him to deny that there is any other element but rationality in it. Accordingly, he affirms that the real is the rational, and the rational is the real. Thence (largely influenced by experiments) he is led to believe that any abstract idea, allowed to brood over itself, will hatch out of itself a flat denial of itself; and from the struggle between the two is generated a more complex or involved conception nearer to the very reality. This he not only asserts in general terms, but he boldly attempts to give an actual epitome of the evolution of reality out of the barest abstraction of thought, marking the stages at which thought makes its chief halts. The concepts which mark those halts are called by Hegel the *categories.* Of course the list will be fuller or more meager according to the degree of detail with which the march of thought is described. As given by him, it falls into triads. He sometimes seems to speak as if this triadic character were merely a feature of the style of description, but he must have thought that the different conceptions were of three kinds, which he might well enough have called categories of another order. In his list are: *quality, quantity, measure; essence* (as reason of existence), *appearance, actuality;* the *subjective concept,* the *object,* the *idea;* etc. A large number of triads of categories have been signalized at different times. Such are: *beginning, middle, end; body, spirit, soul; matter, energy, consciousness; substance, attribute, relation; objects, events, relations* (B. Erdmann); *time, space, causality* (Paul Deussen); *identity* in *diversity, similarity* in *otherness, unity of whole and parts* (E. E. Constance Jones), etc. Schelling and others have advocated quadrate schemes of categories. Other notable lists of categories are: J. S. Mill's "things denoted by names," which are *feelings, substances, qualities, relations, quantity;* H. A. Aikins's five fundamental relations, *individual identity, subject and attribute, causal relations, non-causal relations between different things, thought and its object;* Herbert Nichols's categories, *quality, quantity, changeableness, lawfulness, presentativeness, personality.*



catelectrotonically (kat″ē-lek-trō-ton'i-kal-i), *adv.* In a catelectrotonus manner. *Buck,* Med. Handbook, III. 780.

catenoid (kat'ē-noid), *a.* and *n.* [L. *catena,* a chain, + Gr. *εἶδος,* form.] I. *a.* Chain-shaped; catenary. A catenoid colony of *Protozoa* is such as would arise from the union of cells end to end, or side to side, or through the continuous division of cells in one plane.

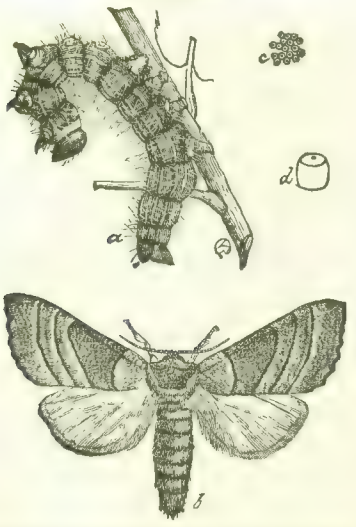


II. *n.* The surface of revolution of the catenary. Meusnier found (1776) that every minimal surface of revolution is the catenoid.

catenulate, *a.* 3. In *zoöl.,* same as *catenate. Annals and Mag. Nat. Hist.,* May, 1903, p. 452.

caterpillar, *n.* **Black caterpillar,** the larva of a European saw-fly, *Athalia spinarum,* known as the *turnip saw-fly.* The larvæ are also known as *blacks, black palmers,* and *niggers.* They feed on turnip, charlock, and mustard.—**Blue-spangled peach-tree caterpillar,** a velvety-black caterpillar, with an orange stripe along the back and steel-blue warts, the larva of the arctiid moth *Haploa colona* or *fulvicosta,* which feeds upon the foliage of peach and other rosaceous fruit-trees in the eastern United States.—**Bulrush caterpillar.** Same as ★*plant-caterpillar.*—**Geometric caterpillar,** any one of very many larvæ of the lepidopterous family *Geometridæ,* which, lacking abdominal prolegs, move with a looping motion as though measuring the surface over which they walk.—**Harlequin caterpillar,** the larva of an American arctiid moth, *Euchætes egle,* which is found commonly on milkweed and is clothed with tufts of orange, black, and white hair.—**Hedgehog caterpillar,** the larva of an arctiid moth, *Isia isabella:* also called *woolly bear.*—**Hickory horned-devil caterpillar.** See *walnut-moth.* Also called *royal horned walnut-caterpillar.*—**Moth-borer caterpillar,** a name used by the planters in the British West Indies for the larva of the sugar-cane borer-moth, *Diatræa saccharalis. Nature,* Sept. 3, 1903, p. 423.—**Orange-dog caterpillar,** the larva of an American papilionid butterfly, *Papilio thoas,* found commonly on citrus-trees in Florida and Louisiana and also in Mexico and Central America.—**Processionary caterpillar.** (*a*) See *processionary.* (*b*) The larva of an Australian lymantriid moth, *Teara melanosticta,* which forms in columns like the European *Cnethocampa processionea.*—**Red-humped apple-tree caterpillar,** the larva of a notodontid moth, *Schizura concinna.* It feeds on the leaves of the apple, pear, and other rosaceous trees. Its body is longitudinally striped with slender white, black, and yellow lines, the head is coral-red, and there is a coral-red hump on the back of the fourth segment, whence the popular name.—**Scale-caterpillar,** the larva of any phycitid moth which feeds on scale-insects, as the European *Erastria scitula,* whose larva preys on the black scale and which has been imported into California, and the American *Lætilia coccidivora,* whose larva feeds on the cottony maple-scale.—**Vegetable caterpillar,** a name applied to certain species of *Cordyceps* which grow upon caterpillars. See *Cordyceps* and *caterpillar-fungus.*

Red-humped apple-tree caterpillar (*Schizura concinna*). *a*, moth; *b*, caterpillar. Natural size.



Scale-caterpillar (*Erastria scitula*). *a*, moth; *b*, larva in case; *c*, pupa. (All more than twice natural size.) (After Riley, U. S. D. A.)

H. Hill publishes a historical and descriptive account of this fungus which has been called the *vegetable caterpillar.* It is found all over the North Island of New Zealand. The author has not been able to determine the species of caterpillar attacked by the fungus, and his attempts to germinate the spores on other caterpillars have been as yet unsuccessful.

Jour. Roy. Micros. Soc., Feb., 1903, p. 69.

Wheat false caterpillar, the larva of an American saw-fly, *Dolerus arvensis.*—**Yellow-necked apple-tree caterpillar,** the larva of a notodontid moth, *Datana minis tra.* It feeds gregariously on the leaves of the apple, and

Yellow-necked Apple-tree Caterpillar (*Datana ministra*). *a*, caterpillar; *b*, moth; *c* and *d*, eggs, natural size and enlarged.

has other food-plants as well. The body is longitudinally striped with black and yellow, except the neck, which is uniformly orange-yellow. The head is black.

caterpillar-fern (kat'ėr-pil-ạr-fėrn), *n.* See ★*fern*[1].

caterpillar-hunter, *n.*—**Green caterpillar hunter,** an American predatory carabid beetle, *Calosoma scrutator,* of a metallic green color. See *Calosoma,* with cut.

cateye (kat'ī), *n.* A scorpænoid fish, *Helicolenus madeirensis,* found in Madeira. Also *boca negra.*

cat-face (kat'fās), *n.* In *forestry,* a partly healed-over fire-scar on the stem of a tree. [U. S.]

cat-faced (kat'fāst), *a.* **1.** Full of knots: applied to sawn timber.—**2.** An opprobrious or contemptuous epithet used in the north of England. [Slang.]

catfish, *n.* **7.** In Victoria and New South Wales, a fresh-water fish, *Copidoglanis tandanus.* It inhabits the rivers of the Murray system, but not those of the center of the continent. Also called *eel-fish* and *tandan.* In Sydney the same name is applied also to *Cnidoglanis megastoma.*—**Bermuda catfish.** Same as ★*rabbit-fish,* 4 (of Madeira).—**Electric catfish,** *Malapterurus electricus,* a catfish found in the Nile, having the power of giving an electric shock. The electric organ is said to extend over the entire body.

cat-flea (kat'flē), *n.* See *Pulex.*

cat-fluke (kat'flōk), *n.* A trematoid worm, *Opisthorchis felineus* (Rivolta, 1884), from 8 to 13 millimeters long, found in the liver in cats, dogs, and men, and producing Siberian opisthorchiasis.

cat-foot (kat'fůt), *adv.* With silent foot, as a cat; in the manner of a cat; stealthily; [Prov.]

He [a bear] catches the dinin'-room deserted . . . an' goes romancin' over, *catfoot* and surreptitious, an' cleans up the tables. *A. H. Lewis,* Wolfville Nights, xv.

catgut, *n.*—**Chromic (or chromicized) catgut,** catgut impregnated with chromic acid, in consequence of which it is less quickly absorbed when used for sutures or ligatures in surgical operations.—**Iodized catgut,** catgut steeped in iodine whereby it is rendered aseptic and less readily absorbable.

Cath. An abbreviation (*b*) of *cathedral.*

cathamma (ka-tham'ạ), *n.*; pl. *cathammata* (ạ-tạ). [NL., < Gr. *κάθαμμα,* a knot, < *καθάπτειν,* fasten, < *κατά,* upon, + *ἅπτειν,* touch, fasten.] In *zoöl.,* a place at which the dorsal and ventral walls of the umbrella are grown together, as in certain jellyfishes.

cathammal (ka-tham'ạl), *a.* [*cathamma* + *-al*[1].] **1.** Relating to a cathamma.—**2.** Of or pertaining to rudimentary endoderm. The layer of degenerated endoderm which persists in some medusæ, in areas where the endodermal canal-system has been obliterated, is termed a *vascular lamella* or *cathammal plate.*

Catharistic (kath-ạ-ris'tik), *a.* Of or pertaining to the Catharists (which see); puritanical.

catharsis, *n.* **2.** Used in English to express whatever Aristotle is supposed to have meant by the same word. But he has been understood in five different ways. A passage of his "Poetics" to which we are referred in his "Politics" for the full explanation of his meaning does not appear in the "Poetics," as extant. The word was applied in Greek to the ritual purification of temples, etc. Plato and Xenophon (the latter using only the adjective *καθαρός,* clean), both disciples of Socrates, use it to mean a clarification of the mental induced by dying and even at the near approach of death. Aristotle means by his phrase *κάθαρσις τῶν παθημάτων* (often translated 'a purging of the passions') a mental effect of the contemplation of works of high art, especially of the choral but severely simple and solemn Greek tragedies. He has been supposed to mean a cleansing from sin; but it is certain that he does not mean this or any strictly moral effect. On the other hand, he was of a medical family, and himself compares *catharsis* to the effect of a cathartic. He probably means the brightening and clearing of the emotional state by relieving the thoughts of the burden of sordid cares and of sensual desires; and something like this is now usually understood by the word.

cathartic, *a.*—**Compound cathartic pills.** See ★*pill*[3].

cathartin (ka-thär'tin), *n.* [*cathart-ic* + *-in*[2].] **1.** A name once given to a mixture of substances obtained from senna.—**2.** A bitter substance found in buckthorn berries, *Rhamnus cathartica.*

cathartogenin (kath-är-toj'e-nin), *n.* [*cathart-ic* + *-gen* + *-in*[2].] Same as *cathartic acid.*

cat-head, *n.* **4.** An attachment to a lathe to assist in supporting long bars when they are being turned. It is a ring having set-screws that bind the work, when not circular, and hold it in a ★centering-rest (which see).

cathedralesque (ka-thē-drạ-lesk'), *a* Cathedral-like: as, *cathedralesque* churches.

cathedralism (ka-thē'drạl-izm), *n.* The system that arises from the administration and regulations of a diocese.

cathedralist (ka-thē'drạl-ist), *n.* **1.** An advocate or supporter of cathedralism.—**2.** A clergyman attached to a cathedral church.

cathedralized (ka-thē'drạl-īzd), *p. a.* Converted into a cathedral: as, a *cathedralized* church.

cathedratically (kath-ē-drat'i-kạl-i), *adv.* With the authority of one who speaks *ex cathedra;* authoritatively.

catheter, *n.*—**Elbowed catheter,** a catheter with an angular bend near the tip: used in cases of enlarged prostate.—**Female catheter,** a short, nearly straight catheter for passage into the female bladder.—**Prostatic catheter,** a catheter with a wide curve, employed in certain cases of enlarged prostate.

catheterostat (kath-e-ter'ō-stat), *n.* [Gr. *καθετήρ,* catheter, + *στατός,* < *ἱστάναι,* place, stand.] A receptacle for holding and sterilizing catheters. *Buck,* Med. Handbook, II. 754.

cathetometric (kath-e-tō-met'rik), *a.* Of, pertaining to, or obtained by means of a cathetometer.

cathion (kath'i-on), *n.* An erroneous form of *cation.*

Cathode photograph. Same as *sciagraph,* 2.—**Cathode photography, rays.** See ★*photography,* ★*ray*[1].—**Cathode streams.** Same as *cathode* ★*rays.*

cathodic, *a.* **2.** Of or pertaining to the cathode: as, the *cathodic* discharge in a vacuum-tube. Also spelled *kathodic.*—**Cathodic dark space,** the dark space in a vacuum-tube traversed by the electric discharge which surrounds the cathode. See *Crookes's* ★*space.*

cathodograph (ka-thō'dō-gråf), *n.* [*cathode* + Gr. *γράφειν,* write.] A photograph taken with the X-rays. See ★*ray*[1].

cathodography (kath-ō-dog'rạ-fi), *n.* [*cathodograph* + *-y*[3].] The taking of sciagraphs by means of the Röntgen, or X-, or cathode rays.

cathodo-luminescence (ka-thō'dō-lū-mi-nes'ens), *n.* A phosphorescent or fluorescent glow excited by the action of cathode rays. See ★*luminescence.*

cathography (ka-thog'rạ-fi), *n.* An erroneous form for ★*cathodography.*

Catholic Epistles, a title given to a group of seven epistles in the New Testament, namely, the first and second epistles of Peter, the first, second, and third of John, and those of James and Jude. The term 'catholic' probably refers to the destination of the epistles as encyclical letters, addressed to the church universal or to scattered readers. —**Christian Catholic Church,** a church organized in 1896 by John Alexander Dowie, a Scotchman, who claimed to be the promised Elijah, come to establish the kingdom of God on earth. The characteristic tenets of the church are faith-healing, literal interpretation of the Bible, strict morals, and abstinence from the use of tobacco, alcohol, and medicinal remedies.

catholically (ka-thol'i-kạl-i), *adv.* In a catholic manner; as a Catholic.

The Duchess . . . stated expressly that Augustus of Saxony was to consent that his niece "should live *Catholically* after the marriage."

Motley, Dutch Republic, I. 304.

catholyte (kath'ō-līt), *n.* [*cath(ode)* + *(electr)olyte.*] In *phys. chem.,* that portion of the electrolyte which adjoins the cathode. *Electrochem. Industry,* March, 1904, p. 99.

cat-hop (kat'hop), *n.* In *faro,* two cards of the same denomination left in the dealing-box for the last turn. See *faro.*

cathoscope (kath'ō-skōp), *n.* [*catho(de)* + Gr. *σκοπεῖν,* view.] A machine for exhibiting the optical effects of the X-rays. It comprises a fluoroscope, a vacuum-tube, batteries, etc.

cativa (kä-tē'vä), *n.* [Panama.] The large edible seeds of *Prioria copaifera,* a leguminous tree of Jamaica and Central America.

catjang (kat'jang), *n.* [A Dutch spelling of *kachang,* a pulse plant, as Malay *katjan,* the *Cajan Cajan,* etc. See *Cajanus.*] **1.** The pigeon-pea or Kongo pea, *Cajan Cajan.* See ★*Cajan* and *dholl.*—**2.** The cow-pea or chowlee, *Vigna Sinensis.* See *Vigna,* and *cow-pea,* under *pea.*

Catlin's River series. See ★*series.*

catmon, *n.* See ★*katmon.*

catnep (kat'nep), *n.* Same as *catnip.*

Catocala (ka-tok'ạ-lä), *n.* [NL., < Gr. *κάτω,* below, + *καλός,* beautiful.] A notable genus of noctuid moths containing many very beautiful species. They are known as *underwing moths,* from the fact that the hind wings are often striped and colored in striking contrast to the fore wings. The genus is widely distributed, but North America is its metropolis, more than 100 species occurring on that continent.

catoctin (ka-tok'tin), *n.* [*Catoctin,* a local name in Maryland, of Indian origin. Cf. *monadnock.*] A boss of rock which rises above the general level because of its greater resistance to erosion.—**Catoctin schists.** See ★*catoctin type.*—**Catoctin type,** the type of ore-deposit occurring in the Catoctin schists, a belt of metamorphosed basic volcanic rocks of Algonkian age, forming the mountain-core of Maryland and Virginia.

Catonic (kạ-ton'ik), *a.* [NL. *Catonicus,* < L. *Cato,* a Roman cognomen, < *catus,* sagacious.] **1.** Of or pertaining to, or having the character of, Cato the Censor, a type of old-fashioned, prejudiced, pragmatical, ungracious, hard Roman virtue.—**2.** Of or pertaining to Cato of Utica, a type of stubborn but impractical virtue.—**3.** In the style of a medieval book of apothegms which goes by the name of Cato or Caton.

catoptromantic (ka-top-trō-man'tik), *a.* [*catoptromancy.*] Of, pertaining to, or of the nature of catoptromancy.

cat-piece (kat'pēs), *n.* In *logging,* a small stick, in which holes are made at regular intervals, placed on the top of uprights firmly set in floating booms. The uprights are fitted to enter the holes in the cat-piece so as to narrow or widen the space between the booms at the entrance to a sluiceway or sorting-jack. The cat-piece is held by the uprights high enough above water to allow logs to float freely under it.

cat's-blood (kats'blud), *n.* Same as ★*bloodberry.*

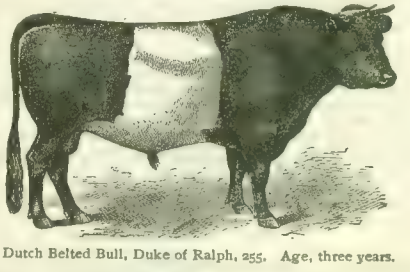
cat's-claw, *n.* **3.** See ★*bayag-kambing.*

cat's-eye, *n.* **3.** In *pathol.,* an opalescent appearance of the eye in certain cases of amaurosis.—**4.** See ★*tiger's-eye.*—**5.** The operculum of a marine mollusk, *Turbo smaragdus.* [Australia.]—**Cat's-eye shutter.** See ★*shutter.*

Cat's-head molding, in *Romanesque arch.,* a molding, as that under the cornice, adorned with the heads of beasts or grotesque monsters. Compare ★*bird's-beak.*

cat's-nose (kats'nōz), *n.* **1.** A strong, cool, dry northwest wind which pushes under and lifts up a warmer southwest wind. *Dunwoody,* Popular Phrases, p. 30.—**2.** The cloud at the front of such a wind. [Colloq., Eng., in both senses.]

cat's-tail, *n.,* **3.** (*b*) A form of cirrus in which the delicate cloudy filaments resemble a bushy, curved cat's tail.



cat-stitch (kat'stich), *n.* A variety of ornamental stitching used in fancy sewing-machine work.

cat's-tongue (kats'tung), *n.* A slender, worthless oyster: also called *strap-ouster.*

cattail, *n.* **5.** In *cotton-manuf.,* any corded, stringy tuft of cotton, due to faulty setting of a machine.

Cattaraugus beds. See ★*bed*[1].

cattle, *n.*—**Banded cattle.** See *Dutch belted* ★*cattle.*—**Cattle and game disease.** See ★*disease.*—**Devon**

Dutch Belted Bull, Duke of Ralph, 255. Age, three years.

cattle, a breed of small-sized, compactly built cattle of a rich red color, raised mainly for beef, though latterly for dairy purposes.—**Dutch belted cattle,** a Dutch breed

of cattle, noted for their milk-giving qualities. They are of a jet-black color, with the exception of a broad belt or 'blanket' of pure white around the middle of the body. Hence also called *blanket-* or *banded cattle.*—**Holstein-Friesian cattle,** a breed of dairy-cattle of large size, from North Holland and Friesland, reputed to be of great antiquity. Its most evident color-character is the striking mixture of large blotches of pure white and jet-black. They have been variously called *Dutch cattle, Holland cattle, North Hollanders, Holsteins,* and *Dutch-Friesians,* but the name now adopted is *Holstein-Friesian,* as above. —**Malarial fever of cattle.** Same as *Texas fever.*—**Pandolian cattle,** an Italian breed of long-horned cattle.—**Red polled cattle,** a red, hornless breed of cattle. It is the only hornless English breed, and was formerly known as *East Anglian polls.*

cattle-bush (kat'l-bůsh), *n.* An Australian shrub or small tree, *Atalaya hemiglauca,* belonging to the *Sapindaceæ.* The leaves are greedily eaten by cattle and are utilized for fodder in the dry season.

cattle-camp (kat'l-kamp), *n.* A halting- or mustering-place for cattle; a rounding-up place. [Australia.]

cattle-car (kat'l-kär), *n.* A stock-car (which see).

cattle-duffer (kat'l-duf″ėr), *n.* One who alters the brand on cattle and steals them; a cattle thief who 'duffs' the cattle by altering the brand. [Australia.]

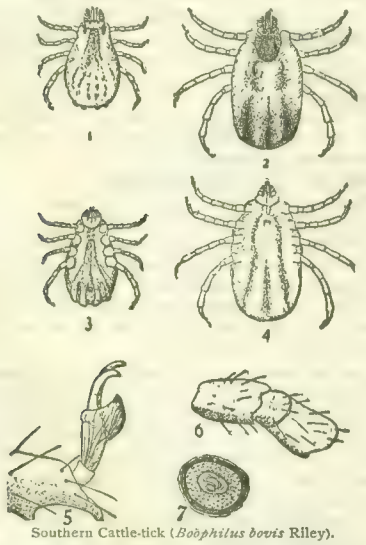
cattle-farm (kat'l-färm), *n.* A farm on which cattle are raised; a ranch.

cattle-fever (kat'l-fē″vėr), *n.* Same as *Texas fever.*—**Southern cattle-fever.** Same as *Texas fever.*

cattle-gate (kat'l-gāt), *n.* In *Eng. law,* right of pasturage in the land of another. It is a distinct and several interest in land, and passes by lease and release.

> The right [a right of common in gross] is then generally known as a *cattle-gate* or beast-gate.
> *Encyc. Brit.,* XXVII. 168.

cattle-louse (kat'l-lous), *n.* Any one of several pediculid or mallophagous insects which infest cattle: as, (*a*) *Hæmatopinus eurysternus,* sometimes called *short-nosed ox-louse;* (*b*) *Hæmatopinus vituli,* sometimes called *long-nosed ox-louse;* and (*c*) *Trichodectes scalaris.*



cattleman (kat'l-măn), *n.* One who is engaged in rearing cattle on a ranch; a ranchman.

cattle-ranch (kat'l-ranch), *n.* A ranch or farm on which cattle are reared.

cattle-scab (kat'l-skab), *n.* A contagious skin disease of cattle, caused by a parasitic mite and characterized by the loss of hair and the formation of crusts or scabs.

cattle-station (kat'l-stā″shon), *n.* A cattle-run with a homestead and all the necessary buildings. [Australia.]

cattle-tick (kat'l-tik), *n.* Same as ★*cow-tick.* —**Australian cattle-tick,** an Australian ixodid, *Boöphilus australis,* common throughout Australasia, and especially abundant in Australia and the Philippine Islands, where it attacks cattle.—**Southern cattle-tick,** an American ixodid, *Boöphilus bovis,* that carries the blood-inhabiting parasite of Texas fever from Texas cattle to non-immune cattle in northern States.

Southern Cattle-tick (*Boöphilus bovis* Riley).

1, male, from above; *2,* female, from above; *3,* male, from below; *4,* female from below; *5,* claw and pulvillus; *6,* lower surface of first, second, and third segments of leg; *7,* spiracle or peritreme. (After Curtice.) Enlarged.

cattle-track (kat'l-trak), *n.* A route formed merely by the treading of herds: used in contradistinction to *cattle-way,* a road formed by man for the use of his cattle.

cattle-trade (kat'l-trād), *n.* The rearing, buying, selling, or transportation of cattle.

cattle-way (kat'l-wā), *n.* See ★*cattle-track.*

cattyman (kat'i-măn), *n.* In *lumbering,* an expert river-driver.

caturai (kä-tō'rī), *n.* [Philippine name.] See ★*katurai.*

cat-witted (kat'wit″ed), *a.* Having the wits of a cat; small-minded and spiteful.

> Very *cat-witted* woman.
> *Carlyle,* Frederick the Great, IV. 260. *N. E. D.*

Caucasian, *n.*—**Black Caucasians,** the dark people of North Africa who resemble in features the Caucasian race. In this group are included the Gallas, the Abyssinians, and many tribes of the Sudan.

Caucasic (kâ-kā'sik), *a.* and *n.* Same as *Caucasian.*

Caucasoid (kâ'ka-soid), *a.* and *n.* Same as *Caucasian,* including Huxley's divisions *melanochroic* and *xanthochroic. Encyc. Brit.,* XXV. 372.

caucho (kä-ō'chō), *n.* [Peruvian *cahuchu:* see *caoutchouc.*] A commercial variety of rubber prepared on the Peruvian rivers tributary to the Amazon, and particularly on the Juruá. It comes to market in the form of balls, strips, or slabs, and is not cured by smoking as is the Para rubber, to which it is inferior, although it is included in the exports of rubber from the Amazon region, which are generally known as Para rubber. Caucho is obtained from several species of trees belonging to the genus *Sapium* of the spurge family, and from *Castilla Ulei* of the mulberry family. The rubber obtained from the latter species is usually distinguished as *caucho negro,* and that from the species of *Sapium* as *caucho blanco.*

cauda, *n.*—**Cauda draconis,** in *astrol.,* lit. 'dragon's tail,' the descending node of the moon; also, a figure in geomancy. See *dragon's tail,* under *dragon.*

Caudal artery, in lower vertebrates, as the fishes, the continuation of the aorta into the tail.—**Caudal gland, peduncle.** See ★*gland,* ★*peduncle.*—**Caudal ray,** a ray of the posterior fin, or tail-fin, of fishes.—**Caudal style,** one of the long processes borne by the anal segment of certain arthropods, as *Apus.*—**Caudal vertebræ.** See ★*vertebra.*—**Caudal vesicle,** the posterior, swollen end of a cysticercus, forming the 'bladder' of a bladder-worm. —**Caudal vomer.** Same as *pygostyle.*

caudally (kâ'dạl-i), *adv.* Toward the tail; caudad.

caudate, *a.* **II.** *n.* A member of the amphibian order *Caudata;* a tailed batrachian.

caudiciform (kâ-dis'i-fôrm), *a.* [L. *caudex* (*caudic*), caudex, + *forma,* form.] In *bot.,* having the form of a caudex.

caudiform (kâ'di-fôrm), *a.* [L. *cauda,* a tail, + *forma,* shape.] Resembling or having the shape of a tail.

caudle-pot (kâ'dl-pot), *n.* Same as ★*caudle-urn.*

caudle-urn (kâ'dl-ėrn), *n.* A vessel with a lid, handles, and spout, for holding caudle, made by English potters in the seventeenth and eighteenth centuries: usual in tin-enameled ware or Delftware. See *caudle.*

caudodorsal (kâ-dō-dôr'sạl), *a.* Relating to the tail and the back.

caudofemoral (kâ-dō-fem'ō-rạl), *a.* Relating to the tail and the thigh; as, the *caudofemoral* membrane of a bat, which is the membrane between the tail and the leg.

caudolateral (kâ-dō-lat'ę-rạl), *a.* Behind and toward the side of the body.

cauliculus, *n.* **3.** In *insect anat.,* the larger of the two elements of the double stalk of the so-called mushroom bodies in the brain of certain insects. See *mushroom* ★*body. A. S. Packard,* Textbook of Entom., p. 233.

caulifloral (kâ'li-flō-rạl), *a.* Same as ★*cauliflorous.*

cauliflora (kâ-li-flō'ri-ą), *n.* Same as ★*cauliflory.*

cauliflorous (kâ-li-flō'rus), *a.* [NL. **cauliflorus,* < L. *caulis,* stalk, + *flos* (*flor-*), a flower: see *flower.*] Bearing flowers on trunk or branches. See ★*cauliflory.*

cauliflory (kâ'li-flō-ri), *n.* [NL. **cauliflora,* < **cauliflorus:* see ★*cauliflorous.*] The bearing of flowers directly on the trunk or branches. See cut under *Crescentia.*

> In *cauliflory* the flowers appear sometimes only on main stems, sometimes only on branches, sometimes, and this is most usual, on both main stem and branches alike.
> *A. F. W. Schimper* (trans.), Plant Geog., p. 336.

cauliflower, *n.* **2.** A cloud (especially a volcanic cloud) having the form of a cauliflower.

> The reddish dust '*cauliflowers*' accumulated about every half-hour and rolled down the gorge of the Rivière Blanche from the cone. Sometimes this phenomenon was followed by a low rumbling roar.
> *Amer. Jour. Sci.,* Jan., 1904, p. 34.

Cauliflower ear, pyralid, ware. See ★*ear*[1], ★*pyralid,* ★*ware*[2].

Cauliflower Cloud.
Eruption of Mont Pelé in 1902.

cauline[2] (kâ'-lin), *n.* [Also *caulin;* < L. *caulis,* a stalk, cabbage, + *-ine*[2].] The coloring matter of red cabbage. It is largely used in the coloring of bogus wines.

caulkage, *n.* See ★*calkage.*

caulobulb (kâ'lō-bulb), *n.* [L. *caulis,* Gr. καυλός, stem, + L. *bulbus,* bulb.] The bulbous base of a stem.

caulomic (kâ-lō'mik), *a.* [*caulome* + *-ic.*] Of or pertaining to a caulome.

causa (kâ'zą), *n.* [L.] A cause.—**Causa causans,** a causing cause, that is, a primary cause; the first cause.—**Causa causata,** a caused cause, that is, a secondary cause; an effect which has in turn become a cause. —**Causa sui,** literally, the cause of itself; in the philosophy of Spinoza, that whose essence involves existence.—**Honoris causâ,** for the sake of honor; in order to honor; out of respect: as, a university degree conferred *honoris causâ.*—**Vera causa,** a true or real cause.

causability (kâz-ą-bil'i-ti), *n.* The capability of being caused.

Causal conjunction, in *gram.,* a coördinate conjunction that implies cause, such as *for, because, since, therefore,* etc.—**Causal sequence,** the succession of events in the order of causation.—**Causal treatment.** See ★*treatment.*

cause, *n.*—**Accidental cause,** in *med.,* a cause of disease which acts only occasionally and which does not always then give rise to the same morbid condition.—**Cause of itself.** See ★*causa sui.*—**Centrifugal cause,** in *biol.,* the interaction between a cell and the other cells of the body, considered as a cause of its development. Hertwig, who holds that all the cells of the body of a multicellular organism are identical, attributes the specialization and differentiation of a cell during development in part to centrifugal causes, or the interaction between it and its fellow cells, and in part to centripetal causes, or the interaction between it and the external environment.—**Centripetal cause,** in *biol.,* the external environment of a cell, or of an organism, considered as a cause of its development. See *centrifugal* ★*cause.*—**Short cause,** in *law,* a cause which may be advanced for hearing by either party, under a rule of the court allowing such advancement upon proof that the trial will not occupy more time than that specified in the rule.—**Testamentary cause,** in *law,* a cause within the jurisdiction of a probate court. It relates to the probate of wills, the granting of administration, and generally to any proceedings necessary to the settlement and distribution of the estate of a decedent.—**Title of a cause.** See ★*title.*

causerie (kōz'rē), *n.* [F., < *causer,* talk, chat, < L. *causari,* plead, dispute, < *causa,* a cause, case, suit.] Chat; familiar conversation; informal talk; free and unconventional discussion and criticism, such as the *Causeries du lundi* ("Monday Chats") of the French critic and essayist Sainte-Beuve (1804–69). See *Sainte-Beuve* in the Century Cyclopedia of Names.

caustic. **I.** *a.*—**Caustic arrow,** a slim, sharp-pointed pencil of dried caustic paste inserted into a tumor or tissue which is to be deeply cauterized.—**Caustic collodion.** See ★*collodion.*—**Caustic dart.** Same as ★*caustic arrow.*—**Caustic lime,** calcium hydroxid; also, calcium oxid.—**Caustic liquor,** in the manufacture of soda by the Leblanc process, the solution of caustic soda before its evaporation to dryness.—**Caustic paste.** See ★*paste*[1].—**Caustic silver,** lunar caustic.—**Caustic surface,** in *optics:* (*a*) The curved surface to which all the rays reflected from a concave mirror are tangential. (*b*) The curved surface to which all the rays of a conical pencil of light entering a refractive medium are tangential. *R. W. Wood,* in Nature, Aug. 9, 1900, p. 344.—**Greenbank caustic soda,** caustic soda made at the Greenbank alkali works in England.

II. *n.*—**Canquoin's caustic.** Same as *Canquoin's paste.*—**Cream caustic,** a particular grade of caustic soda, made by the Leblanc process, of a faint yellowish tinge and usually containing from 60 to 70 per cent. of real sodium hydroxid.—**Mitigated caustic,** nitrate of silver which has been fused with an equal amount of nitrate of potassium in order to lessen the caustic effect.

causticize (kâs'ti-sīz), *v. t.*; pret. and pp. *causticized,* ppr. *causticizing.* [*caustic* + *-ize.*] Same as *caustify. G. Lunge,* Sulphuric Acid and Allied Industries, II. 465.

causticly (kâs′tik-li), *adv.* Like caustic; in the manner of caustic.

cauterant, *n.* **II.** *a.* Having a caustic or cauterizing action.

cautery, *n.*—**Solar cautery,** a lens for concentrating the heat-rays of the sun and directing them upon any part where a cauterizing effect is to be produced.—**Virtual cautery,** cautery by means of a caustic substance, as distinguished from actual cautery. Also *potential cautery.*

cautery-knife (kâ′tėr-i-nīf), *n.* A knife the blade of which is connected with an electric battery, so that it can be made incandescent and thus sear the tissues, preventing bleeding while cutting.

Cautionary signal. See ★*signal.*

Cautivos, *n. pl.* [Sp., pl. of *cautivo,* < L. *captivus,* captive.] **1.** The name of an order (Orden de la Merced) established in Barcelona, Spain, by San Pedro Nolasco (1189–1256) for the purpose of liberating the Christian captives from the Saracens. It was confirmed by Pope Gregory IX. (1230).—**2.** The name given to a fund established at a later date among Spanish Jews, having for its object the ransom of their brethren captured by Mohammedan pirates under Barbarossa.

Cav. An abbreviation of *cavalry.*

cavaletta (kav-a-let′ä), *n.* Same as *cabaletta.*

cavalla (kä-väl′yä), *n.* [Cf. *cavally.*] A scombroid fish, *Scomberomorus cavalla,* found in the open seas. It comes in large numbers to the American South Atlantic coasts, and ranges southward to Africa and Brazil.

Cavalry bone. See ★*bone*[1].

cavate (kā′vāt), *a.* [L. *cavatus,* pp.: see *cavate, v.*] That has been made hollow; hollowed; hollow; produced by excavation. The term has been applied somewhat specifically to a class of prehistoric habitations, in the southwestern parts of the United States, consisting of an artificial cave dug into the face of a cliff, the entrance often closed with masonry, but the side-walls, rear wall, and roof formed of the natural rock.

cavation, *n.* **2.** (*b*) In *modern fencing,* also a side-blow, delivered after quitting the opponent's blade, carrying the guard to left or right in an effort to reach around his position. The move exposes the fencer dangerously, and should be employed only with careless opponents.

cave[1], *n.* **7.** A cave-in.—**Cave period.** See ★*period.*—**Trophonian cave.** See ★*Trophonian.*

cave-beetle (kāv′bē″tl), *n.* One of the blind or partly blind beetles which live in caves. Many of them belong to the silphid genera *Bathyscia* and *Adelops* and to the carabid genus *Anophthalmus.*

cave canem (kā′vē kā′nem). [L.] Beware of the dog! A warning frequently inscribed at the entrances of Roman houses, as in the Casa del Poeta Tragico in Pompeii.

cave-drawing (kāv′drâ″ing), *n.* One of the specimens of rude pictorial art which have been found in caves in different parts of the world. They are supposed to be the work of the prehistoric cave-dwellers; some of those found in France are thought to have been preglacial.

cave-dwelling (kāv′dwel″ing), *n.* **1.** A cave used as a dwelling by primitive, prehistoric, and recent tribes.—**2.** In Colorado and the adjoining region, a cliff-dwelling.

cave-earth (kāv′ėrth), *n.* In *geol.,* the earthy deposit on the floor of a cave, including traces and remains of animals which have made it a shelter or a home. The use of such natural retreats by primitive man has led to numerous discoveries of human remains in these deposits.

That position in *cave-earth* under thick stalagmite beds does not of itself alone necessarily imply great age.
Keane, Ethnology, p. 76.

cave-hunter (kāv′hun″tėr), *n.* A student of prehistoric archæology who pays special attention to the remains of the cavemen and makes special search for their caves.

It is more than probable that they offer as wide a field for the research of the *cave-hunter* as caves do in any other country, and from them a rich harvest of facts relating to prehistoric times has yet to be reaped.
Keane, Ethnology, p. 94.

cave-in (kāv′in), *n.* A caving in of the roof strata of a mine, or of the sides of a shaft or pit, sometimes extending to the surface. Also *cave.*

If inspection of the vault roof reveals displacements and fissures therein, the only thing to be done is to desert the chamber, which will thus become unworkable because of these cracks and threatened *cave-ins.* Such *cave-ins* have many chances of extending to the surface and of involving the ruin of the entire work as well as that of the hoisting machines installed above on the surface.
Sci. Amer. Sup., Dec. 6, 1902, p. 22512.

Cavern period. Same as *cave* ★*period.*

cavernous, *a.* **3.** In *petrog.,* porous or vesicular: applied to rocks some of whose minerals have been removed by solution. *Geikie,* Textbook of Geol., p. 133.—**Cavernous angioma.** See ★*angioma.*—**Cavernous voice,** in *auscultation,* a hollow sound heard when the patient speaks, indicative of a cavity in the lung-substance or of a dilated bronchus.

cavernously (kav′ėr-nus-li), *a.* In a cavernous manner.

cavernulated (ka-vėr′nū-lā-ted), *a.* [*cavernule* + *-ate*[1] + *-ed*[2].] Formed with cavernules or minute cavities: as, a *cavernulated* structure.

cave-tomb (kāv′tōm), *n.* A tomb cut directly in the solid rock. Such tombs are abundant in the

Lycian Cave-tomb.

ruins of many early civilizations, the Mycenæan in Greece, the Egyptian, and the Indian. The cave-tombs in the hills of Asia Minor are especially interesting.

Cavitary myelitis. See ★*myelitis.*

cavitate (kav′i-tāt), *v. i.*; pret. and pp. *cavitated,* ppr. *cavitating.* [*cavity* + *-ate*[2].] To form holes or cavities within an agitated liquid; react upon the water with ★cavitation (which see): said of a screw propeller.

cavitation (kav-i-tā′shon), *n.* [*cavitate* + *-ion.*] The formation of holes or cavities within an agitated liquid. Cavitation results from violent motion which breaks up the liquid into independently moving masses, each with its surface of separation, as when water is churned by the screw of a steam-vessel. The phenomenon is specially noticeable in the high-speed propellers of torpedo-boats and turbine-propelled vessels.

The name *cavitation* is given to the phenomenon met with when a screw is driven in water at speeds above a certain limiting value. *Nature,* Nov. 6, 1902, p. 24.

cavity, *n.* **3.** In *hort.* See ★*basin,* 12.—**Atrial cavity.** Same as ★*peribranchial cavity.*—**Cavity tone.** See ★*tone*[1].—**Neural, peribranchial, peripodal, pulmonary, subgerminal cavity.** See ★*neural,* etc.

cavoscope (kav′ō-skōp), *n.* [Improp. *cavascope,* < L. *cavus,* hollow, + Gr. *σκοπεῖν,* view.] In *med.,* an instrument for illuminating a cavity to facilitate its examination.

cawdy† (kâ′di), *n.* An obsolete form of *caddie.*

Caxton, *n.* **2.** A printing-type of Flemish design used by William Caxton in 1477.

This is modernized Caxton type.

Caxtonian (kaks-tō′ni-an), *a.* and *n.* **I.** *a.* Of or pertaining to William Caxton, the printer (1422–91).

II. *n.* An admirer of Caxton, his books, devices, or methods.

Cay-cay butter. See ★*butter*[1].

cayenne (kī-en′), *n.* **1.** Same as *Cayenne pepper* (which see, under *pepper.*)—**2.** A card turned up in cayenne whist to determine the rank of the suits, but not as a trump.—**Cayenne cherry.** Same as *Surinam* ★*cherry* (*b*).—**Cayenne whist.** See ★*whist*[2].

cayenne (kī-en′), *v. t.*; pret. and pp. *cayenned,* ppr. *cayenning.* To season with Cayenne pepper.

Cayleyan, *n.* **II.** *a.* Of or pertaining to Arthur Cayley, an English mathematician (1821–95).

cayman, *n.* **2.** A gobioid fish, *Dormitator maculatus,* found in great abundance on both coasts of America. It lives in fresh and brackish water, ranges from South Carolina, through the West Indies, to Pará, Cape San Lucas and Panama, and is much used for food. See *sleeper*[1], 8 (*c*).

cayo (kī′yō), *n.* [Sp.] Same as *cay.*

cayolac (kī′ō-lak), *n.* [Malay *kāyu,* wood, + *lāka,* the name in western Java for the tree *Myristica iners.*] A fine red wood, especially the aromatic heart-wood, of *Myristica iners,* a tree of the Dutch East Indies: used as incense.

Cayugan (kā-yū′gan), *a.* and *n.* In *geol.,* noting

a period or group of New York formations which includes the Salina beds at the bottom, the Cobleskill limestone, Rondout water-lime, and the Manlius limestone, and constitutes the uppermost division of the Ontaric or Upper Silurian.

cazadores (kä-thä-dō′res), *n. pl.* [Sp., pl. of *cazador,* hunter.] Certain nomadic ants of Peru. They lead a nomadic life, entering the houses of the natives in immense armies, killing rats, mice, snakes, and all sorts of vermin, playing the part of scavengers, and passing on, when the dispossessed natives return. *The Atlantic,* Feb., 1892, p. 179.

C. B. An abbreviation (*b*) of *Cape Breton;* (*c*) of *Chief Baron* (*of the Exchequer*) (see *baron,* 2); (*d*) of the Latin *Chirurgiæ Baccalaureus,* Bachelor of Surgery: a degree conferred by certain institutions at the end of the third year of a four years' course for the degree of M. D.; (*e*) of *Common Bench;* (*f*) *Milit.,* of *confined to barracks.*

C. B. S. An abbreviation of *Confraternity of the Blessed Sacrament.*

C. C. An abbreviation (*b*) of *Caius College;* (*c*) of *Catholic clergyman;* (*d*) of *cepi corpus;* (*e*) of *Chancery cases;* (*f*) of *Circuit Court;* (*g*) of *City Court;* (*h*) of *Civil Code;* (*i*) of *Civil Court;* (*j*) of *consular clerk;* (*k*) of *contra credit;* (*l*) of *county clerk;* (*m*) of *county councilor;* (*n*) in *veram.,* of *cream-colored;* (*o*) of *Cricket Club;* (*p*) of *crown cases;* (*q*) of *crown clerk;* (*r*) in Freemasonry, of *Celestial Canopy.*

c. c. An abbreviation (*a*) of the French *compte courante* (account current); (*b*) of *cubic centimeter.*

C. C. A. An abbreviation of *Chief Clerk of the Admiralty.*

C. C. C. An abbreviation of *Corpus Christi College.*

c. c. m. Same as ★*c. c.* (*b*).

C. C. P. An abbreviation of *Code of Civil Procedure.*

C. Cr. P. An abbreviation of *Code of Criminal Procedure.*

C. C. S. An abbreviation for *Ceylon Civil Service.*

C. D. An abbreviation of *cathodal duration.*

C. D. S. O. An abbreviation of *Companion of the Distinguished Service Order.*

c. d. v. An abbreviation of the French *carte de visite* (visiting-card).

C. E. An abbreviation (*b*) of *Canada East.*

ceanothine (sē-a-nō′thin), *n.* [*Ceanoth-us* + *-ine*[2].] A difficultly crystallizable alkaloid contained in redroot, *Ceanothus Americanus.*

cebian (sē′bi-an), *a.* [L. *cebus,* < Gr. *κῆβος,* monkey, + *-ian.*] Same as ★*cebine:* contrasted with ★*pithecian.* [Rare.]

cebine (sē′bīn), *a.* [NL. *cebinus,* < L. *cebus,* < Gr. *κῆβος,* monkey: see *Cebus.*] Relating to or characteristic of the monkeys of the family *Cebidæ,* which includes the larger species of America; cebian: contrasted with ★*pithecine.*

cebocephalic (sē″bō-se-fal′ik or -sef′a-lik), *a.* [Gr. *κῆβος,* monkey, + *κεφαλή,* head.] Having an ape-like head.

ceboid (sē′boid), *a.* [Gr. *κῆβος,* monkey, + *-oid.*] Resembling or pertaining to the *Cebidæ:* as, a *ceboid* type of dentition: correlative with *lemuroid* and *pithecoid.*

cecidia, *n.* Plural of ★*cecidium.*

cecidium (sē-sid′i-um), *n.*; pl. *cecidia* (-ä). [NL., < Gr. *κηκίδιον* (found only in sense of 'ink from galls'), dim. of *κηκίς* (*κηκιδ-*), a gall-nut, a dye made therefrom, orig. anything that oozes forth; cf. *κηκιεν,* gush, bubble, or ooze forth.] An abnormal growth in a plant caused by gall-making insects, mites, and fungi; a gall; a gallnut.

A great variety of deformations and growths produced by insects and mites as well as by fungi have been described.... The whole are now included under the term *Cecidia;* a prefix gives the name of the organism to which the attacks are due, e. g., Phytoptocecidia are the galls formed by the Phytoptid mites. *Encyc. Brit.,* XXIX. 499.

cecidological (se-sid-ō-loj′i-kal), *a.* Of or pertaining to cecidology.

cecidologist (se-si-dol′ō-jist), *n.* A student of galls and gall-insects.

cecidology (se-si-dol′ō-ji), *n.* [Gr. *κηκίς* (*κηκιδ-*), a gallnut, + *-λογια,* < *λέγειν,* speak.] The scientific study of galls and gall-insects.

cecidomyiid, *n.* **II.** *a.* Of or belonging to the dipterous family *Cecidomyiidæ.*

cecily, *n.* Same as *cicely.*

cecomorphous (sē-kō-môr′fus), *a.* Same as *cecomorphic.*

Cecropia chalcis-fly. See ★*chalcis-fly.*

cedar, *n.*—**Alaska cedar,** the yellow cedar, *Chamæcyparis Nootkatensis.* See *yellow cypress* under *yellow.* —**Brazilian cedar,** a tall tree, *Cedrela fissilis,* of southern Brazil and Argentina. It yields a valuable timber used for building purposes, furniture, cabinet-work, and interior decoration.—**Brown cedar,** a small tree of the borage family, *Ehretia acuminata,* of eastern Australia. It yields a light-brown coarse-grained wood which resembles that of the elm.—**Cedar brakes, cedar glades,** a type of forest in Tennessee and Alabama found on dry limestone uplands. It consists of a dense, almost unmixed growth of red cedar (*Juniperus Virginiana*). *C. Mohr.*—**Cedar hammock.** See ★*hammock*[2].—**Chilean cedar,** a valuable timber-tree, *Fitzroya Patagonica,* of the pine family, native in the island of Chiloe.—**Cigar-box cedar,** the Spanish cedar, *Cedrela odorata.* See *Cedrela.*—**Cypress cedar.** Same as *New Zealand* ★*cedar.*—**Ground cedar,** the common juniper, *Juniperus communis.*—**Japan cedar,** *Cryptomeria Japonica,* a graceful tree, of large size, a native of China and Japan, where it is planted as an ornamental tree and also for reforesting mountains and treeless areas. It is much planted in Europe and America in parks and lawns, and is hardy as far north as New York. The wood resembles that of the white pine, but takes a fine polish. See ★*Cryptomeria.*—**Moulmein cedar,** a commercial name for the timber of the toon, *Toona Toona.* See *toon*[3], *cedar,* 3, and *East Indian mahogany,* under *mahogany.* —**New Zealand cedar,** *Libocedrus Doniana,* a fine timber-tree from 60 to 100 feet high, yielding a heavy, fine-grained, useful wood. The name is sometimes applied to another species, *L. Bidwillii,* which yields a soft wood useless for timber. Called by the natives *kawaka.*—**Pink cedar,** the timber of the shingle-tree, *Acrocarpus fraxinifolius,* used by the tea-planters of northeastern India for tea-boxes.—**Prickly cedar,** an ornamental evergreen shrub, *Styphelia Oxycedrus,* of the epacrid family, from Tasmania and Victoria, with erect branches, linear leaves, and white flowers.—**Queensland cedar,** a large rutaceous tree, *Apoceras australis,* yielding close-grained, tough, firm wood. Also called *scrub white cedar.* See *Pentaceras.*—**Rock cedar,** the mountain juniper, *Juniperus sabinoides.*—**Salt cedar,** creeping wiry grass, *Monanthochloë littoralis,* with many short bristle-pointed leaves on short branches, forming a good sand-binder. It is found along the coast of southern California and Lower California, and in southern Texas and southern Florida.—**Scrub white cedar.** Same as *Queensland* ★*cedar.*—**Singapore cedar.** Same as *Moulmein* ★*cedar.*

cedar-elm (sē′dăr-elm), *n.* A valuable American tree, *Ulmus crassifolia,* of the lower Mississippi valley and Texas. It is the principal elm of Texas, and sometimes attains a height of 80 feet, free from branches for nearly half that distance. The wood is hard, heavy, and strong, and is used for wagon-hubs and for furniture. It is a very good shade-tree.

Cedarville limestone. See ★*limestone.*

cedula, *n.* **2.** (*a*) In *old Eng. law,* a schedule. (*b*) In *Sp. law:* (1) An act by which a debtor acknowledges his debt and binds himself to pay at a specified time or on demand. (2) The notice or summons fixed to the door of a fugitive criminal requiring his appearance before the court.

cee (sē), *n.* **1.** The name of the third letter of the alphabet, *C, c.* Also *ce.*—**2.** An old name in the English universities for a certain quantity of beer (probably an abbreviation of the Latin *cerevisia,* beer): as, to eat *cues* and drink *cees.* See *cue*[2], 2 (*b*).

cefalic, *a.* A simplified spelling of *cephalic.*

cefalo (sef′a-lō), *n.* [Sp. *céfalo* < NL. *cephalus* < Gr. κεφαλή, head.] The common mullet, *Mugil cephalus.*

cefalopod, *n.* A simplified spelling of *cephalopod.*

ceile (kyā′lę), *n.* [Ir.; OIr. *cēle.*] In the ancient organization of Irish society, a free tribesman who became a vassal.

It is by taking stock that the free Irish tribesman becomes the *Ceile* or Kyle, the vassal or man of his chief, owing him not only rent but service and homage.
Maine, Early Hist. of Institutions, p. 158.

ceiling, *n.*—**Metallic ceiling,** an ornamental fire-proof ceiling made of embossed and stamped sheets of metal used in place of lath and plaster.

ceiling-plate (sē′ling-plāt), *n.* A protective ring placed round a steam-pipe at the point where it passes through the ceiling. It is made in various ornamental forms. A plate used for the same purpose where a steam-pipe passes through a floor is a *floor-plate.*

ceja (thā′hä), *n.* [Sp., lit. 'eyebrow,' < L. *cilium,* pl. *cilia,* eyebrow: see *cilium.*] In *phys. geog.,* the brow or cliffed margin of a mesa or upland. [Southwestern U. S.]

cel, *n.* and *v.* A simplified spelling of *cell.*

Cel., Cels. Abbreviations of *Celsius.*

Celadon de cuivre, a pale sea-green color in the glaze of Chinese stoneware or hard-paste porcelain, replacing the red or copper-green color intended. It is caused by imperfect oxidization in the firing.—**Celadon fleuré,** a variety of Chinese stoneware or coarse porcelain with relief decoration of flowers, geometric figures, etc., covered with a celadon or sea-green glaze. Designs are frequently engraved in the paste and filled in with a paste of a different tone.

celadonite (sel′a-don-īt), *n.* [*celadon* + *-ite*[2].] A green earthy silicate of iron, magnesium, and potassium, first described from cavities in amygdaloid near Verona: hence called *green earth of Verona.*

celandine, *n.*—**Brook celandine,** the jewel-weed, *Impatiens biflora.*—**Wild celandine,** the pale touch-me-not, *Impatiens aurea.*

celastrineous (sel-as-trin′ę-us), *a.* Same as *celastraceous.*

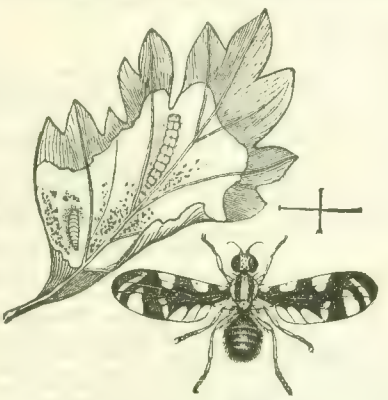
celation (sę-lā′shon), *n.* [NL. **celatio(n-),* < L. *celare,* conceal, hide.] In *med. juris.,* the concealing of pregnancy or delivery of a child.

celative (sel′a-tiv), *a.* [NL. **celativus,* < L. *celare,* hide: see *conceal.*] Of or pertaining to the concealment of an organism from enemies or from its prey.

celebe, *n.* See *kelebe.*

Celebesian (sel-ę-bēz′i-an), *a.* [*Celebes* + *-ian.*] Of or pertaining to Celebes; specifically, noting a zoögeographical subregion proposed by Sclater to include only the island of Celebes.

celebrative (sel′ę-brā-tiv), *a.* [*celebrate* + *-ive.*] Serving to celebrate.



celelminth, *n.* See *cœlelminth.*

celery, *n.*—**Wild celery.** (*a*) Alexanders, *Smyrnium Olusatrum.* (*b*) See *Vallisneria.* (*c*) On the Pacific coast, an aquatic umbelliferous plant, *Œnanthe sarmentosa,* the stems of which have the taste of celery and were eaten by the Indians. The poisonous Oregon water-hemlock is said to be sometimes mistaken for this.

celery-caterpillar (sel′ę-ri-kat″ėr-pil-ăr), *n.* The larva of an American papilionid butterfly, *Papilio polyxenes.* Also called *parsley-worm.*

celery-cutter (sel′ę-ri-kut″ėr), *n.* A knife for cutting the stalks of celery. It has a long handle and a blade placed at the end at right angles to it.

celery-fly (sel′ę-ri-flī″), *n.* A European trypetid fly, *Tephritis onoperdinis,* whose larvæ mine

Celery-fly (*Tephritis onoperdinis*).
Adult, enlarged; larvæ and method of work, natural size. (After Curtis.)

the leaves of celery and the parsnip. Also called *parsnip-fly.*

celery-hiller (sel′ę-ri-hil″ėr), *n.* In *agri.,* a double-shovel plow used to lift the earth between two rows of celery and throw and pack it against the plants on each side.

celery-looper (sel′ę-ri-lö″pėr), *n.* The larva of an American noctuid moth, *Autographa simplex,* which is widely distributed throughout the United States.

celesta (sę-les′tä), *n.* [Irreg. Latinized from F. *céleste,* < L. *cælestis,* heavenly.] A musical instrument, played from a keyboard of five octaves, in which the sound is produced by the blows of hammers upon steel plates placed over resonators of wood. It was invented by Mustel of Paris in 1886, and has been introduced into some orchestral and operatic scores.

celeste (sę-lest′), *n.* [F. *céleste,* heavenly: see *celest.*] 1. In *organ-building,* same as *vox angelica.* See *vox.*—**2.** In *pianoforte-making,* a variety of soft pedal.

celestial, *a.*—**Apparent celestial latitude.** See ★*latitude.*—**Celestial mechanics, sphere.** See ★*mechanics,* ★*sphere.*

Celestialism (sę-les′tial-izm), *n.* [*Celestial* + *-ism.*] The characteristics of 'Celestial' or Chinese life.

celestialite (sę-les′tial-īt), *n.* [*celestial* + *-ite*[2].] A supposed sulphohydrocarbon obtained from some meteoric irons, as those from Sevier, Tennessee, and Alais, France.

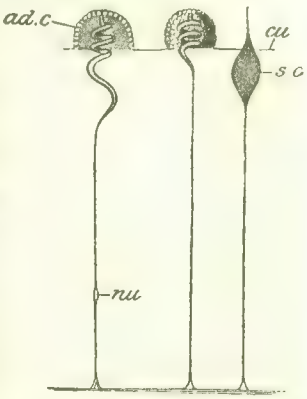
celestiality (sę-les-ti-al′i-ti), *n.* [*celestial* + *-ity.*] **1.** Heavenly quality; heavenliness.

But, throw off hate's *celestiality,*—
Show me, apart from song-flash and wit-flame,
A mere man's hand ignobly clenched against
Yon supreme calmness.
Browning, Aristoph. Apol., Works, V. 136.

2. [*cap.*] A Chinese dignitary; a dignitary of China, the 'Celestial Empire.' [Humorous.]

Celestine, *n.* **4.** [*l. c.*] In *mineral.,* same as *celestite.*—**Celestine blue.** See ★*blue.*

Celiac artery. Same as *celiac axis* (which see, under *axis*[1]).—**Celiac flux,** diarrhea with the discharge of undigested food and chyle.—**Celiac ganglion.** Same as *semilunar ganglion* (which see, under *ganglion*).



celibatory (sel′i-bā-tō″ri), *n.* [*celibate* + *-ory.*] A celibate or one who favors celibacy.

celiotomy (sē-li-ot′ō-mi), *n.* [Gr. κοιλία, a cavity, + *-τομία,* < ταμεῖν, cut.] Same as *laparotomy.*

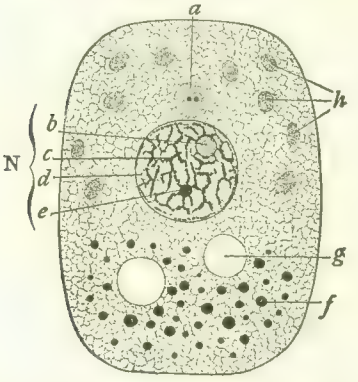
cell, *n.* **11.** One of the water-tight compartments into which the space between the inner and outer shells of a war-vessel, or other metal ship, is divided.—**12.** In *archæol.,* the inner chamber of megalithic structures, which consists of a space walled by large stones and covered with a slab.—**13.** In *spectroscopy,* a small glass vessel with parallel sides designed to hold liquids for examination by transmitted light.—**14.** In *kinematics,* a symmetrical combination of an even number of links.

A very good idea of the form and operation of a negative *cell* may be gained by putting together the fore-fingers and ring-fingers of the two hands, and placing one middle finger a little over the other so as to keep all six fingers in the same plane.
Sylvester, On Conversion of Motion, p. 5.

Accessory cell, in *bot.,* the sister-cell of a guard-cell in a stoma. —**Adhesive cell,** a peculiar gland-like lasso-cell found on the tentacles of the *Ctenophora.* —**Aluminium cell,** in *elect.,* a battery - cell which consists of two aluminium plates immersed in a solution of Rochelle salt, alum, citric acid, or other substance, and which with alternating currents acts in somewhat the same manner as an electrostatic condenser —**Archesporial cells.** See ★*archesporial.* —**Auditory cells.** See ★*auditory.* —**Auxiliary cell,** a specialized cell in certain of the red algæ, with which the oöblastema filament unites, carpospores being formed as a result of this conjugation.—**Axial cell.** See ★*axial.*—**Bast-cells.** See *bast*[1], 2.—**Calcigerous cells.** See ★*calcigerous.*—**Canal cell,** in *bot.,* one of the cells of the axial row in the neck of the archigonium, which, by the disappearance of the septa, ultimately form a canal for the passage of the antherozoids.—**Cap-cell,** in *bot.,* one of the upper sister-cells of the embryo-sac in the ovule, which for a time form a cap on its apex.—**Cell-complex.** See ★*complex, n.*—**Cell doctrine.** Same as ★*cell theory.* —**Cells of Corti,** hair-cells on the organ of Corti (which see, under *organ*[1]).—**Cell theory.** Progress in our knowledge of cytology, embryology, and general biology has led to a revision of the cell theory and to a distinction between two classes of opinions in regard to the relation between the constituent cells of the body of a multicellular organism and its structure and activity considered as a whole: (*a*) According to one view, which is sometimes called the *cell standpoint,* construction out of cells is the primary, fundamental, essential characteristic of the multicellular organism, and its unity or individuality is a secondary, dependent, incidental characteristic. The cells are regarded as the units of construction and of physiological activity, while the unity and individuality of the whole are features that have been added. The advocates of this conception in its extreme form regard the multicellular organism as a community or aggregation of unicellular organisms centralized or integrated into a whole by a process of differentiation or divergent specialization which has been brought about by means of cell-multiplication and division of labor; as ancestrally or phylogenetically the unified and differentiated descendant of some remotely ancestral aggregation of unspecialized cells; as embryologically or ontogenetically the product of the integration and differentiation of unspecialized embryonic cells; as structurally or morphologically a compound of morphological units or plastids; and as physiologically the arithmetical sum of the physiological activities of its constituent cells. This doctrine or opinion appears in literature in many forms, which have these points in common: (1) the fundamental nature of the difference between the unity of a unicellular organism and that of a multicellular organism; (2) the dependent nature of the latter and the primacy of the cell; and (3) the resolution of the physiological activities of the multicellular organism into those of the constituent cells. See *plastid, idorgan,* and *person.* (*b*) According to a second view, which is sometimes called the *organism standpoint,* the essential primary distinctive characteristic of a multicellular organism is its individuality or unity, while its composition out of cells is an indication of its organization, but not the means through which organization has been brought about; its individuality is directly comparable with, or of the same grade as, that of a unicellular organism, and there is no reason why it may not have arisen, in the remote past, through the growth

Two adhesive cells (*ad.c*) and a sensory cell (*s.c*) from one of the branches of a tentacle of *Hormiphora plumosa,* highly magnified; *cu,* cuticle; *nu,* nucleus. (From Parker and Haswell's "Zoölogy," after Hertwig and Chun.)

and increasing complexity of a unicellular ancestor which gradually became multicellular in adaptation to its increasing size and complexity. The unity of the egg is regarded as the same as that of the adult and as regulating instead of being controlled by cell-division, which makes no change in the grade of its individuality. Physiologically it is regarded as a coördinated whole, not as an aggregation of cells. (*c*) While there is much to be said in support of each of these opinions, there are grave objections to the acceptance of either of them without compromises with the other, and there is a third view which regards the distinction between the cell standpoint and the organism standpoint as dependent upon the purpose for which the comparison is made, and as in the mind of the interpreter instead of in nature. For many of the



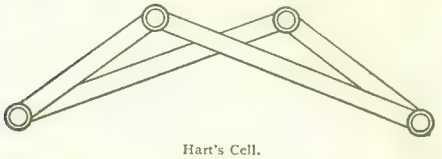


Diagram of Cell Structure.

a, attraction-sphere inclosing two centrosomes; N, nucleus; (*b*, plasmosome or true nucleolus; *c*, chromatin-network; *d*, linin-network; *e*, karyosome, net-knot, or chromatin nucleolus;) *f*, passive bodies (metaplasm or paraplasm) suspended in the cytoplasmic meshwork; *g*, vacuole; *h*, plastids lying in the cytoplasm. The network of dotted lines represents the cytoreticulum enmeshing the more fluid ground substance or cytoplasm. (From Wilson's "The Cell.")

purposes of the histologist, the pathologist, the embryologist, and the physiologist the multicellular organism is best considered as a cell-community, while for other purposes it is best considered as a unit or coördinated whole. From the morphological standpoint the cell may properly be regarded apart from the organism, as an individual, but it is not to be forgotten that it is by abstraction that this is done. Physiologically the cell is an individual only when actually isolated and independent of an organism. From this point of view every abstraction is a blunder.—**Columnar cell,** in *histol.*, an epithelial cell which is higher than broad.—**Companion cell,** in *bot.*, a cell which accompanies another cell and is cut off from it, such as the cells in plants which lie in contact with the segments of the sieve-tubes and communicate with these by means of delicate protoplasmic strands.—**Conducting cells,** in *bot.*, long, narrow cells with perforated walls, associated with sieve-tubes.—**Contractile cell,** in sponges. Same as *myocyte.*—**Cuboid cell,** in *histol.*, an epithelial cell in which the vertical and transverse diameters are equal: distinguished from *columnar* and *pavement* ★*cells.*—**Digestive cells,** in *Hydromedusæ*, certain large cells of the endodermal epithelium, in the protoplasm of which particles of food and masses of excretory matter are sometimes found. They are often amœboid at the outer or free end and contain vacuoles filled with an albuminous fluid.—**Dry cell,** in *elect.*, a voltaic cell for open-circuit work the electrolyte of which is entirely contained within the interstices of some inert porous substance such as plaster of Paris, there being no free mass of liquid.—**Emigrated cell,** a leucocyte which has passed through the wall of a blood-vessel into the surrounding tissue.—**Endothelial cell.** See *endothelium.*—**Epithelial cell.** See *epithelium.*—**Ethmoidal cells,** the cavities, lined with mucous membrane, in the ethmoid bone.—**False cell,** in *entom.*, the postdiscoidal areola in the wings of *Lepidoptera.*—**Ganglionic cell,** one of the cells composing a ganglion; a nerve-cell.—**Germinal cell,** one of the large spherical cells which in the embryonic brain and spinal cord give rise by division to the neuroblasts or primitive ganglion-cells: not to be confounded with *germ-cell.*—**Giant cell.** (*a*) See *giant.* (*b*) One of the multinucleate cells which occur in the red marrow of the bones, or one of the ganglionic cells in the deeper layers of the brain-cortex.—**Hart's cell,** a crossed parallelogram (contraparallelogram) formed of 4 links jointed at their ex-

Hart's Cell.

tremities, the alternate sides of which are equal.—**Interstitial cell,** specifically, one of the small rounded cells which occur in the ectoderm of hydroid polyps and give rise, in some cases, to the nematocysts.—**Jacques cell,** a battery-cell which consists of carbon, fused sodium hydrate, and iron: supposed to act as an oxygen-hydrogen gas cell.—**Mounted Peaucellier cell,** a linkwork which consists of a Peaucellier linkage, the extra link of which pivots a third vertex of the rhombus to a fixed point. See *Peaucellier cell,* under *cell.*—**Parietal cells.** See *oxyntic cells* (under *oxyntic*) and ★*delomorphic.*—**Pavement cells,** the flattened polygonal cells composing pavement epithelium (which see, under *epithelium*).—**Pericardial cell,** in *insect anat.*, any one of a row of cells which are arranged along the heart on both sides and whose function is supposed to be the purification of the blood. *A. S. Packard,* Text-book of Entom., p. 405.—**Polarization cell,** in *elect.*, an electrolytic cell, or any cell containing liquid and developing polarization of the electrodes when traversed by an electric current.—**Polyhedral cell,** in *histol.*, any cell of polyhedral shape, as distinguished from spherical or spheroidal cells.—**Proteid cell,** in *bot.*, a parenchyma cell with abundant proteid contents, such as the cells connected with the sieve-tubes in plants.—**Provost cell,** in the British service, a prison for military prisoners guilty of minor offenses.—**Psychic cells,** the cells in the cortex of the brain upon whose functional activity the mental processes are believed to depend.—**Pyramidal cell,** in *neurol.*, one of the large multipolar neurons or ganglion-cells in the cortex of higher vertebrates.—**Round cell,** in *histol.*, any spherical or spheroidal cell.—**Royal cell,** a cell in which a young queen-bee is reared; a queen-cell.—**Ruhmer cell,** an exhausted glass bulb containing two conductors separated by a film of selenium which under the influence of light increases in electric conductivity, and so can be used for signaling by light rays.—**Scavenger cells,** lymph-cells in nervous tissue. They are supposed to remove waste material.—**Schwann cell,** in *neurol.* and *histol.*, one of the cells composing the 'sheath of Schwann,' a delicate envelop inclosing the axis-cylinder or neuraxon of certain nerve-cells in vertebrate animals.—**Sensory cells,** nerve-cells found in the peripheral sense-organs.—**Somatic cell.** See ★*somatic.*—**Stellate cell,** a cell with a star-shaped body or cytoplasm: a common name for mesenchyme cells, glia or neuroglia cells, etc.—**Supporting cells,** Deiters's cells in the organ of Corti.—**Sustentacular cells,** ordinary epithelial cells serving as a support to more highly specialized cells, such as the hair-cells in the labyrinth of the ear.—**Tipping-cell,** in *electrolysis,* a form of cell supported so as to rock to and fro periodically. By means of the flow of the mercury, which forms one of the electrodes, an interrupted or intermittent electrolytic action is thus produced.—**Transition cell,** in insects, one of the cells which represent the transition from the cells of the tracheal tubes proper to the tracheolar network.—**Wandering cells.** See *wandering* and ★*amœbocyte.*—**Weston cell.** See ★*cadmium cell.*

cellared (sel'ärd), *p. a.* **1.** Kept in a cellar.

> The greater part of the *cellared* fish are exported.
> *C. A. Johns,* Week at Lizard, p. 54. *N. E. D.*

2. Housed in a cellar.

> *Cellared* wretchedness and disease.
> *I. Taylor,* Restoration in Belief, p. 298. *N. E. D.*

cellate (sel'āt), *a.* and *n.* [NL. *cellatus,* ‹ *cella,* cell.] **I.** *a.* Having cells.

II. *n.* A cellate structure. See quotation.

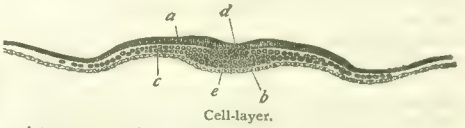
> We have already found that the earth has a *cellate* structure, in the air, the sea, the land, and the nucleus; the elements of this structure we have called spheres or *cellates.* We call the structural elements of the cell, the seed and the plant, blasts or *cellates.*
> *Powell,* Truth and Error, p. 140.

cellated (sel'ā-ted), *a.* [*cellate* + *-ed*².] Same as ★*cellate.*

cell-division (sel'di-vizh″ọn), *n.* The division of a cell, especially in the process of growth.—**Differential cell-division,** division of cells into daughter-cells which are different from one another in their hereditary tendencies; ★heterokinesis (which see).—**Direct cell-division,** in *cytol.*, division of the cell without karyokinetic figures. Same as ★*akinesis,* ★*amitosis,* and ★*karyostenosis.*—**Qualitative cell-division,** ★heterokinesis (which see).—**Quantitative cell-division,** that in which the daughter-cells do not differ in quality from the mother-cell; homœokinesis.

cellepore (sel'e-pōr), *n.* [NL. *cellepora.*] One of the *Celleporidæ.*

celleporite (se-lep'ọ-rīt), *n.* [*cellepore* + *-ite*².] Same as ★*cellepore.*



cell-formation (sel-fôr-mā'shọn), *n.* Same as *cytogenesis.*

cellicolous (se-lik'ọ-lus), *a.* [L. *cella,* cell, + *colere,* dwell.] Living in cells.

cellifugal (se-lif'ū-gal), *a.* [L. *cella,* cell, + *fugere,* flee.] In *neurol.*, moving away from the body of a cell along one or more of its processes: said of the nerve-currents in a ganglion-cell.

cellipetal (se-lip'e-tal), *a.* [L. *cella,* cell, + *petere,* seek.] In *neurol.*, moving toward the body of a cell along one or more of its processes: said of the nerve-currents in a ganglion-cell.

cell-layer (sel'lā″ėr), *n.* In *embryol.*, a layer of cells; specifically, the same as *germ-layer,* or one of the embryonic layers of cells—ecto-

Cell-layer.

A transverse section across the hinder part of the embryonal area of a rabbit embryo at the end of the seventh day; the section passing through the primitive streak. Magnified 40 times. (After Kölliker.)

a, ectoderm; *b*, entoderm; *c*, mesoderm; *d*, primitive groove; *e*, primitive streak. (From Marshall's "Vertebrate Embryology.")

derm, mesoderm, entoderm—from which the organs of the animal body are developed.

cell-mass (sel'mas), *n.* A mass of cells.—**Embryonic cell-mass,** in *embryol.*, a general term for any collection of cells of common origin in the embryo.

cell-nesting (sel'nes″ting), *n.* The formation

of epithelial pearls. *Buck,* Med. Handbook, II. 685.

cellobiose (sel-ọ-bī'ōs), *n.* [*cell*(*ulose*) + *biose.*] A biose, $C_{12}H_{22}O_{11}$, obtained from cellulose by the action of acetic anhydrid and sulphuric acid and subsequent saponification. When heated, it decomposes at 225° C. It reduces Fehling's solution, is dextrorotatory, and gives glucose on hydrolysis.

celloid (sel'oid), *a.* [L. *cella,* cell, + Gr. *εἶδος,* form.] Cell-like; cellular.

celloidal (se-loi'dal), *a.* Same as ★*celloid.*

celloidin (sel'oi-din), *n.* [*celloid* + *-in*².] A pure form of pyroxylin (guncotton). Dissolved in ether and absolute alcohol in varying proportions, it is extensively used in the histological laboratory for the purpose of embedding tissues for sectioning.

celloxin (sel'ok-sin), *n.* [*cell*(*ulose*) + *ox*(*ygen*) + *-in*².] A compound, $C_6H_{10}O_6$ or $C_6H_8O_6$, supposed to be formed by the oxidation of cellulose with hydrogen peroxid and forming a constituent of oxycellulose. The latter is supposed to consist of one molecule of celloxin with one to four molecules of cellulose.

cell-plate (sel'plāt), *n.* In *cytol.*, a plate arising, toward the close of cell-division, from a thickening of the spindle-fibers in the equatorial or division plane. The cell-plate is well developed in plant cells, but small or vestigial in those of animals. See cut under ★*dispireme.*

cell-spot (sel'spot), *n.* A color-spot within the area of the wing-cells of certain lepidopterous insects.

> The black *cell-spots* on the primaries are considerably larger and the apical area is black with scarcely a trace of metallic scaling. *Proc. Zool. Soc. London,* 1902, I. 49.

cellular, *a.* **2.** Filled with cavities, as pumice. *Geikie,* Textbook of Geol., p. 133.—**Cellular bottom.** Same as *double* ★*bottom.*—**Cellular cancer.** Same as *encephaloid cancer.*—**Cellular cooler,** a box which is divided into a series of small cells to increase its radiating surface, so that the material which is to be circulated through it to be cooled will give up its heat quickly. These cells are usually of hexagonal copper pipe through which air is allowed to pass.—**Cellular digestion.** See ★*autolysis.*—**Cellular pathology,** the doctrine of Virchow that the cells are the seat or point of origin of all vital processes.—**Cellular system.** (*b*) In *ship-building,* a system of framing, in iron and steel ships, in which the bottom is divided up into a number of watertight cells or compartments. See *double* ★*bottom.*—**Cellular texture,** in *petrog.*, the texture produced in volcanic lavas by gas-bubbles, which may be of various shapes and sizes. When the cavities are comparatively few and small, the texture is called *vesicular;* when they vary much in size and shape and are about equal in volume to the solid part of the rock, it is *scoriaceous;* when they are minute and very abundant, it is *pumiceous.*

cellularity (sel-ū-lar'i-ti), *n.* [*cellular* + *-ity.*] The state or condition of being composed of cells.

cellulase (sel'ū-lās), *n.* [*cellul*(*ose*²) + *-ase.*] A ferment which causes the decomposition of cellulose. *Jour. Roy. Micros. Soc.,* Feb., 1905, p. 98.

cellulate (sel'ū-lāt), *a.* Same as *cellulated.*

cellulation (sel-ū-lā'shọn), *n.* [*cellulate* + *-ion.*] The development or production of cells.

cellulic (sel'ū-lik), *a.* [*cellule* + *-ic.*] Derived from cells or cellules.—**Cellulic acid,** an acid of doubtful composition, supposed to have been produced by the action of acids or bases on cellulose.

cellulicidal (sel″ū-li-sī'dal), *a.* [L. *cellula,* a little cell, + *-cida,* ‹ *cædere,* kill.] In *pathol.*, cell-destroying or -killing: said of substances in the blood-serum or of other substances noxious to living protoplasm.

cellulicolous (sel-ū-lik'ọ-lus), *a.* [L. *cellula,* a little cell, + *colere,* dwell.] Living in little cells, as the spiders of the group *Cellulicolæ.*

cellulifugal (sel-ū-lif'ū-gal), *n.* [L. *cellula,* cell, + *fugere,* flee, + *-al.*] Moving away from the cell.—**Cellulifugal current,** nervous influence which proceeds from the body of the neuron through the axis-cylinder processes.

cellulifugally (sel-ū-lif'ū-gal-i), *adv.* In a cellulifugal manner.

cellulipetal (sel-ū-lip'e-tal), *a.* [L. *cellula,* cell, + *petere,* seek, + *-al.*] Moving toward the cell.—**Cellulipetal current,** a nerve-current which proceeds toward the body of the neuron.

cellulipetally (sel-ū-lip'e-tal-i), *adv.* In a cellulipetal manner.

cellulith (sel'ū-lith), *n.* [L. *cellu*(*la*), cellule, + Gr. *λίθος,* stone.] A material made by continuing the beating of paper pulp, usually wood-pulp, with water until all trace of fibrous structure has disappeared, adding coloring-material if desired, heating, and gradually evaporating the viscid liquid product to dryness. The material has the mechanical character of

horn or ebonite, and may be worked like either of these. It has the advantage, as compared with celluloid, of burning with difficulty.

cellulofibrous (sel″ū-lō-fī′brus), *a.* [L. *cellula*, cell, + NL. *fibrosus*, fibrous.] Same as *fibrocellular*. *Buck*, Med. Handbook, II. 106.

celluloid[2] (sel′ū-loid), *a.* [L. *cellula*, a cell, + Gr. *εἶδος*, form.] Having the shape or semblance of cells.

cellulose[2], *n.* 2. A light material used as a packing in coffer-dam compartments of warships in the vicinity of the water-line. In the United States navy, cellulose from the husk of the cocoanut and that from the pith of cornstalks have been used for this purpose. See ★*coffer-dam*, 3.—**Cellulose nitrates.** Same as *nitrocellulose*.—**Corn-pith cellulose,** the pith of corn-stalks. It swells rapidly in water and is therefore sometimes used at the back of the armor of battle-ships to prevent water from entering through a shot-hole.

cellulosin (sel′ū-lōs-in), *n.* [*cellulose*[2] + *-in*[2].] A carbohydrate, $C_6H_{10}O_5 + 1\frac{1}{2}H_2O$, formed in small amount by the action of the butyric-acid ferment on starch. It is crystalline and will not ferment, but gives glucose on hydrolysis.

cellulosity (sel-ū-los′i-ti), *n.* [NL. **cellulositas*, < *cellulosus*, full of cells: see *cellulose*[1].] The state or property of consisting of cells; the state of having a cellular structure.

cellulous (sel′ū-lus), *a.* [NL. *cellulosus:* see *cellulose*[1].] Consisting of cells; cellulose.

celluvert (sel′ū-vėrt), *n.* [*cellu*(*lose*[2]) + L. *vertere*, turn.] A trade-name for a plastic material used for the casters of household furniture.

celo (sē′lō), *n.* [L. *cel*(*er*), swift, + *-o*, after *velo*.] An acceleration of one foot per second per second. The celo has been proposed as the unit of acceleration in the system of which the foot is the measure of length, and the velo (a velocity of one foot per second) the unit of velocity.

celsianite (sel′si an-īt), *n.* [Named after Anders *Celsian*, a Swedish naturalist.] A rare silicate of aluminium and barium, occurring in cleavable masses at the manganese-mines of Jakobsberg, Sweden. It is related to the feldspars.

Celtic architecture, cross. See ★*architecture*, ★*cross*[1].—**Celtic ornament,** a peculiar style of decoration found in the Irish manuscripts and in the early monumental crosses of Great Britain. Its chief peculiarities are the entire absence of foliage or other phyllomorphic ornament, and the extreme intricacy and elaboration of interlacing and geometrical patterns.

Celtindic (selt-in′dik), *a.* The same as ★*Indo-Celtic* (with the elements reversed).

Celtologist, Keltologist (sel-, kel-tol′ō-jist), *n.* One who studies the Celtic languages and peoples.

Celtologue, Keltologue (sel′-, kel′tō-log), *n.* Same as ★*Celtologist*.

Celtomaniac, Keltomaniac (sel-, kel-tō-mā′-ni-ak), *n.* One who is over-enthusiastic about the Celtic languages and peoples, ascribing to them a disproportionate importance, influence, and antiquity, in disregard of evidence.

Celtophil, Keltophil (sel′-, kel′tō-fil), *n.* [L. *Celtæ*, Celts, + Gr. *φίλος*, loving.] One who is fond of the Celts or is devoted to Celtic studies and interests.

Celto-Slavic, Kelto-Slavic (sel-, kel-tō-slāv′ik), *a.* and *n.* **I.** *a.* Of or pertaining to both the Celts and Slavs.

II. *n.* The type of man inhabiting the region of the Alps and the districts to the east and to the west, which in olden times were inhabited by Slavic and Celtic peoples. Also called *Alpine*. See ★*Alpine*, 2.

Celto-Teuton, Kelto-Teuton (sel-, kel-tō-tū′ton), *n.* An individual of mixed Celtic and Teutonic descent.

cembalo, *n.*—**Cembalo d'amore,** a musical instrument of the clavichord species, having unusually long strings that were struck at their middle points, so that both halves vibrated. It was sparingly used in the eighteenth century. Not to be confused with the clavicembalo, which was a harpsichord.

cement, *n.*—**Beeswax cement,** a cement made of 5 parts of beeswax, 8 parts of rosin, and a varying proportion of Venetian red: used for uniting glass to metal, as in chemical apparatus.—**Diamond cement,** cement used in setting diamonds. That used by American jewelers is composed of gum mastic and isinglass dissolved in spirits of wine. *G. W. Cox*, Cyc. Com. Things, p. 117.—**Keene's cement,** a cement made by calcining very pure gypsum, treating with a solution of alum, drying, recalcining at a high temperature, and grinding to a fine powder: used as stucco, and capable of a high polish.—**Parian cement,** a cement made by a process similar to that for Keene's cement, substituting borax for alum: used as stucco.—**Pozzuolana cement,** a mixture of fat lime and pozzuolana: an early form of hydraulic cement.—**Rust cement,** a material used for making tight joints in cast-iron construction, as in lines of iron pipe, socketing iron pillars into their bases of the same metal, etc., which consists of iron turnings moistened with a watery solution of sal ammoniac or with dilute hydrochloric acid, a little sulphur being sometimes added. The turnings rapidly rust and soon set into a compact mass.—**Silicious cement,** a mixture of soluble glass, in syrupy solution, and chalk, marble dust, or other materials.—**Slag cement,** hydraulic cement made from blast-furnace slag and lime.—**Sorel's cement,** a builders' cement produced by mixing thoroughly calcined magnesia with a concentrated solution of magnesium chlorid, the mixture soon setting to a hard, solid mass, which may be polished. It consists essentially of magnesium hydroxy-chlorid.—**Sorel's magnesia cement,** an oxychlorid of magnesium: used as stucco.

cementation, *n.* 3. In *petrog.*, the cementing of fragments or grains of a porous or incoherent rock by infiltration and deposition of mineral matter from solution. The commonest cementing-materials are carbonates, silica (usually as quartz), and silicates.—4. The solid fixation to extraneous objects by the substance of the shell or test, as in the entire class of corals and sporadically in the *Brachiopoda*, *Pelecypoda*, *Vermes*, etc. Cementation is the cause of, or is followed by, symmetrical growth accompanied by a high development of loose cellular calcareous tissue. Brachiopods and pelecypods thus attached assume an obconical form and often present the aspect and structure of a coral, as they bear similar relations to the surrounding medium.

5. In *bot.*, the growing together of the hyphæ of fungi. Same as *concrescence*, 4.—6. A process in which two solid substances in contact, upon being heated, pass into and penetrate one another without melting.

cementation-steel (sem-en-tā′shon-stēl), *n.* Steel made by the process of cementation.

cement-gland, *n.* 2. A gland which serves to fasten its possessor to a foreign body. Specifically—(*a*) in platyhelminths, one of the glands whose secretion causes the eggs to adhere together or to a foreign body, or incloses them in a cocoon; (*b*) in *entom.*, one of a pair of cement-secreting glands occurring in the bees and ants and discharging their secretion through the sting. They correspond to the tubular glands of the *Orthoptera*.

cement-gold (sē-ment′gōld), *n.* Gold precipitated in fine particles from liquid solution.

cementing-machine (sē-men′ting-ma-shēn″), *n.* In *shoe-manuf.*, a machine for distributing hot cement upon the soles of shoes, removing the surplus, and pressing the pieces of leather together; a cementer.

cementite (sē-ment′it), *n.* [*cement* + *-ite*[2].] A carbide of iron having the formula Fe_3C. All unhardened steels (except a few alloy steels) contain more or less cementite, and all the carbon of unhardened steels (omitting certain alloy steels) is present in the form of cementite. Cementite confers strength and hardness on steel and lessens its ductility. It is the hardest, strongest, and most brittle of all the constituents of steel now known. It crystallizes in thin white plates and may be isolated by chemical means or distinguished under the microscope. The name *cementite* was given to this compound by H. M. Howe, because what used to be called 'cement carbon' or 'carbon of cementation' occurred in the form of Fe_3C.

cementoblast (sē-men′tō-blast), *n.* [L. *cæmentum*, in NL. cement, + Gr. *βλαστός*, germ.] In *embryol.*, one of the cells which take part in producing the cement-layer of the developing tooth.

cementoma (sē-men-tō′mä), *n.*; pl. *cementomata* (-ma-tä). [NL. **cæmentoma*, < *cæmentum*, cement, + *-oma*.] A tumor resembling in structure the dental cementum.

cementome (sem′en-tōm), *n.* [L. *cæmentum*, in NL. cement, + *-oma*.] In *pathol.*, one of the neoplasms or odontomata derived from the cement-organ of a tooth. *Sutton*, 1893.

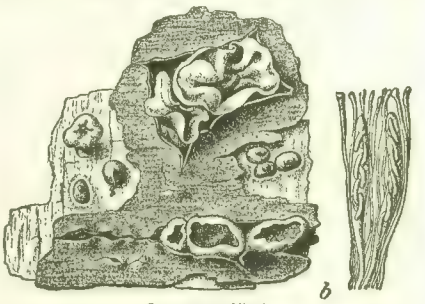
cement-organ (sē-ment′ôr-gan), *n.* In *embryol.*, the mass of cells which gives rise to the cement-layer of the developing tooth.

cement-silver (sē-ment′sil″vėr), *n.* Silver precipitated by cementation.

cement-steel (sē-ment′stēl), *n.* Same as ★*cementation-steel*.

Cement-stone group. See *Tuedian*.

cement-tester (sē-ment′tes″tėr), *n.* A testing-machine especially designed to test samples of cement which have been molded in certain standard molds so as to make a specimen of a definite cross-section. The machine is provided with shackles to grasp the specimen.



cen. An abbreviation (*a*) of *central;* (*b*) of *century*.

cenacle (sen′a-kl), *n.* [L. *cenaculum*, a dining-room, usually in the upper story, hence an upper room; < *cena*, dinner.] A dining-room; specifically, the room in which the Last Supper was eaten.

cenacolo (che-nä′kō-lō), *n.* [It., < L. *cenaculum*.] The Italian name for the last supper of Jesus and his disciples, a favorite subject with painters. Important examples are the pictures by Leonardo da Vinci at the church of Santa Maria delle Grazie in Milan, by Andrea del Sarto at the convent of San Salvi in Florence, and by Tintoretto in the Church of San Giorgio Maggiore in Venice.

Cenangiaceæ (sē-nan-ji-ā′sē-ē), *n. pl.* [NL., < *Cenangium* + *-aceæ*.] A family of discomycetous fungi characterized by dark-colored, leathery ascomata and more or less elongate one-celled or many-celled spores.

Cenangium (sē-nan′ji-um), *n.* [NL. (Fries), < Gr. *κενός*, empty, + *ἀγγεῖον*, vessel.] A large genus of discomycetous fungi, type of the family *Cenangiaceæ*, having the ascomata sessile, more or less irregular in shape, dark-colored, and of a leathery or waxy texture. The spores are hyaline and one-celled. The species are widely distributed, and occur mostly on woody plants. Many are regarded as parasitic.

Cenangium Ulmi.

a, several plants growing on a dry decorticated branch of the common English elm, *Ulmus campestris*, showing the habit; *b*, spore-cases and paraphyses, magnified. (From Engler and Prantl's "Pflanzenfamilien.")

cenobian (sē-nō′bi-an). *a.* and *n.* [*cœnobi*(*um*) + *-an*.] **I.** *a.* Pertaining to the life of a cenobite.

The *cenobian* rule to which many of the monasteries still adhere was established by St Athanasius, the founder of the great monastery of Laura, in 969.

Encyc. Brit., XXX. 399.

II. *n.* A monk living in a community under rule.

cenocyte (sen′ō-sīt), *n.* [Gr. *κοινός*, common, together, + *κύτος*, a hollow (a cell).] In *bot.*, a vegetative body consisting of a number of nuclei with the surrounding protoplasm and other cell-constituents inclosed within a cell-wall. The *Phycomycetes* among the fungi and the *Siphonales* among the algæ are common examples.

cenocytic (sen-ō-sit′ik), *a.* [*cenocyte* + *-ic*.] In *bot.*, of or pertaining to, or of the nature of, a cenocyte.

cenogenesis, cenogenetic, etc. See *kenogenesis, kenogenetic*, etc.

cenogenic (sen-ō-jen′ik), *a.* Same as ★*kenogenic*.

Cenomanian (sen-ō-mā′ni-an), *a.* [ML. *Cenomania*, now Le Mans, in France, < L. *Cenomani*, Gr. *Κενομάνοι*, a Gallic people of northern Italy.] 1. Of or pertaining to the ancient Celtic tribes of Gaul known as the *Cenomani* (which see in the Century Cyclopedia of Names.)—2. In *geol.*, noting a subdivision of the Upper Cretaceous period represented in France by the gravels of the department of Perche, the glauconitic chalk of Rouen, and the gray chalk of Boulogne, corresponding in Great Britain to the Lower Chalk and Upper Greensand, and in the United States to the Dakota epoch.

cenopsychic (sen-ō-sī′kik), *a.* [Gr. *καινός*, recent, + *ψυχή*, mind.] In *psychol.*, of recent or late appearance in mental evolution: opposed to ★*palæopsychic*. *G. S. Hall*, Adolescence, II. 358.

cenopythagorean (sen″ō-pi-thag-ō-rē′an), *a.* [Gr. *καινός*, recent, + E. *Pythagorean*.] Of or pertaining to a modern doctrine which resembles Pythagoreanism in accepting universal categories that are related to and are named after numbers.

cenorescent (sen-ō-res′ent), *a.* [Appar. irreg. < Gr. *καινός*, recent, new, + (*flu*)*orescent*.] Same as *fluorescent*. [Rare.]

cenosite (sen′ō-sīt), *n.* [Irreg. < Gr. *καινός*, novel, + *-ite*[2].] A silicate and carbonate of the yttrium metals and calcium, occurring in yellowish-brown prismatic crystals: found in Norway and Sweden. Also *cainosite* and *kainosite*.

cenotaph (sen′ō-taf), *v. t.* [*cenotaph, n.*] To honor or commemorate with a cenotaph. *J. H. Boner*, Poe's Cottage, st. 7.

cenotaphic (sen′ō-taf-ik), *a.* Pertaining to or of the nature of a cenotaph.

cenote (se-nō′te), *n.* [Yucatan Sp., < Maya *conot.*] A natural underground reservoir of water, such as is found in the limestone of Yucatan, used by the natives for drawing water: the presence of such reservoirs determines the location of the larger villages.

The most notable examples of sacrifices of this general class are recorded by explorers of Central and South America, where offerings of gold and precious things of various kinds were cast into lakes, streams, springs, and the deep *cenotes*, or natural wells, to appease the gods believed to dwell therein.
Amer. Anthropologist, Jan.–March, 1902, p. 128.

cenozoölogy (sē″nō-zō-ol′ō-ji), *n.* [Gr. *καινός*, recent, + E. *zoölogy.*] That branch of biological science which treats of living, as contrasted with extinct, animals. Also *cænozoölogy* and *cainozoölogy.*

cenquad (sen′kwod), *n.* [L. *cen(tum)*, hundred, + *quad(rus)*, four-sided.] A quadrilateral whose diagonals bisect each other.

censor (sen′sor), *v. t.* To subject to the examination, revision, or expurgation of a censor: as, to *censor* a book, periodical, play, or the like; especially (*milit.*), to subject (press despatches, etc.) to scrutiny with a view to suppressing information which, if made public, might embarrass military operations.

censored (sen′sord), *p.a.* Passed upon, revised, or expurgated by a censor: as, *censored* war news.

censorize (sen′sor-īz), *v. t.* To subject to the inspection and revision of the censor.

census, *n.* **3.** In *topical geom.*, a number referring to a geometrical figure and formed by subtracting the sum of the cyclosis and apeiry of the figure from the sum of the choresis and periphraxis. If the figure is composed of parts of different dimensionality, the census should be taken separately for the points, lines, surfaces, and solids, and the final census formed by subtracting the sum of the censuses of the lines and the solids from the sum of the censuses of the points and the surfaces. This use of the word was introduced by J. B. Listing.—**Bureau of the Census.** See ★*bureau.*

cent, *n.* **5.** A name of various coins reckoned as the hundredth part of a dollar. (*a*) A current subsidiary coin of British North America, British Guiana, British Honduras, the Danish West Indies, Hawaii, Fiji, Liberia, Cuba, Guam, the Philippine Islands, and Porto Rico, equal to one United States cent. (*b*) A current subsidiary coin of North Borneo, Hong-Kong, Labuan, Sarawak, and Straits Settlements, equal to about one half of a United States cent. (*c*) A current coin of Ceylon, Mauritius, and Seychelles, the hundredth part of a rupee, equal to about thirty-two hundredths of a United States cent. (*d*) A current subsidiary coin of the Netherlands and the Dutch colonies, the hundredth part of a florin or gulden, equal to forty hundredths of a United States cent.—**Cent de escudo,** a subsidiary coin of Spain and the Spanish colonies, the hundredth part of an escudo.—**Cent de peseta,** a subsidiary coin of Spain and the Spanish colonies, the hundredth part of a peseta.—**Cent de peso,** a subsidiary coin of the Spanish colonies, the hundredth part of a peso or dollar.—**Elephant cent,** an English copper token bearing the device of an elephant, struck in 1694 for the Carolinas.—**Franklin cent, ring cent, sun-dial cent.** Same as *fugio* ★*cent.*—**Fugio cent,** a copper coin struck by act of Congress in 1787: so called from the inscription ("Fugio"). Also called *Franklin cent, ring cent, sun-dial cent,* etc.—**Silver-center cent,** a pattern cent struck in 1792, with a small silver plug in the center.—**Wreath cent,** a copper cent of the United States first struck in 1793: so called from the wreath on the reverse.

cent. An abbreviation (*b*) of *central;* (*c*) of *centigrade;* (*d*) of *century.*—**Cent. per cent.,** a hundred for every hundred; interest equal in amount to the principal.—**Three per cents., four per cents., five per cents.,** etc., public securities bearing that rate of interest.

Cental system, the system of buying and selling grain by the *cental,* in use in the Liverpool corn-market since 1859, approved by an Order in Council in 1879, and proposed for general use in the United Kingdom.

centare (sen′tār), *n.* Same as *centiare.*

centaurdom (sen′târ-dum), *n.* [*centaur* + *-dom.*] The union of two diverse natures as typified by the centaur of classic mythology.

There are here and there certain literary and intellectual heresies and heretics refusing to recognize *Centaurdom* as the highest of human good.
W. J. Stillman, in The Century, Oct., 1883, p. 826.

centauresque (sen-târ-esk′), *a.* [*centaur* + *-esque.*] In the style or manner of a centaur; centaur-like.

Something *centauresque* and of twofold nature.
Mrs. Browning, Greek Chr. Poets, p. 160. *N. E. D.*

centauric (sen-tâ′rik), *a.* [*centaur* + *-ic.*] Of, pertaining to, or of the nature of the centaur; typified by the centaur.

Centauridium (sen-tâ-rid′i-um), *n.* [NL. (Torrey and Gray, 1841), < *Centaurea* + Gr. *εἶδος*, form; from the resemblance of the flower-heads to those of some species of *Centaurea.*] The old generic name of *Xanthisma Texanum,* an annual or biennial flower-garden composite with large yellow heads. It is known to florists as *Centauridium Drummondii.* There is only one species, and this is native to the southwestern region of the United States.

centaurin (sen′tâ-rin), *n.* [*Centaur(ea)* + *-in*2.] Same as ★*erythrocentaurin.*

Centaurion (sen-tâ′ri-on), *n.* [NL. (Adanson, 1763, adopted from Tournefort, 1700), < Gr. *κενταύριον*, a plant said to have cured an arrow-wound in the foot of the centaur Chiron.] A genus of dicotyledonous plants belonging to the family *Gentianaceæ.* See *Erythræa.*

centaury, *n.*—**Californian centaury.** Same as *canchalagua.*

centavo, *n.* **2.** A current coin of Bolivia, the hundredth part of a boliviano.—**3.** A current coin of Ecuador, the hundredth part of a sucre, equal to forty-nine hundredths of a United States cent.

centenarial (sen-te-nā′ri-al), *a.* [*centenary* + *-al.*] Of or pertaining to a centenary, or space of a hundred years; completing or commemorating the completion of a hundred years: as, a *centenarial* day; a *centenarial* celebration.

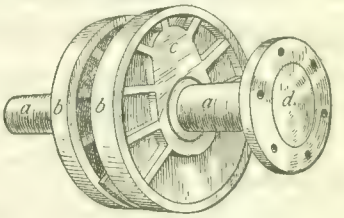
centenier, *n.* **2.** A police officer in the island of Jersey.

centenionalis (sen-ten″i-ō-nā′lis), *n.* [LL. (sc. *nummus*), < **centenio(n-)*, < *centeni,* a hundred each: see *centenary.*] A Roman silver coin of Constantine the Great.

centennial, *n.* **2.** A dice game in which the object is to secure pips, or multiples of pips, which will make the figures from 1 to 12, and then from 12 to 1, in numerical order.

centennium (sen-ten′i-um), *n.*; pl. *centennia* (-ä). [NL. *centennium.*] The space of one hundred years; a century.

center1, *n.* **13.** A point so situated with regard to a locus that all chords of the locus, drawn through the point, are bisected in it. The pole of a straight at infinity with respect to a certain conic is the center of the conic.



The *center* of a hyperbola lies without the curve, since the figurative straight crosses the curve.
Merriman and Woodward, Higher Mathematics, p. 95.

14. In foot-ball, roller-polo, basket-ball, hockey, and other games, the one who plays in the middle of the forward line; in foot-ball, the snap-back.—**Accelerating center,** a point in the medulla oblongata whence pass nerve-fibers stimulation of which causes increased rapidity of the heart's action.—**Apperception center,** an inhibitory cortical center, hypothetically placed by Wundt in the frontal lobes, subserving the elementary function of apperception. *W. Wundt* (trans.), Physiol. Psychol., I. 315.—**Association center, auditory center.** See ★*association,* ★*auditory.*—**Brain center.** (*a*) A cortical center; a region or area of the cerebral cortex, more or less sharply delimited by structure and function. (*b*) Any group or collection of cells, within the brain, that subserves a single function.—**Broca's center.** Same as *speech-center.*—**Center of action,** in *meteor.*, a large area of high or low barometric pressure which forms a prominent feature of the daily weather-map.—**Center of aspiration,** in *meteor.*, the region in a cyclonic storm where air is ascending, toward which the lower air rushes or is being pushed, and near which it also will ascend, cool, and become a center of condensation and a new center of aspiration or 'center of power.'—**Center of Budge,** a nervous center existing in the spinal cord in the region of the second lumbar vertebra. In the male it is the erection center, in the female the parturition center. Also called *genital* or *genitospinal center.*—**Center of compression,** that point in the section of a body under stress at which the resultant of the compressive forces can act without disturbing the equilibrium of the system of forces; the center of gravity of the compressive forces.—**Center of contact.** See ★*contact.*—**Center of flotation,** the geometrical center of the plane figure bounded by the line in which a liquid cuts a body floating in it: said of ships and other vessels. See ★*flotation.*—**Center of form,** the geometrical center of a body.—**Center of immersion.** Same as *center of buoyancy.*—**Center of inversion.** See *geometrical inversion,* under *inversion.*—**Center of involution.** See *involution,* 6 (*c*).—**Center of lateral resistance.** See ★*resistance.*—**Center of moments,** the fulcrum, or that point about which a force, or a system of forces, is supposed to act at a given instant with a motion of rotation.—**Center of population,** a point on the map of a country or region about which the population considered numerically is conceived to be equally distributed in all directions.—**Center of power,** a term applied by Ferrel to that region in a storm-area or cyclone where the condensation of aqueous vapor is proceeding most effectively. This center is continually being renewed a little in advance of its former position.—**Center of pressure.** (*a*) and (*b*). See *pressure.* (*c*) The point at which a body must be supported in order to remain quietly balanced when the wind is blowing on it. For plane plates the location of the center as determined by Kümmer varies with the dimensions of the plate, but is always in front of the center of the figure.—**Center of projection.** (*b*) Any one of the various sensory and motor regions of the brain.—**Center of tension,** that point in the section of a body under stress at which it can be assumed that the resultant of all the tensile stresses is acting without disturbing the equilibrium of the forces acting; the center of gravity of the tensile stresses acting on the section. **Center of vision.** (*a*) Same as *point of vision* (which see, under *point*1). (*b*) The visual center

of the retina, where sight is keenest. Also called the *yellow spot.* See *macula lutea,* under *macula* and also under *retina* (10).—**Center stroke.** See ★*stroke*1.—**Curve of centers of buoyancy.** See ★*curves of ship calculations.*—**Diabetic center,** a point in the floor of the fourth ventricle of the brain, injury or irritation of which gives rise to glycosuria.—**Direct center of similitude,** a center of similitude having the corresponding perspective sects on the same side of it. See *center of similitude.*—**Eruptive center,** a point or district where the greatest volcanic activity of a region has taken place.—**Genital or genitospinal center.** Same as ★*center of Budge.*—**Gustatory center,** the center for taste, supposed to be located in the uncinate gyrus of the brain.—**Heat center,** the nervous center which presides over the production of heat in the body.—**Instantaneous center.** (*a*) When motion is considered in only two dimensions, the point at which the instantaneous axis intersects the guide-plane. (*b*) The center about which any moving piece or assemblage of pieces in a mechanism can be supposed to be rotating at any instant. Notwithstanding that the relative positions of such pieces or links may be constantly changing, yet at any instant they will be turning round a common center, which, however, shifts in space with each new relative position of the links. The determination of the virtual center, as it is sometimes called, is of use in estimating the relative velocity-ratios and forces acting on the bodies.—**Kinetic center,** in *cytol.*, a term applied to the centrospheres derived from the spermatozoön after its entrance into the egg; they constitute the poles of the first cleavage-spindle.—**Motor center,** the area in the cerebral cortex, in the convolutions around the upper end of the fissure of Rolando, where originate the nervous impulses which cause muscular contraction.—**Olfactory center,** the center for smell in the cortex of the brain.—**Oval center.** Same as *centrum ovale.*—**Phrenic center,** the central aponeurosis of the diaphragm.—**Psychical center,** in current *physiol.*, and *psychol.*, any center of the cortex (using 'center' in the sense defined under *brain* ★*center* (*a*)) which is not directly sensory, motor, or sensory-motor: identical with the '*association center*' of Flechsig.—**Thermolytic center,** one of the heat-centers stimulation of which inhibits the production of heat.—**Virtual center.** Same as *instantaneous* ★*center.*

center-bearing (sen′tėr-bār″ing), *n.* In *car-building,* the chief system of supporting the weight of a car upon its truck: distinguished from a *side-bearing,* or a *fixed bearing,* as in a small car having no trucks; also the place where the weight of the car-body rests upon the center-plates and where the center-pin joins the car to the truck. The *center-bearing beam* is the beam which supports the truck center-plate and, in six-wheel trucks, is supported by the *center-bearing bridge.* See *body center-plate, center-plate block,* and cut under *car-truck.*

center-crank (sen′tėr-krank), *n.* A form of double crank in which the arms are replaced by two solid disks, coupled together by the crank-pin on which the connecting-rod is fitted. Such crank-shafts have bearings on each side of the double crank.

Center-crank.
a, a, engine-shaft journals; *b, b,* crank-disks; *c,* end of crank-pin; *d,* flange to couple crank-shaft to generator-shaft.

centering-chuck (sen′tėr-ing-chuk), *n.* A form of face-plate for a lathe, which carries three or four jaws for holding work. These jaws are so connected by gearing as to move radially together equally from or toward the center, so that work in the jaws is automatically brought into the axis around which they revolve. Also used for holding drills in drill-presses.

centering-machine (sen′tėr-ing-ma-shēn″), *n.* A device for marking or drilling the holes for the centers of a lathe, so that these holes shall be in the center of figure of the piece to be marked or drilled.

centering-rest (sen′tėr-ing-rest″), *n.* A V-rest made of two straight pieces placed at an angle to one another, used in a lathe for marking centers in cylindrical pieces. It is fastened to the tool-carriage, the piece to be centered resting in the angle formed by the straight sides. A cutting-tool in the tail-stock marks the center exactly concentrically with the outside as the piece is revolved.

center-line (sen′tėr-līn), *n.* **1.** A line dividing any symmetrical plane figure or surface of revolution into two symmetrical halves.—**2.** The line around which any figure may be revolved to generate a volume of revolution.—**3.** The line in a drawing on each side of which points in the diagram or figure lie at equal distances. In all designing of symmetrical constructions the center-lines are drawn first, and from these all dimensions are laid off.—**4.**

pl. The lines through the center of mass or center of gravity of a body parallel to the three coördinate axes used in analytical geometry. —**5.** The line joining the centers of two parallel shafts in the same plane, or perpendicular to both axes if they are not in the same plane, in the design of toothed gearing. See also *line of center*, under *line*[2].

center-plate, *n.* **2.** One of the metal plates fastened to the ends of jointed patterns to furnish a suitable bearing for the lathe-centers and to hold the pattern together while it is being turned.

center-square (sen'tėr-skwār), *n.* An instrument used for finding the center of a circle or of an arc of a circle. It comprises two straight-edges which make about a right angle with one another and a third straight-edge one side of which bisects the angle between the other two. When the two outer edges are placed against the circumference of a circle, the bisecting edge points to the center. By drawing a line along the bisector and then shifting the instrument to a new position and drawing another line along the bisector, intersecting the former line at a considerable angle, the center of the circle will be determined by the intersection of the two lines.

center-tester (sen'tėr-tes″tėr), *n.* An appliance for finding the exact center of any piece of work in a lathe or for testing the accuracy of lathe-centers. It consists of a fine steel needle pivoted to a steel plate that fits the tool-post of the lathe.

centesis (sen-tē'sis), *n.* [NL., < Gr. *κέντησις*, puncture, < *κεντεῖν*, puncture, prick.] Same as *paracentesis*.

centgener (sent'jē-nėr), *a.* and *n.* [L. *centum*, hundred, + *genus* (*gener-*), kind.] **I.** *a.* Concerning or pertaining to one hundred or any considerable number of representatives of a race, variety, or strain of domesticated animals or cultivated plants, when considered as a type or pure sample of the whole.

The American trotter is being rapidly improved, because distance does not hinder the transmission of individual records, of *centgener* records (here the number of progeny which each sire or dam has in the fast trotting list).
Yearbook U. S. Dept. Agr., 1901, p. 230.

II. *n.* **1.** One hundred or any considerable number of representatives of a race, variety, or strain of domesticated animals or cultivated plants, considered as a type or true sample of the whole.

The second year 100 plants, called for convenience a *centgener*, from each of the 100 mother plants chosen as above, are similarly grown in the nursery plats.
Yearbook U. S. Dept. Agr., 1901, p. 225.

2. Specifically, the separately planted seminal or klonal progeny of a single parent, as a nursery-plat from one wheat plant, or the progeny of an animal so raised that their average values may be secured as a measure of the breeding-value of the parent.—**Centgener power,** the hereditary power of parents expressed in the terms of the average values of their progeny: for example, the average progeny of one wheat plant is 8.4 grams of seed, of another 7.7 grams of seed, or the progeny of one flax-plant stands 26 inches high, of another, 35 inches; one horse produces colts weighing 1,500 pounds, another, colts weighing 1,250 pounds.—**Centgener tests,** tests of the centgener powers, or breeding ability, of numerous parents: as, by planting, under like conditions, centgeners of wheat, corn, etc.; comparing the average of the progeny of one animal with the progeny of another; or contrasting the speed of the colts of a racing stallion, or the producing-power of the heifers of dairy sires or dams.

centig. An abbreviation of *centigrade*.

centigraph (sen'ti-grȧf), *n.* [L. *centum*, a hundred, + Gr. *γράφειν*, write.] An adding-machine having a figure-wheel with serial numbers (0 to 100, inclusive) and a dial which indicates hundreds. It is operated by a wound spring escapement and fingered keys.

centile (sen'til), *n.* [L. *centum*, a hundred, + *-ile*.] An object or term occupying a place whose ordinal corresponds to 100 or a multiple of 100.

centillion (sen-til'iọn), *n.* In the French enumeration, used also in the United States, the hundredth power of 1,000; in the United Kingdom, the hundredth power of 1,000,000.

centillionth (sen-til'iọnth), *n.* and *a.* **I.** *n.* One of a centillion equal parts; the quotient of unity divided by a centillion.

II. *a.* **1.** Coming last in a set of a centillion terms: an ordinal numeral.—**2.** Being one of a centillion equal parts.

centim (sent'im), *n.* [*centim(eter)*.] A centimeter; the second metret or decimal submultiple of a meter in the scheme of magnitudes, devised, about 1860, by G. J. Stoney. The decim or decimeter is the first metret, and the millim (or millimeter) the third. See ★*metro* and ★*metret*.

centime, *n.* **2.** A current money of account in Haiti, the hundredth part of a gourde or dollar, equal to ninety-seven hundredths of a United States cent.

Centimeter-gram-second system. In *elect.*, two systems of such units exist, namely, the *electromagnetic system*, based on unit magnetism as that magnetism which acts upon an equal amount of magnetism at unit distance with unit force, and the *electrostatic system*, based on unit electric quantity as that quantity which acts upon an equal quantity at unit distance with unit force. The electromagnetic system of absolute units is commonly used. Many of its units, however, are inconveniently small or inconveniently large, and therefore decimal multiples or fractions are used as practical units. These practical units are named after famous scientists: as, *ampere*, *volt*, etc.—**Cubic centimeter.** (*a*) A unit of volume equal to a cube whose edge is one centimeter. (*b*) More commonly, the thousandth part of a liter. The liter was intended to equal one thousand cubic centimeters and the weight of one liter of distilled water at the temperature of its maximum density was intended to equal the kilogram. The mass of the kilogram definitely adopted differs from the intended mass by one or more parts in a hundred thousand: since the liter is always determined by weighing, it also differs from its intended volume by a similarly small fraction. When this small fraction is negligible, the thousandth part of a liter is commonly called a cubic centimeter. The name *milliliter* is preferred by many for the thousandth part of the liter.

centimo (then'tē-mō), *n.* [Sp.: see *centime*.] **1.** A current subsidiary coin of Costa Rica, the hundredth part of a colon, equal to forty-six hundredths of a United States cent. Silver pieces of 5, 10, 25, and 50 centimos are coined.—**2.** A current subsidiary coin of Venezuela, the hundredth part of a bolivar, equal to nineteen hundredths of a United States cent.—**3.** A subsidiary coin of the Dominican Republic, the hundredth part of a franco, or franc, equal to seventeen hundredths of a United States cent.

centinormal (sen-ti-nôr'mal), *n.* [L. *centum*, hundred, + E. *normal*.] In *chem.*, containing in each liter, as a solution, a number of grams of the dissolved substance numerically equal to one hundredth part of its molecular weight, or, in some cases, of its equivalent weight.

centiplume (sen'ti-plūm), *a.* [L. *centum*, hundred, + *plūma*, feather.] Having a hundred feathers: applied to most of the moths of the family *Pterophoridæ* (which see).

centoism (sen'tọ̄-izm), *n.* Same as *centonism*.

centoize (sen'tọ̄-īz), *v. t.*; pret. and pp. *centoized*, ppr. *centoizing*. [*cento* + *-ize*.] To make into a cento.

Eudocia . . . wife of Theodosius, and empress of the world, thought good to extend her sceptre . . . over Homer's poems, and *cento-ize* them into an epic on the Saviour's life.
Mrs. Browning, Greek Christian Poets, p. 66.

centonical (sen-ton'i-kal), *a.* [*cento*(*n*) + *-ic-al*.] Of the nature of a cento.

centonize (sen'tō-nīz), *v. t.* [L. *cento*(*n-*), a cento, + *-ize*.] Same as ★*centoize*.

centractinate (sen-trak'ti-nāt), *a.* [Gr. *κέντρον*, center, + *ἀκτίς* (*ἀκτιν-*), ray.] In sponge-spicules, having a projection or actine at the center: as, a *centractinate* sigma.

centradenia (sen-tra-dē'ni-ȧ), *n.* [NL., < Gr. *κέντρον*, center, + *ἀδήν*, a gland.] A cellular mass, the so-called liver or central organ, found in certain *Siphonophora*. *E. R. Lankester*, Treatise on Zoöl., ii. 4.

central, *a.* **4.** In *anat.*, of or relating to the centrum of a vertebra.—**5.** In *neurol.*, pertaining to a nerve-center: opposed to *peripheral*, or pertaining to the nerve-fibers or to the nervous terminations in sense-organs and muscles.—**Central arteries of the brain,** branches from the circle of Willis which pass to the central ganglia.—**Central body, disk.** See ★*body*, ★*disk*.—**Central granule,** in *bot.*, one of the slime-globules or -granules in the cytoplasm of certain alga cells, *Cyanophyceæ*.—**Central gyri, nervous system.** See ★*gyrus*, ★*nervous*.—**Central particle,** in *cytol.*, same as ★*centrosome*.—**Central reaction.** See ★*reaction*.—**Central symmetry,** in *geom.*, symmetry with respect to a center.

II. *n.* In a *telephone system*, the office from which the public and private lines radiate and in which the connections are made between the different lines, by means of a central switch-board.

central[2] (sen-träl'), *n.*; pl. *centrales* (-trä'lās). [Sp.] Cane-grinding apparatus which serves for several sugar plantations. [Cuba and Porto Rico.]

centrale, *n.* **2.** In *crinoids*, same as *centrodorsal*.

centralistic (sen-tral-is'tik), *a.* Of, pertaining to, or favored by the centralists.

centrality, *n.* **2.** In the Hegelian logic, firstness; native character; the total character which belongs to an object regardless of anything else.

centrangulate (sen-trang'gū-lāt), *a.* [L. *centrum*, center, + NL. *angulatus*, angled.] In sponge-spicules, having a bend or angle at the center: as, a *centrangulate* sigma.

centraporia (sen-trä-pō'ri-ȧ), *n. pl.* [NL., < Gr. *κέντρον*, center, + *ἄπορος*, without passage: see *aporia*.] Organisms that are without fixed axes or planes, and are hence irregular in shape: for example, the sponges. *Haeckel*.

centraxonia (sen-trak-sō'ni-ȧ), *n. pl.* [NL., < Gr. *κέντρον*, center, + *ἄξων*, axis.] Organisms, of radial structure, having a median axis represented by a line, like the *Cœlenterata*.

centraxonial, *a.* **2.** Of or pertaining to the centraxonia.

centric, *a.* **3.** In *petrog.*, applied by Becke (1878) to rock fabrics formed by the grouping of crystals about a center, radially or concentrically.

centricality (sen-tri-kal'i-ti), *n.* [*centrical* + *-ity*.] Central position or situation.

centrifugal. I. *a.* **4.** Obtained (as milk or cream) by the ★centrifugal method (which see).

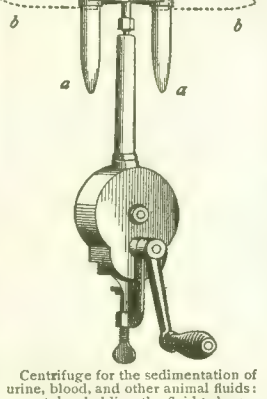
Fresh butter, made from sweet *centrifugal* cream.
Yearbook U. S. Dept. Agr., 1900, p. 613.

Centrifugal concentrator, governor, machine. See ★*concentrator*, *governor*, 6, ★*centrifugal*, *n.*, 3.—**Centrifugal method,** in *dairying*, the separating of cream from milk by means of a separator (centrifugal), as distinguished from the separation of cream by allowing the milk to stand and then removing the cream by skimming.

II. *n.* **3.** A trade-name for any machine which employs centrifugal force to separate a liquid from a solid or to separate liquids of different specific gravities. In all, the liquids to be separated, or the liquids and solids, are placed in a vessel which is rotated at a high speed, the lighter liquids being thrown off to the sides of the vessel where they overflow and escape, or the liquids mingled with the solids being thrown outward through perforations in the sides of the vessel. The cream-separator is an example of the first and the laundry extractor an example of the second method. Machines which are essentially centrifugal are given different names in different trades, as *centrifugal extractor* (or simply *extractor*), *honey-extractor*, *cream-separator*, *centrifugal drier*, *hydro-extractor*, *Babcock's centrifugal* or *milk-tester*. See *drier*, ★*extractor*, ★*honey-extractor*, ★*milk-tester* (with cut), and *separator*.—**Babcock's centrifugal.** See *Babcock's* ★*milk-tester*.

centrifugalization (sen-trif″ū-gal-ī-zā'shọn), *n.* [*centrifugalize* + *-ation*.] The process of centrifugalizing.

Our examinations were made on very fresh organ juices, blood, etc., taken at various stages of the disease, with and without *centrifugalization*, and on specimens fixed and stained in appropriate ways.
Science, March 29, 1901, p. 513.



centrifugalize (sen-trif'ū-gal-īz), *v. t.*; pret. and pp. *centrifugalized*, ppr. *centrifugalizing*. [*centrifugal* + *-ize*.] To subject to centrifugal action; cause the separation of two liquids, or of solids suspended in a fluid, by rapid rotation in a centrifugal machine. See ★*centrifugal*, *n.*, 3.

He also *centrifugalized* dogs and rabbits. When the feet were directed outwards the rabbits died in 6–15 minutes, and dogs in 10–15 minutes. When the head was placed outwards death took place after a period more than twice as long.
Philos. Trans. Roy. Soc. (London), ser. B, 1900, p. 76.

centrifugate (sen-trif'ū-gāt), *v.*; pret. and pp. *centrifugated*, ppr. *centrifugating*. [*centrifuge* + *-ate*[2].] **I.** *trans.* To drive from the center or from the circumference; specifically, to expose to centrifugal action in a centrifuge.

The fluid should be *centrifugated*, the sediment spread on cover slips. *Buck*, Med. Handbook, I. 564.

II. *intrans.* To fly off from the center; scatter or disperse in all directions. *Mrs. Whitney*, Sights and Insights, vii.

Centrifuge for the sedimentation of urine, blood, and other animal fluids: *a*, *a*, tubes holding the fluid to be examined; *b*, *b*, position of the tubes when the machine is in action.

centrifugation (sen-trif′ū-gā'shọn), *n.* The driving of anything from the center or circumference; specifically, the separation of two immiscible liquids of different densities, or of suspended solid particles from a liquid, by the use of a centrifuge or centrifugal machine.

An hour later the mixture was expressed, 30 cm. of this quantity taken, the solid particles separated by *centrifugation* and the

amount of the nitrogen in the solid and liquid parts determined by Kjeldahl's method.
Phil. Med. Jour., Jan. 31, 1903, p. 201.

centrifuge (sen'tri-fūj), *n.* [NL. *centrifugus*, adj.: see *centrifugal*.] A centrifugal machine; specifically, a form of centrifugal machine employed to separate the solid particles suspended in a fluid, such as the blood or urine.

centrifuge (sen'tri-fūj), *v. t.*; pret. and pp. *centrifuged*, ppr. *centrifuging*. To submit to very rapid rotatory motion in a centrifuge or centrifugal machine in order to separate suspended solid particles from a liquid, or two immiscible liquids of different densities from one another.

By mixing bacteria with the white cells of the blood obtained by *centrifuging* and adding blood serum (*a*) unheated, i. e. in the natural condition, (*b*) heated to 60°–65° C. for ten to fifteen minutes, it is found that, under the same conditions, phagocytosis is much more active in the presence of the unheated than of the heated serum.
Nature, Dec. 3, 1903, p. 111.

centriole (sen'tri-ōl), *n.* [NL. *centriolum*, dim. of L. *centrum*, center.] In *cytol.*, a minute granule in the center of the astrosphere of the dividing-cell.

Centripetal canals. See ★*canal*[1].

centripety (sen-trip'e-ti), *n.* [NL. *centripetus*, centripetal, + *-y*[3].] A centripetal tendency or condition; a state opposed to rotular diffusion from a center. This term has been employed in descriptive paleontology to designate the absence of any manifestation, in a plane-coiled cephalopod shell, of a tendency to become evolute or to broaden its umbilicus.

centroclinal (sen-trō-klī'nal), *n.* [Gr. *κέντρον*, center, + *κλίνειν*, bend, + *-al*.] In *geol.*, a dome; a quaquaversal; an area with dips radiating from it as a center of uplift.

centrode (sen'trōd), *n.* [Gr. *κέντρον*, center, + *ὁδός*, path.] In *math.*, a locus of the instantaneous center of no velocity, for motion in two dimensions.—**Fixed centrode.** For motion in two dimensions, the group of fixed lines, indicating the position which each instantaneous axis will occupy as its turn arrives, constitutes a cylindrical locus, fixed relatively to the reference-system. Its intersection with the guide-plane is the *fixed centrode*.—**Moving centrode.** As motion in two dimensions proceeds, different lines in the solid become in turn the instantaneous axis, each at its own epoch. This group of lines may be determined in advance as a cylindrical locus moving with the solid. Its intersection with the guide-plane is the *moving centrode*.

centrodesmus (sen-trō-des'mus), *n.*; pl. *centrodesmi* (-mī). [NL., < Gr. *κέντρον*, center, + *δεσμός*, a band.] In *cytol.*, the delicate bridge which connects two centrosomes or centrioles in the cell and is supposed to give rise to the central spindle.

centrodeutoplasm (sen-trō-dū'tō-plazm), *n.* [Gr. *κέντρον*, center, + *δεύτ(ερος)*, second, + *πλάσμα*, anything formed.] In *cytol.*, the granular substance of the testis-cells which may contribute to the formation of the idiozome. *Erlanger*, 1897.

centrodorsal, *n.* **2.** In *paleont.*, a pentagonal plate found in many non-pedunculate crinoids (for example, *Uintacrinus*) at the base of the cup and probably representing an atrophied stalk.

centrogen (sen'trō-jen), *a.* [Gr. *κέντρον*, center, + *-γενης*, -produced.] Proceeding or radiating from the center, as, specifically, the skeleton of acantharians, which radiates from the central capsule.

centrogenesis (sen-trō-jen'ē-sis), *n.* [Gr. *κέντρον*, center, + *γένεσις*, genesis.] **1.** Historical progress or evolution through the acquisition and elaboration of axial or central organization.—**2.** The radiate or peripheral type of form assumed by plants and also by some of the lower forms of the animal kingdom: distinguished from *dipleurogenesis* or bilaterality prevailing in animals.

We may, therefore, contrast these two great lines of ascent, which, with so many vicissitudes, have come up through the ages, as Dipleurogenesis and *Centrogenesis*.
L. H. Bailey, Survival of the Unlike, p. 17.

centrogenetic (sen-trō-je-net'ik), *a.* Originated or developed on the rotate or peripheral type; pertaining to centrogenesis.

centrogenic (sen-trō-jen'ik), *a.* Characterized by centrogenesis: as, a *centrogenic* structure.

Centrogenys (sen-troj'ē-nis), *n.* [Gr. *κέντρον*, center, + *γένυς*, chin.] A genus of serranoid fishes of the Indian and western Pacific oceans.

centroid, *n.* **2.** In *kinematics*, same as ★*centrode*. *Reauleaux.*—**3.** A point of emphasis or increased energy in a series of speech-sounds, or in any series of impulses. Also used attributively.

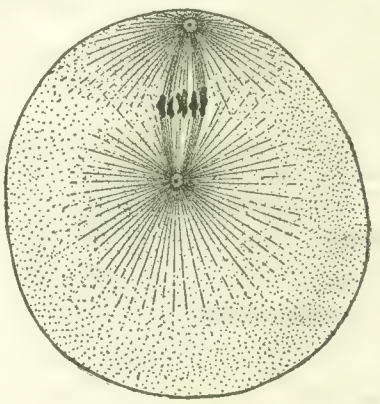
Just as in the case of an irregular solid body, we are driven to pick out points at which we can consider the whole mass to be located without altering the result under discussion. This is the *centroid* theory of the auditory and motor nature of speech that corresponds to the *centroid* theory of the course of thought.
Scripture, Exper. Phonetics, p. 448.

Centroid of a coil, the curve formed by the axis of any closed coil, such as a coil wound upon a ring where the axis is a closed curve.

centroidal (sen-troi'dal), *a.* [*centroid* + *-al*.] Pertaining to or of the nature of a centroid. *Stud. Yale Psych. Lab.*, IX. 19.

centrolecithal, *a.* **2.** In *embryol.*, noting that type of cleavage in which the dividing nuclei pass to the surface of the ovum, leaving the yolk in the center. This form of cleavage is characteristic of the *Arthropoda*, especially of the insects.

Centrolepidaceæ (sen"trō-lep-i-dā'sē-ē), *n. pl.* [NL. (Hieronymus, 1873), < *Centrolepis* + *-aceæ*.] A family of monocotyledonous plants of the order *Xyridales*, the bristlewort family, typified by the genus *Centrolepis* (which see). It embraces 6 genera and about 38 species, all natives of Australasia, small herbs chiefly growing in swamps, having bristle-shaped leaves and distichous flower-spikes or heads.



centrolepidaceous (sen'trō-lep-i-dā'shius), *a.* Belonging to the plant-family ★*Centrolepidaceæ* (which see).

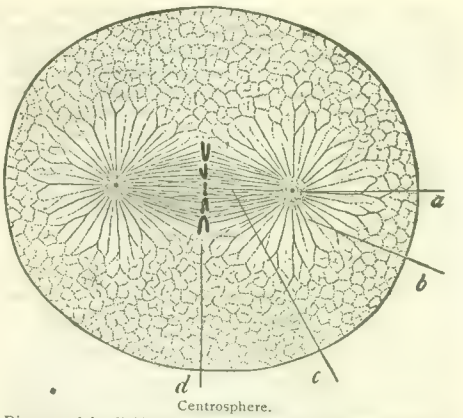
centroplana (sen-trō-plā'nă), *n. pl.* [NL., < Gr. *κέντρον*, L. *centrum*, center, + *planus*, plane.] Organisms that are symmetrical with reference to a median plane, that is, that are bilateral. *Haeckel.*

centroplasm (sen'trō-plazm), *n.* [Gr. *κέντρον*, center, + *πλάσμα*, anything formed.] In *cytol.*, the substance of the centrosphere; the protoplasm which forms the attraction-sphere or central portion of the aster.

centrosoma (sen-trō-sō'mă), *n.*; pl. *centrosomata* (-ma-tă). [NL., < Gr. *κέντρον*, center, + *σῶμα*, body.] Same as ★*centrosome*.

centrosome (sen'trō-sōm), *n.* [NL. *centrosoma*, < Gr. *κέντρον*, center, + *σῶμα*, body.]

Centrosome.



Structure of the centrosome in the polar asters of a gasteropod, *Diaulula*. Mitotic figure, formation of the first polar body. (MacFarland.) (From Wilson's "The Cell.")

In *cytol.*, a body of indeterminate nature in the center of each astrosphere of the dividing-cell.—**Cleavage centrosome,** the centrosome of the cleavage nucleus or that which forms the poles of the spindle for the division of the egg into the first two blastomeres.—**Sperm centrosome,** a centrosome supposed to be brought into the egg by the spermatozoön during fertilization.

centrosphere (sen'trō-sfēr), *n.* [Gr. *κέντρον*, center, + *σφαῖρα*, sphere.] **1.** In *cytol.*, a spherical, differentiated mass of cytoplasm surrounding the centrosome and constituting a pole of the karyokinetic spindle during cell-division. Also called *attraction-sphere*.—**2.** The central or interior portion of the earth, beginning at a somewhat indefinite depth, and involving materials and pressures of which we have no actual experience; contrasted with the successive outer shells, *lithosphere*, *hydrosphere*, and *atmosphere*.

The Earth consists of three parts: there is the vast unknown interior, or "*centrosphere*," concerning which physicists have not come to any unanimous decision, some saying that it is throughout solid and rigid, others that it is partly fluid, and others again that it is partly gaseous.
Geog. Jour. (R. G. S.), XIII. 228.

centrospore (sen'trō-spōr), *n.* [Gr. *κέντρον*, a point, spine, + *σπορά*, seed.] In *phytogeog.*, a plant whose fruit is provided with spines which aid in dissemination by attachment. *F. E. Clements.*

Centrosphere.

Diagram of the dividing cell, showing the mitotic figure and its relation to the cytoplasmic meshwork.
a, centrosphere containing the centrosome; *b*, aster; *c*, spindle; *d*, chromosomes forming the equatorial plate. (From Wilson's "The Cell.")

centrostomatous (sen-trō-stō'ma-tus), *a.* [Gr. *κέντρον*, center, + *στόμα*, mouth.] Having the mouth placed centrally, as a starfish.

centrosymmetrical (sen"trō-si-met'ri-kal), *a.* [Gr. *κέντρον*, center, + *συμμετρικός*, symmetrical.] Having symmetry with respect to a point or center: said of crystals.

centrosymmetry (sen-trō-sim'e-tri), *n.* [Gr. *κέντρον*, center, + *συμμετρία*, symmetry.] Symmetry with respect to a point or center, as in most crystals. See ★*symmetry*, 6.

centroxylic (sen-trok-sil'ik), *a.* [*centroxyl-y* + *-ic*.] Relating to centroxyly.

centroxyly (sen-trok'si-li), *n.* [Gr. *κέντρον*, center, + *ξύλον*, wood.] In *bot.*, primary centrifugal woody structure. *Van Tieghem.*

centrum, *n.* **3.** In *geol.*, the focus or place of origin of an earthquake.

centuplicate (sen-tū'pli-kāt), *a.* and *n.* [LL. *centuplicatus*, pp. of *centuplicare*, increase a hundredfold, < *centuplex*, a hundredfold.] **I.** *a.* Hundredfold.

II. *n.* One of a hundred things which correspond in every respect to one another.

centuplication (sen-tū-pli-kā'shon), *n.* [NL. **centuplicatio(n-)*, < *centuplicare*, increase a hundredfold: see *centuplicate*.] The act of centupling; reduplication a hundredfold.

centuply (sen-tū'pli), *adv.* A hundredfold.

century[1], *n.* **4.** In *bot.*, a set of dried plants containing a hundred sheets.—**To score a century,** in *cricket*, to score a hundred runs or more in a single inning.

The M. C. C. give a bat to every amateur or professional who *scores a century* for them. *Encyc. Brit.*, XXVII. 276.

cèpe (sep), *n.*; pl. *cèpes* (sep). [F., < L. *cepa*, onion.] A name sometimes given to edible species of *Boletus*.

To this genus [Boletus] belong the fungi known in France as *cèpes*, under which name they are imported into this country, but not in any great quantities.
Yearbook U. S. Dept. Agr., 1897, p. 465.

cephaëline (se-fā'e-lin), *n.* [NL. *Cephaelis*, a genus of plants, + *-ine*[2].] An alkaloid, $C_{14}H_{20}NO_2$, found with emetine in ipecacuanha. It crystallizes in needles which melt at 96–102° C. The salts are amorphous.

cephalalgia, *n.*—**Cephalalgia periodica,** megrim.—**Cephalalgia spasmodica,** sick-headache.

cephalanthine (sef-a-lan'thin), *n.* [*Cephalanth-us* + *-ine*[2].] A white, amorphous, very bitter glucoside found in *Cephalanthus occidentalis*. It is dextrorotatory and melts at about 180° C.

cephalanthous (sef-ā-lan'thus), *a.* [Gr. *κεφαλή*, head, + *ἄνθος*, flower.] In *bot.*, having the flowers in heads, as composite plants.

cephalematocele (sef-a-lē"ma-tō-sēl), *n.* [Gr. *κεφαλή*, head, + *αἷμα (τ-)*, blood, + *κήλη*, tumor.] An effusion of blood between the skull and the scalp; communication with one of the cerebral sinuses.

cephalhydrocele (sef-al-hī'drō-sēl), *n.* [Gr. *κεφαλή*, head, + *ὑδροκήλη*, hydrocele.] A collection of serous fluid beneath the scalp.

cephalic. I. *a.*—**Cephalic eye.** See ★*eye*[1].—**Cephalic race,** a race whose kinship is indicated by the form of the head: as long, *dolichocephalic*, or broad, *brachycephalic*. Negroes are long-heads; Mongolians, broad-heads; the Mediterranean and Baltic whites of Europe, in general long-heads; the Alpine whites, in general broad-heads. See ★*ethnic race*, ★*glottic race*, and ★*chromatic race*. *Giddings*, Inductive Sociol., p. 53.—**Cephalic slits,** a peculiar pair of organs, of unknown function, found on most nemerteans. They usually have the form

of lateral furrows or pits situated on the head and in close connection with the brain.

II. *n.* 2. In *phonetics*, a so-called 'head' or 'cerebral' sound. *Whitney*, Sansk. Gram., § 45.

cephalin (sef'a-lin), *n.* [Gr. *κεφαλή*, head, + *-in*².] One of a group of organic phosphorized bodies obtained by Thudichum from brain tissue.

Cephalina (sef-a-lī'nä), *n. pl.* [NL., < Gr. *κεφαλή*, head, + *-ina*².] A group of *Gregarinida*, consisting of *Eugregarinæ*, which always possess an epimerite either as a transitory or as a permanent portion of the body. The body is divided typically by a septum into protomerite and deutomerite, but it may be non-septate. The group includes forms which are chiefly parasites of *Arthropoda*.

cephalism (sef'a-lizm), *n.* [Gr. *κεφαλή*, head, + *-ism*.] In *anthrop.*, characterization by the form of the head, particularly by the cephalic index.

cephalium (se-fal'i-um), *n.*; pl. *cephalia* (-ä). [NL., < Gr. *κεφάλιον*, dim. of *κεφαλή*, head.] The woody enlargement at the summit of the stem of some *Cactaceæ*, from which the flowers are developed.

cephalization, *n.* 2. A supposed tendency to a gradual increase in the size of the brain correlative with cultural development. *Amer. Anthropologist*, N. S., I., 410.

cephalo-auricular (sef″a-lō-â-rik'ū-lăr), *a.* Relating to the skull and the external ear.—**Cephalo-auricular angle**, the angle which the plane of the auricle makes with the side of the head.

cephalocathartic (sef″a-lō-ka-thär'tik), *a.* and *n.* [Gr. *κεφαλή*, head, + *καθαρτικός*, purging: see *cathartic*.] **I.** *a.* Occasioning discharges from the nose; errhine.

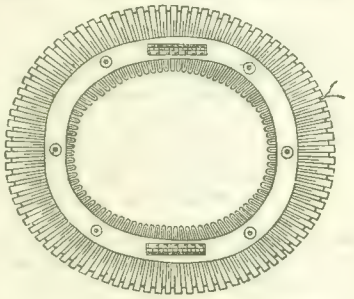
II. *n.* A remedy which promotes the discharge of watery mucus from the nose.

cephalocentesis (sef″a-lō-sen-tē'sis), *n.* [NL., < Gr. *κεφαλή*, head, + *κέντησις*, puncture.] Puncture of the skull to give exit to accumulated fluid.

Cephalocereus (sef″a-lō-sē'rē-us), *n.* [NL. (Pfeiffer, 1838), < Gr. *κεφαλή*, head, + *cereus*.] A genus of plants of the family *Cactaceæ*, closely allied to *Cereus*. It is characterized by a globular or cylindrical enlargement, together with the presence of copious hairs or bristles in the fruiting area. They are all Mexican. *C. senilis* is the familiar old-man cactus, so named from the white hair-like covering.

cephalocyst (sef'a-lō-sist), *n.* [Gr. *κεφαλή*, head, + *κύστις*, bag (cyst).] A cestoid worm.

Cephalodiscus (sef″a-lō-dis'kus), *n.* [NL., < Gr. *κεφαλή*, head, + *δίσκος*, disk.] A remarkable colonial deep-sea animal associated by some with *Balanoglossus* and *Rhabdopleura* in the class *Adelochorda*. It resembles *Balanoglossus* in having the three regions of the body (proboscis, collar, and trunk), and in the presence of a structure resembling a notochord with the same relations to the nervous system as in *Balanoglossus*. It differs from the latter in having the alimentary canal so bent upon itself that mouth and anus are in close proximity, in having tentacles on the collar, in the small size of the proboscis, and in the presence of only one pair of openings that can be regarded as gill-slits. The individuals in the colony are not in organic connection but are surrounded by a common gelatinous sheath.



Cephalodiscus. Entire zoöid. (From Parker and Haswell's "Zoology," after McIntosh.)

cephalofacial (sef″a-lō-fā'shal), *a.* [Gr. *κεφαλή*, head, + L. *facies*, face, + *-al*¹.] Pertaining to the head or, more particularly, the cranium and the face.—**Cephalofacial index**, the ratio of the capacity of the skull to that of the orbits, nasal fossæ, and accessory sinuses.

cephalogaster (sef″a-lō-gas'tėr), *n.* [Gr. *κεφαγή*, head, + *γαστήρ*, belly.] A sac-like expansion of the alimentary canal in the females of many parasitic isopod crustaceans, as *Portunion mænadis*, in which the inner wall projects into the lumen in the shape of numerous long processes covered with chitinous intima. In this region the absorption of food takes place.

cephalogram (sef'a-lō-gram), *n.* [Gr. *κεφαλή*, head, + *γραμμή*, a line.] In *anthrop.*, an outline of the head drawn by means of the cephalograph. *Amer. Anthropologist*, Jan.–March, 1902, p. 153.

cephalograph (sef'a-lō-graf), *n.* [Gr. *κεφαλή*, the head, + *γράφειν*, write.] In *anthrop.*, an

Harting's Cephalograph.

instrument designed for drawing outlines of the head, particularly the horizontal contour of the head.

cephalohemometer (sef″a-lō-hē-mom'e-tėr), *n.* [Gr. *κεφαλή*, head, + *αἷμα*, blood, + *μέτρον*, measure.] An instrument for measuring blood-pressure in the head.

cephalolateral (sef″a-lō-lat'e-ral), *a.* [Gr. *κεφαλή*, head, + L. *lateralis*, of the side: see *lateral*.] Toward the head and to the side.

cephalomancy (sef'a-lō-man-si), *n.* [Gr. *κεφαλή*, head, + *μαντεία*, divination.] Divination by means of a head. See also ★*cephalonomancy*.

cephalomere (sef'a-lō-mēr), *n.* [Gr. *κεφαλή*, head, + *μέρος*, part.] One of the segments of the head region of arthropods.

cephalon (sef'a-lon), *n.* [Gr. *κεφαλή*, head. Cf. *encephalon*.] The head region; the cephalic region; specifically, (*a*) In the *Trilobita*, the cephalic shield together with that part of the animal which it covers. (*b*) The anterior portion of the body of certain crustaceans, as the *Malacostraca*. *C. Spence Bate.*

cephalone (sef'a-lōn), *n.* [Gr. *κεφαλή*, head, + *-one*.] In *anthrop.*, a skull or head of unusually large capacity, but without pathological characteristics; also, a person having a head or skull of unusually large capacity.

cephalonoid (sef'a-lō-noid), *a.* [*cephalone* + *-oid*.] In *anthrop.*, similar to a cephalone, or a healthy skull of extraordinary size.

cephalonomancy (sef-a-lon'ō-man-si), *n.* [Gr. *κεφαλή*, head, + *ὄνος*, ass, + *μαντεία*, divination.] Divination by means of an ass's head.

cephalopathy (sef-a-lop'a-thi), *n.* [Gr. *κεφαλή*, head, + *-παθεια*, < *πάθος*, disease.] Disease of the head, especially of the brain.

cephalophyma (sef″a-lō-fī'mä), *n.*; pl. *cephalophymata* (-ma-tä). [NL., < Gr. *κεφαλή*, head, + *φῦμα*, a tumor.] A tumor of the head.

cephalopodal (sef-a-lop'ō-dal), *a.* [*Cephalopoda* + *-al*¹.] Pertaining to or having the characters of the *Cephalopoda*.

Cephalorachidian fluid. Same as *cerebrospinal fluid*.

cephalosome (sef'a-lō-sōm), *n.* [Gr. *κεφαλή*, head, + *σῶμα*, body.] In arthropods, the head region.

cephalostyle (sef″a-lō-stīl), *n.* [Gr. *κεφαλή*, head, + *στῦλος*, pillar.] The anterior or cranial end of a notochord.

Cephalotaceæ (sef-a-lō-tā'sē-ē), *n. pl.* [NL. (Lindley, 1835), < *Cephalotus* + *-aceæ*.] A family of dicotyledonous archichlamydeous plants of the order *Rosales*, found in the swamps of King George Sound in western Australia. It contains the monotypic genus *Cephalotus*. This anomalous plant was regarded by Lindley as related to the pitcher-plants on account of the sac-like radical leaves. Later authors placed it in the *Saxifragaceæ*. Engler restores it to family rank, chiefly on account of its rudimentary (haplochlamydeous) flowers.

cephalotic (sef-a-lot'ik), *a.* [Gr. *κεφαλή*, head, + *οὖς* (*ὠτ-*), ear.] In *biol.*, of, pertaining to, or exhibiting the presence of the ears on the middle line of the head.

Dareste also declares that the *cephalotic* state is similarly first indicated by a premature union of the folds in the region of the medulla, taking place before this part of the brain has widened out. In this way the auditory involutions are approximated.

Bateson, Study of Variation, p. 458.

cephalotractor (sef″a-lō-trak'tor), *n.* [Gr. *κεφαλή*, head, + NL. *tractor*.] An obstetrical forceps.

Cepheid (sē-fē'id), *a.* and *n.* [L. *Cepheus*, < Gr. *Κηφεύς*, Cepheus, a mythical king, whose name was given to a constellation, + *-id*².] **I.** *a.* Pertaining to or resembling the star δ Cephei.—**Cepheid star**, one of a class of variable stars of punctual periodicity which in the character of their variation resemble δ Cephei.

II. *n.* A variable star of the type of δ Cephei.

cepotaph (sep'ō-taf), *n.* [Gr. *κῆπος*, garden, + *τάφος*, tomb.] A cinerary urn deposited in a garden. *C. Maitland.*

ceppo (chep'pō), *n.* [It., a stump, block, < L. *cippus*, a stump.] The cemented fluvioglacial gravels of northern Italy.

The presence however of the highly denuded '*ceppo* underlying the great terminal moraines of Ivræa, Como, etc., shows that these latter cannot be the product of the second and greatest extension of the alpine glaciers.

J. Geikie, The Great Ice Age, p. 562.

ceptor (sep'tor), *n.* [L. *-ceptor* in *acceptor*, *receptor*, etc., a form, in comp., of *captor*, taker: see *captor*.] Same as ★*haptine*.

Cera alba, white or bleached wax.—**Cera flava,** yellow wax.

ceradia (sē-rā'di-ä), *n.* [NL. *Ceradia* (see def.).] A yellow oleoresin obtained from *Ceradia furcata*.

ceradin (ser'a-din), *n.* [*Ceradia* + *-in*².] An amber-colored oleoresin obtained from *Ceradia furcata*. It has the odor of elemi.

ceragate (ser'a-gāt), *n.* [L. *cera*, wax, + E. *agate*².] The normal form would be **cerachate*.] A yellow variety of carnelian: generally produced artificially by impregnating or dyeing chalcedony with a chromium solution.

ceraginous (sē-rā'ji-nus), *a.* Of the nature of cerago or bee-bread.

ceral, *a.* 2. Pertaining or relating to wax.

ceram. An abbreviation of *ceramics*.

ceramiaceous (se-rā-mi-ā'shius), *a.* Of or pertaining to the *Ceramiaceæ*.

Ceramic photography. See ★*photoceramics*.—**Ceramic stone,** a trade-name for a building-material made from broken glass ground to powder, devitrified, and in a second furnace softened by heat and pressed into any desired form.

cerasin¹, *n.* 2. A name of two coal-tar colors, otherwise known as *fast red A* and *Bordeaux B*.—**Cerasin orange.** See ★*orange*¹.—**Cerasin red.** See ★*red*.¹

cerasin², (ser'a-sin), *n.* [Appar. based on *cer*(*ebrin*)?] A compound, $C_{70}H_{138}O_{12}N_2$, obtained in small amounts by warming cows' brains with a solution of barium hydroxid. It is neutral and resembles cerebrin in its properties.

cerasinose (ser'a-sin-ōs), *n.* [*cerasine* + *-ose*.] A sugar, $C_5H_{10}O_5$ (?), formed by the action of dilute acids on cherry gum. It is crystalline, very hydroscopic, and reduces Fehling's solution.

cerat. An abbreviation of Latin *ceratum*, (ointment).

cerate¹, *n.*—**Blistering cerate,** a mixture of spermaceti cerate and cantharides.—**Goulard's cerate,** cerate containing subacetate of lead.—**Hufeland's cerate,** cerate containing oxid of zinc.—**Spermaceti cerate,** a mixture of spermaceti, olive-oil, and white wax.

ceratectomy (ser-a-tek'tō-mi), *n.* [Also *keratectomy* (and *kerectomy*); < Gr. *κέρας* (*κερατ-*), horn (*ὑμήν κερατοειδής*, the cornea), + *ἐκτομή*, excision.] Excision of the cornea.

cerated, *a.* 2. In *ornith.*, same as *cerate*¹.

ceratenchyma (ser-a-teng'ki-mä), *n.* [NL., < Gr. *κέρας* (*κερατ-*), horn, + *ἔγχυμα*, infusion.] In *bot.*, the tissue which consists of effete sieve-tubes and has a horny texture.

Ceraterpetum (ser-a-tėr'pē-tum), *n.* [Gr. *κέρας* (*κερατ-*), horn, + *ἑρπετόν*, a reptile.] A genus of extinct microsaurian amphibians with a pair of large backward-pointing horns attached to the posterior cranial bones. It has been found in the coal-measures of Ireland and Ohio.

ceratiasis (ser-a-tī'a-sis), *n.* [NL., also *keratiasis*; < Gr. *κέρας* (*κερατ-*), horn, + *-iasis*.] A condition in which there are a number of warts of horny consistence on the skin.

ceratina, *n.* [*cap.*] 3. A genus of dicotyledonous plants belonging to the family *Solanaceæ*. See *Solandra*.

Ceratinidæ (ser-a-tin'i-dē), *n. pl.* [NL., < *Ceratina* + *-idæ*.] A family of true bees.

ceratinization (ser″a-tin-i-zā'shŏn), *n.* [Also *keratinization*; < *ceratinize* + *-ation*.] The act of becoming of horny hardness.

ceratinize (se-rat'ī-niz), *v. i.*; pret. and pp. *ceratinized*, ppr. *ceratinizing*. [Also *keratinize*; < *ceratin-ous* + *-ize*.] To become of a horny hardness.

ceratinoid (se-rat′i-noid), *a.* [*ceratin* + *-oid.*] Resembling ceratin or horn in physical or chemical structure. Also *keratinoid.*

ceratinose (ker′a-ti-nōs), *n.* [Also *keratinose;* ⟨ *ceratin* + *-ose.*] An albumose derived from ceratin.

ceratinous (ser-at′i-nus), *a.* [Gr. *κερᾰτινος*, of horn, ⟨ *κέρας* (*κερατ-*), horn.] Having a horny structure or consistency.

Ceratiomyxa (se-rat″i-o-mik′sä), *n.* [NL. (Schröter, 1889), ⟨ Gr. *κερᾰτιον*, dim. of *κέρας*, horn, + *μύξα*, slime.] A genus of myxomycetous fungi having the spores white or yellowish and developed on the outside of the plasmodium. *C. mucida* occurs on logs, producing small tufted, branched white fructifications.

Ceratiomyxaceæ (se-rat″i-o-mik-sā′sē-ē), *n. pl.* [NL., ⟨ *Ceratiomyxa* + *-aceæ.*] A family of myxomycetous fungi named from the genus *Ceratiomyxa.* Same as *Ceratiaceæ*, which is an invalid name.

ceratitic (ser-a-tit′ik), *a.* [*ceratite* + *-ic.*] Pertaining to or having the characters of the genus *Ceratites.*

Ceratitida (ser-a-tit′i-dä), *n. pl.* [NL.] A division of the ammonoid cephalopods or ammonites represented by the family *Ceratitidæ* and genus *Ceratites.*

ceratitis, *n.* Specifically—2. An infectious disease of the eyes of cattle and sheep, characterized by an intense inflammation of the conjunctiva, swelling of the eyelids, and an early opacity with later ulceration of the cornea.

In certain localities great numbers of cows were found dead or dying, all of them exhibiting symptoms of suppurative *keratitis* and conjunctivitis.
Rep. Bur. Animal Industry, 1901, p. 29.

Ceratitis bullosa, inflammation of the cornea, marked by the formation of minute blisters which break and result in ulceration.—**Interstitial ceratitis,** chronic corneal inflammation, with the formation of opacities in the substance of the cornea which later usually disappear more or less completely.—**Mycotic ceratitis.** Same as ★*ceratomycosis.*—**Oyster-shuckers' ceratitis,** acute inflammation of the cornea in oyster-openers, caused by wounding of the eye with pieces of shell.—**Parenchymatous ceratitis,** inflammation of the cornea marked by the formation of opacities: the latter usually disappear as the disease, which is exceedingly slow in its course, subsides.—**Reapers' ceratitis,** inflammation of the cornea caused by the irritation of sharp spicules of grain which wound the eyes of reapers.—**Vascular ceratitis,** inflammation of the cornea accompanied by a formation of new blood-vessels beneath the conjunctiva and in the outer layers of the cornea: usually a precursor of pannus.

cerato-angioma (ser″a-tō-an-ji-ō′mä), *n.* [NL., also *kerato-angioma.*] Same as ★*angioceratoma.*

Ceratobranchial of the fifth arch, one of a pair of bones, usually bearing teeth, situated just behind the gill-arches of fishes: they represent a fifth arch, the inferior *pharyngeal* arch. See *pharyngeal. Starks,* Synonymy of the Fish Skeleton, p. 519.

Ceratocampa (ser-a-tō-kam′pä), *n. pl.* [NL., ⟨ Gr. *κέρας* (*κερατ-*), horn, + *κάμπη*, caterpillar.] A genus of moths typical of the family *Ceratocampidæ*, formed by Harris to contain the regal walnut-moth, now known as *Citheronia regalis.*

ceratocampid (ser-a-tō-kam′pid), *n.* One of the family *Ceratocampidæ.*

Ceratocampidæ (ser-a-tō-kam′pi-dē), *n. pl.* [NL., ⟨ *Ceratocampa* + *-idæ.*] A family of American moths, containing only a few genera, but very striking forms, like the regal walnut-moth, *Citheronia regalis,* whose larva is known as the *hickory horned devil.*

ceratoconus (ser″a-tō-kō′nus), *n.* [NL., also *keratoconus;* ⟨ Gr. *κέρας* (*κερατ-*), horn, + *κῶνος*, cone.] A form of staphyloma corneæ, of the same nature as buphthalmos, in which the bulging of the cornea has a conical shape. Also called *conical cornea.*

ceratoderma (ser″a-tō-dėr′mä), *n.* [NL., also *keratoderma;* ⟨ Gr. *κέρας* (*κερατ-*), horn, + *δέρμα*, skin.] Disease of the skin marked by horny thickening of the epidermis.

ceratodermia (ser″a-tō-dėr′mi-ä), *n.* [NL., also *keratodermia.*] Same as ★*ceratoderma.*

ceratohyalin (ser″a-tō-hī′a-lin), *n.* [Also *keratohyalin;* ⟨ Gr. *κέρας* (*κερατ-*), horn, + *ὑαλος*, glass, + *-in*².] A peculiar substance which forms the granules in the stratum granulosum of the epidermis.

ceratohyaline (ser″a-tō-hī′a-lin), *a.* [Also *keratohyaline;* ⟨ Gr. *κέρας* (*κερατ-*), horn, + *ὑαλος*, glass, + *-ine*¹.] Of glassy appearance and horny consistence, as the cells in the stratum granulosum of the skin.

ceratoid. **I.** *a.* **3.** Shaped like a horn.
II. *n.* Same as *cornea.*

ceratoiditis (ser″a-toi-dī′tis), *n.* [NL., also *keratoiditis;* ⟨ *ceratoid* + *-itis.*] Same as *ceratitis. Lancet,* May 30, 1903, p. 1515.

cerato-iridocyclitis (ser″a-tō-ir″i-dō-si-klī′tis), *n.* [NL., also *kerato-iridocyclitis;* ⟨ Gr. *κέρας* (*κερατ-*), horn, + *ἶρις* (*ἰριδ-*), iris, + *κύκλος*, circle, + *-itis.*] Inflammation of the cornea, iris, and ciliary body.

cerato-iritis (ser″a-tō-i-rī′tis), *n.* [NL., also *kerato-iritis;* ⟨ Gr. *κέρας* (*κερατ-*), horn, + *ἶρις*, *iris*, *-itis.*] Inflammation of both iris and cornea.

ceratolysis (ser-a-tol′i-sis), *n.* [NL., also *keratolysis;* ⟨ Gr. *κέρας* (*κερατ-*), horn, + *λύσις*, loosening.] **1.** Loosening and partial separation of the epidermis from the deeper layers of the skin. **2.** Atrophy of the horny layer of the epidermis.

ceratoma (ser-a-tō′mä), *n.*; pl. *ceratomata* (*-ma-tä*). [NL., ⟨ Gr. *κέρας* (*κερατ-*), horn, + *-oma.*] A horny growth. Also spelled *keratoma.*

ceratomalacia (ser″a-tō-ma-lā′si-ä), *n.* [NL., also *keratomalacia;* ⟨ Gr. *κέρας* (*κερατ-*), horn, + *μαλακία*, softness.] Softening of the cornea.

ceratomania (ser″a-tō-mā′ni-ä), *n.* [NL., ⟨ Gr. *κέρας* (*κερατ-*), horn, + *μανία*, madness.] In *vegetable teratol.*, the abnormal production of horn-like or hooded structures in flowers.

ceratometer (ser-a-tom′e-tėr), *n.* [Also *keratometer;* ⟨ Gr. *κέρας* (*κερατ-*), cornea, + *μέτρον*, measure.] A device for determining the irregularities in curvature of the cornea, and the resultant astigmatism.

ceratomycosis (ser″a-tō-mī-kō′sis), *n.* [NL., also *keratomycosis;* ⟨ Gr. *κέρας* (*κερατ-*), horn, + *μύκης*, fungus, + *-osis.*] Inflammation of the cornea associated with a fungoid growth. *Lancet,* July 11, 1903, p. 101.

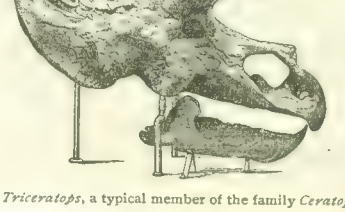
ceratophore (ser′a-tō-fōr), *n.* [Gr. *κέρας* (*κερατ-*), horn, + *-φορος*, ⟨ *φέρειν*, bear.] An organ or a region bearing cerata, as in certain worms.

ceratophyllaceous (ser″a-tō-fi-lā′shius), *a.* Belonging to the plant-family *Ceratophyllaceæ;* resembling or pertaining to the genus *Ceratophyllum.*

ceratophyllin (ser-a-tof′i-lin), *n.* [*Ceratophyll-um* + *-in*².] Same as ★*atraric acid.*

ceratophyllous, (ser″a-tō-fil′us), *a.* [NL. *ceratophyllus,* ⟨ Gr. *κέρας* (*κερατ-*), horn, + *φύλλον*, leaf.] In *bot.*, horn-leaved; having long, slender, pointed leaves.

Ceratopogon (ser-a-tō-pō′gon), *n.* [NL. (Meigen, 1803), ⟨ Gr. *κέρας* (*κερατ-*), horn, + *πώγων*, beard.] A notable genus of midges, of the family *Chironomidæ*, containing very minute species which bite severely. *C. nocivum* is the punky, well known to hunters and fishermen in the north woods of New England and in Canada. See *punky.*



Ceratopogon stellifer, highly magnified. (U. S. D. A.)

Ceratops (ser′a-tops), *n.* [Gr. *κέρας* (*κερατ-*), horn, + *ὄψ*, face.] A genus of dinosaurian reptiles from the Laramie Cretaceous beds of America. The skull carried a pair of large horn-cores and the body was covered with dermal scutes.—**Ceratops beds,** in *geol.*, a name given by Marsh to deposits of the Laramie Cretaceous in Wyoming, because of the abundance of the dinosaurian reptiles *Ceratops* contained in them.

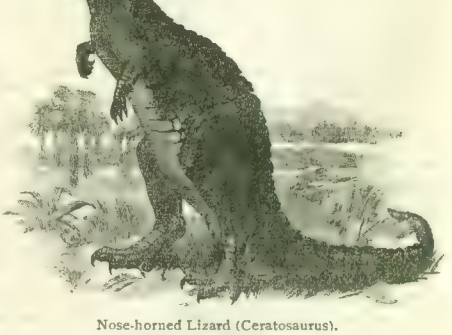
Ceratopsia (ser″a-top′si-ä), *n. pl.* [Gr. *κέρας* (*κερατ-*), horn, + *ὄψις*, view, appearance.] The *Ceratopsidæ* considered as a suborder.

ceratopsid (ser-a-top′sid), *a.* and *n.* **I.** *a.* Pertaining to or having the characters of the *Ceratopsidæ.*
II. One of the *Ceratopsidæ.*

Skull of *Triceratops,* a typical member of the family *Ceratopsidæ.*

Ceratopsidæ (ser-a-top′si-dē), *n. pl.* [NL., ⟨ *Ceratopsia* + *-idæ.*] In *paleont.*, a family of predentate Cretaceous dinosaurs. They had the cranium developed into a shield overhanging the neck, and a large horn over each eye. There was sometimes a small horn on the nose. The family contains such species as *Triceratops, Torosaurus,* and *Agathaumas.*

Ceratopteridaceæ (ser″a-top-ter-i-dā′sē-ē), *n. pl.* [NL. (Underwood, 1900), ⟨ *Ceratopteris* (*Ceratopterid-*) + *-aceæ.*] A family of annual aquatic ferns of the order *Filicales.* It comprises the genus *Ceratopteris,* which embraces a single species, *C. thalictroides,* with fragile bi- or tripinnate fronds of two sorts, the sterile ones, which are floating, and the fertile ones, which are reduced and have the ultimate divisions pod-like, *i.e.*, with revolute margins, and in which the sori are scattered, with a broad ring.



Ceratopteris (ser-a-top′te-ris), *n.* [NL. (Brongniart, 1821), ⟨ Gr. *κέρας* (*κερατ-*), horn, + *πτερίς*, a fern. The allusion is to the antler-like appearance of the fertile fronds.] A genus of floating ferns, constituting the only *Ceratopteridaceæ. C. thalictroides,* the only species, occurs in Florida and Louisiana and widely in the tropics.

Ceratopteris thalictroides.
a, an entire plant showing habit; *b*, portion of a fruiting branch enlarged to show the sori. (Drawn from Engler and Prantl's "Pflanzenfamilien.")

ceratopycnidium (ser″a-tō-pik-nid′i-um), *n.*; pl. *ceratopycnidia* (*-ä*). [Gr. *κέρας* (*κερατ-*), horn, + NL. *pycnidium.*] A horn-shaped pycnidium such as is produced by species of *Apiosporium.*

Ceratosaurus (ser″a-tō-sâ′rus), *n.* [Gr. *κέρας* (*κερατ-*), horn, + *σαῦρος*, lizard.] A genus of dinosaurian reptiles of great size, from the Upper Jurassic rocks of Colorado. They were characterized by a large skull with a median horn and over-hanging prefrontals, very short and small fore legs, large hind legs, and extended tail. The animal had the aspect of a kangaroo, standing erect on its hind legs with the help of its tail. It attained a length of 20 feet.

Nose-horned Lizard (Ceratosaurus).
After a restoration by Knight.

ceratoscope (ser′a-tō-skōp), *n.* See ★*keratoscope.*

ceratoscopy (ser-a-tos′kō-pi), *n.* See *keratoscopy.*

Ceratostomella (ser″a-tō-stō-mel′ä), *n.* [NL. (Saccardo, 1879), ⟨ *κέρας* (*κερατ-*), horn, + *στόμα*, mouth, + dim. *-ella.*] A genus of pyre-

nomycetous fungi having small globose, mostly superficial perithecia provided with slender elongate necks. The asci are ovoid and the spores one-celled and hyaline. The name refers to the resemblance of the neck of the perithecium to a horn. The species are saprophytic on timber. *C. pilifera* causes a blue color on lumber. See ★*bluing*, 4.

ceratotrich (sē-rat′ō-trik), *n.* [NL. *ceratotrichium*, < Gr. *κέρας* (*κερατ-*), horn, + *θρίξ* (*τριχ-*), hair.] A horny, flexible, fibrous, unjointed, and usually unbranched fin-ray of *Elasmobranchii* and *Holocephali*.

ceratotrichium (ser″a-tō-trik′i-um), *n.*; pl. *ceratotrichia* (-ä). [NL.] Same as ★*ceratotrich*.

In the Elasmobranchii and Holocephali, and probably also in the Acanthodii and Ichthyotomi, these rays [dermal fin-rays] are unjointed, occasionally branched and composed of a fibrous substance of horny consistence without bone-cells. When placoid scales are present, they are quite independent of the rays and more superficial. The author calls these rays "*Ceratotrichia*." Their origin is unknown, but for the present they must be considered as special developments of the connective tissue.
Jour. Roy. Micros. Soc., Oct., 1904, p. 519.

ceraunian (se-râ′ni-an), *a.* Same as *ceraunic*.

ceraunograph (se-râ′nō-graf), *n* [Gr. *κεραυνός*, thunder, + *γράφειν*, write.] An instrument by means of which the occurrence of a thunderstorm or of lightning is chronographically recorded.

In the Annual Report for 1901–02 of St. Ignatius College, Cleveland, Ohio, the Reverend F. L. Odenbach publishes an appendix on the work of his meteorological observatory during the past year. This begins with an account of his new lightning recorder, or *ceraunograph*. . . . The various parts of the instrument were a relay, a telegraph sounder, a coherer, choking coil, two batteries, a recording drum, or chronograph, a copper collector on the roof of the college, and a copper wire leading from it down to the instrument in the observatory.
U. S. Monthly Weather Rev., June, 1902, p. 313.

ceraunophobia (se-râ-nō-fō′bi-ä), *n.* [NL., < Gr. *κεραυνός*, thunder, + *-φοβία*, < *φοβεῖν*, fear.] A morbid fear of thunder-storms.

ceraunoscopy (se-râ-nos′kō-pi), *n.* [Gr. *κεραυνοσκοπία*, < *κεραυνός*, thunder, + *σκοπεῖν*, view.] Divination by observation of lightning.

Cerberic (sėr′be-rik), *a.* Of or pertaining to Cerberus; resembling or befitting Cerberus.

cerbiretin (sėr-bi-rē′tin), *n.* [*cerberin*.] An amorphous citron-yellow compound formed by the hydrolysis of cerberin.

cercarial (sėr-kā′ri-al), *a.* [*cercaria* + *-al*[1].] Of or pertaining to a cercaria or larval distome.

cercocystis (sėr-kō-sis′tis), *n.* [Gr. *κέρκος*, tail, + *κύστις*, bladder (cyst).] A tailed cysticercoid.

cercopid (sėr′kō-pid), *a.* Of or belonging to the homopterous family *Cercopidæ*.

cercopod (sėr′kō-pod), *n.* [Gr. *κέρκος*, a tail, + *ποῦς* (*ποδ-*), a foot.] In the phyllocarid and allied forms of *Crustacea*, one of the two caudal spines adjoining and articulated to the terminal segment or telson.

Cercosporella (sėr′kō-spō-rel′ä), *n.* [NL. (Saccardo), < Gr. *κέρκος*, tail, + *σπορά*, seed (spore), + dim. *-ella*.] A genus of parasitic hyphomycetous fungi having simple or branched hyaline fertile hyphæ and elongate many-celled hyaline conidia. *C. persica* attacks peach-leaves. See *frosty* ★*mildew*.

cerealism (sē′rē-al-izm), *n.* [*cereal* + *-ism*.] The practice of eating nothing or little but cereals.

cerealist (sē′rē-al-ist), *n.* [*cereal* + *-ist*.] One who makes a special study of cereals; a botanist or agriculturist who is versed or engaged in the production of edible grains: as, A. B., *cerealist* of the United States Department of Agriculture.

cerealose (sē′rē-a-lōs), *n.* [*cereal* + *-ose*.] A mixture of dextrin, maltose, and glucose formed by the action of glucose on starch.

cereal-rust (sē′rē-al-rust″), *n.* Any one of the species or varieties of rust which attack the cereals, wheat, oats, rye, etc., especially *Puccinia graminis* and its varieties.

Cerebellar gait, an irregular gait associated with disease of the cerebellum.

cerebellic (ser″ē-bel′ik), *a.* Same as *cerebellar*.

cerebellifugal (ser″ē-be-lif′ū-gal), *a.* [L. *cerebellum*, cerebellum, + *fugere*, flee, + *-al*.] Moving in a direction away from the cerebellum.

cerebellipetal (ser″ē-be-lip′e-tal), *a.* [L. *cerebellum*, cerebellum, + *petere*, seek, + *-al*.] Moving in a direction toward the cerebellum.

cerebellopontile (ser-ē-bel-ō-pon′til), *a.* [L. *cerebellum*, cerebellum, + *pons* (*pont-*), bridge, + *-ile*.] Relating to the cerebellum and the pons Varolii.

The occurrence of a tumor in the *cerebellopontile* angle in many of these cases of sarcomatosis was mentioned, and the question of operation was raised.
Med. Record, July 11, 1903, p. 77.

Cerebral apophysis, diabetes, flexure, meningitis. See ★*apophysis*, etc.—**Cerebral neurasthenia.** Same as *cerebrasthenia*.—**Cerebral organ**, one of the sense-organs in nemerteans and gephyreans. It is a ciliate neuroglandular pit found at the side of the head, in close relation to the hinder part of the brain.—**Cerebral pneumonia, sinuses.** See ★*pneumonia* and ★*sinus*.—**Cerebral trigone.** Same as *fornix cerebri*.

cerebralgia (ser-ē-bral′ji-ä), *n.* [NL., < L. *cerebrum*, brain, + Gr. *ἄλγος*, ache.] Severe and deep-seated headache.

cerebrational (ser-ē-brā′shon-al), *a.* [*cerebration* + *-al*[1].] Relating to cerebration or brain-action.

cerebrationist (ser-ē-brā′shon-ist), *n.* [*cerebration* + *-ist*.] One of a former school of philosophers who, at a time when the anatomy of the brain was but little known, held that the brain is the seat of all mental processes. *Buck*, Med. Handbook, II. 300.

cerebriform cancer. See ★*cancer*.

cerebrifugal (ser-ē-brif′ū-gal), *a.* [L. *cerebrum*, brain, + *fugere*, flee, + *-al*.] Passing from the brain: said of nervous impulses and nerve-fibers.

cerebripetal (ser-ē-brip′e-tal), *a.* [L. *cerebrum*, brain, + *petere*, seek, + *-al*[1].] Passing toward the brain: said of nervous impulses and nerve-fibers.

cerebrobuccal (ser″ē-brō-buk′al), *a.* [L. *cerebrum*, brain, + *bucca*, mouth, + *-al*.] Pertaining to the cerebral and the buccal ganglia: as, the *cerebrobuccal* connective in mollusks. *Parker and Haswell*, Text-book of Zool., I. 679.

cerebrology (ser-ē-brol′ō-ji), *n.* [L. *cerebrum*, brain, + Gr. *-λογία*, < *λέγειν*, speak.] The science of the brain in its anatomical, functional, and pathological relations.

cerebromalacia (ser″ē-brō-ma-lā′si-ä), *n.* [NL., < L. *cerebrum*, brain, + *μαλακία*, softness, < *μαλακός*, soft.] Same as *softening of the brain*.

cerebromeningeal (ser″ē-brō-me-nin′jē-al), *a.* [L. *cerebrum*, brain, + Gr. *μῆνιγξ*, membrane, + *-e-al*.] Relating to the brain and its membranes. *Med. Record*, Feb. 7, 1903, p. 226.

cerebromeningitis (ser″ē-brō-men-in-jī′tis), *n.* [NL., < L. *cerebrum*, brain, + NL. *meningitis*.] Inflammation of the brain and its membranes.

cerebrometer (ser-ē-brom′e-tėr), *n.* [L. *cerebrum*, brain, + Gr. *μέτρον*, measure.] A device for recording variations in the volume of the brain under special conditions.

cerebropleural (ser″ē-brō-plö′ral), *a.* [L. *cerebrum*, brain, + NL. *pleura* + *-al*.] A term applied to the ganglion formed by the union of the cerebral and the pleural ganglia in certain lamellibranch mollusks.

The supra-œsophageal ganglion of Anodonta is usually regarded as representing both the cerebral and pleural ganglia, and is commonly spoken of as the "*cerebro-pleural*."
Nature, Oct. 29, 1903, p. 623.

cerebropsychic (ser″ē-brō-sī′kik), *a.* [L. *cerebrum*, brain, + *ψυχή*, mind.] Relating to the brain as the organ of the mind, together with its functions as such.

Victims of spinal injury concussion and *cerebro-psychic* shock.
Alien. and Neurol., Feb., 1903, p. 21.

cerebroscopy (ser-ē-bros′kō-pi), *n.* [L. *cerebrum*, brain, + Gr. *-σκοπια*, < *σκοπεῖν*, view.] Examination of the fundus of the eye for the purpose of obtaining data concerning the circulation of blood in the brain.

cerebrose[2] (ser′ē-brōs), *n.* [L. *cerebrum* + *-ose*.] A variety of sugar, isomeric with glucose, found in brain-tissue.

cerebroside (ser′ē-brō-sīd), *n.* [*cerebrose* + *-ide*[1].] One of a group of decomposition-products of protagon, of the type of cerebrin.

cerebrospinant (ser″ē-brō-spī′nant), *n.* [*Cerebrospin(al)* + *-ant*.] A therapeutic agent which acts upon the brain and the spinal cord.

cerebrosuria (ser″ē-brō-sū′ri-ä), *n.* [NL., < *cerebrose* + Gr. *οὖρον*, urine.] A form of diabetes in which the urine contains cerebrose.

Cerebrum abdominale, the abdominal brain or solar plexus.

ceremonial. I. *a.*—**Ceremonial stone**, in *archæol.*, a somewhat indefinite term applied to any one of a large class of variously shaped stone implements, many of which are finely finished and show great care in their manufacture. They have been variously classified and subdivided, but their use is almost entirely conjectural.

The so-called *ceremonial stones* are variously subdivided and named by different writers. They are supposed to have been devoted to religious, superstitious, medical, emblematic, or ceremonial purposes; to be badges of authority, insignia of rank, tokens of valorous deeds, or perhaps some sort of heraldic device; in short, the uses to which they might, in their different forms, be assigned, are limited only by the imagination.
Smithsonian Rep., 1892, p. 115.

II. *n.* 3. A prehistoric stone implement supposed to have been used for ceremonial purposes.

He [Mr. Moorehead] called attention to the necessity of an archeological nomenclature for the various 'unknown forms' in slate and granite which have hitherto been called '*ceremonials*'—a meaningless term in the opinion of the author.
Science, Jan. 24, 1902, p. 124.

ceremonialist (ser-ē-mō′ni-al-ist), *n.* [*ceremonial* + *-ist*.] One who favors or is given to ceremonial observances in religion; one who lays stress on external forms in religious worship; a ritualist.

ceremonialize (ser-ē-mō′ni-al-īz), *v. t.*; pret. and pp. *ceremonialized*, ppr. *ceremonializing*. [*ceremonial* + *-ize*.] To make ceremonial or ritualistic.

ceremony, *n.*—**To stand upon ceremony**, to be punctilious or insistent on the due observance of polite usages, or formalities.

You know I never *stand upon ceremony* with such people.
Jane Austen, Northanger Abbey, viii.

cerer (sēr′èr), *n.* [*cere*, *v.*, + *-er*[1].] One who ceres a corpse, or wraps it in cerecloth.

cerevisial (ser-ē-vis′i-al), *a.* See ★*cervisial*.

ceria[3] (sē′ri-ä), *n.* [NL. *ceria*, < *cerium* (which see).] Cerium oxid: used in small proportion, with thoria or thorium oxid, in the mantles of Welsbach incandescent gas-lamps.

cerianthid (ser-i-an′thid), *n.* One of the *Cerianthidæ*, as the vestlet.

Cerianthidea (sē″ri-an-thid′ē-ä), *n. pl.* [NL., < L. *cera* (Gr. *κηρός*), wax, + Gr. *ἀνθος*, flower, + *-id-ea*.] An order of *Zoantharia*. It consists of solitary forms which retain the primitive bilateral symmetry of the zoöid, without a skeleton, and with numerous mesenteries which are arranged symmetrically in pairs and devoid of muscle-banners.

ceric[2] (ser′ik), *a.* [L. *cera*, wax, + *-ic*.] Derived from wax.—**Ceric acid**, an amorphous acid, $C_{42}H_{68}O_{13}$, formed by the action of nitric acid on cerin.

cerigerous (sē-rij′e-rus), *a.* [L. *cera*, wax, + *gerere*, bear.] 1. Producing wax.—2. In *ornith.*, having a cere: same as *cerate*.

cerilla (thā-rēl′ya), *n.* [Sp., < L. *cera*, wax: see *cere*.] A match; a wax taper. [Spanish America.]

cerinin (ser′i-nin), *n.* [Gr. *κήρινος*, < *κηρός*, wax, + *-in*[2].] A wax-like or fat-like substance obtained from the lignite of Gerstewitz near Merseburg in Germany.

cermatiid (sėr-mat′i-id), *a.* and *n.* I. *a.* Of or belonging to the myriopod family *Cermatiidæ*.

II. *n.* One of the *Cermatiidæ*.

cern[2] (sėrn), *v. i.* [L. *cernere*, decide, judge: see *concern*, *decern*, *discern*, etc.] To elect and make known an intention to enter upon an inheritance: a modern term used in reference to Roman law.

cernier (ser-nyā′), *n.* [F., connected with Sp. *cherna*.] The stone-bass.

cerniture (sėr′ni-tūr), *n.* [Irreg. *cern*, *v.*, + *-iture*. The right word would be *cretion*, < L. *cretio*(*n-*).] The act of formally resolving to enter upon an inheritance: a modern term used in reference to Roman law.

cerografy, *n.* A simplified spelling of *cerography*.

cerolin (ser′ō-lin), *n.* [Gr. *κηρός*, wax, + *-ol* + *-in*[2].] A fatty substance found in yeast. It has laxative properties.

ceroline (ser′ō-lin), *n.* [Prob. < L. *cera*, wax, + *ol*(*eum*), oil, + *-ine*[2]. The allusion would be to the waxy or oily character of these plants which prevents water from adhering to their leaves.] Either of the two American jewel-weeds, *Impatiens aurea* and *I. biflora*.

Ceromya (ser-o-mī′ä), *n.* [NL., < Gr. *κέρας* (?), horn, + *μῦς*, a muscle.] A genus of extinct pelecypods with elongate-cordate inflated valves and edentulous hinge: abundant in Jurassic rocks.

ceroplast (sē′rō-plast), *n.* [Gr. *κηρός*, wax, + *πλαστός*, < *πλάσσειν*, form.] A mold, properly in wax, but sometimes in other substances. *De Morgan*.

ceroplasty (sē-rō-plas′ti), *n.* Same as *ceroplastic*.

cerosic (sē-rō′sik), *a.* [*ceros*(*in*) + *-ic*.] Derived from cerosin.—**Cerosic acid**, a crystalline acid, $C_{24}H_{48}O_2$, obtained by heating cerosin with soda-lime.

cerosiline (sē-rō′si-lin), *n.* [*cerose* + *-il* + *-ine*[2].] Palm-tree wax from the common Andes wax-palm, *Ceroxylon andicola*, or from the Klop-

stock palm, *Klopstockia cerifera*. It softens easily, but melts only at a temperature above 102–105° C. It is used for candles.

cerotene (ser'ō-tēn), *n.* [*cerote* + *-ene.*] A solid hydrocarbon, $C_{27}H_{54}$, obtained by the distillation of Chinese wax. It melts at 57–58° C.

cerotin (ser'ō-tin), *n.* [*cerot(ic)* + *-in*².] Same as ★*ceryl alcohol*, $C_{27}H_{55}OH$.

cerotype (ser'ō-tīp″), *n.* [Gr. *κηρός*, wax, + *τύπος*, type.] The art or process of engraving through a coating of prepared wax spread over a smooth plate from which a printing surface can be produced by the plaster process of stereotyping or by electrotyping.

cerous (sē'rus), *a.* [*cer(ium)* + *-ous.*] In *chem.*, containing the metal cerium with apparent triad valence: as, *cerous* sulphate, *cerous* oxid, etc.

cerro (ther'rō), *n.* [Sp. Pg., a hill, ridge.] A hill; a ridge; a hogback.

cert., certif. Abbreviations (*a*) of *certificate*; (*b*) of *certify*; (*c*) of *certified*.

certainty, *n.*—**Objective certainty**, properly, certainty in sense 1. It consists in the accordance of the real facts with an assertion that might be made. Venn (1834–83) uses the term, in a sense closely approaching that of reality, for that character of a fact which consists in its not only being independent of our opinion as to its truth (which constitutes its reality), but also in its being independent of our spatial and temporal relation to it.—**Of a certainty**, assuredly; beyond doubt. *Dan.* ii. 8.

certifiable (sėr'ti-fī-ā-bl), *a.* Capable of being certified or attested: as, *certifiable* results.

certificate, *n.* 2. (*b*) An official written representation that some act has or has not been done, or that some event has occurred, or that some formal legal requirement has been fulfilled. It usually issues from some court for the purpose of giving notice of things done in the court, or to authorize or warrant some act upon the part of some other court or judge. (*c*) A document used in the British custom-house by which certain goods formerly imported can be exported and the duties paid upon importation refunded.—**Attorney's certificate.** See ★*attorney*¹.—**Audit certificate.** See ★*audit*.—**Certificate of merit**, a certificate issued to an enlisted man who has distinguished himself in service. It is granted by the President of the United States upon the recommendation of the corps or regimental commander and entitles the bearer to extra pay. His name is also enrolled in the annual Army Register.—**Certificate of service**, a certificate issued by the War Department to replace a certificate of discharge lost by a soldier. **Judge's certificate**, in *Eng. law practice*: (*a*) A written statement of the judge presiding at a trial that a party is entitled to costs. (*b*) The opinion of the court, signed by the judges, upon a question of law submitted to them by the chancellor for their decision.—**Tax certificate.** Same as *tax deed* or *tax lease* (which see).

certificator (sėr'ti-fi-kā-tọr), *n.* One who certifies; one who makes or gives a certificate.

certificatory (sėr-tif'i-kā-tọ-ri), *a.* and *n.* **I.** *a.* Of the nature of a certificate; that serves to certify: as, a letter *certificatory*, or written testimonial.

II. *n.* A letter certificatory.

cerulean, *a.* **II.** *n.* 1. Blue; cerulean color.—2. A blue-stocking. [Humorous.]

> Oh! ye, who make the fortune of all books!
> Benign *Ceruleans* of the second sex!
> Who advertise new poems by your looks,
> Your "imprimatur" will ye not annex?
> *Byron*, Don Juan, iv. 108.

ceruleite (sē-rö'lē-īt), *n.* [*cerule(an)* + *-ite*².] A hydrated arseniate of aluminium and copper, occurring in bright blue clay-like masses: found in Chile.

cerulic (sē-rö'lik), *a.* [L. *cærul(us)*, blue, + *-ic.*] Of a blue color.—**Cerulic acid**, an acid of doubtful identity supposed to be formed by the oxidation of caffetannic acid by the air.

cerulignol (sē-rö-lig'nōl), *n.* [L. *cærul(us)*, blue, + *lign(um)*, wood, + *-ol.*] The methyl ether of 3, 4-dihydroxypropylbenzene, $HO.C_6H_3(C_3H_7)OCH_3$. It is an oil with an odor which resembles that of creosote; it boils at 241° C.

cerulin, *n.* See *cerulein*.

ceruminal (sē-rö'mi-nal), *a.* [*cerumen* (*min-*) + *-al*¹.] Same as *ceruminous*.

Cervical canal. See ★*canal*¹.—**Cervical cross**, a structure, on the embryo of *Pentastoma tæniöides*, shaped like a raised cross and situated in a cup-shaped groove. It is the trace of the so-called 'dorsal cone' which connected the two chitinous thickenings surrounding the embryo.—**Cervical flexure, glands, ligaments, pregnancy.** See ★*flexure*, etc.—**Cervical triangles.** See *anterior triangle of the neck* and *posterior triangle of the neck*, under *triangle*.—**Cervical vertebræ.** See *vertebra*. 1 (*b*).

cervico-axillary (sėr″vi-kō-ak'si-lā-ri), *a.* Pertaining to both the neck and the axilla.

cervicodorsal (sėr″vi-kō-dôr'sal), *a.* [L. *cervix*, neck, + *dorsum*, back, + *-al*¹.] Relating to the neck and back. The cervicodorsal region comprises the neck and back; the cervicodorsal vertebræ are those of the neck and thorax considered collectively.

cervicoscapular (sėr″vi-kō-skap'ū-lär), *a.* [L. *cervix*, neck, + *scapula*, shoulder-blade.] Pertaining to both the neck and the scapula.

cervicothoracic (sėr″vi-kō-thō-ras'ik), *a.* [L. *cervix*, neck, + *thorax*, chest, thorax.] Relating to the neck and thorax, considered collectively. *Proc. Zool. Soc. London*, 1903, p. 272.

cervisial, cerevisial (sėr-, ser-ē-vis'i-al), *a.* [L. *cervisia*, beer.] Relating or pertaining to beer.

cervisious (sėr-vis'i-us), *a.* Same as ★*cervisial*.

cervoid (sėr'void), *a.* [L. *cervus*, a deer, + Gr. *εἶδος*, form.] Deer-like; resembling a deer.

Ceryl alcohol, a white crystalline alcohol, $C_{27}H_{55}.OH$, occurring in Chinese wax as the ester of cerotic acid. It melts at 79° C. When fused with caustic potash it yields cerotic acid. Also called *cerotin*.—**Ceryl ester**, an ester derived from ceryl alcohol and an acid. Chinese wax, or cerotin, is the ceryl ester of cerotic acid.

cespitellose (ses-pit'e-lōs), *a.* Somewhat tufted.

cespitin (ses'pi-tin), *n.* [L. *cæspes* (*cæspit-*), turf, + *-in*².] An oily base, $C_5H_{13}N$, found in coal-tar and peat-tar.

Cessation of arms. See ★*arm*².

cession, *n.*—**Benefit of cession.** See ★*benefit*.—**Treaty of cession**, a treaty by which territory is ceded or made over by one country or sovereign to another.

cestid (ses'tid), *n.* A ctenophoran of the family *Cestidæ*.

Cestodariidæ (ses-tō-da-rī'i-dē), *n. pl.* [NL., < ★*Cestodaria* + *-idæ.*] A family of *Platyhelmintha*, of the order *Cestoda*, having the body unsegmented and the generative organs not repeated. The family includes the genera *Amphilina Archigetes, Caryophyllæus, Gyrocotyle* and *Wageneria*. Same as ★*Monozoa*, 2.

Cestoidea, *n. pl.* 2. A group of tentaculate *Ctenophora* having a compressed, bandlike body and containing the single family *Cestidæ*.

cetane (sē'tān), *n.* Same as ★*hexadecane*, $C_{16}H_{34}$.

ceteosaur (sē'tē-ō-sâr), *n.* [NL. *ceteosaurus, cetiosaurus*, q. v.] Same as *cetiosaurian*.

Ceteosauria, *n.* See ★*Cetiosauria*.

ceterach, *n.* 2. [*cap.*] A genus of small pinnatifid polypodiaceous ferns related to *Asplenium*. There are 3 or 4 species of like habit, the best known being *C. Ceterach* (*Ceterach* of the old herbalists, *Asplenium Ceterach* of Linnæus, or *C. officinarum* of most later writers), an Old World species long regarded as officinal.

cetiosaur (sē'ti-ō-sâr), *n.* [NL. *Cetiosaurus.*] Same as *cetiosaurian*.

Cetiosauria, Ceteosauria (sē″ti-, sē″tē-ō-sâ'ri-ā), *n. pl.* [NL.: see *Cetiosaurus.*] An order or suborder of *Dinosauria*, which contains the largest members of the group. Synonymous with *Sauropoda*, Seeley, 1888, and Marsh; antedated by *Opisthocœlia*, Owen, 1860.

Cetomimidæ (sē-tō-mim'i-dē). *n. pl.* [NL., < *Cetomimus* + *-idæ.*] A family of deep-sea fishes of uncertain relationship. Two species are known, each represented by a single specimen taken in the North Atlantic at a depth of over 1,000 fathoms.

Cetomimus (sē-tō-mī'mus), *n.* [NL., < Gr. *κῆτος*, whale, + *μῖμος*, mimic.] A genus of deep-sea fishes. See ★*Cetomimidæ*.

Cetonia, *n.*—**Indian cetonia**, an American beetle, *Euphoria inda*, formerly placed in the genus *Cetonia*. It feeds on overripe fruit and sometimes on Indian corn. Also called the *brown fruit-chafer*.—**Melancholy cetonia**, an American beetle, *Euphoria melancholica*, formerly placed in the genus *Cetonia*. Also called the *melancholy sap-chafer*.

cet. par. An abbreviation of the Latin *ceteris paribus* (which see).

cetylid (sē'til-id), *n.* [*cetyl* + *-id*².] A derivative of cerebrin, of composition $C_{64}H_{120}O_{75}$.

Cevenole (sev'ē-nōl), *a.* [F. *Cévennes* (mountains).] Of or pertaining to the Cévennes, in central France; specifically, relating to a type of man of western Europe, found in its most characteristic form in the Cévennes. The type is dark, very short-headed, and of short stature.

Ceylon borage. See ★*borage*.

C. F. An abbreviation (*a*) of *canto fermo*, and (*b*) of *chaplain to the forces*.

cf. An abbreviation (*b*) of *calf* (binding).

C. F. and I. An abbreviation of *cost, freight, and insurance* (which see, under ★*cost*²).

C. G. An abbreviation (*c*) of *captain-general*; (*d*) of *captain of the guard*; (*e*) of *coast-guard*.

cg. An abbreviation of *centigram*.

C. G. S. An abbreviation of *commissary-general of subsistence*.

Ch. An abbreviation (*a*) of *China*; (*b*) of *Chinese*; (*c*) of *check* (in chess).

C. H. An abbreviation (*c*) of *clearing-house*.

chabootra (cha-bö'trä), *n.* [Hind. *chabūtrā.*] A paved or plastered terrace-platform attached to a house or in a garden. [Anglo-Indian.] *Yule and Burnell*.

chabot (shä-bō'), *n.* [F. *chabot*, dial. *cabot*, OF. *cabot*, lit. 'big-headed,' < LL. **capum*, L. *caput*, head: see *chief*.] The miller's thumb or bullhead: sometimes used in heraldry as a bearing.

chac-chac (chäk'chäk), *n.* [Imitative of a light rattling sound.] A rude rattle, consisting of a bladder filled with loose objects, used by the negroes of the West Indies.

chackur (châk'er), *n.* [Also *chauker*, < Hind. Pers. *chākar.*] A servant; a menial servant: not now in use in India except in the (Hind.) phrase *naukar-chackur*, meaning 'the whole body of servants from the highest (*naukar*) to the lowest (*chackur*).' *Yule and Burnell*.

chacu-ayllu (chä″kö-ä'ē-lyö), *n.* [Quichua *chacu*, the taking of wild animals by surrounding them; *ayllu*, clan.] A dance of the Indians of Peru and Bolivia, symbolizing the capture and killing of the vicugna; also a rain-dance.

chætigerous (kē-tij'e-rus), *a.* Bearing or provided with chætæ: as, the *chætigerous* segments of an annelid.

Chætochloa (kē-tọk'lọ-ä), *n.* [NL. (Scribner, 1897), < Gr. *χαίτη*, mane, + *χλόη* (*χλόα*), grass.] A genus of monocotyledonous plants of the family *Poaceæ*. See *Setaria*.

Chætochloa glauca.

a, a spike; *b*, mature spikelet with scales partially removed to show the grain; *c*, a flower showing the plumose stigmas; *d*, a spikelet with bristles, showing a second rudimentary staminate flower. (Drawn from Engler and Prantl's "Pflanzenfamilien.")

chætoderm (kē'tō-dėrm), *n.* [NL. *chætoderma.*] One of the *Chætodermatidæ*.

chætodontiform (kē-tọ-don'ti-fôrm), *a.* Having the form of a chætodontoid fish.

Chætomiaceæ (kē″tō-mi-ā'sē-ē), *n. pl.* [NL., < *Chætomium* + *-aceæ.*] A family of pyrenomycetous fungi named from the genus *Chætomium*, and characterized by membranous superficial perithecia having the upper portion, especially, covered with elongated, more or less branched hairs and simple dark-colored spores.

chætophoraceous (kē″tō-fō-rā'shius), *a.* [*Chætophoraceæ* + *-ous.*] Belonging or pertaining to the *Chætophoraceæ*.

chætopodan (kē-top'ō-dan), *a.* [*chætopod* + *-an.*] Having the characters of the *Chætopoda*. *Encyc. Brit.*, XXV. 452.

chætopterin (kē-top'te-rin), *n.* [*Chætopter-us* + *-in*².] A pigment found in *Chætopterus*.

Chætostroma (kē-tọ-strō'mä), *n.* [NL. (Corda, 1829), < Gr. *χαίτη*, mane, bristle, + *στρῶμα*, covering.] A genus of hyphomycetous fungi having the conidiophores arranged in black pulvinate masses surrounded by black septate bristles. The conidia are one-celled and dark-colored. *C. Sacchari* occurs on withered spots on leaves of sugar-cane.

chætotaxy (kē'tọ-tak-si), *n.* [NL., **chætotaxia*, < Gr. *χαίτη*, bristle, + *τάξις*, order.] The arrangement of bristles on the different parts of the body of dipterous insects.

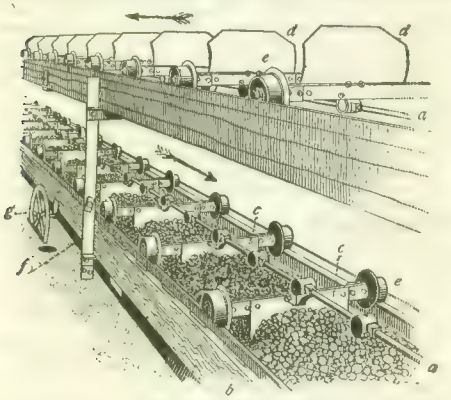
> This contains a careful exposition of the *chætotaxy* of the Muscidæ, which Dr. Hough considers one of his principal contributions to entomology.
> *Entomological News*, 1903, p. 247.

chaf, *v.* and *n.* A simplified spelling of *chaff*.

chafant (chā'fant), *a.* [*chafe* + *-ant.*] In *her.*, chafing; enraged; furious: applied to an enraged boar when used as a bearing.

chafe-iron (chāf'ī″ėrn), *n.* An iron affixed to the body or gear of a vehicle to protect it from injury by the wheel when the vehicle is turning.

chaff[1] (chaf), *v. t.* [*chaff*[1], *n.*] **1.** To cut into chaff. See *chaff*[1], *n.*, 2.



How long does it take to *chaff* a ton of ensilage?
Return of [British] *Ensilage Commissioners* (1885), I. 5.

2. To mix with chaff.—**3.** To furnish with chaff.

chaguar (chä-guär'), *n.* [Native name.] A name in northwestern Argentina for the ★caraguatá (which see).

chai (chī), *n.* [Also *chy;* Gipsy.] A Gipsy girl or woman.

chain, *n.* **8.** A ruff of recurved feathers adorning the neck of some breeds of pigeons, such as the jacobin.—**9.** An abbreviation of *mountain-chain* and *volcanic chain.*—**10.** A collection or continuum which has reference to a certain mode of correspondence such that no one individual or point corresponds to more than one individual or point, this mode of correspondence being thought of as a sort of mapping such that one part of the map may coincide with another, but no part of the collection or continuum mapped is represented twice over on the map. If the map is a part or the whole of what is mapped, that which is mapped is called a *chain.* Moreover, if P is any part of what is mapped, there may be many parts of the whole collection or continuum mapped, each of which contains P and is a chain. Now that chain which forms a part (or the whole) of every possible chain that contains P is called *the chain of P.* The term (G. *kette*) was introduced by R. Dedekind, who restricted it to collections; but the idea had long before been derived by Gauss by generalizing the ordinary concept of a map. See ★*mapping.* It is evident that if to P be joined the representation of P on the map, and also the representation of that on the map and so on endlessly, the sum of all these will be the chain of P.—**Closed chain,** in *chem.*, several atoms united in such a manner as to form a ring. See ★*cyclic compounds.*—**Ladies' chain** [F. *chaine des dames*], a part of the second figure in a quadrille.—**Lateral-chain theory.** See ★*immunity* and ★*receptor.*—**Monobar chain,** a conveyer-chain composed of a series of straight bars joined together by flexible knuckle-joints which allow a certain amount

Monobar-chain.

a a, chain; *b*, conveyor; *c c*, flights, pushing load; *d d*, flights returning inverted; *e*, flanged wheels supporting flights and chain; *f*, dumping point in conveyor trough; *g*, control of dumper. Lower arrow, working direction; upper arrow, idle direction.

of lateral play in passing wheels and curves, while preserving a rigid connection in line with the movements of the conveyer. It is used with conveyers that employ flights to push the load along a fixed trough, the chain supporting the weight of the flights in both positions. See ★*conveyer* and ★*flight*[1].—**Open chain,** in *chem.*, three or more atoms united to form a chain the ends of which are not further united to form a ring.—**St. Peter's chains.** See ★*saint*[1].—**Side-chain.** Same as ★*receptor.*—**Silent chain,** a trade-name of a power-transmission chain composed of a series of links placed in groups side by side and riveted to form a broad band: so-called because of its noiseless action in passing over a sprocket-wheel.—**Steeple-top chain,** a conveyer-chain in which each link has a hood or cover. Two or more chains placed side by side in sunken channels can be used to form a carrier. The covers project above the channels and serve as a platform on which freight may be transported for short distances.

chain-block (chān'blok), *n.* A trade-name of a hand-power hoist for lifting heavy weights; a chain-hoist. It is essentially a hoisting-tackle which employs blocks or gearing operated by hand or by means of an endless chain. Two or more blocks are used for the hoisting-chains, and different types of gearing are used in the dozen or more types of block in common use. Some forms of block are self-locking, and others use a rope instead of a chain.—**Chain-block crane.** See ★*crane*[2].

chain-board (chān'bōrd), *n.* In an arithmachine, a flat surface composed of flat, parallel, movable, endless chains bearing numbers in relief, and actuated manually by the use of a stylus.

chain-brake (chān'brāk), *n.* An early form of power train-brake in which the levers attached to the brake-beams and acting to press the brake-shoes against the wheels were actuated by chains which were wound up on drums driven by the revolution of the axles of the trucks of the car. These drums were made to revolve and wind up the chain on them by throwing in a friction-clutch which compelled them to turn with the revolving wheel and axle. The wheel was thus made to retard its own motion. When the chains were wound up tight, the clutch slipped enough to prevent breakage.

chain-cover (chān'kuv″ėr), *n.* In an arithmachine, a movable metal strip used to cover any one of the chains in the chain-board. See ★*chain-board.*

chain-drive (chān-drīv), *n.* A method of transmitting power from the motor of a motor-car or motor-cycle to the driving-axle or driving-wheels by means of chains the links of which engage the teeth of sprocket-wheels: distinguished from *belt-drive* or *shaft-drive.* The chains are usually of the flat or block-chain type. Roller-chains are also much used, the pins passing through the center of short rollers which, by turning as the links pass on and off the teeth, greatly prolong the life of the chain and prevent wear on the elements which carry the stress of driving. Chain-drives may be single, when one chain only is used to connect the two shafts; or double, when one chain is used on each side, and each wheel is separately connected by its chain to the differential or countershaft. The flexibility yet positiveness of the chain-drive adapts it for high-speed and high-powered cars, but it is much exposed to mud and dirt in service.

chain-feed (chān'fēd), *n.* In *mach.*, a feed consisting of an endless chain running over sprockets: used for a great variety of purposes, such as feeding balks of timber to frame-saws, hoisting ice, coal, etc., on inclined runways, and feeding metal pieces to tempering furnaces.

chain-fern, *n.*—**Giant chain-fern,** *Woodwardia spinulosa,* a western American ally of the old-world *W. radicans.*

chain-grapples (chān'grap″lz), *n. pl.* See ★*grapple,* 7.

chain-hoist (chān'hoist), *n.* **1.** A lifting or hoisting apparatus in which the stress of lifting the load is borne by a chain over pulleys or on winding-barrels instead of by a rope.—**2.** A form of power- or hand-hoist using a chain instead of having either hydraulic or pneumatic pressure lift the load directly without pulleys or winding-barrel.

chaining-machine (chā'ning-ma-shēn″), *n.* A machine for forming into links a long cotton warp or chain of yarn, to facilitate the handling of it in the processes of bleaching or dyeing. Sometimes called a *chain-warping machine.*

chainless, *a.* **2.** In *mach.*, without a chain: used to describe machines or vehicles in which at one time a chain-gear or chain-drive was used, but in which it has been replaced by direct gears and shafting: as, a *chainless* bicycle, a *chainless* motor-car, etc.

chain-oiler (chān'oi″lėr), *n.* A device for the continuous oiling of a shaft, consisting of a loose, endless chain which hangs from the shaft, reaches down into a reservoir of oil, and, as it revolves with the shaft, carries oil up upon it as long as the shaft revolves.

chain-pillar (chān'pil″ăr), *n.* In *mining,* a pillar of coal left to protect the gangway and air-course, and running parallel to these passages.

chain-pipe, *n.* **2.** A long leather tube for covering the trace-chains of harness as a protection against injury from the chains themselves.

chain-riveting (chān'riv″et-ing), *n.* A mode of double or triple riveting in which two or more rivets are in a line perpendicular to the edge of the plate, instead of the second rivet being placed half-way between two front rivets as in staggered riveting.

chain-road (chān'rōd), *n.* An underground wagon-way worked by an endless chain.

chain-tackle (chān'tak l), *n.* A tackle in which a chain is used in place of a rope; a chain-hoist: a small hoisting-device much used in shops for raising heavy pieces by manual labor. It is usually a differential-geared tackle.

chain-tender (chān'ten″dėr), *n.* Same as ★*sled-tender.*

chain-trace (chān'trās), *n.* A chain used in place of a leather trace. In addition to a hook and ring at each end, it has, at a central point, a swivel which serves to keep it from becoming twisted.

chain-wall, *n.* A method of mining coal similar to that called variously *pillar and breast,* (which see under *pillar*), *room and rance, pillar and stall, stoop and room,* etc.

chain-work, *n.* **3.** Metal-work consisting of interlacing or intertwined rings or loops, as in chain-mail.

chair, *n.* **2.** (*c*) The office or dignity of chief magistrate of a city or corporate town in England, especially of the City of London: as, an alderman below the *chair* is one who has not yet served as lord mayor.

The Lord Mayor, Alderman, and Principal Officers of the City of London. . . . All the above have passed the Civic *Chair.* *Whitaker's Almanack,* 1885, p. 251.

7. In *glass-blowing,* a seat of special construction in which the glass-blower sits, using the elongated and horizontal arms as supports for the pontil as he rolls it backward and forward; hence, the gang of men who work in and about such a chair.—**Boatswain's chair.** See ★*boatswain.*—**Double chair,** a short sofa long enough to seat two persons.—**Electric chair,** a chair designed to be occupied by a condemned criminal when put to death by electricity.—**Locomotive chair,** a wheel-chair or invalid's chair which can be operated by the occupant. See *wheel-chair.*—**Morris chair,** a low, deep-seated chair, with flat, almost straight arms which are continued backward for a little distance beyond the body of the chair and there notched on top, and a hinged back which may be placed at any angle and kept in position at that angle by a movable cross-bar or rod which rests in the notches. The cushions for the seat and back are separate and thick. So called because devised, as is alleged, by William Morris, the poet.—**Obstetrical chair,** a chair of special construction formerly in use for women during confinement.—**The Chairs**[1], the chairman and deputy chairman of the East India Company.—**To appeal from the chair.** See ★*appeal.*—**To take the chair,** to assume the duties of presiding officer at a meeting.—**Whirling chair,** a pivoted chair into which, formerly, unruly insane persons were sometimes strapped and whirled round rapidly to confuse and subdue them.

chair-balance (chār'bal″ans), *n.* A weighing apparatus in which a chair-seat is suspended from the hook or movable part of a spring-balance. The person to be weighed is seated in the chair, while the balance is supported overhead at a convenient height.

chair-board (chār'bōrd), *n.* Same as *chair-rail.*

chair-car (chār'kär), *n.* A railroad-car fitted with reclining chairs, often used on night trains instead of a regular sleeping-car.

chairmaker (chār'mā″kėr), *n.* A maker of chairs.—**Chairmaker's bulrush.** See *American* ★*bulrush.*—**Chairmaker's saw.** See ★*saw*[1].

chairman, *n.* **3.** One who wheels an invalid's or other similar chair.

chaise, *n.*—**Boston chaise,** a two-wheeled carriage invented by Chauncey Thomas of Boston, Massachusetts. The body, which is of the chaise-type, is suspended at the rear end upon leather braces attached to the ends of the shafts, which are bent to half-circles back of the shaft-bar. These half-circles are attached to the axle by long, flat, half-elliptic springs. The portions between the spring-attachments pass under the axle without being connected with it.

chakanani (chä-kä-nä'ni), *n.* [Aymará of Bolivia.] A society of Indian dancers representing originally the warriors.

chakra (chä'krä), *n.* [Skt. *chakra,* a wheel, circle, etc.: see *cycle.*] A circle; a discus or mystic circle placed in the hands of pictured Hindu gods. Also *chackra.*

chakravartin (chä-kra-vär'tin), *n.* [Skt. *chakravartin,* turning on wheels, < *chakra,* wheel, + *vartin,* being, abiding, etc., < √ *vrt,* turn, be, abide, etc.: see *verse.*] In *Sanskrit myth.*, a universal sovereign, 'the wheels of whose chariot roll everywhere without obstruction.'

The portents troubled, till his dream-readers
Augured a Prince of earthly dominance,
A *Chakravartin,* such as rise to rule
Once in each thousand years.
Edwin Arnold, Light of Asia, i. 86.

chal[1] (chal), *n.* [Gipsy.] A gipsy boy; a lad; a fellow.

chal[2] (chal), *n.* [Beng.] In India, husked rice.

Chal., Chald. Abbreviations (*a*) of *Chaldaic;* (*b*) of *Chaldean;* (*c*) of *Chaldee;* (*d*) [l. c.] of *chaldron.*

chalana (chä-lä'nä), *n.* [Argentine.] A long, shallow, flat-bottomed boat used on the rivers of Argentina.

There were, besides, three *chalanas,* 22 feet long by 7 feet beam by 1 foot 9 inches deep.
Geog. Jour. (R. G. S.), XV. 599.

Chalarothoraca (kal-a-rō-thor'a-kä), *n. pl.* [NL., < Gr. *χαλαρός,* loose, + *θώραξ,* breast-plate, breast.] An order of *Heliozoa* in which the skeleton is composed of loosely arranged, isolated silicious spicules. It includes the genera *Raphidiophrys, Acanthocystis,* and others. Also *chalarathoracida.*

chalazian (ka-lā'zi-an), *a.* In *bot.*, resembling or pertaining to a chalaza. See *chalaza,* 1.

chalazodermia (ka-la-zō-dėr'mi-ä), *n.* (NL., < Gr. *χάλαζα,* a hailstone, knot, tubercle, + *δέρμα,* skin.] Same as *dermatolysis.*

chalazogam (ka-laz′ō-gam), *n.* A plant in which fertilization takes place through the chalaza, as in *Casuarina*.

chalazogamic (ka-laz′ō-gam′ik), *a.* Characterized by chalazogamy.

chalazogamy (kal-a-zog′a-mi), *n.* [NL. *chalaza*, chalaza, + Gr. *-γαμια*, ‹ *γάμος*, marriage.] In *bot.*, fertilization through the chalaza.

Chalcas (chal′kas), *n.* [NL. (Linnæus, 1767), prob. (in reference to the markings of the wood) ‹ Gr. *χαλκός*, copper.] A genus of dicotyledonous trees of the family *Rutaceæ*. The wood of *C. paniculata*, which shows brown veins and spots, is highly prized for knife-handles by the Malays. See *Murraya*.

chalcedonize (kal-sed′ō-nīz), *v. t.*; pret. and pp. *chalcedonized*, ppr. *chalcedonizing*. [chalcedony + *-ize*.] To preserve in or replace by chalcedony: a term frequently applied to the fossils, especially the sponges, of the Chalk beds.

chalchal (chäl-chäl′), *n.* [Argentine.] The name in Argentina of a tree of the soapberry family, *Allophylus edulis*, or of its edible fruit. It is found from southern Brazil to Argentina and yields a wood suitable for carpentry, cabinet work, and turning.

chalchuite (chal′chō-īt), *n.* [Nah. *chalchihuitl*.] The bluish-green turquoise of New Mexico.

chalcidian[2], *n.* **Blue yellow-cloaked chalcidian,** a minute hymenopterous parasite, *Signiphora flavopalliata*, of the chalcidoid family *Encyrtidæ*, which destroys the eggs of the purple scale of the orange, *Lepidosaphes beckii*.

chalcidid (kal′si-did), *n.* Of or belonging to the hymenopterous family *Chalcididæ*.

chalcidoid (kal′si-doid), *n.* and *a.* **I.** *n.* A member of the hymenopterous superfamily *Chalcidoidea*.

II. *a.* Of or belonging to the hymenopterous superfamily *Chalcidoidea*.

Chalcidoidea (kal″si-dō-id′ē-ä), *n. pl.* The *Chalcididæ* considered as a superfamily.

chalcis-fly (kal′sis-flī), *n.* A hymenopterous parasitic insect, usually minute, belonging to the family *Chalcididæ*.—**Cecropia chalcis-fly,** a large black and yellow American chalcidid parasite, *Spilochalcis mariæ*, which attacks many large caterpillars, and especially the cecropia, polyphemus and promethea larvæ.—**Clover-seed chalcis-fly.** Same as *clover-seed worm* (which see, under ★*seed-worm*).

chalcography, *n.* **2.** A collection of engraved plates and prints. The chalcography of the Louvre was established by Louis XIV. and contains now about 6,000 plates from which impressions are still made and sold.

chalcoite (kal′kō-īt), *n.* [Irreg. ‹ Gr. *χαλκός*, copper, + *-ite*[2].] Same as *chalcocite*.

chalcolamprite (kal-kō-lamp′rīt), *n.* [Gr. *χαλκός*, copper, + *λαμπρός*, shining, + *-ite*[2].] A niobate and silicate of zirconium, the cerium metals, calcium, and other metals. It occurs in dark brown to red octahedrons in southern Greenland.

chalcolite (kal′kō-līt), *n.* [Gr. *χαλκός*, copper, + *λίθος*, stone.] Same as *torbernite*.

chalcolithic (kal-kō-lith′ik), *a.* [Gr. *χαλκός*, copper, bronze, + *λίθος*, stone, + *-ic*.] Pertaining to the bronze age, as the third of the four periods of man's development, namely, the *paleolithic*, the *neolithic*, the *chalcolithic*, and the *iron*.

The Neolithic vase-types, the oldest of which is the well-known red and black ware, gradually progress until they merge insensibly into those of the earliest dynastic period, which was *Chalcolithic* in character, i.e. copper had then come into general use. *Nature*, Sup., Nov. 6, 1902, p. iii.

chalcosin (kal′kō-sin), *n.* [Gr. *χαλκός*, copper, + *-ose* + *-in*[2].] Same as *chalcocite*.

chalcotheca (kal-kō-thē′kä), *n.* [Gr. *χαλκοθήκη*, ‹ *χαλκός*, bronze, + *θήκη*, depository.] In *Gr. antiq.*, a depository for bronzes. The chalcotheca on the Acropolis at Athens is known from inscriptions of the fourth century B. C. Traces of the building are supposed to have been found immediately west of the Parthenon. It contained the bronze treasures of Athena, and various arms and other objects belonging to the state. There were similar buildings at Delos and elsewhere.

chalet, *n.* **4.** [Short for F. *chalet de nécessité*.] A more or less ornamental structure placed at convenient points in cities, containing urinals, lavatory, etc., for public convenience; a modern street 'necessary.'

chalice, *n.* **3.** A cup-shaped globe for diffusing light. *W. L. Dibdin*, Public Lighting, p. 406.

chalice-flower (chal′is-flou″ėr), *n.* The daffodil: so named from the cup-shaped tube of the inner perianth.

chalinine (kal′i-nin), *a.* [*Chalina* + *-ine*[1].] Resembling a sponge of the genus *Chalina*: as, the *chalinine* type of fiber. *E. A. Minchin*.

chalk, *n.*, **1.** In geological nomenclature the term *chalk* has been employed with a variety of meanings. In the English subdivisions of the Cretaceous system the Chalk constitutes the upper part of this system, resting on the Galt and Greensand, which in turn lies on the basal division or Wealden. The Chalk is divided into (1) Lower Chalk, including the Chalk marl and the Gray Chalk of Folkestone; (2) Middle Chalk without flints, including the Nodular Chalk, Chalk without flints, and Chalk Rock of Dover; and (3) Upper Chalk with flints, including many local subdivisions. The *Red Chalk* is a ferruginous rock lying at the base of the Chalk series in northern England. See the extract.

The *White Chalk* of England and northwest France forms one of the most conspicuous members of the great Mesozoic suite of deposits. It can be traced from Flamborough Head in Yorkshire across the southeastern counties to the coast of Dorset. . . . Composed mainly of crumbled foraminifera, urchins, mollusks, etc., it must have been accumulated in a sea tolerably free from sediment, like some of the foraminiferal ooze of the existing sea-bed. There is, however, no evidence that the depth of the water at all approached that of the abysses in which the present Atlantic globigerina-ooze is being laid down. Indeed, the character of the foraminifera, and the variety and association of the other organic remains, are not like those which have been found to exist now on the deep floor of the Atlantic, but present rather the characters of a shallow-water fauna. *Geikie*, Textbook of Geol., p. 827.

Brown chalk, umber or chalk colored with umber.—**Chalk mixture,** chalk suspended in flavored water, used in the diarrhea of infants, and as an antacid.—**Chalk process,** a process for producing a printing-surface in relief from a block or plate of prepared chalk. The design is written or painted in an ink that hardens the chalk, and the surface not to be printed is removed with a stiff brush. From the surface so prepared a stereotype is made.—**Comanche Peak chalk,** in *geol.*, a subdivision of the Lower Cretaceous deposits of Texas. See *Comanche* ★*series* and *Caprina* ★*limestone*.—**Fullers' chalk.** Same as *fullers' earth*.—**Margate chalk,** in *Eng. geol.*, a local division of the Upper Cretaceous series, typically exposed at Margate in Kent, but attaining greater thickness (400 feet) in the Hampshire basin. It occupies about the middle of the Upper Cretaceous, being underlain by the Broadstairs and St. Margaret's chalk and overlain by the Norwich chalk. On the continent it is known as the marsupite zone from the prevalence of the crinoid *Marsupites*.—**Red chalk.** (*b*) [*cap.*] In *Eng. geol.*, a hard, nodular chalk, tinted red-brown by iron oxids, which in Norfolk, Lincolnshire, and Yorkshire lies at the base of the Lower Chalk or Cenomanian and rests on the Upper Neocomian Carstone. It is regarded as representing the Galt which is otherwise absent in this region.

chalk-body (chȧk′bod″i), *n.* A decorative white earthenware of a dry, chalky appearance, quite thin and exceedingly brittle, made by Robert Wilson at Hanley, England, toward the end of the eighteenth century. The mark was the letter C beneath a crown.

chalk-gland (chȧk′gländ), *n.* In *bot.*, a multicellular gland which deposits calcareous matter, the secretion escaping through a special channel called a *water-pore*. Such glands are found in some saxifrages and other plants.

challenge, *n.* **10.** In the East Indies, an exception taken by a ryot to the assessment of a neighbor's holding when it is less than that of his own poorer holding, accompanied by an offer to take over the neighbor's holding at a higher assessment, and a claim for the assessment on his own to be correspondingly reduced.—**Challenge for cause,** in *law*, same as *principal challenge* (which see, under *challenge*, 9).

challie (chal′i), *n.* [Ceylon.] A subsidiary copper coin of Ceylon, equal to one twelfth of an anna or one pie.

chalmersite (chȧ′mėr-zīt), *n.* [Named for G. *Chalmers*, superintendent of the mine, in Brazil, where the mineral was found.] A sulphid of iron and copper of a bronze-yellow color, related in form to chalcocite.

chalona (chä-lō′nä), *n.* [Origin not ascertained.] In South America, sun-dried meat in general. See *charqui*.

chaloupe (shä-lōp′), *n.* [F.: see *shallop*.] Same as *shallop*.

chaluka, *n.* Same as ★*halukah*.

Chalukyan architecture. See ★*architecture*.

chamæcephalous (kam-ē-sef′a-lus), *a.* Same as *chamæcephalic*.

chamæconchic (kam-ē-kong′kik), *a.* Characterized by or exhibiting chamæconchy. *Biometrika*, Aug., 1902, p. 460.

chamæconchous (kam-ē-kong′kus), *a.* Same as ★*chamæconchic*.

chamæconchy (kam-ē-kong′ki), *n.* [Gr. *χαμαί*, low, + *κόγχη*, shell.] In *anthrop.*, a low form of the orbits, showing an orbital index of 80 and less: used by German anthropologists. *Biometrika*, March–July, 1904, p. 214.

chamæcranial (kam-ē-krā′ni-al), *a.* [Gr. *χαμαί*, low, + *κρανίον*, skull.] Characterized by or exhibiting a low skull, of a length-height index of 70 and less: used by German anthropologists. *Biometrika*, March–July, 1904, p. 240.

chamæcristoid (kam-ē-kris′toid), *a.* [NL. *chamæcrista* (‹ Gr. *χαμαί*, on the ground, low, + L. *crista*, crest (referring to NL. *Crista pavonis*, 'peacock's crest,' a pre-Linnæan name of a cæsalpiniaceous plant)), + E. *-oid*.] Having the characters of *Cassia Chamæcrista;* belonging to the section *Chamæcrista* of the genus *Cassia*.

Chamædaphne (kam-ē-daf′nē), *n.* [NL. (Moench, 1794, adopted from Buxbaum, 1728), ‹ Gr. *χαμαιδάφνη*, dwarf laurel, ‹ *χαμαί*, on the ground, + *δάφνη*, the laurel.] A genus of dicotyledonous shrubs of the family *Ericaceæ*. See *Cassandra*.

chamæprosope (kam-ē-pros′ōp), *n.* [Gr. *χαμαί*, low, + *πρόσωπον*, face.] A skull or a person with a broad, low face. *Deniker*, Races of Man, p. 60.

chamæprosopic (kam″ē-prō-sop′ik), *a.* [*Chamæprosope* + *-ic*.] Characterized by or exhibiting chamæprosopy. *Buck*, Med. Handbook, VII. 231.

chamæprosopy (kam″ē-pros-ō′pi), *n.* [As *chamæprosope* + *-y*[3].] In *anthrop.*, a low form of face, having a facial index of 90 and less. *Biometrika*, Aug., 1902, p. 434.

chamasite, *n.* Same as *kamacite*.

chamber, *n.* **8.** The place where the moneys due the government (municipal or other) are received and kept; the treasury; the chamberlain's office. See *chamberlain*, 2.—**Aqueous chamber.** See *chambers of the eye*.—**Chamber of accounts,** a French court analogous to the English Court of Exchequer. It exercised jurisdiction over matters relating to the revenue of the crown.—**Chamber of dais** (or **deas**), a best bedroom. [Scotch.] **Chamber process.** Same as *lead chamber* ★*process*.—**Jerusalem chamber,** a large hall in the deanery of Westminster Abbey, noted as the meeting-place (1) of the famous Westminster Assembly of Divines (1643–52); (2) of the British and American Divines who in 1870 and following years produced the present Revised Version of the Bible; and (3) of the Upper House of Convocation of the Province of Canterbury: so named from its tapestried walls which show many scenes from Jerusalem. Here Henry IV. died.—**Lead chamber,** a large receptacle made of sheet-lead burned together without solder (autogenous soldering), and supported outside by wooden or iron framework: used in the manufacture of sulphuric acid.—**Moist** or **wet chamber,** a circular glass dish with a glass cover for bacteriological cultures in a moist atmosphere.—**Suprabranchial chamber,** in bivalve mollusks, a cavity on the dorsal side of the gills into which the water-tubes open and through which the water passes into the cloaca.—**Vitreous chamber,** the hollow of the eyeball between the crystalline lens and the retina, containing the vitreous humor.

chamber-acid (chām′bėr-as″id), *n.* and *a.* **I.** *n.* Sulphuric acid in the condition and of the strength at which it is removed from the lead chambers in which it is commonly produced on the large scale, before it has been purified and concentrated by evaporation.

II. *a.* Having the character and strength of the acid as removed from the lead chambers: as, of *chamber-acid* strength.

Chambered fibers, ovary. See ★*fiber*[1], ★*ovary*.—**Chambered veins,** mineral veins with large cavern-like development.

chamber-gas (chām′bėr-gas), *n.* The gas, or mixture of gases, contained in the large lead chambers commonly used in the manufacture of sulphuric acid. *G. Lunge*, Sulphuric Acid, I. 369.

chamberlain, *n.* **3.** In Great Britain, the factor or high steward of a nobleman or great landed proprietor.

chamberlainry (chām′bėr-lān-ri), *n.* The office of chamberlain; chamberlainship. [Scotch.]

chamber-tomb (chām′bėr-tōm), *n.* An underground burial-vault.

chameleon, *n.* **4.** Same as *chamæleon*, 3.—**Chameleon top.** See ★*top*[3].

chameleon-fly (ka-mē′lē-on-flī″), *n.* A European black and yellow stratiomyid fly, *Stratiomys chamæleon*. According to Goedart it will live nine months without food, hence the popular and specific names.

chameleonic (ka-mē-lē-on′ik), *a.* [*chameleon* + *-ic*.] Given, like the chameleon, to frequent change; inconstant; fickle.

Poets—the best of them, are a very *cameleonic* race. *Shelley*, Letter to Mr. and Mrs. Gisborne, July 13, 1821. [*N. E. D.*

chameleon-moth (ka-mē′lē-on-môth), *n.* A vernacular name for a South African noctuid moth, *Actæa chamæleon:* so named on account of its extreme variability in color.

chamelerin (ka-mel′ėr-in), *n.* [G. *chamälerin*, ‹ NL. *Chamælar(ium)* + *-in*[2].] An amorphous, intensely bitter glucoside, $C_{36}H_{62}O_{18}$, found in *Chamælarium luteum*, which is used as a uterine tonic. It resembles saponin.

chamelognathous (kam-ē-log′na-thus), *a.* [Gr. *χαμηλός*, low, + *γνάθος*, jaw.] In *anthrop.*, having a low face, with reference to the distance from alveolar point to nasion. *Sergi.*

chamfer, *n.*—**Chamfer attachment,** a guide designed to be affixed to the blade of a draw-knife to enable the operator to cut uniform chamfers.

chamfer-bit (cham′fėr-bit), *n.* A bit in which a cutting-edge, set at an angle with the axis of the tool, cuts a conical entrance by chamfering the edges of the cylindrical hole. Also *chamfering-bit.*

chamfered joint. See ★*joint.*

chamfering-machine (cham′fėr-ing-ma-shēn″), *n.* A machine for cutting the bevel on a nut or on the head of a bolt and for rounding off the end of a bolt. It is customary to use a turret-machine for this purpose.

chamfer-plane (cham′fėr-plān), *n.* A plane in which the forward section, or end, is movable up or down for convenience in making chamfers. By the use of supplementary sections, with special bits, the plane can be used to make ornamental chamfers.

chamiform (kam′i-fôrm), *a.* Same as *chamæform.*

chamois, *n.* **3.** A very soft leather made from sheepskin; the flesh side of split sheepskin (the grain side being used for fancy leather). This is the so-called 'chamois-skin' sold in the shops. Probably no genuine chamois-skins are used commercially.

4. In textile coloring, a name sometimes applied to iron buff because of its resemblance in color to chamois-skin. See *iron buff,* under *buff*[1], *n.*

chamois (sham′wo or sham′i), *v. t.* To tan or dress by means of repeated oiling and milling. *Flemming,* Practical Tanning, p. 165.

chamotte (sha-mot′), *n.* [Origin not ascertained; appar. F. in factory use (?).] Fragments of already burnt fire-clay, as of the old saggars of a porcelain factory, ground to powder and used, in admixture with fresh fire-clay, in making new vessels. The old material serves to diminish the shrinkage of the mixture in the burning. *Thorpe,* Dict. Applied Chem., I. 502.

champ (champ), *a.* [Related to *champ*[1], *v.*] Hard; firm: as, a good *champ* road. [Prov. Eng.; chiefly Surrey and Sussex.]

champaca (chăm-pä′kạ), *n.* [Philippine Sp. *champaca* (Tagalog and Bisaya *sampaga*), < Skt. *champaka:* see *champak.*] A name in the Philippines of *Michelia Champaca,* a tree whose fragrant, magnolia-like flowers together with those of *Canangium odoratum,* yield an essential oil highly valued for perfumery, and when digested in cocoanut-oil yield the Macassar oil of commerce. See *champak* and *Michelia.*

champacol (cham′pạ-kol), *n.* [*champaca* + *-ol.*] A camphor-like body, $C_{15}H_{26}O$, found in the oil of champaca wood, and in guaiacum wood. Also called *guaiol.*

Champagne frappé. See *frappé.*—**Whey champagne,** an effervescing alcoholic beverage made from the whey of milk by fermentation of the lactose or milk-sugar which it contains. *S. P. Sadtler,* Handbook of Indust. Chem., p. 265.

champagnize (sham-pān′īz), *v. t.*; pret. and pp. *champagnized,* ppr. *champagnizing.* [*champagne* + *-ize.*] To impart a champagne quality to (other wines).

A very interesting apparatus [has been invented] by which wines are rapidly *champagnized* without resorting to the complicated processes that have hitherto been employed. The apparatus is christened the "Moussogène" ("froth-generator"), and is used by the inventor for *champagnizing* his wines in order to render them salable at more remunerative prices.
Sci. Amer., Dec. 31, 1904, p. 477.

champana (chăm-pä′nä), *a.* [Pg. *champana,* also *champão,* = Sp. *champan,* < Malay *sampan.*] Same as *sampan.*

champart (shaṅ-pär′), *n.* [F.: see *champerty.*] In *French law,* a particular estate in land granted upon condition that the grantee shall share crops with the grantor.

champi (chăm′pē), *n.* [Quichua *champi,* a club (of wood, lead, etc.).] Copper, bronze, and brass. [Bolivia.]

champion[1], *n.* **4.** An animal or a plant to which, or to its owner, the first prize has been awarded in any general competition, as at a horse-, cattle-, bench-, or other show, or which has taken a number of prizes.—**5.** Some variety of vegetable, fruit, implement, or the like, for which the highest excellence is claimed.

championize (cham′pi-ọn-īz), *v.*; pret. and pp. *championized,* ppr. *championizing.* [*champion* + *-ize.*] **I.** *trans.* To champion: as, to *championize* one's cause.

II. *intrans.* To play the champion.

championship, *n.*—**Amateur golf championship, open golf championship.** See ★*golf.*

Champlain epoch. Same as ★*champlain period.*—**Champlain period,** in *Amer. geol.,* a term introduced by E. Hitchcock, and adopted and promulgated by Dana, for the period of general northern continental depression concomitant with or effecting in part the final breaking up of the ice-sheet of the glacial period, and characterized by high level deposits and beaches and terraces on the margins of present active or extinct waterways and the sea. It is one term in the Quaternary, Post-pliocene, or Pleistocene era, as employed in America, being equivalent to the post-glacial or terrace epoch, but graduating imperceptibly into the recent or human period.

Champosaurus (kam-pō-sâ′rus), *n.* A genus of extinct rhynchocephalian aquatic reptiles of large size, with elongate snout and double-headed cervical ribs. Its remains have been found in the Lower Eocene of Europe and America and also in the Laramie Cretaceous beds.

champy (cham′pi), *a.* [*champ* + *-y*[1].] Made miry and soft through much trampling by cattle or the like: as, a *champy* way.

chamsin, *n.* See *khamsin.*

Chan., Chanc. Abbreviations of *chancellor.*

chañar (chän-yär′), *n.* [Native name in Argentina.] A small, thorny, leguminous tree of Argentina, *Gourliea decorticans,* the hard wood of which is used for tool-handles. The pods are sweet and edible and form the principal food of the Indians of the Gran Chaco. A fermented beverage is prepared from the pods, which is known as *aloja de chañar.* See ★*aloja.*

chance, *n.*—**A fighting chance,** a possibility of succeeding by putting forth great effort. [Colloq.]

chanceable, *a.* **2.** Non-essential; merely incidental and subsidiary; accidental or of the nature of an accident.

Reason . . . thinketh pleasuer a *chanceable* thing to honestee. *Cheke,* Matt. xvi. 68. *N. E. D.*

chancellorate (chän′sel-ọr-āt), *n.* Same as *chancellorship.*

chancelloress (chän′sel-ọr-es), *n.* A chancellor's wife. [Nonce-word.]

"Is it pleasing to go to bed . . . and have your wife nagnagging you because she has not been invited to the Lady *Chancelloress's* soirée? *Thackeray,* Lovel the Widower, iii.

chancellorism (chän′sel-ọr-izm), *n.* [*chancellor* + *-ism.*] Government through a chancellor, as in Germany.

chancre, *n.* **2.** In *bot.,* a disease of the tobacco-plant attributed to *Bacillus æruginosus.*

On a bacterial disease of tobacco *chancre* or "anthracnose," by M. G. Delacroix. This disease is due to a bacillus, not previously described, and to which the name of *Bacillus æruginosus* is given, on account of the coloration it develops in certain culture media.
Nature, Sept. 17, 1903, p. 492.

chancred (shang′kėrd), *a.* Affected with a chancre.

chancriform (shang′kri-fôrm), *a.* Of the nature of a chancre; having the form of a chancre.

changa (chan′gä), *n.* [Porto Rico.] A mole-cricket of Porto Rico, *Scapteriscus didactylus,*

Changa (*Scapteriscus didactylus*).
Adult, somewhat enlarged. (Chittenden, U. S. D. A.)

which is very injurious to cultivated crops. It also occurs in Georgia.

The "*changa*" . . . a kind of a mole cricket, which has become very troublesome. It is believed this insect was introduced from South America in guano. It is very destructive to a wide range of plants during the period of their early growth, being especially troublesome to vegetables on sandy soils; it is also destructive on the sugar and tobacco plantations, often necessitating numerous replantings. *Yearbook U. S. Dept. Agr.,* 1901, p. 510.

change, *n.*—**Metataxic change,** the result of shearing movement, in dynamic metamorphism, under conditions more favorable to fracture and development of cleavage than to flowage and recrystallization. By certain writers this is held to be a fundamental difference between the slates, which cleave so readily, and the schists, which are so perfectly foliated. See ★*metataxic.*

Any disturbance in a given portion of the lithosphere of the equilibrium thus existing must result in shearing movement if the disturbance be small, and in flow in a given direction if the relief in that direction from pressure is great and rapid enough. In the former case we should get "*metataxic change,*" in the latter schistosity.
Nature, May 4, 1905, p. 8.

Rayless change, in *radioactivity,* a transformation of matter following the same law as other radioactive changes, but unaccompanied by the emission of *α-* or *β*-rays.—**Secondary change,** specifically, in *biol.,* a modification of a life-history that is new or kenogenetic as contrasted with one that is ancestral or palæogenetic.

When these things are so, who shall determine which developmental process is ancestral and which is due to *secondary change?*
Bateson, Materials for the Study of Variation, p. 9.

change, *v. t.*—**To change front.** (*a*) To change, by military movement, the direction in which the men of a command face. (*b*) To change, radically, one's views on any question.—**To change the rounds,** in *golf,* to play the course the reverse way, in order to preserve the greens. This is done at St. Andrews every alternate week during the active season.

changeant (shoṅ-zhoṅ′), *n.* [F., 'changing.'] An occasional name for labradorite, alluding to the appearance and disappearance of its play of color.

change-gear (chānj′gēr), *n.* The toothed wheels, or the train of them, by which the speed of the feeding or cutting apparatus of a lathe or other machine-tool is adjusted relatively to the speed of the spindle or the work. In screw-cutting on cylindrical pieces, the work must turn as many times, while the tool is moving laterally through one inch, as it is desired that there shall be threads to the inch. This adjustable relation is secured by the change-gear.

change-house, *n.* **2.** In *mining,* a house in which miners keep their mine clothes and make the necessary changes of clothing before entering and on leaving the mine: usually provided with facilities for bathing, and for drying the mine clothes.

change-pinion (chānj′pin″yọn), *n.* One of a train of gears, on a roving- or spinning-machine, which is substituted for another of a different size to effect a change in the speed of the drafting-rolls.

change-point (chānj′point), *n.* Any point in the movement of a mechanism where the motion is not constrained and where it is therefore possible for a part of the mechanism either to stand still or to take some other motion than that which is desired or intended. An example of this is the dead-center of a single-crank engine. The usual method of constraining the mechanism is to duplicate as much of it as is necessary, and so to place the duplicate parts that they are completely constrained while the other similar parts are at a change-point; for example, an engine having two cranks on the same shaft at right angles to each other.

changer, *n.* **4.** One who keeps a change-house. [Scotch.]

change-speed (chānj′spēd), *n.* **1.** The mechanism by which a constant speed of rotation in a motor may cause a varying speed of the driving-wheels, and hence of the whole of the motor-vehicle. While the speed of the motor can be varied, the range of limits is not very wide, and when the speed diminishes at the motor the power diminishes also. The change-speed gearing gives greater leverage to the motor for hill-climbing while exerting its maximum effort; it enables the same motor on a level to drive the car at a high rate of speed when developing the same power as on the grade. Usually in motor-cars there are three speeds forward and one speed backward, the latter a slow and powerful combination. In motors where the motor fluid drives the piston by expanding at constant pressure up to a point of variable cut-off, change-speed gears are not required.

2. The train of wheels used in feed-mechanisms for lathes and similar tools, by which changes can be made in the relative number of turns per minute for the driving and driven shafts. Sometimes called *change-gear.*—**Change-speed gear,** a mechanism for changing the speed of a motor-car or other machine.—**Change-speed lever,** a lever for operating the speed-changing device of a motor-car or other machine.

change-valve (chānj′valv), *n.* A valve for admitting water under pressure into one or more cylinders of a hydraulic crane or lift, in order that the power used shall be proportional to the load. In its usual form it is a slide-valve which by continual motion in one direction opens successively all the ports, but which, being under the control of the operator, can be stopped at will.

changing-note (chān′jing-nōt), *n.* See ★*note*[1].

Chanidæ (kan′i-dē), *n. pl.* [NL., < *Chanos,* typical genus, + *-idæ.*] A family of large isospon-

dylous fishes found in the warmer parts of the Pacific, containing one known genus and three species.

channel[1], *n.* **9.** A tubular passage or duct, such as the pancreatic duct, for liquids or fluids: as, the poison *channel* of a snake's fangs. Sometimes called *canal.*

channel-bar (chan′el-bär), *n.* Any bar rolled so as to have a lengthwise channel or groove: thus an I-beam is a channel-bar channeled on both sides. Channel-bars are much used in steel structural work for columns, and in shipbuilding for frames and deck-beams.

channel-board, *n.* **2.** In *organ-building,* same as ★*groove-board.*

channeling-machine, *n.*—**Rounding-and-channeling machine,** a channeling-machine which also automatically rounds and shapes the sole; a sole-fitting and -channeling machine.

channel-iron, *n.* **3.** In a vehicle, the concave metal tire of a wheel which is used with rubber tires.

channelization (chan″el-ī-zā′shọn), *n.* Same as ★*canalization,* 3.

The problem is how to give normal emotional *channelization,* the safety valve of this biological heredity.
C. J. France, Amer. Jour. Psychol., XIII. 405.

channel-turner (chan′el-tėr″nėr), *n.* In *shoe-manuf.,* a machine for turning back the flap of the channel cut in the leather to leave it open for the sewing-machine; a channel-flap turner or opener. After sewing, the channel-flap is turned back and cemented down by a channel-laying machine.

channelway (chan′el-wā), *n.* **1.** A stream-way; a stream-course.

At Aswan, foundations had to be laid across *channel-ways* through which, in times of flood, the river rushed with a speed of 15 miles an hour.
Sci. Amer., Feb. 28, 1903, p. 148.

2. The pipe which connects a condenser with an air-pump and through which the condensed steam and air are drawn off.

chant, *n.*—**Mountain chant,** a ceremonial of the Navajo Indians connected with their Shamanistic rites. *Smithsonian Rep.* 1891, p. 434.

chantage (shäṅ-täzh′), *n.* [F., a fig. use of *chantage,* a method of fishing in which the fish is scared within reach by means of noise, < *chanter,* sing, etc.: see *chant, v.*] The extortion of money under threat of making public charges of misconduct or the like; blackmail.

chanterelle, *n.* **3.** In the hurdy-gurdy, one of the two strings which may be stopped by keys and on which melodies are played. Their proper tone is usually the G above middle C.

chantey, *n.* Specifically, a song sung by sailors when at work together, as in hauling or heaving, etc., the better to secure a united pull at the proper moment, which is indicated by the ictus or beat of the music. See ★*chantey-man.*

chantey-man (shan′ti-man), *n.* The leader of a chantey, who usually sings one or two lines while the men get their breath and a new hold, the crew singing the chorus and pulling together when the accented syllable is reached.

chantier (shan-tyā′), *n.* A Canadian-French equivalent of *shanty*[2].

chaogenous (kā-oj′e-nus), *a.* [Gr. *χάος,* chaos, + *-γενής,* -born.] Chaos-born: as, *chaogenous* deities.

chaos, *n.* **5.** [*cap.*] The void of unformed matter personified and deemed by some among the Greeks as the oldest of the gods.

chaotheistic (kā″ō-thē-is′tik), *a.* [Gr. *χάος,* chaos, + *θεός,* god, + *-ist-ic.*] Identifying chaos or the primordial unformed matter with God. *F. Hall. N. E. D.*

chaotical (kā-ot′i-kal), *a.* Same as *chaotic.*

chap[5] (chap), *n.* The act of picking and choosing; selection: as, '*chap* and choice.' [Scotch.] See *chap*[5], *v. t.*

Chap. An abbreviation (*b*) of *chaplain.*

chapao (chä-pou′), *n.* [Turki *chapāo,* a plundering, *chapāul,* a plundering raid, a charge of cavalry, Hind. *chhāpā,* a raid, a night attack.] A raid, foray, or night attack (of Baluchis or Afghans).

The *chapaos* of the Baluchis have been checked by the division of Baluchistan between Persian and British rule.
Nature, Aug. 28, 1902, p. 418.

chaparejos (chä-pä-rā′hōs), *n. pl.* [Mex. Sp.] Strong leather breeches or overalls worn by horsemen, particularly by cow-boys, in the Western States, for protection against bushes and thorns. Generally abbreviated to *chaps.*

A bit farther on we saw some cowpunchers, or what seemed such, for they sat in cow saddles and wore *chaparejos.*
Forest and Stream, Feb. 21, 1903, p. 147.

Chaparral lily, millet, pea. See ★*lily,* ★*millet,* ★*pea.*

chaparreras (chä-pä-rā′räs), *n. pl.* [Mex. Sp.] Same as ★*chaparejos.*

Chapeau chinois, a jingle of small bells, mounted on a staff and frame, occasionally used in military music; a Chinese pavilion (which see, under *pavilion*).

Chapel royal. (*b*) The body of clergy and assistants, including singers, attached to a royal court. The chapel royal of England dates from at least the fifteenth century. —**Minion chapel,** a chapel which has never been consecrated, and which may be used, therefore, for other than religious purposes.—**Mortuary chapel,** an oratory or small chapel connected with a tomb and forming a part of the memorial structure; also, less properly, the chapel of a public cemetery.—**Parochial chapel.** (*a*) A chapel belonging to and within a parish, but apart from the parish church. (*b*) The place of worship of an ancient division of a parish, attached to it by custom or repute.—**Proprietary chapel,** a private chapel. Though consecrated, it may be converted to secular uses at any time.

chapelwarden (chap′el-wâr″dn), *n.* One who holds the same office in a chapel (of the established church of England) as a churchwarden holds in a church: now commonly replaced by *churchwarden. N. E. D.*

chaperon, *n.* **6.** A conductor or guide; escort. Compare def. 4.

chaperonee (shap″ė-rō-nē′), *n.* A young lady who is chaperoned. [Colloq.]

chapin (chä-pēn′), *n.* [Cuban Sp.] A name of several species of the genus *Lactophrys,* especially of *L. bicaudalis,* of the family *Ostraciidæ,* found in tropical seas.

chapl. An abbreviation of *chaplain.*

chaplet[1], *n.* **12.** In *foundry-work,* a sheet-metal form used in adjusting the core in a mold and fused into the casting when the metal flows into the mold.

chapmanship (chap′man-ship), *n.* The occupation or business of a chapman; buying and selling; merchandizing.

chappa (chap′ä), *n.* [Origin not ascertained; perhaps W. African.] A disease of some natives of West Africa, characterized by multiple cutaneous nodules, which later ulcerate, and destructive inflammation of the joints.

chapparos, *n. pl.* Same as ★*chaparejos.*

chappaul (cha-pâl′), *n.* [Perhaps N. Amer. Indian.] Same as ★*squaw-fish.*

chappee (cha-pē′), *n.* [Hind. *chhāp, chhāpā,* a mark, stamp, impression: see *chop*[4].] In India, a marked rupee.

chaps (chaps), *n. pl.* An abbreviated form of ★*chaparejos.* [Western U. S.]

chaptalization (chap″tal-ī-zā′shọn), *n.* [*chaptalize* + *-ation.*] In *wine-making,* a process of adjusting or correcting the percentages of free acid and sugar in the must of any vineyard in which, as in 'bad years,' the proportion has changed. Chaptal's method was to add the calculated weight of sugar and to neutralize the excessive acid by means of powdered marble. See ★*gallization. Sadtler,* Handbook of Indust. Chem., p. 205.

chaptalize (chap′tal-īz), *v. t.*; pret. and pp. *chaptalized,* ppr. *chaptalizing.* [*Chaptal,* a French chemist, + *-ize.*] In *wine-making,* to adjust, improve, or correct the proportions of free acid and sugar in the must. See ★*chaptalization.*

chapter, *n.* **9.** A division of the acts of Parliament of a single session.—**10.** Head; subject; category: as, to have much to say on some *chapters.*—**Patristic chapters.** See ★*patristic, a.*

chapter-house, *n.* **2.** The house or building which a chapter of a college fraternity uses as a club-house. [U. S.]

chaqueta (chä-kā′tä), *n.* [Sp.: see *jacket.*] A jacket, particularly a leather jacket, worn by cow-boys as a protection when traveling through the chaparral. [Western and southwestern U. S.]

char[2], *v.* **I.** *trans.* **3.** To scorch; burn; 'singe' (liquids): as, to *char* the wort in brewing.

II. *intrans.* To become charcoal.

Billets that blaze substantial and slow;
Pine-stump split deftly, dry as pith;
Larch heart that *chars* to a chalk-white glow.
Browning, Heretic's Tragedy, st. 4.

char[2], *n.* **2.** In *sugar-manuf.,* concentrated sweet water or liquor highly charged with dissolved sugar.

char[4], *n.*—**Greenland char,** the European char, *Salvelinus alpinus.*—**Oregon char.** Same as *Dolly Varden trout.*

characetum (kā-ra-sē′tum), *n.*; pl. *characeta* (-tä). [*Charac(eæ)* + *-etum.*] A zone of vegetation found in the cold deeper waters not far from shore, characterized by the *Characeæ.*

characine[2] (kar′a-sin), *n.* [*Charac(eæ)* + *-ine*[2], so called from the odor of *Chara* which it exhales.] A kind of camphor obtained from certain terrestrial algæ, as *Palmella* and *Oscillaria.*

charact, *n.* **2.** A magical sign or emblem.

Dig under thy feet and thou shalt find a bow of brass and three leaden arrows, inscribed with talismans and *characts.*
R. F. Burton, Arab. Nights, I. 125.

character, *n.*—**Acquired character,** a change of structure or of function that is brought about in an organism during its individual life, as contrasted with one that comes to it from its parents through the egg from which it is born.

By *acquired characters* I mean those which are not preformed in the germ, but which arise only through special influences affecting the body or individual parts of it.
Weismann (trans.), Germ plasm, p. 392.

Aggressive character, a peculiarity of color or form or marking that serves to favor an animal in its aggressions, namely, one that serves to conceal it from its prey, as contrasted with one that is protective and serves to hide it from its enemies.—**Aposematic character.** See ★*aposematic.*—**Compound character,** in *biol.,* according to Bateson, a character which may either be transmitted entire as a single character, in inheritance, or broken up into its integral constituent characters or hypallelomorphs. See ★*hypallelomorph.*—**In character.** (*a*) With costume etc., appropriate to the rôle or part assumed: as, to sing a song *in character.* Hence—(*b*) Appropriate, fitting. —**Out of character,** at variance or out of keeping with the character or part assumed.—**Protective character,** in *zoöl.,* any peculiarity of form, color, markings, or habit which serves to hide its possessor from enemies.—**Pseudaposematic, pseudepisematic, pseudosematic, recessive, sematic character.** See ★*pseudaposematic,* etc.—**Signaling character.** Same as ★*sematic character.*—**Warning character,** any characteristic of a dangerous, poisonous, or unpalatable organism which, when displayed, serves to warn or alarm enemies; an aposematic character. See ★*aposematic.*—**Wedge-formed characters,** cuneiform characters. See *cuneiform,* 1 (*a*).

characterial (kar-ak-tē′ri-al), *a.* Pertaining to the characters (of a drama).

One of Shakespeare's most wonderful gifts was his unlimited power of a *characterial* invention to suit any kind of plot.
Halliwell, Life of Shakespeare, p. 116.

characterist (kar′ak-tėr-ist), *n.* [*character* + *-ist.*] **1†.** One who employs charcts or magical signs.—**2.** One who depicts character, as distinct from a mere caricaturist or fun-maker.

Mr. Du Maurier, *characterist* rather than caricaturist, gives this sheep face to his typical Duchess of Stilton, and to her two daughters.
R. G. White, England Without and Within, p. 205, note.

characteristic. **I.** *a.*—**Characteristic geometry.** See ★*geometry.*

II. *n.*—**Characteristic of a surface,** the curve of intersection of a surface with a neighboring surface of the same family.

characterology (kar″ak-tėr-ol′ō-ji), *n.* [Gr. *χαρακτήρ,* character, + *-λογια,* < *λέγειν,* speak.] The science of character; the study of types, genesis, etc., of character; ethology.

In the process of emancipation from traditional and untenable views of man, an iconoclastic attitude towards all attempts at practical *characterology* and theories of constitution was probably the only safe procedure.
Amer. Jour. Psychol., July–Oct., 1903, p. 356.

character-plant (kar′ak-tėr-plant), *n.* In *phytogeog.,* that species, or one of the species, in a given plant-formation to which it owes its physiognomic character; a facies.

charadriiform (ka-rad′ri-i-fôrm), *a.* Belonging to the order of birds known as *Charadriiformes.*

Charales (kā-rā′lēz), *n. pl.* [NL. (Lindley, 1833), < *Chara* + *-ales.*] An order of cryptogamous plants which contains the family *Characeæ* or *Charaphyceæ* only. See *Characeæ.*

Charaphyceæ (kar-a-fis′ē-ē), *n. pl.* [NL., < *Chara* + *φῦκος,* seaweed, + *-eæ.*] Same as *Characeæ.*

charbon, *n.* **3.** In *bot.,* a name formerly applied to the smut of wheat; also, sometimes applied to the black rot of the grape, especially in France.—**Charbon roux.** See *red* ★*charcoal.*

charco (chär′kō), *n.* [Sp. Pg.; origin unknown.] A pond or pool of standing water; a small lake.

charcoal, *n.*—**Red charcoal,** a kind of charcoal of a dark reddish-brown color, made by heating wood with the exclusion of air to a lower temperature than would produce ordinary black charcoal. The volatile matter is not entirely removed. It is used in France in the manufacture of sporting gunpowder, and recently in England in cocoa-powder for heavy artillery service.

charcoal (chär′kōl), *v. t.* [*charcoal, n.*] **1.** To blacken, write, or draw with charcoal; execute in charcoal: as, to *charcoal* one's eyebrows.

And I decipher still
Half a lame couplet *charcoaled* on the wall.
Thackeray (trans.), The Garret, st. 2.

2. To suffocate with the fumes of charcoal.

A shoemaker who was jealous of a young girl . . . because she wouldn't shut herself up in an air-tight three-pair of stairs, and *charcoal* herself to death with him.
Dickens, Nicholas Nickleby, xxxvii.

charcoaler (chär'kō-lėr), *n.* A charcoal-burner; one who deals in charcoal.

Ah! friendless in death!
Rude forest-hands fling
On the *charcoaler's* wain
What but now was the king!
F. T. Palgrave, Death in the Forest, st. 6.

charcoaling (chär'kō-ling), *n.* Killing by means of the fumes of burning charcoal.

The other day the papers contained an account of a "wholesale *charcoaling*," in which a father, mother, and two children sought death in this way.
Buck, Med. Handbook, VII. 555.

charcoal-pencil, *n.* 2. A little stick molded from a mixture of wood charcoal in powder, gum, or starch paste, and a small quantity of saltpeter. When lighted at one end it continues to burn, and the red-hot point is used to lead a crack in thin glass, as of a tube or beaker, in any required direction, broken pieces of chemical apparatus being thus adapted to new uses.

charcoal-pig (chär'kōl-pig), *n.* A kind of pig-iron made by using charcoal as a fuel to reduce or smelt the ore in the blast-furnace. It was formerly considered the best grade of iron, being free from sulphur and some other impurities usually found in iron made with coal or coke as a fuel. Other forms of iron or steel, purified in the process of manufacture, have largely taken its place.

Charcot-Leyden crystal. See *Charcot's crystals*, under *crystal*.

Charcot's arthropathy. See ★*arthropathy*.

charcuterie (shär-küt-rē'), *n.* [F., < *charcutier*, a pork-butcher, earlier *chaircutier*, *chercuitier*, < *chair cuite*, cooked meat; *chair*, < L. *caro*, flesh, meat; *cuite*, < L. *cocta*, cooked.] 1. The occupation of a pork-butcher; the curing and dressing of pork in its various salable forms—hams, bacon, cutlets, sausages, etc.—2. Table delicacies of pork or into which pork largely enters.

charcutier (shär-kü-tyā'), *n.* [F.] A pork-butcher.

Chardonnet silk. See ★*silk*.

Charegite (kar'ē-jīt), *n.* [Ar. *khārijīyah*, aliens, < *kharaja*, go out.] A member of a puritanical Mohammedan sect which dates from the seventh century.

The *Charegite*, for such was the seeming Marabout, dealt the Nubian a blow with the dagger.
Scott, Talisman, xxi.

charge, *v. t.* 16. To paint too heavily; to over-express.

charge, *n.* 23. In *ordnance*, the powder contained in a bag or case in quantity suitable for loading a gun, or the powder filling the interior of a projectile. A *service* or *ordinary charge* is that ordinarily used in the gun. A *reduced charge*, containing less powder, is sometimes used in target practice to save expense. A *bursting* or *shell charge* is the explosive in the interior of a shell.—**Effective charge**, the amount of money required for or expended on the effective militant forces of a country, that is, on those fit for or actually engaged in service as distinguished from non-effectives, such as the retired, the pensioned, etc. *Macaulay*.

chargé (shär-zhā'), *n.* Short for *chargé d'affaires*.

charged, *p. a.* 3. In *art*, heavily painted; over-expressed.

chargé d'affaires. *n.* 3. An officer or other person left in charge of any business or office during the temporary absence of the chief.

chargee (chär-jē'), *n.* [*charge* + *-ee*[1].] One who holds, as security, a charge upon property: analogous to *mortgagee*.

chargeling (chärj'ling), *n.* [*charge* + *-ling*[1].] A young charge. See *charge*, *n.* 10.

At this period Jesuits stamp the future of their *chargeling* flocks. *G. Meredith*, Richard Feverel, xii.

chargeman (chärj-man), *n.* A workman who has charge of the men engaged in doing a certain piece of work; a foreman. In some establishments the chargeman is given a contract for the work which he directs, so that he will have the greatest possible interest in the speedy and economical performance of it.

charging-box (chär'jing-box), *n.* A box in which ore, scrap, pig-iron, fluxes, etc., are conveyed to the furnace by means of a charging-machine.

charging-current (chär'jing-kur″ent), *n.* In *elect.*, the current used in charging a storage battery, condenser, or cable.

charging-machine (chär'jing-ma-shēn″), *n.* A machine for delivering coal, ore, or metals to a furnace, gas-retort, or coke-oven. It is made in many different forms, all essentially loading-machines which take up the material and push it by means of a ram into the furnace, retort, or oven; the ram distributes it, and is then withdrawn to permit the closing of the door. In gas charging-machines steam is sometimes used to blow the coal into the retort. In one sense a mechanical stoker is a charging-machine, but it is not usually classed as such. See *mechanical stoker*.

charging-scale (chär'jing-skāl″), *n.* A scale for weighing the various materials used in a blast-furnace. It has a series of beams, one for each kind of material. To obtain the right proportion, each beam is weighted to the amount required, and each load is made to balance the weight of its special beam, the object being to mix the materials in the right proportions and weigh and deliver each as rapidly as possible without disclosing the formula on which the combined proportions are based.

charging-spoon (chär'jing-spön″), *n.* In *mining*, a hollow half-cylinder of copper or zinc at the end of a copper or wooden rod, used for introducing loose gunpowder in blast-holes nearly or quite horizontal. *C. Le N. Foster*, Ore and Stone Mining, p. 161.

charging-tube (chär'jing-tūb″), *n.* Any tube for charging a chamber or tank with a fluid under pressure; specifically, a tube for charging an air-chamber on a pump with air. Water under a pressure greater than the atmospheric takes up air very readily; hence, some means should be provided for supplying air to the air-chamber on the discharge side of a pressure-pump.

Chari group. See ★*group*[1].

chariotry (char'i-ot-ri), *n.* [*chariot* + *-ry*.] 1†. The art of charioteering.

Chariotry is one of the antiquated Modes of Chivalry. Heretefore, as it was used in Triumphs, so in field service and Games.
Aubrey, Remaines of Gentilisme and Judaisme, p. 120.

2. The soldiers who fought from chariots.

And deep ruts are yet visible on all the bogs, moors and mosses . . . indented . . . by the wheels of Fingal's *chariotry*. *Blackwood's Mag.*, XXIV. 260.

charismatic (ka-riz-mat'ik), *a.* [*charism* + *-atic*.] Of or pertaining to charism or charismata.

charisticary (ka-ris'ti-kā-ri), *n.* [NL. **charisticarius*, < Gr. *χαριστικός*, given of grace, freely given, < *χάρις*, grace, favor.] Originally, the recipient of a prebend, the allowance of food which a monk or cleric received from the common store: same as *prebendary*.

charityless (char'i-ti-les), *a.* [*charity* + *-less*.] Devoid of charity.

Such people there are living and flourishing in the world—Faithless, Hopeless, *Charityless*.
Thackeray, Vanity Fair, viii.

charivari, *n.* 2. [*cap.*] The name of a satirical journal founded in Paris in 1832.—**The London Charivari**, the secondary title of "Punch," a humorous weekly journal published in London.

charivari (shar-i-var'i), *v. t.* To treat to a charivari.

chark[2], *n.* 2. The fire-drill; an instrument for producing fire.

charlatanish (shär'la-tan-ish), *a.* [*charlatan* + *-ish*[1].] Savoring somewhat of the charlatan.

charlatanistic (shär'la-tan-is-tik), *a.* Having a tendency to charlatanism; inclined to quackery; somewhat quackish.

Charley, *n.* 2. A small pointed beard such as that worn by Charles I. of England and by men of his time: hence the name. It extended from the under-lip and ended in a point just below the chin.—3. The fox.

charlock-weevil (chär'lok-wē″vil), *n.* An English gardeners' name for a European curculionid beetle, *Ceuthorhynchus contractus*, which feeds on charlock.

Charlton white. See ★*white*[1].

Charmouthian (chär-mouth'i-an), *a.* Of or pertaining to *Charmouth*, in Dorset, England.—**Charmouthian stage**, in *geol.*, a division of the Lower Jurassic rocks or Lias of France and Switzerland; it corresponds essentially to the Middle Lias of England.

charnel[2] (chär'nel), *n.* [Cf. *carnel*.] 1. A hinge, as of a door, window, chest, etc.—2. The pivot or hinge on which the beaver or vizor of a helmet moved.

charneled (chär'neld), *p. a.* [*charnel*[2] + *-ed*[1].] Hinged; jointed.

The bassenet pece whereunto the Barbet . . . is *charneld*. *Hall*, Chron., p. 674.

charnockite (chär'nok-it), *n.* [Named after Job *Charnock*, associated with the early history of Calcutta.] In *petrog.*, a name given by T. H. Holland (1893) to a group of phaneric igneous rocks in India, which range from acid to basic varieties and agree in containing hypersthene; the type rock is hypersthene-granite.

Charonic (kā-ron'ik), *a.* Of or pertaining to Charon, the ferryman, in Greek mythology, of the lower world.

Charrinia (ka-rin'i-ä), *n.* [NL. (Viala and Ravaz, 1894), named for Dr. *Charrin*, a French physician.] A genus of pyrenomycetous fungi. The single species, *C. Diplodiella*, is said to be the ascigerous form of *Coniothyrium Diplodiella*, which causes the white rot of the grape. See ★*Coniothyrium*, *grape-rot* and *rot*, 2 (*b*).

chart, *n.*—**Astrographic chart**, a chart of a region of the stars, specifically, one of the star-charts of the systematic astrophotographic survey of the heavens.—**Cosmogony chart**, a birch-bark chart on which a pictographic record of the creation myth is engraved: used by the Ojibwa Indians in connection with their religious ceremonials.—**Cotidal chart.** See ★*cotidal*.—**Halley's chart**, a chart showing the curves of compass variation.—**Heliographic chart**, a chart which shows the sun's spots at any particular time and their physical peculiarities.—**Hydrographic chart**, a chart showing especially the hydrographic features of the ocean, such as the depth of water, the currents at the surface and beneath, the density or saltness of the water, the temperature, and the changes of these with the seasons.—**Meteorological chart.** See *weather-map*.—**Physical chart**, a map or diagram designed to illustrate certain features of physiography or physical geography.—**Thermal chart**, a chart showing the temperature of the air or land or water, usually by means of isothermal lines.

charta, *n.* 2. In *pharm.*; (*a*) A folded paper containing a powder; also, a dose of any medicinal powder. (*b*) A piece of bibulous paper impregnated with some medicinal substance.—**Charta cantharidis** or **epispastica**, blistering-paper; a paper spread with a mixture of cantharides, Canada turpentine, and olive-oil, used for counter-irritation or to make a blister.—**Charta potassii nitratis.** Same as ★*asthma-paper*.—**Charta sinapis**, mustard-paper or -leaf; a paper spread with a mixture of black mustard and gutta-percha solution, used as a substitute for a mustard-plaster, to produce counter-irritation.

Charter colony, a colony under charter government.—**Charter government**, government of a colony under authority of a written charter granted by the sovereign power.—**Charter member**, one whose name appears in the charter of an organization as one of its founders.—**Charter of pardon**, in *Eng. law*, an instrument under the great seal by which a pardon is granted to a man for felony or other offense.

Chartered accountant. See ★*accountant*.

charterer, *n.* 3. A freeman of a chartered borough.

charter-school (chär'tėr-sköl″), *n.* One of the schools established in Ireland by a society chartered in 1733 to provide a Protestant education for the Roman Catholic poor. These schools were of two kinds, day-schools and boarding-schools; the boarding-schools were supported by Parliament after 1745, when a special tax was devoted to them. The charter-schools failed in their purpose and came to an end in 1825.

chartographist (kär-tog'ra-fist), *n.* [*chartograph-y* + *-ist*.] One who is versed in chartography, or is engaged in map-making; a chartographer.

chartology (kär-tol'ō-ji), *n.* [Gr. *χάρτης*, a leaf (L. *charta*, a map), + *-λογία*, < *λέγειν*, speak.] The science of map-making.

chartreuse, *n.* 3. In *cookery*, a preparation usually of game, fillets, etc., incased in a mold of rice; also, fruits inclosed in blanc-mange or puddings. These preparations were invented, it is said, by the monks of the monastery of Grande Chartreuse to disguise meat.—**Chartreuse cat.** See ★*cat*[1].

Chartreux (shär-trė'), *n.* [F., earlier *charteus*, < ML. *Carthusius*: see *Carthusian*.] A monk of the Carthusian order which was founded by St. Bruno in the eleventh century. The name was derived from the valley of the Chartreuse, where the order's first monastery was founded.

charvolant (shär-vō-laṅ'), *n.* [F. **char volant*, 'flying car.'] A four-wheeled vehicle with a kite attachment, designed to be propelled by the force of wind: patented in England in 1826.

chary (chār'i), *adv.* Charily; carefully.

Thy heart, which I will keep so *chary*
As tender nurse her babe from faring ill.
Shak., Sonnet xxii.

Great thanks, mighty Lucifer!
This will I keep as *chary* as my life.
Marlowe, Faustus, ii. 2.

chase[1], *v.* I. *trans.* 4. To push the bottle toward one and thus call upon him to fill up his glass.

"Above all, why, when I fill this very glass of wine, cannot I push the bottle to you, and say, 'Fairford, you are *chased*'!" *Scott*, Redgauntlet, Letter i.

II. *intrans.* 4. To exceed a given customary standard of production. [Workmen's slang.]

chase[1], *n.*—**Hazard chase.** See ★*hazard opening*.—**To have a good chase** (*naut.*), to be so constructed and to have guns so mounted as to be able to fire at an object dead ahead or dead astern.

chase[2], *n.* 7. The conical apex of a spinning-machine cop or bobbin, or the extent of the traverse of the winding-faller wire on a spinning-mule. Sometimes called the *nose*.

The apex of the cop is the nose or *chase*; this extends from the shoulder of the cop to its apex. The shoulder acts as a good support to the *chase* of the cop in winding.
Hannan, Textile Fibres of Commerce, p. 124.

8. In *carp.*, a score or shallow cut in a mortise. [Local, Eng.]

chasee (chās-ē′), *n.* One who is chased. [Rare.]

chaser[1], *n.* **4.** The sip of water or mild drink with which tipplers 'chase' or wash down their dram of spirits. [Slang.]

chaser[2], *n.* **3.** Same as *edge-runner mill* (which see, under *mill*[1]). Also called *chaser mill.*

chasmal (kaz′mal), *a.* [*chasm* + *-al*[1].] Of the nature of a chasm; chasm-like: as, a *chasmal* difference.

chasmantherous (kaz-man′thėr-us), *a.* [Gr. *χάσμα*, opening, + NL. *anthera*, anther, + *-ous.*] In *bot.*, hemiclistogamous with the stamens exserted: said of a class of flowers.

chasmoclistogamous (kaz″mō-klis-tog′a-mus), *a.* [Gr. *χάσμα*, an opening, + *clistogamous.*] In *bot.*, bearing both open and closed flowers.

chasmogamous (kaz-mog′a-mus), *a.* [*chasmogam-y* + *-ous.*] Exhibiting the phenomenon of chasmogamy.

chasmophyte (kaz′mō-fīt), *n.* [Gr. *χάσμα*, an opening, + *φυτόν*, plant.] In *phytogeog.*, a plant inhabiting the crevices of rocks. *Schimper*, (trans.) Plant Geog., p. 178.

chasse[1] (shäs), *n.* [F., short for *chasse-café*, lit. 'chase coffee.'] A small glass of brandy or liqueur taken after coffee, at dinner, to remove its taste or odor or as a digester. See *pousse-café.*

chasse[2] (shäs), *n.* [F. *châsse*: see *chase*[2], *n.*] A shrine or receptacle for relics of a saint.

chassé (shä-sā′), *v.*; pret. and pp. *chasséd*, ppr. *chasséing.* [Also *chassée*, *chassey*, and orig. *chassez*, < F. *chassez* (used as a direction in teaching dancing), impv. of *chasser*, chase: see *chase*[1]. The spelling *chassé* (as if from the F. pp.) appears to be a mistake. See the noun, which is much later in English. Cf. the F. nouns *chassez-déchassez*, and *chassez-huit*, names of dance steps.] **I.** *intrans.* **1.** In *dancing*, to execute a step or gliding motion (known as the *chassé*) in which one foot is kept in advance of the other.—**2.** To move or make one's way with gliding steps, as across a crowded room: as, before long he *chasséd* up to me. [Colloq.]

II. *trans.* To cause to chassé toward the door; dismiss. [Slang.]

> He was *chasséd* on the spot. *Thackeray.*

chassé (shä-sā′), *n.* [Also *chassez*; from the verb. The F. *chassé* in the same sense is late, and may have been suggested by the E. use of the spelling *chassé.*] In *dancing*, a step or gliding motion in which one foot is kept in advance of the other.

chasse-café (shäs-kä-fā′), *n.* [F.] See ★*chasse*[1].

chassis, *n.* **2.** In *fort.*, the foundation-frame or bed-plate upon which a gun-carriage is supported or adjusted.—**3.** The frame of a motor-car or motor-vehicle, exclusive of the seats or body. It includes the structural elements, the motor and its generator of power, the tanks, transmission-gear, wheels, axles, and springs.—**Carrosserie chassis** [F.], a carrying or supporting chassis or frame; specifically, the rear frame of a motor-car which has a frame for each axle.

chastend, *pp.* A simplified spelling of *chastened.*

chastenment (chās′n-ment), *n.* The act of *chastening.*

chastize, chastizement. See *chastise, chastisement.*

chastizment, *n.* A simplified spelling of *chastisement.*

chat[1], *n.* **3.** Impudence or impudent talk. [Scotch.]—**4.** The point or question to be settled. [Colloq.]

> Has the gentleman any right to be in this room at all, or has he not? Is he commercial, or is he—miscellaneous? That's the *chat*, as I take it. *Trollope*, Orley Farm, vi.

chat[4], *n.* **3.** A small potato of inferior quality. [Prov. Eng.]—**4.** A small piece of coal. [Prov. Eng.]—**5.** In *mining*, a piece of ore with stone adhering to it; in the plural (also singular), ore in this state (usually called in the United States *raggings*): a middle product made in the concentration of ore, consisting of particles of gangue containing included grains of valuable mineral.—**6.** *pl.* The tailings or waste product from the concentration of ore.

Château d'eau, a form of fountain in which the monumental architectural setting is especially elaborate.

chatelainry (shat′e-lān-ri), *n.* [*chatelain* + *-ry.*] The district or territory under a chatelain; a castellany.

Chattahoochee beds. See ★*bed*[1].

Chattanooga shale. See ★*shale.*

Château d'Eau (Fontana dell' Acqua Paola), Rome.
(From "Baudenkmäler in Rom," pub. by Wasmuth, Berlin.)

chattelization (chat″el-i-zā′shon), *n.* **1.** The act or practice of chattelizing real property.—**2.** The act or practice of chattelizing human beings; ownership of human beings; the fact of being chattelized.

chattelship (chat′el-ship), *n.* The state of being held in slavery as property.

chatter-mark (chat′ėr-märk″), *n.* **1.** A mark left on a piece of metal by a cutting-tool, when the latter is so adjusted that it alternately cuts and is forced back, thus cutting intermittently and making a chattering noise.—**2.** Irregular gouges made on surfaces over which a glacier passes, by the slipping of rock fragments held in the lower portion of the ice. *Chamberlin and Salisbury*, Geol., I. 276.

chatterment (chat′ėr-ment), *n.* Chattering; chatter.

chattery (chat′ė-ri), *a.* Chattering, as with cold; shivery.

Chaucerian (châ-sē′ri-an), *a.* and *n.* **I.** *a.* Of, pertaining to, or characteristic of the English poet Chaucer or his writings: as, *Chaucerian* English.

II. *n.* A student of Chaucer.

Chaudfroid sauce. See ★*sauce.*

chauffeur (shō-fėr′), *n.* [F., a fireman, a stoker: hence, recently, the 'fireman' or controller of a steam or other automobile, < *chauffer*, heat, fire up: see *chafe*, *v.*] The driver of an automobile.

chauffeuse (shō-fėz′), *n.* [F., fem. of *chauffeur.*] A woman who operates an automobile.

Chauliognathus (kâ-lī-og′na-thus), *n.* [NL., < Gr. *χαυλι(όδους)*, with outstanding (teeth), + *γνάθος*, jaw.] An important genus of malacodermid beetles, comprising 40 or more American species: known popularly as 'soldier-beetles.' See cuts under *soldier-beetle. Hentz*, 1830.

chaulmugric (châl-mug′rik), *a.* Derived from chaulmugra.—**Chaulmugric acid**, an acid, $C_{18}H_{32}O_2$, obtained from chaulmugra-oil expressed from the seeds of *Hydnocarpus Kurzii.*

chaussée[2] (shō-sā′), *n.* [F.: see *causey, causeway.*] A causeway; a highway.

> Two roads lead westwards from Brusa. The one, a regular *chaussée* with bridges, kilometre posts, and telegraph, runs about due west through the plain.
> *Geor. Jour.* (R. G. S.), IX. 151.

chaussure (shō-sür′), *n.* [F., < *chauser*, *v.*, shoe, < *chausse*, a shoe.] A covering for the feet, such as shoes, boots, sandals, etc.

Chautauqua maskalonge. See ★*maskalonge.*

Chautauquan (châ-tâ′kwan), *a.* and *n.* **I.** *a.* **1.** Of or pertaining to the lake or the county of Chautauqua, in southwestern New York.—**2.** Of or pertaining to the Chautauqua Literary and Scientific Circle, founded for the promotion of home reading and study in connection with the summer school which meets at Chautauqua Lake, or its courses of study.—**3.** In *geol.*, noting a division of the Devonian of North America, which comprises the last period (Chemung beds) of the Neodevonian.

II. *n.* A member of the Chautauqua Circle, or one who takes or has taken its course of study and examinations.

Chavannesia (shav-a-nē′zi-ą), *n.* [NL., named by Alphonse de Candolle in 1844, in honor of his friend Edouard *Chavannes*, a Swiss botanist.] A genus of dicotyledonous plants of the family *Apocynaceæ.* See *Urceola.*

chavellery†, *n.* **1.** Same as *cavalry.*—**2.** The Cavaliers or Cavalier party of the seventeenth century.

Chayota (chä-yō′tä), *n.* [NL. (Jacquin, 1780), < Amer. Sp. *chayote*, < Aztec *chayotl.*] A genus of dicotyledonous plants which belong to the family *Cucurbitaceæ.* See *cheyote* and *Sechium.*

chayro (chī′rō), *n.* [Aymará of Bolivia.] A soup made of mutton and jerked meat, chuñu, potatoes, maize, and various condiments: a Bolivian national dish.

Ch. B. An abbreviation of the Latin *Chirurgiæ Baccalaureus*, Bachelor of Surgery.

Ch. Ch. An abbreviation of *Christ Church.*

Ch. D. **1.** An abbreviation of the Latin *Chirurgiæ Doctor*, Doctor of Surgery.—**2.** See ★*D. Ch.*

Ch. E. An abbreviation of *Chemical Engineer.*

cheat[1], *n.* **7.** In *bot.*: (*a*) The darnel, *Lolium temulentum.* (*b*) Same as *chess*[2].

cheater, *n.*—**Tame cheater,** a tame animal, such as a duck, used as a decoy.

> He's no swaggerer, hostess; a *tame cheater*, i' faith; you may stroke him as gently as a puppy greyhound: he'll not swagger with a Barbary hen, if her feathers turn back in any show of resistance. *Shak.*, 2 Hen. IV., ii. 4.

chebec[2] (chē-bek′), *n.* [Prob. imitative.] A name for the least flycatcher, *Empidonax minutus:* used chiefly in New England.

chebog (chē-bog′), *n.* [Of New England Amer. Ind. origin (Narragansett?).] A menhaden.

chebule (ke-böl′), *n.* [F. *chebule*, It. *chebuli*, < Hind. *Kābulī*, 'of Kabul,' whence it is imported into India.] The dried, astringent, prune-like fruit of *Terminalia Chebula*, used as a tan, dye, and medicine. See *myrobalan* and *Terminalia*[2].

chebulic (ke-bö′lik), *a.* [*chebule* + *-ic.*] Obtained or derived from *chebule*: as, the *chebulic* or black myrobalan of commerce.—**Chebulic acid,** a crystalline acid with a sweet taste found in the stones of *Terminalia Chebula.*

check[1], *n.* **19.** A longitudinal crack in timber due to too rapid seasoning. Also called *season-check.* See *check*[1], *v. i.*, 5.—**20.** In *irrigation*, a small levee or dike for holding the water on irrigated fields.—**21.** In experimentation, a part of the material of the experiment left untreated for the sake of comparison. Thus in fertilizer-tests one or more plats are left without fertilizer in order to know what results are due to fertilization in the others.—**22.** Same as ★*checkers*[1], **11.**—**23.** A joint having two parts which fit one into the other and so form a guide. A dowel-pin is a common example. It is customary in high-pressure hydraulic piping to check the flanges, that is, to turn a groove in the face of one flange and make a tongue to correspond on the other.

24. In *card-playing* and *banking games*, a counter sold by the banker which can be redeemed at any time. A stack of checks is 20. When of various colors, the white are always of least value, red next, and then blue and yellow.

25. In *hunting*, a stoppage of the hounds owing to temporary loss of the scent.—**Discovered check,** in *chess*, a check administered by the moving of a piece and the opening thereby of the range of another piece upon the adverse king. The piece or pawn moved does not, however, check directly. See *check*[1], *n.*, 1, and *double* ★*check.*—**Double check,** in *chess*, a check from two pieces at the same time, resulting from a move which checks the king and unmasks another piece, which also checks; a direct check and a discovered check.—**Perpetual check,** in *chess*, the position of a player when he cannot parry a check without subjecting himself to another check on his adversary's next move, and when his adversary insists upon administering those checks. Under such circumstances the game is declared drawn.—**Simple check,** in *chess*, ordinary check, when the adverse king is attacked by a single piece or pawn.—**To discover check,** in *chess*, to unmask a check by moving a piece. See *discovered* ★*check.*

check[1], *v.* **I.** *trans.* **9.** To fit or fasten together (two pieces) in such a manner that they can be separated only by a motion perpendicular to the plane of the joint.

II. *intrans.* **6.** To crack or split without falling apart.

> Wherever they have been opened the coal beds of the Washington Creek Basin show no evidence of faulting, and the coal is not crushed, but can be obtained in large pieces which "*check*" but do not break up readily on exposure to the air.
> *Contrib. to Econ. Geol., U. S. Geol. Surv.*, 1902, p. 277.

7. In *hunting*, to stop (as dogs do) because of loss of the scent.—**8.** To draw a check.

> Had *checked* for nothing until the day before her death, when she took out in person the sum of 4,000 francs.
> *Poe*, Works, I. 190.

checkage (chek′āj), *n.* [*check* + *-age.*] The act or process of checking (the items of an account, list, invoice, etc.), or the fact of having been checked.

check-band (chek′band), *n.* In *textile-manuf.*, a device attached to a spinning-mule as a drag

or check upon the varying velocity of the spindle-carriage during its traverse. *Nasmith*, Cotton Spinning, p. 275.

check-bar (chek'bär), *n.* A metal bar with loops on each end for retaining the ends of the check-reins of a harness-bridle, and a rear loop at the center by which it is attached to the check-hook.

check-battery (chek'bat″ėr-i), *n.* In *mining*, a timber construction which closes the lower part of a chute, acting as a check to the flow of coal and as an air-stopping.

check-bit (chek'bit), *n.* A harness-bit used with the over-check, with or without a lever.

check-book, *n.* **2.** A book in which items of control are entered.

check-damper (chek'dam″pėr), *n.* A door or slide by which cold air may be admitted to the base of the flue or chimney behind the fire and without passing through or over the latter. The effect of opening the check-damper is to lower the temperature of the gases in flue and chimney, and therefore more nearly to equalize the pressure of the cool atmosphere below the fire, and hence to check the draft and diminish the rate of combustion.

check-easer (chek'ē″zėr), *n.* In a harness, a device for relieving the steady strain of the overcheck. It interposes an elastic web or spiral spring between the check and the hook-loops.

checker[1], *n.* **11.** One of many spots or markings, somewhat triangular in shape, on the wings of a pigeon. A checker is larger than a spangle. The term is generally used in combination, as *blue-checker*, *red-checker*, etc., the qualifying word referring to the general color of the bird and not to that of the spots, which are usually white. Also often *check*.

checker-board, *n.* **2.** In *American foot-ball*, a term sometimes applied to the field of play. See ★*gridiron*.

checkered, *p. a.* **3.** Having the wing marked with numerous white spots, larger in size and fewer in number than in the condition termed *spangled:* used in describing breeds of pigeons. —**Checkered beetle.** See ★*beetle*[2].

checkerwork, *n.* **2.** In a regenerative furnace or water-gas plant, a mass of loose bricks inclosed in an upright cylindrical chamber and loosely piled in alternate layers to form an open mass. When submitted to a hot blast the checkerwork becomes intensely heated and, when the blast is shut off, can be used to heat an air-blast or a stream of gas passing through its open spaces. See *regenerator*.

check-experiment (chek'eks-per″i-ment), *n.* A control-experiment; an experiment devised to confirm the results of other experiments: for example, an experiment made under normal conditions, the result of which enables the experimenter to estimate the effect, in a parallel series of experiments, of a determinate variation of conditions.

check-flooding (chek'flud″ing), *n.* In *irrigation*, a method of controlling water by means of low levees or dikes when flooding fields.

check-gate (chek'gāt), *n.* A small gate, or movable dam, placed in the low levees extending across irrigated fields.

check-greeve (chek'grēv), *n.* In *mining*, a person who checks the weights of coal on behalf of the landlord. [Scotch.]

checking, *n.* **2.** The assembling of the parts of a checked joint.—**3.** In *agri.*, the planting of seeds or plants at regular distances apart in the row or line, to allow of cultivation both ways, instead of *drilling* in a continuous or 'solid' row.

check-out (chek'out), *n.* The termination of a coal-seam by the meeting of roof and floor.

check-rail, *n.* **2.** A guard-rail; an extra rail on the inner side of the inner rail of a railway curve, so laid as to leave sufficient room for the flanges of the wheels to pass freely between the heads of the two rails. As the train rounds the curve, the inner wheels bear against this extra rail, thus relieving the pressure of the wheels against the outer rail and preventing the derailing of the train.

check-row (chek'rō), *v. t.* To plant (Indian corn) with a check-rower.

Particularly for use on growing *check-rowed* and listed corn. *Sci. Amer.*, N. S., LVIII. 298.

check-spring (chek'spring), *n.* In *hardware*, an extension-spring used to keep a door or gate closed, or for any similar purpose. See cut under ★*extension-spring*.

checkstone (chek'stōn), *n.* A small round pebble, called in the United States *jackstone* and in Scotland *chuckie* or *chuckie-stane* or *-stone*, used in the children's game of chucks or jackstones.

check-strap, *n.* **3.** A leather strap, extending from the bottom of the body of a carriage to the perch, to check the upward movement of the body.

check-system (chek'sis-tem), *n.* **1.** A system for keeping the time of workmen, largely used in factories. It has many forms, but is essentially as follows: A board is placed just within the entrance-gate, on which are hung numbered checks, one for each man. As each workman passes in, he takes his check from the board and places it in a box, thus showing that he has gone in to work. The timekeeper takes the checks from the box and, by means of the numbers, knows what men are at work. The checks are placed on the board in readiness for the men each half-day, and, since no man can leave without a pass signed by his foreman or at the end of the half-day, it enables the timekeeper to keep a record of the men.

2. The network or system of checks or small levees constructed in fields to be irrigated.

check-weigher (chek'wā″ėr), *n.* One who checks or verifies weights; specifically, in *mining*, the man who verifies the tally, or record of weight of the coal or other mineral which comes up from workings where the miner is paid by the ton, and who credits the output to the account of the individual worker.

checkwork (chek'wėrk), *n.* In *mach.*, the regular release of an obstruction which takes place by means of an even-timed body; an escapement. The wheel and pendulum of an ordinary clock are a common example.

cheek, *n.*—**Fixed cheeks,** in the anatomy of the trilobites, the lateral parts of the cephalon between the dorsal furrows and the facial sutures which separate them from the free cheeks.—**Free cheeks,** in the anatomy of the trilobites those parts of the cephalon which lie outside the facial sutures and are separated thereby from the fixed cheeks.

cheeker (chēk'ėr), *n.* One who gives cheek or who talks impudently, saucily, or with unbecoming boldness and lack of respect to some one. [Slang.]

cheekiness (chē'ki-nes), *n.* Cheeky conduct or speech; cool impudence. [Colloq.]

cheek-piece, *n.* **3.** A crank; a driving-wing; usually, a crank having parallel sides, and hence as large at its outer end as where it joins the shaft.—**4.** One of a pair of curved liners for a shaft-bearing. This form of liner is fitted to the shaft and forms the actual bearing-surface, instead of being placed outside the journal-box as in the case of a flat liner. See *liner*[2], 3.

cheepy (chē'pi), *a.* Ready to cheep; puling.

What a humiliated, broken-down, poor *cheepy* wretch I am. Condemned to live among the pots.
Carlyle, in Froude, Carlyle's Life in London, II. 237.

cheese[1], *n.*—**Basswood cheese.** Same as *sapsago* ★*cheese* (*b*).—**Bondon cheese,** a trade-name for a variety of soft cheese.—**Cambridge cheese,** a variety of soft cheese made in England.—**Cantal cheese,** a hard cheese made in the south of France.—**Cheshire cheese,** an old trade-name for a dry, pale red cheese made in England.—**Coulommier cheese,** a variety of soft cheese.—**Derby cheese,** a local name for an old variety of English cheese.—**Edam cheese.** Same as *Dutch cheese* (*a*).—**Emmenthal cheese,** a hard Swiss cheese.—**Enriched cheese,** a cheese made with an excess of cream, or made from very rich cream; also, a trade-name for an adulterated or filled cheese.—**Filled cheese,** a trade-name for adulterated cheese.—**Flat cheese,** a trade-name for a thin cheese of only moderate weight.—**Gorgonzola cheese,** an Italian hard-pressed cheese. Also called *Stracchino cheese*.—**Gouda cheese,** a small, thin, disk-shaped cheese of a mild flavor which resembles that of Edam cheese. It is made in Holland and is usually colored yellow.—**Green cheese.** (*a*) See *green*[1]. (*b*) See *sage cheese*. (*c*) A term sometimes used to describe a poor thin cheese made from whey.—**Lard cheese,** an imitation of cheese made from lard.—**Margarin cheese,** in England, a cheese adulterated with any form of fat not derived from milk; in the United States, a filled ★cheese (which see).—**Sapsago cheese.** (*a*) See *sapsago*. (*b*) A local derisive name for any skim-milk cheese of poor quality. Also called *white-oak cheese* and *basswood cheese*.—**Skim cheese,** a trade-name for any variety of cheese made from skim-milk.—**Sour-milk cheese,** any cheese in which the coagulation of the milk is caused by natural souring assisted by heat.—**Swiss cheese,** a cheese between the hard and soft varieties, made in Switzerland. It resembles Gruyère cheese.—**White-oak cheese.** Same as *sapsago* ★*cheese* (*b*).

cheese[1] (chēz), *v. i.* To become cheese: as, the *cheesing* of milk.

cheese[2] (chēz), *v. i.* To stop. [Thieves' slang.] —**Cheese it!** make off! run! [A warning command; slang.]

cheese-basket (chēz'bås″ket), *n.* In *dairying*, a wooden box or bowl having a perforated bottom in which curd is placed to drain.

cheese-block (chēz'blok), *n.* Same as *chock-block*.

cheese-clack (chēz'klak), *n.* In *mining*, a temporary clack-valve inserted between two pipes. *Barrowman, Gloss.*

cheese-cutter (chēz'kut″ėr), *n.* An implement for cutting cheese.—**Computing cheese-cutter,** a combined cheese-knife and price-computing machine. It consists of a revolving platform on which the whole cheese is placed, a pivoted knife designed to make radial cuts in the cheese as the platform is revolved, and a price-computing device which controls the movements of the platform. When the computator is set for any particular price per pound, it can be so adjusted that the operator cuts a quantity corresponding in weight and value to the price shown on the register of the computator.

cheese-finger (chēz'fing″gėr), *n.* Same as ★*cheese-stick*.

cheese-grease (chēz'grēs), *n.* See *whey* ★*butter*.

cheesemongering (chēz'mung″gėr-ing), *n.* The buying and selling of cheese; the business of a cheese-merchant.

cheesemongery (chēz'mung″gėr-i), *n.* **1.** The commodities dealt in by a cheesemonger.—**2.** The shop or store in which such commodities are dealt in.

cheesery (chēz'ę-ri), *n.* [*cheese* + *-ery*.] A cheese-factory.

From the upper stories of these *cheeseries* were long wooden gutters leading to the ships in dock, and along these troughs trickled a never-ceasing rill of the ripened and matured article.
G. H. Boughton, in Harper's Mag., April, 1883, p. 692.

cheese-skipper (chēz'skip″ėr), *n.* The larva of the cheese-fly.

cheese-stick (chēz'stik), *n.* A strip of whole-wheat bread, puff-paste, dough made of flour, bread-crumbs, or other material, with grated cheese spread on or rolled in and baked until crisp: served with salad. Also called *cheese-straw*, *cheese-finger*.

cheese-straw (chēz'strâ), *n.* Same as ★*cheese-stick*.

cheese-trier (chēz'trī″ėr), *n.* A cheese-pale (which see).

cheesewood (chēz'wůd), *n.* In Victoria, the hard yellowish-white wood of the Australian tree *Pittosporum bicolor*. It is used for turning and is prized for ax-handles, billiard-cues, etc. Also called *tolosa-wood*, and in Tasmania *whitewood* and *waddywood*.

cheesewring (chēz'ring), *n.* **1.** A cheese- or cider-press. [Cornwall, Eng.]—**2.** [*cap.*] One of the natural curiosities of Cornwall, England, which receives its name from a supposed resemblance to the wring or press used in squeezing the liquor from the cheese or alternate layers of pounded apples and straw from which cider is made. It stands on a hill of considerable elevation near Liskeard, in that county, and consists of a pile of great tabular blocks of granite, 10 to 12 feet in diameter, heaped one upon another to a height of about 32 feet. As the blocks near the bottom of the pile are less than half the diameter of those they support, it has been likened to a gigantic mushroom.

cheesine (chēz'in), *n.* [Irreg. < *cheese*[1] + *-ine*[2].] The trade-name of a material made in imitation of cheese.

cheesy[2] (chē'zi), *a.* [*cheese*[2] + *-y*[1].] Stylish; fine; showy; 'quite the cheese.' [Slang.]

cheet[2], (chēt), *n.* [Also *cheat;* an imitative or dial variation of *chit*[2].] A word used in calling a cat; usually repeated, 'cheet, cheet,' like 'puss, puss.' [Scotch and North. Eng.]

cheetal, cheetul, *n.* Same as *chital*.

cheety (chē'ti), *n.* [Also *cheetie;* dim. of *cheet*[2].] Pussy! See ★*cheet*[2].

cheficat, *n.* See ★*sheficat*.

cheilitis, *n.* See ★*chilitis*.

cheirization, *n.* See ★*chirization*.

Cheiroglossa (kī-rō-glos'ą̈), *n.* [NL. (Presl, 1847), < Gr. χείρ, hand, + γλῶσσα, tongue.] A genus of epiphytic ferns sometimes joined with *Ophioglossum*, from which it differs externally in having several fertile spikes, and these pendent from a palmately divided (instead of simple) leaf. There is a single species, *C. palmata*, of Florida and tropical America. See *Ophioglossum*.

chekako (chē-kä'kō), *n.* [Said to be a native rendering of *Chicago* (man).] A novice or tenderfoot. [Alaskan slang.]

Chekh, *n.* Same as *Czech*.

chela[1], *n.* **4.** In sponge-spicules, a microsclere consisting of a more or less curved shaft bearing at each end a variable number of recurved processes.

chelem (shlem), *n.* [F. spelling of E. *slam*.] In *card-playing*, a slam (which see).

chelerythrin (kel-ę-rith'rin), *n.* [*Chel(idonium)* + Gr. ἐρυθρός, red, + *-in*[2].] An alkaloid, $C_{21}H_{17}NO_4$, found in the plants *Chelidonium majus*, *Stylophorum diphyllum*, *Sanguinaria Canadensis*, *Macleaya cordata*, *Glaucium Glaucium*, and other plants of the poppy family (*Papaveraceæ*): colorless in the free state, but forming lemon-yellow salts on the addition of acids. It is not identical with sanguinarin, as was once supposed.

chelicerate (kē-lis'ę-rāt), *a.* [*chelicera* + *-ate*[1].] Bearing cheliceræ, or small pincers, as the appendages of the merostome crustaceans.

chelidamic (kel-i-dam′ik), *a.* [*chelid(onic)* + *am(monia)* + *-ic.*] Derived from chelidonic acid and ammonia.—**Chelidamic acid,** 4-pyridinol-2, 6-dicarboxyllic acid, $HOC_5H_2N(CO_2H)_2 + H_2O$. It is prepared from chelidonic acid and ammonia. It decomposes at about 220° C.

chelidonin (kel-i-dō′nin), *n.* [*Chelidon(ium)* + *-in*².] A white crystalline alkaloid, $C_{20}H_{19}NO_5 + H_2O$, contained in the plants *Chelidonium majus* and *Stylophorum diphyllum.*

chelidonius (kel-i-dō′ni-us), *n.* [L., sc. *lapillus,* ⟨ Gr. χελιδόνιος, of the swallow, ⟨ χελιδών, swallow.] A stone from the crop of a swallow, worn in ancient times as a charm.

Chelidoperca (kel″i-dō-pėr′kä), *n.* [NL., ⟨ Gr. χελιδών, swallow, + πέρκη, a perch.] A genus of fishes of the western Pacific and Indian oceans.

chelidoxanthin (kel-i-dok-san′thin), *n.* [*Chelido(nium)* + Gr. ξανθός, yellow, + *-in*².] Until recently this has been applied to a yellow crystalline bitter principle of undetermined composition contained in the plant *Chelidonium majus.* It is now found to exist also in the plant *Stylophorum diphyllum* and to be identical with the alkaloid berberine ($C_{21}H_{17}NO_4$).

Chelifera (kē-lif′e-rä), *n. pl.* [NL., ⟨ Gr. χηλή, claw, + L. *ferre,* bear.] A small tribe of isopod crustaceans, characterized by having the first pair of trunk-limbs or gnathopods like a forceps. It contains the families *Apseudidæ* and *Tanaidæ.*

cheliferid (kē-lif′e-rid), *a.* and *n.* **I.** *a.* Having the characteristics of or belonging to the family *Cheliferidæ.*

II. *n.* A member of the family *Cheliferidæ.*

Chellean (shel′ē-an), *a.* [Also *Chellian;* ⟨ *Chelles* + *-an.*] **1.** Of or pertaining to Chelles in France, a place a few miles east of Paris, on the right bank of the Marne.—**2.** Of or pertaining to the earliest paleolithic period (the Chellean age) of Europe.—**Chellean deposits,** in *geol.* and *archæol.,* paleolithic deposits of earliest date, in which the most primitive type of worked flint implements are found.

chelonite, *n.* **2.** A turtle-stone: a name given to certain fossils supposed to resemble turtles, but which are, for the most part, teeth of fishes.

Chelopus (kel′ō-pus), *n.* [NL., said to be formed (if so, erroneously for **Chelypus*) ⟨ Gr. χέλυς, a turtle, + ποίς, foot; but the first element may be χηλή, claw.] A genus of small fresh-water turtles containing the common sculptured turtle, *Chelopus insculptus,* of the eastern United States and also the spotted turtle, *C. guttatus.*

Chelsea-Derby porcelain. See ★*porcelain*¹.

Chelsea pottery. See ★*pottery.*

Cheltenham beds. See ★*bed*¹.

chem. An abbreviation of *chemist, chemistry, chemical.* See ★*chemist,* 4.

chemæsthesis (kem-es-thē′sis), *n.* [NL., ⟨ *chem(icus),* chemic, + Gr. αἴσθησις, perception.] The stimulation of an organism by external or internal stimuli; the sensation of matter.

chemawinite (chē-mâ′win-īt), *n.* [*Chemawin,* Amer. Ind. name of a neighboring Hudson Bay post.] An amber-like resin found associated with woody debris on the shore of Cedar Lake in Canada.

chemiater (kem-i-ā′tėr), *n.* [NL. **chemiater,* ⟨ *chemia, chimia,* chemistry, + Gr. ἰατρός, physician.] A medical practitioner of the Paracelsian school, according to which all the processes of the body in health and in disease are of a chemical nature.

chemiatric (kem-i-at′rik), *a.* [NL. **chemiatricus,* ⟨ **chemiatrīa,* ⟨ MGr. χημία, alchemy, chemistry, + Gr. ἰατρεία, healing. Cf. *iatrochemical.*] Of or pertaining to a theory of Paracelsus and others, according to which medical treatment should be directed to the chemical conditions (fermentations, etc.) which in this theory are the causes of disease.

chemiatry (kem′i-at-ri), *n.* [NL. **chemiatria,* ⟨ *chemia, chimia,* chemistry, + Gr. ἰατρεία, medical treatment.] Treatment of disease founded upon the Paracelsian doctrine of the chemical nature of physiological and pathological processes.

chemic, *n.* Specifically—**3.** A solution or liquor of chlorid of lime or bleaching-powder for bleaching vegetable matter, as cotton.

chemical, *a.* **3.** Versed in chemistry; engaged in the study of chemistry or in chemical research or investigation: as, a *chemical* philosopher; a *chemical* friend.—**4†.** Of or pertaining to alchemy or alchemists. Also *chymical.*—**Chemical actinometer.** See ★*actinometer.*—**Chemical analysis.** By this term is understood, sometimes the actual separation of a substance into its different constituents, and sometimes merely the ascertainment of the kinds or quantities of the constituents into which it is separable.—**Chemical antidote, denudation, dynamics, engineer, equilibrium, focus, fog.** See ★*antidote, denudation,* etc.—**Chemical formula.** See *constitutional* or *structural* ★*formula.*—**Chemical fuse, gilding, induction, irritability, photometer, rectifier.** See ★*fuse*², etc.—**Chemical restraint,** the quieting of the violently insane by means of narcotic drugs.—**Chemical styptic, thermometer, ware.** See ★*styptic,* etc.

chemically, *adv.* **2†.** By alchemy or alchemical means or processes.

Ernestus Burgravius, a disciple of Paracelsus, hath published a discourse in which he specifies a lamp to be made of man's blood, . . . which *chemically* prepared forty days, and afterwards kept in a glass, shall show all the accidents of his life. *Burton,* Anat. Mel., II. §ii. Mem. 4.

chemicking (kem′ik-ing), *n.* The process of bleaching with chlorid of lime.

chemicking-machine (kem′ik-ing-ma-shēn″), *n.* A machine for bleaching cotton cloth with chlorid of lime or bleaching-powder.

chemicobiologic (kem′i-kō-bī-ō-loj″ik), *a.* [*chemicobiology* + *-ic.*] Of or pertaining to chemicobiology.

The results of bacteriologic and of *chemicobiologic* research as applied to the pathology of midwifery. *Lancet,* Aug. 22, 1903, *advt.*

chemicobiology (kem″i-kō-bī-ol′ō-ji), *n.* [NL. *chemicus,* chemic, + *biologia,* biology.] The chemistry of living substance.

chemicodynamic (kem″i-kō-dī-nam′ik), *a.* Operating to transform chemical energy into the energy of motion.

chemico-electric (kem″i-kō-ē-lek′trik), *a.* Operating to transform chemical energy into electrical energy: as, a *chemico-electric* change.

The best evidence yet secured by research seems to indicate that the method of energy transformation in the vital machine is one which directly transforms the potential energy of the food, as developed by chemical combinations, into kinetic form, sometimes perhaps simply by chemico-dynamic change, sometimes by *chemico-electric* transformation. *R. H. Thurston,* in Smithsonian Rep., 1896, p. 337.

chemicomineralogical (kem″i-kō-min-ē-ra-loj′i-kal), *a.* Involving both chemical and mineralogical characters: as, a *chemicomineralogical* classification of rocks. *Geikie,* Textbook of Geol., p. 201.

chemicophysical (kem″i-kō-fiz′i-kal), *a.* Both chemical and physical; relating to both the chemistry and the physics of a substance or organism.

If a constant battery current flows continuously through a muscle or a nerve, it will so alter the *chemico-physical* condition of the living substance that its physiological properties will be greatly modified. *Buck,* Med. Handbook, III. 767.

chemico-physics (kem″i-kō-fiz′iks), *n.* Physical chemistry. *Buck,* Med. Handbook, VII. 758.

chemicophysiological (kem″i-kō-fiz-i-ō-loj′i-kal), *a.* Having reference to the science of physiological chemistry, or biochemistry.

chemigraph (kem′i-graf), *n.* A print obtained by a process of chemigraphy. See ★*chemigraphy,* 2.

chemigrapher (ke-mig′ra-fėr), *n.* One who uses chemigraphy.

chemigraphy (ke-mig′ra-fi), *n.* **1.** A process of making zinc etchings without the aid of photography.—**2.** A process of obtaining halftones by printing, from the same plate, in two colors, or two shades of the same color, one of which is slightly out of register.

chemiluminescence (kem″i-lū-mi-nes′ens), *n.* Luminescence associated with chemical changes in the luminous substance and probably due to those changes. See ★*luminescence.*

Wiedemann has shown that the shining of Balmain's luminous paint, and generally of the sulphides of the alkaline earths, is accompanied with chemical action. A long period of luminosity after the removal of the source renders highly probable the existence of what he now calls *chemi-luminescence.* *Smithsonian Rep.,* 1895, p. 121.

chemin-de-fer (shē-maṅ″dē-fâr′), *n.* [F. railroad, lit. 'iron road.'] A variation of baccara in which each player in turn becomes the banker. See *baccara.*

chemin-de-ronde, *n.* **2.** A sentry-path around a fortification, along the scarp or counterscarp, protected by a loopholed wall or the glacis. See *covered way,* under *cover*¹.

chemiotactic (kem″i-ō-tak′tik), *a.* A collateral form of ★*chemotactic.*

chemiotaxis (kem″i-ō-tak′sis), *n.* [NL., ⟨ *chemia,* chemistry, + Gr. τάξις, order.] Same as ★*chemotaxis.*

chemisal (chem′i-sal), *n.* A corrupt form of *chamisal,* sometimes used as a local name.

So local and strikingly characteristic are these chaparral areas that they have become landmarks, the word chamisal, sometimes corrupted into *chemisal,* chemise, or chimese, being adopted as a local name. Thus, we find on the map of Humboldt County a "*Chemisal* Creek" and "Chimese Ridge" in the vicinity of Harris, and a "Chemise Mountain," near Shelter Cove. *U. S. Dept. Agr.,* Bur. Plant Industry, Bulletin 12, 1902, [p. 31.

chemise, *n.* **6.** In *mech.,* a sheath or covering of sheet-metal; specifically, a sheet-iron cylinder placed around the tubes in a vertical boiler.

chemist, *n.* **4.** A degree conferred by some institutions upon the completion of a stated course in chemistry.—**5.** Same as ★*chemiater.*—**Technical chemist,** a chemist engaged in directing or conducting the operations of some branch of industry essentially or mainly chemical in character.

chemistry, *n.* **2.** Same as ★*chemiatry.*—**Bureau of Chemistry.** See ★*bureau.*—**Color chemistry.** That department of chemistry which deals with the study of coloring matters and dyestuffs. Also known as *tinctorial* chemistry.—**Industrial chemistry,** chemistry as applied to industrial processes and operations. See *chemical* ★*engineering.*—**Inorganic chemistry.** Although it is in the main correct to say that organic chemistry is the chemistry of the compounds of carbon and inorganic chemistry that of the other elements and their compounds, it would in many respects be inconvenient to observe this classification rigidly. Some carbon compounds, such as carbon monoxid and dioxid, carbon disulphid, silicon carbide, and iron carbides which occur in cast-iron and steel, are practically always treated as inorganic substances. On the other hand, a few substances which do not contain carbon, such as silicon and chloroform, are more advantageously classed as organic.—**Photographic chemistry.** Same as *photochemistry.*—**Physical chemistry,** the study of chemical substances and chemical processes with reference to the physical phenomena witnessed or to the physical energies concerned. Many of its chapters had been fairly developed long before the name was first used, such as those concerned with the doctrines as to atoms and molecules, or as to the solid, liquid, and gaseous states of aggregation. But other chapters, such as those on thermochemistry, electrochemistry, chemical statics, and chemical dynamics, have received most of their development since the beginning of the last quarter of the nineteenth century, and the new name has been required to describe the fruit of a cooperation of physics and chemistry.

During the past fifteen years the border-land between chemistry and physics has been very successfully cultivated, and a new department of chemistry has resulted. This is the department known as *physical chemistry.* *Science,* May 24, 1901, p. 809.

Pure chemistry, chemistry considered as a branch of human knowledge, without reference to its practical or industrial applications: opposed to *practical chemistry.*—**Sanitary chemistry,** chemistry in its relations to health, especially to public health or the health of large communities.—**Social chemistry,** assimilation of diverse elements, especially nationalities and races, in a social population. *L. F. Ward,* Pure Sociol., p. 210.—**Tinctorial chemistry.** See *color* ★*chemistry.*

chemoæsthesia (kem″ō-es-thē′si-ä), *n.* [NL. (*Czapek*), ⟨ *chem(icus),* chemic, + Gr. αἴσθησις, perception.] In *bot.,* the capacity of a plant-organ to respond to chemical stimuli.

chemocentrum (kem″ō-sen′trum), *n.*; pl. *chemocentra* (-trä). [ML. *chem(icus),* chemic, + L. *centrum,* center.] In *cytol.,* the nucleus considered as the center which controls the chemical activities of the living cell: opposed to ★*kinocentrum.*

chemokinesis (kem″ō-ki-nē′sis), *n.* [NL., ⟨ NL. *chem(icus),* chemic, + Gr. κίνησις, movement.] A state of increased activity of organisms in relation to chemical substances.

Garry finds that certain chemicals "cause the organism to become restless, very swift shooting movements being caused." As a result of these movements the organisms soon leave the area of the operation of the chemical causing the reaction. This phenomenon Garry calls *chemokinesis.* *H. S. Jennings,* in Amer. Jour. Physiol., April, 1900, p. 398.

chemokinetic (kem″ō-ki-net′ik), *a.* Pertaining to or exhibiting chemokinesis.

chemolyse, *v. t.* See ★*chemolyze.*

chemolyze (kem′ō-līz), *v. t.*; pret. and pp. *chemolyzed,* ppr. *chemolyzing.* [*chemoly(sis)* + *-ize.*] To decompose or separate into different constituents by chemical action; subject to chemolysis.

chemoreflex (kem-ō-rē′fleks), *n.* [NL. *chem(icus),* chemic, + E. *reflex.*] A response to a chemical change in the environment by a motor reaction.

[The] complicated activities of such highly developed organisms as ants and bees may be subsumed, with surprising completeness, under some such heading as the '*chemoreflex.*' *Pop. Sci. Mo.,* March, 1902, p. 463.

chemosed (kem′ōzd), *a.* [*chemos(is)* + *-ed*².] Marked by chemosis. *N. E. D.*

chemosynthesis (kem-ō-sin′the-sis), *n.* [NL. *chem(icus),* chemic, + Gr. σύνθεσις, synthesis.] The formation of carbohydrates out of inor-

ganic compounds by an organism in darkness or in the absence of sunlight: contrasted with ★*photosynthesis*. *Haeckel* (trans.), Wonders of Life, p. 215.

chemotactic (kem-ō-tak′tik). *a.* [*chemotaxis* (*-tact-*) + *-ic.*] 1. Concerning or pertaining to the motion of cells or of organisms in relation to chemical substances; exhibiting chemotaxis.—2. Inciting chemotaxis.

Since Cohnheim's great discovery in 1867 we have known that the central phenomenon of what is termed by pathologists *inflammation* is what would now be called a *chemotactic* one; for it consists in the gathering together, like that of vultures to a carcass, of those migratory cells which have their home in the blood stream and in the lymphatic system, to any point where the living tissue of the body has been injured or damaged, as if the products of disintegration which are set free where such damage occurs were attractive to them.

Smithsonian Rep., 1893, p. 458.

chemotactism (kem-ō-tak′tizm), *n.* Same as ★*chemotaxis*.

So with the fly. Certain chemical stimuli from meat cause a fly to lay its eggs. In the fat these stimuli are lacking. They can be produced artificially. In the shorthand jargon of science, it is simply a chemical reaction between certain substances in the skin or sense organs of the fly and the meat, a case of *chemo-tactism*.

C. Snyder, New Conceptions in Sci., p. 202.

chemotaxic (kem-ō-tak′sik), *a.* A bad form for ★*chemotactic*. *Med. Record*, March 7, 1903, p. 392.

chemotaxis (kem-ō-tak′sis), *n.* [NL. *chem-* (*icus*), chemic, + Gr. *τάξις*, arrangement.] The locomotion of organisms or of cells in relation to chemical substances, or the property of certain chemical substances to attract or repel living cells at the point of action: in the first instance there is *positive* chemotaxis, in the second *negative* chemotaxis. The peculiar response of the white blood-corpuscles to chemotactic stimulation is of fundamental importance in the defense of the animal organism against bacterial invasion. *Encyc. Brit.*, XXXI. 518.

chemotherapy (kem-ō-ther′a-pi), *n.* [Cf. *therapeutics.*] Medical treatment of disease by means of chemical substances. *Lancet*, Oct. 8, 1910, p. 1096.

chemotic (ke-mot′ik), *a.* Of or pertaining to chemosis.

chemotropic (kem-ō-trop′ik), *a.* [NL. *chem-* (*icus*), chemic, + Gr. *τρόπος*, a turning.] Of or pertaining to the growth or bending of organisms in relation to chemical substances; exhibiting chemotropism. Also *chemotropical.*

chemotropically (kem-ō-trop′i-kal-i), *adv.* In a chemotropic manner; by and with chemotropism.

chemotropism (ke-mot′rō-pizm), *n.* [*chemotrop-ic* + *-ism.*] The growth or bending of organisms, or of the parts of organisms, in relation to chemical substance.

The chemical effects of the diffusing molecules on certain elements of the skin influence the tension of the muscles, as the rays of light influence the tension of the muscles in heliotropic animals. The orientation of an organism by diffusing molecules is termed *chemotropism*, and we speak of positive *chemotropism* when the animal is forced to bring its axis of symmetry into the direction of the lines of diffusion and to turn its head toward the centre of diffusion.

J. Loeb, Compar. Physiol. of the Brain, p. 186.

chêne (shān), *n.* [F., 'oak.'] An oak-leaf design printed on any textile fabric.

chenille, *n.* 3. A name given to the cotton leaf-worm or cotton caterpillar, the larva of *Alabama argillacea*, by Louisiana planters of French descent, and adopted by many others.

chenocholalic (ken″ō-kō-lal′ik), *a.* [Gr. *χήν*, goose, + *χολή*, bile, + *-al*[3] + *-ic.*] Same as ★*chenocholic*.

chenocholic (ken″ō-kol′ik), *a.* [Gr. *χήν*, goose, + *χολή*, bile.] Derived from goose-bile.—**Chenocholic acid,** an amorphous bibasic acid, $C_{27}H_{44}O_4$, formed by boiling taurochenocholic acid with barium hydroxid.

Chenopodiales (kē″nō-pō-di-ā′lēz), *n. pl.* [NL. (Britton, 1901), ⟨ *Chenopodium* + *-ales.*] An order of dicotyledonous archichlamydeous, chiefly apetalous, plants. It is generally herbaceous, with hermaphrodite flowers, superior ovary, and utricular, capsular, or baccate fruit. It includes 10 families, of which the most important are the *Chenopodiaceæ*, *Amaranthaceæ*, *Portulacaceæ*, and *Silenaceæ*.

chenotaurocholic (kē″nō-tâ-rō-kol′ik), *a.* [Gr. *χήν*, goose, + *ταῦρος*, bull, + *χολή*, bile, + *-ic.*] Relating to a form of taurocholic acid present in goose-bile.—**Chenotaurocholic acid,** a biliary acid, $C_{29}H_{49}NSO_8$, found in the bile of geese.

cherem, *n.* Same as ★*herem*.

chernites (kėr-nī′tēz), *n.* [L. *chernites*, ⟨ Gr. *χερνίτης*.] A variety of marble, resembling ivory, used by the ancients for making sarcophagi.

cherridary† (cher′i-dā-ri), *n.* [Also *cherredery*, *cheridary*, *charidares* (pl.), *carridaries* (pl., Yule): of E. Indian origin.] An Indian cotton fabric, usually having narrow stripes. *A. M. Earle*, Costume of Colonial Times, p. 83.

cherried (cher′id), *p. a.* [*cherry* + *-ed*[2].] Cherry-colored: as, *cherried* lips. *Goldsmith.*

cherry[1], *n.*—**Bitter cherry,** *Prunus emarginata*, a wild cherry of the northwestern United States which ranges from Montana to California. Its bark, leaves, and fruit are intensely bitter.—**Black cherry.** Same as *rum-cherry*, and the more usual name.—**Brazilian cherry, Cayenne cherry.** Same as *Surinam* ★*cherry* (*b*).—**Cherry fruit-maggot.** See ★*fruit-maggot*.—**Cherry leaf-beetle.** See ★*leaf-beetle*.—**Cherry leaf mildew.** Same as *cherry blight*.—**Cherry leaf-spot.** See ★*leaf-spot*.—**Cherry-scale,** an American diaspine scale-insect, *Aspidiotus forbesi*.—**Fire cherry,** the wild red cherry or pin-cherry, *Prunus Pennsylvanica*: so called because it springs up freely on lands recently devastated by fire. See *pin-cherry*.—**Herbert River cherry.** Same as *Queensland* ★*cherry*.—**Holly-cherry,** the holly-laurel or islay. Also called *holly-leaf laurel* and *holly-leaved laurel*.—**Indian cherry.** (*a*) The Carolina buckthorn, *Rhamnus Caroliniana*. (*b*) The service-berry, *Amelanchier Canadensis*.—**May-cherry.** Same as *June-berry*. Also called *service-berry* and *shad-bush*.—**Mexican cherry,** the form of rum-cherry, *Prunus serotina*, found in Mexico and adjoining regions: by some thought to be a distinct species.—**Native cherry,** an Australian tree, *Exocarpus cupressiformis*, of the sandalwood family, the edible fruit of which consists of a fleshy, cherry-like pedicel bearing a single-seeded nut. See *cherry*[1], 3 (*b*).—**New Mexican cherry.** Same as *Mexican* ★*cherry*.—**Oak-leaf cherry.** Same as *islay*.—**Pigeon-cherry.** Same as *pin-cherry*.—**Poison black cherry,** the deadly nightshade, *Atropa Belladonna*: so called from the resemblance of the berries to black cherries.—**Queensland cherry,** the fruit of a shrub or small tree of the spurge family, *Antidesma Dallachyanum*. It is the size of a large cherry, and has a sharp, acid flavor resembling that of the red currant, and, like it, makes a good jelly.—**Quinine cherry.** Same as *bitter* ★*cherry*.—**Sour cherry,** *Prunus Cerasus*, the fruit of which is sour in a wild state.—**Spanish wild cherry.** Same as *islay*.—**Surinam cherry.** (*a*) See *Surinam cherry*. (*b*) A shrub or small tree, *Eugenia uniflora*, a native of South America, which produces luscious, bright-red, cherry-like fruit about an inch in diameter and agreeably acid. Also called *Cayenne* or *Brazilian cherry* and *pitanga*.—**Sweet cherry,** *Prunus avium*. It bears sweet fruit even in a wild state.—**Western choke-cherry,** *Prunus demissa*, a wild cherry of the western United States which ranges from the Rocky Mountains to the Pacific coast; it is a small tree and bears pleasantly flavored fruit somewhat resembling that of the choke-cherry.—**West Indian cherry.** (*a*) See *Barbados cherry* under *cherry*[1]. (*b*) *Prunus sphærocarpa*, a small evergreen tree which ranges from southern peninsular Florida to the West Indies and Brazil.—**Wild black cherry,** the black cherry or rum-cherry, *Prunus serotina*.—**Wild cherry,** a name applied (*a*) specially to the sweet cherry, *Prunus avium*, in a wild state, and (*b*) generally to any of the native American cherries, as *P. serotina*, *P. Virginiana*, *P. Pennsylvanica*, etc., and particularly to the less-known species, such as *P. emarginata*, *P. Alabamensis*, and *P. australis*.—**Wild red cherry.** (*a*) See *pin-cherry*. (*b*) Improperly, *P. angustifolia*, the Chickasaw plum (which see, under plum[1]).—**Willow-leaf cherry,** *Prunus salicifolia*. It has willow-like leaves, and ranges from southern New Mexico and Arizona to Colombia and Peru.

cherry-aphis (cher′i-ā″fis), *n.* A plant-louse, *Myzus cerasi*, which infests the leaves of the cherry in the early summer.

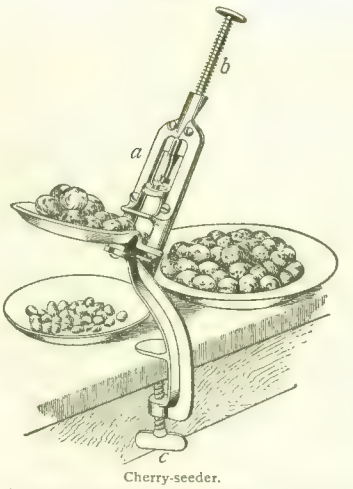
cherry-birch (cher′i-bėrch″), *n.* See *birch*, 1.

cherry-borer (cher′i-bōr″ėr), *n.* The larva of an Australian tortricid moth, *Maroga gigantella*, which bores into the trunk and limbs of the cherry, plum, apricot, nectarine, and quince in Australia.

cherry-bug (cher′i-bug), *n.* An American coreid bug, *Metapodius femoratus*, which attacks the fruit of sweet varieties of cherry in the southwestern United States. Also known as the *thighed metapodius* (which see, under *thighed*).

cherry-fair (cher′i-fār), *n.* [ME. *chery feire.*] A fair held in cherry-orchards, in some parts of England, for the sale of the fruit: long regarded as typical of the shortness and uncertainty of life and the fleeting nature of its pleasures: as,

Al is but a *chery feire*, *Gower.*

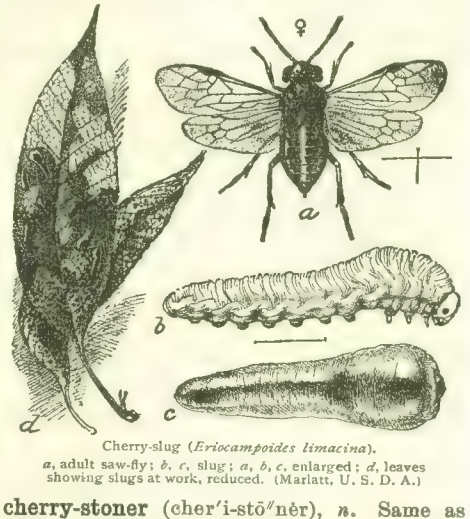


Cherry-fairs are still held in Worcestershire . . . on Sunday evenings, . . . and being almost always a resort of lovers, and the gay portion of the lower classes [they] may appropriately retain their significant type of the uncertainty and vanity of the things of this world.

Halliwell.

cherry-louse (cher′i-lous), *n.* An aphidia, *Myzus cerasi*, which attacks the buds and young foliage of the cherry.

cherry-red (cher″i-red′), *a.* Clear, moderately dark red in color.—**Cherry-red heat,** a temperature higher than dull red and lower than bright red, as these colors appear in heated iron in daylight.



cherry-seeder (cher′i-sē″dėr), *n.* A machine for removing the pits from cherries and other fruits. It is essentially a double-bladed knife which moves in guides, and is operated by hand. It cuts out and removes the pits and delivers the pits and the fruit separately.

Cherry-seeder.

a, knife for cutting out stone; *b*, handle, with return spring, for operating knife; *c*, clamp.

cherry-slug (cher′i-slug), *n.* The larva of an American saw-fly, *Eriocampoides limacina.*

Cherry-slug (*Eriocampoides limacina*).

a, adult saw-fly; *b*, *c*, slug; *a*, *b*, *c*, enlarged; *d*, leaves showing slugs at work, reduced. (Marlatt, U. S. D. A.)

cherry-stoner (cher′i-stō″nėr), *n.* Same as ★*cherry-seeder*.

Cherry-tree bark-louse, an American lecaniine, *Lecanium cerasifex*, which lives on the twigs and small branches of the cherry-tree.—**Cherry-tree plant-louse,** an aphidid, *Myzus cerasi*, which lives on the leaves and buds of the cherry-tree.—**Cherry-tree scale-insect.** Same as *scurfy* ★*bark-louse*.—**Cherry-tree Thecla.** Same as ★*coral hairstreak*.—**Cherry-tree ugly-nest tortricid,** an American tortricid moth, *Archips cerasivorana*, whose larvæ make unsightly webs among the leaves of the choke-cherry and sometimes of the cultivated cherry.

Chersydridæ (kėr-sid′ri-dē), *n. pl.* [NL., ⟨ *Chersydrus*, a genus of snakes (⟨ *χέρσος*, dry land, + *ὕδρα*, a water-snake), + *-idæ.*] A family of ugly but harmless snakes, of aquatic habits. They have the postfrontals bounding the orbits posteriorly and extended forward to form their superior borders, to the exclusion of the frontals. The species are Asiatic.

cherubic, *a.* 2. Of, pertaining to, or exhibiting the childish innocence of the 'cherubs' or winged child-angels represented by painters and sculptors. See *cherub*, 2.—**Cherubic friar,** a Dominican friar: so called because it was assumed that the Dominicans were given especially to the pursuit of knowledge, a quality ascribed in angelology to the cherubim.

cherubimical (cher″ö-bim′i-kal), *a.* Same as *cherubimic*.

chervil, *n.*—**Sweet chervil.** (*b*) Same as *sweet cicely* (*b*).

Cheshire cheese. See ★*cheese*[1].

chess[1], *n.* 2†. Dice. *Pope* (trans.), Odyssey, I. 143.—**Blindfold chess,** a game of chess conducted by a player who does not see the board. The eyes of the player are seldom or never actually blindfolded.

chess[2], *n.*—**Red chess,** a brome-grass, *Bromus rubens*, introduced into the Pacific States from southern Europe. It is noxious in sheep-pastures because its awns become entangled in wool. The panicle is tinged with reddish brown. Also called *red brome*.

chessy (ches′i), *a.* Characteristic of good chess-play: as, *chessy* situations. *N. E. D.*

chest[1], *n.* 6. The funds of a public institution, or the strong box, coffer, or place where such funds are, or are supposed to be, kept; the treasury: as, a military *chest;* the uni-

versity *chest;* the *chest* for the relief of maimed mariners; etc. — **7.** In *organ-building,* see *wind-chest.* — **Barrel-shaped chest,** a general rounded bulging of the chest which moves but little during respiration: a condition present in emphysema of long duration. — **Cobbler's chest,** a deformity of the chest marked by a sinking in at the lower extremity of the sternum. — **Dropsy of the chest,** hydrothorax. — **Funnel-chest.** See ★*funnel-chest.* — **German chest,** an inclined rectangular box used in washing ore, having several rows of holes closed by pegs, which are inserted in succession from the bottom as the chest fills up: a square buddle. The heads or rich mineral settle near the upper end of the box, the middlings are found at the lower end, and the tailings or waste flow out at the end holes. When the box is full the different products are shoveled out. — **Keeled chest.** Same as ★*chicken-breast.* — **Phthinoid chest,** a narrow chest markedly flattened anteriorly. — **Pigeon-chest.** Same as ★*chicken-breast.*

chest-bars (chest′bärz), *n. pl.* A pair of fixed vertical bars used in exercising the chest and arms. They are placed parallel to each other so that they may be grasped while the chest is thrown forward between them.

chested (chest′ed), *a.* **2.** In *archery,* gradually decreasing in diameter from a point between the nock and the center to both ends: said of an arrow.

Chester limestone. See ★*limestone.*

chestiness (ches′ti-nes), *n.* The feelings, attitude, or manner of a 'chesty' person; defiant self-assertiveness on the part of an ignorant and pretentious person. [Recent slang, U. S.]

chest-machine (chest′ma-shēn″), *n.* A machine used in gymnasiums to develop the muscles of the chest.

chest-mangle (chest′mang″gl), *n.* See *mangle*², *n.*

chestnut, *n.* — **Chestnut disease.** See ★*disease* and ★*Acrospeira.* — **Golden-leaved chestnut,** the western chinkapin, *Castanopsis chrysophylla.* See *chinkapin,* 2. — **Guiana chestnut,** the seeds of *Pachira aquatica,* a large tree of Guiana and the lower Amazon. — **Kafir chestnut.** Same as *wild chestnut.*

chestnut-blight (ches′nut-blīt), *n.* A fungus, *Diaporthe parasitica,* very destructive of the chestnut-tree in the eastern United States.

chestnut-borer (ches′nut-bōr″ėr), *n.* An insect which infests the chestnut. — **Two-lined chestnut-borer,** the larva of an American buprestid beetle, *Agrilus bilineatus.*

chesty (ches′ti), *a.* [*chest*¹, *n.*, + *-y*¹.] Inflated with an undue feeling of one's importance, and inclined to show it in an impudently aggressive way; ignorantly and pretentiously self-assertive. [Recent slang, U. S.]

cheval, *n.* — **A cheval,** (*b*) in *gambling,* betting on two events at the same time. — **Petits chevaux,** a substitute for roulette, in places where roulette is forbidden. Nine models of horses with jockeys on them, each numbered, are rapidly revolved in concentric circles, and the players bet on the number of the horse that will have his nose nearest the wire when they all come to rest. Bets may be made on single numbers, paying 7 for 1, or on the numbers 1, 2, 3, 4, or 6, 7, 8, 9, paying even money.

chevalet, *n.* **2.** In *glass-manuf.,* a grooved bench for holding cylinders of broad glass before they are spread out.

Chevalier crab. See ★*crab*¹. — **Chevalier d'or,** the French louis d'or which has on it a Maltese cross. — **Chevalier of fortune,** one who lives by his wits: same as *chevalier d'industrie.* — **The Chevalier,** James Francis Edward Stuart, son of James II. of England, the Old Pretender; also, *Chevalier de St. George.* — **The Young Chevalier,** Charles Edward Stuart, or Prince Charlie, the Young Pretender.

chevered† (shev′ėrd, chev′ėrd), *p. a.* [Also erron. *chivelled* (in the one quot. known, 1658); a reduced form in ignorant use of *chevroned* (spelled *cheverned* in 1543): see *chevroned.*] Same as *chevroned.* *Alice M. Earle,* Costume of Colonial Times, p. 141.

Chevé system. See ★*system.*

cheville, *n.* **2.** A meaningless or redundant syllable, word, or phrase used to complete a verse or round off a period.

> The genius of prose rejects the *cheville* no less emphatically than the laws of verse.
> *Contemporary Rev.,* April, 1885, p. 551.

Cheviot finish, a coarse, closely curled nap given to woolen cloth, as cheviot.

chevron, *n.* **5.** *pl.* In *carp.,* a pair of rafters set up and meeting at the ridge; or two rafters held together at the foot by a tie of some kind and therefore ready to put into place as a truss.

chevronelly (shev′rọ-nel-i), *a.* Same as *chevroné.*

chevy, *n.* **2.** The game of prisoners' base.

Chevy-chase (chev″i-chās′), *n.* A scampering noise or chasing about; a running pursuit. See *Chevy Chase* in the Century Cyclopedia of Names.

chew, *v. t.* — **To chew oakum** (*naut.*), said of a vessel when it grinds the calking out of its seams by its working. This occurs either from weak construction or from heavy laboring.

chew-stick, *n.* **2.** In Sierra Leone, the root of the cola, *Bichea acuminata,* which is chewed for the purpose of cleaning the teeth and sweetening the breath.

ch. g. An abbreviation of *chestnut gelding.*

Ch. hist. An abbreviation of *church history.*

chi¹ (kī, ċhē), *n.* The twenty-second letter of the Greek alphabet, X, *χ*, corresponding to the English *ch.*

chi² (ċhī), *n.* [Also *chigh;* appar. California Indian. Cf. *hitch*².] A fish, *Lavinia exilicauda:* same as ★*hitch*².

chiaroscuro, *n.* **4.** A style of painting on enameled pottery practised by the Italian potters.

chiasmal (kī-az′mạl), *a.* [*chiasm* + *-al*¹.] Of the nature of a chiasm; crosswise: as, *chiasmal* interpositions.

chiasmic (kī-az′mik), *a.* [*chiasm* + *-ic.*] Same as ★*chiasmal.* *Buck,* Med. Handbook, II. 252.

chiaster (kī′as-tėr), *n.* [Appar. < Gr. *χί,* the letter X, + *ἀστήρ,* star.] In sponge-spicules, an aster with slender cylindrical rays.

chiastically (kī-as′ti-kạl-i), *adv.* In the manner of a chiasmus.

chiastoneury (kī-as-tō-nū′ri), *n.* [Gr. *χιαστός,* arranged X-wise, + *νεῦρον,* nerve.] The condition of having the pleurovisceral connectives crossed, as in the prosobranchiate gastropods.

chibinite (chi′bi-nīt), *n.* [Finnish *Chibinä,* on the Kola Peninsula, Finland, + *-ite*².] In *petrog.,* a name given by W. Ramsay (1899) to a variety of nephelite-syenite containing ægirite, acmite or arfvedsonite, and eudialyte, and having a somewhat laminate texture.

chicago (shi-kä′gō), *v. t.* [In allusion to the assumed meaning of *Chicago,* namely, 'skunk' (it really means 'at the place of the skunk or skunks').] In *card-playing* and other games, to 'skunk' or 'whitewash' (an opposing side); that is, to prevent it from scoring any runs or points. [Slang, U. S.]

Chicago blue, gray, orange, pool. See ★*blue,* etc.

chicane, *n.* **3.** A quibble: as, a *chicane* about words. — **4.** In *bridge whist,* a hand which is void of trumps; it entitles the holder to score simple honors. When the hands of two partners are both void of trumps it is called *double chicane.*

chicayote (chē-kä-yō′te), *n.* [Also *chilacayote, chillcoyote, chilicothe,* etc.; Nah. *chichic,* bitter, + *ayotli,* gourd or squash.] A name in Mexico of several wild gourd-like plants, especially of *Cucurbita fœtidissima,* which is also known as *calabacilla amarga* ('bitter gourd'), and of *Cucurbita radicans.* The name appears in various forms. In California, as *chilicothe,* it is applied to *Micrampelis macrocarpa.* See ★*chilicothe* and *calabazilla.*

chicharo (chē′chä-rō), *n.* [Sp. *chícharo,* pea or pea-vine.] In Porto Rico, a name applied to a number of small leguminous vines, especially the lablab, *Dolichos Lablab.*

chicharro (chē-chär′rō), *n.* [Sp., prob. < *chicharra,* an imitative var. of *cigarra* = It. *cigala, cicala,* < L. *cicada,* a cicada.] A carangoid fish, *Trachurops crumenophthalmus,* found on both coasts of tropical America. Also called *goggler, goggle-eyed jack,* and *big-eyed scad.*

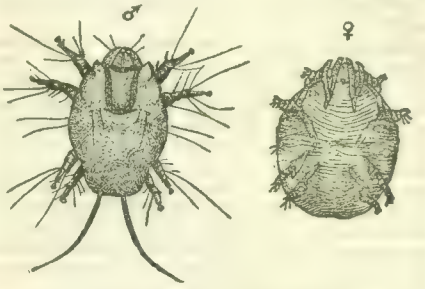
chicken-berry (chik′en-ber″i), *n.*; pl. *chicken-berries* (-iz). [A substitution for *checkerberry.*] Same as *checkerberry,* in both senses.

chicken-bill (chik′en-bil), *n.* The sora, *Porzana carolina,* so called from its short bill. [Local southern U. S.]

chicken-breast (chik′en-brest), *n.* A condition in which the sternum projects forward, the arch of the ribs on either side being flattened.

chicken-bug (chik′en-bug), *n.* A bug that infests chickens. — **Mexican chicken-bug,** a cimicid or bedbug, *Acanthia inodora,* which attacks poultry in Mexico and has also been found in southern New Mexico. See ★*coruco.*

chicken-corn (chik′en-kôrn), *n.* A form of durra, *Andropogon Sorghum cernuus,* with the densely flowered panicle abruptly bent or recurved so as to point downward. It is largely cultivated as a cereal in Africa and to some extent in Asia, and is sometimes planted in America, its seed being valued as chicken feed. Also called *white Egyptian corn.* See *sorghum,* 2.



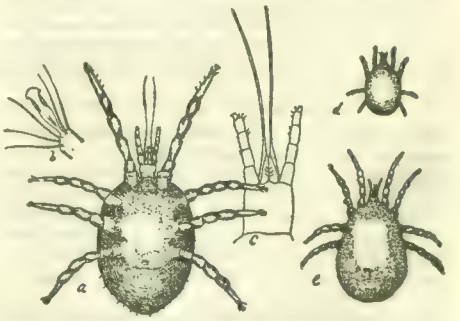
chicken-fixings (chik′en-fik″singz), *n. pl.* Something nice in the way of food, or better than usual. [Colloq., U. S.]

chicken-flea (chik′en-flē), *n.* A tropical and subtropical insect of the family *Pulicidæ, Sarcopsylla gallinacea,* of wide distribution. It is especially attracted to poultry but also attacks young kittens, puppies, calves, colts, and even children.

chickenhood (chik′en-hůd), *n.* The state or condition of a chicken.

chicken-louse (chik′en-lous), *n.*; pl. *chicken-lice* (līs). Any one of several mallophagous parasitic insects, as, (*a*) *Goniocotes abdominalis,* the large chicken-louse; (*b*) *Goniodes dissimilis,* the chicken *Goniodes;* (*c*) *Lipeurus heterographus,* the *Lipeurus* of the chicken and pheasant; and (*d*) *Lipeurus variabilis,* the variable chicken-louse.

chicken-mite (chik′en-mīt), *n.* **1.** A minute, almost microscopic mite, *Cytoleichus* (formerly *Cytodites*) *nudus,* of the family *Cytoleichidæ,* which infests the air-passages and air-cells, and other portions of the domestic fowl. It is called the *internal chicken-mite.* — **2.** A similar mite of the same family, *Lamniosioptes cysticola,* which occurs on the skin, but commonly penetrates also the subcutaneous connective tissues, where it gives rise to a calcareous cyst. It infests chickens, geese, and pheasants, and is called the *cystic fowl-mite.* — **3.** The itch-mite of fowls, *Sarcoptes* (*Cnemidocoptes*) *mutans* and *gallinæ,* serious enemies of domestic fowls. — **4.** Same as ★*chicken-tick,* 1.



Chicken-mite (*Sarcoptes mutans*). Male and Female. (After Robin.)

chicken-pecked (chik′en-pekt), *p. a.* Ruled, controlled, or worried by wilful children. Compare *henpecked.* [Humorous, U. S.]

chicken-pepper (chik′en-pep″ėr), *n.* The small-flowered crowfoot, *Ranunculus abortivus,* of the United States, which has numerous small achenes in globular heads.

chicken's-toes (chik′enz-tōz), *n.* The glasswort, *Salicornia herbacea;* also the coralroot, *Corallorhiza odontorhiza.* The allusion is to the fruiting spikes of the former and the roots of the latter.

chicken-tick (chik′en-tik), *n.* **1.** *Dermanyssus gallinæ,* a mite of the family *Dermanyssidæ,* a most pernicious pest of the hennery, which gathers on the fowls at night and sucks their blood. Sometimes they infest human beings, causing acariasis. Also called *chicken-mite.* — **2.** An ixodid mite, *Argas miniata* (*americana* Pack.) which does great damage among poultry, especially in the Southern States, where it ranges from Texas to California. Infested chickens droop, refuse to eat, and finally drop and die.

Chicken-tick (*Dermanyssus gallinæ*). *a*, adult; *b*, tarsus; *c*, mouth-parts; *d*, and *e*, young. All enlarged. (Osborn, U. S. D. A.)

chicken-turtle (chik′en-tėr″tl), *n.* A small, common, fresh-water turtle, *Chrysemys reticulata,* of the southern United States. See *chicken-tortoise.*

chickweed, *n.* — **Barren chickweed,** *Cerastium arvense oblongifolium,* of the eastern United States. — **Chickweed geometer.** See ★*geometer.* — **Germander chickweed,** the field-speedwell, *Veronica agrestis.* — **Great chickweed.** See *Stellaria.* — **Ivy-chickweed.**

Same as *germander* ★*chickweed*.—**Sea-chickweed.** See *sea-chickweed*.—**Star-chickweed.** Same as *great* ★*chickweed*.—**Star-flowered chickweed.** Same as *star-flower* (*a*).—**Water-chickweed.** See *water-chickweed*.—**Water mouse-ear chickweed,** one of the water-chickweeds, *Alsine aquatica*.

chicle (chik'l, Sp. chē'klā), *n.* [Amer. Sp.] Same as *chicle-gum*.

chico[2] (chē'kō), *n.* [Short for. Sp. *chicozapote*, < Nah. *xicotzapotl*.] In the Philippine Islands, the sapodilla, *Sapota zapotilla*, a tree of Mexican origin. See *sapodilla*.

Chico group. See ★*group*[1].

chicolar (chik-ō-lär'), *n.* [Perhaps a variation of *escolar*.] A deep-water tropical fish. Same as ★*escolar*.

chicot (shē-kō'), *n.* [F., a stump or stub.] A French-Canadian name of the Kentucky coffee-tree, *Gymnocladus dioica* (which see, under *coffee-tree*).

chidra group. See ★*group*.

chief. **I.** *n.*—**Chief of ordnance,** the senior officer of the ordnance department in the United States army.—**Chief of staff.** (*a*) In the United States army, a general officer temporarily detailed by the President to exercise general supervision over all troops of the line and the staff-corps and departments of the army. (*b*) The senior general-staff officer on the staff of the commander of an army, army-corps, division, or department. (*c*) The senior officer on the personal staff of a flag-officer in command of a fleet or squadron. When practicable, he is senior in rank to all other officers under command of the flag-officer.—**Chief petty officer.** See ★*officer*.—**Maori chief,** *Notothenia coriiceps*, a fish of the family *Trachinidæ* found in the waters of Australia and New Zealand.

II. *a.*—**Chief officer** (*naut.*), the deck-officer next below the captain in rank; the first mate; the officer on whom would devolve the command in the event of the disability or removal of the captain.

chiffon, *n.* 2. A thin gauze.—**Chiffon lace,** silk-embroidered chiffon.

chi-fu (chē-fō), *n.* Same as *chih-fu*.

chiga (chē'gä), *n.* [Native name.] A tree of the senna family, *Campsiandra comosa*, found in the Guianas and Venezuela. Its large flat seeds contain starch and are used as food by the natives.

chigger (chig'ėr), *n.* A perverted form of *chigoe*. Compare *jigger*[2]. *Cambridge Nat. Hist.*, VI. 525.

chigh (chi), *n.* Same as ★*chi*[2] or ★*hitch*.

chigoe, *n.* 2. A larval harvest-mite, as the so-called *Leptus irritans*. Same as *red-bug* and *jigger*[2], 2.

chigoe-poison (chig'ō-poi″zn), *n.* The strangler-trees, *Clusia alba* and *C. rosea*. See *Clusia* and ★*aralie*.

Chihuahuan (chē-wä'wạn), *a.* Of or pertaining to Chihuahua, Mexico: in *biogeog.*, inhabiting the region in the neighborhood of Chihuahua, a portion of the Sonoran subregion of the austro-occidental life-district of the American continent.

chi-hwan (chē-whän), *n. pl.* [Chinese *chi*, raw, untamed, + *hwan*, in Mandarin dial. *fan*, barbarians.] The aborigines of Formosa who have not been assimilated by the Chinese, or one of them. They occupy the mountainous portions of the island.

chikore (chi-kōr'), *n.* [Also *chickore*, *chikor*, *chuckoar*, *chukore*, *chukor* (NL. *chukor*), prop. *chakor*, < Hind. *chakōr*, < Skt. *chakōra*, the red-legged partridge.] The red-legged partridge of the Western Himalaya, Northern Punjab, and Afghanistan. The name is also applied by sportsmen to the snow-cock of Ladak, *Tetraogallus himalayensis*, and *Ortygornis galaris*, a handsome partridge of eastern Bengal.

chilacayote (chi″lä-kä-yō'tā), *n.* [One of the modifications of Mex. *chicayote*, bitter-gourd.] A name in California and northern Mexico of several wild cucurbitaceous plants. See *calabazilla* and ★*chicayote*.

chilarium (kī-lā'ri-um), *n.*; pl. *chilaria* (-ä). [NL., < Gr. *χεῖλος*, lip, + L. *-arium*.] 1. The stylet-shaped process behind the mouth in *Limulus*.—2. In *bot.*, a structure in the seed-coat of *Phaseolus*, consisting of two valves which by hygrometric movements cause its rupture.

childhood, *n.*—**Second childhood,** the childishness often incident to old age; dotage.

childie (chīld'i), *n.* [*child* + *-ie*[2].] A little child: a fond diminutive.

childing daisy. See ★*daisy*.

children's-bane (chil'drenz-bān), *n.* The American water-hemlock, *Cicuta maculata*: so called because its root causes death to children who mistake it for an edible root. Also called *children's-death*.

children's-death (chil'drenz-deth), *n.* Same as ★*children's-bane*.

child-study (child'stud-i), *n.* Systematic physiological and psychological study of children and their ways, especially in regard to their educational adaptabilities and capacities, with a view to determine effective methods of teaching and of overcoming disabilities.

Chilean cedar. See ★*cedar*.

Chilhowee sandstone. See ★*sandstone*.

chiliadic (kil-i-ad'ik), *a.* [*chiliad* + *-ic*.] Of or pertaining to a chiliad.

chiliarchy, *n.* 2. The post of chiliarch.

chiliastical (kil-i-as'ti-kạl), *a.* Chiliastic; also inclined to favor the views of the chiliasts.

chiliastys (kil-i-as'tis), *n.* [Gr. dial. *χιλιαστύς*, in dialects of Ephesus and Samos, < Gr. *χιλιάς*, a thousand: see *chiliad*.] In *Gr. antiq.*, in Ephesus or Samos, a tribe or division of one thousand citizens. *Jour. Hellenic Studies*, VIII. 107.

chilicote (chē-li-kō'tā), *n.* [Mex. Sp.: see ★*chicayote*.] A name in northern Mexico of *Erythrina coralloides*, a small thorny trifoliate tree belonging to the *Fabaceæ*, the hard scarlet seeds of which were formerly strung into necklaces by the Indians. They are ground to a powder and are used medicinally in some parts of Mexico, both as an external application for headache and internally as an emetic. Like other bright-colored seeds used for beads they are also called *colorin* and *peonia*.

chilicothe (chi-li-kō'thē), *n.* [One of the modifications of the Mex. *chicayote*, bitter-gourd.] A name in California of several wild cucumbers, especially of *Micrampelis macrocarpa*. The fruit, when green, is a large prickly ball, but when ripe it becomes lily-like through the rolling back of the segments of the capsule, which are internally pure white. The large brown hard seeds resemble beans. They are strung into necklaces by the Indians. This plant and others resembling it have enormous tuberous roots, on account of which they are sometimes called man-root, or old-man-in-the-ground. See ★*chicayote* and ★*chilicote*.

chilicoyote, *n.* Same as *chilacayote*.

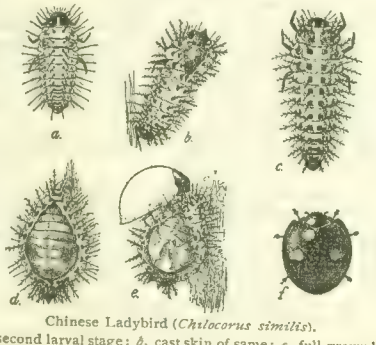
chilidium (kī-lid'i-um), *n.*; pl. *chilidia* (-ä). [NL., < Gr. *χεῖλος*, a beak, + dim. *-idium*.] In the *Brachiopoda*, a convex plate which appears in mature stages of some of the species as an outside envelop of the cardinal process of the dorsal valve. It is analogous to the deltidium of the ventral valve, but is not homologous therewith either in origin or function.

Chiliferidæ (kī-li-fer'i-dē), *n. pl.* [NL., < Gr. *χεῖλος*, lip, + L. *ferre*, bear.] A family of ciliate *Protozoa*, of the order *Holotrichida*. They have the mouth in the anterior part of the body or near the middle, the pharynx undeveloped or small, and undulating membranes at the edge of the mouth or in the pharynx. The family includes the genera *Leucophrys*, *Glaucoma*, *Colpoda*, and others.

chiliomb (kil'i-om), *n.* [Gr. *χιλιόμβη*, formed in imitation of *ἑκατόμβη*, hecatomb.] A sacrifice of a thousand (oxen). *N. E. D.*

chilitis (kī-lī'tis), *n.* [NL., < Gr. *χεῖλος*, lip, + *-itis*.] Inflammation of the lip.

Chilled iron. See ★*iron*.—**Chilled meat,** etc., meat, fish, poultry, and other food material kept at a moderately low temperature, but not always frozen, in a cold-storage warehouse or in the cold-room of a steamer.



chill-harden (chil'här″dn), *v. t.* To harden (steel) by heating it to a cherry-red heat and cooling it suddenly by water or a jet of air. The carbon enters into combination with the iron and the steel is resistant to abrasion, and has a high elastic limit. See *chill-hardening* and *chilled casting*.

Chilli sauce, a highly-seasoned tomato sauce flavored with chillies.—**Chilli vinegar,** vinegar flavored with red peppers and used as a sauce.

chill-room (chil'röm), *n.* A cold-storage room or refrigerator chilled by pipes in which cold brine circulates: used to chill meats, etc.

In the preservation of meat, from the time that the beef, sheep, or hog is killed, it is kept in cold storage or *chill rooms*, until the time that it is taken from the refrigerator to be prepared for the table.

Sci. Amer. Sup., Jan. 24, 1903, p. 22629.

Chinese Ladybird (*Chilocorus similis*).

a, second larval stage; *b*, cast skin of same; *c*, full-grown larva; *d*, method of pupation, the pupa being retained in split larval skin; *e*, newly emerged adult not yet colored; *f*, fully colored adult. All two and a half times natural size. (Marlatt, U. S. D. A.)

Chilocorus (kī-lok'ō-rus), *n.* [NL., < *χεῖλος*, lip, + (appar.), *κόρος*, sprout, shoot.] An important genus of coccinellid beetles, of wide distribution and comprising more than 30 species, all of which are important enemies of scale-insects. *C. bivulnerus* is the 'twice-stabbed ladybird' of the United States, and *C. similis* is the Chinese ladybird imported into the United States by the United States Department of Agriculture, from China, to destroy the San José scale.

chilomalacia (kī-lō-ma-lā'si-ä), *n.* [NL., < Gr. *χεῖλος*, lip, + *μαλακία*, softness.] Same as *noma*.

chiloschisis (kī-los'ki-sis), *n.* [NL., < Gr. *χεῖλος*, lip, + *σχίσις*, cleavage, separation, < *σχίζειν*, cleave, separate: see *schism*.] Same as *harelip*.

chilostome (kī'lō-stōm), *n.* and *a.* **I.** *n.* Any member of the *Chilostomata*.

II. *a.* Pertaining to or resembling the *Chilostomata*.

chiltern (chil'tėrn), *n.* and *a.* [*Chiltern*, a local name.] **I.** *n.* A kind of dry, open soil characteristic of certain parts of England.

II. *a.* Characterized by the prevalence of the soil known as chiltern: as, *chiltern* counties.

chimborazite (chim-bō-rā'zīt), *n.* [*Chimborazo* (where found) + *-ite*[2].] Same as *aragonite*.

chime[1], *v. t.* 3. To announce, indicate, summon, or bring about by chiming or stroke of bell: as, to *chime* (or strike) some particular hour; to *chime* one to sleep, or to supper, etc.

Chime-and-chime, end to end: said of barrels so ranged that the head of one butts against the head or bottom of another.

chimney, *n.* 4. (*e*) A vent through which volcanic eruption has taken place.

He [De Launay] believes that since the cavities which contain the serpentine pipes are in the nature of volcanic *chimneys*, water, penetrating to the contact of a molten metallic bath charged with various carburets, caused the sudden formation of carburets of hydrogen, and by their explosion the opening of the volcanic *chimneys*.

Smithsonian Rep. (*Nat. Mus.*), 1900, p. 505.

5. A very narrow cleft in a cliff.

I lowered myself through the *chimney*, however, by making a fixture of the rope, which I then cut off, and left behind, as there was enough and to spare.

Whymper, Scrambles among the Alps, p. 119.

chimney-sweep, *n.* 4. In *angling*, an artificial fly used in salmon-fishing: named from its black color.—**Chimney-sweep's cancer.** See ★*cancer*.

chimopelagic (kī″mō-pē-laj'ik), *a.* [Gr. *χεῖμα*, winter, + *πέλαγος*, sea.] Rising to the surface of the sea in winter, but living in the depths of the sea during the warm season. Many *Radiolaria*, *Medusæ*, *Siphonophora*, pteropods, and heteropods are chimopelagic. See ★*allopelagic*, ★*bathypelagic*, ★*nyctipelagic*.

chin, *v. i.* 2. In *gymnastics*, to lift the weight of the body by the arms on a horizontal bar until the chin is brought over the bar. Also used transitively: as, to *chin* the bar.

Chin. An abbreviation of (*a*) *China*; (*b*) *Chinese*.

china, *n.*—**Alabama china,** ironstone china tableware made in Burslem, England, for the warship Alabama of the Confederate States navy, about 1862. It was decorated with a central design of two crossed cannon surrounded by a wreath of the cotton- and tobacco-plants and the motto of the vessel. Several services of this now celebrated pattern were produced, and pieces are sought as historical relics.—**Antislavery china,** Anglo-American pottery made by Staffordshire potters for the promotion of the antislavery cause in the United States. Forming part of the decoration is a quotation from the first amendment to the Constitution of the United States, with eagles and appropriate mottoes in the border design. In some pieces the name of Elijah P. Lovejoy, who became a martyr to the cause at Alton, Ill., in 1837, appears. Also called *Lovejoy china*.—**Canton china.** Same as *India* ★*china*.—**China mark,** a collector's name for an aquatic moth of the genus *Hydrocampa*.—**Cincinnati china,** pieces of a white stoneware table-service decorated with the figure of Fame holding a trumpet in one hand and the insignia of the order of the Cincinnati in the other: made in China, about 1784, for the Society of the Cincinnati in the United States.—**Columbian Star china,** table-services made extensively by John Ridgway, of Hanley, and William Adams and Sons, of Tunstall, England, for the American market during the presidential campaign of 1840. The design consists of a view of the celebrated 'log cabin,' the birthplace of William Henry Harrison, surrounded by a border of stars, printed in blue, pink, and other colors. This pattern was also copied by Petrus Regout, a potter of Maestricht, Holland. Also called *log-cabin china* and *Harrison china*.—**Erie Canal china,** pottery or cream-colored ware made by Staffordshire potters for the American market in commemoration of the completion of the Erie Canal in 1825. It was produced in a great variety of designs, printed in dark blue and other colors, showing various views of the canal and portraits of eminent Americans.—**India china,** a variety of Chinese porcelain or stoneware, usually with blue decorations, carried by the East India Company to England, Holland, and the United States, during the eighteenth century; also modern Chinese ware of the same character. See *India ware*.—**Ironstone china.** See

ironstone.—**Log-cabin china.** See *Columbian Star* ★*china.*—**Lovejoy china.** See *antislavery* ★*china.*—**Martha Washington china,** French porcelain tableware decorated with a chain of fifteen links, each containing the name of one of the States, and, as a central device, the monogram M. W. in a golden sunburst. Around the edge of each piece is a painted serpent, forming a complete circle. This service is supposed to have been presented to Mrs. Washington by the French officers who had fought with the Continental army. The design has been extensively copied.—**Masonic china,** china decorated with emblems of the order of Freemasons. Hard-paste porcelain punch-bowls, jugs, and other articles so ornamented were made in China and taken to England and the United States by the East India Company. Masonic cream-ware was also produced in Staffordshire early in the nineteenth century, with transfer-printed symbols and inscriptions. Pitchers and mugs of this character, with black and green devices, were also made in Liverpool for the British and American trade, many of which survive in private and public collections.—**Millenium china,** plates and other pieces of a table-service bearing a printed device in color showing a lion led by a child, surrounded by lambs, the all-seeing eye, and quotations from the Bible: a popular design produced by Staffordshire potters about 1835.—**Nanking china.** Same as *India* ★*china.*—**Stone china.** Same as *ironstone* ★*china* and *white* ★*granite.*—**Syntax china,** blue china with printed designs after Rowlandson's illustrations of William Combe's Tours of Dr. Syntax: made at Cobridge, Staffordshire, by James Clews, early in the nineteenth century.

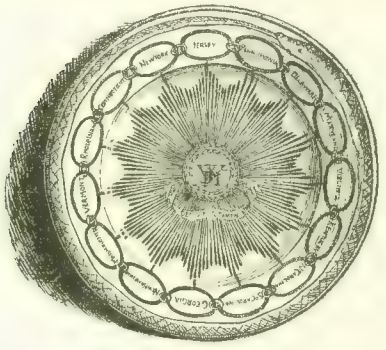


Plate of Martha Washington China.

china[2] (kē′nä), *n.* [Erroneous spelling of *kina* or *quina,* perhaps suggested by the unrelated *chinchona, cinchona.*] **1.** Cinchona bark.—**2.** Quinine.

China box, brier. See *box*[1], ★*brier.*

chinaldine (ki-nal′din), *n.* Same as ★*quinaldine.*

chinamania (chī′nä-mā″ni-ä), *n.* A craze for collecting china.

Like other mild forms of insanity, *chinamania* has its peculiar phases, and attacks different individuals in very different ways. *All the Year Round,* April 3, 1875, p. 11.

chinamaniac (chī′nä-mā″ni-ak), *n.* One who is smitten with the chinamania; one who has a craze for collecting china.

china-metal† (chī′nä-met″al), *n.* An old name in Europe for porcelain and majolica ware before their true nature had become known.

Their Venice-glass, and Purslane and *China-Metal,* cracks with as slight a blow as pots of coarser Clay.
A. Walker, Lecz Lachrymans, p. 13. *N. E. D*

chinamine (kīn′a-min), *n.* Same as *quinamine.*

china-root, *n.* **3.** *Smilax Pseudo-China.* See *china* ★*brier.*

chinaseptol (kin-a-sep′tōl), *n.* A yellowish, crystalline compound ($C_9H_5(OH),SO_3H.N$) bearing the same relation to chinoline that phenol-sulphonic acid does to benzol: used as an antiseptic as a substitute for salol. Also called *diaphtol.*

china-steps (chī′nä-stepz″), *n. pl.* A pyramidal stand consisting of two or more steps on which china was formerly displayed. It was usually placed on the top of a high-boy.

China-town (chī′nä-toun), *n.* A section of a town in the United States occupied chiefly by Chinese and in which they live more or less in accordance with their own customs.

China wood-oil. See ★*wood-oil.*

chinch-bug, *n.*—**False chinch-bug.** (*a*) An American anthocorid bug, *Triphleps insidiosus,* which resembles the true chinch-bug, but is carnivorous, preying upon plant-lice and other small soft-bodied insects. (*b*) An American lygæid bug, *Nysius angustatus,* frequently mistaken for the chinch-bug. It is wide-spread and damages grape-vines, strawberry-plants, and garden vegetables. See *Nysius,* with cut.—**Minute false chinch-bug,** a bug, *Nysius minutus,* of the family *Lygæidæ,* somewhat resembling the chinch-bug. It feeds on cruciferous plants.

chin-chin[1] (chin′chin′), *n.* [A corruption of Chinese *ts'ing, ts'ing* (or *ch'ing, ch'ing*), in which *ts'ing* means beg, pray, request, have the goodness or the kindness to, please. The reduplication is much used in Chinese formal intercourse to introduce many polite phrases which are seldom completed: as, "I pray you" (do not stir); "allow me" (to refill your wine-cup); "please! please!" (no more for me); "I pray you" (to allow me to take my departure), that is, "to say good-by," etc.] **1.** A Pidgin-English form of salutation: as, *chin-chin!* old man, what place you go?

On the thirty-sixth day from Charing Cross a traveller can . . . be making his *chin-chin* to a Chinese mandarin.
Pall Mall Gaz., April 15, 1885.

2. One's greetings, respects, or regards: as, please give my *chin-chins* to A when you see him.—**3.** A parting salute; 'good-by.'

chin-chin[1] (chin′chin′), *v. t.* To greet; salute; pay respects.

The belle of the tankas arrives first; and showing her beautiful white teeth as she "*chin-chins*" the captain, makes fast to our paddle-box.
All the Year Round, April 30, 1859, p. 18.

chinchin[2] (chin-chin′), *n.* [Chilean.] **1.** An evergreen shrub or small tree, *Azara microphylla,* of the family *Flacourtiaceæ,* or its hard wood. It is often cultivated as an ornamental plant and bears exceedingly fragrant small green flowers.—**2.** An ornamental shrub, *Polygala thesioides,* native of Chile and Bolivia, bearing blue flowers. See *Polygala.*

chincof, *n.* A simplified spelling of *chincough.*

chine-gall (chīn′gâl), *n.* Rheumatism of horses and cattle which becomes localized in the muscles of the loins. Also called *lumbago* and *chine-felon.*

chinela (chē-nā′lā), *n.* [Sp. *chinela, chanela* = Pg. *chinela* = Cat. *chinella* = It. *pianella,* a slipper, dim. of Sp. **chano* (otherwise *llano*) = Pg. *chão* = It. *piano,* flat, level, plane: see *plane*[1], *plain,* and *piano.*] In Spanish-speaking countries, a slipper; in the Philippine Islands, a native slipper without a heel and with a very small upper which barely covers the toes: worn by women.

Chinese artichoke. See ★*chorogi.*—**Chinese banana, brake, cat,** etc. See ★*banana,* ★*brake*[5], ★*cat*[1], etc.—**Chinese potato, Chinese yam.** See ★*cinnamon-vine* and *yam,* 1.

chin-fly (chin′flī), *n.* A horse bot-fly, *Gastrophilus nasalis,* possibly so called because its eggs are laid about the horse's mouth where they can be reached by the tongue of the horse and thence carried to its stomach.

Ch'ing porcelain. See ★*porcelain*[1].

chinin (kin′in), *n.* [*china*[2] + *-in*[2].] Same as *quinine.*

chink[1], *n.* **2.** The variegated pattern shown by oak and other woods when cut across the grain.

In discussing with my agent the difference between the wood of the sweet chestnut and that of the oak, he spoke of the *chink* of these woods, meaning the variegated pattern which they present when sawn.
N. and Q., June 2, 1900, p. 432.

chink[6] (chingk), *n.* [Appar. a var. of *kink*[1].] A sprain of the back. [Eng. dial.]

Chink[7] (chingk), *n.* A Chinaman. [U. S. slang.]

chin-key (chin′kē), *n.* In *psychophys.,* an electric key which is closed or opened by the movement of the lower jaw: used in reaction experiments. *Scripture,* Exper. Phonetics, p. 154.

Chinkie (ching′ki), *n.* [*Chink*[7] + *-ie*[2].] A Chinaman. [Australian slang.]

The pleasant traits of character in our colonialised *Chinkie,* as he is vulgarly termed (with the single variation 'Chow'). *A. J. Boyd,* Old Colonials, p. 233.

chinkle[1] (chingk′l), *n.* [Var. of *kinkle*[1].] *Naut.,* a turn or kink in a rope.

chinkle[2] (chingk′l), *v. t.* [Freq. of *chink*[2].] To tinkle or cause to tinkle; produce a continued 'chinking' sound: as, to *chinkle* the small coins in one's pocket.

chin-music (chin′mū″zik), *n.* Persistent chatter or talk. [Slang.]

chinny (chin′i), *a.* [*chin* + *-y*[1].] Talkative; given to talk. [Colloq.]

I forgot all about the old lady, though she was more *chinny* than the young one. *Bread-winners,* vii.

Chino (chē′nō), *n.* [Appar. orig. Sp. *chino,* a Chinese.] A person of one quarter Indian and three quarters negro blood. [Mexico.]

An Indian marrying a negress produces a "Sobo," and the latter engenders with a negress a "*Chino.*"
Deniker, Races of Man, p. 542.

Chinoist†, *n.* [F.: see *Chinese.*] A Chinese or the Chinese. *Purchas.*

The *Chinoys* who live at the bounds of the earth.
Sir T. Browne.

chinoiserie (shē-nwoz-rē′), *n.* [F., < *Chinois,* Chinese.] **1.** Chinese conduct, methods, or ways of doing things; a Chinese characteristic.

The men occupied the carved teakwood stools about a large table. . . . The women stood by and served them. . . . The whole was a bit of bright *chinoiserie* worth in itself a journey to witness.
W. H. Bishop, in Harper's Mag., May, 1883, p. 830.

2. A Chinese curio, knickknack, or product: as, "Japanese tea-trays, *chinoiseries,*" etc., *Miss Braddon.*

Chino-Japanese (chī′nō-jap-a-nēs or -nēz″), *a.* and *n.* **I.** *a.* Relating to both China and Japan: as, *Chino-Japanese* relations; *Chino-Japanese* trade.

II. *n.* The Chinese language as used and pronounced in Japan: as, *kai* for Chinese *hai,* the sea; *Tō Kiō* for Chinese *Tung King,* Eastern capital (the city formerly known as Yedo); *dō* for Chinese *tao,* road, circuit; *mei* or *mio* for Chinese *ming,* bright, clear, distinguished, etc. Also called *Sinico-Japanese.*

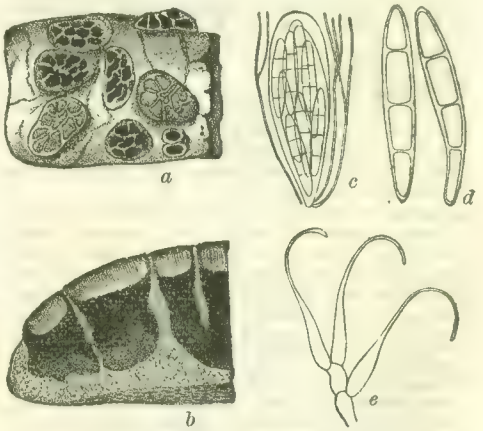
Chinoline blue. See ★*blue.*

Chinologist (chī-nol′ō-jist), *n.* Same as *sinologist.*

Chinology (chī-nol′ō-ji), *n.* [*China* + *-ology.*] Same as *sinology.*

Chinook salmon. Same as *quinnat.*

chinoral (ki-nō′ral), *n.* [★*china*[2] (*quina*) + (*-chl*)*oral.*] An oleaginous, very bitter liquid containing quinine and chloral hydrate: used internally as a hypnotic and externally as an antiseptic. Also *quinoral.*



chinosol (kin′ō-sol), *n.* [★*china*[2] (*quina*) + *-ose* + *-ol.*] Same as ★*quinosol.*

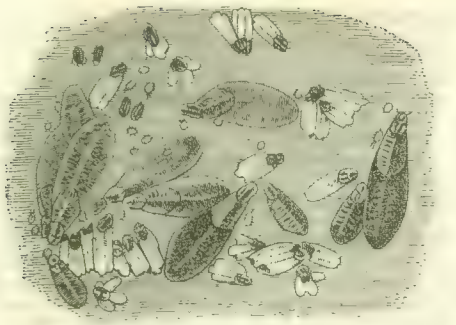
chinovic (ki-nō′vik), *a.* [★*china*[2] (*quina*) + L. *ovum,* egg, + *-ic.*] White, and derived from china (quina) or cinchona bark.—**Chinovic acid,** a white, finely crystalline powder of undetermined composition, contained in cinchona bark and also obtained by decomposing chinovin by boiling with dilute acids.

chinovin (chin′ō-vin), *n.* [*chinov*(*ic*) + *-in*[2].] A whitish, intensely bitter glucoside of uncertain composition, extracted from cinchona bark.

chin-strap, *n.* **2.** A strap which passes under the jaw of a horse and connects with the nose-piece and bridle-checks.

Chiodecton (kī-ō-dek′ton), *n.* [NL. (Acharius, 1814), so called in allusion to the white thallus,

Chiodecton myrticola.



a, plants showing habit; *b,* section through a stroma and the apothecia; *c,* ascus and paraphyses; *d,* spores; *e,* sporophores with pycnospores; *c, d,* and *e* greatly enlarged. (From Engler and Prantl's "Pflanzenfamilien.")

< Gr. *χιων,* snow, + (appar.) *δεκτός,* acceptable (pleasing?).] A large genus of crustaceous lichens with *Chroölepus* gonidia and more or less disciform apothecia, either sunken in or seated upon a stroma. Most of the species occur upon bark in tropical or subtropical regions.

Chiodectonaceæ (kī-ō-dek-tō-nā′sē-ē), *n. pl.* [< *Chiodecton* + *-aceæ.*] A family of crustaceous lichens, named from the genus *Chiodecton* and having the apothecia mostly sunken in stromata.

chionablepsia (kī″ō-na-blep′si-ä), *n.* [NL., < Gr. *χιων,* snow, + *ἀβλεψία,* blindness.] Same as *snow-blindness.*

Chionaspis (kī-ō-nas′pis), *n.* [Gr. *χιων,* snow, + *ἀσπίς,* a shield.] A genus of scale-insects.

Orange Chionaspis (*Chionaspis citri*), illustrating a group of the female and male scales as they occur on a leaf. Enlarged about seven diameters. (After Marlatt.)

—**Orange Chionaspis,** a diaspine scale-insect, *Chionaspis citri*, of wide distribution, which affects the foliage and bark of citrus plants.

This species (*Chionaspis citri* Comstock) occurs in the orange groves of the Eastern United States, and is also especially troublesome in Louisiana, as first shown by the observations of Dr. Howard, and, later, of Professor Morgan. The latter reports it as being very prevalent from New Orleans to the Gulf, and that its presence on the trees causes a bursting of the bark and very ugly wounds.
Yearbook U. S. Dept. Agr., 1900, p. 270.

Chionodoxa (kī″ō-nō-dok′sä), *n.* [NL. (*Boissier*, 1844), in allusion to their early-blooming habit, < Gr. *χιών*, snow, + *δόξα*, glory.] A small genus of hardy bulbous plants of the family *Liliaceæ*; the genus includes 4 species which are natives of Crete and Asia Minor (Mt. Tarsus). The flowers are small and blue (running into white and red forms), with recurved, spreading, acute segments, dilated filaments, and small or capitate stigma. They are among the best of early flowering plants, blooming in February, March, and April, according to the locality, with the early snowdrops and scillas. Since their introduction to cultivation in 1877, they have been widely cultivated under the name *glory of the snow.*

chionophilous (kī-ō-nof′i-lus), *a.* [Gr. *χιών*, snow, + *φιλεῖν*, love.] Preferring the winter: applied specifically by Ludwig to the winter-leaves of *Helleborus fœtidus.*

chionophobous (kī-ō-nof′ō-bus), *a.* [Gr. *χιών*, snow, + *φοβεῖν*, fear.] Shunning the winter: applied specifically by Ludwig to the summer-leaves of *Helleborus fœtidus.*

chip[1], *v. i.* 4. In *poker*, to bet a counter of the smallest value, in order to keep in the pool until others declare.

chip[1], *n.* 9. Specifically, in *gem-cutting*, a cleavage which weighs less than three fourths of a carat.—**Chip bark,** the broken pieces and chips of cinchona bark, used principally by manufacturers of quinine and other alkaloids, in distinction from *druggist's bark*, which consists of the finer unbroken quills.—**Saratoga chips,** potatoes cut into thin slices, crisply fried, and dried in an open oven.

chip[3] (chip), *n.* 1. In *wrestling*, a special mode of throwing one's opponent; a trick. *N. E. D.* —2. A quarrel; a falling out; a 'spat.' [Prov. Eng.]

chipa (chē′pä), *n.* [Quicha *chipa*, Aymará *cchipa*, cover, wrap around, as a bundle.] In South America, a net made of leather thongs, used for transporting fruit and also heavier loads. Trunks and boxes are usually covered with a chipa to protect them on long and difficult journeys.

chipped (chipt), *a.* [Also *chipt*, < *chip*[1] + *-ed*[2].] Having small pieces or flakes broken off; made by a process of chipping: said of stone implements made of flint, jasper, obsidian, and other brittle stones. Chipped stone implements are generally roughly shaped with a small hammer and then fashioned by chipping or flaking with a bone flaker which is pressed against the surface of the stone, small chips being taken off by pressure. The edges of stone implements are also chipped by nipping.

A Chippendale Chair. After a design by Thomas Chippendale.

Very unlike . . . to a set of *chipped* instruments belonging to the . . . period of the cromlechs in France and England. *E. B. Tylor*, Early Hist. of Mankind, viii.

Chippendale (chip′en-dāl), *n.* The name of an English designer and maker of furniture, Thomas Chippendale, who published a book of designs in 1752, and whose name became attached to a style of furniture prevalent from the middle to the end of the eighteenth century. The designs were an English adaptation of contemporary French styles. The general characteristics were elaboration and delicacy, with an affectation of simplicity not founded on solidity. A style of book-plates is also known by this name. See ★*furniture.*

The earlier examples [book-plates] of this *Chippendale* manner are tolerably ponderous and simple.
Encyc. Brit., XXVI. 304.

chipper[1], *n.* 2. A large marble used by boys in Scotland to chip at and scatter a row of marbles while standing at a certain distance. Also called a *plunker.*—**Pneumatic chipper,** a small impact-machine worked by compressed air, used for chipping or cutting metal; a pneumatic hammer used for chipping. The pneumatic chipper replaces the hammer and cold-chisel and does the work more quickly and with less exertion on the part of the operator.

chipper[2] (chip′ėr), *n.* [From **chipper*[2], *v.*, freq. of *chip*[2].] Twitter; chatter. [Dialectal.]

The wreaths of foam [of the sea] . . . made a mirthful *chipper* and laugh under the song of the soaring larks.
E. Burritt, Walk to Land's End, p. 314.

chipper[3] (chip′ėr), *v. t.* To make 'chipper'; cheer up.

Perhaps the hardest thing that Sylvia did through the day, was the setting to work to *chipper* her mother up.
Mrs. Whitney, Other Girls, xviii.

Chippewayan (chip-e-wā′yan), *a.* and *n.* **I.** *a.* Of or pertaining to the Chippeway, Chippewa, or Ojibwa tribe, one of the Athapaskan tribes of Canada.

II. *n.* A member of that tribe.

chipping-hammer (chip′ing-ham″ėr), *n.* 1. A hammer weighing about a pound and a half, used for striking the head of a chipping- or cold-chisel.—2. A pneumatic hammer used for chipping; a pneumatic chipper (which see, under ★*chipper*[1]).

chipping-machine, *n.*—**Pneumatic chipping-machines,** hand-held machines in which the chisel-edge is driven against the surface to be chipped by the action of air upon a piston with great frequency and intensity.

chipping-strip (chip′ing-strip), *n.* Same as *chipping-piece.*

chip-syringe (chip′sir″inj), *n.* A rubber bulb with a fine nozle attached, used for blowing or washing away the dust (chips) during the excavation of a tooth-cavity.

chiquechique (chē″kā-chē′kā), *n.* [Carib name.] In Venezuela, the bast-palm, *Attalea funifera*, or its fiber, piassava. See *Attalea* and *piassava*, 1.

chiral (kī′ral), *a.* [Gr. *χείρ*, hand, + *-al.*] Of or pertaining to the hand. See ★*chirality.*

chirality (kī-ral′i-ti), *n.* [*chiral* + *-ity.*] In *optics*, the power possessed by certain crystals and optically active substances of turning the plane of polarization of light to the right or left hand.

The book is largely a new creation. It surveys a vast range, all the cognate subjects on which the author feels that he has something new to communicate — laws of diffusion of gases, transparency of the sky, detailed dynamics of optical *chirality*, motion of molecules through æther, etc. *Nature*, May 5, 1904, p. 5.

chirapsia (kī-rap′si-ä), *n.* [NL., < Gr. *χειραψία*, a touching or rubbing with the hands, < *χείρ*, hand, + *ἅπτειν*, touch.] Friction with the hands; rubbing; massage.

chirarthritis (kī-rär-thrī′tis), *n.* [NL., < Gr. *χείρ*, hand, + *ἀρθρῖτις*, inflammation of the joints: see *arthritis.*] Inflammation of the joints of the hand and fingers.

chiratin (kī-rā′tin), *n.* [NL. *chirata* + *-in*[2].] A neutral, yellow, resinous, intensely bitter compound, $C_{26}H_{48}O_{15}$, found in the stalks of chiretta (*Swertia Chirata*).

chiratogenin (kir-a-toj′e-nin), *n.* [NL. *chirata* + *-gen*, produced, + *-in*[2].] An amorphous, neutral compound, $C_{13}H_{24}O_3$, formed, together with ophelic acid, by the hydrolysis of chiratin.

Chir. B. An abbreviation of the Latin *Chirurgiæ Baccalaureus*, Bachelor of Surgery.

Chir. D. An abbreviation of the Latin *Chirurgiæ Doctor*, Doctor of Surgery.

chirivita (chē-rē-vē′tä), *n.* [Cuban Sp. *chiribita*, also *chiribico*, a fish so called; a West Indian fish, *Pomacanthus arcuatus*: cf. Sp. *chiribitas*, pl., floating specks in the eyes (*muscæ volitantes*).] A fish, the same as *black* ★*angel.*

chirization (kī-ri-zā′shon), *n.* [Also *cheirization*, < **chirize* (Gr. *χείρ*, hand, + *-ize*) + *-ation.*] The process of development by which the hand has become a more and more important element in human activities; also a supposed correlated process of development of mobility and of increasing importance of centrifugal over centripetal movements.

Now pedal development is one of the special processes of peripheral (or centrifugal) functioning and growth involved in the general process of *cheirization*, which, coordinately with cephalization, defines human progress; and this developmental process explains the specialization of the Seri along one or more lines, and connects the special development directly with environing conditions.
17th An. Rep. Bur. Amer. Ethnol., i. 157.

chirk[3] (chėrk), *n.* A perverted form of *chert.*

chirl (chėrl), *v.* [An imitative var., in freq. form, of *chirk*[1], *chirm.* The Sp. *chirlar*, prattle, *chirriar*, chirp, are imitative words of independent origin.] **I.** *intrans.* To sing; warble; chirm.

II. *trans.* To warble like a bird.

chirl (chėrl), *n.* [*chirl, v.*] 1. A kind of musical warble.

His [Leigh Hunt's] voice, in the finale of it, had a kind of musical warble (*chirl* we vernacularly called it) which reminded me of singing birds.
Carlyle, in Mrs. Carlyle's Letters, I. 2.

2. Same as *chirm*, *n.*, 2.

chirls (chėrlz), *n.* In *mining*, coal which passes through a harp or screening-shovel; small coal free from dirt. Also *churrels.* [Scotch.]

chirognomist (kī-rog′nō-mist), *n.* [*chirognom-y* + *-ist.*] One who tells fortunes or reads character by an inspection of the hand or the lines on it; a palmist.

chirograf, *n.* A simplified spelling of *chirograph.*

chirografy, *n.* A simplified spelling of *chirography.*

chirograph, *n.* 2. A contrivance for holding a beginner's hand in a prescribed position while he is learning to write.

chirographal (ki-rog′ra-fal), *a.* [*chirograph* + *-al*[1].] 1. Relating to chirography.—2. In one's own handwriting; autographic.

chirographary (kī-rog′ra-fā-ri), *a.* [ML. *chirographarius*, < *chirographum*, chirograph.] Of or pertaining to, or given in, one's own handwriting: as, a *chirographary* creditor, that is, one who holds an acknowledgment of indebtedness in the debtor's own handwriting.

chirol (kī′rōl), *n.* [Gr. *χείρ*, hand, + *-ol.*] An antiseptic varnish consisting of an ethereo-alcoholic solution of various antiseptic oils and resins.

chiromegaly (kī-rō-meg′a-li), *n.* [Gr. *χείρ*, hand, + *μεγαλία*, largeness.] Enlargement in all dimensions of the hands.

chirometer (kī-rom′e-tėr), *n.* [Gr. *χείρ*, hand, + *μέτρον*, measure.] An instrument used to measure slopes and angles of elevation, as the angle of elevation of a rifle, or the angle of heel when a ship rolls.

chironomid (kī-ron′ō-mid), *a.* and *n.* **I.** *a.* Of or belonging to the dipterous family *Chironomidæ.*

II. *n.* A member of the dipterous family *Chironomidæ.*

chiropodalgia (kī″rō-pō-dal′ji-ä), *n.* [NL., < Gr. *χείρ*, hand, + *ποῦς* (*ποδ-*), foot, + *ἄλγος*, pain.] Severe pains in the hands and feet occurring in acrodynia.

chiropodical (kī″rō-pod′i-kal), *a.* Of, pertaining to, or involving chiropody.

As we passed rapidly over a woodland space, . . . something hurt my foot, and taking off my shoe, I found that a small *chiropodical* operation was necessary.
Geo. MacDonald, Wilfred Cumbermede, xvii.

chiropodism (kī-rop′ō-dizm), *n.* [*chiropod-y* + *-ism.*] Same as *chiropody.*

chiropodistry (kī-rop′ō-dis-tri), *n.* [*chiropodist* + *-ry.*] Same as *chiropody.*

chiropodology (kī″rop-ō-dol′ō-ji), *n.* [Gr. *χείρ*, hand, + *ποῦς* (*ποδ-*), foot, + *-λογία*, < *λέγειν*, speak.] 1. Same as *chiropody.*—2. A treatise on, or the sum of knowledge regarding, chiropody.

chiropterophilous (kī″rop-te-rof′i-lus), *a.* [NL. *chiroptera*, bats, + Gr. *φιλεῖν*, love, + *-ous.*] In *bot.*, pollinated by the agency of bats.

Chirosaurus (kī-rō-sâ′rus), *n.* [Also *Cheirosaurus*: NL., < Gr. *χείρ*, hand, + *σαῦρος*, lizard.] Same as ★*Chirotherium.*

chirospasm (kī′rō-spazm), *n.* [Gr. *χείρ*, hand, + *σπασμός*, contraction: see *spasm.*] Same as *writers' cramp.*

Chirotherium (kī-rō-thē′ri-um), *n.* [Also *Cheirotherium:* NL., < Gr. *χείρ*, hand, + *θηρίον*, a wild beast.] An extinct reptile, or, as now supposed, a stegocephalian amphibian, whose usually five-toed tracks (indicating a large hind foot and smaller fore foot) occur in the Triassic sandstones of Germany and Great Britain. Also *Chirosaurus.*

Chirotrichidæ (kī-rō-trik′i-dē), *n. pl.* [NL., < *Chirothrix* (*-trich-*) + *-idæ.*] A family of extinct malacopterygian fishes known geologically from the Cretaceous period.

chirotype (kī′rō-tīp), *n.* [Gr. *χείρ*, hand, + *τύπος*, type.] A specimen upon which a manuscript name, or chironym, is based.

chirper, *n.* 2. A chirping cup; 'the cup that cheers.' [Colloq.]

> Hand up the *chirper!* ripe ale winks in it;
> Let's have comfort and be at peace.
> *G. Meredith*, Juggling Jerry, st. 11.

chirpiness (chėr′pi-nes), *n.* A chirpy state or quality; liveliness.

> He saluted us with a cricket-like *chirpiness* of manner.
> *W. D. Howells*, Italian Journeys, p. 248.

chirping (chėr′ping), *p. a.* 1. That which chirps (as a bird or cricket).—2. That which cheers or enlivens: as, a *chirping* cup or glass.—3. Merry; hilarious; lively.

> This carol plays, and has been in his days
> A *chirping* boy and kill-pot;
> Kit Cobbler it is, I'm a father of his,
> And he dwells in the lane called Fill-pot.
> *B. Jonson*, The Masque of Christmas, st. 8.

4. Talkative.

> He liked drink, too, which made him *chirping* and merry. *Thackeray*, Catherine, viii.

chirpling (chėrp′ling), *n.* [*chirp* + *-ling*[1].] A little chirper; a young bird. *N. E. D.*

chirr (chėr), *n.* [*chirr, v.*] A monotonous, sharp, stridulous sound such as that made by the cricket or cicada.

chirrup[2], *v.* I. *trans.* 2. To cheer or applaud (a public singer or the like, and for pay).—3. To produce or utter chirpingly.

> If part of their [ants'] building is destroyed, an official is seen coming out to examine the damage; and after a careful survey of the ruins, he *chirrups* a few clear and distinct notes.
> *Livingstone*, Exped. to Zambesi, ix.

II. *intrans.* 1. To produce with compressed lips and suction a sharp explosive chirping sound by way of greeting or pleasing an infant or a cage-bird, or of coaxing and encouraging a dog or a horse, etc.—2. To converse or sing in a lively manner or in sprightly tones.

> Then she is so accomplished—so sweet a voice—so expert at her harpsichord—. . . how she did *chirrup* at Mrs. Piano's concert! *Sheridan*, Rivals, ii. 1.

chirruper (chir′up-ėr), *n.* [*chirrup*[2], *v. t.*, 2, + *-er*[1].] One who chirrups or applauds; a professional applauder.

> Did poet or painter . . . ever have a *chirruper* in their employment? The players and singers in music-halls cannot, it seems, do without him. It is his generous office . . . to inaugurate the applause.
> *J. Payn*, in Illus. London News, March 17, 1888, p. 268.

chisel[2], *n.*—**Blacksmith's chisel,** a heavy hammer having a chisel-shaped peen.—**Box-chisel,** a double-bladed chisel for opening packing-boxes.—**Cow-mouthed chisel,** a round-nosed cold-chisel ground to a blunt angle, used for chipping hollows in metal.—**Mortising-machine chisel,** one of the special types of chisel used in power mortising-machines.

chiseled, *p. a.* 2. Shaped like a chisel: as, a crowbar with a *chiseled* edge.

chisel-edged (chiz′el-ejd), *a.* Having the shape of a wedge, with the cutting edge at the base: said of an arrow-head.

chiseler, chiseller (chiz′el-ėr), *n.* [*chisel*[2], *v.*, + *-er*[1].] One who works with a chisel; one who carves, cuts, or shapes with a chisel.

chisel-gage (chiz′el-gāj), *n.* A depth-gage adapted to a chisel: used in making slivers or chips in flooring where the chips are to be turned back again and glued down to hide a nail-head.

chiseling, chiselling (chiz′el-ing), *n.* Chiseled work.

> Do we not shun the street version of a fine melody?—or shrink from the news that the rarity—some bit of *chiselling* or engraving perhaps . . . is really not an uncommon thing, and may be obtained as an every day possession? *George Eliot*, Middlemarch, v. 47.

chiselmouth (chiz′el-mouth), *n.* A cyprinoid fish, *Acrocheilus alutaceus*, found in the lower Columbia river and its tributaries, as far up as Shoshone and Spokane Falls. Also called *chiselmouth jack.*

chisel-rod (chiz′el-rod), *n.* A steel rod rolled to a suitable section for the forging of cold or other chisels.

chit[1], *n.* 3. *pl.* Small rice.

> In the Carolina mills the [rice] product is divided into 'prime,' 'middling' (broken), 'small' or *chits*, and 'flour' or 'douse.' *F. L. Olmsted*, Seaboard Slave States, vii.

chit[2], *n.* 3. Also used attributively. See *chitty-faced*[2].

> But no thanks to that little jilting devil, Jenny Dennison, who deserves a tight skelping for trying to lead an honest lad into a scrape, just because he was so silly as to like her good-for-little *chit* face.
> *Scott*, Old Mortality, x.

chitarra (kē-tär′rä), *n.* [It.: see *cithara* and *guitar.*] An Italian musical instrument of the lute family, but with a flat back and wire strings, like the guitar. It was first used in the sixteenth century.

chitarrino (kē-tär-rē′nō), *n.* [It., dim. of *chitarra.*] A small chitarra, especially popular in Naples.

chitarrone (kē-tär-rō′ne), *n.* [It., aug. of *chitarra.*] A large chitarra, usually with a double neck, much extended, very similar to that of the theorbo and archlute. For a time from the latter part of the sixteenth century the chitarrone was much used as the bass instrument in groups of stringed instruments. The distinction between chitarrone and archlute is not always observed in usage. Properly the latter was a true lute, while the former was closer to the guitar.

Chitarrone.

> The *chitarrone* with its very long open bass strings dates from 1589 and was used in orchestras in 1607.
> *Science*, May 29, 1903, p. 870.

chitenidine (ki-ten′i-din), *n.* [*chiten(ine)* + *-id* + *-ine*[2].] A crystalline alkaloid, $C_{19}H_{22}O_4N_2 + 2H_2O$, formed by the oxidation of quinidine in an acid solution of potassium permanganate. It melts with decomposition at 246° C.

chitenine (kī′ten-in), *n.* [Appar. < *chi(na*[2]) + *-t* + *-en* + *-ine*[2].] A crystalline alkaloid, $C_{19}H_{22}O_4N_2 + 4H_2O$, formed by the oxidation of quinine sulphate with potassium permanganate. The anhydrous base melts at 228° C.

chitinous, *a.*—**Chitinous degeneration.** Same as *amyloid degeneration.*

chiton, *n.* 3. In *zoöl.*, an investing membrane or sheath.

Chitonelloidea (kī-tō-ne-loi′dē-ä), *n. pl.* [NL., < *Chitonellus* + *-oidea.*] A group of irregular chitons having the posterior valve funnel-shaped and the laminæ thrown forward. It contains the genera *Chitonellus* and *Choneplax.*

chitosamin (kī-tō-sam′in), *n.* [*chit(in)* + *-ose* + *amin(e).*] Same as ★*glucosamin.*

chitosan (kī′tō-san), *n.* [*chit(in)* + *-ose* + *-an.*] An amorphous compound, $C_{14}H_{26}O_{10}N_2$, obtained by heating chitin to 180° C. with a very concentrated solution of potassium hydroxid.

chitosarc (kī′tō-särk), *n.* [Gr. *χιτών*, chiton, + *σάρξ* (*σαρκ-*), flesh.] That region of the body of protozoans, as the *Sarcodina*, in which the shell is formed. *Wallich.*

chitose (kī′tōs), *n.* [*chit(in)* + *-ose.*] A simple sugar, $C_6H_{12}O_6$, obtained on oxidation of chitosamin (glucosamin).

chitter[1] (chit′ėr), *n.* [*chitter*[1], *v.*] The chattering or twittering of birds. *Mrs. Whitney.*

chittering-bite (chit′ėr-ing-bīt), *n.* A bit of bread eaten by boys who have been swimming, to prevent shivering or the chattering of their teeth with the cold; a shivering-bite. Also called *chittering-crust* and *chittering-piece.* [Scotch.]

chittering-crust (chit′ėr-ing-krust), *n.* Same as ★*chittering-bite.*

chittering-piece (chit′ėr-ing-pēs), *n.* Same as ★*chittering-bite.*

chiule (kē-ūl′), *n.* [ML. *chiula* (Nennius), *cyula* (Gildas), < AS. *cīol, cēol*, ON. *kiöll, kjöll*, a ship: see *keel*[1].] An artificial term representing a Middle Latin form, in medieval British historians, of the Anglo-Saxon and Norse name for a 'long ship' or ship of war.

chivalry, *n.*—**Age of chivalry,** the period, from the eleventh to the fourteenth century, during which the system of knightly military service, with all its privileges and its high ideals of valor, generosity, courtesy, etc., prevailed.—**The flower of chivalry,** the more illustrious portion or most illustrious member of any company of armed knights.

chivarras, chivarros (chē-vär′räs, -rōs), *n. pl.* [Mex. Sp.] Leggings. [Southwestern United States.]

chivo (chē′vō), *n.* [Sometimes erroneously read or written *chiro*; < Sp. *chibo*, a kid, in Cuba also a goat. Names of the goat are often transferred to fish.] A mulloid fish, *Upeneus grandisquamis*, found from Guaymas to Panama.

Ch. J. An abbreviation (*a*) of *chief justice*, (*b*) of *chief judge.*

Chlamydobacteriaceæ (klam″i-dō-bak-tē-ri-ā′sē-ē), *n. pl.* [NL. (Migula). < Gr. *χλαμύς* (*χλαμυδ-*), mantle, + *Bacteriaceæ.*] A family of filamentous bacteria consisting of rod-shaped cells surrounded by a distinct sheath. Reproduction is by means of either motile or non-motile spores.

Chlamydomonadidæ (klam″i-dō-mō-nad′i-dē), *n. pl.* [NL., < *Chlamydomonas* (*-nad-*) + *-idæ.*] A family of *Protozoa*, of the order *Phytoflagellida.* They have usually a greenish body with a delicate membranous shell, 1 or 2 contractile vacuoles at the base of the flagella, and a single stigma or eye-spot. This family includes the genera *Chlamydomonas, Chlorogonium, Polytoma, Hæmatococcus*, and others.

Chlamydomonadina (klam″i-dō-mon″ä-dī′nä), *n. pl.* [NL., < *Chlamydomonas* (*-nad-*) + *-ina.*] A suborder of flagellate *Protozoa*, of the order *Phytoflagellida*, including the families *Chlamydomonadidæ* and *Phacotidæ.*

Chlamydomonas (klam″i-dom′ō-nas), *n.* [NL., < Gr. *χλαμύς* (*-υδ-*), mantle, + *μονάς*, a unit.] The typical genus of the family *Chlamydomonadidæ. Ehrenberg*, 1834.

Chlamydothrix (kla-mid′ō thriks), *n.* [NL. (Migula, 1900) (in allusion to the sheathed filaments), < Gr. *χλαμύς* (*χλαμυδ-*), a mantle, + *θρίξ*, hair.] A genus of filamentous bacteria consisting of cylindrical cells arranged in non-motile, unbranched, sheathed filaments. Reproduction is by means of non-motile, spherical or ovoid spores, originating directly from the vegetative cells. *C. (Cladothrix) ochracea* is a common species occurring in water impregnated with iron. See *iron-bacteria*, under ★*bacterium.*

Chlamysporum (kla-mis′pō-rum), *n.* [NL., (Salisbury, 1808), < Gr. *χλαμύς*, mantle, + *σπορά*, seed. The seed of the type species is hooded by an aril.] A genus of monocotyledonous plants of the family *Liliaceæ.* The type species, *C. juncifolium*, is a native of Australia and is sometimes cultivated. See *Thysanotus.*

Chloasma cachecticorum, discoloration of the skin occurring in the subjects of chronic disease.—**Chloasma hepaticum,** liver-spots; cutaneous discolorations accompanying hepatic disorders. **Chloasma uterinum,** brownish-yellow patches on the skin occurring in pregnant women.

chloracid (klō-ras′id), *n.* [*chlor(in)* + *acid.*] In *chem.*, an acid of which the electro-negative radical is or contains chlorin.

Chloræmidæ, *n. pl.* See ★*chlorhæmidæ.*

Chloral camphor. See ★*camphor.*

chloral-acetophenonoxime (klō″ral-as″ē-tō-fen-ō-noks′im), *n.* Colorless prismatic crystals, $C_6H_5.CH_3.C=ON.CH.OH.CCl_3$, obtained by the interaction of chloral and acetophenonoxime at low temperatures. Upon contact with acids it decomposes into its components. Used in medicine in cases of epilepsy and tetanus.

chloralamide (klō-ral-am′id), *n.* [*choral* + *amide.*] A colorless crystalline compound, $CCl_3-CH<\begin{matrix}OH\\NH_2\end{matrix}$, obtained by conducting dry ammonia into a solution of chloral anhydrid in chloroform. It is an analgesic and hypnotic remedy. It is official in the U. S. Pharmacopœia (eighth edition) under the name *chloralformamidum.*

chloral-ammonium (klō″ral-a-mō′ni-um), *n.* A colorless, crystalline compound obtained by passing dry ammonia gas into a chloroformic solution of chloral. It is almost insoluble in water, but when boiled with water decomposes into chloroform and ammonium formate: used as an analgesic and hypnotic.

chloralic (klō-ral′ik), *a.* [*chloral* + *-ic.*] Derived from chloralose.—**Chloralic acid,** a crystalline acid, $C_7H_8Cl_3O_8$, formed by the oxidation of chloralose. It crystallizes in needles which melt at 212° C.

chloralimide (klō-ral-ī′mid), *n.* [*chloral* + *imide.*] A colorless crystalline powder, $(CCl_3CH=NH)_3$, obtained by heating chloral hydrate and dry ammonium acetate to boiling, and pouring into cold water. It is used as a hypnotic.

chloralose (klō′ral-ōs), *n.* [*chloral* + *-ose.*] A name given to two compounds, $C_8H_{11}O_6Cl_3$, formed by the union of chloral and glucose.

One is difficultly soluble in water, is tasteless, and melts at 230° C. The other is easily soluble, tastes bitter, and melts at 186° C. Chloralose is used as a hypnotic.

chloraloxime (klō-ral-ok'sim), *n.* A class of crystalline compounds, employed in medicine, obtained by the action of various oximes upon chloral: as chloral-acetaldoxime (CCl_3-CHO-CH_3.CH.N.OH), chloral-benzaldoxime (CCl_3.CHO-C_6H_5.CH.N.OH), chloral-acetoxime (CCl_3.CHO-$(CH_3)_2$.CN.OH), chloral-camphoroxime (CCl_3.CHO-$C_{10}H_{16}$.N.OH), and others. When heated with water these compounds decompose. They are used as hypnotics.

chloramine (klōr-am'in), *a.* [*chlor(in)* + *amine.*] Pertaining to an amine which contains chlorin.—**Chloramine ★brown, ★green, ★orange, ★yellow.** See the nouns.

chloramylite (klō-ram'i-līt), *n.* [Gr. *χλωρός*, green, + *ἀμυλον*, starch.] Chlorophyl granules derived from the transformation of starch. *Belzung.*

chloranemia (klō-ra-nē'mi-ä), *n.* [Also *chloroanemia*; NL. *chloronæmia* < Gr. *χλωρός*, green, + *ἀναιμία*, bloodlessness (see *anemia*).] In *med.*, same as *chlorosis.*

chloranemic (klō-ra-nem'ik), *a.* [*chloranemia* + *-ic.*] Same as *chlorotic. Buck*, Med. Handbook, VII. 608.

Chloranthaceæ (klō-ran-thā'sē-ē), *n. pl.* [NL. (Blume, 1830), < *Chloranthus* + *-aceæ.*] A family of dicotyledonous, archichlamydeous (largely achlamydeous) plants of the order *Piperales*, typified by the genus *Chloranthus*, and characterized mainly by the 1-3 stamens united with each other (when more than one) and with the ovary. There are 3 genera and about 33 species, natives of eastern Asia, India, the Pacific islands, and tropical America. They are herbs, shrubs, or trees with opposite stipulate leaves, and inconspicuous flowers in spikes or paniculate heads.

chloranthaceous (klō-ran-thā'shius), *a.* Belonging to the plant-family *Chloranthaceæ.*

chlorapatite (klōr-ap'a-tīt), *n.* [*chlor(in)* + *apatite.*] An apatite containing chlorin. The common varieties of apatite contain fluorin and are called *fluorapatites.* See *apatite.*

chlorate, *n.* Potassium and sodium chlorates are now manufactured on a large scale by electrolysis of strong solutions in water of the corresponding chlorids.

chloraurate (klōr-â'rāt), *n.* [*chlor(in)* + *aur(ic)* + *-ate*[1].] Same as ★*aurichlorid.*

chlorazol (klōr-az'ōl), *n.* [*chlor(in)* + *az(o)* + *-ol.*] A substance containing chlorin and one or more azo- and hydroxyl-groups.—**Chlorazol blue.** See ★*blue.*

Chlorella (klō-rel'ä), *n.* [NL. (Beyerinck, 1890), < Gr. *χλωρός*, greenish yellow, + dim. *-ella.*] A genus of unicellular grass-green algæ occurring in symbiotic relationship with *Hydra, Paramœcium, Ophrydium*, and similar forms; the 'yellow cell' of *Radiolaria.*

chloremia, chloræmia (klō-rē'mi-ä), *n.* [NL. *chloræmia*, < Gr. *χλωρός*, green, + *αἷμα*, blood.] Same as *chlorosis.*

chloretone (klō're-tōn), *n.* [*chlor(oform)* + *-et* + *-one.*] A colorless crystalline condensation-product, $(CH_3)_2 : C < \begin{matrix} OH \\ CCl_3 \end{matrix}$, of chloroform and acetone. It is hypnotic and antiseptic. Same as ★*acetone chloroform.*

The majority of deaths occurred in rabbits, after chloretone or urethane. The fatal dose for *chloretone* by stomach catheter, lies slightly above 16 cc. of a saturated solution per kilo. *Jour. Exper. Med.*, VI. 247.

Chlorhæma (klōr-hē'mä), *n.* [NL., irreg. < Gr. *χλωρός*, green, + *αἷμα*, blood.] The typical genus of the family *Chlorhæmidæ. Dujardin*, 1838.

Chlorhæmidæ, Chloræmidæ (klōr-hē'mi-dē, klō-rem'i-dē), *n. pl.* [NL., < *Chlorhæma* + *-idæ.*] A family of chætopod annelids, of the order *Polychæta*, having an elongated cylindrical body with green blood, the color being due to the presence of chlorocruorin. Also called *Pherusidæ.*

chlorhydrin (klōr-hī'drin), *n.* [*chlor(in)* + *hydr(ogen)* + *-in*[2].] A compound formed by replacing with chlorin one or more hydroxyl-groups in a compound containing several such groups, especially the compounds formed from glycerol in this manner: as *monochlorhydrin*, $CH_2OHCHOHCH_2Cl$; *trichlorhydrin*, $CH_2ClCHClCH_2Cl$.

chlorhydroquinone (klōr-hī-drō-kwin'ōn), *n.* [*chlor(in)* + *hydro(gen)* + *quinone.*] A colorless crystalline compound, $C_6H_3Cl(OH)_2$, made by treating quinone with concentrated hydrochloric acid. It melts at 106° C.

chlorid, *n.*—**Alkaline chlorid,** a compound obtained by the action of chlorin on alkaline bases.—**Chlorid emulsion.** See ★*emulsion.*—**Chlorid-of-gold cure.** Same as ★*gold-cure.*—**Chlorid paper, plate.** See ★*paper*, ★*plate.*—**Ethyl, ethylene, ethylidene, methyl, nitrogen, nitrosyl, stannic, stannous chlorid.** See ★*ethyl*, etc.

chloridation (klō-ri-dā'shon), *n.* The act of chloridizing or combining chemically with chlorin. Silver is chloridized for the purpose of transforming it from a refractory compound to a compound (AgCl) which can be dissolved by suitable reagents and the precious metal so recovered. The operation of chloridizing is usually carried on in a roasting-furnace. During the operation a small amount of ordinary table salt (NaCl) is mixed with the ore, and this reagent effects the chloridation of the silver.

chloriden (klō'ri-den), *n.* [*chlorid* + *-en* for *-ene.*] Ethylidene chlorid or ethidene bichlorid, CH_3CHCl_2.

chlorimetry (klō-rim'e-tri), *n.* Same as *chlorometry.*

chlorin, *n.* Chlorin is now obtained on a great scale by electrolysis of a solution of common salt, the Castner process being that chiefly used. See *Castner* ★*process.*—**Chlorin peroxid,** a dark-yellow gas, with a peculiar smell, obtained by cautiously warming potassium chlorate with strong sulphuric acid. It decomposes with violent explosion on being heated or on contact with organic substances.—**Chlorin water,** water containing chlorin in solution: used in analytical chemistry.

chlorinate (klō'ri-nāt), *n.* [*chlorin* + *-ate*[1].] A term sometimes applied to the soluble bleaching-compounds obtained from caustic soda or potash by the action of chlorin—Labarraque's fluid and Javelle water respectively.

chlorine[2] (klō'rīn or -rin), *a.* [Gr. *χλωρός*, light green, + *-ine*[1].] Of the color of young leaves; light green.

chloriniferous (klō-ri-nif'e-rus), *a.* [E. *chlorin* + L. *ferre*, bear.] Containing and capable of furnishing chlorin.

chlorinous (klō'ri-nus), *a.* [*chlorin* + *-ous.*] Related to or resembling chlorin: as, a *chlorinous* smell or taste.

chloris, *n.* **3.** Same as *flora*, 2 (*b*).—**4.** [*cap.*] [NL. (Swartz, 1788).] A genus of plants of the family *Poaceæ.* They are mostly perennials, with flowers in digitately arranged spikes. There are about 40 species, widely distributed in tropical and warm regions, variously known as *finger-grass, dog's-tooth grass, feather-grass, windmill-grass*, etc. Several species are cultivated as ornamental plants. See ★*finger-grass*, 3.

Chloritic marl, in *geol.*, a former designation of a division of the Lower Chalk of England.

chloritization (klō-ri-tī-zā'shon), *n.* [*chloritize* + *-ation.*] In *petrog.*, the alteration of minerals in a rock into chlorite.

chloritize (klō'ri-tīz), *v. i.*; pret. and pp. *chloritized*, ppr. *chloritizing.* [*chlorite* + *-ize.*] In *geol.*, to alter, as the ferromagnesian rock-forming silicates (augite, hornblende, biotite, etc.), into the secondary mineral, chlorite.

At both walls of each apophysis the essential and normally abundant bisilicates of the granite are absent or are represented by rare shreds or plates of *chloritized* biotite. *Amer. Jour. Sci.*, Aug., 1903, p. 123.

chloritous (klō-rī'tus), *a.* [*chlorite* + *-ous.*] Same as *chloritic.*

chlormethane (klōr-meth'ān), *n.* Same as ★*methyl chlorid.*

chloroanemia (klō″rō-a-nē'mi-ä), *n.* Same as ★*chloranemia.*

chlorobrom (klō'rō-brōm), *n.* A trade-name of a mixture of bromide of potassium and chloralamide in licorice-water, employed as a hypnotic and in seasickness.

chlorocarbon (klō-rō-kär'bon), *n.* Carbon tetra-chlorid, CCl_4.

chlorochromic (klō-rō-krō'mik), *a.* Obtained from chlorin and chromic acid.

Chlorococcaceæ (klō″ro-ko-kā'sē-ē), *n. pl.* [*Chlorococcum* + *-aceæ.*] A subfamily of the *Protococcaceæ* (which see).

Chlorococcum (klō-rō-kok'um), *n.* [NL., < Gr. *χλωρός*, green, + *κόκκος*, berry (spore).] A genus of grass-green algæ formerly called *Cystococcus* (which see).

chlorocruorin (klō-rō-krō'ō-rin), *n.* [Gr. *χλωρός*, green, + L. *cruor*, blood, + *-in*[2].] A green coloring-matter found in the blood of certain invertebrates.

chloroform, *n.*—**Acetone chloroform.** See ★*acetone.*—**Methyl chloroform,** the trade-name of 1,1,1- or α-trichlorethane, CH_3CCl_3, a colorless liquid prepared by the action of chlorin on ethyl chlorid. It boils at 74.5° C. and resembles chloroform in anesthetic properties.

chloroformamide (klō'rō-fôrm-am'id), *n.* [*chloroform* + *amide.*] Same as ★*carbamic chlorid.*

chlorogonidium (klō″rō-gō-nid'i-um), *n.*; pl. *chlorogonidia* (-ä). [NL., < Gr. *χλωρός*, green, + NL. *gonidium.*] A green gonidium, as of certain lichens. Compare *chrysogonidium.*

chlorohematin (klō-rō-hem'a-tin), *n.* [Gr. *χλωρός*, green, + E. *hematin.*] Same as ★*hemin.*

chlorol (klō'rol), *n.* [*chlor(in)* + *-ol.*] An aqueous solution containing 1 part each of mercuric chlorid, sodium chlorid, and hydrochloric acid, and 3 parts of copper sulphate: a disinfectant and deodorizer.

chlorometrical (klō-rō-met'ri-kal), *a.* Same as *chlorometric.*

Chloromonadina (klō″rō-mon-a-dī'nä), *n. pl.* [NL., < Gr. *χλωρός*, green, + *μονάς* (*μοναδ-*), a unit, + *-ina*[2].] A group or suborder of flagellate *Protozoa*, of the order *Phytoflagellida*, having the body somewhat plastic and without a distinct membrane, and with numerous discoid chromatophores but no stigmata. It includes the genera *Vacuolaria* and *Cœlomonas.*

Chloropeltina (klō″rō-pel-tī'nä), *n. pl.* [NL., < Gr. *χλωρός*, green, + *πέλτη*, shield, + *-ina*[2].] A family of euglenoid *Mastigophora*, of the order *Flagellata*, resembling *Euglena*, but having a thicker cuticle. It includes the genera *Phacus* and *Lepocinclis.*

chlorophanic (klō-rō-fan'ik), *a.* [*chlorophane* + *-ic.*] Pertaining to or derived from chlorophane.—**Chlorophanic acid,** a black crystalline organic acid obtained as a decomposition-product of chlorophane.

chlorophenin (klō-rō-fen'in), *n.* [*chlor(in)* + *phen(yl)* + *-in*[2].] A direct cotton coal-tar color. It is closely related to chloramine yellow.—**Chlorophenin orange.** See ★*orange.*

chlorophore (klō'rō-fōr), *n.* [Gr. *χλωρός*, green, + *-φορος*, < *φέρειν*, bear.] Same as *chromatophore.*

Chlorophyceæ (klō-rō-fī'sē-ē), *n. pl.* [Gr. *χλωρός*, grass-green, + *φῦκος* (*φυκ-*), seaweed, + *-eæ.*] One of the principal classes of the algæ containing the majority of the grass-green forms: formerly called *Confervoideæ, Confervaceæ*, and *Chlorosporeæ.*

chlorophyceous (klō-rō-fī'sē-us), *a.* In *bot.*, of or pertaining to the *Chlorophyceæ* or grass-green algæ.

Chlorophyl body, corpuscle, vesicle, a chlorophyl-grain or -granule.

chlorophyl-grain (klō'rō-fil-grān″), *n.* In *bot.*, one of the small bodies which bear the chlorophyl, the green coloring-matter of plants.

chlorophyl-granule (klō'rō-fil-gran″ūl), *n.* Same as ★*chlorophyl-grain.*

chlorophyllic (klō-rō-fil'ik), *a.* [*chlorophyl(l)* + *-ic.*] Of or pertaining to chlorophyl, the green coloring-matter of plants. *Simon*, Physiological Chem., p. 21.

chlorophyllin (klō-rō-fil'in), *n.* [*chlorophyl* + *-in*[2].] A chlorophyl-like coloring-substance found in the *Dinoflagellidia*; the green principle of chlorophyl.

chlorophyllose (klō-rō-fil'ōs), *a.* [*chlorophyl* + *-ose.*] Containing chlorophyl; chlorophyllaceous. *Science*, June 12, 1903, p. 936.

chlorophyr (klō'rō-fir), *n.* [Gr. *χλωρός*, light green, + (*por*)*phyr*(*y*).] In *petrog.*, a name given by A. Dumont (1850) to porphyritic diorite or diorite-porphyry with quartz and an orthorhombic pyroxene: found at Quenast and Lessines, Belgium.

chloroplast (klō'rō-plast), *n.* Same as *chloroplastid.*

chloroplastin (klō-rō-plas'tin), *n.* A proteid constituting the ground substance of the chlorophyl-granule. *Schwarz.*

chloroplatinate (klō-rō-plat'i-nāt), *n.* [*chlor(in)* + *platin-um* + *-ate*[1].] Same as ★*platinichlorid.* Sometimes incorrectly written *platinochlorid*, the name of a different compound: as, potassium *chloroplatinate*, K_2PtCl_6.

chloroplatinite (klō-rō-plat'i-nīt), *n.* [*chloroplatin-ic* + *-ite*[2].] A salt derived from chloroplatinous acid.—**Chloroplatinite process,** in *photog.*, a process in which paper sensitized by a mixture of potassium chloroplatinite and ferric oxalate is changed on exposure to light, the ferric salt being reduced to ferrous salt, which acts on the potassium chloroplatinite to liberate metallic platinum when the exposed paper is treated with a bath containing potassium oxalate.—**Potassium chloroplatinite,** a double salt of potassium and platinum, K_2PtCl_4, obtained as reddish deliquescent crystals, very soluble in water and slightly so in alcohol, by the reducing action of neutral potassium oxalate on a solution of platinic chlorid. This salt is employed in photography in the platinotype process.

chloroproteinochrome (klō-rō-prō-tē-in'ō-krōm), *n.* [E. *chlorin* + *protein* + Gr. *χρῶμα*, color.] A chlorin substitution-product of tryptophane.

Chlorops, *n.* 2. [*l. c.*] A fly of the genus *Chlorops.*—**Beet chlorops,** an American oscinid fly, *Chlorops assimilis,* whose larva mines the leaves of the sugar-beet.

chloropsia (klō-rop′si-ą), *n.* [NL., < Gr. *χλωρός,* green, + *ὄψις,* view.] In *pathol.,* a condition in which objects seen are of a green color.

chlororufin (klō-rō-rō′fin), *n.* [Gr. *χλωρός,* green, + L. *rufus,* red, + *-in*2.] The red pigment of the *Chlorophyceæ,* which is a reduced chlorophyl. *Rostafinski.*

chlorosarcoma (klō″rō-sär-kō′mą), *n.*; pl. *chlorosarcomata* (-mą-tą). [NL., < Gr. *χλωρός,* green, + *σάρκωμα,* sarcoma.] Same as *chloroma.*

chlorosis, *n.*—**False chlorosis,** the yellow condition induced in a plant by the water-logging of the roots.

chlorospinel (klō-rō-spin′el), *n.* [Gr. *χλωρός,* grass-green, + E. *spinel.*] A grass-green variety of spinel in which iron replaces part of the aluminium.

chlorotic, *a.* **II.** *n.* One who suffers from chlorosis. *Buck,* Med. Handbook, I. 644.

Chlorous oxid, a mixture of chlorin with chlorin peroxid: formerly believed to exist as a distinct oxid of chlorin.

chlorovaporization (klō″rō-vā″por-ī-zā′shon), *n.* [*chloro(phyl)* + *vaporization.*] In *bot.,* a process analogous to transpiration taking place in chlorophyl-granules. *Van Tieghem.*

chlorozincate (klō-rō-zing′kāt), *a.* [*chlor(id)* + *zinc* + *-ate*1.] In the case of creatinine, in combination with zinc chlorid: as, creatinine *chlorozincate.*

chlorozone (klōr-ō′zōn), *n.* [*chlor(in)* + *ozone.*] The trade-name of a bleaching material of essentially the same character as Labarraque's fluid, but in solid form. It contains 11 or 12 per cent. of sodium hypochlorite. *G. Lunge,* Sulphuric Acid, III. 490.

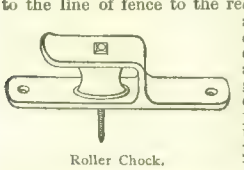
chlorsalol (klōr′sal″ol), *n.* A white crystalline compound, $C_6H_4(OH)CO.OC_6H_4Cl$, obtained by the action of phosphorus pentachlorid on a mixture of ortho- and para-chlorophenol; chlorophenol salicylate; salicylic-chlorophenol-ester. It is insoluble in water, but soluble in alcohol. It differs from salol in containing an atom of chlorin in place of one of hydrogen. It is used internally as an intestinal antiseptic.

chlorsulphic (klōr-sul′fik), *a.* [*chlor(in)* + *sulph(ur)* + *-ic.*] In *petrog.,* a term used in the quantitative classification of igneous rocks (see ★*rock*) to describe a subdivision of igneous rock magma having equal or nearly equal proportions of chlorin, Cl, and sulphur trioxid, SO_3. The proportions may vary within the limits, $\frac{Cl}{SO_3} < \frac{5}{3} > \frac{3}{5}$.

chlorutahlite (klōr-ū′tä-līt), *n.* [Gr. *χλωρός,* green, + *utahlite.*] Same as ★*utahlite.*

Chm. A little-used abbreviation of *chairman.*

Choanoflagellida (kō″ą-nō-flą-jel′i-dą), *n. pl.* [NL., < Gr. *χόανος,* a funnel, + L. *flagellum,* a whip (see *flagellum*), + *-ida.*] An order of *Protozoa,* of the class *Mastigophora,* having one or more collar-like processes about the base of the single flagellum. It includes the families *Phalansteridæ* and *Craspedomonadidæ.*



choca (chō′kä), *n.* [*choc(olate)* + *-a.*] A beverage made of coffee and chocolate mixed.

chocho (chō′chō), *n.* [W. Ind. Sp.] A name in the British West Indies and Australia of the cheyote. See *Sechium, cheyote,* and ★*christophine.*

chock4, *n.* 5. A block of wood, especially one for burning. See *chuck*4, 1. [Prov. Eng.]—6. A thick unsawed block of wood. See ★*chock and log.* [Australia.]—7. *pl.* Blocks of wood or stone placed on a harrow, roller, or other machine to give it weight or steadiness.—8. In *turnery,* same as *chuck*4, 5.—9. A rut-like hole in a road. [Prov. Eng.]—**Chock and log,** a kind of fence used on the great sheep and cattle stations or ranches of Australia, consisting of successive layers of rough-hewn logs resting at each end on notched chocks or blocks of wood placed at right angles to the line of fence to the required height. Also used attributively: as, a *chock-and-log* fence.—**Closed chock,** a chock having the arms united or closed together.—**Combination chock,** a chock having a pivoted arm that may be used to keep the rope from jumping out if the boat pitches.—**Roller chock,** a bowsprit chock having only one arm and supporting a roller or guide-roll for a rope.

Closed Chock.

Roller Chock.

chock4, *v. t.* 2. To check the motion of, as by a chock.

chock-block (chok′blok), *n.* A small wedge or block used to prevent a wheel or a log from rolling.

chocky (chok′i), *a.* [*chock* + *-y*1.] Full of chocks, ruts, or holes: as, a *chocky* road. [Prov. Eng.]

chocolate, *n.*—**Alizarin chocolate,** a chocolate-color obtained by applying alizarin with a mixture of aluminium and iron mordants: a term used chiefly by calico-printers. It is similar to alizarin puce.

chocolate-bean (chok′ō-lāt-bēn″), *n.* The seed of the cacao, *Theobroma Cacao.*

chocolatier (chok-ō-lą-tēr′), *n.* [F.] A chocolate-maker or -dealer.

choffer, *n.* A dialectal form of *chauffer.*

Choice oil. See ★*oil.*

choice-reaction (chois′rē-ak″shon), *n.* In *psychophys.,* a reaction in which the movement made in response to stimulus is the expression of an act of choice.

> We cannot pass from the sensorial reaction to the *choice-reaction* . . . at one step.
> *E. B. Titchener,* Primer of Psychol., p. 259.

choil (choil), *n.* [Origin obscure.] In *cutlery,* the indentation in the blade of a knife where it joins the tang.

choil (choil), *v. t.* To make a choil in (the blade of a knife).

choiler (choi′lėr), *n.* One who makes choils in knife-blades.

choir, *n.,* 3. (*b*) All that part of a cruciform church which is beyond, eastward of or farther from the main entrance than the transept; the eastern arm of the cross: so named because the choir proper (see def. 3) is usually in that part of the church and occupies nearly all of it. Thus, without reference to the interior, one may say of a great church that the choir is fourteenth-century work, while the nave and transepts remain twelfth-century, as at Tournai in Belgium.

5. A group of instruments of the same class or of related organ-stops, as a *trombone choir,* a *diapason choir,* etc.

choir-aisle (kwīr′īl), *n.* One of the aisles which flank the choir of a church. It often includes the deambulatory or passage around the chevet.

choir-book (kwīr′bůk), *n.* A book containing music for a choir or chorus.

choir-gallery (kwīr′gal″ę-ri), *n.* A gallery or balcony in a church where the choir is stationed, usually at the end of the building opposite the chancel or pulpit.

choir-leader (kwīr′lē″dėr), *n.* Same as ★*choir-master.*

choir-man (kwīr′mąn), *n.* A man who sings in a choir or chorus.

choirmaster (kwīr′mȧs-tėr), *n.* The trainer or leader of a choir or chorus; a kapellmeister, precentor, or cantor. Sometimes the offices of choirmaster and organist are separate, sometimes united.

choir-room (kwīr′röm), *n.* In a church or similar building, a room reserved for the use of the choir, as for practice, robing, etc.

choir-seats (kwīr′sēts), *n. pl.* The seats for the choir of a church, whether in the chancel, on a platform, or in a gallery: used collectively of the location of the singers in general.

choir-singer (kwīr′sing″ėr), *n.* One who sings in a choir or chorus.

choir-stall (kwīr′stâl), *n.* A seat built into the chancel or ritual choir of a church or cathedral for the use of singers or other officiants.

choka (chō′kä), *n.* [Bolivian.] A large and handsome species of water-hen (*Fulica gigas*) having dark metallic plumage and a red bill: common in the waters of Lake Titicaca and other mountain lakes of Bolivia and southeastern Peru.

chokage (chōk′ąj), *n.* [*choke* + *-age.*] A choked up or obstructed state.

choke1, *v.* **I.** *trans.*—**To choke the luff,** to jam the hauling part of a tackle close against the block so as to prevent it from rendering.

II. *intrans.* 3. To stop or cease working: said of electrical apparatus.

choke1, *n.* 4†. *pl.* Tonsillitis.—**Pharyngeal choke,** an obstruction in the pharynx of an animal.—**Thoracic choke,** an obstruction in the lumen of that portion of the esophagus which is within the chest cavity.

choke-coil (chōk′koil), *n.* In *elect.,* same as *reactive* ★*coil.*

choke-crushing (chōk′krush″ing), *n.* A method of operating crushing-rolls by feeding ore under pressure, so that the crushed material issues in a more or less solid band or cake. This produces an increased proportion of fine dust.

choker, *n.* 5. In *lumbering,* a noose of wire rope by which a log is dragged.

choker-man (chō′kėr-mąn), *n.* In *lumbering,* the man who fastens the choker on the logs.

choking-coil (chō′king-koil), *n.* A coil of many turns of insulated copper wire surrounding a heavy soft-iron core. When interposed in an electric circuit it allows steady currents to pass freely, but chokes off or greatly weakens all rapid fluctuations. It can be made more or less effective by altering the size of the core, or the depth to which it is inserted in the coil. See *reactive* ★*coil.*

cholangiostomy (kō-lan-ji-os′tǫ-mi), *n.* [Gr. *χολή,* bile, + *ἀγγεῖον,* vessel, + *στόμα,* mouth.] Incision into one of the bile-ducts through the substance of the liver for the purpose of liberating an impacted gall-stone.

cholangitis (kō-lan-jī′tis), *n.* Same as *cholangioitis.*

cholanic (kǫ-lan′ik), *a.* [*chol(ic)* + *-an* + *-ic.*] Derived from cholic acid.—**Cholanic acid,** a crystalline acid, $C_{24}H_{36}O_7$, obtained by the oxidation of either cholic or choleic acid. It melts at 285° C.

cholechloin, cholechlorin, *n.* See ★*cholochloin.*

cholechroin (kol-ē-krō′in), *n.* [Gr. *χολή,* bile, + *χρῶμα,* color, + *-in*2.] A mixture of biliverdin with other substances found in the bile.

cholechrome (kol′ē-krōm), *n.* [Prop. ★*cholochrome;* < Gr. *χολή,* bile, + *χρῶμα,* color. The proper combining form of Gr. *χολή,* bile, is *χολο-,* E. *cholo-.*] A reddish-yellow lipochrome found in the so-called livers of many invertebrates. Also called *hepatochrome.*

cholecyanine (kol-ē-sī′ą-nin), *n.* [Gr. *χολή,* bile, + *κύανος,* blue, + *-in*2.] Same as *bilicyanine.* See ★*cholocyanine.*

cholecystalgia (kol″ē-sis-tal′ji-ą), *n.* [Gr. *χολή,* bile, + *κύστις,* bladder, + *ἄλγος,* pain.] Biliary colic.

cholecystectomy (kol″ē-sis-tek′tǫ-mi), *n.* [Gr. *χολή,* bile, + *κύστις,* bladder, + *ἐκτομή,* excision.] In *surg.,* an incision into the gall-bladder.

cholecystocolostomy (kol″ē-sis″tǫ-kǫ-los′tǫ-mi), *n.* [Gr. *χολή,* gall, + *κύστις,* bladder, + *κόλον,* colon, + *στόμα,* mouth.] In *surg.,* the establishment of a permanent communication between the colon and the gall-bladder.

cholecystoduodenostomy (kol-ē-sis″tǫ-dū″ǫ-dē-nos′tǫ-mi), *n.* [Gr. *χολή,* gall, + *κύστις,* bladder, + NL. *duodenum* + Gr. *στόμα,* mouth.] In *surg.,* the establishment of a permanent direct communication between the duodenum and the gall-bladder.

cholecystorrhaphy (kol″ē-sis-tor′ą-fi), *n.* [Gr. *χολή,* gall, + *κύστις,* bladder, + *ῥαφή,* sewing.] In *surg.,* an incision into the gall-bladder and suture of the edges to the external wound.

cholecystostomy (kol″ē-sis-tos′tǫ-mi), *n.* [Gr. *χολή,* gall, + *κύστις,* bladder, + *στόμα,* mouth.] In *surg.,* the establishment of a permanent opening into the gall-bladder through the abdominal wall.

choledochitis (kol″ē-dǫ-kī′tis), *n.* [NL., < Gr. *χοληδόχος* (sc. *κύστις*), the gall-bladder (< *χολή,* gall, + *-δοχος,* < *δέχεσθαι,* receive), + *-itis.*] Inflammation of the common bile-duct.

choledochoduodenostomy (ko-led″ǫ-kō-dū″ǫ-dē-nos′tǫ-mi), *n.* [Gr. *χοληδόχος,* the gall-bladder, + NL. *duodenum* + Gr. *στόμα,* mouth.] In *surg.,* the establishment of a permanent communication between the common bile-duct and the small intestine. *Encyc. Brit.,* XXXIII. 78.

choledochoenterostomy (ko-led″ǫ-kō-en-te-ros′tǫ-mi), *n.* [Gr. *χοληδόχος,* the gall-bladder, + *ἔντερον,* intestine, + *στόμα,* mouth.] In *surg.,* the establishment of a permanent communication between the common bile-duct and the intestine.

choledocholithotomy (ko-led″ǫ-kō-li-thot′ǫ-mi), *n.* [Gr. *χοληδόχος,* the gall-bladder, + *λιθοτομία,* lithotomy.] In *surg.,* the removal of an impacted gall-stone from the common bile-duct.

choledochostomy (kol″ē-dǫ-kos′tǫ-mi), *n.* [Gr. *χοληδόχος,* gall-bladder, + *στόμα,* mouth.] In *surg.,* the establishment of a permanent opening into the common bile-duct through the abdominal wall.

choledochotomy (kol″ē-dǫ-kot′ǫ-mi), *n.* [Gr. *χοληδόχος,* gall-bladder, + *-τομία,* < *ταμεῖν,* cut.] In *surg.,* an incision into the common bile-duct.

cholefulvin, *n.* See ★*cholofulvin.*

choleglobin (kol-ē-glō′bin), *n.* [Gr. *χολή,* bile, + L. *globus,* globe, + *-in*2.] A supposed antecedent of bilirubin.

cholelith (kol'ē-lith), *n.* [Gr. *χολή*, gall, + *λίθος*, stone.] Same as *gall-stone.*

cholelithiasis (kol″ē-li-thī′a-sis), *n.* Same as *cholelithiasis.*

cholelithic (kol″ē-lith′ik), *a.* Same as *cholelithic.*

cholelithotomy (kol″ē-li-thot′ō-mi), *n.* [Gr. *χολή*, gall, + *λιθοτομία*, lithotomy.] In *surg.*, an operation for the removal of a gall stone.

choleocamphoric (kol″ē-ō-kam-for′ik), *a.* [*chol*(alic) + *camphoric.*] Related to cholalic acid and camphor.—**Choleo-camphoric acid**, an oxidation product of cholalic acid, $C_{10}H_{16}O_4$.

cholepoetic (kol″ē-pō-et′ik), *a.* [Gr. *χολή*, gall, bile, + *ποιητικός*, ‹ *ποιεῖν*, make. Cf. Gr. *χολοποιός*, forming bile.] Secreting bile. Also *cholepoietic.*

cholepoietic (kol″ē-poi-et′ik), *a.* Same as *cholepoetic.*

cholepyrrhin† (kol-ē-pir′in), *n.* [Gr. *χολή*, bile, + *πυρρός*, reddish, + *-in*².] Same as *bilirubin.*

cholera, *n.*—**Bilious cholera.** Same as ★*cholera nostras.*—**Buffalo cholera**, a fatal contagious disease of buffaloes, identical with the hemorrhagic septicemia of cattle. It is caused by a minute polar-stained organism of the swine-plague group. See also ★*barbone.*—**Cholera nostras**, sporadic cholera or cholera morbus, as distinguished from epidemic or Asiatic cholera.—**Cholera reaction**, the production of cholera-red by the addition of a mineral acid to filtered cholera-discharges.—**English cholera.** Same as *sporadic cholera.*—**Indian cholera.** Same as *Asiatic cholera.*—**Serous cholera.** Same as *Asiatic cholera.*—**Summer cholera.** Same as *cholera morbus* or *cholera infantum.*—**Typhoid cholera**, a malignant type of Asiatic cholera accompanied by extreme depression of the vital forces.

cholera-gnat (kol′e-rä-nat′), *n.* The turkey-gnat, *Simulium meridionale*, supposed to cause chicken-cholera. [U. S.] *Stand. Dict.*

choleraphobia (kol″e-rä-fō′bi-ä), *n.* [NL., prop. **cholerophobia*, ‹ Gr. *χολέρα*, cholera, + *-φοβία*, ‹ *φοβεῖν*, fear.] Extreme and unreasonable fear of contracting cholera. *Flint*, Principles of Med., p. 563.

cholera-red (kol″e-ra-red′), *n.* A red color which develops upon the addition of concentrated sulphuric acid to a bouillon or peptone culture of the cholera bacillus. It is referable primarily to the production of indol and nitrites during the growth of the organism, and the consequent formation of nitroso-indol upon the addition of the sulphuric acid. To the nitroso-indol the color is due.

choleric², *n.* and *a.*—**II.** *a.* Same as *choleraic. Syd. Soc. Lex.*

cholerigenous (kol-e-rij′e-nus), *a.* [Gr. *χολέρα*, cholera, + *-γενης*, -producing.] Producing cholera.

choleromania (kol″e-rō-mā′ni-ä), *n.* [NL., ‹ Gr. *χολέρα*, cholera, + *μανία*, madness.] A morbid dread of Asiatic cholera.

cholerythrin (kol-e-rith′rin), *n.* Same as *bilirubin.*

cholesteatomatous (kol″es-tē-a-tō′ma-tus), *a.* [*cholesteatoma*(*t-*) + *-ous.*] Pertaining to or of the nature of a cholesteatoma.

In this way there will usually be removed large quantities of pus, broken-down cells and *cholesteatomatous* material, leaving granulation tissue, softened bone and, frequently, much adherent epithelium.
Phil. Med. Jour., Jan. 31, 1903, p. 223.

cholestenic (kol-es-ten′ik), *a.* [*cholest*(*erin*) + *-en* + *-ic.*] Derived from cholesterol.—**Cholestenic acid**, a monobasic acid, $C_{25}H_{40}O_4$, or $C_{26}H_{42}O_4$, formed by the oxidation of cholesterol. It melts at 60–70° C.

cholesteric, *a.*—**Cholesteric acid.** (*b*) A crystalline tribasic acid, $C_{12}H_{16}O_7$, formed by the oxidation of cholic acid or of cholesterol. It loses carbon dioxid when heated above 100° C.

cholesteride (ko-les′tėr-id), *n.* [*cholester*(*in*) + *-ide.*] An ester of cholesterol with an acid; as *cholesteride palmitate*, $C_{16}H_{31}O_2.C_{27}H_{43}$.

cholesterilene (kol-es-ter′i-lēn), *n.* [*cholester*(*in*) + *-il* + *-ene.*] A hydrocarbon, $C_{27}H_{42}$, formed by heating cholesteryl chlorid with an alcoholic solution of sodium ethylate. It melts at 80° C.

cholesterilin (kol-es-ter′i-lin), *n.* [*cholester*(*in*) + *-il* + *-in*².] A hydrocarbon formed by the action of sulphuric acid on cholesterol. There are three forms, *α-* and *β*-cholesterilin, $C_{27}H_{42}$, and *γ*-cholesterilin, $(C_{27}H_{42})_2$.

cholesterinic (ko-les-tē-rin′ik), *a.* [*cholesterin* + *-ic.*] Pertaining to or derived from cholesterin.—**Cholesterinic acid**, an oxidation-product of cholesterin.

cholesterol (ko-les′tē-rōl), *n.* [*cholester*(*in*) + *-ol.*] Same as *cholesterin.* The termination *-ol* is used to indicate that chemically the substance belongs to the class of alcohols.

cholesterone (ko-les′tē-rōn), *n.* A name given to two compounds, one of which is probably cholesterilene and the other cholesteryl ether, $(C_{27}H_{43})_2O$.

cholesteryl (ko-les′tē-ril), *n.* [*cholester*(*in*) + *-yl.*] The $C_{26}H_{43}$ radical of cholesterin.

cholestrophan (ko-les′trō-fan), *n.* [Gr. *χολή*, bile, + *στροφή*, a turning, + *-an.*] Dimethyl-parabanic acid, $CO\langle \begin{matrix} N(CH_3) \\ | \\ N(CH_3) \end{matrix} \rangle CO$. It is formed by heating caffein with nitric acid. It melts at 145° C. and is not an acid.

choletelin (ko-let′e-lin), *n.* [Gr. *χολή*, bile, + *τέλος*, end, + *-in*².] A brown, amorphous compound found in normal urine, and also obtained by treating bilirubin with nitrous acid.

choliambist (kō-li-am′bist), *n.* [*choliamb* + *-ist.*] A writer of choliambs.

Not to mention the *choliambist* Hipponax, who seems to have been possessed with the devil of Archilochus, and in part also with his genius. *Grote*, Greece, IV. 97.

cholinic (ko-lin′ik), *a.* [*choline* + *-ic.*] Derived from the bile.—**Cholinic acid**, a name given by Berzelius to a resinous decomposition-product of ox-gall. It was probably a mixture.

cholla (chōl′yä), *n.* [Mex.] In the Southwestern United States and Mexico, a name

Cholla (*Opuntia fulgida*).

given to several species of *Opuntia* with stout cylindrical joints and abundant spines, such as *O. prolifera*, *O. Bigelovii*, and *O. Cholla*. One of the species, *O. fulgida*, often attains the dimensions of a small tree, and forms one of the most conspicuous objects of the Southern Arizona Desert. It is noted for its formidable armor of barbed spines almost hiding the surface of the plant. The flowers are pink, nearly or quite an inch across, succeeded by clusters of light green globose hanging fruits. Also called *cholla-cactus.*

cholo, *n.* 2. Any half-breed, but especially one of European and Indian descent.

cholochloin (kō-lok′lō-in), *n.* [Also *cholechloin*; ‹ Gr. *χολή*, bile, + *χλόη*, verdure, + *-in*².] The green pigment, also called *biliverdin*, *cholochlorin* and *cholechlorin*. See *biliverdin.*

cholochlorin (kol-ō-klō′rin), *n.* [Also *cholechlorin*; ‹ Gr. *χολή*, bile, + *χλωρός*, green, + *-in*².] Same as ★*cholochloin.*

cholocyanine (kol″ō-sī′a-nin), *n.* [Also *cholecyanine.* Gr. *χολή*, bile, + *κίανος*, blue, + *-in*².] A blue pigment derived from the bile and closely related to biliverdin. Same as *bilicyanin.*

cholofulvin (kol″ō-fūl′vin), *n.* [‹ Gr. *χολή*, bile, + L. *fulvus*, yellow, + *-in*².] A yellow pigment derived from the bile. Also *cholefulvin.*

chologenetic (kol″ō-jē-net′ik), *a.* [Gr. *χολή*, bile, + *-genetic.*] Producing bile.

All point to an arrest more or less complete of the *chologenetic* function of the liver.
Lancet, May 30, 1903, p. 1499.

cholohematin (kol-ō-hem′a-tin), *n.* [Gr. *χολή*, bile, + *αἷμα*(*τ-*), blood, + *-in*²: see *hematin.*] A pigment obtained from the bile of sheep or oxen. When dry it is green, but it forms an olive-brown solution in alcohol.

choloid (kol′oid), *a.* [Gr. *χολοειδής*, ‹ *χολή*, bile, + *εἶδος*, form.] Resembling bile.

Choloïdic acid, an acid formerly supposed to be intermediate between cholic acid and dyslysin, but now believed to be a mixture of the two.

choloïdinic (kol″ō-i-din′ik), *a.* Noting an acid, $C_{24}H_{38}O_4$, formed as an intermediary product during the transformation of cholalic acid into dyslysin.

chololith (kol′ō-lith), *n.* Same as ★*cholelith.*

cholology (kol-ol′ō-ji), *n.* [Gr. *χολή*, bile, + *-λογία*, ‹ *λέγειν*, speak.] The proper form for *choledology.*

cholonic (ko-lon′ik), *a.* [Gr. *χολή*, bile, + *-on-* + *-ic.*] Noting an acid, $(C_{26}H_{41}NO_5)$, an anhydride of glycocholic acid, which results from the latter on heating with concentrated sulphuric acid.

cholter-headed (chōl′tėr-hed″ed), *a.* [Also dial. *chowder-headed*: cf. *jolter-headed.*] Dull-minded; stupid. [Prov.]

choltry, *n.* 3. A pillared colonnade. [Anglo-Indian.]

cholum (chō′lum), *n.* [Tamil.] The Indian millet, African millet, Guinea-corn, or Kafir-corn, *Andropogon Sorghum.* See *durra*, and *Indian millet*, under *millet.*

chomatocephalus (kō″ma-tō-sef′a-lus), *n.* [Gr. *χῶμα*, a bank, mound, promontory, + *κεφαλή*, head.] In *anthrop.*, a very high, rounded cranium. *G. Sergi* (trans.), Var. of the Human Species, p. 44.

chondrarthrocace (kon-drär-throk′a-sē), *n.* [Gr. *χόνδρος*, cartilage, + *ἀρθρον*, joint, + *κάκη*, badness. Cf. *arthrocace.*] Disease of the articular cartilages.

chondre (kon′dėr), *n.* [F., ‹ NL. *chondrus.*] Same as *chondrus* or *chondrule.*

chondrenchyma (kon-dreng′kī-mä), *n.* [NL.] Same as *chondrenchyme.*

chondric (kon′drik), *a.* [Gr. *χόνδρος*, cartilage, + *-ic.*] Of or pertaining to cartilage; cartilaginous.

Chondrilla, *n.* 2. [NL. (Linnæus, 1753, adopted from Tournefort, 1700). The name alludes to the lumps of gum found on *Chondrilla juncea.*] A genus of plants of the family *Cichoriaceæ.* There are about 18 species, biennial or perennial herbs, natives of Europe and extratropical Asia, with rod-shaped, scantily leaved branches and yellow flowers. For the widely distributed *C. juncea*, the only species occurring in the United States, see *gum succory*, under *succory.*

chondrinogen (kon-drin′ō-jen), *n.* Same as *chondrigen.*

chondro-adenoma (kon″drō-ad-e-nō′mä), *n.*; pl. *chondro-adenomata* (-ma-tä). [NL., ‹ Gr. *χόνδρος*, cartilage, + *ἀδήν*, gland, + *-oma.*] A tumor which contains the elements of chondroma and adenoma.

chondro-angioma (kon″drō-an-ji-ō′mä), *n.*; pl. *chondro-angiomata* (-ma-tä). [NL., ‹ Gr. *χόνδρος*, cartilage, + *ἀγγεῖον*, vessel, + *-oma.*] A tumor which contains the elements of chondroma and angioma.

chondroblast (kon′drō-blast), *n.* [Gr. *χόνδρος*, cartilage, + *βλαστός*, germ.] A cell in embryonic tissue which later develops into cartilage.

chondroclast (kon′drō-klast), *n.* [Gr. *χόνδρος*, cartilage, + *κλαστός*, ‹ *κλᾶν*, break.] A cell which is concerned in the absorption of cartilage.

chondrocostal (kon-drō-kos′tal), *a.* [Gr. *χόνδρος*, cartilage, + L. *costa*, rib, + *-al.*] Of or pertaining to the cartilages of the ribs and to the ribs themselves.

chondroditic (kon-drō-dit′ik), *a.* Pertaining to or containing chondrodite.

chondrodystrophy (kon-drō-dis′trō-fi), *n.* [Gr. *χόνδρος*, cartilage, + *δυς-*, ill, + *τροφή*, nourishment (see *dystrophy*).] An arrest in the production and development of cartilage in the fetus and infant, resulting in dwarfism. *Med. Record*, June 27, 1903, p. 1046.

chondro-endothelioma (kon″drō-en″dō-thē-li-ō′mä), *n.*; pl. *chondro-endotheliomata* (-ma-tä). [NL., ‹ Gr. *χόνδρος*, cartilage, + NL., *endothelioma.*] A tumor which contains the elements of chondroma and endothelioma.

chondrofibroma (kon″drō-fī-brō′mä), *n.*; pl. *chondrofibromata* (-ma-tä). [NL., ‹ Gr. *χόνδρος*, cartilage, + NL. *fibroma.*] A tumor which contains the elements of chondroma and fibroma.

chondroglucose (kon-drō-glō′kōs), *n.* A difficultly crystallizable sugar of doubtful identity, which was obtained by the action of hydrochloric acid on chondrin.

chondroid, *a.*—**Chondroid cancer.** See ★*cancer.*

chondroitic (kon-drō-it′ik), *a.* [Irreg. ‹ Gr. *χόνδρος*, cartilage, + *-ite*² + *-ic.*] Relating to, derived from, or like cartilage.

chondroitin (kon-drō′i-tin), *n.* [*chondroit*(*ic*) + *-in*².] An organic substance, $(C_{18}H_{27}NO_{14})$, found in cartilage, in combination with sulphuric acid, as, chondroitin-sulphuric acid. On decomposition it gives rise to acetic acid and chondrosin.

chondrolipoma (kon″drō-li-pō′mä), *n.*; pl. *chondrolipomata* (-ma-tä). [NL., < Gr. *χόνδρος*, cartilage, + NL. *lipoma*, lipoma.] A tumor which contains the elements of chondroma and lipoma.

chondromalacia (kon″drō-ma-lā′si-ä), *n.* [NL., < Gr. *χόνδρος*, cartilage, + *μαλακία*, softening.] Softening of cartilage.

chondromucoid (kon-drō-mū′koid), *n.* [Gr. *χόνδρος*, cartilage, + *mucoid*.] A mixture consisting of chondroitin-sulphuric acid (namely, sulphates) in combination with albumins and collagen.

Chondromyces (kon-drom′i-sēz), *n.* [NL. (Berkeley, 1857), < Gr. *χόνδρος*, cartilage, + *μύκης*, a fungus (mushroom).] A genus of the *Myxobacteriaceæ* in which the rod-like bodies of the organism remain unmodified and form free cysts, either sessile or borne on a more or less highly developed cistophore. *C. crocatus*, which forms orange-colored colonies and produces pale straw-colored cysts, has been found, in America, on decaying rinds and old straw. See ★*Myxobacteriaceæ*.

chondromyoma (kon″drō-mī-ō′mä), *n.*; pl. *chondromyomata* (-ma-tä). [NL., < Gr. *χόνδρος*, cartilage, + *μῦς*, muscle, + *-oma*.] A tumor composed of muscular and cartilaginous elements.

chondromyxoma (kon″drō-mik-sō′mä), *n.*; pl. *chondromyxomata* (-ma-tä). [NL., < Gr. *χόνδρος*, cartilage, + *μύξα*, mucus, + *-oma*.] A tumor composed of cartilaginous and mucoid elements.

chondromyxosarcoma (kon″drō-mik″sō-sär-kō′mä), *n.*; pl. *chondromyxosarcomata* (-ma-tä). [Gr. *χόνδρος*, cartilage, + *μύξα*, mucus, + *σάρκωμα*, sarcoma.] A tumor which contains the elements of chondroma, myxoma, and sarcoma.

chondro-osseous (kon″drō-os′ē-us), *a.* [Gr. *χόνδρος*, cartilage, + L. *osseus*, bony.] Consisting of both cartilage and bone.

Chondrophora, *n. pl.* 2. *sing.* A genus of dicotyledonous, perennial herbs, which belong to the family *Compositæ*, and are characterized by their alternate, entire leaves and numerous, rayless heads of yellow flowers. One or two species are recognized natives of moist pine-lands in North America, from New Jersey to Florida and Texas. See *Bigelovia*.

chondrophore (kon′drō-fōr″), *n.* [NL., < Gr. *χόνδρος*, cartilage, + *-φόρος*, < *φέρειν*, bear.] In the pelecypod mollusks, a shelly, spoon-shaped plate developed in one or both valves within the umbonal region: it carries the chitinous internal ligament or resilium, through the action of which the valves are pressed apart.

Chondrophoridæ (kon-drō-for′i-dē), *n. pl.* [NL., < *chondrophorus* + *-idæ*.] A family of dibranchiate cephalopods having a proöstracum composed of conchiolin or of alternating layers of calcareous and organic matter. It includes a number of genera, all from the Jurassic rocks.

chondroplast (kon′drō-plast), *n.* [Gr. *χόνδρος*, cartilage, + *πλαστός*, < *πλάσσειν*, form.] A cartilage-cell developed from the cartilage-forming layer of the perichondrium.

chondrose (kon′drōs), *n.* [Gr. *χόνδρος*, cartilage, + *-ose*.] Same as ★*chondroglucose*.

chondrosidin (kon-dros′i-din), *n.* [*chondrose* + *-id*[1] + *-in*[2].] The hyalin corresponding to chondrosin.

chondrosin (kon′drō-sin), *n.* [Gr. *χόνδρος*, cartilage, + *-ose* + *-in*[2].] A decomposition-product of chondroitin, $C_{12}H_{21}NO_{11}$.

chondroskeleton (kon″drō-skel′e-ton), *n.* [NL., < Gr. *χόνδρος*, cartilage, + *σκελετόν*, skeleton.] A cartilaginous skeleton. See *chondrosteous*.

chondrostean (kon-dros′tē-an), *a.* [Gr. *χόνδρος*, cartilage, + *ὀστέον*, bone, + *-an*.] Of or pertaining to the *Chondrostei*, or cartilaginous ganoids, which include, among living forms, the paddle-fishes (*Polyodontidæ*) and sturgeons (*Acipenseridæ*). The skeleton is chiefly cartilaginous (the vertebral column entirely so), and the vertebral segments little developed and arranged along the notochord.

chondrosteoma (kon-dros-tē-ō′mä), *n.*; pl. *chondrosteomata* (ma-tä). [NL., < Gr. *χόνδρος*, cartilage, + *ὀστέον*, bone, + *-oma*.] An outgrowth of cartilage upon the periosteum which subsequently turns to bone, as the antler of a stag.

chondrosternal (kon″drō-stėr′nal), *a.* [Gr. *χόνδρος*, cartilage, + L. *sternum*, sternum.] Relating to both the sternum and the costal cartilages.

chondroxiphoid (kon-drok′si-foid), *a.* [Gr. *χόνδρος*, cartilage, + *ξιφοειδής*, sword-shaped (see *xiphoid*).] Relating to the xiphoid cartilage.

Chonetes (kō′nē-tēz), *n.* [NL., < Gr. *χώνη*, *χοάνη*, a funnel.] A genus of extinct brachiopods characterized by its thin valves which unite at a long straight hinge-line. Along the upper edge of this line the ventral valve bears a row of spines which are the exterior continuation of tubes leading through the substance of the valve from the internal shell cavity. The genus abounds in paleozoic rocks.

chonetiform (kō-net′i-fôrm), *a.* [*Chonetes* + L. *forma*, form.] Having the form or aspect of *Chonetes*, an extinct genus of brachiopods.

chonta (chōn′tä), *n.* [Quichua *chunta*, *chonta*, a general name for hard-wood palms.] 1. In Ecuador and Peru, the name of *Guilielma speciosa*, *Astrocaryum Chonta*, and other prickly, pinnately leaved palms with heavy hard black wood, which is used by the Indians of the Marañon and its tributaries for making spears, war-clubs, bows, and arrow-points.—2. A wooden hoe used in Peru and Bolivia; also, now an iron of similar shape.

C-hook (sē′hůk), *n.* In a harness, a pad-hook shaped like the letter C.

chop[1], *v. t.* 6. In *tennis*, *base-ball*, and other games, to strike (the ball) with a short, sharp, glancing stroke.—7. In *cricket*, to strike down hard, with a horizontal bat, a low ball on the off-side.—8. To cut into short pieces, as straw or silage material; to chaff: sometimes with *up*.—9. To dig, or dig out, by a downward stroke of the hoe, as opposed to a horizontal movement: often with *out*.

Ninety per cent of the growing [cotton] plants to be afterwards "*chopped*" *out*.
Yearbook U. S. Dept. Agr., 1901, p. 291.

Then hoed, not *chopped* but scraped, the hoe never being raised more than 18 inches from the ground.
U. S. Dept. Agr., The Cotton Plant, 1896, p. 239.

chop[1], *n.* 6. Material which has been chopped or chaffed. See ★*corn chop*.

Accustomed to cut rye and straw together and throw the "*chop*" back into a barn.
J. Wrightson, Farm and Fodder Crops, p. 199.

7. In *cricket*, a stroke in which the bat, held horizontally, is brought down hard upon a low ball on the off-side. *Hutchinson*, Cricket, p. 69.

chop[4], *n.*, 1. (*c*) An authenticated or authenticating writing or inscription.

In a Chinese temple . . . in Penang . . . I saw about fifty tortoises, belonging to five species; many of them had *chops* or Chinese characters stamped on their shells.
Proc. Zool. Soc. London, 1899, p. 609.

chopa[2] (chō′pä), *n.* [Sp. *chopa*, perhaps < L. *clupea*, a herring.] A name in the West Indies and elsewhere of many different fishes, especially of fishes of the genus *Cyphosus* (*Kyphosus*), as *chopa blanca* (*K. sectatrix*) of Bermuda (the Bermuda chub); *chopa amarilla* (*K. incisor*) of the West Indies; *K. elegans* of the tropical American coast of the Pacific; etc.

chopag (chō′päg), *n.* [Native name.] A name in Guam of *Ochrocarpus obovalis*, a littoral tree belonging to the family *Clusiaceæ*, yielding a hard fine-grained wood, suitable for cabinet work, and a red dye resembling that obtained from sapan-wood.

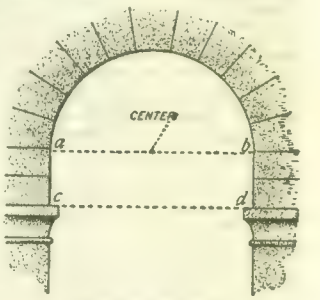
chop-chop (chop′chop), *interj.* [Remotely imitative.] Be quick; make haste. [Pidgin-Eng.]

chopper[4] (chop′ėr), *n.* [Also *chappor*, *chupper*, chuppar, < Hind. *chhappar*.] A thatched roof. See *chopper-cot* and ★*choppered*. [Anglo-Indian.]

These cottages had neat *choppers*, and some of them wanted not small gardens, fitly fenced about.
Mrs. Sherwood, Stories, p. 258. *Yule and Burnell*.

chopping-bowl (chop′ing-bōl″), *n.* A wooden bowl in which meat and other foods are chopped.

chopping-grate (chop′ing-grāt), *n.* A grate in which the bars are armed with projections which, when the bar is rotated on its axis, tear or break the cinder into fragments.



choppy[2], *a.* 2. Uncertain as to direction; subject to frequent and sudden change; unsteady: as, a *choppy* wind.—3. Irregular; unstable; fluctuating as to prices or rates: as, *choppy* markets.

chop-sticks, *n. pl.* 2. *sing.* In deep-sea fishing-tackle, a cross-stick, fastened to the line above the sinker, from which the short lines bearing the hooks are hung.

chop-suey (chop-sō′i), *n.* [Appar. formed (by English-speaking Chinese restaurant-keepers) from E. *chop*[1], + Chin. *sui*, bits, fragments, pieces, that is, meat, etc., chopped into small pieces and cooked.] A mixed dish served in Chinese restaurants in New York and elsewhere, as a Chinese dish (but apparently not known in China), consisting of some kind of meat (chicken, pork, beef), with vegetables (celery, onions, green bean sprouts, mushrooms, green peppers, etc.), cut small, seasoned, and cooked.

choragium (kō-rā′ji-um), *n.*; pl. *choragia* (-ä). [L. *chorāgium*, < Gr. *χορηγεῖον*, *χορηγιον*, < *χορηγός*, the leader of a chorus: see *choragus*.] 1. The school in which the chorus of the Greek drama was trained.—2. The space where the choral dance was performed.

chord, *n.*, 4. Written with a figured bass or so conceived, the first inversion of any common chord is known as the *chord of the sixth*, and the second inversion as the *chord of the fourth and sixth* or *of* 6-4. Similarly, the first inversion of any seventh chord is known as the *chord of the fifth and sixth* or *of* 6-5; the second inversion as the *chord of the third, fourth, and sixth* or *of* 6-4-3, or simply *of* 4-3; and the third inversion as the *chord of the second, fourth, and sixth* or *of* 6-4-2, or simply *of* 4-2 or *of* 2. (In all these cases the numerals indicate the intervals of the tones measured from the bass.) The *chord of the eleventh* is essentially like that of the ninth, but with an eleventh (from the root) added, and the *chord of the thirteenth* is like that of the eleventh, with a thirteenth added.—**Altered chord.** See ★*altered*.—**Characteristic chord.** Same as *tonic chord*.—**Chord of an arch,** the horizontal width of an arch, usually taken between the innermost surfaces on both sides; an imaginary horizontal line drawn from one impost to the other. The term is used very loosely. Thus, in the illustration, *ab*, passing through the center, and *cd*, below the center, but connecting the imposts, may each be called the *chord*, but this only in the case of true vertical imposts from *a* to *c* and *b* to *d*. See *stilted arch*, under *stilted*.—**Essential chord.** Same as *common chord* (which see, under *chord*, 4).—**Secondary chord** or **triad,** in *music*, a chord or triad of any kind when not based on the dominant, as contrasted with a *dominant chord* or *triad*; especially, the secondary chord of the seventh, a seventh chord based on some other tone than the dominant.—**Sensitive chord.** Same as *dominant chord*.

Chord of an Arch.

chorda-neuroplasm (kôr″dä-nū′rō-plazm), *n.* In *embryol.*, the common rudiment from which the chorda, or notochord, and the medullary, or neural plate arise during the development of the vertebrate embryo.

Chorda pistillaris, in *bot.*, the line of tissue leading from the stigma to the ovary.

chorditis (kôr-dī′tis), *n.* [NL., < Gr. *χορδή*, cord, + *-itis*.] Inflammation of a cord, as of one or both of the spermatic cords or of the vocal cords.

chordocentra (kôr-dō-sen′trä), *n. pl.* [NL., < Gr. *χορδή*, chord, + *κέντρον*, center.] Vertebral centra formed by the calcification of the notochord.

chordoid (kôr′doid), *a.* [L. *chorda*, a string, + Gr. *εἶδος*, form.] In *histol.*, having the peculiar vacuolated appearance of the cells which form the chorda dorsalis, or notochord, in the vertebrate embryo.

chordoma (kôr-dō′mä), *n.*; pl. *chordomata* (-ma-tä). [NL., < Gr. *χορδή*, cord, + *-oma*.] A tumor of peculiar formation sometimes found in the median line of the vermis of the cerebellum.

chordorrhizal (kôr-dō-rī′zal), *a.* [Gr. *χορδή*, string, cord, + *ῥίζα*, root, + *-al*[1].] In *bot.*, producing numerous successive flowering stems from the sides of the rootstock, as in *Carex chordorrhiza*.

chordoskeleton (kôr-dō-skel′e-ton), *n.* [L. *chorda*, string, + NL. *skeleton*.] In *embryol.*, that portion of the embryonic vertebrate skeleton which is formed around the chorda, or notochord; the embryonic spinal column and basis cranii.

chorea, *n.*—**Automatic chorea,** chorea in which the movements have the appearance of being voluntary.—**Chorea cordis,** chorea associated with extreme irregularity in the action of the heart.—**Chorea electrica,** a convulsive affection of childhood and early youth, marked by sudden muscular jerks of the neck and shoulders such as might be excited by the passage of a current of electricity.—**Chorea saltatoria,** a form of chorea marked by rhythmical leaping movements when the patient stands.—**Chorea senilis,** See *senile* ★*chorea*.—**Electric chorea.** See ★*chorea electrica*.—**Epidemic chorea,** the dancing mania of the middle ages.—**Facial chorea.** Same as ★*tic non-douloureux*.—**Hereditary** or **Huntington's chorea,** a disease affecting adults, often familial or hereditary, marked by mental disturbance tending toward dementia, disorders of speech, and choreic move-

ments.—**Huntington's chorea**. See *hereditary* ★*chorea*.—**Laryngeal chorea**, spasmodic contraction of the laryngeal muscles and muscles of respiration, giving rise to a peculiar short, sharp sound like the bark of a dog.—**Malleatory chorea**, a form of chorea in which the movements of the arms resemble those of a person using a hammer.—**Saltatory chorea**, a form of chorea marked by involuntary dancing or leaping.—**Senile chorea**. (*a*) A muscular tremor occurring in the aged. (*b*) Same as *paralysis agitans*.

choreatic (kō-rē-at'ik), *a.* [Irreg. < *chorea* + *-atic*2.] Same as *choreal*.

choreic. *a.* **II.** *n.* One who suffers from chorea. *Buck.* Med. Handbook, III. 42.

choreograph (kō'rē-ō-gràf), *n.* A choreographer; one who arranges a ballet.

choreographer (kō-rē-og'ra-fėr), *n.* The designer or arranger of a ballet.

choreographic (kō″rē-ō-graf'ik), *a.* Of or pertaining to choreography.

choreography (kō-rē-og'ra-fi), *n.* [See *chorography*2.] The art of designing and arranging dances, especially ballet-dances.

choreutes (kō-rū'tēz), *n.* [NL., < Gr. *χορευτής*, < *χορεύειν*, dance in a chorus, < *χορός*, a chorus: see *chorus*.] A choral dancer.

chorial (kō'ri-al), *a.* [*chorion* + *-al*1.] Of or pertaining to the chorion.

choriocapillary (kō″ri-ō-kap'i-lā-ri), *a.* [*chorion* + *capillary*.] Relating to the capillary vessels of the choroid coat of the eye. *Buck*, Med. Handbook, IV. 73.

choriocarcinoma (kō″ri-ō-kär″si-nō'mă), *n.*; pl. *choriocarcinomata* (-ma-tă). [NL., < *chorion* + *carcinoma*.] Same as ★*syncytioma*.

chorioid (kō'ri-oid), *a.* Same as *choroid*.

chorioiditis (kō″ri-oi-dī'tis), *n.* Same as *choroiditis*.

chorioma (kō-ri-ō'mă), *n.*; pl. *choriomata* (-ma-tă). [NL., < *chorion* + *-oma*.] Same as ★*deciduoma malignum*.

chorion, *n.* **3.** Same as *corium*.—**4.** In *bot.*, the pulpy matter which fills the young ovule and is absorbed during development. *Malpighi*.

chorionitis (kō″ri-ō-nī'tis), *n.* [NL., < *chorion* + *-itis*.] In *pathol.*: (*a*) Inflammation of the chorion, especially of the part in relation with the placenta. (*b*) Inflammation of the corium or true skin.

Chorioptes (kō-ri-op'tēz), *n.* [NL., appar. < Gr. *χόριον*, membrane, + *ὀπτ-* (in *ὀπτικός*, etc.), see.] A genus of acarines or mites.—**Chorioptes bovis**, an acarine or mite belonging to the family *Sarcoptidæ*; it is an external cutaneous parasite on cattle, causing chorioptic acariasis or mange. *Hering*, 1845.—**Chorioptes spathiferus**. Same as ★*Chorioptes bovis*. *Mégnin*, 1872.

Choripetalæ (kō-ri-pet'a-lē), *n. pl.* [NL., < Gr. *χωρίς*, separate, + *πέταλον*, leaf (petal).] A division of dicotyledonous archichlamydeous plants in which the corolla consists of separate petals coördinate with the *Apetalæ*. In modern systems of classification it virtually begins with the order *Ranales*, but the order *Chenopodiales*, next below, contains many choripetalous genera, and higher orders contain apetalous genera. Some authors make it include the *Apetalæ* and to be thus equivalent to the *Archichlamydeæ*. See *Apetalæ*, *Polypetalæ*, and ★*Archichlamydeæ*.

chorisis, *n.* **2.** In *geom.*, a number associated with a place which indicates how many different places it contains, such that a particle could not by an ordinary motion within it pass from one to another. A place which is continuously connected throughout is of chorisis 1, and in general the number of the chorisis is the number of separate places in which there is room for particles. The chorisis of all space is, of course, 1.

chorist, *n.* **2.** In *Gr. antiq.*, a member of the chorus.

> In the Lenæan festival of Athens one of his [Dionysius's] tragedies had been rewarded with the first prize. A *chorist* who had been employed in the performance . . . was the first to communicate the news.
> *Grote*, Greece, XI. ii. 46.

choristership (kor'is-tėr-ship), *n.* The office or function of a chorister.

Choristoceras (kor-is-tos'e-răs), *n.* [NL., < Gr. *χωριστός*, separated, + *κέρας*, a horn.] A genus of phylogerontic ammonoid cephalopods or ammonites, of the family *Choristoceratidæ*, in which the later volutions become uncoiled and the septal sutures are degenerate and simple. With other members of this family, it occurs in the Jurassic rocks.

Choristodera (kor″is-tod'e-rä), *n. pl.* [NL., < Gr. *χωριστός*, separated, + *δέρη*, *δειρή*, neck.] A suborder of *Rhynchocephalia* containing extinct reptiles of large size, with flattened vertebræ and teeth on palatines and pterygoids.

choristry (kor'is-tri), *n.* The singing of a choir or chorus; choral music.

> This that everywhere I hear,
> Rolling a sea of *choristry*
> Up and down the jewel of Heaven.
> *S. Dobell*, Harps of Heaven, l. 66.

Chorizema (kō-ri-zē'mă), *n.* [NL. (Labillardière, 1799), apparently < Gr. *χωρίζειν*, to separate. The allusion is to the distinctness of the stamens.] A genus of plants of the family *Fabaceæ*, consisting of about fifteen species, all Australian. They are shrubs of a diffuse or half-climbing habit, with thick and shining simple evergreen leaves and pea-like red or yellow flowers. *C. varium* and *C. ilicifolium* are two of the species grown in the United States as greenhouse subjects.

chorizont (kō'ri-zont), *n.*; pl. *chorizonts* (-zonts) or *chorizontes* (kō-ri-zon'tēz). [Gr. *χωρίζων* (pl. *χωρίζοντες*), a separator, ppr. of *χωρίζειν*, separate.] One of the ancient Greek grammarians who ascribed the Iliad and Odyssey to different authors; in a general sense, one who assumes or asserts separate authorship of works commonly ascribed to one author.

> The *Chorizontes*, so called because they separate the authorship of the Iliad from that of the Odyssey, found themselves mainly, (*a*) On supposed discrepancies in the mythology of the two Poems respectively; (*b*) On differences of manners and institutions; (*c*) On differences in the language. *Gladstone*, Juventus mundi, i.

chorizontal (kor-i-zon'tal), *a.* Pertaining to or characteristic of the ancient chorizonts; chorizont-like; separatist.

chorizontes, *n.* A plural of ★*chorizont*.

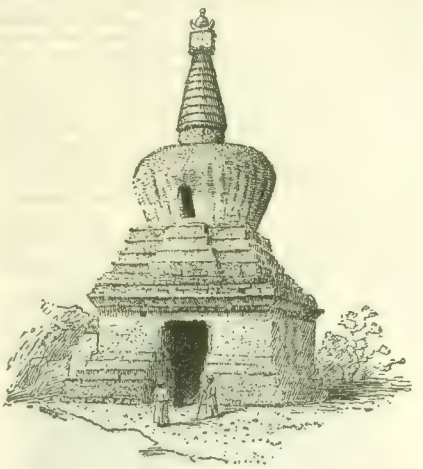
chorizontic (kor-i-zon'tik), *a.* Of or pertaining to the chorizonts or to their belief in the separate authorship of the Iliad and Odyssey.

> The Essayist adopts a *chorizontic* or separatist position, and an attempt is made to differentiate the Iliad from the Odyssey in age and authorship.
> *W. D. Geddes*, Homeric Poems, p. 15.

chorizontist (kor-i-zon'tist), *n.* One who favors the views of the chorizonts.

chorogi (chō'rō-gē), *n.* [Jap.] *Stachys Sieboldi* (also known as *S. tuberifera* and *S. affinis*), an erect, hairy plant belonging to the mint family: applied particularly to the small white tubers, which are two or three inches long and edible. The plant is also known by the French name *crosnes*. See *Stachys*. Also called *Chinese* or *Japanese artichoke*.

chorografy, *n.* A simplified spelling of *chorography*.



Choroid apoplexy. See ★*apoplexy*.

Choroiditis myopica, inflammation of the choroid due to the strain of defective vision unrelieved by glasses.

choroidocyclitis (kō-roi″dō-si-klī'tis), *n.* [NL., < *choroides*, choroid, + Gr. *κύκλος*, circle (of cilia), + *-itis*.] Inflammation of the choroid and ciliary body and the parts adjacent.

chorology, *n.*—**Marine chorology,** the scientific study of the distribution, especially the vertical distribution, of marine animals.

chorten (chor-ten'), *n.* [Also *ch'orten*; < Tibetan *chor-tén*, *chhö'-tén*, normally *chhod-tén*, lit. a receptacle for offerings, connected with *chód-pa*, offering, sacrifice.] In Tibet, a pyramidal structure of solid stone masonry which corresponds, as far as use is concerned, to the Indian chaitya or stupa. Originally intended to contain relics, they were also raised as cenotaphs in memory of a Buddha or of a Buddhist saint, and came to be regarded as themselves symbols of the Buddhist doctrine.

Tibetan Chorten.

chortle (chôr'tl), *v. i.*; pret. and pp. *chortled*, ppr. *chortling*. [A factitious word, humorously formed from *ch(uck)le* + *(sn)ort*. See ★*brunch-word*.] To exclaim exultingly, with a noisy chuckle: a vaguely suggestive word used in the first passage quoted, and since taken up by other writers in the sense defined.

> And hast thou slain the Jabberwock?
> Come to my arms, my beamish boy!
> O frabjous day! Callooh! Callay!
> He *chortled* in his joy.
> *Lewis Carroll*, Through the Looking-Glass (Jabberwocky, [st. 6).

> A stone cot . . . within which the two Americans hugged themselves and *chortled* in their joy continually "How very romantic we are!"
> *Outlook*, Feb. 1, 1896, p. 204.

chorus-singer (kō'rus-sing″ėr), *n.* One who sings in a chorus.

Chosen people. See *people*.

chota-hazri (chō'tä-häz″rē), *n.* [Hind. *chhotī-hāzarī*, little breakfast.] In India, a light early-morning refreshment served before breakfast: otherwise called *early tea*.

chou (shö), *n.*; pl. *choux* (shö). [F.: see *cole*2 and *cabbage*.] **1.** A cabbage.—**2.** In *dress-making*, a small, close rosette of any suitable material: so called from the crumpling of its loops of ribbon or lace, which resemble the crinkled leaves of a cabbage.

chough, *n.*—**Alpine chough,** one of the smaller crows, *Monedula pyrrhocorax* or *Pyrrhocorax alpinus*, related to the common *chough*, but smaller and with a yellow bill. It inhabits the mountainous regions of northern Europe. *Science*, Feb. 8, 1901, p. 232.

Chouteau limestone. See ★*limestone*.

chow6 (chou), *n.* [Origin obscure, but prob. supposed by the users to be Chinese.] A Chinaman. [Colloq., Australia.]

chowder-headed (chou'dėr-hed-ed), *a.* [Also *chouder-headed*.] A dialectal form of ★*cholter-headed*. *Scott*.

choze, *pp.* A simplified spelling of *chose*.

chozen, *p. a.* A simplified spelling of *chosen*.

chr. An abbreviation of *chrestomathy*.

Chr. An abbreviation (*a*) of *Christ*; (*b*) of *Christian*.

chrematist (krē'ma-tist), *n.* [Gr. *χρηματιστής*, a man of business, a money-getter, < *χρηματίζειν*, transact business. The Eng. use depends on *chrematistics*.] A political economist; a student of, or one who is versed in, chrematistics or the science of wealth.

> According to the *chrematists*, the wealth of a nation, as of an individual producer, is to be measured by the excess of the value of production over its cost.
> *Sismondi* (trans.) in Blackwood's Mag., LVII. 536.

chrestic (kres'tik), *a.* and *n.* [Gr. *χρηστικός*, able to use things, < *χρηστός*, adj. < *χρῆσθαι*, use.] **I.** *a.* Referring to skill in the use of implements, tools, and artificial instruments generally, as distinguished from the arts of designing and manufacturing such things.

II. *n.* That department of art and practical science which is concerned with skill in the use of artificial objects.

chrestomathics (kres-tō-math'iks), *n.* [Gr. *χρηστός*, useful, + *-μαθής*, < *μανθάνειν*, learn. Cf. *chrestomathy*.] The science of useful matters. [Rare.] *N. E. D.*

chrismatite (kriz'ma-tīt), *n.* [Gr. *χρῖσμα* (*χρισματ-*), ointment, + *-ite*2.] A semi-fluid or butter-like resin, found on crystals of calcite from Saxony. It varies in color from yellow to oil-green.

chrismatize (kriz'ma-tīz), *v. t.*; pret. and pp. *chrismatized*, ppr. *chrismatizing*. [Gr. *χρῖσμα* (*χρισματ-*), chrism, + *-ize*.] To anoint with holy oil; chrism.

> What spectacle could one behold more Antichristian? "To see a man in those Sacerdotal disguises, all of them consecrated and dedicated to the purpose, . . . whose churchyard is wholly by the consecration and benediction of sprinkled Holy-water, . . . nay whose very Bells of his Steeple are Christned and *Chrismatized* for the chasing the foul fiends out of the Aire at the departure of a Soul."
> *Dr. H. More*, Mystery of Iniquity, p. 62.

chrismon (kris'mon), *n.*; pl. *chrisma* (-mă). [A modern term, apparently formed from *Chris(t) mon(ogram)*.] A name given to a monogram found in the catacombs and in later use appearing in many forms, for example, ☧ or ✝, and consisting of the first two letters, XP, of the Greek word ΧΡΙΣΤΟΣ, *Χριστός*, Christ. Sometimes A (alpha) and Ω (omega) appear in the design. The date of its origin is unknown. The monogram appears with many variations and additions in royal signatures of the ninth and later centuries.

Christed (krīs'ted), *a.* [*Christ* + *-ed*2.] United with Christ by being completely possessed by

his spirit. The Familists in the seventeenth century used the expression to signify the deification which they imagined they attained by direct communion with the Deity.

christen, *v. t.* **5.** To engrave new names and marks on (stolen watches, silver plate, etc.) after obliterating the old, in order to prevent identification. [Thieves' cant.]

Christendie † (kris'n-di), *n.* [A var. of *Christenty*: see *Christianity.*] Christendom. *Burns.*

Christiad (kris'ti-ad), *n.* [*Christ* + *-iad* as in *Iliad.*] An epic of Christ.

Christian Catholic Church. See ★*catholic.*—**Christian Reformed Church,** a body that separated from the established church in Holland in 1834, endeavoring to maintain the old system of reformed doctrine. Numbers of this body emigrated to America in 1846 and settled in Michigan. The church in the United States has seven classes and one synod, with nearly 100 churches and 13,000 communicants. Its doctrine and polity are identical with those of the Reformed Church of America.—**Christian Science,** a system of religious teaching, based on the Scriptures, which originated with Mary Baker Eddy about 1866. Its most notable application is in the professed cure of disease by mental and spiritual means. —**Christian Scientist,** one who believes in Christian Science.—**Christian year.** Same as *ecclesiastical year.* —**Most Christian,** a title of the kings of France. —**United States Christian Commission,** an organization founded in the city of New York, November 14, 1861, for the purpose of supplementing the labors of the chaplains of the army and navy in caring for the spiritual needs of the Union forces during the Civil War (1861–65). See *United States Sanitary Commission,* under *sanitary.*

Christiana period. See ★*period.*

Christianizer (kris'tian-ī-zėr), *n.* **1.** One who converts to Christianity. — **2.** One who professes Christianity.

Christiansen's colors. See ★*color.*

Christic (kris'tik), *a.* [*Christ* + *-ic.*] Relating or pertaining to Christ. *J. W. Vale.*

Christlike (krīst'līk), *a.* Resembling Christ; in accordance with his spirit.

It would have been in glaring disaccord with the gentleness and moderation which is now shown, even towards absolute unbelievers, by the wisest, gentlest, and most *Christ-like* of God's saints.
F. W. Farrar, Early Days of Christianity, p. 500.

Christmas evergreen. See ★*evergreen.*—**Christmas green,** a trailing club-moss, *Lycopodium complanatum,* the flat, light-green fronds of which adapt it specially for Christmas decoration.—**Christmas tree.** (*b*) In Australia, the Christmas-bush; in New Zealand, the fire-tree or pohutukawa. These trees bloom at the Christmas season, and are used for decoration in the place of holly and other greens of the northern countries.

Christmas-berry (kris'mas-ber'i), *n.* The California holly or toyon, *Heteromeles arbutifolia,* a handsome evergreen shrub whose bright-red berries, contrasting with the shining green foliage, admirably adapt it for Christmas decoration.

Christmas-bush (kris'mas-bůsh), *n.* An Australian tree of the saxifrage family, *Ceratopetalum gummiferum.* It yields a fine-grained reddish wood used in turning and for toolhandles. Called also *Christmas tree* and *officer-bush.*

Christmassy (kris'mas-i), *a.* [*Christmas* + *-y*[1].] Christmas-like: as, *Christmassy* cheer; a *Christmassy* scene. [Colloq.]

Christologist (kris-tol'ō-jist), *n.* [*Christolog-y* + *-ist.*] One who is versed in Christology.

Another view . . . favored by several . . . modern *Christologists* is that Jesus was not entirely dead, but was revived from some form of trance.
Amer. Jour. Relig. Psychol. and Education, May, 1904, p. 54.

Christologize (kris-tol'ō-jīz), *v. t.*; pret. and pp. *Christologized;* ppr. *Christologizing.* To bring into relation with Christology.

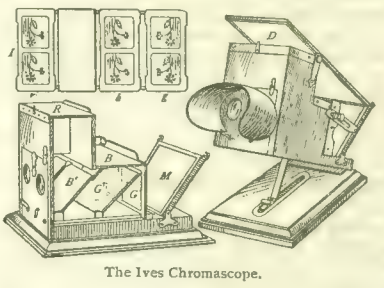
A constantly increasing number of persons are coming to the conviction that the results already reached by the Church in other departments of doctrine, require what Dr. Henry B. Smith affirmed to be a necessity—a *Christologizing* of Eschatology; and that when this is thoroughly done, the ultimate destiny of all men will be found to turn on their personal relation to God as revealed in Christ.
E. C. Smyth, in Homiletic Review, April, 1886, p. 288.

christophine (kris-tō-fēn'), *n.* [Creole F., from the name *Christophe,* Christopher.] A name in the West Indies of the cheyote, *Chayota edulis.* This name is the one used by the French-speaking creoles, while *chocho* is used by the English-speaking and *chayote* by the Spanish-speaking people. See *Sechium* and *cheyote.*

Christ's-eye (krīsts'ī), *n.* Same as *oculus Christi* (which see, under *oculus*).

chroatol (krō'a-tol), *n.* [Gr. *χρόα,* skin, + *-ate*[1] + *-ol.*] Terpeniodohydrate, $C_{10}H_{16}.2HI$. It forms greenish-yellow aromatic crystals, and is used as a dermal application.

chromacea (krō-mā'sē-ą), *n. pl.* [NL., < Gr. *χρῶμα,* color, + *-acea.*] A group of organisms of extreme simplicity, allied to the bacteria, and regarded by Haeckel as the oldest and most primitive of living beings.



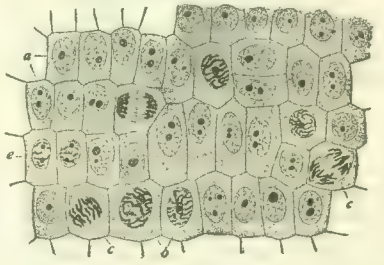
chromæsthesia (krō-mes-thē'si-ą), *n.* [NL., < Gr. *χρῶμα,* color, + *αἴσθησις,* perception.] **1.** The perception of color.— **2.** In *psychol.,* the constant association of colors with words, letters, musical tones, noises, etc. It is sometimes termed *pseudochromæsthesia,* the colors being 'imaginary.' The commonest form is 'colored hearing,' though chromæsthesia occurs in other departments of sense, for example, in taste and smell. It is probable that the tendency to chromæsthesia is, at least in many cases, congenital, preformed in the nervous system of the infant; though strongly affective experiences of actual association in early childhood may contribute largely to its realization. No wholly satisfactory explanation of the phenomena can at present be offered.

chromanil (krōm-an'il), *a.* [*chrom(ium)* + *anil(ine).*] Pertaining to chromium and aniline: applied to certain coal-tar colors that are usually after-treated with chromium.—**Chromanil black.** See ★*black.*

chromaphore (krō'mą-fōr), *n.* Same as *chromatophore.*

chromasciopticon (krō-mą-s ī-op'ti-kon), *n.* [NL. irreg. < Gr. *χρῶμα,* color, + *σκιά,* shadow, + *ὀπτικός,* < *ὀπτ-,* see: see *optic.*] An apparatus which throws shadows of various colors, used in the test for color-blindness. *Buck,* Med. Handbook, III. 211.

chromascope, *n.* **2.** In *photog.,* an apparatus devised by Ives in which the image of the object photographed is seen in colors. It consists of a stereoscopic camera provided with green, blue, and red transparent glasses marked *G, B,* and *R* respectively. *G′* and *B′* are green and blue transparent glasses placed at an angle of 45 degrees. A mirror, *M,* reflects light into the camera, while the ground-glass *D* serves to diffuse light. Three negatives are taken of the object by the use of blue, yellow, and red screens, and from these are printed three positives. These are shown mounted on hinges. (See Fig. *I.*) That marked *g* is inserted in a groove at *G,* while *b* and *r* rest on *B* and *R* respectively. When the apparatus is adjusted, the images of the three positives are superposed and the model is seen stereoscopically, remarkably reproduced in color.



The Ives Chromascope.

chromatic, *a.* **3.** In *cytol.,* of or pertaining to chromatin, the stainable substance of the cell-nucleus.

The equatorial *chromatic* wreath resolves itself into loops arranged with their closed ends directed inwards towards a central point and their free ends outwards. These loops undergo horizontal cleavage from looped to free end, and the looped ends pass along the surface of the spindle towards pole and antipole.
Encyc. Brit., XXV. 393.

Chromatic audition. See ★*audition.*—**Chromatic function,** the faculty of adjusting the color of the body to that of the environment. *Pouchet.*—**Chromatic granules,** granules in the cell which are easily stained by the usual dyes.—**Chromatic letter.** Same as *chromatic type.*—**Chromatic race,** that degree of kinship which is marked by the color of the skin and the type of the hair. The chromatic races usually distinguished by anthropologists are the white (Europeans), yellow (Asiatics), red (aboriginal Americans), brown (Pacific islanders), and black (Africans). Compare *ethnic* ★*race, glottic* ★*race,* and ★*cephalic race. Giddings,* Inductive Sociol., p. 53.—**Chromatic scale.** (*b*) In *painting,* a term used to express degree of intensity and contrast in color.

The painters of India, who have a truer feeling for color than many Persian artists, have greatly simplified the rich, sometimes too rich, *chromatic scale* of those miniatures, and have brought them back to a generally more sober tonality.
E. Blochet, in Burlington Mag., III. 279.

Chromatin.

General view of cells in the growing root-tip of the onion, from a longitudinal section, enlarged about 400 diameters. *a,* non-dividing cells, with chromatin-network and deeply stained nucleoli; *b,* nuclei preparing for division (spireme-stage); *c,* dividing cells showing mitotic figures; *e,* pair of daughter-cells shortly after division. (From Wilson's "The Cell.")

chromaticism (krō-mat'i-sizm), *n.* [*chromatic* + *-ism.*] In *music:* (*a*) The use of chromatic melodies or harmonies, especially when extended or excessive. (*b*) A chromatic melody, harmony, or passage.

Secular music had long displayed very free use of *chromaticisms* similar to the modern style of writing.
C. H. H. Parry, in Grove Dict. Music, I. 673.

chromaticity (krō-mą-tis'i-ti), *n.* [*chromatic* + *-ity.*] In *cytol.,* the state or amount of the chromatin contained in the cell-nucleus. *Jour. Roy. Micros. Soc.,* April, 1904, p. 169.

chromatin, *n.* **3.** In *cytol.,* that portion of the cell-nucleus in animals and plants which takes on a deep color in certain stains (carmine, hematoxylin, etc.): opposed to *achromatin.*

chromatinic (krō-mą-tin'ik), *a.* [*chromatin* + *-ic.*] Of or pertaining to the chromatin of the cell-nucleus.

The centrosome. . . . cannot be the bearer of the hereditary characteristics. Therefore, if present, the idioplasm must be looked for in the *chromatinic* element of the nucleus.
Buck, Med. Handbook, IV. 648.

chromatin-segment (krō'mą-tin-seg'ment), *n.* In *cytol.,* a piece or fragment of chromatin; a chromosome.

chromatoblast (krō-mat'ō-blȧst), *n.* Same as ★*chromoblast.*

chromatogen (krō-mat'ō-jen), *a.* [Gr. *χρῶμα(τ-),* col r, + *-γενής,* -producing.] Color-producing; chromatogenous.—**Chromatogen organ,** in *Echinoderma,* same as axial ★*organ.*

chromatograph, *n.* **2.** A colored print.

chromatograph (krō'mą-tō-grȧf), *v. t.* To represent in colors; do in colors.

Having been photographed, and stereographed, and *chromatographed,* or done in colors, it only remains to be phrenologized.
O. W. Holmes, Professor at the Breakfast-Table, viii.

chromatoid (krō'mą-toid), *a.* [Gr. *χρῶμα(τ-),* color, + *εἶδος,* form.] Having an affinity for dyes, or capable of being intensely stained: as, the *chromatoid* granules of the *Coccidiida. Calkins,* Protozoa, p. 144.

chromatokinopsia (krō″mą-tō-ki-nop'si-ą), *n.* [NL., < Gr. *χρῶμα(τ-),* color, + *κιν(εῖν).* move, + *ὄψις,* view.] In *psychol.,* the 'fluttering heart,' a visual illusion of movement. If a row of small blue circles is pasted on a strip of red cardboard, and the diagram, held in a dark corner of the room, is given a short to-and-fro motion in its own plane, the circles will appear to slip or spring from side to side. Better effects are obtained if the eye is adapted to darkness and a candle or low gas flame is used for illumination. *E. C. Sanford,* Exper. Psychol., p. 318.

chromatolysis (krō-mą-tol'i-sis), *n.* [NL., < Gr. *χρῶμα(τ-),* color (see *chromatin*), + *λύσις,* dissolution.] Dissolution of the nuclear chromatin: an evidence of coagulation necrosis on the part of cells. *Vaughan and Novy,* Cellular Toxins, p. 143.

chromatolytic (krō-mą-tō-lit'ik), *a.* Of or pertaining to chromatolysis, or the breaking down of the chromatin during the degeneration of cells.

chromatophil (krō-mat'ō-fil), *a.* and *n.* [Gr. *χρῶμα(τ-),* color + *φιλεῖν,* love.] **I.** *a.* Taking color easily; staining readily: said of cells and other histological elements.

II. *n.* A substance which stains readily.

chromatophilic (krō″mą-tō-fil'ik), *a.* Same as ★*chromatophil.*

chromatophilous (krō″mą-tof'i-lus), *a.* Same as ★*chromatophil, chromophilous.*

chromatophore, *n.* **4.** One of the colored masses of protoplasm found in *Protozoa.* It may be either a living part of the cell, as in *Mastigophora,* or a symbiotic alga inhabiting the body of the protozoan. *Calkins,* Protozoa, p. 117.—**Chromatophore system,** that portion of the nervous system of an animal which controls the movements of the chromatophores or pigment-cells.

chromatophoric (krō″mą-tō-for'ik), *a.* Possessing or relating to chromatophores. *Philos. Trans. Roy. Soc.* London, ser. B, 1904, p. 322.

chromatophoroma (krō″mą-tō-fō-rō'mą), *n.*; pl. *chromatophoromata* (-mą-tą). [*chromatophore* + *-oma.*] Melanoma; a pigmented sarcoma.

chromatoplasm (krō'mą-tō-plazm), *n.* [Gr. *χρῶμα,* color, + *πλάσμα,* anything formed.] In *bot.,* the protoplasm of coloring substances. *Strasburger.*

chromatoptometer (krō″mą-top-tom'e-tėr), *n.* [Gr. *χρῶμα,* color, + *ὀπτ-,* see, + *μέτρον,* measure.] An instrument constructed for ascertaining the development of the color-sense, particularly for the discovery of color-blindness.

chromatoptometry (krō″ma-top-tom′e-tri), *n.* Determination of the acuteness of color-vision by means of the chromatoptometer.

chromatosciameter (krō″ma-tō-sī-am′e-tėr), *n.* [Gr. *χρῶμα*, color, + *σκιά*, shadow, + *μέτρον*, a measure.] Same as ★*chromascioptícon.*

chromatoscopy (krō-ma-tos′kō-pi), *n.* [Gr. *χρῶμα*(*τ*-), color, + *-σκοπία*, ‹ *σκοπεῖν*, view.] The art or process of combining or comparing colors by means of the chromatoscope.

chromatosphérite (krō″ma-tō-sfēr′īt), *n.* [Gr. *χρῶμα*(*τ*-), color, + *σφαῖρα*, sphere, + *-ite*[2].] A deeply staining mass found in the nuclei of certain *Sporozoa.*

chromatrope[2] (krō′ma-trōp), *n.* [Of same formation as *chromatrope*[1].] One of a group of acid coal-tar colors: as, *chromatrope* 2*B*, 6*B*, 8*B*, 10*B*, *F*, *R*, 2*R*, *S*, *SB*, and *SR*. They are all related to dihydroxynaphthalene-disulphonic acid, and dye wool bright red to violet colors from an acid bath. They all give shades ranging from dark blue to black, when after-treated with potassium bichromate, and may therefore be classed as mordant-acid colors.

chromatroposcope (krō-ma-trop′ō-skōp), *n.* [Gr. *χρῶμα*, color, + *τρόπος*, a turn, + *σκοπεῖν*, view.] An apparatus consisting of a disk with apertures in front of colored surfaces, used in illustrating certain optical effects.

chrome emerald-green, fast yellow, tannage. See ★*green*[1], etc.

chrome, *v. t.*—**Chromed colors,** colors that are developed, or raised, by bichromate of potash.

chrome-black, *n.*—**Anthracene chrome-black,** a mordant-acid dyestuff derived from anthracene, which gives a very fast black when combined with a chromium mordant: used in wool-dyeing.—**Benzo chrome-black** a direct cotton coal-tar color of unpublished composition. It dyes unmordanted cotton black in a slightly alkaline salt bath and is rendered faster by an after-treatment with potassium bichromate and copper sulphate.

chrome-blue (krōm′blö), *n.* A mordant coal-tar color of the triphenyl-methane type. It dyes chromed wool blue, but is chiefly used in cotton-printing.

chrome-Bordeaux (krōm″bōr-dō′), *n.* A mordant coal-tar color, especially suited for calico-printing with an acetate-of-chromium mordanting principle.

chrome-brown (krōm′broun), *n.* A mordant coal-tar color of the monoazo type, related to pyrogallic acid. It dyes chromed wool brown and is used in calico-printing.

chrome-diopside (krōm″dī-op′sid), *n.* A variety of diopside containing chromium. It occurs with the diamond in South Africa and is also found elsewhere.

chrome-silver (krōm-sil′vėr), *n.* Same as *silver chromate:* used as a stain in preparing histological specimens for examination under the microscope.

chrome-spinel (krōm″spin′el), *n.* Same as *picotite.*

chrome-tan (krōm-tan′), *v. t.* To prepare by means of chrome tannage. *See* ★*tannage. Flemming,* Practical Tanning, p. 214.

chrome-violet (krōm-vī′ō-let), *n.* A mordant coal-tar color of the triphenyl-methane-carbinol type. It is used chiefly in calico-printing.

Chromic catgut. See ★*catgut.*—**Chromic myopia,** ability to distinguish colors near at hand, with color-blindness for distant objects.

chromicize (krō′mi-sīz), *v. t.* [*chromic* + *-ize.*] To impregnate with chromic acid: said of catgut which, when so treated, is less easily absorbed in the tissues. *Med. Record,* April 11, 1903, p. 563.

chromine (krō′min), *n.* [*chrom(ium)* + *-ine*[2].] A direct cotton coal-tar color derived from primulin.

chromiole (krō′mi-ōl), *n.* [NL. ★*chromiolum,* dim. ‹ Gr. *χρῶμα*, color.] In *cytol.*, a small fragment or granule of chromatin.

chromite, *n.* 2. Any compound of chromium sesquioxid with a monoxid of another metal.

Chromium dioxychlorid. Same as ★*chlorochromic acid.*

chromoartotypy (krō-mō-är′tō-tī-pi), *n.* [Gr. *χρῶμα*, color, + E. *artotypy.*] In *photog.*, a collographic process for obtaining prints in color. Four negatives are made, representing the red, blue, and yellow of the object and a neutral tint, suitable color-screens being used. From these negatives collotype plates are made and a print is obtained accurately reproducing the object.

chromoblast (krō′mō-blast), *n.* [Gr. *χρῶμα*, color, + *βλαστός*, germ.] A cell which produces pigment: a pigment-cell.

chromocollograph (krō-mō-kol′ō-graf), *n.* [Gr. *χρῶμα*, color, + E. *collograph.*] In *photog.*, same as ★*chromocollotype.*

chromocollographic (krō″mō-kol-ō-graf′ik), *a.* In *photog.*, of or pertaining to chromocollography.

chromocollography (krō″mō-ko-log′ra-fi), *n.* In *photog.*, a photomechanical process for obtaining prints in color, in which a gelatin-coated glass plate is used instead of the lithographic stone.

chromocollotype (krō-mō-kol′ō-tīp), *n.* [Gr. *χρῶμα*, color, + E. *collotype.*] A print in colors taken upon the lithographic printing-press from a gelatin surface hardened by bichromate of potash. Separate gelatin surfaces are needed for the three primary colors yellow, blue, and red. These colors are dissected by photography. Intermediate colors are produced by the careful selection of inks of required intensity and the skilful overlapping of the primary colors.

chromocrater (krō′mō-krā-tėr), *n.* [NL. *chromocrater,* ‹ Gr. *χρῶμα*, color, + *κρατήρ*, a large bowl.] In *pathol.*, a crater-shaped blood-corpuscle.

chromocyanine (krō-mō-sī′a-nin), *n.* [Gr. *χρῶμα*, color, + *κύανος*, blue, + *-ine*[2].] A mordant coal-tar color related to gallocyanine. It gives bright blues. Also called *brilliant gallocyanine.*

chromocyclite (krō-mō-sik′līt), *n.* [Gr. *χρῶμα*, color, + *κύκλος*, circle, + *-ite*[2].] A name given by Klein to a variety of apophyllite, the axial interference figure of which shows brightly colored rings. Another variety in which the rings are white and violet-black was early called *leucocyclite* by Herschel.

chromocytometer (krō″mō-sī-tom′e-tėr), *n.* [Gr. *χρῶμα*, color, + *κύτος*, a hollow (a cell), + *μέτρον*, a measure.] An instrument for ascertaining the number of the corpuscles and the amount of coloring-matter in blood.

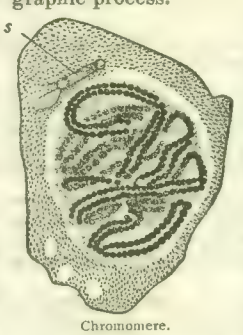
chromogen, *n.* 2. In *color-chemistry*, a compound containing a chromophorous group which is capable of being converted into a dyestuff by the introduction of a salt-forming group designated as an auxochromous group.

Benzene, for example, is colourless, whereas nitro-benzene and azo-benzene are yellow. Such compounds containing chromophorous groups are termed *chromogens,* because, although not dyestuffs themselves, they are capable of generating such by the further introduction of salt-forming atomic groups. *Encyc. Brit.*, XXVII. 564.

Chromogen I, a name sometimes given to dihydroxy-naphthalene-disodium sulphonate. It may be applied to wool in the same manner as an acid dyestuff, and upon subsequent oxidation with potassium bichromate a brown color is developed.

chromogenesis (krō-mō-jen′ē-sis), *n.* [Gr. *χρῶμα*, color, + *γένεσις*, production.] The production of color by minute organisms: particularly applied to bacteria.

chromogram (krō′mō-gram), *n.* [Gr. *χρῶμα*, color, + *γράμμα*, anything written.] **1.** A photograph in colors.



So long as an instrument [the photochromoscope] is needed to help in viewing *chromograms,* the popular appreciation of these will be limited.
Amer. Jour. Sci., Nov., 1895, p. 380.

2. In *photog.*, the assemblage of three monochrome positives which control the colored lights of an Ives ★chromascope (which see). *Wall,* Dict. of Photog., p. 138.

chromol (krō′mōl), *n.* [Gr. *χρῶμα*, color, + *-ol.*] A trade-name for a specially prepared fat-liquor. *C. T. Davis,* Manuf. of Leather, p. 244.

chromolith (krō′mō-lith), *n.* [Short for *chromolithograph.*] A chromolithograph.

chromolithotint (krō-mō-lith′ō-tint), *n.* A design printed in tints or pale colors by lithographic process.

Chromomere.
Spermatocyte of Salamander. Segmented double spireme-thread composed of chromomeres and completely split. Two centrosomes and central spindle at *s.* (Hermann.) (From Wilson's "The Cell.")

Next, ranks the recently issued history of the birds of Lombardy; the lithographs by Herr Oscar Dressler, superb, but the coloring (*chromo-lithotint*) poor.
Ruskin, Love's Meinie, I. [iii.

chromomere (krō′mō-mēr), *n.* [Gr. *χρῶμα*, color, + *μέρος*, part.] In *cytol.*, one of the minute chromatin granules which go to make a chromosome: same as an *id* of Weismann. *Buck,* Med. Handbook, I. 317.

chromometer (krō-mom′e-tėr), *n.* [Gr. *χρῶμα*, color, + *μέτρον*, measure.] An instrument for the determination of colors, as of petroleum and other oils, or, in another form, of metals by examination of their ores. See *chromatometer.*—**Stead's chromometer.** See *Stead's* ★*colorimeter.*

Chromomonadina (krō-mō-mon-a-dī′nä), *n. pl.* [NL., ‹ Gr. *χρῶμα*, color, + *μονάς* (*μοναδ-*), a unit, + *-ina*[2].] A group or suborder of flagellate *Protozoa*, of the order *Phytoflagellida.* It consists mostly of colonial organisms, with the bodies inclosed in a gelatinous mass or occupying cups, chromatophores, if present, yellow or yellowish brown, and the one or two flagella, if any, invariably directed forward. It includes the families *Chrysomonadidæ* and *Cryptomonadidæ.*

chromoparous (krō-mop′a-rus), *a.* [Gr. *χρῶμα*, color, + L. *parere*, produce.] A term applied to pigment-bacteria the coloring matter of which is not contained within the cell wall but is diffused between the individual organisms. See ★*chromophorous*, 2.

chromophil, chromophile (krō′mō-fil), *a.* and *n.* [Gr. *χρῶμα*, color, + *φιλεῖν*, love.] **I.** *a.* Chromophilous; same as ★*chromatophil.*

II. *n.* Any chromophilous substance, such as the granules in certain white blood-corpuscles.—**Niessl's chromophils,** certain bodies contained in the somatochromes which surround the nuclei of the nerve-cells of the gray matter.

chromophobe (krō′mō-fōb), *a.* [Gr. *χρῶμα*, color, + *-φοβος* ‹ *φοβεῖν*, fear.] In *histol.*, insusceptible to color-staining: opposed to ★*chromophil.*

chromophore (krō′mō-fôr), *n.* [Gr. *χρῶμα*, color, + *-φορος*, ‹ *φέρειν*, bear.] A chromophorous substance.

chromophoric (krō-mō-for′ik), *a.* Pertaining to a chromophore; chromophorous. *Athenæum,* July 15, 1893.

chromophorous, *a.* 2. Applied to pigment-bacteria when the color is within the cell. See ★*chromoparous.*

chromophotographic (krō″mō-fō-tō-graf′ik), *a.* Of or pertaining to chromophotography.

chromophototype (krō-mō-fō′tō-tīp), *n.* [Gr. *χρῶμα*, color, + E. *phototype.*] In *photog.*, a style of picture which results in applying various colors in place of the lampblack of the carbon process. *Wilson,* Cyc. of Photog., p. 85.

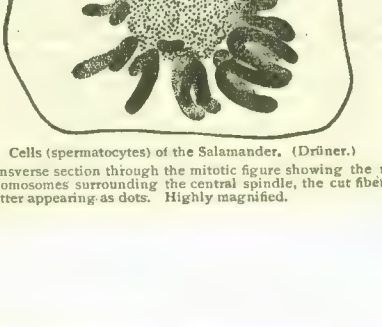
chromophyl, chromophyll (krō′mō-fil), *n.* [Gr. *χρῶμα*, color, + *φύλλον*, leaf.] **1.** Any coloring substance in plant cells.—**2.** A respiratory pigment having a special affinity for carbon dioxid, such as chlorophyl.

Under certain conditions the chloroplastid may likewise undergo a transformation into a yellow orange-colored body, known as a chromoplast, the pigment associated with it being called by the author, *chromophyl.* These plastid pigments are distinguished from all other plant colors by their solubility in such solvents as benzol, ether, volatile oils, etc. *Science,* May 6, 1904, p. 727.

chromophytosis (krō″mō-fi-tō′sis), *n.* [Gr. *χρῶμα*, color, + *φυτόν*, plant, + *-osis.*] Tinea versicolor (which see, under *tinea*).

chromoplasm (krō′mō-plazm), *n.* [Gr. *χρῶμα*, color, + *πλάσμα*, anything formed.] In *cytol.*, protoplasm which stains readily with certain dyes. Same as *karyoplasm.*

chromoplasmic (krō-mō-plaz′mik), *a.* Of or pertaining to chromoplasm.

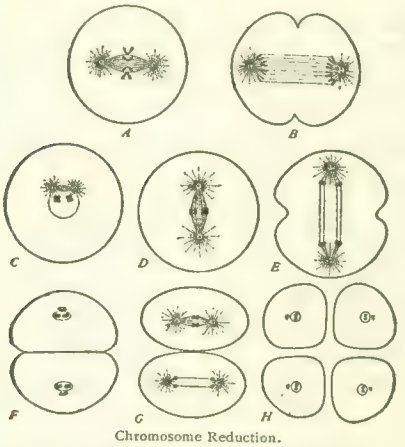


chromoproteid (krō-mō-prō′tē-id), *n.* [Gr. *χρῶμα*, color, + E. *proteid.*] A proteid in which an albuminous group is in combination with a pigment radical—for example, hemoglobin.

chromoptometer (krō-mop-tom′e-tėr), *n.* Same as ★*chromatoptometer.*

chromoptometrical (krō″mop-tō-met′ri-kal), *a.* Pertaining to or obtained by the use of a chromatoptometer.

chromoscope, *n.* See ★*chromascope*, 2.



chromosomal (krō-mō-sō′mal), *a.* [*chromosome* + *-al*[1].] Of or pertaining to the chromosomes.

Cells (spermatocytes) of the Salamander. (Drüner.)
Transverse section through the mitotic figure showing the ring of chromosomes surrounding the central spindle, the cut fibers of the latter appearing as dots. Highly magnified.

chromosomatic (krō″mō-sō-mat′ik), *a.* Same as ★*chromosomal.*

chromosome (krō′mō-sōm), *n.* [Gr. *χρῶμα*, color, + *σῶμα*, body.] In *cytol.*, one of the definite segments or pieces of chromatin of the cell-nucleus. The chromosome normally divides into two equal parts, by either longitudinal or transverse splitting, before or during cell-division, and each of the parts thus arising becomes a chromosome of a daughter-nucleus. The number of chromosomes in the cells of a given animal or plant appears to be definite and constant. See cut on p. 245.—**Bivalence of the chromosomes.** See ★*bivalence.*—**Chromosome reduction,** the process by which the number of chromosomes of the embryonic

Chromosome Reduction.

Figure to show reduction in the male as it occurs in the round worm of the horse, *Ascaris megalocephala*, var. *bivalens.*

A B, division of one of the spermatogonia, showing the full number (four) of chromosomes; *C*, primary spermatocyte preparing for division (the chromatin forms two tetrads); *D E F*, first division to form two secondary spermatocytes each of which receives two dyads; *G H*, division of the two secondary spermatocytes to form four spermatids. Each of the latter receives two single chromosomes and a centrosome which passes into the middle-piece of the spermatozoön. (From Wilson's "The Cell.")

germ-cells (oögonia and spermatogonia) is reduced by half in the egg (oötid) and spermatozoön (spermatid).

chromosomic (krō-mō-sō′mik), *a.* Same as ★*chromosomatic* and ★*chromosomal.*

chromotypy, *n.* 2. The art of printing in colors. This is done by the arts of typography and lithography, often in conjunction with photo-engraving. Distinct processes are common in each method. See *chromotype*, 3.

chromoxylograph (krō-mō-zil′ō-gràf), *n.* [Gr. *χρῶμα*, color, + *ξύλον*, wood, + *γράφειν*, write.] A pictorial print in colors, taken from blocks of wood engraved in high relief for the typographic press. As wood is liable to shrink and warp unequally on blocks of different colors, metal surfaces are now preferred.

chromyl (krō′mil), *n.* [*chrom(ium)* + *-yl.*] In *chem.*, chromium dioxid when regarded as a compound radical color: as, *chromyl* chlorid (CrO_2Cl_2).

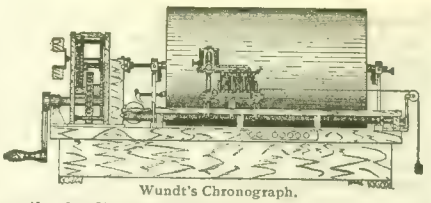
Chron. An abbreviation of *Chronicles.*

chron., chronol. Abbreviations (*a*) of *chronological;* (*b*) of *chronology.*

chronal (krō′nal), *a.* [Gr. *χρόνος*, time, + *-al*[1].] Relating to time; as regards time.

chronist (kron′ist), *n.* [Gr. *χρόνος*, time, + *-ist.*] A chronologer.

chronocrator (krō-nok′ra-tor), *n.* [Gr. *χρονοκράτωρ*, < *χρόνος*, time, + *-κράτωρ*, ruler, < *κρατεῖν*, rule.] In *mundane astrol.*, the lord of the year; the planet ruling the ascendant at the moment of the sun's ingress into Aries.



chronogenesis (kron-o-jen′e-sis), *n.* [Gr. *χρόνος*, time, + *γένεσις*, genesis.] The developmental history of a definite group of allied organisms.

No classification can be natural and permanent unless based on the history of the class (*chronogenesis*) and the ontogeny of the individual.

Zittel (trans.), Textbook of Paleon., I. 304.

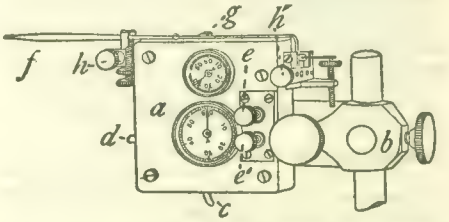
chronograf, *n.* A simplified spelling of *chronograph.*

chronograph, *n.*—**Drop-chronograph,** an instrument in which time-intervals are recorded in distances traversed by a body falling between vertical guides. It is used in ballistics and the study of explosives.—**Wundt's chronograph,** a recording chronograph, much used for exact time-records in psychological laboratories. It consists essentially of a horizontal drum, revolved by clockwork, and a carriage which travels along the drum upon an endless screw. The carriage holds a recording tuning-fork, accurately adjusted to give 500 vibrations per second, and three electromagnetic writing levers. The tuning-fork is actuated by way of a standard fork of 250 vibrations per second, and the simultaneity of movement of the three levers is checked by a specially constructed hammer. The chronograph may be employed for the reaction experiment; as a control of the Hipp chronoscope; for the determination of the temporal difference of ap-

Wundt's Chronograph.

parently simultaneous movements (for example, of the right and left hands); and, in short, for any purpose for which a precise record of brief intervals of time is required.

chronographic projector. See ★*projector.*



chronographical (kron-ō-graf′i-kal), *a.* Of or pertaining to chronology; chronological: as, a *chronographical* table.

chronographically (kron-ō-graf′i-kal-i), *adv.* 1. In chronological order.—2. By means of the chronograph: as, *chronographically* recorded.—3. In a chronogram: as, a date *chronographically* (or chronogrammatically) expressed.

chronoisotherm (kron-ō-ī′sō-thėrm), *n.* [Gr. *χρόνος*, time, + E. *isotherm.*] A diagram of lines showing the progress of temperature at any place; a thermal iso-pleth, showing by curves the hours and days when the same temperature occurs.

chronoisothermal (kron″ō-ī-sō-thėr′mal), *a.* [*chronoisotherm* + *-al*[1].] Of or pertaining to a chronoisotherm; relating to a method of indicating the relations between temperature and time.

Chronometer tables, tables which make it easy for a mariner in any latitude to determine the chronometer-correction from an observed altitude of the sun, without the usual tedious computation.—**D'Arsonval chronometer,** a portable and practically noiseless clockwork, recording time in units of 0.01 second, and controlled, like the Hipp chronoscope, by an electromagnet. The chronometer is sometimes used in psychological laboratories as a less expensive substitute for the Hipp chronoscope; it was primarily intended for the use of physicians in visiting their patients.—**Jacquet's recording chronometer,** a stop-watch, which may be either mechanically or electri-

Jacquet's Recording Chronometer.

a, watch-case, with minute- and second-dials; *b*, clamp for adjusting the chronometer, vertically or horizontally, upon the arm of the standard; *c*, lever for bringing the hands of the dials to zero; *d*, lever for starting and stopping the chronometer. The movement of starting makes electrical contact between the posts *e*, *e'*, so that the moment at which the observation begins can be exactly marked upon the drum; *f*, recording-lever; *g*, push-button for setting the record to seconds or fifths of a second; *h*, *h'*, binding-posts for the electric registration of time intervals at a distance from the instrument.

cally controlled, and which is furnished with a writing lever for the marking of seconds or fifths of a second on the moving surface of the kymograph.

chronometerer (kro-nom′e-tėr-ėr), *n.* One who by use of time-measuring apparatus, such as stop-watches, electric timers, chronographs, etc., is expert in measuring rates of speed, time-intervals, and time consumed in races, speed-trials, and similar events.

chrononomy (krō-non′ō-mi), *n.* [Gr. *χρόνος*, time, + *νόμος*, custom, law.] Method of reckoning time: as, the lunar *chrononomy* of the Chinese. *Max Müller.*

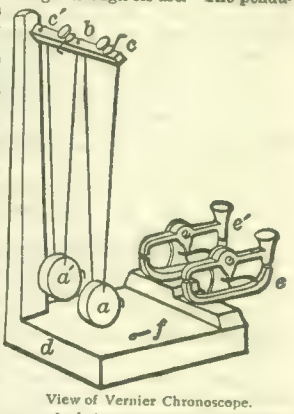
chronophotogram (kron-ō-fō′tō-gram), *n.* Same as ★*chronophotograph.*

chronophotograph (kron-ō-fō′tō-gràf), *n.* [Gr. *χρόνος*, time, + E. *photograph.*] In *photog.*, a single photograph of a series taken at equal intervals, usually on a moving film. These films are used in the cinematograph for the scientific investigation of a moving object.

2. A series of photographs representing phases of a cycle. (See cuts at *rack*, *run*, *trot*, and *walk.*)—3. An apparatus for obtaining a succession of photographs at regular intervals of time.

chronophotographic (kron-ō-fō-tō-graf′ik), *a.* [*chronophotograph* + *-ic.*] Pertaining to or connected with chronophotography.

By means of a *chronophotographic* apparatus, a series of pictures of the illuminated parts was taken, their appearance in the picture being that of dotted lines.



Nature, March 26, 1903, p. 487.

chronophotography (kron″ō-fō-tog′ra-fi), *n.* Continuous or kinetoscopic photography; the photographing of successive phases of a scene, movement, etc., at such short intervals that the whole is reproduced with apparent continuity.

A new method, which is called *chronophotography.* It was M. Janssen who first conceived the idea of taking automatically a series of photographic images in order to determine the successive positions at different times of the planet Venus in its passage across the sun. It was Janssen also who, in 1876, first suggested the idea of applying successive photograms to the study of animal locomotion. The analyzing of such movements was first accomplished by Muybridge, of San Francisco.

Science, Dec. 27, 1901, p. 991.

chronoscope, *n.*—**Gravity chronoscope,** in *psychophys.*, a time-measuring instrument, consisting of a heavy metal plate sliding vertically between posts, with electrical contacts so arranged that the plate, when released from a magnet at the top of the apparatus, at a certain point in its fall breaks and at a later point remakes an electric circuit. The gravity chronoscope was devised by J. McK. Cattell. It is frequently used in psychological laboratories for the control of the Hipp chronoscope.—**Münsterberg's chronoscope,** in *psychophys.*, a clock, recording time in units of 0.01 second, the hand of which can be started and stopped mechanically like that of a stop-watch. The instrument is used in psychological laboratories—for example, for the measurement of reaction-times—when the use of an electrically controlled chronoscope is unnecessary or inadvisable.—**Pendulum chronoscope,** in *psychophys.*, a time-measuring instrument, consisting of a heavy pendulum fitted with electrical contacts, by means of which it breaks and remakes an electric circuit as it swings through its arc. The pendulum chronoscope is sometimes employed, after standardization, in place of the Hipp chronoscope; sometimes it is used, like the gravity chronoscope, as a control of the Hipp instrument.—**Vernier chronoscope,** in *psychophys.*, an instrument for the measurement of reaction-times. The chronoscope, devised by E. C. Sanford, consists of two pendulums, whose periods of vibration are 0.8 and 0.78 seconds respectively, and of two release-keys. If the longer pendulum is released by a rap on the button of its key, and the shorter pendulum by a finger-movement made in response to the sound of this rap, the number of vibrations occurring before coincidence of the pendulum-swings represents the reaction-time in units of 0.8 – 0.78 seconds, or fiftieths of a second. The instrument can be adapted to various forms of the reaction experiment.

View of Vernier Chronoscope.

a and *a'*, brass pendulums suspended by inelastic threads from bar; *b*, bar; *c* and *c'*, set-screws holding threads fast to bar; *d*, cast-iron base; *e* and *e'*, release-keys; *f*, brass-wire hook, attached to counter-hook on pendulum *a*, released by pressure on button of key *e*.

chronoscopic (kron-ō-skop′ik), *a.* [*chronoscope* + *-ic.*] Of or pertaining to the chronoscope; measuring duration.

chronostichon (kron-os′ti-kon), *n.* A line of poetry containing a chronogram (which see).

chronothermal (kron-ō-thėr′mal), *a.* [Gr. *χρόνος*, time, + *θέρμη*, heat, + *al.*] Pertaining to temperature considered as a function of time.

chronotropism (krō-not′rō-pizm), *n.* [Gr. *χρόνος*, time, + *τρόπος*, a turn, + *-ism.*] Interference with the frequency of the heart's action. *Encyc. Brit.*, XXXI. 733.

chroöcoccaceous (krō″ō-ko-kā′shius), *a.* Resembling or allied to the alga *Chroöcoccus;* belonging to the family *Chroöcoccaceæ.*

chroöcoccoid (krō-ō-kok′oid), *a.* Resembling *Chroöcoccus.*

chrysalidal (kris-al′i-dal), *a.* [*chrysalis* (*-id-*) + *-al*[1].] Of, belonging to, or resembling a chrysalis.

chrysaline (kris′a-lin or -lin), *a.* [*chrysal(is)* + *-ine*[1]. The strict form would be *chrysalidine.*] Of or resembling a chrysalis. *N. E. D.*

chrysalism (kris′a-lizm), *n.* [Irreg. < *chrysal(is)* + *-ism.*] A chrysalis condition.

chrysalis-shell, *n.* 2. A land-snail of the genus *Pupa.*

chrysaloid (kris′a-loid), *a.* [Irreg. < *chrysal(is)* + *-oid.*] Like a chrysalis. *Lindley.*

Chrysamphora (kris-am′fō-rą), *n.* [NL. (Greene, 1891), < Gr. *χρυσός*, gold, + *ἀμφορεύς* (L. *amphora*), a jar.] A genus of dicotyledonous plants of the family *Sarraceniaceæ.* See *Darlingtonia.*

chrysanthemous (kri-san′thē-mus), *a.* Same as ★*chrysanthous.*

chrysanthemum-fly (kri-san″thē-mum-flī′), *n.* A cosmopolitan syrphid fly, *Eristalis tenax*. Also called *drone-fly* (which see).

chrysanthine (kri-san′thin), *a.* See ★*chrysanthous*.

chrysanthous (kri-san′thus), *a.* [Gr. χρυσός, gold, + ἄνθος, flower.] Having yellow flowers. Also *chrysanthemous* and *chrysanthine*.

Chrysaora (kri-sā′ō-rä), *n.* [NL., < Gr. χρυσάορος, also χρυσάωρ, with golden sword, < χρυσός, gold, + ἀορ, sword.] A genus of jellyfishes of the family *Pelagiadæ*, held by Haeckel to be transitional between *Pelagia* and *Dactylometra*.

chrysatropic (kris-a-trop′ik), *a.* [Gr. χρυσός, gold, + *Atropa* + *-ic*.] Derived from *Atropa Belladonna*.—**Chrysatropic acid.** Same as ★*scopoletin*.

chrysaurin (kris-â′rin), *n.* [Gr. χρυσός, gold, + L. *aurum*, gold, + *-in*[2].] An acid coal-tar color. Same as *orange II*. Also *chrysaureine*.

chrysean (kris′ē-an), *n.* [Gr. χρύσεος, golden, + *-an*.] A glistening yellow crystalline compound, $C_4H_5N_3S_2$, obtained by passing H_2S into a concentrated solution of KCN.

chryseinic (kris-ē-in′ik), *a.* Noting an acid, the sodium salt of 4-nitro-*a*-naphthol, $NO_2C_{10}H_6ONa$; also called *French yellow* and *Campobello yellow*.

chrysenic (kri-sēn′ik), *a.* [Gr. χρυσός, gold, + *-ene* + *-ic*.] Derived from chrysoquinone.—**Chrysenic acid,** 2-phenylnaphthalene-1-carboxylic acid, $C_6H_5.C_{10}H_6CO_2H$. It crystallizes in leaflets which melt at 186.5° C.

chryseoline (kris′ē-ō-lin), *n.* [Gr. χρύσεος, golden, + *-ol* + *-in*[2]. Cf. *chrysolin*.] Same as *tropæolin*.

chrysidine (kris′i-din), *n.* [Gr. χρυσός, gold, + *-id* + *-ine*[2].] A name given to two bases, $C_{17}H_{11}N$, obtained respectively by passing benzylidene-*a*- and *β*-naphthalene through a heated tube. The *a* base melts at 108° C., the *β* base at 131° C.

chrysin (kris′in), *n.* [Gr. χρυσός, gold, + *-in*[2].] A crystalline yellow phenol, $C_{15}H_{10}O_4$, found in various species of *Populus*.

chrysoaristocracy (kris″ō-ar-is-tok′ra-si), *n.* [Gr. χρυσός, gold, + ἀριστοκρατία, aristocracy.] The aristocracy of gold.

chrysocarpous (kris-ō-kär′pus), *a.* [Gr. χρυσός, gold, + καρπός, fruit.] Having yellow fruit.

chrysocetraric (kris″ō-sē-trar′ik), *a.* [Gr. χρυσός, gold, + *cetraria* + *-ic*.] Derived from cetraria.—**Chrysocetraric acid.** Same as ★*pinastric acid*.

chrysocrat (kris′ō-krat), *n.* [Gr. χρυσός, gold, + *-κρατης*, < κρατεῖν, rule.] 1. A plutocrat.—2. A supporter of the economic policy of making gold the monetary standard. [A newspaper usage.]

chrysocreatinine (kris″ō-krē-at′i-nin), *n.* [Gr. χρυσός, gold, + E. *creatinine*.] An orange-yellow, crystalline, poisonous alkaloid, $C_5H_8ON_4$, found in lean meat. It resembles creatinine.

chrysogen (kris′ō-jen), *n.* [Gr. χρυσός, gold, + *-γενης*, - produced.] An orange-colored hydrocarbon of unknown composition found in crude anthracene. It melts at 280–290° C. and is almost insoluble in benzene and glacial acetic acid.

chrysolite, *n.* 2. Goldstone. See *aventurin*, 1.

> Nay, had she been true,
> If heaven would make me such another world
> Of one entire and perfect *chrysolite*,
> I 'ld not have sold her for it.
>
> *Shak.*, Othello, v. 2.

Ceylonese chrysolite, a jeweler's name for yellowish-green tourmalin from Ceylon.—**Saxon chrysolite,** a dark variety of true topaz from Schneckenstein, in the Saxon Vogtland.

Chrysomela, *n.*—**Cloaked Chrysomela,** an American chrysomelid beetle, *Glyptoscelis crypticus*, which devours the foliage of apple and oak.

Chrysomyxa (kris-ō-miks′ä), *n.* [NL. (Unger, 1840), < Gr. χρυσός, gold, + μύξα, slime.] A genus of fungi of the order *Uredinales*. The æcidia are produced on leaves of conifers, the uredospores and teleutospores on ericaceous plants. *C. Ledi* is a widely distributed species.

chrysophanate (kri-sof′a-nāt), *n.* [*chrysophan* + *-ate*[1].] A salt of chrysophan.—**Bismuth chrysophanate,** an amorphous yellow-colored compound of chrysarobin and bismuth hydroxid, $Bi(C_{15}H_9O_4)_3Bi_2O_3$. It is antiseptic for skin-diseases. Also called *dermol*.

chrysophanin (kri-sof′a-nin), *n.* [*chrysophan* + *-in*[2].] A bitter substance found in senna-leaves.

Chrysophanus (kri-sof′a-nus), *n.* [NL., < Gr. χρυσοφανής, shining like gold: see *chrysophan*.] A widespread genus of lycænid butterflies. Only one species, *C. thoi* Boisduval, occurs in the United States. It is found only in the more eastern States.

chrysophenin, chrysophenine (kris-of′e-nin), *n.* [Gr. χρυσός, gold, + *phen(yl)* + *-in*[2].] A direct cotton coal-tar color of the disazo type, related to stilbene. It dyes unmordanted cotton in a salt bath. It is very fast.

chrysophilist (kri-sof′i-list), *n.* Same as *chrysophilite*.

Chrysophlyctis (kris-ō-flik′tis), *n.* [NL. (Schilbersky, 1896), < Gr. χρυσός, gold, + φλυκτίς, blister.] A genus of chytridiaceous fungi, so named from its yellow vesicular zoösporangia. The mycelium is lacking. Swarm-spores and resting-spores are produced in the interior of the host (endobiotic). *C. endobiotica*, the only species, is said to cause a rot or chytridiose of potato tubers in Hungary.

chrysopoëtic (kris″ō-pō-et′ik), *a.* [Gr. χρυσός, gold, + ποιητικός, < ποιεῖν, make.] Capable of producing gold from base materials, as was assumed by the alchemists to be possible. *Southey*.

chrysopoëtics (kris-ō-pō-et′iks), *n.* The imagined art of producing gold from base materials, as was attempted by alchemists.

chrysoprase, *n.* 2. The ancient name of a golden-green precious stone, now generally believed to have been a variety of the beryl or possibly a green variety of fluor-spar (chlorophane), which possesses the property of shining in the dark or by the heat of the hand.

Chrysops, *n.* 2. [*l. c.*] An insect of the genus *Chrysops*.—**Blinding chrysops,** a European dipterous insect, *Chrysops cæcutiens*, of the family *Tabanidæ*: so called because it seems to prefer to bite animals around the eyes. *Jour. Trop. Med.*, Jan. 15, 1903, p. 26.

chrysoretin (kris-ō-rē′tin), *n.* [Gr. χρυσός, gold, + ῥητίνη, resin.] A name given by Bley and Diesel to a yellow resin obtained from senna-leaves. Later investigations showed that this is closely related to chrysophanic acid.

chrysosplene (kris′ō-splēn), *n.* [*Chrysosplenium*.] A plant of the genus *Chrysosplenium*; golden saxifrage.

chrysostomic (kris-ō-stom′ik), *a.* [Gr. χρυσόστομος, golden-mouthed, applied to popular orators (as in the surname *Chrysostom*), < χρυσός, gold, + στόμα, mouth.] Golden-mouthed; eloquent.

Chrysothamnus (kris-ō-tham′nus), *n.* [NL. (Nuttall, 1840), < Gr. χρυσός, gold, + θάμνος, bush.] A genus of dicotyledonous plants of the family *Asteraceæ*. There are about 25 species, natives of western North America, low-branching shrubs with linear, entire leaves, and clusters of golden-yellow flowers.

chrysotoluazin (kris″ō-tol-ū-az′in), *n.* [Gr. χρυσός, gold, + E. *tolu* + *az(ote)* + *-ine*[2].] A base formed by the condensation of chrysoquinone with 3, 4-toluylene diamine. It crystallizes in yellow needles which melt at 176° C.

chrysotoxin (kris-ō-tok′sin), *n.* [Gr. χρυσός, gold, + τοξ(ικόν), poison, + *-in*[2].] A supposed chemical principle, said to be one of the active constituents of ergot (*Claviceps purpurea*).

chrysotype (kris′ō-tīp), *n.* [Gr. χρυσός, gold, + τίπος, type.] In *photog.*: (*a*) A photographic process in which paper sensitized by ferric ammonium citrate is exposed behind a negative and the picture is developed by a neutral solution of gold chlorid and fixed by potassium iodide. The process is due to Sir John Herschel. (*b*) A picture made by this process.

cht. An abbreviation of *chest* (in plural *chts*).

chthonography (thō-nog′ra-fi), *n.* [Gr. χθών, earth, + *-γραφία*, < γράφειν, write.] A descriptive treatise upon soils. *Syd. Soc. Lex.*

chub, *n.*—**Indian chub.** Same as *hornyhead*.

Chubb lock. See ★*lock*[1].

chub-headed (chub′hed″ed), *a.* Having a large, thick head.

chuck[3], *n.* 3. In *cricket*, a ball thrown instead of bowled.

chuck[3], *v. t.* 3. In *lawn-bowls*, to strike (a counting ball) out of range, or to strike (a ball of one's own side) into a counting position.

chuck[3] (chuk), *adv.* [*chuck*[3], *v.*] With full force; so as to hit; closely.

> Our progress was rather a devious one; . . . now getting into a sharp trot, and then suddenly pulling up at a dead stop, or running the machine *chuck* against a wall, to enable us to stand still and gain breath.
>
> *Lever*, Charles O'Malley, lxviii.

chuck[4], *n.* 6. The part of a beef-animal that lies between the neck and the shoulder-blade: used as a roast.—**Geometric chuck,** a form of holder for work in the face-plate of a lathe, by which the work receives two or more motions besides the primary rotation of the plate. Such aggregation of motions causes the point of the tool to describe epicyclic curves or other geometric curves on the work: used to produce the tracery on watch-cases and the fine curved ornamental lines in dies for postage-stamps or bank-bills.—**Magnetic chuck,** a chuck in which the attractive force of an electromagnet is used to hold castings of steel or iron, drop-forgings, disks, saws, dies, scales, etc., while they are in process of finishing in a lathe, grinder, or other machine-tool. The most simple form is an electromagnetic table fitted with a cable and a switch for conveying and controlling the current. The casting is laid on the table, and, when the current is turned on, is held in place by it under all ordinary strains while in the machine-tool. The action of the chuck is automatic, the current being supplied at the instant the grinding-wheel starts, and the articles being released from the chuck when the motor stops. Articles placed in a magnetic chuck are afterward placed upon a ★demagnetizer (which see).—**Split chuck,** a form of chuck or holder for thin disks of metal which are to be turned or finished on their faces. A hollow cup-shaped cylinder with parallel walls is split along the walls at two or more elements, the disk inserted in place being held by the edges when a ring outside the cup draws the walls together upon the disk.—**Upright chuck,** an angle bolted to a face-plate; a wooden chuck having a pair of slotted jaws, used for holding work which would not be held conveniently in the ordinary or hollow form.

chuck-block (chuk′blok), *n.* In *gold-milling*, a wooden block placed under the screen-frame of the mortar of a stamp-battery to permit adjustment of the screen as the dies wear, and thus maintain the proper height of the discharge-opening.

chuck-button (chuk′but″n), *n.* The game of pitch-and-toss played with buttons.

chucker[2] (chuk′ėr), *n.* In *cricket*, a bowler who is inclined to throw the ball instead of bowling it. [Colloq.]

chucker-luck. See ★*chuck-luck*.

chuck-hole (chuk′hōl), *n.* The small hole in the ground into which the farthing is to be thrown in the game of chuck-farthing; also, the game itself.

chucking (chuk′ing), *n.* A long, stout, coarse hemp, rather foul, used for making inferior rope. *Rigging and Seamanship. N. E. D.*

chucking-machine, *n.* Now applied to a special machine which is essentially a ★boring-and-turning machine (which see). The work is placed upon a horizontal revolving table, called the *chucking-table*, under a bracket which supports the turret carrying the tools.

chucking-table (chuk′ing-tā″bl), *n.* See ★*chucking-machine*.

chuck-luck (chuk′luk), *n.* [Also *chuck-a-luck*, *chucker-luck*; < *chuck*[3], *v.*, + *luck*.] A game played with three dice and a lay-out, at which the players bet that certain numbers will come on one die, or that the total of the three dice will be a certain number, or that the throw will be odd or even, high or low, etc.

chuck-plate (chuk′plāt), *n.* In *gold-milling*, an amalgamated copper plate attached to the chuck-block on the inside of the mortar of a stamp-battery, used to collect the gold.

chuck-ring (chuk′ring), *n.* A heavy steel ring for holding the ends of barrel-staves while the groove for the head is being cut.

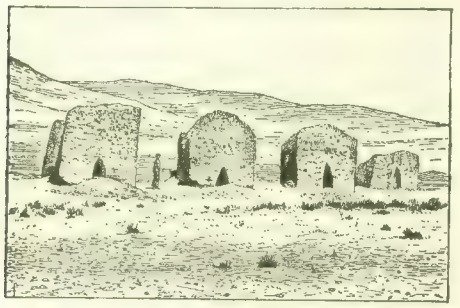
chuck-roast (chuk′rōst), *n.* A roast cut from the chuck. See ★*chuck*[4], *n.*, 6.

chuckrum (chuk′rum), *n.* [Also *chuckram*; < Malayalam *chakram*, Telugu *chakramu* (< Skt. *chakra*, a wheel, a circle: see *wheel*).] A subsidiary coin still current in Travancore, equivalent to one and one tenth cents or one half of an anna (or 28½ to one rupee). The coin was once generally current in the south of India.

chuck-steak (chuk′stāk), *n.* A steak or inferior cut from that part of a beef-animal that is known as the chuck. See ★*chuck*[4], *n.*, 6.

chuckwalla (chuk′wä-lä), *n.* [California Indian.] A local name for *Sauromalus ater*, a large, dark-colored lizard, belonging to the iguana family and inhabiting the desert regions of southern California, Utah, and Nevada, and portions of Arizona and New Mexico. It reaches a length of a foot or more, feeds on plants, and is esteemed for food by the Indians.

chucky-chucky (chuk′i-chuk″i), *n.* [Corruption of the Australian aboriginal name for a berry.] The fruit of species of the genus *Gaultheria*, especially the edible white berry of the Australian or Tasmanian wax-cluster, *Gaultheria hispida*. See *wax-cluster*.



chuf, *n.* A simplified spelling of *chough*.

chukpa (chök′pä), *n.* [Tibetan.] A Tibetan robber.

> They also informed us that a large body of *chukpas* were in our vicinity; whereupon our brave guides, after due consultation amongst themselves, formed up and suggested that we should attack the robbers, whose property was to be divided between them and ourselves.
>
> *Geog. Jour.* (R. G. S.), XVI. 153.

chullpa (chöl′pä), *n.* [Also *chulpa*; Aymará *chullpa*, a basket or bag in which the bodies of the dead were placed for burial.] In the mountains of Bolivia and Peru, one of the aboriginal towers used partly as burial-places,

but also as the abodes of the people, who buried their dead under the floors while continuing to occupy the building, as the forest tribes of the

Chullpas.

upper Amazon do to-day. Some of these stone towers are handsomely constructed, and these were used chiefly for burial.

chullu (chö'lyö), *n.* [Quichua of Peru.] The pointed bonnet or cap, similar to a nightcap but of colored wool, worn by the Indian men of the shores of Lake Titicaca. In Bolivia *lluchu*.

chultun (chöl'tun), *n.* [Yucatan.] In Yucatan, a subterranean rounded structure, with a rounded roof and an opening in the middle of the roof, probably used as a water-reservoir.

chumble (chum'bl), *v. t.* [Freq. of ★*chump*[2].] To gnaw or nibble, as rats and mice do. [Prov. Eng.]

chummage, *n.* 2. The system, formerly common in some English prisons of assigning a new-comer to a room with another or others.

chump[1], *n.* 3. The blunt end of anything. See *chump-end*.—**4.** The head. [Vulgar.]—**Off his chump,** off his head; out of his senses. [Vulgar.]

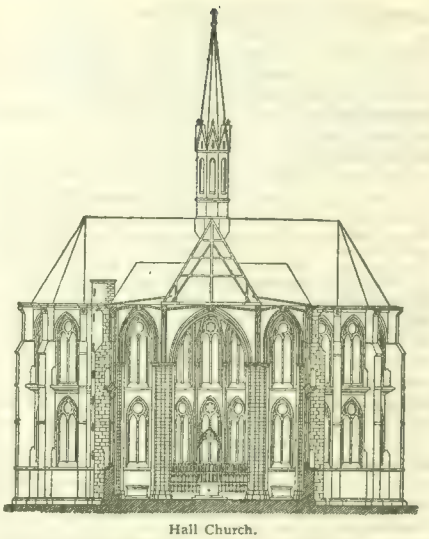
chump[2] (chump), *v. t.* [A varied form of *champ*[1]. Cf. *chumble*.] To munch. *Thackeray*.

chumpi (chöm'pi), *n.* [Quichua.] Among the Indians of Bolivia, a belt.

chunk[1], *n.* 3. Specifically, a range-bred horse of the western United States, suitable for draft purposes, standing 15 hands or over, and weighing from 1,100 to 1,400 pounds.

chunk[3] (chungk), *v. t.* In *lumbering*, to clear (ground) with an engine or horses of obstructions which cannot be removed by hand.—**To chunk up,** to collect and pile for burning: said of slash left after logging.

chuñu (chö'nyö), *n.* [Quichua and Aymará *chuñu* or *chunu*.] Dried potatoes, the chief vegetable food of Bolivia. As the people have no cellars to keep their potatoes during winter, these are set out to freeze, and then, after repeated soaking, the water is pressed out and the starchy residue dried in the sun. It is, of course, tasteless. The white kind is called *tunta*.



chupa-chupa (chö″pä-chö'pä), *n.* [Native name.] In Colombia, the large, greenish, edible fruit of a tree, *Matisia cordata*, of the silk-cotton family, native of the Andes region and cultivated in Peru and Colombia.

chupagallo (chö-pä-gäl'yō), *n.* [Porto Rico.] A tree, *Cinnamodendron macranthum*, of the family *Canellaceæ*, native to Porto Rico. It bears greenish-white, orange-scented flowers and yields a strong light-colored wood used in house-construction.

chupon (chö-pōn'), *n.* [Sp., a sucker.] In the West Indies, same as *sucker*, 5 (*b*). See ★*gormandizer*, 2. *Nature*, June, 1902, p. 185.

chuppah, chuppa (ċhüp'pä), *n.* [Heb., < *chappah, happah*, cover, surround.] In the Jewish marriage ceremony, the canopy under which the reading of the kethuba, or marriage contract, and the nuptial ceremonies are performed. The chuppah is generally made of the curtain which is in front of the holy ark that contains the scrolls of the law. The four corners of the curtain are supported by four staffs or poles which are held by young male relatives or intimate friends of the bridal couple. The bridegroom is first ushered in under it; the bride and the parents soon follow and remain there until the end of the ceremony.

church. **I.** *n.*—**Abyssinian Church,** the church founded in Abyssinia in the middle of the fourth century. See *Abyssinian, n.*, 2.—**Christian Catholic Church.** See ★*catholic*.—**Church of Scotland,** the church which was established in Scotland in 1592. Its doctrine is to be found in the Westminster Confession of Faith. In government it is presbyterian, and, though legally established, is not subject to the state in spiritual matters.—**Constitution Church.** See ★*constitution*.—**Free Methodist Church.** See *Free Methodists*, under *Methodist*.—**Hall church,** in European Christian architecture, especially that of Germany, a church whose three or more parallel divisions are nearly of the same height. Thus in St. Stephen's, Vienna, the aisle on each side of the nave is lower than the nave by a few feet, but the difference is not enough to allow of clearstory windows. The cathedral at Erfurt and the church of St. Elizabeth at Marburg are still more strictly hall churches, the nave being in each of the same height as the aisles.—**Institutional church,** a church which maintains social, charitable, and educational institutions as a part of its organization, mainly for the purpose of reaching the poorer classes in large cities.—**Reformed Church of France,** a church established in France in 1555. At its first synod, in 1559, it adopted a presbyterian form of government and a strictly Calvinistic confession of faith. Under the decree of 1802 it enjoyed state support.—**Reformed German Church,** the church that sprang up in the Palatinate during the religious movement of the sixteenth century, of which Zwingli and Calvin were leaders. Its doctrine was set forth in the Heidelberg Catechism (1563) and corresponds with the Calvinistic system somewhat modified. Its history in America began with the great German immigration of the seventeenth century.—**Reformed Methodist Church,** an American offspring of the Methodist Episcopal Church, having its origin in a body of local preachers in the Vermont conference, in 1814, who opposed the tendency toward 'prelacy' in the parent body. The sect was never strong and later became absorbed in other Methodist churches.

Hall Church.

Section of the Church of St. Elizabeth at Marburg.

II. *a.*—**Church conference,** the name given by the Wesleyans of England and Ireland, and the Freewill Baptists, to the annual meeting of the ministers of the churches.—**Church house** or **settlement.** See *college* ★*settlement*.—**Church year.** (*a*) Same as *ecclesiastical year* (see *year*). (*b*) See ★*year*.

church-bell (chėrch'bel), *n.* The bell of a church, which is rung to call the people, or to mark festivals or funerals.

church-door (chėrch'dōr), *n.* The outer door of a church. It was customary in early times to post upon it the names of excommunicated persons, the names of persons intending to marry, proclamations of the church, and other public notices.

church-flag (chėrch'flag), *n.* *Naut.*, a blue cross on a white pennant field raised on board a ship while religious services are being held.

Church of Santiago de Compostela, Spain, by Churriguera. (From "Baudenkmäler in Spanien," pub. by Wasmuth, Berlin.)

Church-warden Gothic. See ★*Gothic*.

churinga (chö-ring'gä), *n.* [Australian.] Something sacred or secret, applied both to an object and to the quality possessed by it. It is most frequently used to signify the sacred stones and sticks of the Arunta tribe of central Australia. *Spencer and Gillen*, Native Tribes of Central Australia, p. 648.

churka (chėr'kä), *n.* [Hind. *charkhah, charkhā*, a spinning-wheel, distaff, reel, < Skt. *chakra*, wheel: see *wheel*. Cf. ★*chuckrum*.] The Oriental roller cotton-gin, made of two round pieces of hard wood fixed in a rude frame.

churn, *n.* 2. A block or chuck on a potter's turning-lathe.

churn-butted (chėrn'but″ed), *a.* Same as ★*swell-butted*.

churrels (chėr'elz), *n.* Same as ★*chirls*.

Churrigueresque (chö″ri-gā-resk'), *a.* and *n.* [Named in reference to Don José *Churriguera* of Salamanca and his two sons.] Noting an elaborate phase of the baroque style in architecture which originated in Spain in the seventeenth century. The style was transplanted to Mexico, where it became typical. See cut in middle column.

chute, *n.*—**To shoot the chute,** to slide down a chute in a car, or in a boat that at the foot of the chute glides into the water.

There is here, indeed, almost enough material for an Earl's Court exhibition, though it might be a little undignified to combine amusement with instruction, in the way beloved of the Londoner, by giving him an opportunity of *shooting the chute* on a milkman's barrow or by converting the great wheel into a gigantic churn.

Lancet, May 30, 1903, p. 1534.

chute (shöt), *v. t.* [*chute, n.*] To send down or through a chute, as logs.

chutkarry (chut'kar-i), *n.* [Also *chattagar*; < Tamil *shatti-kar*, 'one who wears a waistcoat.'] In southern India, a person of mixed European and Indian blood. [Anglo-Indian.]

chutt (chut), *n.* [Hind. *chādar-chhat*, 'sheet-ceiling,' < *chādar*, sheet, cloth, *chhat*, a roof or ceiling.] A ceiling for a room, composed of coarse cotton sheeting stretched on a frame and whitewashed. [Anglo-Indian.]

chuttrum (chut'rum), *n.* [Tamil *shattiram*, < Skt. *sattrá*, hospital, asylum, lit. 'seat,' < √*sad*, sit: see *sit*.] In southern India, a house where pilgrims and travelers of the higher castes are accommodated free for a short time. [Anglo-Indian.] Compare *choltry*.

chyak (chī'ak), *v. t.* [Also *chyack*; origin obscure.] To chaff; make game of: as, to *chyak* the police. [Australian slang.]

chyazic (kī-az'ik), *a.* [*c*(*arbon*) + *hy*(*drogen*) + *az*(*ote*) + *-ic*.] Containing carbon, hydrogen, and nitrogen.—**Chyazic acid,** an old name for hydrocyanic acid.

chylangioma (kī-lan-ji-ō'mä), *n.*; pl. *chylangiomata* (-ma-tä). [Gr. *χυλός*, chyle, + *ἀγγεῖον*, vessel, + *-oma*.] A tumor formed of dilated lymphatics containing chyle.

chylariose (kī-lā'ri-ōs), *n.* [Gr. *χυλάριον*, dim. of *χυλός*, juice, + *-ose*.] A name given to l-fructose obtained from honey.

chyle-stomach, *n.* 2. In *entom.*, the second of the three prime morphologic divisions of the alimentary canal, the mid-intestine or ventriculus. It is furnished with cæcal glands. *A. S. Packard*, Text-book of Entom., p. 297.

chylifacient (kī-li-fā'shient), *a.* [Gr. *χυλός*, chyle, + L. *faciens* (*-ent-*), making.] Same as *chylifactive*.

chyliform (kī'li-fôrm), *a.* [NL. *chylus*, chyle, + L. *forma*, form.] Resembling chyle; having the composition of chyle.

The left pleural cavity was half full of *chyliform* fluid similar to that in the abdomen.

Lancet, April 4, 1903, p. 961.

chylocauly (kī'lō-kâ-li), *n.* [Gr. *χυλός*, juice, + *καυλός*, stem, + *-y*[3].] The phenomenon of stem-succulence, in which the stem becomes short, thick, even spheroidal, and is filled with a mucilaginous sap, as in some *Cactaceæ*. *Schimper*.

chylocele (kī'lō-sēl), *n.* [NL. **chylocēlē*, < Gr. *χυλός*, chyle, + *κήλη*, tumor.] Presence of lymph in the tunica vaginalis testis.

chyloid (kī'loid), *a.* [Gr. *χυλοειδής*, like juice, < *χυλός*, juice, chyle, + *εἶδος*, form.] Resembling chyle.

chylopericarditis (kī″lō- or kil″ō-per-i-kär-di'tis), *n.* [NL., < Gr. *χυλός*, chyle, + NL. *pericardium*.] In *pathol.*, a condition in which chyle is present in the pericardial sac.

chyloperitoneum (kī″lō- or kil″ō-per-i-tō-nē'um), *n.* [NL., < Gr. *χυλός*, chyle, + NL. *peritoneum*.] In *pathol.*, a condition in which chyle is present in the peritoneal cavity.

chylophylly (kī-lof′i-li), *n.* [Gr. *χυλός*, juice, + *φύλλον*, leaf, + *-y*³.] In *phytogeog.*, the phenomenon of leaf-succulence, in which the leaves of a plant become fleshy as a protection against conditions of physiological dryness.

chylopoesis (kī″lō- or kil″ō-pō-ē′sis), *n.* [Gr. *χυλός*, chyle, + *ποίησις*, a making.] Same as *chylifaction*.

chylorrhea, chylorrhœa (kī-lō-rē″ă), *n.* [NL. *chylorrhœa*, < Gr. *χυλός*, chyle, + *ῥοία*, a flow.] An escape of chyle from the lymphatics.

chylothorax (kī-lō-thō′raks), *n.* [Gr. *χυλός*, chyle, + *θώραξ*, thorax.] In *pathol.*, a condition in which chyle is present in the pleural cavity.

chymaqueous (kī-mā′kwē-us), *a.* [Gr. *χυμός*, juice (chyme), + L. *aqua*, water (see *aqueous*).] Composed of chyme and water, as the fluid in the digestive cavity and its branches in polyps.

chymogene (kī′mō-jēn), *n.* See ★*butane*.

chymosin (kī′mō-sin), *n.* [Gr. *χυμός*, juice, + *-ose* + *-in*².] The milk-curdling ferment of the gastric juice. Also called *rennin*.

chymosinogen (kī-mō-sin′ō-jen), *n.* [*chymosin* + *-gen*.] The proenzyme of chymosin, which in itself is inactive. In this form the ferment supposedly exists in the cells. Also called *renninogen*.

chytra (kit′ra), *n.* [Gr. *χύτρα*, dial. *κίθρα*, *κύτρα*, (also *χυτρος*, *κύθρος*, *κίτρος*), < *χεῖν* (√*χυ*), pour.] In *Gr. antiq.*, a two-handled earthen pot for heating water or cooking. It was usually without decoration. The proverb "to paint a *chytra*" was applied to any useless occupation.

Chytra.

Chytridiales (ki-trid-i-ā′-lēz), *n. pl.* [NL., < *Chytridium* + *-ales*.] An order of fungi of the class *Oömycetes*, coextensive with the family *Chytridiaceæ*. Also *Chytridieæ* and *Chytridineæ*.

Chytridieæ, Chytridineæ (ki-trid-i-ē′ē, -nē′ē), *n.* Same as ★*Chytridiales*.

chytridiose (ki-trid′i-ōs), *n.* [*Chytridium* + *-ose* (*-osis*).] Any disease of plants caused by chytridiaceous fungi. The leaves are usually attacked, and reddish or yellowish, warty or vesicular swellings are produced on the surface, accompanied by some wrinkling or other slight deformation. Chytridiose of alfalfa and chytridiose of beet are caused by *Physoderma leproides*; chytridiose of grape by *Cladochytrium viticolum*; chytridiose of the mulberry by *C. Mori*; chytridiose of the potato by *Chrysophlyctis endobiotica*; and chytridiose of violet by *Cladochytrium Violæ*.

chytridiosis (ki-trid-i-ō′sis), *n.* Same as ★*chytridiose*.

C. I. The authorized abbreviated form of *Imperial Order of the Crown of India*. See *Order of the Crown*, under *crown*.

cib. An abbreviation of the Latin *cibus*, food.

cibory, *n.* Same as *ciborium*, 1.

Cibotium (si-bō′ti-um), *n.* [NL. (Kaulfuss, 1820), in allusion to the form of the indusium; < Gr. *κιβώτιον*, dim. of *κιβωτός*, a box.] A genus of mainly arborescent cyatheaceous ferns, allied to *Dicksonia*, but distinguished technically from that genus by having the outer valve of the bivalvate indusium larger, more highly modified, decidedly coriaceous and cucullate. There are about 10 species, confined to the tropics of both hemispheres. *C. Barometz*, an Asiatic species, has long been known as the *Scythian lamb*. See *Agnus Scythicus*, under *agnus*.

cicada, *n.* —**Large dog-day cicada,** an American cicadid, *Tibicen pruinosa* (*Cicada tibicen*). See *dog-day harvest-fly*, under *harvest-fly*.

cicada-killer (si-kā′dă-kil″ėr), *n.* A large American digger-wasp, *Sphecius speciosus*, which stings the annual cicada or dog-day harvest-fly, *Tibicen pruinosa*, and stores it in its burrows as food for its young. See *Sphecius*, with cut.

cicadid (si-kad′id), *a.* and *n.* **I.** *a.* Of or belonging to the homopterous family *Cicadidæ*.

II. *n.* One of the *Cicadidæ*.

cicatricular (sik-a-trik′ū-lăr), *a.* Of or pertaining to the cicatricula.

cicatricule (sik-at′ri-kūl), *n.* In *embryol.*, same as *cicatricula*.

cicatriform (sik′a-tri-fôrm), *a.* [Erroneously for **cicatriciform*, < L. *cicatrix* (*tric-*), a scar, + *forma*, form.] Resembling a cicatrix; scar-like.

cicatrizate, *a.* See *cicatrisate*.

cicely, *n.* —**Fool's cicely,** the fool's parsley, *Æthusa Cynapium*.

cicerone (sis′ē-rōn), *v. t.*; pret. and pp. *ciceroned*, ppr. *cicerоning*. Same as ★*ciceronize*.

Ciceronic (sis-ē-ron′ik), *a.* Same as Ciceronian.

ciceronism (sis′e-ron-izm), *n.* The occupation or office of cicerone or guide.

Frolick—who seems an easy-going man-about-town sort of cockney, delighted to have the pretext of *ciceronism* to revisit all manner of queer haunts.

Blackwood's Mag., LXXIV. 289.

ciceronize (sis′ē-rō-niz), *v. t.*; pret. and pp. *ciceronized*, ppr. *ciceronizing*. To act as cicerone or guide to; play the cicerone to.

cichlomorphous (sik-lō-môr′fus), *a.* Same as *cichlomorphic*.

cicutoxin (sik-ū-tok′sin), *n.* [*Cicu*(*ta*) + *toxin*.] A poisonous compound found in the water-hemlock. It is an uncrystallizable resin with an acid reaction and bitter taste.

Cidaroida (sid″a-rō-ī′dă), *n. pl.* [NL., < *Cidaris* (a genus) + *-oida*.] An order of regular endobranchiate *Echinoidea*. They have the peristome central; the periproct central on the aboral surface of the body and surrounded by the apical system of plates; the ambulacra consisting of 2 vertical series of simple, narrow plates, some of which may be demi-plates; the interambulacral plates unituberculate, with large spines, and a dental apparatus. The order includes the families *Lepidocentridæ*, *Archæocidaridæ*, *Diplocidaridæ*, and *Cidaridæ*, the first three of which are extinct.

cider-gum (sī′dėr-gum), *n.* Same as *cider-tree*.

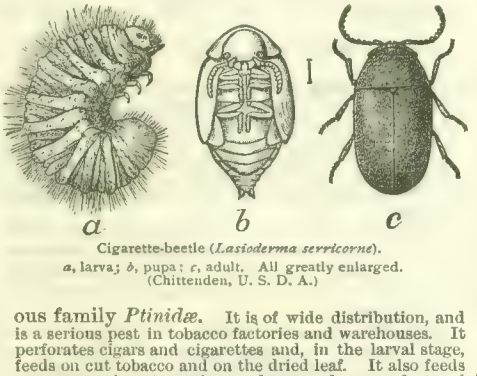
C. I. F. An abbreviation of *carriage, insurance, and freight* (used in contracts relating to direct shipments of cotton to spinners, when these charges are prepaid).

cifer, *n.* and *v.* A simplified spelling of *cipher*.

cigala (si-gä′lă), *n.* [Pr. and It.; see *cicala*, *cicada*.] A cicada.

cigale (si-gäl′), *n.* [F., < Pr. *cigala*.] Same as ★*cigala*.

Cigaliers (sē-gä-lyā′), *n. pl.* [F. *cigalier*, < *cigale*, a cicada.] A Félibrien society maintained in Paris by the natives of the South of France, its emblem being a cicada (*cigale*).



A . . . far more picturesque decoration was the enamelled cigale worn by the *Cigaliers*,—at once the emblem of their Society and of the Félibrien movement, and of the glowing South where that gayest of insects is born and sings his life out in the summer days.

T. A. Janvier, A Feast Day on the Rhone, ii.

cigar-beetle (si-gär′be″tl), *n.* Same as ★*cigarette-beetle*.

cigarette-bast (sig-a-ret′bast), *n.* The thin, paper-like layers of the inner bark of *Lecythis Ollaria*. See *Lecythis* and *kakarali*.

cigarette-beetle (sig-a-ret′bē″tl), *n.* An insect, *Lasioderma serricorne*, of the coleopterous family *Ptinidæ*. It is of wide distribution, and is a serious pest in tobacco factories and warehouses. It perforates cigars and cigarettes and, in the larval stage, feeds on cut tobacco and on the dried leaf. It also feeds on pepper, insect-powder, and many drugs and stored foods.

a *b* *c*

Cigarette-beetle (*Lasioderma serricorne*).

a, larva; *b*, pupa; *c*, adult. All greatly enlarged. (Chittenden, U. S. D. A.)

cigar-tail (si-gär′tāl), *n.* A (horse's) tail entirely denuded of hair. *Buck*, Med. Handbook, V. 482.

cigua (thē′gwä), *n.* [Cuban.] A lauraceous tree of Florida and the West Indies, *Damburneya Catesbyana*. It is called *lancewood* in Florida and *timber-sweetwood* in Jamaica.

ciguatera (thē-gwä-tā′rä), *n.* [Sp.; cf. *aciguatar*, affect with this disease, < *ciguato* (Dominguez), a fish of a yellow color: said to be Mex.] An affection believed by the natives of Central and South America to be caused by eating poisonous fish.

cil (sil), *n.* [F. *cil*, eyelash, < L. *cilium*, eyelid.] Same as *cilium*.

ciliary flame. See ★*flame*.

Cilicism (sil′i-sizm), *n.* [Gr. Κιλικισμός, Cilician behavior, < Κιλικίζειν, to act like a Cilician, < Κίλιξ, a Cilician.] A Cilician mode of speech. *N. E. D.*

ciliolate (sil′i-ō-lāt), *a.* [NL. **ciliolatus*, < *ciliolum*, ciliolum.] Covered or provided with minute cilia or ciliola.

ciliophagocytic (sil″i-ō-fag-ō-sit′ik), *a.* [*cilium* + *phagocytic*.] Relating to the phagocytic action of cilia. —**Ciliophagocytic organs,** various ciliated or vibratile structures which have the function of collecting and removing granules of debris and degenerated cells from the cœloma of different invertebrates, especially worms, leeches, and echinoderms. *Jour. Roy. Micros. Soc.*, Feb., 1903, p. 31.

cilioretinal (sil″i-ō-ret′i-năl), *a.* Relating to the ciliary body and to the retina of the eye.

cimarron, *n.* **2.** [*cap.*] In the Philippine Islands, a name given to members of various poor wandering tribes, mostly descendants of civilized natives who have fled to the mountain forests. —**3.** A West-Indian name for a wild (feral) dog. —**Cimarron series.** See ★*series*.

cimicoid (sim′i-koid), *a.* [L. *cimex* (*cimic-*), bug, + *-oid*.] Resembling a bug. *Syd. Soc. Lex.*

ciminite (chim′i-nīt), *n.* [(*Monti*) *Cimini*, in Italy, + *-ite*².] In *petrog.*, a name given by H. S. Washington (1897), to porphyritic lavas characterized by phenocrysts of augite, olivin, and sometimes feldspars, the ground-mass consisting of feldspar with augite and magnetite. The feldspars are orthoclase and labradorite in nearly equal amounts. Ciminite embraces some of the rocks called trachydolerites.

cimline (sim′lin), *n.* [D. *sim*, a fishing-line.] The top line of a drift-net. [Local, U. S.]

The ordinary gill or drift net used for shad fishing in the Hudson is from a half to three-quarters of a mile long, and thirty feet wide . . . The fishermen have terms and phrases of their own . . . The top-cord or line of the net is called a "*cimline*."

J. Burroughs, in Scribner's Mag., Aug., 1880, p. 492.

Cimolestidæ (sim-ō-les′ti-dē), *n. pl.* [NL., < *Cimolestes* + *-idæ*.] A family of extinct marsupial mammals, containing species of small size, with sharply tuberculate teeth; known from teeth from the Laramie Cretaceous of the western United States. *Marsh*, 1889.

Cimonian (sī-mō′ni-an), *a.* Pertaining to Cimon, an Athenian statesman (d. 449 B.C.), or to the works executed on the Acropolis under his direction. These were the retaining wall on the south side and the substructures of the Parthenon.

cinamomo (thin-a-mō′mō), *n.* [Sp., the bead-tree.] A name in the Philippines and Guam of the camphire, or henna (*Lawsonia inermis*). See *henna*.

cinch, *n.* —**2.** A firm hold or grip on anything. —**3.** A fine position or situation; an easy job; a 'snap.' [Slang, U. S.] —**4.** A variety of all-fours, sometimes called *double pedro* and *high-five*. In addition to the points for high, low, jack, and game, the five of trumps (right pedro) is worth 5, and the five of the same color (left pedro) is also worth 5, so that 14 points are made in every deal, all in the trump suit. Nine cards are dealt to each player, three at a time. Each player, in turn, has one bid for the privilege of naming the trump suit, the number offered being what the player thinks he can make with his partner's assistance, but no one is allowed to mention the suit he purposes to select. The highest bidder names the trump, and then each player, in turn, discards everything but trumps, the dealer giving him cards from the top of the pack to make the hand up to six cards, with which he plays. The maker of the trump leads any card he pleases, and the object of the players is to secure the counting cards and also to 'cinch' tricks, so that an opponent cannot save a pedro by trumping in. After the hand is played the points are counted and, if the bidder has made as many as he offered, the lower score is deducted from the higher, the difference counting toward game, which is 51 points. If the bidder fails, the adversaries add the amount of his bid to any points they make, the unsuccessful bidder scoring nothing.

cinchamidine (sin-kam′i-din), *n.* [*cinch*(*ona*) + *amide* + *-ine*².] A crystalline bitter alkaloid, $C_{19}H_{24}ON_2$, contained in cinchona bark in small quantities.

cinchene (sin′kēn), *n.* [*cinch*(*ona*) + *-ene*.] A base, $C_{19}H_{20}N_2$, obtained by boiling cinchonine chlorid with alcoholic potash. It crystallizes in plates which melt at 123–125° C.

cinchocerotin (sin-kō-sē′rō-tin), *n.* [*cincho*(*na*) + *cerote* + *-in*².] A crystalline cholesterin derivative, $C_{20}H_{34}O + H_2O$, contained in cinchona.

cinchol (sin′kol), *n.* [*cinch*(*ona*) + *-ol*.] An alcohol, $C_{20}H_{34}O + H_2O$, resembling cholesterol, found in all true cinchona barks. When anhydrous it melts at 139° C.

cincholine (sin′kō-lin), *n.* [*cinchol* + *-ine*².] An oily base, $C_{10}H_{21}N_4$, found in the paraffin-oil from brown coal. It boils at 237° C.

Cinchona red. See ★*red*[1].

cinchonibine (sin-kōn′i-bin), *n.* [*cinchona* + *-ib-*, varied from *-il*, + *-ine*[2].] An alkaloid, $C_{19}H_{22}N_2O$, obtained by heating cinchonine sulphate with sulphuric acid. It was probably a mixture of cinchotine and apocinchonine.

cinchonifine (sin-kon′i-fin), *n.* [*cinchona* + *-if-*, varied from *-il*, + *-ine*[2].] An alkaloid obtained from cinchonine by heating it with sulphuric acid: now known to be identical with cinchotine.

cinchonine-herapathite (sin″kō-nin-her-a-path′īt), *n.* [Second element named from Dr. *Herapath.*] Same as ★*antiseptol.*

cinchonization (sin-kō-ni-zā′shon), *n.* [*cinchonize* + *-ation.*] The act of bringing under the influence of cinchona or quinine; the induction of cinchonism.

cinchonology (sin-kō-nol′ō-ji), *n.* [*cinchona* + Gr. *-λογία*, ⟨ *λέγειν*, speak.] The study of cinchona in its botanical, pharmaceutical, and therapeutical relations.

cinchonometry (sin-kō-nom′e-tri), *n.* The process of determining the amount of alkaloids in cinchona bark.

cinchotine (sin′kō-tin), *n.* [*cincho(na)* + *-t-* + *-in*[2].] Same as *hydrocinchonine.*

Cincinnati china. See ★*china.*

Cincinnatian (sin-si-nat′i-an), *a.* and *n.* [*Cincinnati* + *-an.*] Of or pertaining to the city of Cincinnati, in Ohio; specifically, in *geol.*, noting a group or period of late Lower Silurian age, construed to embrace the Utica and Lorraine beds of New York and the Richmond beds of the Ohio valley. Originally, as *Cincinnati beds*, the term was employed as equivalent in part to the Trenton, Utica, and Lorraine beds, or the so-called Hudson-River beds of New York. See *Cincinnati group*, under *group.*

cincinnulus (sin-sin′ū-lus), *n.*; pl. *cincinnuli* (-lī). [NL., dim of L. *cincinnus*, a curl.] A small hook or process attached to the stylamblys in crustaceans.

cinclisis (sing′kli-sis), *n.* [NL., ⟨ Gr. *κίγκλισις*, a wagging, jerking, ⟨ *κιγκλίζειν*, wag the tail, ⟨ *κίγκλος*, a bird identified as the wagtail or as the dunlin.] Rapid winking; also rapid respiratory movements in dyspnœa.

cinct (singkt), *p. a.* [L. *cinctus*, pp. of *cingere*, gird.] Girt; cinctured; surrounded.

> Thus girt
> With circumstance, next change beholds them *cinct*
> Quite otherwise. *Browning*, Sordello, vi. l. 450.

cinder, *n.*—**Buck-shot cinder,** cinder containing grains of iron, from the iron blast-furnace.

cinder-box (sin′dėr-boks), *n.* A cast-iron box riveted to the bottom of the extension front of a locomotive-boiler, to form an opening through which the cinders can be cleaned out.

cinder-plate (sin′dėr-plāt), *n.* A plate on which the cinder from a furnace is allowed to collect. The heat of the cinder is given up to air which mixes with the hot gases and completes the combustion.

cinder-tap (sin′dėr-tap), *n.* The hole through which cinder is tapped from a furnace; a cinder-notch.

cinematograph (sin-ē-mat′ō-grȧf), *n.* [Gr. *κίνημα*, movement, + *γράφειν*, write.] An instrument for photographing and projecting on a screen pictures showing objects in motion. It consists essentially of a mechanism for projecting, in rapid succession, many hundred photographs representing the consecutive stages of the moving picture. These photographs are on a strip of cellulose film, varying from 200 to 1,000 feet in length, which is wound from one spool to another, each picture being before the objective for an instant, at which moment light passes through it to the screen. The apparatus was invented simultaneously in America, England, and France. Also *kinematograph.*

cinematograph (sin-ē-mat′ō-grȧf), *v. t.* To photograph with a cinematograph; to make a succession of photographic pictures of objects in motion. Also *kinematograph.*

> M. Camille Flammarion has undertaken to *cinematograph* the sky. He takes 3,000 photographs a night when it is clear and expects to show realistic pictures of the movements of moon and stars.
> *Sci. Amer. Sup.*, Feb. 26, 1898, p. 18481.

cinematographer (sin-ē-ma-tog′ra-fėr), *n.* One who uses a cinematograph. Also *kinematographer.*

> If there was no *cinematographer* in the French Chamber on Saturday there ought to have been.
> *Pall Mall Gazette*, Jan. 24, 1898.

cinematographic (sin-ē-mat-ō-graf′ik), *a.* 1. Pertaining to, or suitable for exhibition in, a cinematograph.—2. Adapted, as an instrument, for taking a series of instantaneous pictures. Also *kinematographic.*

cinematographical (sin-ē-mat-ō-graf′i-kal), *a.* Same as *cinematographic.* Also *kinematographical.*

cinematography (sin-ē-ma-tog′ra-fi), *n.* The art of taking a succession of photographic pictures representing objects in movement, and of showing the same by projection or otherwise. Also *kinematography.*

> An expert in photography and *cinematography* (or biographic methods of photography).
> *Photo-Miniature*, July, 1903, p. 174.

cinemograph (sin′ē-mō-grȧf), *n.* [Gr. *κίνημα*, movement, + *γράφειν*, write.] An apparatus devised by Richard of Paris for registering the velocity of the wind at each moment. It records the velocity of rotation of the vertical shaft of the anemometer instead of recording its accumulated total movement. The velocity of the wind is some multiple of that of the shaft. Also *kinematograph.*

cineograph (sin′e-ō-grȧf), *n.* [Irreg. ⟨ Gr. *κινεῖν*, move, + *γράφειν*, write.] A picture representing objects in motion. Owing to the persistence of vision many separate pictures brought before the eye in rapid succession are blended into one. Also *kineograph.*

cineol (sin′ē-ōl), *n.* [*cin(namon)* + *-e-* + *-ol.*] A volatile compound, $C_{10}H_{18}O$, found in eucalyptus, milfoil, rosemary, wormseed, cajeput, peppermint, and many other oils. Also called *eucalyptol* and *cajeputol.*

cingular (sing′gū-lȧr), *a.* [NL. *cingularis*, ⟨ L. *cingulum*, a girdle: see *cingulum.*] Of or relating to the cingulum or ridge of enamel around the base of the crown of a tooth.

> This is seen in the continuation of the cingulum forward, around the internal face of the crown, and the development of a distinct *cingular* cuspule internal to the main antero-internal cusp.
> *Amer. Jour. Sci.*, March, 1904, p. 204.

cingulum, *n.* 5. In *bot.*, same as *collar*, 2 (*b*) (3).—6. The zone of a diatom frustule where the two halves are joined.

cinnabar, *n.*—**Austrian cinnabar,** a misleading tradename for basic lead chromate used as a pigment. Also called *chrome-red, Persian red, American vermilion*, etc.

cinnabar-moth (sin′ȧ-bär-mȯth″), *n.* A collector's name, in Great Britain, for an arctiid moth, *Euchelia jacobæa.*

cinnamein (sin-ȧ-mē′in), *n.* [*cinnam(ic)* + *-e-in*[2].] The benzyl ester of cinnamic acid, $C_6H_5CH:CHCO_2C_7H_7$: found in Peru balsam. It melts at 30° C.

cinnamite (sin′ȧ-mīt), *n.* [*cinnam(on)* + *-ite.*] Same as *cinnamon-stone.*

cinnamon, *n.*—**Santa Fé cinnamon,** the ishpingo, *Acrodiclidium cinnamomoides*, the bark of which is used by the natives of Colombia as a spice and a medicine.

cinnamon-bark (sin′ȧ-mon-bärk″), *n.* The bitter, acrid, but somewhat aromatic inner bark of *Canella Winterana*, a small tree of Florida: used as a stimulant and tonic; also, the tree itself, otherwise known as wild cinnamon and whitewood.

cinnamonic (sin-ȧ-mon′ik), *a.* Same as *cinnamic.*

cinnamon-sedge (sin′ȧ-mon-sej″), *n.* Sweet-flag.

cinnamon-vine (sin′ȧ-mon-vīn″), *n.* A name of species of *Dioscorea*, particularly of *D. divaricata* (better known as *D. Batatas*). The very large tuberous root of this plant is edible, and is known as *Chinese yam* and *Chinese potato.* The plant is frequently grown as an ornamental twiner. It is native to the Philippine Islands, but is now widely distributed. See *yam.*

cinnolin (sin′ō-lin), *n.* [*cinn(amic)* + *-ol* + *-in*[2].] A poisonous base, $C_8H_6N_2$, prepared by the gentle oxidation of dihydrocinnolin. It melts at 39° C. Also called *phenohexa-1, 2-diazadiene.*

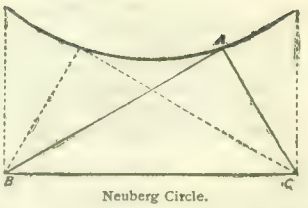
cinometry (si-nom′e-tri), *n.* [Irreg. ⟨ Gr. *κινεῖν*, move, + *μέτρον*, measure.] The art or process of measuring speeds. Also *kinometry.*

cinquain, *n.* 2. A stanza of five lines.

cinquedea (ching-ke-dā′ȧ), *n.* [It. (Venetian).] A short, broad, two-edged sword, sometimes splendidly decorated. It was especially esteemed in Venice.

Cintractia (sin-trak′ti-ȧ), *n.* [NL. (Cornu, 1883), named for Désiré Auguste *Cintract*, a French botanist.] A genus of smuts of the family *Ustilaginaceæ*, in which the sori form black, rather firmly agglutinated masses of simple spores. It is very closely related to *Ustilago*, in which it is included by some authors. *C. Caricis* is a very common species infesting the ovaries of species of *Carex.*

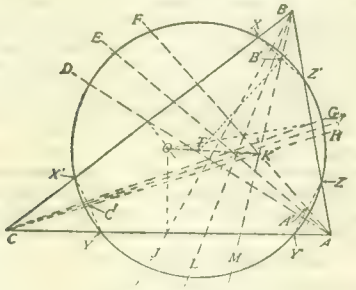
Cinulia (si-nū′li-ȧ), *n.* [NL.] A genus of opisthobranchiate *Mollusca* having inflated, spirally grooved shells with plicated columella, but without opercula. It occurs in Cretaceous rocks.



cipher, *v. t.* 5. To put (a batsman) out without scoring; also, to put a cipher opposite to (a batsman's name) to indicate that he has failed to score.

ciralillo (thē-rä-lēl′yō), *n.* [Porto Rican.] Same as ★*guayrote.*

circ. An abbreviation (*a*) of Latin *circiter* (about); (*b*) of *circum*; and (*c*) of *circus.*



Circassic (sėr-kas′ik), *a.* Same as *Circassian.*

circle, *n.* 14. A bookbinders' wheel-shaped tool, having a design engraved on the rim or edge.—**Altitude circle,** a graduated circle upon which is read the altitude of a body above the horizon.—**Azimuth circle.** (*b*) A graduated circle upon which horizontal angles, or azimuths of a heavenly body are measured.—**Circle about a pair of points,** a circle as to which they are inverse points.—**Circle of Apollonius,** the circle containing all the vertices of triangles on a given base and whose other two sides are as m to n, that is, are in a given constant ratio. Every triangle has three such circles.—**Circle of declination.** (*b*) The circle attached to the declination axis of an equatorial instrument. Its graduations give the declination of the object under observation.—**Circle of Haller.** (*a*) Same as *circulus venosus.* (*b*) A circle of communicating arterioles on the sclerotic surrounding the optic nerve. (*c*) A ring of fibrocartilage which gives support to the auriculoventricular valve on each side of the heart. Also called *circulus callosus Halleri.*—**Circle of longitude,** an imaginary great circle passing through the poles of the earth.—**Circle of similitude.** (*a*) See *similitude.* (*b*) The circumcircle of the triangle of similitude of three figures directly similar.—**Circle of the gorge,** in *geom.*, the circumference of a minimum right cross-section of a solid of revolution.—**Cosine circle.** If through the symmedian point of a triangle straight lines be drawn antiparallel to the sides, the six points in which they intersect the sides lie on a circle, which is called the *cosine circle* of the triangle. Its center is the symmedian point (the Lemoine point) K; hence it is called the circle K.—**Declination circle.** See ★*circle of declination.*—**Defensive circle,** in *pathol.*, the addition of a secondary disease which limits or arrests the progress of the primary affection, as when pneumothorax supervenes on pulmonary tuberculosis, the two affections exerting a reciprocally antagonistic reaction.—**Discriminating circle,** in *function-theory*, a finite circle on which are all the singularities of another connected function.—**Dispersion circle,** in *physiol. optics*, the retinal area illuminated by a bright point without the eye for which the lens is not accommodated. The term is also used for the appearance of such a point, that is, for the dispersion image.—**Distance-circle,** in *projective geom.*, a circle in the picture-plane whose radius is the distance of the projection-vertex from the picture-plane and whose center is the orthographic projection of the projection-vertex.—**Divided circle,** a circle marked with degrees, minutes, and seconds.—**Double circle of an elliptic Kleinian substitution,** a circle such that every point on it is unmoved by the substitution.—**Generating circle.** In *math.*, if a curve be described by a given point in the circumference of a circle, as the circle, keeping always in the same plane, rolls without sliding along a fixed line, the rolling circle is called the *generating circle.*—**Great circle of Hevelius,** the halo of 90° radius which is sometimes, but rarely, seen surrounding the sun. Like the other halos, it is due to ice-crystals in the air.—**Great-circle sailing,** sailing along the arc of a great circle; which is the shortest course between two places on the globe. A great-circle track drawn on a Mercator's chart represents a curve, except on the meridians and on the equator, which are great-circle tracks. According to a great-circle track plotted on a Mercator's chart a ship in following it would constantly change the direction of her head, but in reality she would sail in a straight line, owing to the fact that the chart gives a distorted view of the earth's surface. When a vessel is navigated on a straight-line course on a Mercator's chart, her head is never pointed in the direction of the port to which she is bound until that port comes into sight; but when following a great-circle track her head is always pointed for the destined port. When a vessel is navigated on a straight-line course on a Mercator's chart, her head, at starting, points toward the equatorial side of the port to which she is bound, and, as the voyage progresses, her head turns more and more in the right direction. Besides shortening the distance between places that lie more or less east and west of one another, the great-circle track is of the highest importance for sailing-vessels, since it may happen that an apparently head wind for a straight-line course on a Mercator's chart may be made a fair wind on a great-circle course. Within the tropics, great-circle sailing is of no practical importance, since the distortion of the Mercator's chart in latitudes so close to the equator is too small to be considered.—**Helm circle,** the circle that a ship describes while going ahead with her rudder hard aport or hard astarboard—the smallest circle that a steamship can turn in without the use of sails or outside help.—**Law of the circle,** a name occasionally given to the often-used generalization of Euclid III. 35; namely, that the product of the distance along any straight line from a given point to the two intersections by that line of the circumference of a given circle is the same along whatever straight line the measurements are made. All properties of the circle can thence be easily deduced.—**Lemoine circles.** (*a*) *First Lemoine circle* (discovered in 1873 by the French geometer Émile Lemoine), the circumcircle of the Lemoine hexagon, that is, the circle through the six crosses of the Lemoine parallels and the sides of a triangle—the six points where the sides of any triangle are cut by parallels to the other sides through the Lemoine point (symmedian point). (*b*) *Second Lemoine circle.* Same as *cosine* ★*circle.*—**Lexell's circle,** the small circle on which are the vertices of equivalent spherical triangles (triangles of the same angle-sum) on the same base. Their *Lexell's circle* is copolar with the great circle bisecting their sides.—**McCay's circles,** three circles each of which passes through two vertices of Brocard's second triangle and the centroid of the primitive triangle.—**Neuberg circles.** On the side BC of the triangle ABC construct, toward

Neuberg Circle.

A, triangles having the same Brocard angle ω as ABC. The locus of their vertices opposite BC is the *Neuberg circle* (N_A). (N_A), (N_B), (N_C) are the *Neuberg circles* of the triangle ABC.—**Nodal circle,** that nodal line upon a vibrating disk which takes the form of a concentric circle. The formation of nodal circles was described by Chladni in his Traité d'Acoustique in 1809.—**Numerical rectification of the circle,** the calculation of the number which represents approximately the transcendental irrational π, the ratio of the circumference of a circle to its diameter.—**Orthocentroidal circle,** the circle of similitude of the circumscribed and nine points circles of a triangle. It has the sect whose end-points are the centroid and orthocenter as its diameter.—**Postulate of the circle,** the postulate that about any point as center with a radius equal to any given line a circle may be described (or exists, or may be brought into existence).—**Primitive circle.** (*a*) The first circle; the original circle of a group. (*b*) In *gearing,* the pitch-circle.—**Right ascension circle,** or **hour-circle,** the circle attached to the polar axis of an equatorial, giving the hour-angle of the object under observation.—**Root circle,** in spur-gearing or cylindrical gearing, that circle in the drawing or cutting of the teeth which limits the bottoms of the spaces between the teeth, or from which the teeth appear to take root. The space within the pitch-line must be deep enough to allow the projection or addendum of the tooth of the other wheel to pass the line joining the centers without bottoming against the metal between the teeth.—**Sensation-circle, sensory circle,** in *psychophys.,* the retinal or cutaneous area within which it is impossible to distinguish two impressions as two. It was believed by some of the earlier modern physiologists that the retina and the skin might be mapped out as a sort of mosaic of overlapping circular areas, each of them supplied with a single sense-fiber; so that, if two stimuli were to be sensed as two, they must fall within distinct sensation-circles. The hypothesis was variously modified, and has now been given up; though the term 'sensory circle' is still in use, especially as applied to the skin. *E. C. Sanford,* Exper. Psychol., p. 4.—**Small circle,** a circle on a sphere the plane of which does not pass through the center of the sphere.—**Stone circle,** a megalithic monument which consists of large stones in a circular arrangement. Also called *cyclolith.*—**Taylor's circle,** the circle through the six perpendicular projections of the feet of its altitudes on the other sides of a triangle: named for its discoverer (1882), H. M. Taylor. It is a Tucker's circle.—**Triplicate-ratio circle,** Tucker's name for the *first Lemoine* ★*circle.*—**Tucker's system of circles,** the system of circles obtained by taking different points T on the sect KO. If on the sect OK joining the circumcenter of a triangle ABC to its Lemoine point any point T be taken, and if points A′, B′, C′ be taken on the sects KA, KB, KC respectively, so that KA′ : KB′ : KC′ : KT = KA : KB : KC : KO, then straight lines through A′, B′, C′ antiparallel to BC, CA, AB will meet the sides of the triangle in six points on a circle.—**Vertical circle.** (*c*) See ★*vertical.*—**Vicious circle.** (*b*) A sequence of events of such a nature that the effect reacts upon the cause, increasing its energy, and this in turn produces a greater effect. (*c*) In *surg.,* the passage of chyme, after gastro-enterostomy, through the artificial opening into the intestine, and then its regurgitation, in consequence of antiperistaltic action, through the pylorus back into the stomach. (*d*) The mutually accelerating action of two independent but coexisting diseases. *Med. Record,* March 7, 1903, p. 397.

Tucker's System of Circles.

circle-brick (sėr′kl-brik), *n.* Brick cast to a circular form, either convex or concave: used for facing or lining a wall of circular plan.

circle-tomb (sėr′kl-töm), *n.* A tomb surrounded by a megalithic stone circle.

circloid (sėr′kloid), *a.* [*circle* + *oid.*] Resembling a circle.

A cross-section of such a one shows a *circloid* area composed of twenty or more polyhedral, cuboidal, or short columnar cells, arranged in a single row about a common center. *Trans. Amer. Micros. Soc.,* Nov., 1903, p. 78.

circuit, *n.*—**Call-circuit,** in *telephony,* a circuit used for the transmission of call-signals, as distinguished from the transmission of speech, between individual instruments or between such instruments and the call-office or central station.—**Circuit court of appeals.** See ★*appeal.*—**Closed circuit operation,** in *elect.,* operation of a signal system in which the circuit is normally closed and the signal is given by opening the circuit. It has the advantage of greater reliability, since any defect in the circuit is immediately noticed by its opening, but it has the disadvantage of continuously consuming battery power.—**Closed magnetic circuit,** in *elect.,* a magnetic circuit in which the magnetic flux throughout its entire length traverses iron or other magnetic materials.—**Derived circuit,** in *elect.,* a circuit containing no source of electromotive force, such as a battery or dynamo, and traversed by induced currents only; a secondary circuit.—**Divinity circuit,** in *bookbinding,* flexible leather binding the flaps of which extend beyond the squares all round the cover, so that when pressed together the ends will nearly meet in the center of the edges; the corners and the part that encircles the back of the book are generally rounded and pinched or creased.—**Magnetic circuit,** the total space in which a magnetic field exists, that is, in which magnetic attractions and repulsions, electromagnetic induction, etc., occur.—**Multiple circuit,** in *elect.,* a divided circuit the parts of which are arranged in parallel, so that the current is distributed, in accordance with Kirchhoff's law, each part taking an amount of current proportional to its conductivity.—**Open-circuit operation,** in *elect.,* the operation of a signal system by closing the circuit when signaling. See *closed* ★*circuit operation.*—**Open magnetic circuit,** in *elect.,* a magnetic circuit which contains one or several air-gaps.—**Phantom circuit,** an imaginary circuit virtually existing in systems of multiplex telegraphy or in telephony. Same as *phantom wires* (which see, under *phantom*).—**Resonant circuit,** in *elect.,* a circuit timed by adjustment of its capacity and inductance so as to respond to certain electrical oscillations.—**Series circuit,** in *elect.,* any circuit of which the parts are arranged in series, so that all parts are traversed by the whole current. In a series circuit the parts—which may be, for example, telephones, arc- or glow-lamps, dynamos, motors, or the cells of a battery—are said to be arranged in series.

circuit-breaker, *n.* One of the best-known forms consists of a switch which is closed against the pull of a powerful spring. The lock by means of which it is kept closed is released by an electromagnet operated by the current.

circuiteer, *n.* 2. Specifically, in *Eng. law,* one of the judges appointed to hold court in the different circuits.

circuition, *n.* 3. A name proposed by C. S. Peirce for so much of any self-returning change as brings about the original state of those characters which are not altered by the reversal of a difference, while it does not bring about the return of such characters as are so altered. A half-revolution is a *geometrical circuition.* See ★*bicircuition.*

Circular bandage, foot, inch. See ★*bandage,* etc.—**Circular millimeter.** See ★*cross-section units.*—**Circular pitch, scale.** See ★*pitch*[1], ★*scale*[1].—**Circular suture, triangle.** See ★*suture, triangle.*—**Circular unit, units, vibration.** See ★*unit,* ★*cross-section units,* ★*vibration.*

circularize, *v. t.* 2. To bring to the notice or attention of by means of circulars; send circulars to (possible patrons) by way of advertisement: as, to *circularize* the clergy; to *circularize* investors.

The fact that the verb "to *circularize*" was first used in 1848 sufficiently indicates the very recent origin of the practice of plying possible purchasers with printed letters and pamphlets. *Encyc. Brit.,* XXV. 98.

circulation, *n.*—**Derivative circulation,** the passage of blood directly from the arteries to the veins without going through the capillaries.—**Ferrel's theory of the circulation of the atmosphere,** a theory of the circulation of an atmosphere on a globe of a uniform roughness equal to the average roughness of the earth, and under the influence, at any season, of the average amount of sunshine and heat. It was deduced by Ferrel, analytically, from the observed barometric pressures and other general considerations, and was represented graphically in successive editions of his diagrams (1854, 1858, 1861, 1881, 1885). This system includes as its principal features equatorial calms below with easterly winds above; northeast and southeast trades below with anti-trades above; northeast and southeast cold winds below in the polar regions with anti-trades above; and a series of eddies or cyclones in the region of strong westerly winds between the regions of polar winds and trade-winds. See *Ferrel's* ★*law.*—**Fetal circulation.** See ★*fetal.*—**General circulation of the atmosphere,** those movements of the atmosphere which depend upon the general gradient of temperature between the poles and the equator. According to Ferrel, the atmospheric currents produced by the flow of cold air from the poles to the equator and the return flow of warm air should, if the surface of the earth were a perfectly smooth sphere, produce low pressures at the poles, a belt of low pressure at the equator, and belts of high pressure near the tropics of Cancer and Capricorn. However, this ideal system is greatly altered by the present distribution of continents and oceans, so that the actual gradients of temperature between continents and oceans are even more important than those between the poles and the equator; the true general circulation must take account of them.—**Greater circulation.** Same as *systemic circulation.*—**Lesser circulation.** Same as *pulmonary* ★*circulation.*—**Pulmonary circulation.** See *pulmonary,* and *circulation of the blood,* under *circulation.*—**Sinusoidal circulation,** the flow of blood through cavities in the tissues which are lined only with endothelium and lack the muscular and fibrous coats of the arteries.—**Tropical circulation,** in *meteor.,* the general circulation of the winds around areas of high and low pressure in the tropics. When the tropical high pressure over the Atlantic in the summer season moves westward, sultry southerly winds are brought to the Atlantic States by the tropical circulation.

circulational (sėr-kū-lā′shọn-al), *a.* Of or pertaining to circulation.—**Circulational sensation.** See ★*sensation.*

circulatory sensation. See ★*sensation.*

circumadjacent (sėr″kum-a-jā′sent), *a.* Adjacent to and lying round about: as, *circumadjacent* land.

circumaxal (sėr-kum-ak′sal), *a.* Same as ★*circumaxial.*

circumaxial (sėr-kum-ak′si-al), *a.* [L. *circum,* about, + *axis,* axis, + *-al*[1].] Situated about an axis.—**Circumaxial contact,** contact of two surfaces such that there is contact in every section made by a plane which contains a certain axis through the point of contact.

circumaxile (sėr-kum-ak′sil), *a.* [L. *circum,* about, + *axil,* axis, + *-ile.*] In *bot.,* surrounding a central axis, as the cells and seeds of many fruits.

circumboreal (sėr-kum-bō′rē-al), *a.* [L. *circum,* around, + *borealis,* boreal.] Belonging to the zone next outside the boreal or Arctic region.

Through stress of climate, this *circumboreal* flora has been driven southward. *Pop. Sci. Mo.,* July, 1901, p. 289.

circumcallosal (sėr″kum-ka-lō′sal), *a.* [L. *circum,* about, + *callosum* + *-al*[1].] Lying about the corpus callosum.

circumcize, *v.* Another spelling of *circumcise.*

circumcloacal (sėr″kum-klō-ā′kal), *a.* [*circum* + *cloaca* + *-al*[1].] Surrounding or encircling the cloaca.

circumcorneal (sėr-kum-kôr′nē-al), *a.* [*circum* + *cornea* + *-al*[1].] Surrounding the cornea. *Buck,* Med. Handbook, I. 440.

circumcrescent (sėr-kum-kres′ent), *a.* [L. *circum,* around, + *crescens,* growing.] In *embryol.,* growing over or around: said of the movement of the ectoderm, or epiblast during epibolic gastrulation.

circumdenudation, *n.*—**Mountains of circumdenudation.** See ★*mountain.*

circumequatorial (sėr″kum-ē-kwā-tō′ri-al), *a.* [*circum-* + *equator* + *-ial.*] Around or encircling the equator: as, a *circumequatorial* current. *Encyc. Brit.,* XXXIII. 937.

Circumesophageal nerve-ring. See ★*nerve-ring.*

Circumference gage, scale, tape. See ★*gage*[2], etc.

Circumferential pitch. Same as *circular* ★*pitch.*

circumflux (sėr′kum-fluks), *n.* [L. *circum,* around, + *fluxus,* flow: see *flux.*] In *elect.,* the product of the total number of conductor-turns on the armature of a dynamo or motor into a current carried by it. *Standard Elect. Dict.*

circumgenital (sėr-kum-jen′i-tal), *a.* [*circum* + *genital.*] About the genitalia: as, the *circumgenital* glands of the *Coccidæ,* a series of grouped glands which open in the anal plate of female diaspine scale-insects about the genital opening. *Annals and Mag. Nat. Hist.,* April, 1901, p. 333.

circumhorizontal (sėr″kum-hor-i-zon′tal), *a.* Surrounding the horizon.—**Circumhorizontal arc,** in *meteor.,* a short band of rainbow colors, nearly horizontal, but curving downward very slightly, which passes through the lowest point of the ordinary halo of 46° and therefore tangent to it: due to the refraction of sunlight through dihedral angles of 90° at the lower ends of prismatic ice crystals floating nearly vertically in the air. It is seen only when the sun is 59°–78° above the horizon, hence quite rarely. First described by Galle, 1847.

circumintestinal (sėr″kum-in-tes′ti-nal), *a.* [*circum-* + *intestine* + *-al*[1].] Encircling the intestine: as, the *circumintestinal* plexus of blood-vessels in some annelids.—**Circumintestinal sinus.** See ★*sinus.*

circumjovian (sėr-kum-jō′vi-an), *a.* Same as *circumjovial.*

circumlateralism (sėr-kum-lat′e-ral-izm), *n.* Same as ★*centrogenesis:* opposed to *bilateralism.*

By making bilateralism the symbol of animal evolution and *circumlateralism* (if I may invent the term), the symbol of plant evolution.
L. H. Bailey, Survival of the Unlike, p. 16.

circumlental (sėr-kum-len′tal), *a.* [L. *circum,* around, + NL. *lens* (*lent-*), lens, + *-al*[1].] Surrounding a lens, usually referring to the crystalline lens of the eye.

circum-Mediterranean (sėr-kum-med″i-te-rā′nē-an), *a.* [*circum-* + *Mediterranean.*] Surrounding the Mediterranean: as, a species native to the *circum-Mediterranean* region.

circummedullary (sėr-kum-med′u-lā-ri), *a.* Same as ★*perimedullary.*

circummeridional (sėr″kum-mē-rid′i-ō-nal), *a.* [*circum-* + *meridian* + *-al*[1]: see *meridional.*] Following around a meridian.

circummundane (sėr-kum-mun′dān), *a.* [L. *circum,* about, + *mundus,* world: see *mundane.*] Surrounding the world: as, an open *circummundane* sea.

circumnutatory (sėr-kum-nū′tā-tō-ri), *a.* Of or pertaining to circumnutation: as, a *circumnutatory* tendency.

circumpallial (sėr-kum-pal′i-al), *a.* [*circum-* + *pallium* + *-al*[1].] Surrounding or encircling the pallium or mantle, in mollusks.

circumpass (sėr-kum-pȧs′), *v. t.* [*circum-* + *pass.*] To move through the circumference of; travel entirely around.

> The description given by the pious Cavendish of his commercial circumnavigation of the globe: "It has pleased Almighty God to suffer me to *circumpass* the whole globe of the world." *Smithsonian Rep.*, 1890, p. 272.

circumpolarization (sėr″kum-pō″lăr-i-zā′shọn), *n.* In *optics*, the rotation, by passage through an optically active substance or through a magnetic field, of the plane of polarization of a beam of light.

circumpolarize (sėr-kum-pō′lăr-īz), *v. t.*; pret. and pp. *circumpolarized*, ppr. *circumpolarizing*. In *optics*, to rotate the plane of polarization of light.

circumscind (sėr-kum-sind′), *v. t.* [L. *circumscindere*, cut or tear around, < *circum*, around, + *scindere*, cut.] To cut around.

circumsciss (sėr-kum-sis′), *a.* [L. **circumscissus*, pp. of *circumscindere:* see *circumscind.*] Same as *circumscissile.*

circumscript, *a.* **2.** In the *Echinoidea* as applied to the ambulacra, not continuous from one pole of the body to the other, but confined to the area above the equatorial circumference or ambitus, enlarging at first and subsequently contracting within this space and thus assuming a petaloid outline.

circumsiphonal (sėr-kum-sī′fọn-al), *a.* [*circum* + *siphon* + *-al*[1].] Surrounding the siphon, as of a cephalopodous mollusk.

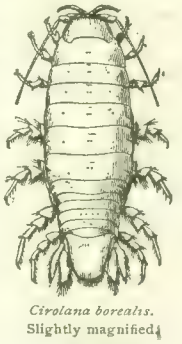
circumspatial (sėr-kum-spā′shal), *a.* [L. *circum*, about, + *spatium*, space, + *-al*[1].] Relating or pertaining to surrounding space. *P. J. Bailey*, Festus.

circumstantiator (sėr-kum-stan′shi-ā-tọr), *n.* One who circumstantiates.

circumterrestrial (sėr″kum-te-res′tri-al), *a.* Round the earth: as, the moon's *circumterrestrial* movement.

circumumbilical (sėr″kum-um-bil′i-kal), *a.* [*circum-* + *umbilicus* + *-al*[1].] Surrounding the umbilicus.

circumumbonal (sėr″kum-um-bō′nal), *a.* [L. *circum*, about, + *umbo*(*n-*), beak, + *-al*[1].] Situated about the beak or umbo: used with reference to structural details in descriptive zoölogy, especially among the *Mollusca.*



circumvascular (sėr-kum-vas′kū-lăr), *a.* [L. *circum*, around, + *vasculum*, vessel, + *-ar*[3].] Surrounding in whole or in part a blood-vessel or lymphatic. *Jour. Exper. Med.*, Feb. 5, 1902, p. 170.

circumvolute (sėr″kum-vọ̄-lūt′), *v. t.*; pret. and pp. *circumvoluted*, ppr. *circumvoluting.* **1.** To roll; turn: as, to *circumvolute* a period. *Burns.*—**2.** To encircle or enwrap: as, *circumvoluting* twine.

circumvolv, *v.* A simplified spelling of *circumvolve.*

circumzenithal (sėr-kum-zē′nith-al), *a.* [*circum-* + *zenith* + *-al*[1].] About or near the zenith; relating to objects or observations near the zenith. *Nature*, Aug. 20, 1903, p. 376. —**Circumzenithal arc**, in *meteor.*, a short band of rainbow colors, nearly horizontal but curving slightly upward which passes through the highest point of the ordinary halo of 46° and therefore tangent to it: due to the refraction of sunlight through dihedral angles of 90° at the upper ends of prismatic ice crystals floating nearly vertically in the air.

Cirolana (sir-ọ-lā′nä), *n.* [NL. (Leach, 1818), a made word.] The typical genus of the family *Cirolanidæ. C. borealis*, of British waters, lives mainly upon fish. *C. concharum* is an American species often feeding on the blue crab, *Callinectes hastatus.*

Cirolana borealis.
Slightly magnified.

Cirolanidæ (sir-ọ-lan′i-dē), *n. pl.* [NL., < *Cirolana* + *-idæ.*] A family of isopod crustaceans.

ciront (sī′rọn), *n.* [F. *ciron*, OF. *cirun*, for **siron*, **suiron* (= Pr. *soiro*), < OHG. *siuro*, m., *siurrā*, f., the itch-mite.] The itch-mite, *Sarcoptes scabiei.*

ciron-wormt (sī′rọn-wėrm″), *n.* Same as **ciron.*

Cirratulidæ (sir″a-tū′li-dē), *n. pl.* [NL., < *Cirratulus* + *-idæ.*] A family of *Chætopoda*, of the order *Polychæta.* They have a cylindrical body pointed at both ends, præstomium elongate and conical, tentacles 2 or none, and parapodia small, with simple setæ. It includes the genera *Cirratulus*, *Audouinia*, *Chætozone*, and others.

Cirratulus (si-rat′ū-lus), *n.* [NL., dim. of L. *cirratus*, cirrate: see *cirrate.*] The typical genus of the family *Cirratulidæ. Lamarck.*

cirrholite (sir′ọ-līt), *n.* [Also *cirrolite;* < Gr. *κιρρός*, tawny, + *λίθος*, stone.] A hydrated phosphate of aluminium and calcium, occurring in pale-yellow compact masses: found in Sweden.

cirrhosis, *n.*—**Atrophic cirrhosis**, a late stage of cirrhosis, marked by a reduced size of the liver.—**Cardiac cirrhosis**, chronic inflammation of the heart-muscle associated with cirrhosis of the liver.—**Hanot's cirrhosis**, a form of cirrhosis of the liver in which there is such an excessive new formation of connective tissue that the organ is increased in size, instead of diminished as in ordinary cirrhosis.—**Hypertrophic cirrhosis**, an early stage of cirrhosis marked by an increase in size of the liver.—**Laënnec's cirrhosis**, the usual form of cirrhosis of the liver, in which the organ is diminished in size.—**Pigmentary cirrhosis**, a form of cirrhosis of the liver seen in cases of bronzed diabetes.

cirrocumular (sir-ọ-kū′mū-lăr), *a.* Same as **cirro-cumulous.*

cirrocumulative (sir-ọ-kū′mū-lā-tiv), *a.* Becoming like the cirro-cumulus cloud.

cirro-cumulo-stratus (sir-ọ-kū″mū-lō-strā′tus), *n.* A cloud from which rain is falling but whose structure is not clearly apparent.

cirro-cumulous (sir-ọ-kū′mū-lus), *a.* Having the form or nature of the cirro-cumulus cloud.

cirro-filum (sir-ọ-fī′lum), *n.* One of a number of long, thin stripes of cirrus cloud, apparently all at the same level. These move at an angle with the isobars and are important indicators of coming weather changes.

cirrolite, *n.* See **cirrholite.*

cirro-nebula (sir-ọ-neb′ū-lä), *n.* A haze in the higher strata of clouds: a nebulous mass in which striation or reticulation is barely perceptible. See **cirrus-haze.*

cirrorhinal (sir-ọ-rī′näl), *a.* [L. *cirrus*, filament, + Gr. *ῥίς* (*ῥιν-*), nose, + *al*-[1].] Having the fore part of the skeleton formed of an unpaired cartilaginous ring, which represents the nasal region of the skull and bears filaments or cirri. [Rare.]

cirrorhiny (sir-ọ-rī′ni), *n.* The state or character of being cirrorhinal.

cirrostrative (sir-ọ-strā′tiv), *a.* [*cirro-stratus* + *-ive.*] Serving to form, designate, or indicate cirro-stratus clouds.

cirrostratous (sir-ọ-strā′tus), *a.* Having the form or character of a cirro-stratus cloud.

cirro-velum (sir-ọ-vē′lum), *n.* A horizontal sheet of high cloud without much structure, but possibly with a wavy under-surface; the thinnest high layer of cirro-stratus in which any structure can be detected.

cirrus, *n.*, **2.** (*k*) One of the solid contractile tentacle-like organs on the margin of the medusoid of *Hydromedusæ.* Each cirrus is shorter than the tentacles, is provided with a terminal battery of cnidoblasts, and is perhaps an organ of offense or of defense. **Dorsal cirri**, in feather-stars, the slender, curved, cylindrical appendages arranged in whorls on the dorsal side of the disk, as in *Antedon*, by means of which the animal attaches itself temporarily to rocks or seaweeds.—**False cirrus**, a delicate white cloud streaming away from the summit of a tall cumulus and closely resembling some forms of cirrus. Other formations are apt to be so named, but this is strictly a part of the cumulus cloud. See *cloud*[1].—**Magnetic cirrus**, a formation of cirrus clouds in systematic parallel bands; a polar band, or "Noah's ark." The term 'magnetic' is entirely improper, since the formation and arrangement of the clouds are wholly due to the currents and moisture of the atmosphere.—**Nuchal cirrus**, a special name given to a dorsal cirrus which occurs on the second segment of certain polychætous worms.—**Reticulated cirrus**, a network or interlacing of lines, threads, or striæ in a mass of dense cirrus cloud. —**Undulate cirrus**, layers of cirrus arranged in gentle curves; specifically, the layers whose under-surfaces have a wave-like undulation as seen in the vertical section.

cirrus-haze (sir′us-hāz″), *n.* An indefinite haze among the highest cirrus clouds (possibly extending far above them), ordinarily the locus of delicate sunset-sky colors, a nebulous mass of cirrus in which separate forms or structures cannot easily be distinguished: same as **cirro-nebula.* See **cloud*[1].

ciruela (thē-rō-ā′lä), *n.* [Sp. *ciruela*, plum.] In tropical countries settled by the Spanish, a name given to several plum-like fruits, especially to *Spondias purpurea*, *S. Mexicana*, and allied species; also to the fruit of *Cyrtocarpa procera.* See *hog-plum*, *Spondias*, and **copal-cocote.*

cis-. **2.** On this side of (a designated period of time): as, "*cis*-Reformation," *Fuller;* "*cis*-Elizabethan," *Lowell.* Better expressed by *post-.*—**3.** In *chem.*, a prefix used, in contrast with *trans-* or *cis-trans-*, to designate a compound in which two atoms or groups are supposed to be situated on the same side of some plane of symmetry passing through the compound.

cis. (sis). An abbreviation (in *cis* θ) for (cos $\theta + i \sin \theta$): in function theory: as, $x = \xi + i\eta = \rho(\cos\theta + i \sin\theta) = \rho \, cis\, \theta$.

cisalpinism (sis-al′pin-izm), *n.* Cisalpine doctrine; specifically, the theory of the supremacy or independence of a national over the universal church, at least in disciplinary matters.

cisandine (sis-an′din or -dīn), *a.* [*cis-* + *Andes* + *-ine*[1].] On this (the speaker's) side of the Andes: as, *cisandine* forests.

ciscaucasian (sis-kâ-kā′siạn or -kâ-kash′ian), *a.* [*cis-* + *Caucasus* + *-ian.*] Of or relating to the country north of the Caucasus, Russia.

ciscoette (sis′kō-et), *n.* [A Frenchified rendering of *siscowet*, Ojibwa *siskawit.* Cf. *cisco.*] A lake-herring. *Jour. Amer. Folk-lore*, Oct.–Dec., 1902, p. 244.

cisium (sis′i-um), *n.*; pl. *cisia* (-ä). [L.] **1.** A light two-wheeled Roman vehicle; a cabriolet.—**2.** In recent use, a cart with a step at the rear.

cispontine (sis-pon′tin), *a.* [NL. **cispontinus*, < L. *cis*, on this side, + *pons* (*pont-*), bridge.] On this (the speaker's) side of the bridge or bridges; specifically, in London, on the north side of the Thames: as, *cispontine* churches; the *cispontine* population.

cisrhenane (sis-rē′nān), *a.* [L. *cisrhenanus*, < *cis*, on this side, + *Rhenus*, Rhine.] On this (the speaker's) side of the river Rhine. *N. E. D.*

cist[2], *n.* **2.** A recess in a cliff-house, walled off from the main room.

> A marked feature of the whole series is the existence here and there of small, often inaccessible, stone *cists* of masonry plastered to the side of the rocky cliff like swallows' nests. *17th An. Rep. Bur. Amer. Ethnol.*, II. 543.

cistern, *n.* **7.** In *mining*, a tank in a deep shaft, serving an upper pump with water from a lower one.

cistfaen, *n.* See *cistvaen.*

cistic[2] (sis′tik), *a.* [*cist*[2], *n.*, + *-ic.*] Of, pertaining to, or of the nature of a cist, or prehistoric place of interment: as, a *cistic* tomb.

cistula, *n.* **3.** In *bot.*, the small cup-shaped conceptacle of certain lichens. *Syd. Soc. Lex.*

cit. An abbreviation (*a*) of *citation;* (*b*) of *cited;* (*c*) of *citizen.*

citadel, *n.*—**Central citadel**, an arrangement of the armor on a war-ship in which it is concentrated in the central parts, forming a heavily armored box in which the heavy guns are mounted, or on top of which they are placed in barbettes or turrets, the ends of the ship being unprotected by vertical armor. This type is now virtually abandoned, but the term is sometimes applied to the armored box-casemate in more recent designs, in which the guns of the secondary battery are carried.

citharœdic (sith-a-rē′dik), *a.* [L. *citharœdicus*, < *citharœdus:* see *citharœdus.*] Pertaining to a player on the cithara, especially to Apollo.

> It seems to me impossible to avoid the conviction that here the *Citharœdic* Apollo is represented as in a melancholy mood.
> *P. Gardner*, in Jour. Hellenic Studies, XXIII. 120.

citharœdus (sith-a-rē′dus), *n.* [L., < Gr. *κιθαρῳδός*, < *κιθάρα*, cithara, + *-αοιδος*, < *ἀείδειν*, sing: see *ode.*] A player on the cithara; especially, in *Gr. antiq.*, an epithet of Apollo in this character, represented in art as dressed in long flowing robes and leading the Muses.

Statue of Apollo Citharœdus in the Vatican, Rome.

cithern, *n.*—**Bow cithern**, a modern musical instrument combining features associated with several different types. Its body is obscurely heart-shaped, somewhat like that of the viola d'amore, but broader and with a flat belly and back. It has a neck like the violin, but broader and with a fret-board and head like a guitar. The strings are usually four in number and tuned to correspond with the violin or its close relatives, but none of them is of gut. It is made in three or four sizes, like the usual string-

quartet: larger varieties are sometimes called *viola-zither*, or *philomèle*. In playing, the instrument is held slantingly in the lap, with a projection in the back of its head resting on a table. It is sounded by means of a bow like a violin-bow, and the tone is brilliant and powerful. In Germany it is called *streichzither*, to distinguish it from the *schlagzither* or zither proper.

citified (sit'i-fid), *a.* Having the manners, dress, etc., of city life. [Colloq.]

citoyenne (sē-two-yen'), *n.* [F.] A female citizen or inhabitant.

For a number of years a Mrs. ——, a *citoyenne* of the United States, has been closely studied by the learned, as by Prof. William James, Dr. Hodgson, and Prof. Oliver Lodge. *A. Lang*, in Smithsonian Rep., 1900, p. 681.

citra-. [L. *citrā*, adv. and prep., on this side (of), prop. abl. fem. of *citer*, adj., hither, compar. from √ *ci-*, this, here.] A prefix of Latin origin, meaning 'on this side of,' and equivalent to *cis-* (which see): as in *citracaucasian*, on this side of the Caucasus; *citramontane*, on this side of the mountains (opposed to *ultramontane*, which see).

citracetic (sit-ra-set'ik or -sē'tik), *a.* [*citr(ic)* + *acetic.*] Related to citric and to acetic acid. —**Citracetic acid**, an uncrystallizable, tribasic acid, $C_6H_8O_8$ (?), whose ethyl ester is formed together with aceconitic ester by the action of sodium on bromacetic ester.

citral (sit'ral), *n.* [*citr(ic)* + *-al*[3].] A colorless liquid aldehyde of strong lemon odor, the flavor-giving constituent of oil of lemon, of which it forms from 5 to 8 per cent.: also present in oil of limes, mandarin, orange, etc.

citramide (si-tram'id), *n.* [*citr(ate)* + *am(monia)* + *-ide.*] In *chem.*, a crystalline compound, $C_6H_{11}N_3O_4$, obtained by the action of alcoholic ammonia on citrate of methyl, or citrate of ethyl. *Watts*, Dict. Chem.

citrange (sit'rānj), *n.* [< *citr(us)* + *(or)ange.*] A hybrid fruit produced by crossing the hardy trifoliolate orange (*Citrus trifoliata*) and the common sweet orange.

citrazinic (sit-ra-zin'ik), *a.* [*citr(ic)* + *az(ote)* + *-in* + *-ic.*] Derived from citramide.—**Citrazinic acid**, $(HO)_2C_5H_2N.CO_2H$. It is formed by the action of sulphuric acid on citramide.

citronellal (sit-rō-nel'al), *n.* [*citronella* + *-al*[3].] A substance, $CH_2 = C(CH_3)(CH_2)_3CH(CH_3)CH_2CHO$, found in citronella-oil, eucalyptus-oil, and lemon-oil. It boils at 205–208° C.

citronellol (sit-rō-nel'ōl), *n.* An alcohol, $CH_2 = C(CH_3)(CH_2)_3CH(CH_3)CH_2CH_2OH$, found in its levogyrate form in rose-oil, pelargonium-oil, and geranium-oil. It is also formed by the reduction of citronellal. It boils at 117–118° C. under 17 millimeters.

citronellone (sit-rō-nel'ōn), *n.* An incorrect name for *citronellal*, given to it before its chemical nature was understood.

citronene. See ★*citronin.*

citronin (sit'ron-in), *n.* [*citron* + *-in*[2].] A name of several acid coal-tar colors, all of which dye wool yellow in an acid bath. Also *citronene.*

citrophen (sit'rō-fen), *n.* [*citr(ic)* + *phen(yl).*] The primary citrate of para-phenetidin, $C_2H_5OC_6H_4NH_2.C_6H_8O_7$. It crystallizes in prisms which are easily soluble in water and melt at 186° C. It is used in medicine as an antipyretic and antineuralgic.

citrullin (si-trul'in), *n.* [*citrull(us)* + *-in*[2].] A yellow resin derived from *Citrullus Colocynthis*: used in medicine as a purgative.

City company. See ★*company.*

city-state (sit'i-stāt), *n.* A single city which is an independent sovereign state, or a sovereign state which embraces only one town or city. The city-state was the characteristic political organization of Greek and early Italian civilization. Athens, Rome in the days of the republic, and Florence and Venice in the days of their greatness were *city-states.*

civ. An abbreviation (*a*) of *civic*; (*b*) of *civil*; (*c*) of *civilian.*

civicism (siv'i-sizm), *n.* The civic spirit or civic condition; citizenship and equal rights and duties for all, as a principle of civil organization and government.

civicultural (siv'i-kul″tūr-al), *a.* [L. *civis*, citizen, + *cultura*, culture, + *-al.*] Being, serving, or originating in one of those instincts which subserve less the welfare of the individual than that of a stock, community, association, or other class of animals, human or brute: government, religion, armies, and marriage are *civicultural* developments.

Civil code, process. See ★*code*, ★*process.*—**Civil lord**, the only civilian member of the British Board of Admiralty except the 'first lord,' who is a cabinet minister and the responsible head, the other three being known as 'naval' lords. The civil lord is charged with the supervision of the civil affairs of the Admiralty, including the Works Department. See *admiralty.*

Civ. Serv. An abbreviation of *civil service.* See *civil service*, under *civil.*

C. J. C. P. An abbreviation of *Chief Justice of the Common Pleas.* See *chief justice*, under *justice.*

C. J. K. B. An abbreviation of *Chief Justice of the King's Bench.*

C. J. Q. B. An abbreviation of *Chief Justice of the Queen's Bench.*

C. J. U. B. An abbreviation of *Chief Justice of the Upper Bench.* See *Upper Bench*, under *upper.*

ck. A contraction of *cask.*

cl. An abbreviation (*a*) of *centiliter*; (*b*) of *clause*; (*c*) of *clerk*; (*d*) of *cloth* (in bookbinding); (*e*) of *clergyman.*

C. L. An abbreviation of *Commander of the Order of Leopold.* See *Order of Leopold*, under *order.*

clabber[2] (klab'ėr), *n.* [Var. of *claver*[3].] Idle or noisy talk; jabber.

I could not abide their [the gypsies'] yellow faces, or their ceaseless *clabber*. *Borrow*, Lavengro, lxxvi.

clabbery (klab'ėr-i), *a.* [*clabber*[1], *n.*, + *-y*[1].] Muddy; full of mud: as, a *clabbery* road; *clabbery* shoes. [Scotch and Irish.]

clack, *v. i.* 3. To cluck or cackle, as a hen.

But ah! the more the white goose laid
It *clack'd* and cackled louder.
Tennyson, The Goose, st. 6.

clack, *n.*—**Cornish clack**, a clack with two lids, the upper hinged and seated on the lower.

clack-guard (klak'gärd), *n.* A ring which prevents undue opening of the clack-valve.

clack-lid (klak'lid), *n.* The flap of a clack-valve.

claco (klä'kō), *n.* [Nahuatl *tlaco*, mean, half.] The eighth part of a Spanish silver shilling.

cladautoicous (klad-â-toi'kus), *a.* [Gr. *κλάδος*, branch, + *αὐτός*, self, same, + *οἶκος*, dwelling. Cf. *autœcious.*] In *mosses*, having the male inflorescence on a special branch.

cladisk (klad'isk), *n.* [NL. *cladiscus*, < Gr. *κλαδίσκος*, dim. of *κλάδος*, a branch.] In the nomenclature of the spicular elements of sponges, one of the equal arms in the cladome of a triæne. See *cladome* and *triæne.*

Cladistia (kla-dis'ti-ą), *n. pl.* [NL., < Gr. *κλάδος*, a branch, + *ἰστίον*, a web.] The family *Polypteridæ* considered as a suborder of ganoid fishes.

cladoceran (kla-dos'ę-ran), *n.* [*Cladocera* + *-an.*] One of the *Cladocera.*

Cladochytriaceæ (klad-ō-kit-ri-ā'sē-ē), *n. pl.* [NL., < *Cladochytrium* + *-aceæ.*] A family of phycomycetous fungi, named from the genus *Cladochytrium.* The genera differ chiefly in the presence or absence of resting-spores and in their saprophytic or parasitic condition.

Cladochytrium (klad-ō-kit'ri-um), *n.* [NL. (Nowakowski, 1876), < Gr. *κλάδος*, a branch, + *χυτρίον*, dim. of *χύτρα*, a pot: see ★*chytra.* The allusion is prob. to the pits produced on the host.] A genus of phycomycetous fungi of the family *Cladochytriaceæ*, having a well-developed mycelium in the tissues of the host and producing uniciliate zoöspores, but no resting-spores, so far as is known. *Cladochytrium tenue* is parasitic upon sweet-flag, *Acorus Calamus*, and produces swellings on submerged parts of the plant.

cladocopous (kla-dok'ō-pus), *a.* [Gr. *κλάδος*, a branch, + *κώπη*, a handle.] Having branched posterior antennæ, as certain crustaceans.

cladohepatic (klad″ō-hē-pat'ik), *a.* [Gr. *κλάδος*, a branch, + *ἧπαρ* (*ἥπατ-*), liver, + *-ic.*] Having the liver branched or lobulated, as certain nudibranchiate mollusks.

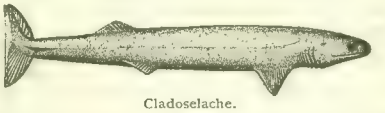
Cladohepatica (klad-ō-hē-pat'i-kä), *n. pl.* [NL., < Gr. *κλάδος*, a branch, + *ἧπαρ* (*ἥπατ-*), liver.] A section of nudibranchiate mollusks. They have the cerata usually on the sides of the dorsal surface and elongated or arborescent; the buccal mass strong; jaws present; and the liver usually ramified, the branches generally extending into the cerata. The section includes a number of families, among them the *Æolididæ*, *Dendronotidæ*, *Phyllirrhoidæ*, and *Tritoniidæ.*

cladomic (kla-dom'ik), *a.* Pertaining to or resembling a cladome.

Cladoniaceæ (klad″ō-ni-ā'sē-ē), *n. pl.* [NL., < *Cladonia* + *-aceæ.*] Same as *Cladoniei*, the proper form of the name.

Cladophiuræ (kla-dof-i-ū'rē), *n. pl.* [NL., pl. of *Cladophiura* < Gr. *κλάδος*, branch, + *ὄφις*, snake + *οὐρά*, tail.] An order of *Stelleroidea* in which the vertebral ossicles articulate with one another by means of hour-glass shaped surfaces and are covered by granular deposits in the thick integument. The arms may be simple or separately branched.

cladophiuran (kla-dof-i-ū'ran), *a.* and *n.* **I.** *a.* Pertaining to or having the characters of the order *Cladophiuræ* of the *Ophiuroidea.*



II. *n.* A member of the *Cladophiuræ.*

cladophiuroid (kla-dof-i-ū'roid), *a.* and *n.* **I.** *a.* Cladophiuran; of or pertaining to the order *Cladophiuræ* of the *Ophiuroidea.*

II. *n.* A member of the *Cladophiuræ.*

cladorhabd (klad'ō-rabd), *n.* [Gr. *κλάδος*, a twig, + *ῥάβδος*, a rod.] In the nomenclature of the spicular elements of sponges, a much-divided tetraxial form derived from the caltrop.

Cladoselache (klad-ō-sel'ą-kē), *n.* [Gr. *κλάδος*, a twig, + *σελάχη*, pl. of *σέλαχος*, a shark.] A genus of primitive selachians or sharks, believed to have had an unsegmented vertebral axis, long smooth shagreen-covered body, blunt snout, two dorsal fins without spines, and strongly heterocercal tail. It has been found in the Upper Devonian rocks of Ohio.

Cladoselache.

Restoration of *Cladoselache newberryi*, Dean. Cleveland Shale (Upper Devonian), Ohio. An anterior dorsal fin has been discovered since this illustration was made. (From Zittel's "Palæontology.")

cladoselachian (klad″ō-sē-lāk'i-an), *n.* A selachian of the genus *Cladoselache.*

chadoselachid (klad-ō-sel'ą-kid), *n.* A selachian allied to *Cladoselache*; a cladoselachian.

cladosiphonic (klad″ō-sī-fon'ik), *a.* In *bot.*, having a tubular stele interrupted at the insertion of branches. *Jeffreys.*

cladostyle (klad'ō-stīl), *n.* [Gr. *κλάδος*, a twig, + *στῦλος*, a pillar.] In the nomenclature of the spicular elements of sporges, a tetraxial spicule of many sharp-pointed branches, derived from the caltrop.

cladotyle (klad'ō-tīl), *n.* [Gr. *κλάδος*, a twig, + *τύλη*, a lump.] In the nomenclature of the spicular elements of sponges, a monaxial form having many branches each ending in a rounded knob.

claggum (klag'um), *n.* [Cf. *clag*[1].] Toffy. [Scotch.]

claik (klāk), *n.* 2. The shell of the barnacle. [Scotch.]

claim[1], *n.*—**Continual claim**, in *Eng. law*, a formal claim made annually to lands or tenements to prevent the acquirement of title by prescription. This effect has been abolished by statute.—**Court of claims.** See *court* and ★*court.*—**Court of Private Land Claims.** See *private land* ★*claims.*—**Private land claims.** The treaties by which the United States obtained possession of the territory which now includes California, Colorado, Utah, Wyoming, Nevada, New Mexico, and Arizona, provided that the United States should recognize and protect the rights of property of every kind belonging to Mexicans in the ceded territory. These rights originated from grants and cessions made by Spain to various settlers, emigrants, etc., and from grants made by Mexico after independence from Spain. By reason of this double source and of the many revolutions and counter-revolutions in Mexico, titles to land in this territory became hopelessly confused, and the United States, in order to carry out as far as possible the terms of her treaties, established in 1891, the Court of Private Land Claims. All persons claiming title to any part of the land before mentioned were entitled to present their claims to this court. The claims of such claimants are known as private land claims.—**Stale claim.** See *Stale* ★*demand.*

claire (klār), *n.* [F., < *claircer*, clarify, < *clair*, clear: see *clear*, *a.*] A saturated solution of pure sugar in water, used in the process of refining sugar.

The cooled molds are then placed on a centrifugal spindle or in a centrifugal basket, and the syrup spun out. While spinning the sugar plates are washed with *claire* — a saturated solution of pure sugar in water — and when this too is spun out the molds are removed and taken asunder. *Sci. Amer. Sup.*, Feb. 28, 1903, p. 22,706.

clair-de-lune (klār-dę-lün'), *n.* [F., moonlight.] A shade of color seen in the glaze of certain Chinese porcelains; a pale gray-blue or 'moonlight' white.

claire (klār), *n.* [F., fem. of *clair*, clear.] A reservoir of clear sea-water, protected from tidal currents, where oysters are fattened for the market or kept under observation for scientific purposes.

The experiments are made in an enclosed and tideless *claire* and have achieved a definite measure of success in demonstrating the possibility of fattening oysters to marketable condition by this means.
Science, Jan. 18, 1901, p. 107.

clairolfactance (klār-ol-fak′tans), *n.* The supposed faculty of being clairolfactant.

That the *clairolfactant* or hyperosmic soul perceives more than the clairaudient or clairvoyant.
G. S. Hall, Adolescence, II. 16.

clairolfactant (klār-ol-fak′tant), *a.* [F. *clair*, clear, + E. *olfact(ory)*, + *-ant*[1]. Cf. *clairvoyant.*] Pertaining to or characterized by an abnormally delicate olfactory sensitivity and sensible discrimination.

clairschach (klär′shäċh), *n.* [Also *clairseach, clarshech, clerschew, clersha, clarishoe, clearsach, clairsach*, etc., < Gael. Ir. *clairseach.*] A form of Celtic harp once used in Scotland and Ireland. *N. E. D.*

clairschacher (klär′shäċh-ėr), *n.* One who plays upon the clairschach; a harper. *N. E. D.*

clairvoyancy (klār-voi′an-si), *n.* Same as *clairvoyance.*

clairvoyantly (klār-voi′ant-li), *adv.* As a clairvoyant; in the manner of a clairvoyant.

clam[3], *n.*—**Bloody clam**, an ark-shell, *Arca pexata*, which has red blood. [North America.]—**Painted clam**, an edible bivalve, *Macrocallista gigantea*, found abundantly in the southern United States; so called because of the colored markings on its porcelain-like shell.

clam[3] (klam), *v. i.* [*clam*[3], *n.*] To gather clams; as, to go *clamming.* [Colloq.]

clam-hook (klam′hůk), *n.* A short-handled fork which has strong round hooks or tines and is used to rake clams out of the mud along the shore. A similar tool with flat tines is a *clam-digger.*

clamjamfry (klam-jam′fri), *n.* **1.** Same as *clan-jamfrie.*—**2.** Rubbish; trumpery. Also *clam-jamphrie.*

clammy-weed (klam′i-wēd″), *n.* Any plant of the genus *Polanisia*, especially *P. graveolens.* See *Polanisia.*

clamp[1], *n.*—**Pedicle clamp.** See ★*clamp-forceps. Buck*, Med. Handbook, I. 253.—**Test-tube clamp**, a wooden handle, with a clamp of wood or brass by which a test-tube may be grasped: used in chemical laboratories to support such a tube over a flame while protecting the hand from heat. The clamp is sometimes made to slide up and down on a vertical rod upon a foot, with a screw arrangement by which to fix it at any desired height.

clamp[3], *n.* **2.** A clamp-shell, *Tridacna;* a chama.

clamp-forceps (klamp′fôr″seps), *n.* A clamp shaped like a forceps, with an automatic lock, used in surgical operations to compress arteries, the pedicle of a tumor, or other structures. *Buck.* Med. Handbook, II. 38.

clamp-kiln, *n.* **2.** A brick-kiln built with temporary walls which are rebuilt after each burning, the outside of the walls being plastered or daubed with clay mortar.

clamp-shell (klamp′shel), *n.* Same as ★*clamp*[3], 2.

clamp-tongs (klamp′tôngs), *n.* Roofing-tongs that can be used to clamp and hold the edges of tin plates.

clam-shell, *n.* **II.** *a.* Resembling in form or appearance the shell of a clam: as, a *clam-shell* dredging-bucket; a *clam-shell* dredging-machine.

clan, *n.* **3.** A social unit in a tribe in which descent is reckoned in the maternal line; a group of people supposed to be descended from a common ancestor, descent being reckoned in the female line. In this sense it is opposed to *gens*, the social unit in a tribe in which descent is reckoned in the paternal line.

A *clan* is an organized group of persons who reckon kinship through females from an ancestral mother, real or eponymous; it has well-defined rights and duties.
An. Rep. Bur. Amer. Ethnol., 1897–98, p. xlix.

Totem-clan. See ★*totem-clan.*

clan-ancient (klan′ān″shent), *n.* The ancestor of a clan.

The objective cultus of Katcinas is made up of representations of these animas (breath bodies) of *clan-ancients* by masked men, by images, by pictures, and ceremonial dramas.
J. W. Fewkes, in Jour. Amer. Folk-lore, March, 1902, p. 14.

clanfellow (klan′fel-ō), *n.* In *anthrop.*, a member of a clan in his relation to another member of the same clan.

Clang affinity or **relationship**, the identity of the pitch of the fundamental of one tone with that of an overtone of another tone of different clang, or the identity in pitch of two or more overtones.

clan-horde (klan′hōrd), *n.* A horde which has gradually assumed the status of a clan by coming into clan relations with other hordes.

Finally it might be assumed that each horde in a cluster or group of hordes becomes practically a clan by retaining a majority of all members of that clan and by including with them only a few individuals of other clans, and that such *clan-hordes* presently draw together into a tribal organization. *Giddings*, Prin. of Sociol., p. 258.

clank, *v.* **I.** *trans.* **3.** To deposit, put, place, or set down with a clanking sound.

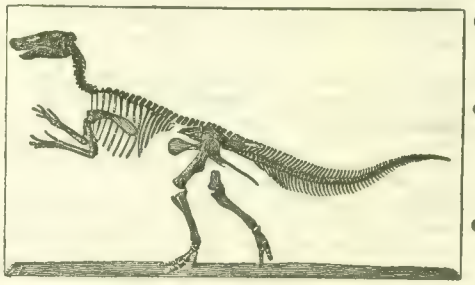
When she brought up the tea-tray she *clanked* it on the lobby-table. *Mrs. Carlyle.*

II. *intrans.* **2.** To move with a clanking sound.

"Not bad news, I hope?" cried Ivo, as Ascelin *clanked* into the hall. *Kingsley*, Hereward, xxi.

clan-name (klan′nām), *n.* **1.** The name by which a clan is known.—**2.** One of a set of names belonging to a clan by which the bearer of the name is recognized as a member of the clan.

In the clan system descent was probably at first reckoned only through the female line; consequently uterine ties alone constituted kinship, the father not being regarded as related even to his own children, and not considered as a member of the family, as still amongst the Chi (Tshi) people of the Gold Coast and elsewhere. In this system all the children bear the *clan-name* transmitted through the mother, and the *clan-name* thus becomes the test of blood-relationship. *Keane*, Ethnol., p. 6.

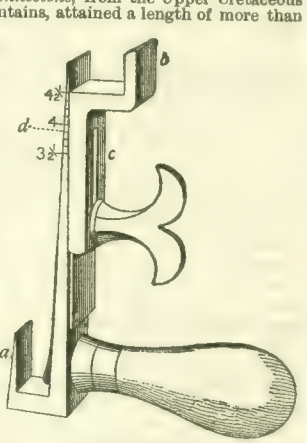


clanship, *n.* **2.** Membership in a clan.—**3.** The feeling or spirit of attachment and loyalty to one's clan or fraternity.

clan-standard (klan′stan-dard), *n.* The emblem of a clan, by the use of which the members of the clan may be recognized.

The devices are at once blood-signs, definite as the facemarks of gregarious animals, and *clan-standards*, significant as tartan or pibroch. *Smithsonian Rep.*, 1900, p. 62.

clanswoman (klanz′wům-an), *n.* In *ethnol.*, an adult female member of a clan. *Giddings*, Prin. of Sociol., p. 173.



Claosaurus (klā-ō-sâ′rus), *n.* [NL., said to have been formed (if so, irregularly) from Gr. *κλάω* (inf. *κλᾶν*), break, + *σαῦρος*, a lizard.] A

Claosaurus annectens, Marsh.
(From "Trans. Conn. Acad. Arts and Sciences.")

genus of dinosaurian reptiles of great size. They had an elongate and snouted skull with toothless premaxillæ; teeth arranged in successional series in an alveolar groove; 30 presacral vertebræ, 9 fused sacrals, and about 60 caudals; fore legs very short; hind legs very large, with massive digits; both fore and hind legs three-toed, and the fore feet with a rudimentary fourth toe. *Claosaurus annectens*, from the Upper Cretaceous of the Rocky Mountains, attained a length of more than 30 feet.

clapboard-gage (klap′bōrd-gāj), *n.* A carpenters' gage used to measure the distance between one line of clapboards and the next above it. It is adjustable to various widths of clapboard to be exposed to the weather.

Clapboard-gage.

a, abutment for clapboard already in place; *b*, sliding abutment for clapboard to be placed next above; *c*, slot with set-screw to hold *b* in place; *d*, index showing width of clapboard exposed to the weather.

clap-netter (klap′net-ėr), *n.* One who catches birds with a clap-net. *Athenæum*, Oct. 31, 1891, p. 587.

clapper[1], *n.* **8.** In *bot.*, the auricle in hepatics. See *auricle*, 3 (*c*).

claret-cheek (klar′et-chēk), *n.* Same as *capillary* ★*nævus.*

clarinet, *n.* **2.** In *organ-building*, a reed-stop imitating the tone of the clarinet.

Clark process. See ★*process.*

clash-gear (klash′gēr), *n.* A form of change-gear for motor-cars, in which the differing speeds of the driven shaft are secured by sliding or shifting tooth-wheels lengthwise on

parallel shafts until the desired pair comes into mesh. When the driving-gear is turning and the one to be driven is moving at a different rate, the engagement of the sets of teeth takes place with a jar or clash. Sometimes called *sliding-gear transmission.*

clashy (klash′i), *a.* [*clash* + *-y*[1].] **1.** Wet and disagreeable with drenching dashes of rain: applied to the weather: as, a *clashy* day.—**2.** Given to gossiping and tale-telling. [Dialectal in both senses.]

clasmatocyte (klas-mat′ō-sīt), *n.* [Gr. *κλάσμα(τ-)*, a fragment, a morsel, + *κύτος*, a hollow (a cell).] A large branching cell resembling a mast-cell, but containing no basophilic granules. *Med. Record*, June 27, 1903, p. 1046.

clasmatosis (klas-ma-tō′sis), *n.* [NL., < Gr. *κλάσμα(τ-)*, a fragment, a morsel, + *-osis.*] The process of breaking up into small fragments: applied to cell changes. *C. S. Minot*, in Science, March 29, 1901, p. 492.

clasp, *v. t.* **3.** To attach holdfasts of metal to the outer edges of (a book-cover) to prevent its yawning or warping.

clasp, *n.*, **1.** (*e*) The riveted shackle of a hemp or wire rope.

4. In the British army, a narrow flat bar of metal forming part of a military decoration, and bearing the name of some action at which the bearer was present.

For his [Earl Roberts's] services in the Mutiny war he was seven times mentioned in despatches, received the medal with three *clasps*, the Victoria Cross, and on his promotion to captain in October, 1860, a brevet majority. *Encyc. Brit.*, XXXII. 263.

Vachette clasp, a small piece of wire with curved pointed ends for clamping the edges of the wall of a horse's hoof together in cases of cracked hoof.

clasper, *n.* (*c*) The operator who makes clasps or attaches them to books or other articles.—**Frontal clasper**, a name applied to a peculiar appendage found on the head of the male chimæra. Also *frontal spine. Parker and Haswell*, Zoology, I. 175.

clasp-nut (klâsp′nut), *n.* A split nut which can be opened or closed to permit of its engaging or disengaging a screw at any point of its travel. Such a nut is commonly used to operate the carriage of an engine-lathe when cutting a thread. Sometimes called *clam-nut* and *clip-nut.*

class, *n.* **7.** In *petrog.*, in the quantitative classification of igneous rocks (see ★*rock*), the highest division. All igneous-rock magmas are divided into 5 classes, according to the proportions of salic and femic constituents. The salic minerals are quartz, feldspars, leucite, nephelite, sodalites, corundum, and zircon; the femic minerals are all other minerals except the aluminous ferromagnesian ones. These minerals are calculated from the chemical composition of each rock. The 5 classes are called *persalane, dosalane, salfemane, dofemane*, and *perfemane.*

8. (*a*) In *shipbuilding*, the indication of the character, style of construction, and quality of workmanship and outfit of a merchant vessel, as determined by the rules and inspection of a registration society. The class to which a vessel is assigned is indicated in the register of each society by a conventional character such as 100A, 90A, etc. See *A*, 2 (*f*). (*b*) the indication of the size and power of any given type of war-ship: as, a first-*class* battle-ship, a first-, second-, or third-*class* cruiser, etc.—**9.** In *crystallog.*, one of the thirty-two groups in which crystals are divided in accordance with the special type of symmetry which characterizes them. See ★*symmetry.*—**Age class**, in *forestry*, all the trees in a stand of which the ages are within given limits.—**Crown class**, in *forestry*, all the trees in a stand which occupy a similar position in the crown cover. Dominant, intermediate, overtopped, and suppressed trees each constitute a crown class.—**Diameter class**, in *forestry*, all the trees in a stand whose diameters are within prescribed limits.—**Form class**, in *forestry*, all the trees in a stand so similar in form that the same form factor is applicable in determining their actual volume.—**Height class**, in *forestry*, all the trees in a stand whose heights are within prescribed limits.—**Locality class**, in *forestry*, all localities with similar forest-producing power.—**Personality classes**, classes in the social population distinguished by differences of mental and moral endowment; in particular, the men of genius and talent, the normally endowed, and the mentally and morally defective. *Giddings*, Prin. of Sociol., p. 125.—**Social classes**, classes in the social population distinguished by differences of social instinct or feeling: they include the altruistic or philanthropic, the merely non-social or indifferent, the dependent or pauperized, and the anti-social or criminal classes. *Giddings*, Prin. of Sociol., p. 126.—**Stand class**, in *forestry*, all stands of similar density, height, and volume for a given age or diameter and a given locality class. The index stand may constitute the first *stand class.*—**Tree class**, in *forestry*, all trees of approximately the same size. The following tree classes are distinguished: *seedling, shoot, small sapling, large sapling, small pole, large pole, standard, veteran.*—**Vitality classes**, classes in the social population distinguished by different degrees of vitality, as shown in birth-rates, death-rates, and longevity. *Giddings*, Prin. of Sociol., p. 125.

class, *v.* **I.** *trans.* **3.** In *shipbuilding*, to assign to a class of a registration society, such as Lloyd's: said of a merchant vessel. A vessel not *classed* is one which has not been inspected and assigned a class by any registration society, or the classification of which has been refused for some reason, not necessarily involving deterioration or inferior quality.

II. *intrans.* **2.** To be assigned to a class. See ★I., 3.

class. An abbreviation (*a*) of *classic* or *classical*; (*b*) of *classification*.

class-consciousness (klàs-kon′shus-nes), *n.* The feeling and perception of unity which pervade any social class and include a sense of common nature, identity of interests, and similarity of manners.

classer (klàs′ėr), *n.* [*class* + *-er*[1].] One who classifies or sorts according to certain qualities or characteristics: as, a *classer* of wool or cotton.

classiary (klàs′i-ā-ri), *a.* [L. *classiarius*, < *classis*, a fleet: see *class*.] Of or pertaining to the fleet or navy, its personnel, or its exploits.

> A gallery was opened . . . for the display of inscriptions mentioning officers and men of the Roman "Channel Squadron," *classiary* tiles . . . bearing the stamp Cl. B.R. and a votive offering. *Athenæum*, Aug. 29, 1891, p. 290.

Classic landscape. See ★*landscape*.

classical[1], *a.* **6.** In *music*, belonging or pertaining to a style of composition in which regularity of form is conspicuous, particularly to the style developed in the latter part of the eighteenth century: opposed to *romantic*. Thus Haydn's music is classical, while Schumann's is mostly romantic. The term is also loosely used of all music that is elaborate, difficult, or abstruse: opposed to *popular*.—**Classical school**, in *music*, the group of composers who, from Haydn onward, emphasized orderliness of form rather than richness of emotional content: opposed to the *romantic school* (which see, under *romantic*).

classicalize (klàs′i-kạl-īz), *v. t.* and *i.*; pret. and pp. *classicalized*; ppr. *classicalizing*. [*classical* + *-ize*.] To conform, or cause to conform, to classical usages: as, to *classicalize* the modern spelling of Greek and Roman names.

classicism, *n.* **3.** Classical scholarship or learning.

> So far as all the *classicism* then attainable was concerned, Shakespeare got it as cheap as Goethe did, who always bought it ready made.
> *Lowell*, Among my Books, 1st ser., p. 188.

classicistic (klàs-i-sis′tik), *a.* Conformed to or characterized by classicism: as, the *classicistic* drama; the *classicistic* period of architecture.

classifiant (klàs-i-fī′ant), *a.* Same as *classific*, 3.—**Classifiant concept.** Same as *classific* ★*concept*.

classifically (klà-sif′i-kạl-i), *adv.* As a classifier: as, a word used *classifically*.

classification, *n.* **2.** In *shipbuilding*, the assignment to and arrangement of merchant vessels in classes by registration societies. See ★*class*, *n.*, 8.—**Sympodial classification**, classification based on the successive branchings of phenomena; classification growing out of differentiation in various directions, in contrast to hierarchical classifications, which recognize only one straight line of succession or progress.

classifier, *n.* **4.** In *ore concentration* and *milling*, an apparatus for subdividing ore-pulp, according to the size and density of the mineral articles, in moving currents.

class-marriage (klàs′mar″āj), *n.* In *ethnol.*, a system of marriage in which a person of one class is restricted in the choice of his or her mate to a definite class of individuals. *Keane*, Man Past and Present, p. 153.

class-number (klàs′num″bėr), *n.* In *library-cataloguing*, the number, or number and letter, which shows the class (as literature, history, philosophy, or science) to which a book belongs or the subject of which it treats. It is usually followed by other figures which indicate the particular division, subdivision, or section of the subject treated, and the number of the book.

Clasterosporium (klas″tėr-ō-spō′ri-um), *n.* [NL. (Schweinitz, 1831), < Gr. *κλαστός*, broken, + *σπορά*, seed (see *spore*). The allusion is to the manner in which conidiophores break up.] A genus of hyphomycetous fungi characterized by dark-colored hyphæ and conidiophores which bear brownish, three- (or more) celled cylindrical or spindle-shaped conidia. *C. Amygdalearum* is parasitic on the leaves of the peach, plum, cherry, etc., in Europe.

clastic, *a.* **II.** *n. pl.* In *petrog.*, sedimentary rocks composed of fragments of older rocks.

> This main structural feature, supported by the evidence afforded by the intrusive character of the contact between the crystallines and the *clastics*, by the marmorization and deformation of the adjacent country rock, and by the occurrence of an unusually complete series of typical contact-metamorphic minerals, is conclusive as to the part this intrusive mass has played in the history of the region.
> *Econ. Geol., U. S. Geol. Surv.*, 1902, p. 36.

clastogene (klas′tō-jēn), *a.* [Gr. *κλαστός*, broken, + *γένος*, kind (see *genus*).] In *petrog.*, a term used by Renevier (1881) for coarsely clastic rocks, such as conglomerates and breccias.

Clathraceæ (klath-rā′sē-ē), *n. pl.* [NL., < *Clathrus* + *-aceæ*.] A family of fungi of the order *Phallales*, named from the genus *Clathrus:* characterized by having the receptacle latticed or irregularly branched and inclosing the gleba.

Clathraria (klath-rā′ri-ạ), *n.* [NL. (Stokes and Webb, 1824), < L. *clathri*, lattice: see *clathrate*.] A genus name formerly given to fossil trunks with clathrate markings.

clathrarian (klath-rā′ri-ạn), *a.* [*Clathraria* + *-an*.] Of the nature of *Clathraria* (that is, of clathrate fossil trunks).

Clathrina (klath-rī′nạ), *n.* [NL., < L. *clathri*, lattice, + *-ina*[1].] The typical genus of the family *Clathrinidæ*. *Gray*, 1867.

Olynthus of *Clathrina primordialis*, H., seen with a low power. (After Haeckel.)

Clathrinidæ (klath-rin′i-dē), *n. pl.* [NL., < *Clathrina* + *-idæ*.] A family of homocœlous sponges, of the class *Calcarea*. They have the form reticulate, triradiate systems always present and equiangular, the monaxons present or absent, and the collar-cells with the nucleus at the base. The family contains the genera *Clathrina*, *Ascandra*, and *Dendya*.

Clathrodictyon (klath-rō-dik′ti-on), *n.* [NL., < L. *clathri*, Gr. *κλῆθρα*, lattice, + Gr. *δίκτυον*, net.] A genus of massive hydrocorallines which grew in extensive reefs in the seas of Silurian and Devonian times. In structure they were composed of successive fine laminæ with radial pillars between.

clatter, *n.* **3.** A heap of loose boulders or broken rocks. Compare *clutter*[2].

> Under shelter of the biggest rocks in the whole *clatter* . . . the word is good Moorland English for a mass of loose, weathered boulders on the skyline summit of a saddle-back ridge. *Pall Mall Gazette*, July 28, 1882.

4. Noisy gabble or talk; confused din of many jabbering tongues.

> By degrees, as the hour grew later, and the barrel [of beer] less heavy, the conversation changed into one universal *clatter*. *Bulwer*, Disowned, ii.

clatter-bones (klat′ėr-bōns), *n. pl.* Same as *bone*[1], *n.*, 6 (*c*), and *clapper*[1], 1 (*f*).

claudication, *n.*—**Intermittent claudication**, a limp which occurs suddenly while one is walking and disappears with rest: it is caused by defective circulation in the extremities, due usually to arteriosclerosis, and may terminate in gangrene of the limb. Also called *intermittent limping*. *Jour. Exper. Med.*, V. 104.

claus (klous), *n.* [Named from R. J. E. *Clausius* (1822–88), a German physicist. *Clausius* is a Latinized form of G. *Claus*, *Klaus*, ult. < L. *Nicolaus* (see *Santa Claus*).] In *physics*, a name proposed for the unit of entropy when the joule is the unit of energy.

clause, *n.*—**Memorandum clause**, in *marine insurance*, a clause added to an insurance policy which exempts the underwriters from risk as to goods of a peculiarly perishable nature and from minor damages.—**Overreaching clause**, in a resettlement, a clause which saves the powers of sale and leasing annexed to the estate for life created by the original settlement, when it is desired to give the tenant for life the same estate and powers under the resettlement. *Bouvier*, Law Dict.—**Penal clause**, in *law*: (*a*) That part of a statute which provides for punishment for its violation. (*b*) That part of a bond which defines the amount of the penalty.

Clausius cycle. See ★*cycle*[1].

claustration (klàs-trā′shọn), *n.* [NL. *claustratio*, < L. *claustrum*, cloister.] Confinement in a cloister.

Clavariaceæ (klā-vā-ri-ā′sē-ē), *n. pl.* [NL., < *Clavaria* + *-aceæ*.] Same as *Clavariei*, and now the regular form.

clavelization (klav-e-lī-zā′shọn), *n.* [F. **clavelisation*, < *clavelée* or *claveau*, sheep-pox, < ML. **clavellus*, dim. of L. *clavus*, a nail, also a tumor or diseased part on sheep or other animals: see *clavus*, *clove*[4].] Inoculation with the virus of sheep-pox.

clavicithern (klav-i-sith′ėrn), *n.* Same as *clavicitherium*.

> And wanteth there grace of lute or *clavicithern*, ye shall say to confirm him who singeth.
> *Browning*, Heretics' Tragedy, st. ii. (prose direction).

clavicle, *n.* **3.** The columella of a univalve shell.—**4.** In *ichth.*, usually the largest bone of the shoulder-girdle.—The supraclavicle, when present, is attached to its upper end, and the coracoid elements are attached to its posterior surface. It borders the gill-opening behind.

Clavicula anterior, in *ichth.*, the clavicle: a bone of the shoulder-girdle, bordering the gill-opening behind: doubtless not a homologue of the bone so called in mammals.—**Clavicula posterior**, in *ichth.*, the lower of the two bones which support the actinosts; the hypercoracoid.

claviculohumeral (kla-vik″ū-lō-hū′mẹ-rạl), *a.* In *anat.*, relating to both the clavicle and the humerus.

clavier, *n.* **4.** A dumb keyboard made for finger-gymnastics, as the Virgil *clavier*.

clavierist (kla-vēr′ist), *n.* A player on a clavier. *N. E. D.*

claviole (klav′i-ōl), *n.* [Also *claviol*; < *cla(vis)* + *viol*.] A musical instrument invented by Dr. Hawkins of Bordentown, New Jersey, in 1802. It had strings and a keyboard like an upright pianoforte, but by a roller mechanism it produced sustained tones by friction instead of by the blows of hammers.

clavipectoral (klav-i-pek′tọ-rạl), *a.* [L. *clavis*, representing NL. *clavicula*, clavicle, + *pectus*, breast, thorax.] Relating to both the clavicle and the thorax.

clavism (klā′vizm), *n.* [NL. **clavismus* (It. *clavismo*), < L. *clavus*, a nail.] A nail-like appearance, as of an excrescence. Same as *ergotism*[1], 2.

Clavulina (klav-ū-lī′nā), *n. pl.* [NL., < *clavula*, 2 (*b*), + *-ina*[2].] A group of hadromerine monaxonidan sponges having monactinal megascleres.

Clavulinæ, *n. pl.* Same as *Clavulina*.

clavus, *n.* **3.** In *pathol.*: (*b*) A corn. (*c*) A nail-shaped excrescence.—**4.** In *entom.*: (*b*) The club of the antenna. (*c*) The knob at the end of the stigmal or radial rein of a chalcidid or proctotrypid hymenopterous parasite.—**Clavus hystericus**, an acute localized boring pain in the head sometimes complained of by the hysterical.

claw, *n.*—**Extensor of the claw**, in *entom.*, a muscle peculiar to the terminal sclerite of the foot. It occupies a superior position and in operation extends the claw.—**Flexor of the claw**, in *entom.*, a muscle peculiar to the terminal sclerite of the foot. It occupies the upper and under surface of the posterior part of the sclerite and flexes the claw in contraction.

claw, *v. i.*—**To claw to windward** (*naut.*), to work a vessel to windward.

claw-clutch (klâ′kluch), *n.* A device for coupling shafts which require instant connection or separation. It is somewhat similar in outline to a flange-coupling, but, instead of the abutting faces being plain, projections or claws are cast on each face and engage in corresponding recesses in the face opposite. The claws usually number 2 or 4. The clutch is thrust in and out of gear through a pin or fork which works in a groove turned in the circumference of a boss cast on one coupling.

claw-coupling (klâ′kup″ling), *n.* Same as ★*claw-clutch*.

claw-footed (klâ′fůt-ed), *a.* Same as *claw-foot*.

claw-lever (klâ′lev″ėr), *n.* A lever which forks or divides like the claw of a hammer, so as to get on both sides of the article to be lifted. *Nasmith*, Cotton Spinning, p. 266.

claw-nut (klâ′nut), *n.* The split nut which engages the lead-screw on a screw-cutting lathe.

claw-tool (klâ′tōl), *n.* A saddler's tool, fitted to a handle, used for drawing tacks.

clay, *n.*—**Abysmal** or **abyssal clay.** See ★*abyssal*.—**Arca clay**, one of the series of clay deposits laid down during the Pleistocene or ice age in Scandinavia and Finland: so named from the presence of pelecypod mollusks of the genus *Arca*. At the bottom of these deposits is the Yoldia clay, above which comes the Arca clay, followed by the Mytilus and the Cardium clays. In the Arca clay Brögger finds that the shells of the lowest part are chiefly arctic, while in the upper part there is an advent of southern forms, indicating increasing warmth of the seas.—**Astringent clay**, a clay which usually contains alum.

> Where these porous sands and gravels lie upon the impervious chocolate-colored and *astringent clays*, the conditions are highly favorable for yielding large volumes of water.
> *R. D. Salisbury*, Geol. Survey of New Jersey, 1900, p. xvii.

Atherfield clay [*Atherfield* Point, a cape on the south coast of the Isle of Wight], a deposit of clays in the stratigraphic rock section of the Cretaceous formation of the Isle of Wight. It rests on the Wealden formation.—**Ball clay**, white-burning plastic sedimentary clay, used chiefly in the manufacture of the fine grades of pottery which have a white body. *Geol. Survey of New Jersey*, 1904, p. 214.—**Barton clay.** See *Bartonian* ★*group*.—**Blue clay**, deep-sea mud.—**Bradford clay**, in the Jurassic system of England, a local subdivision of the Bathonian or upper part of the Lower Oölite. It lies above the ragstones and below the cornbrash, at the base of a series of clays and limestones, the latter called *forest-marble*.—**Cardium clay.** See ★*cardium*.—**Clay-faced paper.** See ★*paper*.—**Clay-surface process**, in *photog.*, a process for quickly preparing line-printing blocks. Sheet-metal is coated with a composition of pipe- or china-clay, after which a drawing is made through the clay to the surface of the metal with hooked tools. A stereotype of the plate is then made which furnishes the block for the press.

—**Damp-clay process.** Same as *Prosser's* ★*process.* —**Egyptianized clay.** See ★*Egyptianize.*—**Erie clay,** in *geol.*, a series of unstratified clays of pleistocene age in the Lake Erie region. They lie on the glacial till and contain small scattered scratched boulders. The deposit is regarded as made by subglacial streams after their escape from the ice and by discharged water during the general melting of the ice-sheet.—**Fairlight clays,** in *geol.*, the lowest division of the Wealden Cretaceous series in Sussex and Kent, England.—**Fatty clay,** a soft and unctuous clay rich in kaolin and poor in sand.—**Glen Rose clay,** in *geol.*, a division of the lower Cretaceous rocks in Texas.—**Grinstead clay,** in *geol.*, a division of the Wealden Cretaceous rocks in Sussex and Kent, England.—**Hessle clay,** a local name for the upper boulder-clay at Hessle, England. *Geikie,* The Great Ice Age, p. 358.—**Joint clay,** in *geol.*, a name sometimes applied to those clays which on exposure develop marked systems of joints.—**Kimmeridge clay,** in *geol.*, a subdivision of the Jurassic system in England. It attains a thickness of 600 feet, is underlain by the Coral Rag, overlain by the Portland Sands, and constitutes the lower part of the Upper or Portland Oölites.—**Raritan clay,** in *geol.*, the clays of the Raritan formation in the Atlantic coast region of North America. They are of light color and arenaceous. See *Raritan* ★*formation.*—**Red clay,** an extremely fine reddish-brown mud which covers the ocean-bottom at depths below 2,000 fathoms. It results from the decomposition of pumice and fine volcanic dust, and sometimes contains *Foraminifera* and *Radiolaria.*—**Sangeen clay,** in *geol.*, a subdivision of the Pleistocene series in Canada. It is regarded by Canadian geologists as probably equivalent to the Upper Leda-clay.—**Speeton clay,** in *geol.*, a deposit of argillaceous strata on the Yorkshire coast which has been shown by its fossils to be continuous from the Kimmeridge clay of the Upper Jurassic to the top of the Lower Cretaceous or even into the Upper Cretaceous series.—**Walnut clay,** in *geol.*, a division of the Lower Cretaceous of Texas.—**Weathered clay,** clay rendered friable by exposure to the air in order that it may be more easily worked with water.—**Yoldia clay,** in *geol.*, a division of the Pleistocene deposits of Norway. It contains a shallow water fauna now submerged to great depths in the Norwegian seas and indicating a depression of the land of not less than 9,000 feet.

clay-burning (klā′bėr″ning), *n.* In *agri.*, the roasting of clay for use in ameliorating the soil, practised in parts of Great Britain. The stiff subsoil is dug up, mingled with waste fuels, and burnt like charcoal. The resulting ashes, if the burning is not excessive, are said to benefit some classes of soils, both mechanically and chemically.

clay-dike (klā-dīk′), *n.* A name given by Scottish coal-miners to a buried stream-course filled with clay, sand, and gravel, which traverses coal strata. *J. Geikie,* The Great Ice Age, p. 114.

clay-dog (klā-dog′), *n.* See *clay-stone.*

In the vicinity of Pleasant Plains, seven miles or so south of Morristown, the low plain (about 230 feet) is covered to a considerable depth with similar laminated clay, equally rich in concretions, which are locally known as "clay-stones," "*clay-dogs,*" "stone-dogs," &c.
R. D. Salisbury, Geol. Survey of New Jersey, 1892, p. 138.

clay-eater (klā′ē″tėr), *n.* A person who is in the habit of eating or chewing clay. This habit prevails among primitive tribes and degraded people in many parts of the world, particularly among the Indian tribes of the Orinoco and Amazon rivers, and among some 'poor whites' in the southern United States.

claying-iron (klā′ing-ī″ėrn), *n.* Same as *claying-bar.*

claypan (klā′pan), *n.* In *geol.*, a shallow, saucer-like depression with a bottom of clay: a feature of the dry interior of Australia. *Smithsonian Rep.* 1896, p. 253.

clay-press (klā′pres), *n.* In *ceram.*, a machine which consists of a screw that connects with a series of horizontal trays or plates, between which canvas bags containing the prepared clay or slip are placed and the surplus moisture is expelled by pressure. Also called *screw-press.*

claystone-porphyry (klā′stōn-pôr″fi-ri), *n.* In *petrog.*, a porphyry whose ground-mass has been somewhat altered to kaolin.

Clayton gas. See ★*gas.*

Clayton's apparatus. See ★*apparatus.*

cleading, *n.*, 4. (*b*) The wood composing the box of a mine-car. (*c*) The wooden portion of a rope-drum on which the rope is coiled.

clean, *a.* **13.** In good or wholesome condition: said of fishes which have neither recently spawned nor are about to spawn and are fit for food.—**14.** Unfeathered: said of pigeons which have no feathers on the feet, in distinction from those which are muffled, or have feathered feet.—**15.** *Naut.*: (*a*) said of a ship's form when it has acute or fine tapering lines: as, a *clean* entrance; a *clean* run. (*b*) Free from obstruction, as a coast, harbor, etc.—**Clean cutting, scrap.** See ★*cutting,* etc.—**Clean ship.** (*a*) A vessel without cargo. (*b*) A whaler without oil on board. (*c*) A ship in good condition; a cleanly vessel.—**Clean off the reel,** sailing so fast as to pull the log-line off the reel without the necessity of feeding it to the chip-log.

clean, *v. t.* **3.** In *agri.*, to clear (land) of weeds.

Now, the way in which farmers *clean* their land is by ploughing it up. *R. H. Wallace,* Agriculture, p. 142.

To clean the board, to take or win everything; make a clean sweep.

cleaner, *n.* (*d*) A special preparation, either saponaceous, ethereal, or both, used for removing grease-spots, ink-stains, etc., from fabrics. (*e*) A device for automatically cleaning scum or floating matter from the surface of water in a boiler and depositing it in a separator or settling-chamber located on top of the boiler. It consists of a skimmer in the boiler, to which is attached a vertical pipe which discharges into the settling-chamber near its top. From a point at the other side of the settling-chamber a return-pipe leads into the boiler, discharging somewhat below the water-level.

cleaning, *n.* **3.** In *forestry,* a thinning made in a stand which has not reached the small-pole stage. Its main object is to remove trees of undesirable form and species. See ★*thinning.*

cleaning-cloth (klē′ning-klôth), *n.* A cloth used for cleaning; specifically, a cotton fabric of coarse spongy texture, woven by the aid of two needle-bars.

cleaning-doctor (klē′ning-dok″tọr), *n.* Same as *color-doctor.*

cleaning-drum (klē′ning-drum), *n.* Same as ★*wash-drum. Sci. Amer. Sup.,* Feb. 27, 1904, p. 23534.

cleaning-foot (klē′ning-fůt), *n.* In certain of the *Crustacea,* the appendage on the basal joint of the exopodite, which serves to dislodge foreign bodies from the branchial chamber.

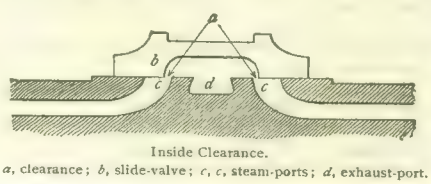
cleaning-pit (klē′ning-pit), *n.* A pit over which locomotives are run for the purpose of cleaning the ash-pans and fires. Similar pits are used for cleaning and repairing the motors of electric cars.

clean-out (klēn′out), *n.* In *plumbing,* a metal cylinder with a removable cap calked to a waste- or drain-pipe to facilitate its being cleaned out when stopped: as, a brass *clean-out.*

cleansing (klen′zing), *n.* [ME. *clensing,* < AS. *clænsung,* < *clænsian,* cleanse: see *cleanse.*] **1.** The act of making clean; cleaning; purification.—**2.** That which is removed in cleaning; dirt or refuse removed; specifically, the placenta or afterbirth: usually applied to animals.

clean-skins (klēn′skinz), *n. pl.* See *skin.*

clean-up, *n.*—**Clean-up barrel,** in *gold-milling,* a revolving iron drum containing iron balls and mercury for grinding and amalgamating rich products requiring such treatment and coming from the periodic cleaning up of the stamp-mill.—**Clean-up pan,** in *gold-milling,* a cast-iron grinding and amalgamating apparatus for treating products from clean-up operations.



clear. **I.** *a.*—**Clear day,** a day marked by the absence of rain and clouds; as used technically by the United States Weather Bureau, a day in which the average obscuration, between sunrise and sunset, is $\frac{3}{10}$ or less.—**Clear length,** in *forestry,* that portion of the stem which is free from branches. In forest measurements the meaning of the term varies with the species measured and the purpose of the measurements: for example, in some cases it is used to designate that portion of the stem which is free from dead branches or from growing ones of a given size.—**Clear sky.** See ★*clear day.*—**Clear trunk.** Same as ★*clear length.*—**Half clear,** partly depolished: said of glass.

II. *n.* **4.** In *bot.*, an open space.

clearance, *n.* **5.** A piece of land which has been cleared for cultivation or for building; a clearing.—**6.** In *railroading:* (*a*) A difference between the track-gage and the gage of the exterior surface of the wheel-flanges, designed to allow a certain amount of play between the flanges and the rails. (*b*) At a crossing or frog, the clear space left between cross-rails and the frog and guard-rail for the free passage of the flanges of the wheels. (*c*) The clear space between the sides and top of a tunnel or bridge and the outside dimensions of the largest car passing through it.—**7.** In *steam-engines,* the volume or entire space below the valve-face which is filled with steam at the beginning of a stroke, including the space between piston and cylinder-head and the volume of the steam-ducts to the valve-seat.—**8.** The settlement or payment of a debt; the passing of checks and drafts through the clearing-house for their settlement.

Many millions in value of such bills are weekly cleared through the London bankers, and these *clearances* represent a large . . . amount of these commercial instruments. *J. T. Rogers,* Polit. Econ., xi.

Inside clearance, in the slide-valve of a steam-engine, a space between the inner or exhaust edge of the valve and the inner edge of the port opening when the valve stands in its central position. Both ends of the cylinder will then be in communication with the exhaust-outlet, each by the amount of this clearance. It is given in high-speed engines to secure free escape of exhaust-steam, but is incompatible with economical working with a high degree of expansion or early cut-off.

Inside Clearance.
a, clearance; *b*, slide-valve; *c*, *c*, steam-ports; *d*, exhaust-port.

clearance-car (klēr′ans-kär), *n.* A flat-car on which is erected a light frame of the same cross-section as the cars to be used on a new road; it is employed to find out if there is ample clearance through bridges, etc. See ★*clearance,* 6 (*c*).

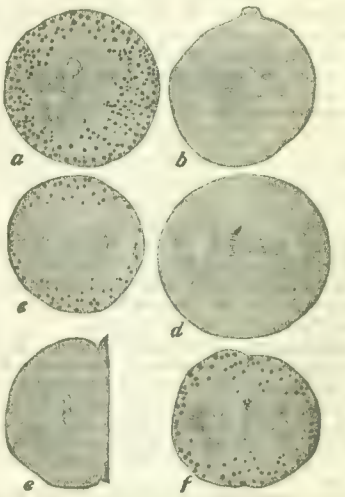
clearance-point (klēr′ans-point), *n.* In *railroading,* the point at a siding where the siding-track is sufficiently far from the line-track to allow a train upon the one to clear or pass a car standing on the other. See *switch.*

clearance-steam (klēr′ans-stēm), *n.* The steam which fills the clearance-space of a steam cylinder, between the head of the piston and the under surface of the distributing-valve.

clearer, *n.* **3.** On a wool- or cotton-carding machine, a small roller or cylinder for working the stock. *Nasmith,* Cotton Spinning, p. 101.—**Self-stripping clearer,** a device which removes the loose fibers from the top draft-rollers of cotton-spinning and -combing machines, and which automatically clears itself of such fibers.

clearer-brush (klēr′ėr-brush), *n.* A bristle brush, on a cotton-cop winding machine, for clearing the yarn from loose fibers, leaves, etc. *R. Marsden,* Cotton Weaving, p. 257.

clearing-doctor (klēr′ing-dok″tọr), *n.* Same as *color-doctor.*



clearing-hole (klēr′ing-hōl), *n.* A hole made to its full nominal diameter, so that a bolt or shaft of the same diameter can pass through it, but will fit closely: used in opposition to *tap-sized hole* or *tapping-hole.*

clearing-house, *n.*—**Clearing-house certificate,** a certificate of deposit issued by a clearing-house. Such certificates are negotiable only between banks which are members of the clearing-house association. Under special circumstances similar certificates have been issued by the clearing-house on the deposit of securities instead of specie.

clear-skins (klēr′skinz), *n. pl.* Same as *clean-skins* (which see, under *skin*).

clearstory, *n.*—**Clearstory window,** a window of a clearstory; that is, a window in the wall above the nave-arcade and the aisle-roof. In large Gothic churches the principal light is through the clearstory windows.

Cleavage electricity. See ★*electricity.*—**Cleavage lines of the skin,** lines along which the skin more easily tears, owing to the arrangement of bundles of fibrous tissue in the corium.—**Cleavage nucleus,** in *embryol.*, the nucleus which results from the union of the male and female pronuclei, before the division of the egg into two blastomeres.—**Strain-slip cleavage,** a cleavage in rocks, usually associated with fine crumpling and produced when a shearing-strain overcomes the cohesion. *Geikie,* Text-book of Geol., p. 681.

Fertilization in an annelid (armed Gephyrean), *Thalassema* [Griffin].

a, approach of the egg-nucleus and sperm-nucleus, the latter accompanied by the sperm-amphiaster; *b*, union of the nuclei to form cleavage-nucleus; *c*, prophase of cleavage-spindle; *d*, anaphase of the same, centrosome divided; *e*, nuclear reconstitution and formation of the daughter-amphiasters for the second cleavage; *f*, two-cell stage. Magnified. (From Wilson's "The Cell.")

cleavage-product (klē′vāj-prod″ukt), *n.* A compound formed by the decomposition of a more complex substance. The action is usually, but not always, hydrolytic and may be caused by water, acids or alkalies, enzymes, micro-organisms, etc. Thus, when albumin is treated with baryta water it yields, as cleavage-products, ammonia, carbon dioxid, oxalic acid, pyrrol, leucin, tyrosin, aspartic acid, etc.

cleavage-spindle (klē′vāj-spin″dl), *n.* In *embryol.* and *cytol.*, the karyokinetic spindle of a dividing cleavage-cell, or blastomere, during the early development of the ovum.

cleave[2], *v. t.* **4.** In *agri.*, to replow (old ridges) in such a manner as to divide each in the middle. See ★*cleaving*. Also *split*. [Great Britain.]

cleave[2] (klēv), *n.* In *mining*, a subdivision of a bed, usually of iron ore; a bench. [Scotch.]

cleave[3] (klēv), *n.* [Ir. *cliabh* (pron. klē′av), OIr. *cliab*, Gael. *cliabh*, a basket; akin to Ir. Gael. *cliath*, a hurdle.] A basket or basketful: as a *cleave* of potatoes, or of turf. [Irish.]

Now Sir Condy . . . sent out for a couple of *cleaves-full* of the sods of his farm.
Miss Edgeworth, Castle Rackrent, p. 49.

cleavers, *n.*, **1.** (*b*) Any plant of the genus *Galium*, such as bedstraw, goose-grass, etc., the numerous species being distinguished by appropriate qualifying names. Of native American species, *G. circæzans* is called *cross-cleavers* from the cross-like arrangement of the four leaves of the whorls. The dyer's-cleavers is *G. tinctorium*, also called *wild madder*.

cleaverwort (klē′vėr-wėrt), *n.* Same as ★*cleavers*.

cleaving (klē′ving), *n.* In *agri.*, a method of plowing over old ridges or 'lands,' in which each ridge is divided in the middle, the furrow-slices being turned in opposite directions. Either two narrow ridges are thus formed of one old one, or each half, with half of the next, forms a new ridge with its crown in place of the former water-furrow. In the latter case, the method is called *crown and furrow plowing*. Also *splitting*. [Great Britain.]

cleekie, *n.* See ★*cleikie*.

cleeksman, *n.* See ★*cleiksman*.

cleft[1], *n.*—**Hyomandibular cleft**, in *embryol.* and *anat.*, the branchial cleft between the mandibular and hyoid arches in embryo vertebrates and in adult fishes.—**Posthyoidean cleft**, in *embryol.* and *anat.*, the branchial cleft between the hyoid and first branchial arches in embryo vertebrates and in adult fishes.

cleft[2], *p. a.*—**Cleft hand**, a congenital malformation of the hand in which the division between the fingers is prolonged into the metacarpus.

cleik, *n.*, **1.** (*b*) In *mining*, a hook. In former times the baskets of coal were attached to the hoisting-rope by a cleik, a term which was extended to mean the whole organization for raising the coal: thus, 'stegging the cleik' meant stopping the output of coal.—**Driving-cleik.** See ★*driving-cleik*.—**Putting-cleik.** See ★*putting-cleik*. [Scotch.]

cleik-coal (klēk′kōl), *n.* Coal as it comes from the pit. [Scotch.]

cleikie, cleekie (klē′ki), *n.* Same as ★*cleiksman*.

cleiksman, cleeksman (klēks′man), *n.*; pl. *cleiksmen, cleeksmen* (-men). In former times, the person who unhooked the baskets of coal at the pit-head. Also *cleikie*. [Scotch.]

Cleithrum, *n.* See ★*clithrum*.

clematine, *n.* **2.** In *color-chem.*, a basic coal-tar color of the azonium chlorid type. It dyes tannin-mordanted cotton a reddish violet.

clematitin (klem-a-tī′tin), *n.* [*Clematitis* + *-in*[2].] A little-known compound found in the snakeroot of Virginia and Texas, *Aristolochia Clematitis*. It is supposed to be identical with the alkaloid aristolochine or serpentarine found in other plants of this family.

cleme[2] (klēm), *n.* [Gr. *κλῆμα*, a twig, ⟨ *κλᾶν*, break. Cf. *clon*, from the same source.] In the nomenclature of the spicular elements of sponges, a hexactine rod bearing alternate barbs on the opposite sides.

clementine[2] (klem′en-tin), *n.* [Appar. ⟨ *Clément*, a French surname (?), + *-ine*[2].] Same as *methylene-*★*violet*.

clench-cutter (klench′kut″ėr), *n.* A blacksmith's instrument for cutting the clenches on the nails of a horse's shoe previous to removing it from his foot. It is a small wedge-shaped piece of steel with a metal handle. Also *clinch-cutter*.

Clench-cutter.

clench-machine (klench′ma-shēn″), *n.* In *shoe-manuf.*, a machine for nailing shoes with a bent wire or clench; a sole-fastening machine. The machine takes the wire from a reel, corrugates it or forms it into a fastening, and bends back or clenches the ends in the sole.

clenliness, clenly, clenz, *n.* Simplified spellings of *cleanliness*, etc.

Cleopatra's needle. See *obelisk*, 1.

Clepsydrops (klep-sī′drops), *n.* [Gr. *κλεψύδρα*, water-clock, + *ὤψ*, face.] A genus of extinct rhynchocephalian reptiles, typical of the family *Clepsydropidæ*, having a long and narrow skull, upper canine and anterior incisors much larger than the other teeth, intercentra in the dorsal and caudal vertebræ, and double-headed anterior ribs. They occur in the Permian rocks of North America.

cleptic, kleptic (klep′tik), *a.* [Gr. *κλεπτικός*, ⟨ *κλέπτης*, a thief, ⟨ *κλέπτειν*, steal. Compare *klepht*.] Given to stealing or thieving.

cleptobiosis (klep″tō-bī-ō′sis), *n.* [Irreg. ⟨ Gr. *κλέπτειν*, steal, + *βίωσις*, a way of life.] A form of symbiosis observed between two colonies of ants of different species, one of which inhabits the walls between the galleries and subsists on the progeny or stores of the other species. *W. M. Wheeler*, 1901.

cleptobiotic (klep″tō-bī-ot′ik), *a.* Of or pertaining to cleptobiosis.

cleptocracy, kleptocracy (klep-tok′ra-si), *n.* [Gr. *κλέπτης*, a thief + *-κρατία*, ⟨ *κρατεῖν*, rule. Compare *aristocracy*, etc.] Thieves regarded as a ruling class; thieves collectively.

cleptophobia, kleptophobia (klep-tō-fō′bi-a), *n.* [Gr. *κλέπτης*, a thief (⟨ *κλέπτειν*, steal), + *-φοβία*, ⟨ *φοβεῖν*, fear.] An abnormal dread of becoming a thief.

cleptoscope (klep′tō-skōp), *n.* [Irreg. ⟨ Gr. *κλέπτειν*, steal, + *σκοπεῖν*, view.] An apparatus, fitted with prisms, which enables persons in a submerged submarine boat to ascertain what is going on above the surface of the water.

An Italian engineer, M. Triulzi, has devised a special instrument, the *cleptoscope*, whereby it is possible for the crew of a submarine boat to ascertain what is progressing on the surface while submerged. It comprises a tube fitted with crystal prisms in a special manner.
Sci. Amer., Nov. 23, 1901, p. 329.

clergy, *n.* **1.** Sometimes applied to the ecclesiastics, ministers, and priests of non-Christian religious systems.—**Regular clergy**, the body of clergy living in religious communities under a common rule, as distinguished from the clergy who have parochial charge of the laity immediately under diocesan jurisdiction.—**Secular clergy**, the body of clergy in charge of parishes, as distinguished from the clergy living in religious communities.

clergy-house (klėr′ji-hous″), *n.* The residence of the clergymen or clergyman in charge of a church.

Clerical error, in *law*, a mistake in the draft or copy of a statute, record, or other instrument, inadvertently made, and so apparent upon its face that the intent is not affected.

clericalist (kler′i-kal-ist), *n.* One who belongs to a clerical party or who favors clericalism.

His [Alford's] early training was in the evangelical school; he was to some extent carried away by the *clericalist* movement of the years 1835-42.
Dict. Nat. Biog., I. 283.

clericalize (kler′i-kal-īz), *v. t.*; pret. and pp. *clericalized*, ppr. *clericalizing*. To render clerical; exalt the influence of the clergy.

clericature (kler′i-kā-tūr), *n.* [NL. *clericatura*, ⟨ *clericare*, make a cleric, ⟨ LL. *clericus*, a cleric.] Clerical position or authority.

Holy orders were sometimes assumed on account of the superior opportunities which *clericature* gave of improper intercourse with women.
H. C. Lea, Sacerdotal Celibacy, v.

clerigo (kler′i-gō), *n.* [Sp.: see *cleric*.] **1.** In the Philippine Islands, a cleric who has taken orders and is dedicated to the service of the church, but who is not a member of a monastic order.—**2.** In Porto Rico, a fly-catcher, *Tyrannus taylori*.

Clerk of works, one who superintends the erection of a building or buildings, and who is particularly charged to see that the specifications are followed as regards the quality of the materials, the thoroughness of the workmanship, etc.; an architect's building-inspector. [Eng.]—**Credit clerk**, a clerk who has charge of the credit department of a business.—**Lay clerk.** (*a*) A singing-man in a cathedral or collegiate church. (*b*) A parish clerk. See *clerk*, 3.

clerkage (klėrk′āj), *n.* **1.** Clerk's work; clerical work.—**2.** An amount expended for clerical work.—**3.** A number of clerks; clerks collectively.

clerkery (klėrk′e-ri), *n.* **1.** A counting-house.—**2.** Clerks collectively.—**3.** The calling or office of clerk.

clestine (kles′tin), *n.* [Gr. *κληστός*, *κλειστός*, that can be shut, + *-ine*[1].] In *bot.*, a large parenchymatous cell in which raphides are often deposited.

Clethraceæ (kleth-rā′sē-ē), *n. pl.* [NL. (Klotzsch, 1851), ⟨ *Clethra* + *-aceæ*.] A family of dicotyledonous sympetalous plants of the order *Ericales*, the white alder family, formerly included in the *Ericaceæ*, or heath family, and containing only the genus *Clethra*. See *Clethra*.

clethraceous (kleth-rā′shius), *a.* Belonging to the plant-family *Clethraceæ*.

Cleveland ironstone, ore, shale. See ★*ironstone*, etc.

clevis, *n.*—**Downhill clevis**, a brake on a logging-sled, consisting of a clevis which encircles the runner, to the bottom of which a heavy square piece of iron is welded.

cliack (klī′ak), *n.* [Also *clyack*; possibly from Gael. *cliathach*, battle.] In Scotland and the north of England, prior to the general introduction of reaping-machines, the last sheaf or armful of grain cut on a farm in harvest-time.

cliché, *n.* **2.** A stereotyped formula; a lifeless copy. [Rare.]

After the course of a hundred years the varieties of expression are apt to become exhausted, the forms grow hard, all the obvious motives tend to express themselves no longer as thoughts but as *clichés*.
Encyc. Brit., XXVIII. 261.

click[1], *v. i.* **2.** To overreach, as a horse, and strike the front of the hind foot against the shoe of the fore foot, making a clicking sound.—**Clicking butterfly.** See ★*butterfly*.

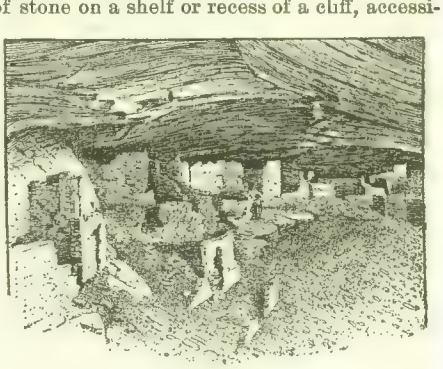
click-catch (klik′kach), *n.* A device on the carriage of a spinning-mule which communicates to the spindle the motion for winding on the yarn. *Nasmith*, Cotton Spinning, p. 295.

clickership (klik′er-ship), *n.* The functions of an under-foreman who controls the work of typesetters intrusted with the composition of a book.

click-spring (klik′spring), *n.* A spring which forces the dog or click of a ratchet-and-dog combination to fall into the space between teeth after the dog is lifted. The spring causes the dog to click. *Nasmith*, Cotton Spinning, p. 295.

Clidophorus (kli-dof′ō-rus), *n.* [NL., ⟨ Gr. *κλείς* (*κλειδ-*), a key, + *-φορος*, ⟨ *φέρειν*, bear.] A genus of extinct *Pelecypoda* of the family *Ledidæ*, of primitive taxodont type, with teeth in a continuous series on both sides of the beak, and a clavicle, in both valves, extending from the umbones. It occurs in Silurian and Devonian rocks. Also *Nuculites*.

clier (klī′ėr), *n.* [Also *clyer, clyre*; connected with D. *klier*, MD. *cliere*, E. Fries. *klire, klīr*, a gland, a glandular swelling.] A glandular swelling or scrofulous tumor of the skin which occurs in various parts of the body of cattle, especially affecting those parts which have lymph-glands situated in them.



cliff[1], *n.* **2.** The strata of rock above or between the strata of coal.—**3.** [Appar. orig. *cliff chalk*.] Hard chalk.

Cliff . . . 4. Stone, commonly chalk, put to hinder certain portions of the Trent banks from being washed away by the tide. *Eng. Dial. Dict.*

Cliff glacier. See ★*glacier*.—**French cliff**, a hard kind of chalk, from the lower part of the valley of the Seine in France, used in England as a source of lime for making bleaching-powder.

cliff-dweller (klif′dwel-ėr), *n.* A member of one of the aboriginal tribes in the southwestern United States who built their dwellings in natural recesses in cliffs.—**Cliff-dwellers' pottery.** See ★*pottery*.

cliff-dwelling (klif′dwel″ing), *n.* A dwelling of stone on a shelf or recess of a cliff, accessible only by steep paths, steps, or ladders. Cliff-dwellings are found in many cañons of the southwestern United States. The cave-dwellings of some Indians of northern Mexico are similar in type to the prehistoric cliff-dwellings. The culture of the cliff-dwellers was similar in general type to that of the more recent Pueblos.

A Cliff-dwelling.

cliffed (klift), *a.* [*cliff* + *-ed*[2].] Possessed of cliffs.

cliff-elm (klif′elm), *n.* Same as ★*cork-elm*.

cliff-house (klif′hous), *n.* Same as ★*cliff-dwelling*.

Cliffordian (kli-fôrd′i-an), *a.* Of or pertaining to W. K. Clifford (1845-79), an English mathematician and philosopher.

Clifford's box, geometry, space. See ★*box*[2], etc.

cliffsman (klifs'man), *n.* One who is accustomed to climb cliffs.

Climacograptus (klim″a-kō-grap'tus), *n.* [NL., < Gr. *κλῖμαξ*, a ladder, + *γραπτός*, written, < *γράφειν*, write.] A genus of Silurian graptolites which have a row of thecæ or cells on each side of the stipe, nearly vertical to the central axis.

Climacteric disease, any disease which occurs at a climacteric period, as puberty or the menopause, and is related to the physical changes of that time.

climactic (klī-mak'tik), *a.* [Irreg. for **climacic*, < Gr. *κλῖμαξ* (*κλῖμακ-*), climax.] Of, pertaining to, or of the nature of a climax; ascending or leading to a climax.

Give the history of development a *climactic* form.
Whitney, Life and Growth of Lang., p. 212.

climactical (klī-mak'ti-kal), *a.* Same as ★*climactic*.

The *climactical* point [in the development of wireless telegraphy] was not reached in this country until Marconi arrived here and reported the yacht races in the fall of the same year. *Amer. Inventor*, Dec. 15, 1903, p. 273.

climactichnite (klī-mak-tik'nīt), *n.* [NL. *climactichnites*, erroneously formed from Gr. *κλῖμαξ*, ladder, + *ἴχνος*, track (see *ichnite*).] An impression believed to have been made by a mollusk crawling over the primordial beach. It occurs on sandstone beds of Cambrian age.

climate, *n.*—**Antarctic climate,** the climate of the antarctic regions. It appears to be distinguished by heavier and longer-continued winds, and by rather less severe cold, than that of the arctic region.—**Arctic climate,** the climate of the arctic regions; figuratively, any very cold weather continuing for a long season.—**Climate-and-crop service,** the organization or division of the United States Weather Bureau which pays especial attention to the relation of the climate to crops. It publishes monthly climate-and-crop reports for 45 divisions, called State weather services, covering all portions of the United States; also weekly reports summarizing the rainfall, temperature, and vegetation during the growing-season, based on the returns from about twenty thousand reporters. During the winter season it publishes monthly reports of the condition of the snow and ice. It does not publish statistics of the crops proper, but only of the climatic conditions and their influences irrespective of other considerations.—**Geological climate,** the climate of any region during any geological period or epoch, including the slow changes with altitude, continentality, etc.—**Glacial climate,** the climate due to the presence of glaciers; the climate of the whole glacial period, including that of the successive glacial and interglacial times.—**Interglacial climate,** the climate prevailing during the intervals between the successive glaciations of any region.—**Landward climate,** the climate on the landward slope of a mountain or ridge. Its principal characteristics are derived from the land-breezes which ascend or the sea-breezes which descend the mountain's slope.—**Optical climate.** See *photochemical* ★*climate*.—**Photochemical climate,** the climate as defined by the chemical activity of the direct solar rays, or of the blue sky and direct rays combined, as distinguished from the *thermal climate*, which is defined by the heating power of the sunshine, or from the *optical climate*, which is defined by the general optical condition of the atmosphere as regards transparency, haze, color, dryness, hardness, softness, and atmospheric perspective.—**Seaward climate,** a local climate whose principal characteristics are derived from ocean winds; the climate of the seaward slope of a mountain or ridge.—**Solar climate,** the climate due to the effect of the sun's rays upon an ideal earth without an atmosphere. The solar climate as modified by atmospheric absorption and by the clouds, the winds, the irregularities of the earth's surface, and the general distribution of continents and oceans becomes the actual telluric climate. See *insolation*.—**Telluric climate.** See *solar* ★*climate*. **Thermal climate.** See *photochemical* ★*climate*.

Climatic disease, formation. See ★*disease*, ★*formation*.—**Climatic theory,** a theory that attempts to explain the secular changes of climate recognized in the study of geology. The great ice age, or glacial epoch, offered a succession of glacial and interglacial periods during which an ice-sheet covered northern Europe and North America and the snow-line in the Alps was much nearer sea-level than at present. During Tertiary time the mean temperatures that apparently prevailed in Greenland and Spitzbergen were much higher than those that now prevail there. In the Rocky Mountain region the drying up of large lakes to their present small representatives seems to show that during the Quaternary epoch there was greater rainfall and less evaporation than at present, and also a period of glaciation. These secular variations of climate have led to the development of climatological theories that have had a profound influence on the study of geology. Among these theories are that of Dubois, in which special stress is laid upon possible changes in the character and amount of the radiation from the sun; of Adhemar, which assumes the accumulation of ice at the poles to have been sufficient to displace the center of gravity of the earth and the boundaries of the ocean; of Schmick, which assumes a disturbance of the tides produced by the sun and moon, and hence a different distribution of water; of Croll, which assumes a change in the seasons produced by a change in the eccentricity of the earth's orbit; of Ball, which supposes a change in the ratio of heat received by the northern and southern hemispheres consequent on the change in eccentricity; of De Marchi, which rests upon a change in the coefficient of transparency of the atmosphere for solar rays and for terrestrial radiations; of Arrhenius, which is based upon possible changes in the amount of carbon dioxid in the atmosphere and its effect on the atmospheric absorption of the solar heat; of Schiaparelli and Davis, which demands changes in the position of the earth's axis or rotation due to extensive geological processes; of Zenker and of Lyell, which is based on a radically different distribution of land and water on the earth's surface due to the rising and falling of continents or ocean beds.—**Climatic zone.** See ★*zone*.—**Hinrichs's climatic index.** See ★*index*.

Climatius (kli-mā'ti-us), *n.* [NL., appar. < Gr. *κλῖμα(τ-)*, a slope: see *climate*.] An extinct genus of acanthodean fishes, described by Agassiz from the Old Red Sandstone of Great Britain, with strongly heterocercal tail and broad, strong fin-spines and three or four pairs of free spines between the paired fins.

climatology of soils, the investigation and study of the relations of soils to climate and organic life, especially to agricultural crops and prosperity.—**Geographical climatology,** the study of the distribution of climates over the surface of the earth and of the peculiarities of climate that depend upon the situation of the station relative to the ocean or continent, or upon its altitude above sea-level.—**Topographical climatology,** the study of the relation between topographic forms and the climatological conditions under which they were evolved; the relation between the climates of the past and the existing orography of the globe.

climatotherapeutics (klī″ma-tō-ther-a-pū'tiks), *n.* [Gr. *κλῖμα(τ-)*, a region, zone, + *θεραπευτικός*, of medical treatment: see *therapeutic*.] Same as ★*climatotherapy*.

climatotherapy (klī″ma-tō-ther'a-pi), *n.* [Gr. *κλῖμα(τ-)*, a region, zone, + *θεραπεία*, medical treatment.] The treatment of disease by means of a favorable climate, chosen with regard to the atmospheric pressure, purity of air, relative temperature, moisture, etc.

Various questions relative to *climato-therapy* will also be discussed. *Monthly Weather Rev.*, March, 1903, p. 138.

climb, *v. i.*—**To climb down,** to descend from a height by the use of both hands and feet; figuratively, to retreat from some point, position, statement, decision, or claim that has been found untenable. [Colloq., U. S.]

climb-down (klīm'doun), *n.* Descent; the abandonment of a high position taken on some point or question, when it has been found untenable or unacceptable. [Colloq.]

climber[1], *n.*—**Watchspring climber,** a liana with thin, spirally coiled, naked tendrils, which become thicker and harder upon stimulus of contact. It is tropical only. See *tendril-climber*, under *climber*[1], 2.

climbing-fish, *n.* 2. A gobioid fish of the north of New South Wales and of Queensland, *Periophthalmus australis*. Also called *hopping-fish* and *skipper*.

clinamen (klī-nā'men), *n.*; pl. *clinamina* (klī-nam'i-nä). [L. *clināmen*, < **clināre*, bend: see *cline*, *incline*.] 1. Inclination or tendency to turn aside; bias.—2. An event without any cause: in reference to the Epicurean theory of the causeless swervings of the atoms.

clinatory† (klin'a-tō-ri), *n.* [NL. **clinatorium*, < L. **clinare*, incline: see *clinant*, *cline*.] An instrument for ascertaining the position of a line or plane with reference to its azimuth and altitude; a declinator. *N. E. D.*

clinch-cutter, *n.* See ★*clench-cutter*.

clinckaert (klink'ärt), *n.* [MD.] A gold coin of Holland of the 14th and 15th centuries. It corresponded to the French chaise.

cling, *n.* 3. A dysentery or bloody flux of sheep; a frequently fatal inflammation of the large intestine of sheep, accompanied with fever and fluid discharges from the bowels.—4. In *hort.*, a peach, nectarine, or apricot in which the flesh adheres strongly to the stone; a clingstone.

clinger (kling'ėr), *n.* One who clings: applied sometimes to persons of a stationary social type or class, who depend on others for support and leadership. *Patten*, Develop. of Eng. Thought, p. 24.

clingfish (kling'fish), *n.* Any species of fish belonging to the suborder *Xenopterygii*, small fishes living chiefly in shallow pools among the rocks, and having a ventral sucking-disk with which they are enabled to cling to any object.

clinic, *n.* 4. Same as *dispensary*, 2.

clinician, *n.* 2. A practical physician whose methods are based on experience rather than on theory; also, a teacher of medicine whose method of instruction is clinical rather than didactic.

clinicopathological (klin″i-kō-path-ō-loj'i-kal), *a.* Relating both to the symptoms of disease and to the lesions produced by it.

Thus . . . we have . . . the *clinicopathological* examinations by Vialet, Déjérine, and Henschen, of cases of disease in man.
Philos. Trans. Roy. Soc. (London), ser. B, 1898, p. 2.

clinium (klin'i-um), *n.*; pl. *clinia* (-ä). [NL., dim., < Gr. *κλίνη*, a bed.] 1. Same as *clinanthium*.—2. A sporophore of some fungi.

Clink[2] (klingk), *n.* [Prob. orig. a jocular term, meaning a place where one hears the 'clink' of bolts, bars, or chains: see *clink*[1], *n.* Names of prisons are often jocular; cf. *jug*, *quod*, *cage*, and *jail* ('little cage').] 1. The name of a prison or lockup in Southwark, London, often mentioned in the sixteenth century and later. Hence—2. [*l. c.*] Any prison.

clinker, *n.* 9. In *cricket*, a ball bowled exceedingly well. [Slang.]—**Sterile clinker,** a name given in sewage-disposal works to the porous bed which is made of cinder freed from soluble elements. Such porous or absorptive layers not only withdraw color from solution, but also take in some of the nitrogenous compounds. *Nature*, Dec. 10, 1903, p. 139.

clino-anemometer (klī″nō-an-e-mom'e-tėr), *n.* The inclined-blade anemometer of Dechevrens, established in 1889 in the Eiffel Tower in Paris, and in 1898 at the observatory of the Isle of Jersey. It is designed to measure the vertical movement of the wind, as well as the horizontal whence the angular inclination of the wind to the horizon may be computed.

clinocephalic (klī″nō-se-fal'ik), *a.* [Irreg. < Gr. *κλίνειν*, incline, + *κεφαλή*, head.] In *anthrop.*, said of skulls characterized by a saddle-like depression behind the coronal suture brought about by premature synostosis of the parietal bones with the sphenoid or temporal bones.

clinocephalism (klī″nō-sef'a-lizm), *n.* Same as ★*clinocephaly*.

clinocephalous (klī-nō-sef'a-lus), *a.* Same as ★*clinocephalic*.

clinocephalus (klī-nō-sef'a-lus), *n.*; pl. *clinocephali* (-lī). [NL.] A person with a clinocephalic skull.

clinocephaly (klī″nō-sef'a-li), *n.* [Irreg. < Gr. *κλίνειν*, bend, + *κεφαλή*, head, + *-y*[3].] In *craniol.*, a pathological deformation of the cranium resulting from a premature synostosis of the parietal bones with the alisphenoids and with the temporal bones, and characterized by a depression of the anterior portion of the parietal bones, behind the coronal suture.

clinodactyly (klī″nō-dak'ti-li), *n.* [Irreg. < Gr. *κλίνειν*, bend, + *δάκτυλος*, finger, + *-y*[3].] A deformity of the hand marked by permanent deflection of the fingers.

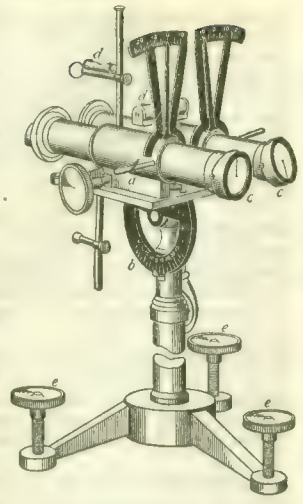
clinograph (klī'nō-graf), *n.* An apparatus for determining the deviation of bore-holes from the vertical. *McGeorge's clinograph* contains a magnetic needle and a plummet. The apparatus is filled with melted gelatin and lowered to any desired point in the bore-hole. The gelatin cools and holds both plummet and needle fast. By this means a complete survey of the hole can be made. *Nolten's clinograph* uses weak hydrofluoric acid, partly filling a glass tube, for the same purpose. The acid, after about half an hour, etches the inside of the tube and thus marks the inclination. Also called *clinostat*.

It has been abundantly proved that bore-holes frequently deviate very considerably from the straight path they were intended or supposed to take, and in some cases it becomes very important to determine the amount and direction of the deviation. *Encyc. Brit.*, XXX. 763.

clinohedral (klī-nō-hē'dral), *a.* [Irreg. < Gr. *κλίνειν*, incline, + *ἑδρα*, base.] Having oblique bases or faces: applied to a class of crystals, belonging to the monoclinic system, which have a single plane of symmetry but no axis of symmetry. Clinohedrite belongs to this class. See ★*symmetry*. Also called the *domatic* and *gonioid* class.

clinohedrite (klī-nō-hē'drīt), *n.* [*clinohedr(al)* + *-ite*[2].] A basic silicate of zinc and calcium, analogous to calamin in composition, but occurring in colorless monoclinic crystals of strongly oblique habit: found at Franklin Furnace, New Jersey.

clinometer, *n.* 3. In *ophthal.*, same as ★*clinoscope*.—4. An instrument used to determine the heel or pitch of a vessel. When placed athwartships it shows the former; when placed fore-and-aft, the latter.—**Clinometer heel,** the heel of a vessel as indicated by a clinometer. See ★*clinometer*, 4.



Clinopistha (klī-nō-pis'thä), *n.* [NL., < Gr. *κλίνειν*, incline, + *ὀπισθεν*, at the back, behind.] A genus of primitive or degenerative prionodesmaceous *Pelecypoda* from the Carboniferous rocks.

Clinopodium (klī-nō-pō'di-um), *n.* [NL. (Linnæus, 1753, adopted from Tournefort, 1700), < Gr. *κλίνη*, bed, + *ποῦς* (*ποδ-*), foot. The branches of the type species, *C. vulgare*, bearing separated orbicular clusters of flowers, were likened to the legs of a bed.] A genus of dicotyledonous plants of the family *Menthaceæ*. See *Calamintha*.

clinorhomboid (klī-nō-rom'boid), *a.* Same as *triclinic*.

clinorhomboidal (klī″nō-rom-boi'dal), *a.* Same as ★*clinorhomboid*.

clinoscope (klī′nō-skōp), *n.* [Irreg. < Gr. *κλίνειν*, incline, + *σκοπεῖν*, view.] An appliance for estimating the inclination of the vertical meridians of the cornea.

Clinoscope.

a, lever for rotating the anterior half of the tube on its longitudinal axis, the pointer and scale above marking the degree of rotation; *b*, pointer and scale marking the degree of dip of the platform supporting the tubes; *c*, *c*, objectives so attached that they can be maintained in the vertical plane with any dip of the tubes; *d*, *d*, spirit-levels; *e*, *e*, *e*, leveling-screws for stand.

clinostat, *n.* 2. See ★*clinograph.*

clinozoisite (klī-nō-zō′i-sīt), *n.* [Gr. *κλίνειν*, incline, + E. *zoisite.*] A monoclinic member of the zoisite-epidote group, near zoisite in composition, but differing in crystallization.

clinure (klin′-ūr), *n.* [L. ★*clinare*), incline, + *-ure.*] Inclination, specifically of a vector, relative to some set of coördinates.

Many of the new words he [James Thomson] coined, 'radian,' 'numeric,' 'torque,' 'interface,' '*clinure*,' 'posure,' &c., are great helps both in thinking and teaching.
Proc. Brit. Ass'n Advancement of Sci., 1902, p. 511.

Clio, *n.* 3. In *astron.*, asteroid 84, discovered by Luther in 1865.

Clionopsidæ (klī-ō-nop′si-dē), *n. pl.* [NL., < *Clionopsis* + *-idæ.*] A family of gymnosomatous pteropods. The body is barrel-shaped; suckers and buccal appendages are lacking; the proboscis is very long; the posterior gill is tetraradiate; and the skin is not pigmented. *Clionopsis* is the only genus.

Clionopsis (klī-ō-nop′sis), *n.* [NL.] The typical genus of the family *Clionopsidæ*. *Troschel*, 1854.

clip[1], *n.* 7. In *angling*, a salmon-gaff.—8. Same as ★*cartridge-clip.*

To fill the latter [the Kropatschek rifle] rapidly the cartridges are carried packed in bundles of from three to six, in sheet metal or cardboard receptacles. These receptacles are of two kinds, "*clips*" or "chargers." The *clip*, employed in the Mannlicher system, is used with a magazine with parallel walls, being held down in the magazine against the pressure of the magazine platform spring by means of a spring catch.
Encyc. Brit., XXXII. 651.

clip[3] (klip), *n.* Rate of rapid motion, as of horses or yachts: as, a three-mile *clip;* a fifteen-knot *clip.* [Colloq.]

clip-drum (klip′drum), *n.* A drum, used frequently on printing-presses, which has clips to catch the edge of a sheet of paper and carry it around to a certain point where it is taken off the drum by another device.

clip-fish (klip′fish), *n.* See *clippfish.*

clip-forceps (klip′fôr″seps), *n.* A small forceps having blades with broad ends, closed by a spring-catch, used to occlude the end of a divided artery during a surgical operation. *Encyc. Brit.*, XXXIII. 76.

clip-gear (klip′gēr), *n.* In *mach.*, a catch-gear; a spring-catch or -hook and its operating-rod.

clip-kingbolt (klip-king′bōlt), *n.* A form of kingbolt in which the body is attached to thin iron straps, with bolt-ends for nuts, to secure it to the axle-bed. The clip-end encircles the axle and bed, and thus renders a hole through the axle unnecessary.

clip-nut (klip′nut), *n.* Same as ★*clasp-nut.*

clipped (klipt), *p. a.* [Also *clipt;* < *clip*[2] + *-ed*[2].] Cut off by clipping; cut short; having the ends or edges cut off.—**Clipped speech,** a defect of speech noted in certain cases of general paralysis, in which the final syllable or terminal consonant of a word is not pronounced.

clipping-comb (klip′ing-kōm), *n.* A coarse comb of horn, celluloid, or German silver, used for holding up the hair of a horse while it is being clipped.

clipping-machine, *n.* 2. A device for shearing rivets or plate-edges in ship-building: usually driven by air, and then known as a *pneumatic clipping-machine.*

clip-rod (klip′rod), *n.* A rod having one or more projections to catch some part of a mechanism. Such rods are used on some forms of Corliss valve-gear to open the admission-valve.

clique (klēk), *v. i.* [*clique, n.*] To form cliques or exclusive sets; associate together in cliques, usually with unworthy or selfish motives.

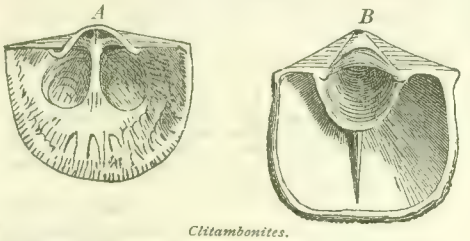
cliquery (klē′kėr-i), *n.* [*clique* + *-ery.*] Disposition to separate into cliques; the methods or actions of a clique; selfish exclusiveness.

The design which . . . we commented upon when *cliquerie* in all its lurking places was subsidized to thrust this great work of art . . . into the metropolitan cathedral. *Sat. Rev.*, July 16, 1859, p. 73.

cliquey (klēk′i), *a.* [*clique* + *-y*[1].] Disposed to form small exclusive sets or cliques; characteristic of cliques and cliquery.

clisiophyllid (klis-i-ō-fil′id), *a.* and *n.* **I.** *a.* Of or pertaining to the fossil coral genus *Clisiophyllum.*

II. *n.* A member of the genus *Clisiophyllum.*



Clisiophyllum (klis″i-ō-fil′um), *n.* [NL., < Gr. *κλίσις*, a bending, + *φύλλον*, a leaf.] A genus of cyathophylloid tetracorals occurring in the Paleozoic rocks.

Clisiospira (klis″i-ō-spī′rä), *n.* [NL., < Gr. *κλίσις*, a bending, + *σπεῖρα*, a spire.] A genus of platypodous gastropods of the family *Xenophoridæ*, occurring in the Silurian rocks.

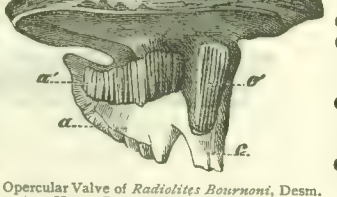
clistantherous (klis-tan′thėr-us), *a.* [Gr. *κλειστός*, that can be closed, + NL. *anthera*, anther, + *-ous.*] Hemiclistogamous with the stamens included: said of a class of flowers.

clistothecium (klis-tō-thē′sium), *n.*; pl. *clistothecia* (-siä). Same as *clistocarp.*

Clitambonites (klit″am-bō-nī′tēz), *n.* [NL., < Gr. *κλιτύς*, a slope, + *ἄμβων*, a ridge, boss.]

Clitambonites.

Clitambonites squamatus, Pahlen. Ordovician; Kuckers, Esthonia.
A, interior of dorsal valve, showing edge of the chilidium; *B*, interior of ventral valve, showing spondylium, septum, and deltidium (after Pahlen). (From Zittel's "Palæontology.")



A genus of Paleozoic brachiopods with subpyramidal valves having their apices at the summits of the broad cardinal areas. The ventral valve bears a perforate deltidium and an internal spondylium supported by a median septum; the dorsal valve has a chilidium. It occurs in Silurian rocks.

clitelliferous (klit-e-lif′e-rus), *a.* [NL. *clitellum* + L. *-ferre*, bear.] Bearing or provided with a clitellum: as, a *clitelliferous* worm.

clithridium (klī-thrid′i-um), *n.*; pl. *clithridia* (-ä). [NL., < Gr. *κλειθρίδιον*, dim. of *κλειθρία*, a keyhole, < *κλεῖθρον*, a bar, bolt.] In *bacteriol.*, any bacterium having the outline of a figure eight or a keyhole.

clithrophobia (klith-rō-fō′bi-ä), *n.* [NL., also *cleithrophobia*, < Gr. *κλεῖθρον*, a bar for closing a door, pl. *κλείθρα*, bars, a lattice: see ★*clithrum.*] A morbid dread of being in a small room or other confined space.

clithrum (klīth′rum), *n.*; pl. *clithra* (-rä). [NL., also *cleithrum*, < Gr. *κλεῖθρον*, a bar or bolt for a door: see *clathrate.*] 1. In certain *Pelecypoda*, a modification of the hinge-teeth to form one or more erect processes permitting only the vertical motion of the smaller valve, as in the extinct *Rudistæ*. In the genus *Hippurites* this structure is extravagantly developed.—2. In *anat.*, one of a pair of bones found in the shoulder-girdle of the stegocephalous amphibians and of some theromorphous reptiles. Each clithrum articulates with the clavicle, extends from it dorsally, and may have its posterior border connected with a scapula. Its exact homologies are a little uncertain.

Opercular Valve of *Radiolites Bournoni*, Desm. Upper Cretaceous (Dordonian); St. Mametz, Dordogne.
a, anterior, and *a′*, posterior myophore; *c*, *c′*, anterior and posterior processes of clithrum. One-third natural size (after Bayle). (From Zittel's "Palæontology.")

clition (klit′i-on), *n.* [NL., < Gr. **κλιτίον*, assumed dim. of *κλίτος*, equiv. to *κλιτύς*, a slope, < *κλίνειν*, slope, incline: see *cline, clinic.*] In *craniom.*, the median point of the highest part of the clivus on the inner surface of the sphenoid bone.

clitochore (klit′ō-kōr), *n.* [Gr. *κλίτος*, a slope, + *χωρεῖν*, spread abroad.] In *phytogeog.*, a plant whose seeds are distributed by means of gravity, either by falling in steep places or by detachment of soil, etc. *F. E. Clements.*

Clitocybe (kli-tos′i-bē), *n.* [NL. (Endlicher, 1836), < Gr. *κλιτός*, sloping, + *κύβη*, head. The name alludes to the convex pileus in its young state.] A genus of white-spored agarics having no annulus or volva and the gills mostly decurrent. *C. laccata* is a common and widely distributed species.

clitter (klit′ėr), *v. i.* [Imitative variation of *clatter.* Cf. *chitter, chatter.*] To emit a short, shrill, strident call or note, as a grasshopper; make a slight rattle.

The shrill cicala *clittering* from below.
Lord Houghton, Never Return! l. 142.

clitter (klit′ėr), *n.* 1. A slight rattling noise.—2. Same as ★*clatter*, *n.* Compare *clutter*[2], *n.* [Prov. Eng.]

clival (klī′vạl), *a.* [*clivus* + *-al*[1].] Relating to the clivus in any sense. *Buck*, Med. Handbook, II. 160.

clivus, *n.* 2. The superior surface of the vermis of the cerebellum.

clk. A contraction of *clerk.*

cloak, *n.* 3. In *mollusks*, same as *mantle* or *pallium.*

cloak-fern (klōk′fėrn), *n.* See *fern.*

cloche[2] (klōsh), *n.* [F., a bell or bell-jar: see *clock*[2], *n.*] A bell-jar or bell-glass under which plants are grown. The term is scarcely used in American writings, but is frequent in English horticultural works.

clock[2], *n.*—**Black Forest clock.** See ★*cuckoo-clock.*—**Clock correction,** the quantity which must be added (algebraically) to the time indicated by the clock in order to obtain the true time. It is to be subtracted *numerically* if the clock is fast, added if it is slow.—**Clock error,** the same, numerically, as *clock correction,* but usually, by clock-makers, reckoned with the opposite sign, that is, + if the clock is fast, — if it is slow.—**Diapason clock,** a clock which has a tuning-fork as a regulator.—**Eight-day clock,** a clock which goes for eight days with a single winding.—**German clock,** a clock made in Germany. Those made in the sixteenth and seventeenth centuries were often of elaborate construction, some containing automatic figures of persons or animals. One of the most famous of these is the clock in the cathedral at Strasburg.

Shee takes her selfe asunder still when shee goes to bed . . . and about the next day noone is put together againe, like a great *Germane Clocke.*
B. Jonson, Silent Woman, iv. 2.

clock[2], *v. t.* 2. To time, as contestants in a race. [Colloq.]

clock-bird (klok′bėrd), *n.* A large Australian kingfisher, *Dacelo gigas:* so named on account of its calling at sunrise and sunset. The bird is more commonly known as the *laughing jackass.*

clock-calm (klok′käm), *n.* A flat calm, no breath of air stirring; an unruffled surface of water. *Smyth.*

clock-contact (klok′kon″takt), *n.* A contact of the pendulum or other part of a clock with a suitable arrangement for making or breaking a galvanic circuit.

Clock-face experiment, an experiment made to determine whether a person can make a drawing of an ordinary clock-face with roman numerals. It is intended as a test of the power or the habits of observation on the part of the average person. It is said that the majority of persons fail, notwithstanding the assumed familiarity of so simple an object.

clock-golf (klok′golf), *n.* See ★*golf.*

clock-hammer (klok′ham″ėr), *n.* The lever, and its knob, by which the bell of a clock is struck.

clock-meter (klok′mē″tėr), *n.* In *elect.*, an ampere-meter, volt-meter, or wattmeter actuated by clockwork.

clod[1], *n.* 8. A butchers' term for a cut of beef from the fore quarter opposite the cross-rib.

The proportion of bone in meat as ordinarily purchased will vary from almost nothing in "shoulder-*clod*" and "round" to as much as 40 or 50 per cent. in the shank.
Encyc. Brit., XXVII. 446.

clod-coal (klod′kōl), *n.* Strong homogeneous coal. [Scotch.]

clogger (klog′ėr), *n.* One whose business is the making of clogs or wooden shoes, or the wooden soles for such shoes.

cloisonless (kloi′sọn-les), *a.* [*cloison* + *-less.*] Without cloisons or wire cells: as, a *cloisonless* enamel.

Then arose the so-called "*cloisonless* enamels" (musenjippō). They are not always without cloisons. The design is generally framed at the outset with a ribbon of

thin metal, precisely after the manner of ordinary cloisonné ware. But as the work proceeds the cloisons are hidden — unless their presence is necessary to give emphasis to the design — and the final result is a picture in vitrified enamels. *Encyc. Brit.*, XXIX. 730.

Cloistered vault. See ★*vault*[1].

cloistered-heart (klois-tẽrd-hart′), *n.* The closed gentian, *Gentiana Andrewsii:* the essential organs of the flower are, as it were, cloistered within the closed corolla.

clon (klon), *n.* [Also *clone;* < NL. **clōn*, <Gr. *κλών*, a twig or slip used for propagation; akin to *κλάδος*, a twig, slip, branch, < *κλᾶν*, break.] A group of cultivated plants the different individuals of which are simply transplanted parts of the same seedling individual, the propagation being altogether by the use of vegetative parts, such as buds, grafts, cuttings, suckers, tubers, bulbs, etc. The various sorts of apples, potatoes, chrysanthemums, etc., known as varieties are, in a more restricted sense, clons.

The *clons* of apples, pears, strawberries, etc., do not propagate true to seed, while this is one of the most important characters of races of wheat and corn.
H. J. Webber, in Science, Oct. 16, 1903, p. 503.

clonal (klō′nal), *a.* [*clon* + *-al*[1].] Relating or pertaining to, or having the characters of, a clon.

The differentiating *clonal* characters of chrysanthemums are mainly in the form and color of the flowers.
H. J. Webber, in Science, Oct. 16, 1903, p. 502.

clone[2] (klōn), *n.* [Gr. *κλών*, a twig, slip; related to *κλάδος*, a branch: see ★*clon*.] 1. Same as ★*clon*.—2. In the nomenclature of the spicular elements of sponges, one of the branches of a spicule: generally restricted to tetraxial forms.

Clonic contraction. See ★*contraction*.

clonism (klon′izm), *n.* [*clon*(*ic*) + *-ism*.] Clonic spasm.

clonome (klō′nōm), *n.* [*clone*[2] + *-ome*.] In the nomenclature of the spicular elements of sponges, the three similar arms of a ★trider (which see).

cloque (klōk), *n.* [F., < Picard *cloque*, a bell, etc.: see *clock*[2].] A name in France of a disease of the leaves of the peach.

Another fungous disease commonly known as *cloque*, probably due to some species of Taphrina or Exoascus, was receiving attention. The trouble is mentioned as affecting peach trees. It causes the leaves to curl.
E. G. Lodeman, The Spraying of Plants, p. 47.

close, *v. t.*—**Closed basin.** See ★*basin*.—**Closed shop.** See ★*shop*[1], *n.*

close[2], *a.* 17. In *cribbage*, noting cards which are near together, so that sequences are possible, such as the 5 and 7.—18. Formed or pronounced with a partial closing of the lips: as, a *close* vowel.

close-grained (klōs′grānd), *a.* Having the constituent grains, fibers, or elements closely compacted together; of closely compacted or dense structure or texture.

close-mouthed (klōs′moutht), *a.* Sparing of speech; reticent: as, a *close-mouthed* person.

close-place (klōs′plās), *n.* In *mining*, a narrow drift without separate airway for ventilation. [Scotch.]

close-reefed (klōs′rēft), *p. a.* Having the last reef taken in: noting the condition of a vessel when there are no more reefs left to be taken in the sails.

closer-on (klō′zẽr-on″), *n.* In *shoemaking*, one who stitches the different parts of the upper together.

close-wing (klōs′wing), *n.* A popular name for any moth of the family *Crambidæ*.

closing-hammer (klō′zing-ham″ẽr), *n.* A hammer used by boiler-makers for bringing together the plates at the seams of boilers before riveting.

closing-up (klō′zing-up″), *n.* 1. The placing of the top-box or cope on a foundry mold in preparation for casting. The cope must be clamped or weighted, however, before the mold is poured.—2. The heading or burring-over of a rivet, either by hand or by a machine. The length of rivet required for closing-up in hand-riveting is one and one-fourth diameters for snap and conical heads, one diameter for countersunk rivets, and from one-eighth to one-quarter inch more than these for machine-driven rivets.

closing-work (klō′zing-wẽrk), *n.* Any device, such as a door, valve, etc., which closes off or obstructs a passage or an opening.

closter (klos′tẽr), *n.* [Gr. *κλωστήρ*, a spindle.] A spindle-shaped cell, of frequent occurrence in wood. Also *clostrum*.

Clostridium (klos-trid′i-um), *n.* [NL., dim. < Gr. *κλῶστρον*, a clue of thread; cf. *κλωστήρ*, a spindle.] 1. A supposed genus of bacteria now usually classed under other genera by different authors.—2. [*l. c.*; pl. *clostridia* (-ą).] A term applied to certain bacteria to describe their spindle-like shape.

Thus some bacilli resemble diplococci, others have a drumstick form, while others have a central, *clostridium* enlargement. *Jour. Exper. Med.*, V. 212.

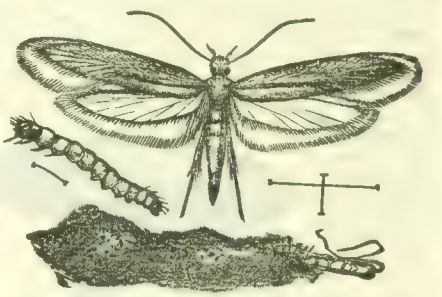
clostrum (klos′trum), *n.*; pl. *clostra*. Same as ★*closter*.

clot,[1] *n.*—**Ante-mortem clot,** a clot formed in the heart or aorta just before death.—**Laminated clot,** a clot formed in layers by successive deposits of fibrin.—**Plastic clot,** a mass of cells given off from the intima of an artery at the point of ligature, the organization of which causes the permanent obliteration of the vessel.—**Post-mortem clot,** a clot formed in the aorta or heart just after death.

cloth, *n.* 7. *Naut.*, a breadth of canvas; one of the breadths of canvas in a square or fore-and-aft sail: a general term in relation to the sails of a ship.—**All cloth made,** full sail set.—**Cloth in the wind,** so close to the wind that the sails shake or lift.—**Cloth money.** See ★*money*.—**Cloth orange.** See ★*orange*[1].—**Cloth red, B, 3B, G, 3G, O, and R.** See ★*red*[1].—**Cloth-sampling scale.** See ★*scale*[3].—**Faced cloth,** cloth, particularly woolen cloth, that is finished with a lustrous face, as broadcloth.—**Henrietta cloth,** a plain-back fabric with a lustrous finish and twilled face, used for women's dresses. It has a silk warp and a wool weft, or it may be all wool.—**Lady's cloth,** a fine, wide, and closely woven wool flannel, slightly napped and face-finished, for women's wear.—**Little cloth,** limited sail.—**Oriental cloth,** a smooth, face-finished variety of woolen cloth.—**Three cloths in the wind,** a mildly intoxicated condition. Also *three sheets in the wind*.—**To carry much cloth,** said of a ship when her yards are long and her sails correspondingly broad.—**Wülfing cloth,** a face-finished broadcloth, valued especially for its fast color and permanent finish, used for army and navy uniforms, liveries, and carriage linings: named after Johann Wülfing, Lennep, Germany.

cloth-beam (klôth′bēm), *n.* 1. A weighing-beam for ascertaining the weight of a yard of cloth by weighing a whole piece. A given number of yards of cloth are weighed, and when the beam balances, the weight on the beam indicates, by one set of marks, the weight in ounces and tenths of a single yard.—2. That roll of a loom upon which the cloth is wound as it is woven.

cloth-brown (klôth′broun), *n.* Either of two mordant-acid coal-tar colors (R and G) of the diazo type, prepared by combining diazotized benzidine with salicylic acid and a naphthol derivative. They dye wool brown in an acid bath. The shade produced is much faster when after-chromed.



cloth-dresser (klôth′dres″ẽr), *n.* One who is employed in finishing cloth for the market, as napping, shearing, brushing, pressing, etc.

cloth-dressing (klôth′dres″ing), *n.* See *dressing*, 2 (*d*).

clothe, *v. t.* 4. *Naut.*, to cover with canvas; rig.—**To clothe the bowsprit,** to set up its shrouds and bobstays.—**To clothe the lower masts,** to give a great drop to the courses of the lower masts, that is, to bring them well down toward the deck.—**To clothe a ship with canvas,** to carry all sail.

clothes-louse (klōᴛʜz′lous), *n.* A louse, *Pediculus vestimenti*. Also called *body-louse*.

clothes-moth, *n.*—**Naked clothes-moth,** a tineid moth, *Tineola biselliella*, occurring in Europe and the United States, whose larva, feeding on woolen goods and fur, makes neither a case nor a gallery, although spinning a certain amount of silk.—**Tube-building clothes-moth,** a tineid moth, *Tricophaga tapetzella*, occurring in Europe and the United States, whose larva makes a gallery composed of silk and fragments of the cloth on which it feeds.

Naked Clothes-moth (*Tineola biselliella*).
Moth, larva, cocoon, and empty pupa-skin, much enlarged. (Riley, U. S. D. A.)

clothing[1], *n.* 5. In *saddlery*, blankets of any kind used on horses.

cloth-knife (klôth′nīf), *n.* A circular knife or disk-knife used in cutting cloth, paper, cork, leather, etc.

cloth-looker (klôth′lůk″ẽr), *n.* One who examines or inspects cloth as it comes from the loom.

cloth-looking (klôth′lůk″ing), *n.* The examination or inspection of cloth as it comes from the loom, for the purpose of keeping it up to the standard quality.

cloth-paste (klôth′pāst), *n.* Paste, usually made of flour, employed to cement cloth to the surface of something else, as to the board covers in bookbinding.

cloth-press, *n.* 2. A press for baling cloth.

cloth-presser (klôth′pres″ẽr), *n.* One who operates a cloth-press.

clottage (klot′āj), *n.* [*clot* + *-age*.] The formation of a clot or clots.

clotting-beetle (klot′ing-bē″tl), *n.* A wooden mallet or hammer used in breaking up clods that remain unbroken after plowing and harrowing. [Prov. Eng.]

clotule (klot′ūl), *n.* [Irreg. < *clot* + *-ule*.] A little clot. *Geikie*, Text-book of Geol., p. 878.

cloture (klō′tůr), *v. t.*; pret. and pp. *clotured*, ppr. *cloturing*. To apply the cloture to: as, to *cloture* a bill in Parliament. Also spelled *clôture*.

clotweed (klot′wēd), *n.* Same as *clot-bur*, 2.

clou (klö), *n.* [F., a nail, peg: see *clove*[4].] That which arrests and holds the attention or the interest; the strong point; the chief attraction; the peg on which success depends.

Surrounding these exhibits of machinery in motion are the displays of finished goods, each containing some "*clou*," such as a $5,000 blanket in the blanket section and a combined exhibit made by the costumers in a pavilion known as the Pavilion of Costumes and Fashions, in which are found the latest and best creations in women's dress and millinery.
Amer. Inventor, Aug. 1, 1904, p. 337.

cloud[1], *n.* 1. The classification of clouds adopted by the International Meteorological Committee, July 1, 1896, requires all clouds to be classified under the headings here defined: (1) *Cirrus* (abbreviated Ci.), isolated feathery clouds of fine, fibrous texture, generally of a white color, frequently arranged in bands which spread like the meridians on a celestial globe over a part of the sky and converge in perspective toward one or two opposite points of the horizon. In the formation of such bands cirro-stratus and cirro-cumulus often take part. (2) *Cirro-stratus* (Ci. S.), a fine whitish veil, sometimes quite diffuse, giving a whitish appearance to the sky, and called by many *cirrus-haze;* sometimes of more or less distinct structure, exhibiting tangled fibers. The veil often produces halos around the sun and moon. (3) *Cirro-cumulus* (Ci. Cu.), fleecy clouds; small white balls and wisps, without shadows or with very fine shadows, usually arranged in groups and often in rows. (4) *Alto-cumulus* (A. Cu.), dense, fleecy clouds; larger whitish or grayish balls with shaded portions, grouped in flocks or rows, frequently so close together that their edges meet. The various balls are generally larger and more compact (passing into strato-cumulus) toward the center of the group, but more delicate and wispy (passing into cirro-cumulus) on its edges. They are very frequently arranged in lines in one or two directions. (5) *Alto-stratus* (A. S.), a thick veil of a gray or bluish color, exhibiting in the vicinity of the sun and moon a brighter portion, which, without causing halos, may produce coronæ. This form shows gradual transitions to cirro-stratus, but may have only half the altitude. (6) *Strato-cumulus* (S. Cu.), large balls or rolls of dark cloud which frequently cover the sky, especially in winter, and give it at times an undulatory appearance. The layer of strato-cumulus is usually not very thick, and blue sky often appears in the breaks through it. Between this form and the alto-cumulus all possible gradations are found. It is distinguished from nimbus by the ball-like or rolled form, and also by the fact that it does not tend to bring rain. (7) *Nimbus* (N.), rain-clouds; dense masses of dark, formless clouds with ragged edges, from which generally continuous rain or snow is falling. Through the breaks in these clouds there is almost always seen a sheet of higher cirro-stratus or alto-stratus. If the mass of nimbus is torn up into small patches, or if low fragments of cloud are floating much below a great nimbus, they may be called *fracto-nimbus* (*scud* of the sailors). (8) *Cumulus* (Cu.), woolpack clouds; thick clouds whose summits are domes with protuberances, but whose bases are flat. These clouds are formed especially in the diurnal ascensional movement of the lower air. When the cumulus is opposite the sun, the surfaces usually seen by the observer are more brilliant than the edges of the protuberances. When the illumination comes from the side, this cloud shows a strong actual shadow. When on the sunny side of the sky, the cumulus appears dark, with bright edges. The true cumulus shows a sharp border above and below. When cumuli are formed in or torn by strong winds, the detached parts (*fracto-cumulus*) present continual changes. (9) *Cumulo-nimbus* (Cu. N.), thunder-clouds; shower-clouds; heavy masses of cloud rising like mountains, towers, or anvils, generally surrounded at the top by a veil or screen of fibrous texture (*false cirrus*) and below by nimbus-like masses of cloud. From their bases generally fall local showers of rain or snow, and sometimes hail or sleet. Thunder and lightning invariably attend the cumulo-nimbus. The upper edges are either of compact cumulus-like outline, and form massive summits surrounded by delicate false cirrus, or the edges themselves are drawn out into cirrus-like filaments. This last form is most common in spring showers. The front of an approaching thunderstorm cloud of wide extent sometimes appears like a great black arch stretching across a portion of the sky which is uniformly lighter in color. (10) *Stratus* (S.), lifted fog in a horizontal stratum. When this stratum is torn by the wind or by mountain summits into irregular fragments, they may be called *fracto-stratus.*—**Altitude of a cloud,** the linear height of a cloud above the land or the sea-level. The average altitude above sea-level has been de-

termined for numerous portions of the globe. It varies with the temperature and moisture of the air, and therefore with latitude and continentality. Among the methods of determining the altitude are the following: (*a*) *Bernoulli's method* (1744), which consists in determining the time and the depression of the sun below the horizon, when the sun's rays first or last touch a given cloud whose angular altitude and azimuth are also observed simultaneously. A convenient method of calculation is given by Zenker in his Meteorological Calendar for 1887. (*b*) *Peussner's method*, which consists in observing the location on the map of the shadow of a cloud and at the same time observing the altitude of the sun. The formulæ needed for calculation are given in Abbe's "Meteorological Apparatus and Methods" (1887). (*c*) The *kinematic method* (employed in connection with Abbe's marine nephoscope), in which observations give two zenithal apparent movements of the cloud for two corresponding known movements of the observer on a boat or wagon: eight quantities, that is, directions and rates of motion, are thus known which are introduced into the analytical trigonometrical equation, and the true altitude and motion of the cloud are found by elimination. (*d*) *Lambert's method*, which consists in observing the velocity of the shadow of the cloud on the ground and also the apparent angular velocity of the cloud at the zenith, whence the altitude or distance is calculated by trigonometrical formulæ. (*e*) *Trigonometric methods*, which involve the use of the cloud-theodolite, photogrammeter, or cloud-camera. (*f*) *Espy's dew-point method* of determining the altitude of the base of a cloud, which assumes that the altitude of the base is equal to the depression of the dew-point expressed in centigrade degrees multiplied by 100 meters or expressed in degrees Fahrenheit multiplied by 186 feet.—**Cotton-ball clouds.** See ★*cotton-ball*.—**Iridescent cloud,** a cloud that shows a patch of rainbow color suggesting the iridescence of mother-of-pearl; also, a pearly white cloud without iridescent colors.—**Mammiform cloud,** a threatening cloud from the under side of which there hang protuberances resembling mammæ, teats, or bags: a formation that is generally due to the rapid settling and evaporation of the heavier cloud-particles, but possibly sometimes to the formation of cloud in a slowly revolving vortex, as when a waterspout or tornado-funnel begins at the lower surface of a cloud.—**Nacreous cloud,** a delicate white cloud, very high, shining late at night; a noctiluminous cloud: sometimes improperly called *iridescent* and *phosphorescent*.—**Noctilucent cloud, night-shining cloud,** a cloud that shines after sunset, apparently very high up and illuminated by distant twilight.

cloud-belt (kloud′belt), *n.* **1.** A zone around the earth covered by clouds; the zone in which the cloudiness is a maximum; specifically, the equatorial zone.—**2.** The belt or ring of clouds itself; a cloud-ring; a belt of clouds crossing a planet, as Jupiter, Saturn, etc.

cloud-berg (kloud′bėrg), *n.* A mountainous mass of cloud which looks like an iceberg on the distant horizon.

cloud-blower (kloud′blō″ėr), *n.* A tubular pipe of the North American Indians: so called when used in religious ceremonials, on account of the symbolic significance of the puffs of smoke.

cloud-camera (kloud′kam″ę-rą), *n.* An apparatus for observing the image of a cloud, formed by a lens in a dark chamber, in order to determine its altitude, motion, size, or internal changes. In the cloud-camera of Vettin (1860) the camera is mounted on a horizontal axis adjustable to any apparent angular altitude. The elaboration of this instrument constitutes the photogrammeter perfected for use in the cloud-observation work of the International Meteorological Committee in 1896–97, and for topographical surveys. See ★*photogrammeter* and *nephoscope*.

cloud-chart (kloud′chärt), *n.* One of a series of daily weather-maps showing the quantities, kinds, and motions of the clouds over the area of country covered by the ordinary weather-map.

clouded (klou′ded), *p. a.* **1.** Covered with clouds; obscured by clouds: as, a *clouded* sky, —**2.** Marked by dark, vague, irregular spots:

Clouded Tiger-cat (*Felis nebulosa*).

as, a *clouded* cane; a *clouded* leopard or tiger-cat.—**Clouded locust.** See ★*locust*[1].

cloud-firing (kloud′fīr″ing), *n.* The attempt to procure rain in seasons of drought, or to ward off destructive hail-storms, by the firing of cannon.

cloud-gate (kloud′gāt), *n.* A passageway between hills, mountains, or promontories through which clouds pass in and out with the day and night winds.

cloudiness, *n.*—**Scale of cloudiness.** Meteorological observers have different methods of recording the apparent cloudiness of the sky. Some consider the whole sky from zenith to horizon, others only that portion which is more than 30 degrees above the horizon. When the sky is wholly covered it is said to have a cloudiness of 10. If the observer estimates that one-tenth of this area is occupied by clear spaces, although it may to him appear wholly covered (because he sees the sides of the clouds), he will estimate the cloudiness as 9/10. In general, the cloudiness is that percentage of the whole circular area which would be covered by the clouds if they could be projected vertically downward; therefore, no account is to be taken of the thickness or height of the cloud. One estimates as closely as possible the percentage of area that would be covered by shadows if the sun were in the zenith and the observer could take a comprehensive view of the surrounding circle.

clouding, *n.* **2.** The dulling of varnish, as by dampness or the fumes of sulphur and ammonia.

cloud-projector (kloud′prō-jek″tor), *n.* An apparatus devised by G. G. Stokes (1883) by which from two cloud photographs, taken from different points of view, can be deduced mechanically the altitudes, distances, and dimensions of all parts of the cloud.

cloudscape (kloud′skāp), *n.* A scene composed of clouds; a painting of such a scene.

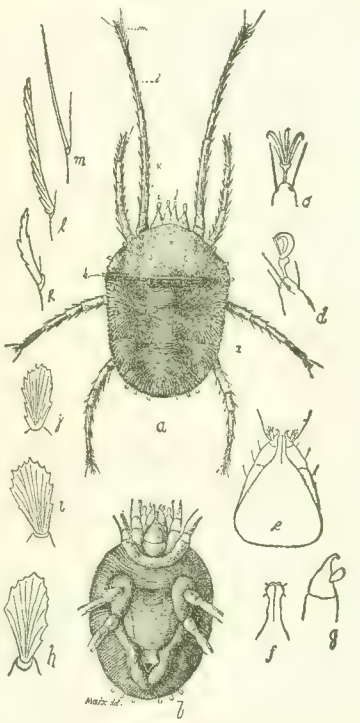
cloud-shutter (kloud′shut″ėr), *n.* In *photog.*, a shutter provided with adjustable disks by means of which the foreground may be exposed sufficiently while the sky may be taken instantaneously. Images of clouds are thus secured.

cloud-world (kloud′wėrld), *n.* The realm of clouds, or, figuratively, of vague fancies; cloud-land.

Cloudy day, a day in which clouds prevail; as used technically by the United States Weather Bureau, a day in which the average obscuration between sunrise and sunset is $\frac{7}{10}$ or more.—**Partly cloudy,** as used technically by the United States Weather Bureau, marked by a state of cloudiness ranging from 3 to 7 on the cloud-scale of 10. See *scale of* ★*cloudiness*.

cloudy-wing (klou′di-wing), *n.* An American hesperiid butterfly, *Thorybes pylades*, which has a wide distribution. It is brown in color, with small white spots on the fore wings. Its larvæ feed on clover. Also called *northern cloudy-wing*.—**Southern cloudy-wing,** an American hesperiid butterfly, *Thorybes bathyllus*, which ranges from West Virginia to Florida and westward to Kansas and New Mexico. Its larvæ feed on wild beans and other leguminous herbs.

clove[3], *n.* **2.** A cleft; an opening: as, the *clove* in the roving-carriage of a cotton-jenny.



clovene (klō′vēn), *n.* [*clove*[4] + *-ene*.] A sesquiterpene, $C_{15}H_{24}$, obtained by heating caryophyllene hydrate with phosphorus pentoxid. It boils at 261–263° C.

clover, *n.*, **1.** For some of the most useful or otherwise noteworthy true clovers of the western United States, see *annual red* ★*clover*, *bear-*★*clover*, *Beckwith's* ★*clover*, *bull-*★*clover*, and *sour* ★*clover*. These include the most important of several species used raw as food by the California Indians.—**Alexandrian clover.** See *Trifolium* and ★*berseem*.—**Alsatian clover,** the alsike clover, *Trifolium hybridum*.—**Alsike clover.** See ★*alsike*.—**Annual red clover,** *Trifolium involucratum*, widely distributed through the Rocky Mountain region, and much the most valuable of the annual species. Also called *purple clover*.—**Bear-clover,** *Trifolium virescens*, a Californian species of some forage value and a favorite among the Indians for eating raw. All parts of the plant are sweet (hence also known as *sweet clover*), and the flowers and seed-pods as well as the herbage are eaten. It is considered to be the most common cause of bloat; hence it is sometimes called *bloat-clover*. *Bear-clover* is also a local Californian name of *Chamæbatia foliolosa*. See ★*tar-weed*, 2.—**Beckwith's clover,** *Trifolium Beckwithii*, a Rocky Mountain species of low elevations, ranging to South Dakota, valuable for pasture and hay: from its resemblance to *T. pratense*, sometimes called *wild red clover*.—**Bersin clover.** See *Trifolium*.—**Bloat-clover.** Same as *bear-*★*clover*.—**Bokhara clover.** See *clover*, 2.—**Brazilian clover.** Same as *alfalfa*.—**Broad clover,** the red clover, *Trifolium pratense*. [Eng.]—**Brown clover.** See *Trifolium*.—**Bull-clover,** a true clover, *Trifolium Wormskioldii*, one of the most valuable of the native species of northern California, in damp places growing 2 or 3 feet high. It is much relished by cattle and also by the Indians, who eat all the above-ground parts raw.—**Calvary clover.** See *clover*, 2.—**Chilean clover,** alfalfa: so called because it was brought to California from Chile.—**Clover broom-rape.** See ★*broom-rape*.—**Clover cutworm.** See ★*cutworm*.—**Clover flower-midge** or **clover seed-midge.** See ★*flower-midge*.—**Clover seed-worm, clover stem-borer.** See ★*seed-worm*, ★*stem-borer*.—**Cow-clover.** Same as *mammoth* ★*clover*.—**Egyptian clover.** Same as ★*berseem*.—**Florida clover.** See *Richardsonia*.—**Four-leafed clover.** (*a*) A frequent sport of the common red clover having four leaflets to the leaf. (*b*) In Texas, *Marsilea macropoda*, a plant of some forage value in shady bottoms. See *Marsilea*.—**Golden clover,** the yellow clover or hop-clover, *Trifolium agrarium*.—**Long-stalked clover,** *Trifolium longipes*, found in the eastern Rocky Mountain region at altitudes of 6,000 to 9,000 feet, where it is valuable for forage. It is a slender plant a foot or more high, with narrow leaflets. A pale-flowered variety is sometimes called *wild white clover*.—**Mammoth** or **mammoth red clover,** a robust red clover referred by recent American authors to *Trifolium medium*, the zigzag clover. It resembles common red clover, with which it is often confused, but it may be distinguished, particularly by the long stalks of the heads. It is doubtless identical with the cow-grass of England, the qualities of which it shows in some measure. Sometimes called *sapling clover* (in the western United States) and *cow-clover*. See *cow-grass*.—**Mayad clover.** See *Trifolium*.—**Menindie clover,** *Trigonella suavissima*, an Australian fodder-plant.—**Mexican clover.** See *Richardsonia*.—**Mountain red clover,** *Trifolium megacephalum*, a robust perennial species of the Rocky Mountain region, especially the western slope, valued for forage. It has large and showy heads, leaves with 5 or 7 leaflets, and stout deep-growing roots.—**Musk-clover.** See *musky filaree*, under ★*filaree*.—**Nevada clover,** *Trifolium tridentatum*, a native species of Utah and Nevada, eaten greedily by cattle.—**Purple clover.** (*a*) See *clover*, 1. (*b*) Same as *annual red* ★*clover*.—**Rengeso clover,** *Astragalus Sinicus*, a clover-like plant largely grown in Japan for green manure and for forage. It is often sown in rice-fields after harvest and plowed under the next spring.—**Russian red clover,** *Trifolium pratense pallidum*, a variety of the red clover adapted to arid conditions.—**Salt clover.** See *sour* ★*clover* (*b*) (2).—**Sapling clover.** Same as *mammoth* ★*clover*.—**Snail clover.** See *snail-clover*.—**Soola clover,** *Hedysarum coronarium*, a leguminous fodder-plant cultivated in Italy and the Balearic Islands.—**Sour clover.** (*a*) The wood-sorrel, *Oxalis Acetosella*. [Prov. Eng.] (*b*) In California: (1) *Trifolium fucatum*, a true clover, probably with some allied species or varieties. These are succulent plants with light-colored foliage. (2) *T. obtusiflorum*, a species having an acid taste and clammy with an acid exudation. The Indians regard it as one of the best for eating, the exudation being generally washed off. Also called *salt clover* and, as growing near springs, *spring-clover*.—**Spanish clover.** See *Richardsonia*.—**Spotted clover,** the spotted medic, *Medicago Arabica*.—**Spring-clover.** Same as *sour* ★*clover* (*b*) (2).—**Suckling clover,** *Trifolium filiforme* of Europe, good in mixed pastures for sheep.—**Sulphur clover,** *Trifolium ochroleucum* of Europe, growing on dry calcareous soils and relished by cattle.—**Swamp-clover,** *Lotus uliginosus*, a species of bird's-foot clover native in northern Europe, and cultivated in Minnesota and Wisconsin on sour, mucky soils. It is a slender branching plant with rather large yellow flowers and long, slender pods.—**Swedish clover.** Same as ★*alsike*.—**Sweet clover.** (*a*) See *clover*, 2. (*b*) Same as *bear-*★*clover*.—**Wild red clover.** Same as *Beckwith's* ★*clover*.—**Wild white clover.** Same as *long-stalked* ★*clover*.—**Zigzag clover.** See *Trifolium*, *mammoth* ★*clover*, and *marl-grass*.

clover-dodder (klō′vėr-dod″ėr), *n.* See ★*dodder*[1].

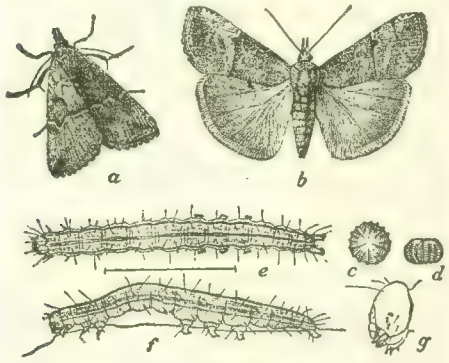
clover-looping (klō′vėr-lō″ping), *a.* Looping clover or warping it by partial eating.—**Clover-looping owlet.** See *owlet* (a moth).

clover-mite (klō′vėr-mīt), *n.* An American mite, *Bryobia pratensis*, very common on clover

Clover-mite (*Bryobia pratensis*).

a, dorsal view; *b*, ventral view; *c*, *d*, claw; *e*, *f*, *g*, mouth-parts; *h*, *i*, *j*, body-scales; *k*, *l*, *m*, leg-spines. (Insect Life, U. S. D. A.) Magnified.

in the western United States, and frequently swarming in great numbers on tree-trunks, fences, and the sides of houses.



clover-rust (klō′vėr-rust), *n.* A parasitic fungus, *Uromyces Trifolii*, which attacks the leaves of various species of clover.

clover-sickness (klō′vėr-sik″nes), *n.* The state of being clover-sick, that is, incapable of producing a crop of clover: said of soils, usually with reference to the common red clover. In England the trouble has been charged to threadworms (nematoids), to fungi, to insufficient nutrition, to acidity, and to enzyms inimical to the organisms symbiotic with the clover, but agreement has not been reached. Many cases can be corrected by an application of lime. The term has also been applied to the condition of the plant.

Clover-sickness rarely occurs on chalk soils.
J. Wrightson, Fallow and Fodder Crops, p. 220.

clover-tree (klō′vėr-trē), *n.* A Tasmanian tree, *Goodenia latifolia.* Also called *native laburnum.*

clover-worm (klō′vėr-wėrm), *n.* A green

Clover-worm (*Plathypena scabra*).

a, moth with wings folded; *b*, same, wings expanded; *c* and *d*, egg; *e* and *f*, penultimate stage of larva; *g*, head of larva — all enlarged; *c*, *d*, *g*, greatly enlarged. (Chittenden, U. S. D. A.)

caterpillar, the larva of *Plathypena scabra,* an American noctuid moth.

clove-strip (klōv′strip), *n.* The floating or creeping primrose-willow, *Jussiæa diffusa,* common in the eastern United States, and also found in tropical America and Asia. See *Jussiæa* and *primrose-willow.*

clownism (klou′nizm), *n.* [*clown* + *-ism.*] Clownish conduct; specifically, a stage of hystero-epilepsy in which the patient assumes the most bizarre and seemingly impossible attitudes.

Clown's lungwort. See *lungwort.*—**Clown's mustard,** the bitter candytuft, *Iberis amara.*—**Clown's-nard.** See *plowman's spikenard,* under *spikenard.*—**Clown's spikenard.** Same as ★*clown's-nard.*

cloy[3] (kloi), *n.* [Origin uncertain; perhaps lit. something that cloys or is sticky, < *cloy*[1], *v.* Otherwise for *claay* or *cly,* dial. form of *clay*?] An artificial mixture of plastic character, in this respect resembling clay.

cloze, *v.* A simplified spelling of *close.*

C. L. P. A. An abbreviation of *Common Law Procedure Act.*

C. L. S. C. An abbreviation of *Chautauqua Literary and Scientific Circle.*

club[1], *n.* **8.** The expanded end of the tentacular arms in decacerous cephalopods.—**Sensory club,** in hydromedusans, a ★cordylus (which see, with cut).

club[1], *v. t.*—**To club a fleet,** to manœuver a fleet, so as to get to windward of a certain position.

Clubbed fingers, enlargement of the tips of the fingers, with incurvation of the nails, occurring in diseases in which hematosis is interfered with.

clubbing[1], *n.* **4.** In *gardening,* the process or progress of becoming clubrooted; also, the clubrooted condition.

clubbing[2] (klub′ing), *n.* The act of forming a club; joint action or subscription for joint or individual benefit.

clubbock (klub′ok), *n.* [Appar. < *club*[1] + *-ock.*] A sea-fish, the spotted blenny, *Gadus gunnellus.* Also *gunnel.*

club-fungus (klub′fung″gus), *n.* Any one of the fungi belonging to the family *Clavariaceæ.*

Not all of the *club-fungi* are unbranched; but some of them are divided like the antlers of a deer, and yet others in which the branching is more copious grow in pearl-gray, yellow, white or pinkish tufts, several inches high, and covering spaces as large as a dinner-plate.
C. MacMillan, Minn. Plant Life, viii.

club-hand (klub′hand), *n.* A deformity of the hand similar in nature and causation to club-foot.

club-head (klub′hed), *n.* A club-shaped or club-like head.

club-moss, *n.*—**Bog club-moss,** *Lycopodium inundatum,* a small low-ground species, not uncommon in Europe and in North America, extending in the latter from Newfoundland and Alaska south to Washington, Illinois, and New Jersey. Also called *crowfoot* and *marsh club-moss.*—**Fir club-moss,** *Lycopodium Selago,* a boreal species of Europe and North America, in the latter extending to the mountains of North Carolina. See other vernacular names under *Lycopodium.*—**Foxtail club-moss,** *Lycopodium alopecuroides,* a showy species occurring in moist situations along the coast from New York to Florida and Mississippi.—**Interrupted club-moss,** *Lycopodium annotinum,* a trailing species having stiff acicular leaves, circumpolar in its distribution, in North America occurring as far south as Pennsylvania, Michigan, and Washington.—**Marsh club-moss.** Same as *bog* ★*club-moss.*—**Rock club-moss,** *Lycopodium porophilum,* a rather rare species of the central and southern United States, allied to *L. lucidulum,* and usually found on sandstone rocks.—**Shining club-moss,** *Lycopodium lucidulum,* a beautiful dark-green erect species of low woods in eastern Canada and extending from the central United States eastward. Sometimes known as *swamp* and *trailing evergreen.*—**Stiff club-moss.** Same as *interrupted* ★*club-moss.*—**Tree club-moss,** the ground-pine, *Lycopodium obscurum* (*L. dendroideum*). See *Lycopodium.*

club-shell (klub′shel), *n.* A marine univalve mollusk of the family *Cerithiidæ.*

club-tooth (klub′tōth), *n.* A gear-tooth which is larger at the outer end, or tip, than at the inner end, or root.

clucker (kluk′ėr), *n.* An oyster that, owing to its having been chilled or otherwise injured, sounds hollow when its shell is struck. [Local, U. S.] *Stand. Dict.*

clue, *n.*—**Foot clue** (*naut.*), the clue at the foot-end of a hammock.

clue, *v. t.*—**To clue down** (*naut.*), to let go the halyards and sheet of a gaff-topsail while the tack is kept fast, and to man the clue-line so as to bring the head, leech, and luff of the sail down to the clue; to man clue-lines so as to force a yard down on the mast-cap.

clue-cringle (klö′kring″gl), *n.* Same as *clue-thimble* (which see, under *thimble*).

clue-line, *n.*—**Gaff-topsail clue-line,** the rope that runs around the foot, leech, and luff of a gaff-sail, by means of which the topsail is bunched in to the mast on a fore-and-aft vessel, being clued up or clued down, according as the tack is slacked up or held fast.

clue-rope (klö′rōp), *n.* The roping on a sail at the clues. A clue-line is sometimes incorrectly referred to as a clue-rope.

cluf, *n.* A simplified spelling of *clough.*

clump[1], *n.* **6.** An aggregation of bacteria resulting from the action of agglutinins. See *serum* ★*diagnosis.*

clump[1] (klump), *v.* [*clump*[1], *n.*] **I.** *intrans.* To form a clump or cluster; cluster; aggregate: said of the agglutination of certain bacteria in response to the action of definite substances. See *serum* ★*diagnosis.*

The Seal Harbor bacillus refused absolutely to *clump* in any dilution above 1-10. *Med. Record,* Feb., 1903, p. 358.

II. *trans.* To form (bacteria) into a clump or cluster; agglutinate.

clumping, *n.* **2.** The forming of a clump or cluster of bacteria; agglutination of bacteria.

The actual results agree with the prediction, the table showing a somatic agglutination of 100 for both cultures, and no flagellar *clumping.*
Jour. Med. Research, Oct., 1904, p. 321.

Cluny enamel. See ★*enamel.*

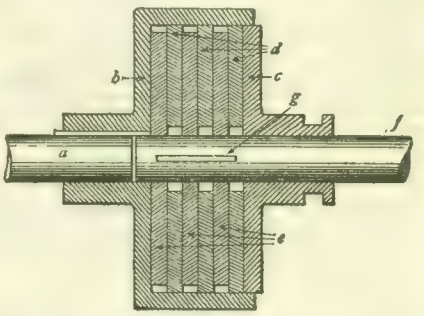
clupein (klū′pē-in), *n.* [Also *clupeine;* < L. *clupea,* herring, + *-in*[2].] A protamin obtained from the testicles of the herring. Also called *salmin.*

Clusiaceæ (klū-si-ā′sē-ē), *n. pl.* [NL. (Lindley, 1836), < *Clusia* + *-aceæ.*] A family of dicotyledonous choripetalous plants of the order *Hypericales,* the balsam-tree family, including the greater part of the *Guttiferæ* of some authors, but not including the *Hypericaceæ* nor the *Quiinaceæ.*

cluster cotton, cluster variable. See ★*cotton*[1], ★*variable.*

cluster-berry (klus′tėr-ber-i), *n.* The mountain-cranberry, *Vaccinium Vitis-Idæa.*

clustered (klus′tėrd), *p. a.* Formed into a cluster; arranged or collected in clusters; in *bot.,* applied specially to flowers and fruits regardless of the type of inflorescence.



cluster-fly (klus′tėr-flī), *n.* A muscid fly, *Pollenia rudis,* which enters houses in the autumn and clusters, in a sluggish way, on windows and walls.

cluster-pore (klus′tėr-pōr), *n.* One of several small pores or orifices clustered together which form part of the system of mucous canals opening on the surface in *Chimæra.*

There is also an absence of primitive pores, and the *cluster-pores* are very few in number.
Proc. Zool. Soc. London, 1895, p. 880.

clutch[1], *n.*, **2.** (*a*) The simplest form is a pair of opposing disks, one with projections which can slide into depressions on the other. When thus interlocked they act as one. The two surfaces may also engage each other by friction, the pressure between them keeping the one from slipping on the other, as a friction-clutch. Clutches are much used where parts of a machine are to be run independently; where it is desired to stop and start different parts in succession; where varying demand of resistance through the day makes it desirable to run units of different capacities at different times, without stopping some continuous motion; and where different floors of a factory stop and start at different times. Clutches of gradual action are preferred, by reason of the avoidance of shock, when machinery at rest is to be started from parts already moving. When reversing is to be done from a source of power which always turns in one direction, a clutch will be required. This condition is present in most of the motor-cars operated by internal combustion engines. See *bayonet-clutch,* ★*coil-clutch,* ★*expanding-clutch* (with cut), ★*jaw-clutch,* ★*rim-clutch* (with cut), *Weston* ★*clutch.*

6. *Naut.*: (*a*) A forked stanchion. (*b*) The throat of a patent anchor.—**7.** Oyster spawn.—**Catch-and-ratchet clutch,** a form of engaging and disengaging mechanism in which two parts or elements are made, by a ratchet action, to engage and act as driver and driven. *Nasmith,* Cotton Spinning, p. 319.—**Coil-clutch.** See ★*coil-clutch.*—**Individual-clutch transmission.** See ★*transmission.*—**Magnetic clutch,** a device for causing a pulley to revolve with the shaft upon which it is mounted, and for releasing the pulley when not in use, by means of electromagnets.—**Weston clutch,** a form of multiple friction-clutch, devised by Thomas Weston, in which alternate disks form the contact- and driving-surfaces. Those of one set are compelled to turn with the driving-shaft, the alternate ones in turning must turn the exterior cylindrical shell which incloses them, and this shell is keyed to the other shaft. When the disks are compressed by pressure parallel to the shafts, they bear on each other's faces, and gradually compel the driven element to come to the speed of the driver. When all are at common speed there is no slipping.

Weston Clutch.

a, driving-shaft; *b*, hollow cylinder keyed to *a*; *c*, pressure-disk sliding lengthwise on *f*; *d*, friction-disks capable of slight motion parallel to shaft, but compelled by ribs on *b* to turn with it; *e*, friction-disks capable of slight motion parallel to shaft, but compelled by a feather, *g*, to turn with the driven or follower-shaft, *f*; *g*, feather. When *c* presses *d* and *e* together, *a* driving *b* and *d* will compel *e* to drive *f* by friction between the contact surfaces.

clutch-block (kluch′blok), *n.* The bolt or block which, in a positive clutch, locks one part of the clutch to the other.

clutch-box (kluch′boks), *n.* **1.** A cover or box surrounding a clutch to keep dirt, etc., out of the clutch and protect the hands of the operator from the danger of being caught. —**2.** An essential part of the Heilmann cotton-comber for detaching and delivering the combed sliver.

clutch-coupling (kluch′kup-ling), *n.* Same as *clutch*[1], 2.

clutch-plate (kluch′plāt), *n.* A plate for operating a clutch; a plate which carries a clutch, or to which a clutch is fastened; a plate which carries pins, or is slotted to receive pins, so that when it is moved it will operate a clutch.

clutch-sleeve (kluch′slēv), *n.* A sleeve or boss attached to a clutch. It is usually slotted, or a groove is turned in it so that it is free to turn with the clutch and can also be connected to a stationary operating-lever.

clutch-spool (kluch′spōl), *n.* That part of a friction-clutch which engages with the clutch-block. Usually, a part which enters a recess in the clutch-block.

clutch-wheel (kluch′hwēl), *n.* Same as ★*clutch-box,* 2. *Taggart,* Cotton Spinning, II. 46.

clutter[2], *v.* **II.** *intrans.* To jumble words together in speaking, clipping syllables and dropping consonants.

Clydesdale (klīdz′dāl), *n.* A breed of heavy draft-horses originally raised about the Clyde, Scotland.

Clydonautilus (klī-dō-nâ′ti-lus), *n.* [NL. for **Clydononautilus,* < Gr. κλύδων, a wave, + ναυτίλος, nautilus.] A genus of fossil nautiloid cephalopods with coiled involute shells and lobed septal sutures like those of the goniatites. It is from the Triassic rocks.

Clydonites (klī-dō-nī′tēz), *n.* [NL., < Gr. κλύδων, a wave, + *-ites.*] A genus of fossil ammonoid cephalopods or ammonites from the Triassic rocks, including primitive forms with simple septal sutures.

clyer, clyre, *n.* See ★*clier.*

clymene (klī-mēn′), *n.* [Appar. < L. *Clymene,* name of a nymph: see *Clymenia.*] The trade-name of an odoriferous material of unpub-

lished composition. It is used, among other purposes, for psychophysiological tests of the power of smell.

clymenioid (klī-mē′ni-oid), *a.* and *n.* **I.** *a.* Resembling or having the characters of *Clymenia*.

II. *n.* One of the *Clymeniidæ*.

Clypeastrina (klip″ē-as-trī′nä), *n. pl.* [NL., prop. **Clypeasterina*, < *Clypeaster* (a genus), + *-ina*2.] A suborder of irregular *Echinoidea*, of the order *Gnathostomata*. They have powerful jaws which move only horizontally and are without braces and compasses; the teeth are placed in pyramids which articulate by a socket fitting on to vertical processes; and the ambulacra are petaloid.

Clypeus anterior, in *entom.*, the anterior portion of the clypeus when this is divided by a transverse suture.—**Clypeus posterior,** in *entom.*, the posterior portion of the clypeus when it is divided by a transverse suture.

clysma (kliz′mä). *n.*; pl. *clysmata* (-ma-tä). [NL., < Gr. *κλύσμα*, a drench, a clyster, < *κλύζειν*, wash, drench.] Same as *clyster*.

clyssus, clissus (klis′us), *n.* [NL. *clyssus*, prob. for *clissus*, and that perhaps for **clīsis*, < Gr. *κλεῖσις, κλῆσις*, a closing up (hence reunion, recomposition), < *κλείειν*, close: see *clisto-*.] A chemical term of the iatrochemical period, used with more or less vagueness to signify the material essence of a substance or a mixture of substances.

clyster (klis′tėr), *v. t.* [*clyster, n.*] To administer a rectal injection: same as *clysterize*.

C. M. An abbreviation (*b*) of *Certified Master*; (*c*) of *Church Missionary*; (*d*) of *common meter*; (*e*) of *corresponding member*.

C. M. D. An abbreviation of *common meter double*.

C. M. G. An abbreviation of *Companion of St. Michael and St. George*. See *order*.

cml. A contraction of *commercial*.

C. M. S. An abbreviation of *Church Missionary Society*.

c. m. s. An abbreviation of the Latin *cras mane sumendus*, in medical prescriptions, 'to be taken to-morrow morning.'

Cneoraceæ (nē-ō-rā′sē-ē), *n. pl.* [NL. (Engler, 1890), < *Cneorum* + *-aceæ*.] A family of dicotyledonous, choripetalous plants of the order *Geraniales*, the widow-wail family, formerly included in the family *Simaroubaceæ*, but now placed by Engler between the *Zygophyllaceæ* and the *Rutaceæ*. It consists of the genus ★*Cneorum* only (which see) and *widow-wail*, 1.

Cneorum (nē-ō′rum), *n.* [NL. (Linnæus, 1753, first used by him in 1737), < Gr. *κνέωρον*, the name of some flower used for garlands; according to some a nettle, but taken by botanists to be *Daphne Cneorum* or *Daphne Gnidium*. This plant was called by the early botanists *Thymelæa* ('thyme-olive') and thus connects with *Chamælea* ('ground-olive'), Tournefort's name for the genus *Cneorum*.] A genus of dicotyledonous evergreen shrub-like plants, the type and only genus of the family *Cneoraceæ*. It is characterized by the small axillary cymose or solitary yellow flowers, and the entire linear-oblong or spatulate, coriaceous leaves. Twelve species are known, all natives of the Mediterranean region and the Canary Islands. *Cneorum tricoccum* and *C. pulverulentum* are sometimes cultivated. See *widow-wail*, 1.

Cneorum tricoccon.

a, branch with flowers and fruit; *b*, flower; *c*, disk with stamens and gynæceum attached; *d*, fruit. a, two thirds natural size; b, c, and d, enlarged. (From Engler and Prantl's "Pflanzenfamilien.")

Cnidian (nī′di-an), *a.* [Gr. Κνίδιος, < Κνίδος, L. *Cnidus*.] Of or pertaining to ancient Cnidus in Asia Minor.—**Cnidian school,** a very early school of medicine in Greece, existing before that of Hippocrates.

cnidocyst (nī′dō-sist), *n.* [Gr. *κνίδη*, a nettle, + *κύστις*, bag (cyst).] A nematocyst.

cnidogenous (nī-doj′e-nus), *a.* [Gr. *κνίδη*, nettle, + *-γενης*, -producing.] Producing or containing nematocysts: as, the *cnidogenous* sacs of certain mollusks.

The hepatic cæca in the dorsal papillæ of Eolidoida actually communicate with the *cnidogenous* sacs at their extremity. *Encyc. Brit.*, XXX. 797.

cnidophore (nī′dō-fōr), *n.* [Gr. *κνίδη*, a nettle, + *-φορος*, < *φέρειν*, bear.] A part or organ that bears cnidoblasts.

Cnidophores are distinctly visible round the edge of the mantle. *Proc. Zool. Soc. London*, 1903, I. 252.

cnidophorous (nī-dof′ō-rus), *a.* Bearing cnidoblasts.

cnidosac (nī′dō-sak), *n.* [Gr. *κνίδη*, a nettle, + *σάκκος*, sack: see *sac*, *sack*1.] The enlarged middle parts of a tentillum in certain *Siphonophora*, bearing numerous nematocysts. See the extract.

The tentacle [in *Diphyes*] is tubular and is beset with a series of lateral tentilla, also tubular. Each tentillum is composed of three parts—(1) a thin pedicle or proximal part, (2) a dilated middle part, the *cnidosac*, and (3) a slender terminal filament. The swelling of the *cnidosac* is due to a rich development of nematocysts of various kinds, forming the battery.

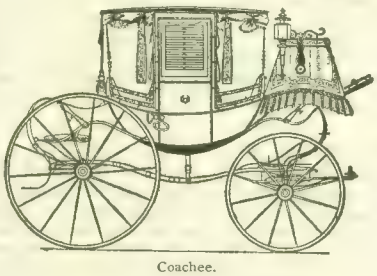
Sedgwick, Text-book of Zoöl., I. 146.

cnidosphere (nī′dō-sfēr), *n.* [Gr. *κνίδη*, nettle, + *σφαῖρα*, sphere.] In *Siphonophora*, as certain *Disconectæ*, one of the spherical knobs composed of cnidoblasts borne on the tentacles.

C. O. An abbreviation (*a*) of *Commanding Officer*; (*b*) of *Colonial Office*.

coacervate, *a.* **2.** In *bot.*, densely crowded together; clustered.

coach, *n.*, **4.** (*c*) In base-ball, one of the players belonging to the side at the bat who takes his position near either first or third base and advises the base-runner when to run.—**6.** A tame bullock or horse used as a decoy in capturing wild cattle or horses. [Australia.]—**Calash coach.** See ★*calash*.—**Concord coach,** a heavy coach-body hung upon leather thorough-braces and having a detached driver's seat in front and a covered baggage-rack at the rear. It originated in Concord, New Hampshire.—**Drawing-room coach,** a coach without upper door-pillars. The quarters are paneled one half their depth and the low door has a drop-light. The large openings thus permitted on the sides can be closed by sliding the quarter-lights and raising the door-lights.



Concord Coach.

coach, *v. t.* **4.** To capture (wild cattle or horses) with the help of a tame bullock or horse as a decoy: see ★*coach*, *n.*, 6. [Australia.]

coach-band (kōch′band), *n.* A metallic thimble used upon the outer end of the hub of a wheel of a vehicle, both as an ornament and as a protection to the wood.

coach-bridle (kōch′brī″dl), *n.* A heavy bridle with large winkers, broad front-band, drop face-piece, nose- and chin-pieces, and generally check-straps.

coachee, *n.* **2.** A style of coach highly popular in the southern United States before 1860.

Coachee.

The body had but four pillars, those at the doors, the top resting upon these and upon scrolled supports at the ends. It had a hammer-cloth seat, and a foot-board at the rear. The quarters were inclosed with curtains instead of panels or glasses.—**Coachee rockaway.** See ★*rockaway*.

coach-harness (kōch′här″nes), *n.* A heavy harness for a team of horses used with a heavy coach.

coach-hinge (kōch′hinj), *n.* A heavy hinge with long narrow flaps which shut flat on the insides, used on carriage-doors.

coach-lace (kōch′lās), *n.* A hard woven ribbon with an ornamental face and a plain back: used as a trimming material for carriages.

coach-lock (kōch′lok), *n.* A thin box with a flat securing-surface at right angles with the side. The bolt is retained in the box and is operated by a square bar on a coach-handle.

coachmaker's vise. See ★*vise*2.

coachman, *n.* **3.** In *angling*, an artificial fly, named for a Herefordshire stage-coach driver who was famous as a fly-fisher. It is composed of a copper-colored peacock harl body, white swan or other white feather wings, and red cock-hackle.—**4.** Same as ★*coach-whip bird*.

coach-pad (kōch′pad), *n.* In a harness, a frame of iron covered with leather and provided with two pads or cushions on the under side. The frame is fitted with holes for attaching the hooks and terrets. The soft pad has no iron frame, heavy leather being used instead. A self-adjusting pad is one that has hinged sections attached to the lower arms of the frame which allow the cushions to adjust themselves to the back of any horse.

coach-varnish (kōch′vär″nish), *n.* Any hard varnish used on coaches.

coach-whip, *n.* **4.** The ocotilla, *Fouquieria splendens*, so called from the long, leafless, lash-like branches. See *Fouquieria* and ★*ocotillo*.—**Coach-whip bird,** an Australian name for birds of the genus *Psophodes*: given on account of the resemblance of their notes to the crack of a whip. Also called *coachman*, for the same reason.

coad. An abbreviation of *coadjutor*.

coadministrator (kō-ad-min′is-trā-tọr), *n.* One who is joint administrator with one or more other persons.

coadministratrix (kō-ad-min-is-trā′trikz), *n.* A female coadministrator.

coagulin (kō-ag′ū-lin), *n.* [Also *coaguline*; < *coagul(ate)* + *-in*2.] An adaptation-product which causes coagulation. Immunization with milk will thus call forth the production of a coagulin which coagulates milk. These bodies are very similar to, and are possibly identical with, the precipitins.

coagulometer (kō-ag-ū-lom′e-tėr), *n.* [Irreg. < L. *coagulare*, coagulate, + Gr. *μέτρον*, measure.] An apparatus in the form of a graduated tube, used to determine (*a*) the rapidity of coagulation of any given specimen of blood, or (*b*) the coagulating power of any substance when added to a definite quantity of blood.

coal, *n.*, **2.** In *anthracite* and *semi-anthracite coal* the volatile matter constitutes from 3 to 10 per cent. of the whole; in *graphitic anthracite*, from 1 to 3 per cent.; in *bituminous coal*, from 25 to 30 per cent.; and in *semi-bituminous*, from 5 to 20 per cent. Coals which are used for the production of coke are bituminous, and are called *coking-coals* (see *coke*1); *furnace-coals* are those suitable for use in a blast-furnace. Other varieties of bituminous coal are *steam-coal*, *blacksmith's coal*, and *gas-coal*, which have well-defined characteristics fitting them for special uses. *Cannel-coal* is a dense, fine-grained coal, apparently deposited as a sediment containing much ash but rich in volatile matter. *Block-coal* breaks into cubical masses, and *splint-coal* into long pieces. *Peacock-coal* is iridescent coal. Anthracite coal is usually graded into six sizes, pea, chestnut, stove, egg, broken, and steamboat, the last being the largest. *Buckwheat-coal* and *rice-coal* are smaller than pea, and *cherry* larger. There are also many well-recognized varieties of anthracite coal, as free-burning, slow-burning, red ash and white ash for domestic use, steam-coal, furnace-coal, etc.—**Altogether coal,** coal as it is mined, unassorted; the run-of-the-mine coal.—**Black coal,** coal slightly burned by igneous rock. [Scotch.] *Barrowman*, Glossary.—**Bony coal,** a coal containing so much shaly matter as to leave an excessive residue after burning. *U. S. Geol. Surv.*, 1902, p. 279.—**Broken coal,** coal of the next to the largest commercial size; larger than egg-coal, but smaller than steamboat-coal. It will pass through a 4-inch hole but not through a 2½-inch hole.—**Burnt coal,** *n.* Same as *black* ★*coal*.—**Coal battery.** See ★*battery*.—**Coal flora,** the flora of coal-bearing deposits: applicable to those of any age, but used chiefly for those of Paleozoic age; especially the flora of the coal-measures. See *coal-measures* and *coal-plant*.—**Coal porcelain.** See ★*porcelain*.—**Craw,** or **crow, coal,** a thin seam of inferior coal. Also *craws*. [Scotch.]—**Non-coking coal.** (*a*) Coal which will not undergo a distillation of its volatile elements, leaving a residue in porous state, mainly consisting of fixed carbon and the incombustible elements or ash. (*b*) Coal which will not fuse together and cohere in masses when burned. It is desirable that coal should do this for forge fires in certain kinds of work.—**Run-of-the-mine coal,** coal as it comes from the mine in unsized and unsorted lumps: said especially of bituminous coal, which is too soft and friable to pass through a breaker and screens without reducing much of it to unsalable dust.

Large coal passed through the crusher almost invariably yields coke of above the average quality of that produced from "*run-of-mine*" or unscreened *coal*.
Sci. Amer. Sup., April 1, 1905, p. 24459.

Steam coal, coal that may be used in heating steam-boilers; in England, a bituminous, non-coking variety of coal with a medium percentage of volatile matter and burning with a flame of medium length.

coal-bag (kōl′bag), *n.* 1. A bag for holding coal.—2. Same as *coal-sack*, 2.

coal-ball (kōl′bâl), *n.* A nodular concretion, usually of pyrite or calcite, in association with a coal-seam. *Rep. Brit. Ass'n Advancement of Sci.*, 1902, p. 811.

coal-bearer (kōl′bãr″ėr), *n.* See ★*bearer*, 14.

coal-box, *n.* A buggy with high side-panels, cut down forward of the seat as low as possible and originally without a top.

coal-breaking jack. See *jack*[1], 11 (*i*) (1).

Coalbrook Dale porcelain. See ★*porcelain*.

coal-cellar (kōl′sel″ăr), *n.* A cellar used for storing coal, as for domestic use.

coal-crusher (kōl′krush″ėr), *n.* A machine for crushing the lumps in coal to reduce them either to small pieces or to a powder; a coal-breaker.

coal-cutter (kōl′kut″ėr), *n.* A machine for holing or undercutting coal.

coal-deposit (kōl′dẹ̄-poz″it), *n.* A coal-bed or coal-seam.

coal-drift (kōl′drift), *n.* An entry or haulage-road of a coal-mine which starts at the outcrop and follows the bed. See *gangway*, 3. *N. E. D.*

coal-dust engine. See ★*engine*.

coalescence, *n.* 3. In *psychol.*: (*a*) the combination of a number of sensible data into a single object-perception.

In this *coalescence* in a 'thing,' one of the coalescing sensations is held to be the thing, the other sensations are taken for its more or less accidental properties.
W. James, Text-book of Psychol., p. 339.

(*b*) The unremarked assimilation of a mental content to other mental contents or to conscious dispositions.

Suppose the components of the one combination are *a*, *b*, *c*, and of the other *a*, *b*, *x*; *c* may be so favored from the outset that it simply displaces *x* without any feeling of discrepancy arising, and without any attention to the difference. This process I call overlapping or *coalescence*.
G. F. Stout, Anal. Psychol., I. 285.

Law of molecular coalescence, the law that crystals in an albuminous or colloidal medium become rounded in form and coalesce in spheroidal masses.

coal-face (kōl′fās), *n.* 1. The surface of coal exposed by mining.—2. The place where the coal is being mined.—3. The end of a drift or entry or room in a coal-mine.

coal-factor (kōl′fak″tọr), *n.* An intermediate agent between coal-owners and customers; in London formerly an officially recognized agent between the coal-owner or shipper and the coal-seller. *N. E. D.*

Owing to the combination of the *coalfactors*, no more coals can come into the market than are sufficient to meet the demand without lowering the price.
Mayhew, London Labour, III. 245.

coal-fauld (kōl′fâld), *n.* In *mining*, a storing-place for coal. [Scotch.]

coalfish, *n.* 2. A fish, *Anoplopoma fimbria*, of the family *Anoplopomatidæ*, found in the North Pacific.—3. The pollack, *Pollachius virens*.

coal-heugh (kōl′hūċh), *n.* A coal-pit or coal-mine. [Scotch.]

coal-hewer (kōl′hū″ėr), *n.* A person who digs coal; a collier.

coal-hill (kōl′hil), *n.* In *coal-mining*, ground occupied as a pit-head or mine-opening for colliery purposes. [Scotch.]

coaling-boom (kō′ling-bōm), *n.* A kind of derrick-boom used for loading coal into a ship from lighters or colliers.

coaling-chute (kō′ling-shōt), *n.* In *ship-building*, a large pipe or trunk through which coal is passed from the coaling-scuttles on the deck or side into the bunkers of a vessel.

coaling-scuttle (kō′ling-skut″l), *n.* In *ship-building*, a scuttle for loading coal into the bunkers.

coaling-station (kō′ling-stā″shọn), *n.* 1. A port at which steam-vessels may call and receive fresh supplies of coal. Coaling-stations with accumulations of coal and appliances for speedy coaling are maintained in various parts of the world by the great naval powers.

2. A station for the storage of coal for the use of the locomotives of a railroad. Two types are in use, namely, *terminal* and *through-service* coaling-stations. Terminal stations are very large coal-pockets with machinery for receiving and storing many tons of coal and for loading several locomotive-tenders at the same time. The through-service stations are smaller pockets, placed at convenient points along the line. The pockets may stand parallel with a track, with chutes at the sides arranged to fill several tenders in line on the track, may have a bridge over the track, or may be built directly over the track. See ★*coal-pocket* (with cut).

coaling-trunk (kō′ling-trungk), *n.* In *ship-building*, a trunk built into the structure of a ship for loading coal into the bunkers.

coal-jungle (kōl′jung″gl), *n.* One of the coastal swamps in which the coal-plants of Carboniferous or other geological period are supposed to have grown.

coal-measures, *n. pl.* In America and Great Britain a special significance attaches to this term in geological classification. In Pennsylvania the coal-measures are those strata which carry the productive coal-beds of Carboniferous age and all deposits intercalated between them, and they are divided into *lower productive*, *lower barren*, and *upper productive measures*. The coal-measures, with the millstone-grit at their base, constitute the upper division of the Carboniferous system. In Great Britain and on the Continent their relations are similar. —**False coal-measures**, strata including a series of coal-seams.—**Greta coal-measures**, in *geol.*, a division of the productive coal-measures in New South Wales.—**Newcastle coal-measures**, in *geol.*, a subdivision of the coal-measures in New South Wales lying at the top of the series.

coal-merchant (kōl′mėr″chạnt), *n.* One engaged in buying and selling coal, as distinguished from a coal-master or a coal-operator who is engaged in producing coal.

coal-mill (kōl′mil), *n.* Same as ★*coke-mill*.

Coal-miners' phthisis. See *anthracosis*.

coal-naphtha (kōl′naf″thą or -nap″thą), *n.* The lighter and more volatile portion of the distillate from coal-tar, consisting chiefly of hydrocarbons of the benzene series, and therefore quite different from the naphtha obtained from petroleum, although in part applied to the same uses, as a solvent, to improve the illuminating character of gas, etc.

coal-pocket (kōl′pok″et), *n.* A structure for the storage of coal. It consists commonly of a group of deep and narrow bunkers, inclosed on the sides and by a roof, and supported on columns, the ground floor being open to allow the entrance of teams to the delivery-chute at the bottom of each bunker. The term includes the whole plant, with elevators, conveyers, weighing-machines, and other appliances for receiving, crushing, sorting, storing, and delivering the coal. The illustration shows a section of a motor-operated retail coal-pocket. At the left the car delivers the coal to the coal-crusher, which in turn delivers it, crushed to the required size, to the elevator, which lifts it to the top floor. There it passes through the weighing-hopper, which measures it, weighs it, records the weight, and delivers it to the horizontal conveyer by which it is transferred to the proper bunker, at the rate of 40 tons an hour. At the right the derrick delivers the coal from the boat to the crusher. Since the conveyer is reversible, the coal can be delivered to any bunker. See ★*conveyer*.

Coal-pocket.

a, pocket; *b*, car-dump; *c*, coal-crusher; *d*, elevator, discharging into weigher; *e*, weighing-machine, delivering to conveyer; *f*, conveyer distributing coal in either direction to bins; *g*, coal-chutes; *h*, inclined conveyer; *i*, receiving-pocket; *j*, bucket-hoist; *m*, motors.

coal-putter (kōl′pụt″ėr), *n.* See *putter*[1], 2.

coal-rashings (kōl′rash″ingz), *n. pl.* In *coal-mining*, soft dark shale, in small pieces, containing much carbonaceous matter. [Eng.]

coal-room (kōl′rōm), *n.* In *coal-mining*, a room excavated in coal, usually 5 to 10 yards wide and 100 yards, more or less, in length, and separated from adjoining rooms by pillars of solid coal. See *room*[1], 11, and *heading*, 10 (*b*).

coal-salt (kōl′sâlt), *n.* Fine-grained common salt obtained from brine by surface-evaporation: so called because generally discolored by soot from the flame passing over the evaporating-pan. *G. Lunge*, Sulphuric Acid, II. 249.

coal-seam (kōl′sēm), *n.* A layer or bed of coal.

coal-slack, *n.* See *slack*[2].

coal-slake (kōl′slāk), *n.* See *coal-slack*, 2.

coal-storage (kōl′stōr″āj), *n.* In *railroading*, the storing of coal for the use of locomotives. It may be stored in an open yard, in heaps, or under a trestle, or in a building. The larger open-air storage-yards are filled with coal, by means of a cable-way, conveyer, or elevator, directly from the boat or car, the coal being distributed by means of a reloader, elevator, or conveyer. In using an elevator a large A-shaped crane is erected in the yard, the elevator traveling up one leg of the A and delivering the coal at the top. The space under the crane is thus filled with coal in a conical heap. Another storage-system employs combined elevators, conveyers, and reloading conveyers for receiving, storing, and delivering coal, in large bunkers, from cars and to cars and locomotives, the whole plant being inclosed.

coal-swamp (kōl′swomp), *n.* A coastal lagoon, of the Carboniferous or other geological period, overgrown with the vegetation from which coal-beds have been formed.

Coal-tar bate. See ★*bate*[5].—**Coal-tar colors.** They are classified as follows: (*a*) According to their source (that is, according to the raw materials to which they are related), into *aniline colors*, *naphthalene colors*, *anthracene colors*, and *phenol colors*. This method of classification is but little used at the present time. (*b*) According to their composition, into at least 20 different types of coloring-matters, the following being the classification adopted in A. E. Green's translation of Schultz and Julius's "Systematic Survey of the Organic Coloring Matters." This classification is chiefly used by color-manufacturers and color-chemists: (1) nitro coloring-matters; (2) monoazo coloring-matters; (3) diazo coloring-matters; (4) triazo coloring-matters; (5) tetrakisazo coloring-matters; (6) nitroso or quinoneoxime coloring-matters; (7) stilbene coloring-matters; (8) oxyketone, oxylactone, and oxyquinone colors (excluding anthracene derivatives); (9) diphenylmethane coloring-matters; (10) triphenylmethane coloring-matters; (11) xanthene coloring-matters (pyronines, phthaleins, and rhodamines); (12) acridine coloring-matters; (13) anthracene coloring-matters; (14) indophenols, indamines, and allies; (15) azines and azonium coloring-matters (eurodines, safranines, indulines, and rosindulines); (16) oxazine coloring-matters; (17) thiazine coloring-matters; (18) thiazol or thiobenzenyl coloring-matters; (19) quinoline coloring-matters; (20) sulphid coloring-matters. (*c*) According to their application, into 10 groups: (1) basic colors; (2) phthalic anhydrid colors; (3) acid colors; (4) direct cotton colors; (5) sulphid colors; (6) insoluble azo colors; (7) mordant-acid colors; (8) mordant colors; (9) reducible vat colors; (10) aniline black. This classification is used by textile-colorists.—**Coal-tar creosote.** See ★*creosote*.—**Coal-tar naphtha.** Same as ★*coal-naphtha*.—**Coal-tar remedies**, various substances used in medicine which are made synthetically from coal-tar and its derivatives: acetanilide and antipyrin are remedies of this class.

coalternate (kō-al-tėr′nāt), *a.* [*co-*[1] + *alternate*.] Doubly alternate.—**Coalternate fever.** Same as *double fever* (which see, under *fever*[1]).

co-altitude (kō-al′ti-tūd), *n.* The complement of the altitude (90° minus the altitude). Same as *zenith-distance*.

coal-vein (kōl′vān), *n.* A layer of coal; a coal-seam.

coal-vend (kōl′vend), *n.* 1. The general sale of coals.—2. The limited quantity of coal to which each colliery was restricted by a former combination of coal-owners on the Tyne and Wear. *N. E. D.* [Eng.]

coal-wall (kōl′wâl), *n.* In *mining*, same as ★*coal-face*, 3.

coal-washery (kōl′wosh″ẹ-ri), *n.* An establishment where coal is cleaned from slate and other impurities by mechanical processes which use water and take advantage of the difference in specific gravity of the coal and its impurities.

coaly[3] (kō′li), *n.* [*coal* + dim. *-y*[2]. Cf. *coachee*, *bargee*, etc.] A coal-heaver. [Eng.]

coal-yard (kōl′yärd), *n.* A yard or area in which a supply of coal is kept in bins or heaps to meet the demands of customers.

Coaptation splint, a splint made of several longitudinal strips pasted upon a piece of cloth.

coarcture (kō-ärk′tūr), *n.* In *bot.*, same as *collar*, 2 (*b*) (3). *Grew.*

coarse, *a.* 6. In *pathol.*, rough; hoarse: said of the respiratory note or of râles heard in auscultation of the chest.

coartation (kō-ăr-tā′shọn), *n.* [More correct form of *coarctation*.] In *logic*, the restriction of a term to denote a narrower range of objects than usual.

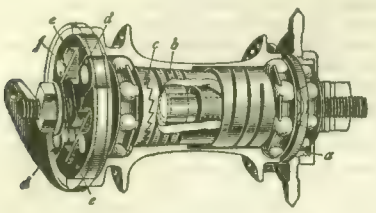
coassignee (kō″as-i-nē′), *n.* One of several joint assignees.

coassine (kō-as′in), *a.* [NL. *Coassus*, a genus name of S. Amer. origin.] Of or relating to

the small South American spike-horned deer of the genera *Coassus* and *Pudu*, which form a group of American deer.

coast, *v. i.* **8.** To glide along swiftly through the air with motionless wings, as a bird.

This explanation of soaring flight, viz., gliding in an uprising current, accounts for the birds exhibiting no trace of fatigue even after "*coasting*" long distances.
Sci. Amer. Sup., June 11, 1904, p. 23778.



9. To loaf about from station to station. [Slang, Australia]

coastal, *a.* — **Belted coastal plain.** See ★*plain*[1]. — **Coastal plain.** See ★*plain*[1].—**Embayed coastal plain.** See ★*plain*[1].

coaster, *n.* **3.** A loafer. See ★*coast, v. i.*, 9. [Slang, Australia.]—**4.** A name applied to cattle bred on or near the coast.

Many times fine specimens have been purchased at long prices, but landed in the hands of the Philistines, with dire results to the offspring—bodies that could not make a shadow, and horns of the old Texas *coaster*—all from the lack of decent care.
Rep. Kan. State Board of Agr., 1901–02, p. 154.

coaster-brake (kōs'tėr-brāk″), *n.* A brake used on bicycles which is applied by rotating the

Coaster-brake.

a, driver attached to sprocket and revolving with it. When driven forward by pedal effort, the screw-threads on *a* draw *b*, the clutch proper, into frictional contact with the conical interior surface of the hub-shell, and the wheel is driven as in common forms of hub. When the pedals are stopped, *a* and *b* stop, while the hub-shell keeps on, so that *b* moves out of contact with the hub-shell and into engagement with *c*, the brake-clutch. The wheel now coasts so long as pedals are held stationary. When *b* is turned backward, *c* presses against *d*, the brake-levers, forcing outward *e*, the brake-shoes. *f*, springs which release the shoes *e*, when the pressure on the pedals is removed.

pedals backward, and is automatically thrown off if the pedals are rotated forward. If, when pedaling forward, the feet are stopped and held still, the brake is not applied, and in this position the rider can coast or ride down a grade without moving the feet, while by giving a small rotation backward the brake is applied; hence the name.

coasting, *n.* **4.** In *railroading*, the act of allowing a train or a car to run upon a down grade by its own gravity, without steam or electric power. [U. S.]

coasting-lead (kōs'ting-led), *n.* See *lead*[2], 2.

coasting-vessel (kōs'ting-ves″el), *n.* A vessel which plies only along the coast.

coast-liner (kōst'lī″nėr), *n.* A surveyor engaged in mapping a coast-line.

It is with the high-water line that the *coast-liner* is concerned, delineating its character according to the Admiralty symbols. *Encyc. Brit.*, XXXIII. 102.

coast-lining (kōst'lī″ning), *n.* The delineation of a coast-line.

Coast-lining. In a detailed survey the coast is sketched in by walking along it, fixing by theodolite or sextant angles, and plotting by tracing-paper or station-pointer. A sufficient number of fixed marks along the shore afford a constant check on the minor coast-line stations, which should be plotted on, or checked by, lines from one to the other wherever possible to do so.
Encyc. Brit., XXXIII. 102.

coat[2], *n.*—**Disguise coat,** the first coat of lead-color put upon the gear of a vehicle, as a cover for the iron and wood, before laying on the colors.—**Eton coat** or **jacket.** (*a*) A boy's short black coat or jacket, reaching to the waist, worn with a wide turned-over stiff linen collar: formerly the distinctive dress of Eton College, England, but now worn by boys of many schools or of suitable age to go to school. (*b*) A somewhat similar jacket worn by women.—**Inverness coat, overcoat,** or **cape,** an overcoat, rather close-fitting, and worn with or without a long heavy cape. The cape may be worn separately, hence the garment is known by all three names.—**Prince Albert coat,** a double-breasted frock-coat, longer than the ordinary morning coat: worn in the daytime on ceremonial occasions.—**Staring coat,** as used by veterinarians and farmers, a dry condition of the skin (especially of horses and cattle), with harsh, rough hair. The individual hairs, being very dry, do not adhere to one another or take their normal position, but stand apart in irregular order.—**Tuxedo coat,** a kind of dress-coat for evening wear, made without skirts: named for a country club at Tuxedo Park, New York: usually shortened to Tuxedo. [U. S.]—**Wash coat,** in lath-and-plaster work, the last thin finishing coat of fine plaster: properly, the white coat or finishing coat. [Seldom used.]

coated (kō'ted), *p. a.* **1.** Provided with a coat; wearing a coat.—**2.** Having a covering (of any kind); as, *coated* nuts (coated with sugar); chocolate-*coated* marshmallows; a *coated* tongue.

coating-machine (kō'ting-ma-shēn″), *n.* **1.** In *candy-making*, a machine for coating and finishing chocolate candies. It consists of a paper-covered traveling-apron, or wire netting, combined with steam-heated tanks holding liquid chocolate and a suitable mechanism for delivering the liquid in a thin stream upon the apron. The nuts, fruits, pastes, etc., to be coated are placed upon the apron, pass through the stream of liquid chocolate, and are completely coated, the surplus falling through the openwork apron into a tank below. An air-blast also assists in removing the surplus chocolate and cooling the finished candies.

2. A pneumatic paint-spreading machine or air-brush; a painting-machine.—**3.** In *photog.*, a machine for coating glass or paper with a sensitive film. *Woodbury*, Encyc. Dict. of Photog., p. 107.

coat-tack (kōt'tak), *n.* A short, broad-headed copper nail for securing a canvas coat around a mast close to the deck.

coattest (kō-a-test'), *v. i.* In *law*, to attest together.

coattestation (kō-at-es-tā'shọn), *n.* Joint attestation by several persons at one time and in one place. See *attestation*.

coattestator (kō-at'es-tā-tọr), *n.* One of several attesting witnesses to the same act or instrument.

coattribute (kō-at'ri-būt), *n.* An attribute of the same substance or subject.

coattribution (kō-at-ri-bū'shọn), *n.* The reciprocal relation of coattributes.

co-author (kō-â'thọr), *n.* A joint author.

Coaxial triangle. See ★*triangle*.

cob[2], *n.* **1.** (*f*). In *pharm.*, a cylindrical mass of crystals of lactose (sugar of milk) formed upon a stick or cord.—**12.** In *hort.*, a kind of filbert characterized by a short rounded nut borne in short open husks. The longer nuts, in long husks, are known as *true filberts*.—**13.** Any of the larger gulls, but more particularly the black-backed gull, *Larus marinus*. [Local, Eng.]

cob[3], *n.* In the United States the standard for a cob is somewhat larger than in England, a typical cob standing about 15 hands high and weighing from 1,000 to 1,050 pounds. A cob is smoother and more compact than a coacher and has shorter legs.

cob[8], (kob), *n.* [*cob*(*swan*).] Same as *cobswan*.

cobalt, *n.*—**Gray cobalt,** a name for smaltine and cobalt pyrites or linnæite.—**Tin-white cobalt.** Same as *smaltine*.

cobaltammine (kō'bâlt-am″in), *n.* [*cobalt* + *amine*.] Any one of an extensive series of compounds, the salts of which, obtained by the action of ammonia on salts of cobalt, in some cases with access of oxygen, are of much interest to the scientific chemist. They include diammines, triammines, tetrammines, pentammines, and hexammines, partly distinguished by characteristic colors.

cobaltiferous (kō-bâl-tif'ė-rus), *a.* [E. *cobalt* + L. *ferre*, bear.] Containing and capable of being used to produce cobalt. *Smithsonian Rep.* (*Nat. Mus.*), 1900, p. 363.

cobano (kō'bä-nō), *n.* [Porto Rican.] A magnificent, widely spreading leguminous tree, *Stahlia monosperma*, native to Porto Rico and found near the sea-coast. It yields a durable wood prized for house-building. Also called *polisandro*.

cobbing-belt (kob'ing-belt), *n.* A heavy flat strip of leather used in cobbing. See *cob*[7].

cobbing-board (kob'ing-bōrd), *n.* A flat piece of wood used in cobbing. See *cob*[7].

cobbing-staff (kob'ing-stâf), *n.* Same as ★*cobbing-stick*.

cobbing-stick (kob'ing-stik), *n.* A heavy piece of wood, resembling a yardstick, used in cobbing. See *cob*[7].

cobble[1], *n.* **7.** In general, any piece of iron or steel which is wasted during rolling or forging: specifically, an imperfectly puddled ball of iron which goes to pieces in the squeezer.

cobble-hedge (kob'l-hej), *n.* A fence of cobble-stones.

After a few steps Greta remembered the trick she had played on Paul, and craned her beautiful neck to see over the stone *cobble-hedge* into the field where she had left him. *Hall Caine*, A Son of Hagar, i. 5.

cobbler[1], *n.* **3.** The last sheep in the pen in sheep-shearing time, usually one that is hardest to shear. [Australia.]—**4.** (*a*) A small fish, *Fundulus heteroclitus*, found abundantly along the eastern coast of the United States. (*b*) The thread-fish, *Alectis ciliaris*, a fish with long filamentous dorsal and anal rays.—**Cobbler's chest.** See ★*chest*[1].—**Cobbler's end,** a waxed end.

cobbler-fish, *n.* **2.** See ★*Alectis*.

cobbra (kob'rä), *n.* [Also *cobra*, *kobbera*: native Australian.] The head; the top of a thing.

Coblentz stoneware. See ★*stoneware*.

Coblentzian (kob-lent'si-an), *n.* and *a.* [Named from *Coblentz*.] In *geol.*, the name given to the uppermost division of the Lower Devonian in central Europe. In Belgium the formation has a thickness of 700–800 feet, and portions of it are highly fossiliferous.

Cobleskill limestone. See *coralline* ★*limestone*.

cob-money (kob'mun″i), *n.* See *cob*[2], 8.

cobra[1], *n.*—**African cobra,** the asp, *Naja haje*.—**King cobra,** *Naja hannah* or *Ophiophagus elaps*, the largest of poisonous snakes and one of the most deadly. It reaches a length of 12 feet, is of an olive-color, with V-shaped bands and markings of a lighter tint, and is found from India to the Malay Peninsula, and in some of the Malayan islands.

cobraism (kō'brä-izm), *n.* [*cobra* + *-ism*.] Poisoning by cobra venom.

In the main these symptoms resemble those of *cobraism*, but the dyspnœa is more urgent.
Nature, July 14, 1902, p. 260.

cobra-lily (kō'brä-lil″i), *n.* *Candarum campanulatum*, a plant of the family *Araceæ*, widely distributed in tropical Asia and adjacent islands.

cobra-stone (kō'brä-stōn), *n.* Same as *chlorophane*, 1.

coburg, *n.* **2.** A primitive vehicle used in the south of England: an inclosed tilt-cart, with windows in the sides and a door in the rear.

Cobweb skipper, weaver. See ★*skipper*[1], ★*weaver*.

cobwork (kob'wėrk), *n.* A structure made of logs laid with their alternate layers at right angles and with the ends secured to the layers above and below by dovetailing.

coca[1], *n.*—**Mexican coca.** Same as *Mexican* ★*clover*.

cocaïnist (kō'kä-in-ist), *n.* [*cocaïne* + *-ist*.] One who is addicted to the use of cocaïne. *N. E. D.*

cocaïnomania (kō″kä-in-ọ-mā'ni-ä), *n.* [E. *cocaine* + Gr. *μανία*, madness.] Morbid addiction to cocïane; cocaïnism.

cocash (kọ-kash'), *n.* [Amerindian.] The red-stalk or purple-stem aster, *Aster puniceus*, of eastern North America, the root of which is stimulant, diaphoretic, and antispasmodic.

cocash-weed (kọ-kash'wēd), *n.* The golden ragwort, *Senecio aureus*.

cocayl (kō'kä-il), *n.* [*coca* + *-yl*.] An organic group, $(CH_3)NC_5H_7$, which, combined with the radical of oxypropionic acid, constitutes the base ecgonine, which, together with methyl alcohol and benzoic acid, is a saponification-product of the alkaloid cocaïne.

Coccaceæ (kok-kā'sē-ē), *n. pl.* [NL., < *coccus* (recognized in botany as a genus only in compounds, as *Micrococcus*, etc.) + *-aceæ*.] A family of *Schizomycetes* including globose forms. Cell-division takes place in 1, 2, or 3 planes. The principal genus is *Micrococcus*. See *coccus*, 1 (*c*).

coccelic (kok-sel'ik), *a.* [*coccus* + *-el* + *-ic*.] Noting a crystalline acid, $C_{20}H_{22}O_7$, found in *Cladonia coccifera*. It melts with decomposition at 178° C.

coccellinic (kok-se-lin'ik), *a.* [*coccel*(*l*)*ic* + *-in* + *-ic*.] Noting a crystalline acid, $C_{10}H_{12}O_4$, formed by the action of hydriodic acid on coccelic acid.

cocceric (kok-ser'ik), *a.* [*coccus* + *-er-* + *-ic*.] Derived from cochineal.—**Cocceric acid,** a crystalline monobasic acid, $C_{31}H_{62}O_3$, found combined with cocceryl alcohol in cochineal. It melts at 93° C.

coccerin (kok'se-rin), *n.* [*coccer-ic* + *-in*[2].] The cocceryl ester of cocceric acid, $C_{30}H_{60}$ $(C_{31}H_{61}O_3)_2$. It is found in cochineal and melts at 106° C.

cocceryl (kok'se-ril), *n.* [*coccer-ic* + *-yl*.] The radical, $C_{30}H_{60}$, of cocceryl alcohol.—**Cocceryl alcohol,** a crystalline diacid alcohol, $C_{30}H_{60}(OH)_2$, found combined with cocceric acid in cochineal. It melts at 101–104° C.

coccidia, *n. pl.* **2.** [*cap.*] The *Coccidiidea*.

coccidial (kok-sid'i-ạl), *a.* [*coccidium* + *-al*[1].] Pertaining to, containing, or caused by *Coccidia*. *Jour. Exper. Med.*, Oct. 25, 1900, p. 166.

coccidid (kok'si-did), *a.* and *n.* **I.** *a.* Of or belonging to the homopterous insects of the family *Coccidæ*, the scale-insects.

II. *n.* A member of the family *Coccidæ*.

coccidin (kok'si-din), *n.* [Also *coccidine*; < *coccid* + *-in*[2].] The substance composing the plastinoid granules characteristic of *Coccidia*. *Labbé*.

coccidine (kok'si-din), *n.* Same as ★*coecidin*.

coccidioid (kok-sid'i-oid), *a.* [*coccidi*(*um*) + *-oid*.] Relating or pertaining to a coccidium.

Coccidioides (kok-sid″i-ō-ī′dēz), *n.* [NL.] A problematical organism occurring as a parasite in man, and found as yet only in America. It first invades the skin, and may spread to the lymphatics and cause a chronic or acute malady which in the latter case is fatal in a short time. The disease resembles miliary tuberculosis in some respects, since immense numbers of small nodules are found in the infected viscera, each nodule containing one or two parasites, either free or lodged in a giant cell. By some the organism is considered to be a sporozoan. *Rixford and Gilchrist*, 1897.

Coccidiomorpha (kok-sid″i-ō-môr′fă), *n. pl.* [NL., < *Coccidium* + Gr. *μορφή*, form.] An order of *Sporozoa* consisting of the *Coccidia* and the *Hæmosporidia*. *Doflein.*

coccidiosis (kok-sid-i-ō′sis), *n.* [NL., < *coccidium* + *-osis.*] A disease caused by the presence of a parasitic coccidium. An affection of this nature in rabbits resembles cancer.

coccidium, *n.* **3.** [*l. c.*] One of the *Coccidiidea.*

coccidology (kok-si-dol′ō-ji), *n.* [NL. *Coccidæ* + Gr. *-λογια*, < *λέγειν*, speak.] The scientific study of the *Coccidæ*, or scale-insects.

In the present state of *coccidology* any writer may well be excused for not accepting all the recently proposed innovations. *Science*, March 25, 1904, p. 501.

coccigenic (kok-si-jen′ik), *a.* [NL. *coccus* + *-genus*, -produced, + *-ic.*] Of coccus origin; caused by the presence of a micrococcus.

coccin (kok′sin), *n.* [Also *coccine*; < *coccus* + *-in*[2].] A term applied to two aniline dyes, both of a red color, one of which, also termed *safrosin*, *eosin scarlet*, *nopalin*, and *eosin BN*, is dinitrobromfluorescin, and the other, known as *coccin 2B* and as *crocein 3BX*, is the sodium salt of sulpho-*a*-azonaphthalin-sulpho-*β*-naphthol.

Coccinin B, an acid coal-tar color of the monoazo type, derived from amido-para-cresol, which dyes wool and silk red in an acid bath.

coccinite (kok′si-nīt), *n.* [*coccus* + *-in* + *-ite*[2].] A mineral found in Mexico in from red to yellow or green crystals and masses. It has been regarded as an iodide of mercury, but its true nature is doubtful.

coccobacillus (kok″ō-ba-sil′us), *n.*; pl. *coccobacilli* (-ī). [NL., < *coccus* + *bacillus.*] A very short bacillus resembling a coccus, as the *coccobacillus* of swine-plague. *Vaughan and Novy*, Cellular Toxins, p. 180.

coccochromatic (kok″ō-krō-mat′ik), *a.* In *diatoms*, having the color distributed in granular patches. Compare ★*placochromatic.*

coccogone (kok′ō-gōn), *n.* [NL. *coccogonium*, < Gr. *κόκκος*, a berry (spore), + *γονή*, generation, offspring.] A cell containing spores found in some of the blue-green algæ and resembling a sporangium.

Coccogoneæ (kok-ō-gō′nē-ē), *n. pl.* [NL., as *coccogone* + *-eæ.*] An order of the blue-green algæ which consist of but a single cell, although that is occasionally united in colonies embedded in a gelatinous matrix. They reproduce by means of spores formed within a coccogone.

coccogonium (kok-ō-gō′ni-um), *n.* [NL.] Same as ★*coccogone.*

coccoid[1] (kok′oid), *a.* and *n.* [*coccus* + *-oid.*] **I.** *a.* Berry-like; globular: applied to microorganisms.

II. *n.* An aggregation of spores of the blue-green alga *Nostoc.*

coccoid[2] (kok′oid), *a.* and *n.* [Gr. *κόκκος*, a berry, + *εἶδος*, form.] **I.** *a.* Resembling a coccus or micrococcus.

II. *n.* A spherical or ovoid bacterium.

coccolith, *n.* Harting has found that minute calcareous disks are separated out of a solution of limesulphate or lime chlorid by the action of ammonia generated by the decomposition of organic matter, and therefore it has been inferred that the coccoliths may be separated from the sea-water whenever organic decomposition is in progress in the presence of lime sulphate.

coccostean (ko-kos′tē-an), *a.* Related to the genus *Coccosteus* or the family *Coccosteidæ.*

coccosteid (ko-kos′tē-id), *n.* One of the *Coccosteidæ.*

cocculiferous (kok-ū-lif′e-rus), *a.* [NL. *coculus* + L. *ferre*, bear.] Bearing coccules or cocci; cocciferous. See *coccus*, 1 (*a*).

cocculin (kok′ū-lin), *n.* [*Cocculus* + *-in*[2].] A crystalline, bitter neutral compound, $C_{19}H_{26}O_{10}$, found, together with picrotoxin, in *Cocculus Cocculus.*

coccygalgia (kok-si-gal′ji-ă), *n.* [NL., < Gr. *κόκκυξ*, coccyx, + *ἄλγος*, pain.] Same as *coccygodynia.*

Coccygeal fistula. See ★*fistula.*

coccygeopubic (kok-sij′ē-ō-pū″bik), *a.* In *anthrop.*, relating to the coccyx and to the pubic bone.—**Coccygeopubic diameter,** the distance from the tip of the coccyx to the lower border of the symphysis.

cochenillin (koch-e-nil′in), *n.* [*cochenille*, a form of *cochineal*, + *-in*[2].] An old name for carminic acid.

cochilsapote (kō″chil-sä-pō′tā), *n.* [Aztec *cochitzapotl*, < *cochi*, sleep, + *tzapotl*, a sweet, succulent fruit containing large seeds.] A Mexican tree, *Casimiroa edulis*, belonging to the *Rutaceæ.* It grows wild, but is also cultivated for the sake of its fruit, which is the size of a large apple and has an agreeable taste. It is said to induce sleep, and is also used as an anthelmintic; the leaves are employed as a remedy for diarrhea. Also called ★*iztactzapotl* or *white sapota.*

Cochilsapote (*Casimiroa edulis*).

a, branch bearing leaves and flowers, about one fifth natural size; *b*, longitudinal section of fruit, about one third natural size.

cochineal, *n.*—**Brilliant cochineal 2R and 4R.** Same as *palatine* ★*scarlet.*—**Cochineal red, scarlet.** See ★*red*[1], ★*scarlet.*—**Cochineal wax,** a solid wax extracted in small quantities from dried cochineal insects. It consists chiefly of an ester, coccerin, containing the radicals of a peculiar alcohol and acid, both of the fatty series.

cochinito (kō-chē-nē′tō), *n.* [Sp., dim. of *cochino*, a pig: see ★*cochino.*] A fish, *Xesurus punctatus*, of the family *Teuthididæ*, found on the Pacific coast of Mexico.

cochino (kō-chē′nō), *n.* [Sp., lit. a pig.] The oldwife, *Balistes vetula.*

cochl. An abbreviation of the Latin *cochleare*, a spoonful.

cochlea, *n.* **3.** In *bot.*, a closely coiled legume.

cochlearin (kok-lē-ā′rin), *n.* [*Cochlearia*[1] + *-in*[2].] A crystalline, camphor-like substance of doubtful identity, obtained from *Cochlearia officinalis* or spoonwort.

cochlearthrosis (kok″lē-är-thrō′sis), *n.* [NL., < *cochlea* + Gr. *ἀρθρωσις*, articulation.] A hinge-joint in which there is a slight lateral shifting of the surfaces on movement.

cochleiform (kok′lē-i-fôrm), *a.* [L. *cochlea*, snail-shell, + *forma*, form.] Having the form of a snail-shell. *Syd. Soc. Lex.*

cochleitis (kok-lē-ī′tis), *n.* [NL., < *cochlea* + *-itis.*] Inflammation of the cochlea of the ear. *Buck*, Med. Handbook, III. 683.

Cochlidiidæ (kok-li-dī′i-dē), *n.* Same as *Limacodidæ.*

cochlidiospermate (kok-lid′i-ō-spėr″māt), *a.* [L. *cochlea*, a snail-shell, + Gr. dim. *-ιδιον* + *σπέρμα* (*τ*-), seed.] Having convexo-concave seeds, as in some species of *Veronica.*

cochliodont (kok′li-ō-dont), *a.* [NL. *Cochliodus* (*-odont-*).] Having the characters of *Cochliodus* or of the *Cochliodontidæ.*

Cochliopodidæ (kok″li-ō-pod′i-dē), *n. pl.* [*Cochliopus* (*pod-*) + *-idæ.*] Same as *Limacodidæ.*

cochlite (kok′līt), *n.* [Gr. *κόχλος*, a spiral shell, + *-ite*[2].] A fossil spiral shell or its cast.

Cochloceras (kok-los′e-ras), *n.* [Gr. *κόχλος*, a spiral shell, + *κέρας*, a horn.] A genus of degenerative ammonoid cephalopods or ammonites having a ribbed, turreted, spirally coiled shell and very simply lobed septal sutures. It is typical of the family *Cochloceratidæ*, and occurs in Triassic rocks.

Cochloceras Fischeri, Hauer. Sandling, near Aussee (after Mauer). (From Zittel's "Palæontology."

Cochranea (kok-rā′nē-ă), *n.* [NL. (Miers, 1868), named in honor of Thomas *Cochrane* (1775–1860), a British naval commander who served as the first admiral of the navy of Chile.] A genus of plants of the family *Boraginaceæ.* They are branching perennials or shrubs, with small, alternate, entire or undulate leaves, and flowers in terminal cymes or scorpioid spikes. There are four species, natives of southern South America. One of them, *C. anchusæfolia*, has been naturalized in the southern United States, where it is known as *false heliotrope.*

Cochrane gambit. See ★*gambit.*

cochucho (kō-chō′chō), *n.* [S. Amer.?] Same as ★*coco*[2].

cocillaña (kō-thēl-yän′yä), *n.* [Bolivian Sp.] A

tree, *Guarea Rusbyi*, of the Bolivian Andes, which yields a valuable medicinal bark having expectorant, tonic, and laxative properties.

cocinera (kō-thē-nā′rä), *n.* [Sp., fem. of *cocinero*, a cook, < *cocina*, kitchen: see *kitchen.*] A fish, *Caranx vinctus*, found on the Pacific coast of Mexico and Central America.

cocinero (kō-thē-nā′rō), *n.* [See ★*cocinera.*] A common name of *Caranx caballus*, a carangoid fish found on the Pacific coast of North America from Mexico to Panama.

cock[1], *n.*—**Cock-end stone,** the upper jewel of the balance of a watch.—**Half-cock stroke.** See ★*stroke*[1].—**Pull-down cock,** a faucet opened by pulling down a rod fastened to the lever or handle of the valve.—**Release cock.** See ★*release-cock.*—**Three-way cock,** a valve having three openings, usually so arranged that any two can be connected or all can be closed.

cock-a-bondy (kok-ạ-bon′di), *n.* [Also *cock-a-bundy*, *cock a bondhu*, etc., < W. *coch a bon ddu*, 'red with black trunk or stem'; *coch*, red (< L. *coccum*, red, scarlet,: see *coccus*); *a*, with; *bon*, trunk or stem (anything swollen); *du*, black.] In *angling*, an artifical fly having a hackle with black center and brown tops.

cockabully (kok′ạ-bůl′i), *n.* [A colonial perversion of the Maori name *kokopu.*] A New Zealand fish, the kokopu, *Galaxias fasciatus*, of the family *Galaxiidæ.*

cock-a-bundy, *n.* Same as ★*cock-a-bondy.*

cockalorum (kok-ạ-lō′rum), *n.* [A humorous word, appar. < *cock*[1] + *-al-orum*, a Latin-seeming ending; but perhaps a variation of *cockarouse*, formerly used in the same sense: often with the epithet *high.*] A person of consequence; a self-important person. [Colloq.]

cockatoo, *n.* **2.** A somewhat contemptuous term applied to a small farmer in Australia. [Colloq.]—**Cockatoo fence,** a fence of the kind used by the cockatoos, or small farmers of Australia. It consists of branches and trees laid horizontally on the ground, one across the other, with bars or slip-rails for gates.

cockatoo-bush (kok-ạ-tö′bůsh), *n.* The palberry- or blueberry-tree. *Myoporum serratum.* See ★*palberry.* [Australia.]

cock-bird (kok′bėrd), *n.* An African weaver-bird of the genus *Vidua*, having two long tail-feathers which suggest the sickle-feathers of a fowl.

cock-boy (kok′boi), *n.* A boy who controlled the action of the steam inlet-valve in pumping-engines before it was understood how the valve could be operated from a moving part of the engine.

cockersprags (kok′ėr-spragz), *n. pl.* Same as *cockermegs.*

cock-eye pilot. See ★*pilot.*

cocking[1] (kok′ing), *n.* Same as *calking*[1], 2.

cocking-dog (kok′ing-dog), *n.* Same as *cocker*[2], 2.

cocking-machine (kok′ing-mạ-shēn″), *n.* A machine which gathers hay from the windrows and puts it in cocks.

cocking-spaniel (kok′ing-span″yel), *n.* Same as *cocker*[2], 2.

cockle[1], *n.*—**Corn-cockle,** an erect whitish woolly annual weed, *Agrostemma Githago*, 1 to 3 feet high, with showy red-purple flowers, infesting grain-fields in Europe and in the eastern half of the United States. The numerous rough, black, irregularly rounded seeds are separated from wheat only with great difficulty, though special separators have been devised for the purpose. The seeds are poisonous, and the bread made of flour from wheat containing them produces disease, sometimes fatal, and either acute or chronic, in the latter case (being due to small amounts habitually eaten) sometimes termed *githagism.*—**Cow-cockle,** the cow-herb, *Vaccaria Vaccaria*, a smooth, much-branched annual, 1 to 3 feet high with numerous rather small pale red flowers. It is a European plant widely introduced in North America, and a bad weed in the northwestern States and adjacent Canada, west of the main range of the corn-cockle. Its seed has been experimentally shown to be poisonous. It is spherical in form and about twice the size of mustard-seed. It mingles with wheat and also with barley and oats, but is more easily screened out than the seed of the corn-cockle.—**Spring cockle,** the cow-cockle, sometimes so called in the northwestern United States on account of its association with spring wheat.

cockle[2], *n.* **1.** (*b*) An Australian bivalve mollusk, *Cardium tenuicostatum*; also, a member of the genus *Chione.*—**6.** A small crisp confection of sugar stiffened with flour, variously flavored, and of a pink, light-yellow, or white color. Mottoes were printed on them in red letters.—**7.** A pucker or wrinkle; an unevenness, as in cloth or glass.—**8.** A disease of wheat caused by a nematoid worm, *Telenchus tritici*, which infests the grain and causes it to become deformed. [Eng.]—**Spanish cockle,** a large, inedible West Indian bivalve, *Codakia orbicularis.*

cockle-bread (kok′l-bred″), *n.* A term of obscure origin and meaning, used especially in the phrase *molding of cockle-bread*, the name of a trivial sport.

cockle-bur, *n.* **3.** The burdock, *Arctium Lappa.*

cockly[1] (kok'li), *a.* Full of wrinkles or puckers: as, *cockly* silk.

cockly[2] (kok'li), *a.* Same as *coggly* and *cocklety.*

cock-mass (kok'mas), *n.* Mass at cockcrow.

cockneyize (kok'ni-iz), *v. t.* [*cockney* + *-ize.*] To give a cockney character to: as, to *cockneyize* a translation. *Blackwood's Mag.*, XIV. 221.

Cockniac, *a.* Same as *Cockney. Thackeray*, The Ravenswing, i.

cockpit, *n.* **5.** A place which is or has been the scene of many contests or battles: as, an ecclesiastical *cockpit;* "Belgium, . . . the *cockpit* of Europe." *Murray*, Handbook of N. Germany, p. 158.

cockroach, *n.*—**American cockroach**, a large cockroach, *Periplaneta americana*, indigenous to subtropical America. It has extended its northern range to the latitude of Philadelphia and has established itself in many parts of the world.—**Australian cockroach**, a large cockroach, *Periplaneta australasiæ*, indigenous to Australia, but carried by commerce to most parts of the world. It is about as large as the American cockroach (*P. americana*), but may at once be distinguished by the brighter and more definitely limited yellow band on the prothorax and by a yellow dash on the sides of the upper wings.—**European cockroach, Oriental cockroach**, the common *Periplaneta orientalis.* See *cockroach.*

cock-robin (kok'rob″in), *n.* The male European robin, *Erythacus rubecula.* The name is most familiar in a nursery rime.—**Cock-robin shop**, a term descriptive of a petty printing-house. [Slang, Eng.]

Cockscomb elm-gall. See ★*elm-gall.*

cockshy, *n.* **2.** The object at which the shy is made; a mark or target.—**3.** A booth or other establishment, as at a fair, where for a small fee one may secure the privilege of having a certain number of shies at some object, such as a negro's head, and receive a prize (a cigar or the like) if successful.

cock-sparrow (kok'spar″ō), *n.* The male English sparrow, *Passer domesticus.*

cockspur, *n.* **3.** (*c*) The ergot of rye. See *ergot*[1]. [Prov. Eng.] (*d*) In British Honduras, *Acacia spadicigera*, a shrub or small tree armed with curved spines about two inches long, produced in pairs at the base of each branch and each leaf. These thorns are usually hollowed out by ants and serve them as nests.

cockswain's-box (kok'swānz-boks), *n.* In a ship's cutter, the space between the backboard and the transom, in which the cockswain sits while steering.

cocksy (kok'si), *a.* [Also *coxy;* < *cock*[1] + *-sy*, equiv. to *-y*[1].] Same as *cocky. T. Hughes.*

cocktail, *n.* **5.** Cocktail beer. [Prov. Eng.]

> Bill drank the proffered *cock-tail* not unwillingly.
> *T. Hughes*, Tom Brown's School Days, i. 6.

Cocktail beer, beer when fresh and foaming. [Prov. Eng.]—**Cocktail grit.** See *Esopus* ★*grit.*—**Manhattan cocktail**, a whisky cocktail diluted with vermuth.—**Martini cocktail**, a gin cocktail diluted with vermuth.—**Oyster cocktail**, a mixture made by putting 6 small raw oysters in a cocktail-glass or small tumbler and adding a dash of Tabasco-sauce, half a teaspoonful of vinegar, two or three dashes of lemon-juice, tomato catchup, and salt and pepper to taste.

cock-tailed, *a.* **2.** Said of a horse having the tail docked so that it points obliquely upward like the tail of a cock.

cock-tread (kok'tred), *n.* Same as *cicatricula.*

cock-treading (kok'tred-ing), *n.* Same as ★*cock-tread.*

cocky[2] (kok'i), *n.* A shortened form of ★*cockatoo*, 2. [Australia.]

coco[2] (kō'kō), *n.* [Native name.] A name in Argentina of a tree of the rue family, *Fagara Coco* found in the sierras of the country. It has a powerful penetrating odor and yields a wood of a beautiful light-green color. Also called *cochucho.*

coco[3] (kō'kō), *n.* [Origin uncertain.] The nut-grass, *Cyperus rotundus.* See *Cyperus.* Also *coco-sedge.*

coco[4] (kō'kō), *n.* [Also *cocoe, cocco;* appar. native.] In the British West Indies, the taro-plant, *Caladium Colocasia.*

cocoa[2], *n.* **3.** A beverage made from ground cocoa-nibs. See ★*cocoa-nibs, cacao*, and *Theobroma.*—**Flake cocoa**, a trade-name for a special form of chocolate, prepared by passing the roasted and husked kernels through rollers, or more commonly by grinding the small fragments of the kernels (still retaining much husk) which have been separated in sifting.

cocoa-beetle (kō'kō-bē″tl), *n.* Same as ★*cacao-beetle.*

cocoa-butter (kō'kō-but″ėr), *n.* Same as *cacao-butter.*

cocoa-cracker (kō'kō-krak″ėr), *n.* A machine for cracking or crushing cocoa. It consists of a pair of horizontal rolls for cracking the shells, and a winnowing-fan for removing the broken shells and dust. It is usually combined with a rotary screen for sorting the broken cocoa and removing undesirable portions.

cocoa-essence (kō'kō-es″ens), *n.* The trade-name for the roasted kernels of chocolate, husked, ground, and deprived of part of their fat by heat and pressure, or else to which starch and sometimes sugar have been added so as to reduce the relative proportion of fat.

cocoa-fat (kō'kō-fat), *n.* Same as *cacao-butter.*

cocoa-mill (kō'kō-mil), *n.* A mill for reducing crushed cocoa to a soft paste by grinding it between millstones. Such mills are sometimes arranged in pairs or in series of three, for fine grinding.

cocoa-nibs (kō'kō-nibz), *n. pl.* The cotyledons of cacao seed. See *cacao.*

cocoanut, *n.* **Cocoanut olein**, the more fusible portion of cocoanut-oil, separated from the less fusible stearin by pressure.—**Cocoanut stearin**, the less fusible or more solid portion of cocoanut-oil, left as a cake on the removal of the fluid olein by pressure.

cocoanut-beetle (kō'kō-nut-bē″tl), *n.* **1.** An Oriental scarabæid beetle, *Oryctes rhinocerus.* —**2.** An Oriental curculionid beetle, *Rhyncophorus ferrugineus.*—**3.** The ★*palm-beetle* (which see).

cocoa-paste (kō'kō-pāst″), *n.* The paste produced by grinding under heated rollers the kernels of chocolate which have been roasted and deprived of their husks.

cocoa-red (kō'kō-red), *n.* A brownish-red coloring-matter present in chocolate, probably derived from the oxidation of tannin.

cocoa-roaster (kō'kō-rōs″tėr), *n.* In *candy-making*, a hollow revolving oven connected with a furnace, used in roasting cocoa, coffee-beans, nuts, etc. The oven is suspended from a tilting-frame for convenience in discharging the roasted material, and when in operation is made, by means of gearing, to revolve to prevent burning, and is fitted with an appliance for testing the roasting without stopping the process In another and larger type the process is aided by a hot blast for drying the nuts and removing the broken shells and dust.

cocoa-tavern (kō'kō-tav″ėrn), *n.* A place for the sale of the beverage called cocoa.

coconscious (kō-kon'shus), *a.* In *psychol.*, pertaining to the continuity or felt conjunction of experiences within a single consciousness.

> The conjunctive relation that has given most trouble to philosophy is the *co-conscious* transition, so to call it, by which one experience passes into another when both belong to the same self. About the facts there is no question.
> *W. James*, in Jour. Philos., Psychol. and Sci. Methods, [Sept. 29, 1904, p. 536.

cocoon (kọ-kön'), *v.* [*cocoon*[1], *n.*] **I.** *intrans.* To form a cocoon.

II. *trans.* To wrap as in a cocoon.

> We snatched a few odds and ends of clothing, *cocooned* ourselves in the proper red blankets, and plunged . . . out into the whistling wind bareheaded.
> *Mark Twain*, Tramp Abroad, xxviii.

cocorron (kō-kō-rōn'), *n.* [Porto Rican.] A variety of *Elæodendrum xylocarpum*, a shrub or small tree of the family *Celastraceæ*, found along the sea-coast in the Danish West Indies and Porto Rico. Called *spoon-tree* in the Danish West Indies.

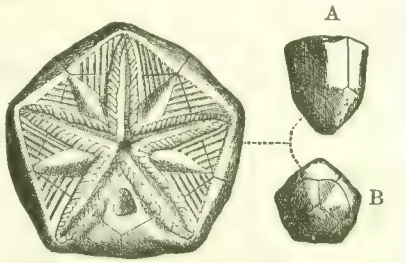
coco-sedge (kō'kō-sej), *n.* Same as ★*coco.*[3]

cocuiza (kō-kō-ē'thä), *n.* [Venezuelan.] A fiber prepared from the long, thick leaves of several species of *Furcræa*, especially *F. fœtida* and *F. Cubensis.* It is used for making bags, hammocks, harness, cordage, etc. Commercially known as *Mauritius hemp.* See also *pita*, 2.

cocurrent (kō-kur'ent), *a.* That turn at the same lunar hour as oceanic currents, or that connect on a map of the ocean the points where different oceanic currents turn at the same hour: as, *cocurrent* lines. *An. Rep. U. S. Coast Survey*, 1897, p. 335.

cocuyo (kō-kö'yō), *n.* [Taino.] **1.** A firefly; also, a glow-worm.—**2.** A fish of the family *Balestidæ, Xanthichthys ringens*, found in the West Indies.

cod[1], *n.* **8.** The bearing of a car-axle; a bush. [Scotch miners' term.]



cod[2], *n.*—**Black cod**, a New Zealand fish, *Notothenia angustata.*—**Pacific cod**, a codfish, *Gadus macrocephalus*, found in the North Pacific: abundant about the Alaskan coasts.

cod[2], (kod), *v. i.* [Cod[2], *n.*] To fish for cod.

Cod. An abbreviation of *Codex.*

Codaster (kō-das'tėr), *n.* [NL., short for *Codonaster.*] A genus of regular blastoid *Echinodermata* with obconical calyx, the flat pentagonal upper surface bearing the oral, anal, and

ambulacral areas. It occurs in Devonian and Carboniferous rocks. Sometimes written *Codonaster.*

Codaster acutus, M'Coy. Carboniferous Limestone; Derbyshire. A, side-view of calyx; B, base; C, ventral aspect, enlarged (after Roemer).
(From Zittel's "Palæontology.")

cod-bait (kod'bāt), *n.* [Appar. < *cod*[1] + *bait*, the larva being in a cod or case; but some take the other form, *cad-bait*, to be the original.] **1.** The larva of the caddis-fly: same as *cad-bait.* —**2.** The lobworm, *Arenicola.*

cod-bank (kod'bangk), *n.* A fishing-bank frequented by cod or on which cod are caught.

cod-chest (kod'chest), *n.* A live-box in which cod are kept.

coddia (kod'i-ą), *n.* A Ceylonese black ant noted for its severe bite.

coddle[2], *v. t.* **2.** In *tobacco-manuf.*, to injure by fermentation.

code, *n.*—**Civil code.** (*a*) A body of adjective law which defines procedure and practice in civil actions. (*b*) A body of substantive law which defines the rules and principles applicable to civil actions.—**Criminal code**, a code which defines crimes, their degrees, and the nature and extent of the punishment.—**International code**, the code of signals adopted by all maritime nations for communicating with vessels at sea, stations alongshore, etc. The present code came into use on January 1, 1902, and consists of 26 flags—one for each letter of the English alphabet—and a code-pennant. Urgent and important signals are of two flags; general signals of three flags; and geographical signals, alphabetical spelling-tables, and vessels' numbers are of four flags. The international code-book is divided into three parts. The first contains urgent and important signals, and all the tables of money, weights, barometric heights, etc., together with a geographical list and a table of phrases formed with the auxiliary verbs. The second is an index, consisting of a general vocabulary and a geographical index, arranged in alphabetical order. The third gives lists of the United States storm-warning, life-saving, and time-signal stations, and of Lloyd's signal-stations of the world. It also contains semaphore and distant signal-codes, United States army and navy codes, and Morse wigwag codes.—**Mosaic code.** Same as *Mosaic law.*—**Priests' code**, the ceremonial sections of Exodus and Numbers: regarded by modern critics as representing a narrative written during the Babylonian exile by a school of priests who sought to give in a historical setting their conception of the origin of the ceremonial institutions of the Hebrews. It is characterized by statistical details, long genealogical tables, careful chronology, and formality of style. About 400 B. C., the so-called prophetic narratives were incorporated with it to form the present Hexateuch. Also called *Elohistic document P.*—**Stricklandian code**, rules of zoölogical nomenclature prepared by a committee appointed by the British Association at the Manchester meeting, 1842. H. E. Strickland, the ornithologist, a member of this committee, is credited with having drawn up these rules, usually known as the Stricklandian code. The work was of great importance as being the first earnest effort to systematize the formation and use of zoölogical names.—**Telegraphic code**, a system of words of uniform length, each of which represents some word, phrase, or sentence, used in sending telegraphic or cable messages, in order to secure brevity, economy in expenditure, and secrecy, the message so sent having no intelligible meaning except to those who possess the key, that is, another copy of the code.

code (kōd), *v. t.* To prepare (a message or despatch) for transmission by translating it into the cipher or arbitrarily chosen words of the code previously agreed upon.

codeclination (kō-dek-li-nā'shọn), *n.* [*co(mplement)* + *declination.*] The complement of the declination (90° minus the declination). Same as *polar distance.*

codefendant (kō-dē-fen'dant), *n.* A joint defendant (in some action or suit).

codeia (kō-dē'yä), *n.* [NL.] Same as *codeine.*

cod-end (kod'end), *n.* Same as *cod*[1], 7.

codeposit (kō-dē-poz'it), *n.* In *elect.*, a deposit upon the electrode of an electrolytic cell consisting of metal or substance other than that obtained from the main electrolytic action and deposited simultaneously with the latter.

codeposition (kō-dep-ō-zish'ọn), *n.* In *elect.*, the simultaneous deposition, upon the electrode of an electrolytic cell, of two or more substances.

codetermination (kō-dē-tėr-mi-nā'shọn), *n.* 1. A determination that determines the same matter.—2. The reciprocal relation of determining the same matter.

codetta, *n.* 2. Same as ★*copula*, 9.

codex, *n.* 2. Among the famous American codices are the *Codex Cortesianus*, a pre-Columbian Maya codex preserved at Madrid; the *Codex Dresdensis*, a pre-Columbian Maya codex preserved at Dresden; and the *Codex Vaticanus*, a pre-Columbian codex preserved in the Vatican Library, Rome.

codirectional (kō-di-rek′shọn-ạl), *a.* Having the same direction.

A ray of plane polarized light is transmitted through a substance set in a magnetic field *codirectional* with the ray. *Ency. Brit.*, XXX. 248.

cod-man (kod′man), *n.* A vessel employed in the cod-fishery. *N. E. D.*

cod-oil (kod′oil), *n.* Oil obtained from the bodies of codfish, often mixed with the product from other fish: used in dressing leather.

Codonaster (kō-dọ̄-nas′tėr), *n.* [NL., < Gr. *κώδων*, a bell, + *ἀστήρ*, a star.] See ★*Codaster*.

Codonidæ (kō-don′i-dē). *n. pl.* [NL., < *Codonium* + *-idæ*.] A family of *Anthomedusæ*, having the mouth-opening simple, the gonads not divided radially, 4 narrow radial canals, and unbranched tentacles. It includes *Codonium*, *Dinema*, *Hybocodon*, *Globiceps*, and other genera.

Codonium (kō-dō′ni-um), *n.* [NL., < *κωδώνιον*, dim. of *κώδων*, a bell.] The typical genus of the family *Codonidæ*. *Haeckel*, 1879.

codonostome (kō-dō′nọ̄-stōm), *n.* Same as *codonostoma*.

codot (kō′dot), *n.* [*co-*[1] + *dot*[1].] In *projective geom.*, one of the points other than the dots in which the connectors of a polystigm intersect.—**Codot tristigm,** in *projective geom.*, the tristigm determined by the 3 codots of a tetrastigm.

cod-piece, *n.* 2. In carriage-trimming, a half-circle at the lower front corner of a carriage-top cast solid with the side-quarter or sewed on: used to cover slat-irons and prop-post.

cod-pitchings (kod′pich′ings), *n. pl.* Cod-liver oil of the lowest grade, made from partly decomposed livers.

cod-slip (kod′slip), *n.* A pillow-case.

coed (kō-ed′), *n.* A female student in a coeducational college. [Slang.]

coeducation (kō-ed″ū-kā′shọn), *n.* [*co-*[1] + *education*.] Joint education; specifically, the education of young men and young women in the same institution and the same classes.

coeducational (kō-ed-ū-kā′shọn-ạl), *a.* 1. Relating or pertaining to coeducation: as, *coeducational* problems.—2. That admits both sexes to the same educational privileges: as, a *coeducational* college.

There is also inculcated in the minds of our boys and girls the thought that wrong is wrong, no matter who shelters or defends it; . . . that immorality is immorality, whether seen in man or woman. Nowhere else than in a *coeducational* school can these principles be so firmly rooted. *F. S. Fosdick*, in Jour. of Proc. of Nat. Educational Ass'n, 1903, p. 453.

coeffect (kō-e-fekt′), *n.* A complementary effect.

Though it has been claimed that at times these growths induce headache, it is probable that they are then but *co-effects* of some other cause.
Buck, Med. Handbook, II. 390.

coefficient, *n.*—**Adiabatic coefficient of compressibility,** the coefficient of compressibility of a fluid measured under conditions such that heat neither enters nor leaves the fluid during the operation. — **Admiralty coefficients,** in *naval arch.*, empirical coefficients used in estimating the horse-power required to drive a ship at a given speed. The *midship-section coefficient* is the ratio of the product of the area of midship section by the cube of the speed to the indicated horse-power; the *displacement coefficient* is the ratio of the product of the two-thirds power of the displacement by the cube of the speed to the indicated horse-power.

Those "coefficients" are frequently based upon rules laid down in Admiralty practice at an early period in steamship construction, and they are consequently known as *Admiralty coefficients*.
White, Manual of Naval Arch., p. 625.

Block coefficient, in *naval arch.*, the ratio of the volume of the under-water body of a vessel to the displacement of a parallelepiped having the same length, breadth, and depth as that part of the vessel. See ★*coefficient of fineness*. — **Coefficient of absorption of gases,** the volume of a gas at 0° C. and 76 centimeters pressure, dissolved by a unit volume of the liquid in which it is absorbed.—**Coefficient of absorption of radiation.** See *absorption of light*.—**Coefficient of acidity.** See ★*acidity*. — **Coefficient of augmentation,** in *naval arch.*, a coefficient depending on the average angle of obliquity of the water-lines of a vessel to the fore-and-aft line: applied to the wetted surface it gave the augmented surface used by Rankine in a formula for determining the resistance to propulsion of the vessel. See *augmented surface*, under *augment*. — **Coefficient of contraction,** in *hydraul.*, the ratio of the area of the jet of liquid issuing from a reservoir, measured at a distance from the orifice of half the diameter of the jet, to the area of the orifice.—**Coefficient of correlation.** See ★*correlation*, 5.—**Coefficient of diffuse reflection.** Same as ★*coefficient of diffusion*.—**Coefficient of diffusion,** in *optics*, the ratio of the light diffusely reflected, in the direction of the normal to a mat surface, to the incident light. Also called the *coefficient of diffuse reflection*. —**Coefficient of direct resistance,** in *naval arch.*, an empirical factor which when multiplied by the area of greatest submerged section normal to the direction of motion and by the square of the speed gives the resistance of a body to motion through the water.—**Coefficient of discharge,** in *hydraul.*, the ratio of the actual rate of discharge of liquid from a reservoir to that which would have occurred in the absence of the recognized impediments to flow, such as frictional resistance, contraction of the liquid vein, etc.—**Coefficient of ellipticity,** the ratio between the major and minor axes of an ellipse.—**Coefficient of emission,** the ratio of emissive power of a body to that of the ideal black body of the same temperature. This ratio is designated by most writers as *emissive power*, and sometimes as *emissivity*. *Tait.* [Rare.]—**Coefficient of fatigue.** See ★*fatigue*.—**Coefficient of fineness,** in *naval arch.*, a coefficient expressing the ratio of the area of a curved line, such as the immersed midship section or a waterline of a vessel, to the area of its circumscribed rectangle, or the ratio of the underwater volume to the volume of its circumscribing rectangular parallelepiped (in that case called *block coefficient*), or to the volume of the cylinder circumscribed about the midship section (called *cylindrical* or *prismatic coefficient*).

The technical term for such percentages is "*coefficient of fineness*," expressing, as it does, the extent to which the immersed part of a ship is reduced from the parallelepipedon, or "fined." *White*, Manual of Naval Arch., p. 3.

Coefficient of friction. (*b*) In *naval arch.*, an empirical factor, dependent upon the immersed length, which when multiplied by the area and by the velocity of the water past the surface, raised to about the 1.83 power, gives the frictional resistance of a submerged surface to motion through the water. Also called *coefficient of frictional resistance*.—**Coefficient of inhibition,** in *bacteriol.*, that concentration of a disinfectant which if added to a given medium will prevent the development and multiplication of bacteria without killing them.—**Coefficients of performance.** Same as *admiralty* ★*coefficients*.—**Coefficient of purity,** in the sugar industry, the ratio (usually expressed as percentage) of sucrose or pure cane-sugar to the total solids in solution in the juice of cane or beet. —**Coefficients of reality,** two conative factors held to be the material of the intellectual concept of reality, the one (an experience of resistance) relating to reality in the past and furnishing the reason for attributing it to an object; the other referring to reality in the future and furnishing a *raison d'être*, or utility, to the concept (a resolve to shape one's conduct to an expectation). The term was introduced by Dr. H. W. Stuart, who regards the coefficients as emotions, the former of the contractive type, the latter of the expansive. But it is not essential to the main position that reality should be based on emotion.—**Coefficient of regression.** See ★*correlation*, 5.—**Coefficient of resistance,** in *hydraul.*, the numerical factor representing the loss of head due to frictional resistance to flow in the case of the efflux of a liquid from a reservoir.—**Coefficient of rigidity,** a numerical constant used to denote the simple rigidity of a substance. —**Coefficient of rotation.** Same as *rotatory* ★*coefficient*.—**Coefficient of run-off,** the ratio between precipitation and run-off.

Hydrotechnologists have laid much stress on this proportion [between river-water and the rainfall of a region], the so-called "*coefficient of run-off*," and it is generally thought that this might be a constant factor for a distinct river. *Geog. Jour.* (R. G. S.), X. 620.

Coefficient of self-induction, the numerical value of the self-inductance in a circuit expressed in henrys or other units.—**Coefficient of slip,** the ratio of the internal friction of a gas or vapor to its external friction.

Between the pressures of .6 and 20 millimeters of mercury the value of the *coefficient of slip* was found to be inversely proportional to the density of the gas and very nearly equal to the free path of the molecules.
Reynolds, Physical Rev., XVIII. 423.

Coefficient of solubility. See ★*solubility*.—**Coefficient of thermometric conductivity,** the conductivity of a substance divided by the quantity of heat necessary to raise a unit volume of it 1° C. Same as *thermal* ★*diffusivity*.—**Coefficient of transmission,** the proportion of radiant energy transmitted by a layer of any absorbing medium one centimeter in thickness.

Each wave-length has its own *coefficient of transmission* through each transparent substance.
A. Daniell, Text-book of Physics, p. 499.

Coefficient of ubiquity, the exponent of a logarithmic factor which expresses the dependence of a plant upon temperature: the larger the exponential coefficient the less is the plant dependent on local temperature and the more widely it may spread over the globe.—**Coefficient of variability.** (*a*) A number computed in accordance with the laws of chance, and expressing the fact that there is an even chance that the observed value of a given phenomenon will lie within a given range. Thus the coefficient of variability of the annual rainfall at Marietta, Ohio, is 4.1 inches; or, in other words, there is an even chance that the rainfall of any year will be 4.1 inches more or less than its average value. Also called the *probable error of the event*. (*b*) Same as ★*coefficient of variation*.—**Coefficient of variation,** a coefficient obtained by dividing the diversity among the individuals of a species, race, or population, considered as statistical deviation from the mode, by the index of variability and multiplying it by 100. See ★*index of variability* and ★*mode*[1], 12. *H. E. Crampton*, Biometrika, March–July, 1904, ii. 117.—**Coefficient of velocity,** in *hydraul.*, the ratio of the actual velocity of efflux of liquid from a reservoir to the velocity which would have been attained in the absence of resistance to flow due to friction or to other causes of retardation.—**Coefficient of ventilation,** a formula which expresses the number of times the air contained in a given space is renewed per unit of time: it is the fraction $\frac{R}{H}$, in which R represents the number of times the air is renewed in the given time represented by H. *Buck*, Med. Handbook, VI. 162.—**Coefficient of viscosity,** the ratio of the stress upon a moving fluid to its velocity gradient.—**Coefficient of wind-pressure,** the pressure of the wind against a stationary object, or the resistance of the air to a moving object, depending upon the velocity of the motion, the density of the air, and the size and shape of the object. If the wind carries rain, this mass is added to that of the air and increases the pressure.—**Cylindrical coefficient.** Same as ★*coefficient of fineness*.—**Displacement coefficient.** See *admiralty* ★*coefficient*.—**Dissociation coefficient.** See *dissociation* ★*constant*.—**Hyetal coefficient.** See *pluviometric* ★*coefficient*.—**Hysteresis coefficient,** in *elect.*, a numerical constant denoting the degree of hysteresis observed in a given specimen of iron or other magnetic material when it is subjected to successive magnetization and demagnetization.—**Ionization coefficient,** a number which expresses the degree of ionization or electrolytic dissociation of a dissolved electrolyte.—**Isothermal coefficient of compressibility,** the coefficient of compressibility of a fluid, measured under conditions involving no change of temperature.—**Lethal coefficient** in *bacteriol.*: (*a*) *Inferior lethal coefficient*, that medium concentration of a disinfectant which will kill sporeless bacteria in water at a temperature of 20–25° C. in the shortest time. (*b*) *Superior lethal coefficient*, that medium concentration of a disinfectant which will kill bacteria spores in water at a temperature of 20–25° C. in the shortest time.—**Lillienthal coefficients,** coefficients prepared by Lillienthal, showing the relation between the horizontal and vertical components of the force exerted by a current of moving air on an inclined vane or wing.—**Midship-section coefficient.** See *admiralty* ★*coefficient*.—**Output coefficient,** a ratio proposed as the ultimate basis for the design of induction motors. As proposed, it is the ratio of the watt output to the product of speed in revolutions per minute, gross length in centimeters, and the square of the diameter at the air-gaps in centimeters. It varies from 0.0009 for a 10-horse-power motor to 0.0018 for a 1,000-horse-power motor.—**Pluviometric** or **hyetal coefficient,** in *meteor.*, the ratio of the precipitation for any month to what would have fallen if the rainfall had been uniformly distributed throughout the year.—**Prismatic coefficient.** See ★*coefficient of fineness*.—**Propulsive coefficient,** in *naval arch.*, the ratio of the effective ★horse-power (which see) to the indicated horse-power of the propelling engines of a steamer. The coefficient is usually expressed as a percentage.—**Rotatory coefficient,** a physical constant denoting the power of optically active substances to turn the plane of polarization of light; the angle through which the plane of polarization is rotated by a layer of unit thickness.—**Temperature coefficient.** (*a*) A numerical factor which expresses the change in temperature per degree centigrade of any physical constant. Since nearly all the properties of matter are affected by change of temperature, there are numerous temperature coefficients, such as the temperature coefficient of rigidity, viscosity, thermal conductivity, thermal capacity, refraction, specific inductive capacity, and electrical resistance. (*b*) The coefficient of change in electrical resistance of a substance with variation of temperature. The temperature coefficient (*k*) is given by the equation: $kt = 1 - \frac{r_t}{r_0}$, in which r is the resistance of the substance at the temperature t_0, and r_t its resistance at 0°.

cœlacanthous (sē-lạ-kan′thus), *a.* Same as *cœlacanthine*.

Cœlelminthes (sē-lel-min′thēz), *n. pl.* [NL.] Same as *Cœlelmintha*.

cœlenteric (sē-len-ter′ik), *a.* [*cœlenter-on* + *-ic*.] In *zoöl.*, of or relating to the cœlenteron or digestive cavity of a cœlenterate.

cœlenteron (sē-len′tẹ-ron), *n.*; pl. *cœlentera* (-rạ). [NL., < Gr. *κοίλος*, hollow, + *ἔντερον*, interior, entrail.] The digestive cavity of a cœlenterate; an enterocœle. *A. E. Shipley*, Zoöl. of Invertebrates, p. 78.

coelho (kō-el′yō), *n.* [Pg., = Sp. *conejo*, < L. *cuniculus*, a rabbit: see *cony*.] Same as ★*rabbit-fish*, 4.

cœlian (sē′li-ạn), *a.* [Gr. *κοιλία*, a hollow, < *κοίλος*, hollow.] Of the hollow type; concave: noting that type of vertebra in which both faces of the centrum are concave; biconcave; amphicœlian. *Wieland*, 1899.

Cœlicolist (sē-lik′ọ̄-list), *n.* [L. *cælicola*, heaven-worshiper, < *cælum* (erroneously *cœlum*), sky, heaven, + *colere*, worship, + *-ist*.] A worshiper of the sky: one of a sect of the fourth and fifth centuries.

A Magian never can become a Greek, or a Greek a *Cœlicolist*. *J. H. Newman*, Callista, p. 170. *N. E. D.*

cœliodynia (sē″li-ọ̄-din′i-ạ). *n.* [NL., < Gr. *κοιλία*, belly, + *ὀδύνη*, ache.] Belly-ache; colic.

cœlioscope (sē′li-ọ̄-skōp), *n.* [Gr. *κοιλία*, belly, + *σκοπεῖν*, view.] An instrument for the examination of the abdomen or other cavity of the body.

cœliospasm (sē′li-ọ̄-spazm), *n.* [Gr. *κοιλία*, belly, + *σπασμός*, spasm: see *spasm*.] Cramp of the abdominal muscles or of the intestines.

cœliotomy (sē-li-ot′ọ̄-mi), *n.* [Gr. *κοιλία*, belly, + *-τομια*, < *ταμεῖν*, cut.] Same as *laparotomy*.

A scar in the linea alba indicated the site of the former *cœliotomies*. *Lancet*, July 18, 1903, p. 149.

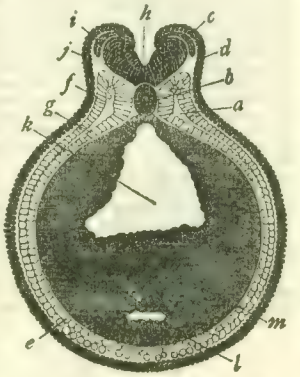
cœloblast (sē′lọ̄-blâst), *n.* [Gr. *κοῖλος*, hollow, + *βλαστός*, germ.] In *insect embryol.*, according to the nomenclature of Graber, the endoderm in a narrow sense, or a part of the endoblast as distinguished from the myoblast. *Cambridge Nat. Hist.*, V. 149.

cœloblastic (sē-lō-blas′tik), *a.* [Gr. *κοῖλος*, hollow, + *βλαστός*, germ, + *-ic.*] Characterized by possessing a number of nuclei within a single cell-wall: applied to algæ belonging to the *Siphonales*.

cœloblastula (sē-lō-blas′tū-lă), *n.*; pl. *cœloblastulæ* (-lē). [NL., < Gr. *κοῖλος*, hollow, + NL. *blastula*.] A hollow blastula, as contrasted with one in which the segmentation cavity is filled up by the blastomeres, or a *sterroblastula*.

cœlocyrtean (sē-lō-sėr′tē-an), *a.* [Gr. *κοῖλος*, hollow, concave, *κυρτός*, curved, convex, + *-e-an.*] Concavo-convex: noting that type of vertebra in which the anterior face is concave and the posterior face convex.

cœlogastrula (sē-lō-gas′trū-lă), *n.*; pl. *cœlogastrulæ* (-lē). [NL., < Gr. *κοῖλος*, hollow, + NL. *gastrula*.] A gastrula with an open archenteron, as contrasted with a sterrogastrula, in which the archenteron is filled by the endoderm-cells.



Cœlogorgia (sē-lō-gôr′ji-ă), *n.* [NL.] The typical and only genus of the family *Cœlogorgidæ*. *Milne-Edwards*, 1867.

Cœlogorgidæ (sē-lō-gôr′ji-dē), *n. pl.* [NL., < *Coelogorgia* + *-idæ*.] A family of alcyonarian *Anthozoa*, of the order *Stelechotokea*. The colony is arborescent, attached by stolon-like processes. The stem is formed by an axial zoöid with thickened cœnenchymatous walls, the branches by axial zoöids of the second order, and the branchlets by axial zoöids of the third order borne either on two sides or in spirals on the main stem. The spicules are straight or curved and bear lateral processes. *Cœlogorgia* is the typical genus.

Cœlogyne (sē-loj′i-nē), *n.* [NL. (Lindley, 1825), < Gr. *κοῖλος*, hollow, + *γυνή*, female (pistil).] A genus of ornamental plants of the family *Orchidaceæ*. It includes about 50 species, all of which are pseudobulbous. They are found growing on trees and rocks in tropical Asia. *C. pandurata*, *C. Dayana*, *C. Massangeana*, *C. odoratissima*, and others, are grown in the United States. *C. cristata*, with its several varieties, is the most popular species. It has large white yellow-fringed flowers.

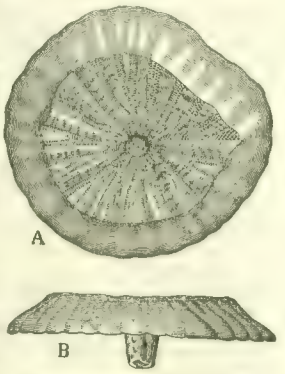
cœlomesoblast (sē-lō-mes′ō-blast), *n.* [Gr. *κοῖλος*, hollow, + *μέσος*, middle, + *βλαστός*, germ.] In *embryol.*, the true mesoblast surrounding the true body-cavity or cœlom of the embryo, as distinguished from other kinds of mesoblast, such as the mesenchyme and ectomesoblast.

Cœlomic fluid, a colorless nutritive fluid, containing amœboid corpuscles, found in the perivisceral cavity of certain annulate worms.—**Cœlomic pouch**, in *embryol.*, a pocket derived by evagination from the walls of the cœlom.

Transverse Section through a Frog Embryo

showing the neural folds shortly before they meet each other to complete the neural tube. *a*, cœlom or body cavity; *b*, notochord; *c*, outer or epidermic layer of epiblast; *d*, inner or nervous layer of epiblast; *e*, cœlomesoblast; *f*, outer or somatopleuric layer of mesoblast; *g*, inner or splanchnopleuric layer of mesoblast; *h*, neural groove; *i*, dorsal root of a spinal nerve; *j*, spinal chord; *k*, mesenteron; *l*, liver diverticulum; *m*, yolk. (From Marshall's "Vertebrate Embryology.")

Cœlomocœla (sē-lō-mō-sē′lă), *n. pl.* [NL., < Gr. *κοίλωμα*, a hollow (see *cœloma*), + *κοῖλος*, hollow.] In Lankester's classification, a grade of *Enterozoa* in which the cœloma is present as an independent second cavity, as opposed to the *Enterocœla* (which see), in which the sole cavity is the enteron. In this grade are included all groups of *Enterozoa* except the *Hydromedusæ*, *Scyphomedusæ*, *Anthozoa*, and *Ctenophora*. Same as *Cœlomata*, 1.

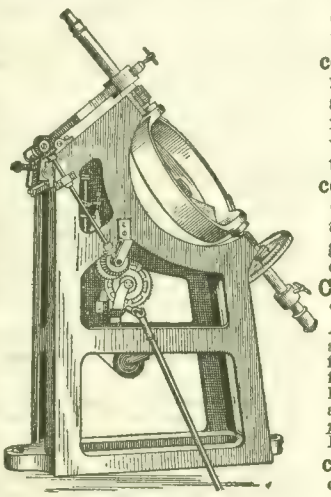


cœlomodæum (sē-lō-mō-dē′um), *n.*; pl. *cœlomodæa* (-ă). [NL., < Gr. *κοίλωμα*, a hollow, + (?) *δαίειν*, divide.] The ectodermal portion of a cœlomic duct.

cœlomopore (sē-lō′mō-pōr), *n.* [Gr. *κοίλωμα*, a hollow, + *πόρος*, a pore.] A pore or opening through which the cavity of a protocœlom communicates with the exterior.

cœlomostome (sē-lō′mō-stōm), *n.* [Gr. *κοίλωμα*, a hollow, + *στόμα*, mouth.] The funnel-like mouth of a cœlomoduct.

Cœloplana (sē-lō-plā′nă), *n.* [NL., < Gr. *κοῖλος*, hollow, + L. *planus*, plane.] A flat disk-shaped organism which has been regarded as transitional from the planarians through *Ctenoplana* to the ctenophores, *Cœloplana* being regarded as closest to the planarians, and *Ctenoplana* closest to the ctenophores. Nothing is known of the development of either form.



cœloplatyan (sē-lo-plat′i-an), *a.* [Gr. *κοῖλος*, hollow, + *πλατύς*, flat, + *-an.*] Concave-plane: noting that type of vertebra in which the anterior face is concave and the posterior face flat.

Cœloptychium agaricoides, Goldf.
Upper Cretaceous; Vordorf, near Braunschweig.
A, top view; *B*, profile. One half natural size. (From Zittel's "Palæontology.")

Cœloptychium (sē-lop-tik′i-um), *n.* [Gr. *κοῖλος*, hollow, + *πτύξ* (*πτυχ-*), a leaf.] A genus of hexactinellid sponges having a regular mushroom-shaped frond with stalk and radial convolutions, the ostia being on the under side of the umbel. It is the only representative of a family, *Cœloptychidæ*, and occurs in the rocks of the Upper Cretaceous.

cœlostat (sē′lō-stat), *n.* [Erroneously for **cælostat* or **celostat*, < L. *cælum* (formerly often erroneously *cœlum*), sky, + Gr. *στατός*: see *heliostat*.] A form of siderostat or heliostat which shows the image of the sky reflected in a plane mirror as stationary. It consists of a plane mirror attached to an axis which is directed toward the celestial pole and made to revolve uniformly by clockwork once in 48 hours. Any celestial object seen by reflection in this mirror will appear to be at rest, so that its image thrown upon a photographic plate will be stationary and without any rotation in its own plane. In this last fact lies the superiority of the cœlostat over the older heliostat and siderostat, which have mirrors revolving in 24 hours. They, on the other hand, have the advantage that the reflected ray may be thrown in any desired direction, while with the cœlostat the available range is limited by conditions determined by the declination of the object.

Lippmann Cœlostat.

cœlothel (sē′lō-thel), *n.* [Gr. *κοῖλος*, hollow, + *θηλή*, nipple.] In *embryol.*, the mesoblastic epithelium lining the true body-cavity or cœlom of the vertebrate embryo.

coemptional (kō-emp′shon-al), *a.* Relating or pertaining to coemption.

coendure (kō-en-dūr′), *v. i.* To endure together, or as long (as): as, "*co-enduring* with time." *Pusey*.

cœnenchymal gemmation. See ★*gemmation*.

cœnobe (sē′nōb), *n.* In *bot.*, same as *cœnobium*, 3.

cœnobiarch (sē-nō′bi-ärk), *n.* [LGr. *κοινοβιάρχης*, < *κοινόβιον*, convent (see *cœnobium*), + *ἄρχειν*, rule.] The director or head of a convent or monastery. *N. E. D.*

cœnobioid (sē-nō′bi-oid), *a.* [*cœnobium* + *-oid.*] Resembling a cœnobium.

cœnocentrum (sē-nō-sen′trum), *n.*; pl. *cœnocentra* (-trä). [Gr. *κοινός*, common, + *κέντρον*, center.] In *bot.*, a specialized mass of cytoplasm around which the eggs of certain fungi (*Saprolegniaceæ*) develop.

cœnocladia (sē-nō-klā′di-ă), *n.* [NL., < Gr. *κοινός*, common, + *κλάδος*, branch.] In *bot.*, the growing together of branches; natural grafting.

cœnocyte (sē′nō-sīt), *n.* [Gr. *κοινός*, common, + *κύτος*, a hollow (a cell).] Same as *syncytium*.

cœnodiœcism (sē″nō-dī-ē′sizm), *n.* [Gr. *κοινός*, common, + *diœcism*.] The production of male, female, and hermaphrodite flowers on different plants of the same species; tricœcism.

cœnœcic (sē-nē′sik), *a.* Same as *cœnœcial*.

cœnogenesis (sē-nō-jen′e-sis), *n.* [Gr. *κοινός*, common, + *γένεσις*, genesis.] Common genesis, generation, or origin.

cœnogenetic (sē″nō-jē-net′ik), *a.* Of or pertaining to cœnogensis.—**Cœnogenetic regeneration.** See ★*regeneration*.

Cœnogoniaceæ (sē″nō-gō-ni-ā′sē-ē), *n. pl.* [NL., < *Cœnogonium* + *-aceæ*.] A family of gymnocarpous lichens named from the genus *Cœnogonium*.

Cœnogonium (sē-nō-gō′ni-um), *n.* [NL. (Ehrenberg, 1820), < Gr. *κοινός*, common, + *γωνία*, angle.] A genus of lichens, typical of the family *Cœnogoniaceæ*, having the thallus byssoid or fungus-like forming a flat, circular, or kidney-shaped body. The spores are hyaline, elongate, or spindle-shaped, and one- or two-celled. The species are mostly tropical and occur on the branches or trunks of trees.

Cœnograptus (sē-nō-grap′tus), *n.* [Gr. *κοινός*, common, + *γραπτός*, written.] A genus of Lower Silurian graptolites characterized by having two branches originating from the triangular sicula, curving sigmoidally and giving off simple branches from the convex side.

cœnomonœcism (sē″nō-mō-nē′sizm), *n.* [Gr. *κοινός*, common, + E. *monœcism*.] The coexistence of male, female, and hermaphrodite flowers on the same individual plant.

cœnopsyche (sē-nop-sī′kē), *n.* [Gr. *κοινός*, common, + *ψυχή*, mind.] The consciousness of a community compared to a collection of intercommunicating cells each endowed with consciousness. *Haeckel*.

cœnosome (sē′nō-sōm), *n.* [Gr. *κοινός*, common, + *σῶμα*, body.] In *Siphonophora*, the stem or trunk of the colony; the elongated manubrium of the original larval medusoid, which produces by budding all the parts of the colony.

cœnosteon (sē-nos′tē-on), *n.*; pl. *cœnostea* (-ă). [Gr. *κοινός*, common, + *ὀστέον*, bone.] In *ichth.*, an anterior lower bone of the shoulder-girdle, bordering the gill-opening behind; the clavicle.

Cœnothecalia (sē″nō-thē-kā′li-ă), *n. pl.* [NL., < Gr. *κοινός*, common, + *θήκη*, case, + *-alia*.] An order of alcyonarian *Anthozoa*. They have a calcareous skeleton composed of lamellæ of calcite forming a dense corallum resembling that of the imperforate *Madreporaria* and developed from a specialized layer of ectoderm-cells. The colony consists of zoöids and solenia. There is but a single living genus, *Heliopora*; but the group was more largely represented in Paleozoic times.

coercionist (kō-ėr′shon-ist), *n.* A supporter of coercive measures or acts; specifically, in recent British history, an advocate of the Coercion Acts in Ireland.

coestate (kō-es-tāt′), *n.* [*co-*[1] + *estate*.] The estate held by either a tenant in common or a joint tenant.

coevality (kō-ē-val′i-ti), *n.* [*coeval* + *-ity*.] The quality of being coeval or of the same age or period of time.

coexcitation (kō-ek-sī-tā′shon), *n.* [*co-*[1] + *excitation*.] In *physiol.*, simultaneous or collateral excitation. *Amer. Jour. Psychol.*, XII. 264.

coexistence, *n.* **2.** In *logic*, that reciprocal relation which subsists between any two objects in that they exist in the same universe, generally regardless of time. In philosophy this ought to be the exclusive meaning, since *contemporaneity* perfectly expresses the temporal meaning, and the ambiguity leads to the gravest contradictions that pass without notice.

Coeymans limestone. See ★*limestone*.

cof, *v.* and *n.* A simplified spelling of cough.

coffearin (ko-fē′a-rin), *n.* [*coffee* + *-ar*[2] + *-in*[2].] A weak diacid base, $C_{14}H_{16}O_4N_2$, obtained from coffee. It crystallizes in needles, which melt with decomposition at 180° C.

coffee, *n.*—**Caracol coffee.** Same as ★*caracolillo*, 1.—**Coffee black.** See ★*black*.—**Date coffee,** roasted date-stones prepared for making a beverage.—**Mexican coffee,** the Negro or Mogdad coffee, *Cassia occidentalis*, a common weed in the southern United States. It is cultivated in Florida, as in Mexico, etc., as a substitute for coffee and in this capacity sometimes passes under the name of *Espinoza bean*.—**Sudan coffee.** Same as *Negro* or *Mogdad coffee* (which see, under *coffee*.)—**Wild coffee.** (*b*) The bearberry or cascara sagrada, *Rhamnus Purshiana*; also called *wild coffee-bush*, *western coffee*, and *coffee-berry*.

Coffee-bean weevil. See ★*weevil*.

coffee-berry, *n.* 2. A Tasmanian name for a native plant, *Coprosma hirtella*, which is related to the true coffee-plant. Its fruits are sweet and edible, but are not agreeable.

coffee-bird (kof'ē-bėrd), *n.* A name given in the British West Indies to one of the finches, *Loxigilla violacea*, that nests in coffee-bushes.

coffee-bush (kof'ē-bůsh), *n.* In New Zealand, a settlers' name for the karamu, *Coprosma lucida*. A drink is made of its berries. See *orangeleaf*.

coffee-cake (kof'ē-kāk), *n.* Bread sponge enriched, thinned, iced, and baked in a thin layer; a kind of a bun: often twisted and shaped in rings.

coffee-disease (kof'ē-di-zēz″), *n.* See ★*disease*. — **American coffee-disease.** See ★*disease*.

coffee-fern (kof'ē-fėrn), *n.* See ★*fern*.

coffeeism (kof'ē-izm), *n.* [*coffee* + *-ism*.] The coffee-drinking habit or its effects on the health. *G. S. Hall*, Adolescence, II. 14.

coffee-leaf (kof'ē-lēf″), *n.* The leaf of the coffee-plant.— **Coffee-leaf miner,** the larva of a tineid moth, *Cemiostoma coffeella*, which mines the leaves of the coffee-tree.

coffee-plant (kof'ē-plant), *n.* 1. A plant of the genus *Coffea*, which yields the coffee of commerce.—2. In New Zealand, same as ★*coffee-bush*.—3. In Tasmania, same as ★*coffee-berry*.

coffee-rat (kof'ē-rat), *n.* A small rat, *Golunda elliotti*, found in southern India and Ceylon, where it does much damage to coffee plantations, by eating buds and blossoms. It is about 10 inches in total length and olive-brown above, tawny below.

coffee-walk (kof'ē-wâk), *n.* The space between two rows of trees in a coffee plantation.

coffeic (kof'ē-ik), *a.* Same as *caffeic*.

coffer-dam, *n.* 3. In a war-ship, one of a series of compartments, in the vicinity of the water-line above the protective deck, built in the interior against the ship's side or around hatches, forming a double wall, which can be packed to prevent water from entering the vessel after the side has been pierced by shot. In the United States navy the packing is made of the pith of corn-stalks. See *def.* 2.

coffered (kof'ėrd), *p. a.* In *arch.*, built with coffers: said of a wooden ceiling or vault, the coffers in the former being the panels between the beams, and those of the latter being recesses built in the masonry.

coffering, *n.* 2. In *arch.*, decorations by means of coffers or sunken panels.— 3. A special method of making a watertight brickwork lining for a mine shaft, each course being laid in rings, without headers, and the bricks of alternate rings being floated in grout, breaking joints horizontally with the other rings.

coffin-bird (kof'in-bėrd), *n.* The *hoopoe*, *Upupa epops*, so named because in China it sometimes nests in holes in coffins, or in the carved work with which they are decorated. This is possible in China, where coffins are placed under mounds above-ground.

coffin-joint (kof'in-joint), *n.* The second interphalangeal joint within the hoof of the horse.

coffin-lid crystals. See ★*crystal*.

coffin-pin (kof'in-pin), *n.* An ornamental iron used in hearses to hold the coffin in place.

coffin-plate (kof'in-plāt), *n.* The metallic plate or shield on a coffin-lid inscribed with the name, age, etc., of the deceased.

coffin-ship (kof'in-ship), *n.* A ship likely to founder, and thus become the coffin of the crew: a term in common colloquial and newspaper use in the United Kingdom, during the agitation in Parliament begun by Samuel Plimsoll for legislation on the subject.

C. of G. H. An abbreviation of *Cape of Good Hope*.

cofraternal (kō-frā-tėr'nal), *a.* and *n.* [*co-*[1] + *fraternal*.] **I.** *a.* Concerning or pertaining to a cofraternity.

II. *n.* A member of a cofraternity. *Francis Galton*, Natural Inheritance, p. 94.

cofraternity (kō-frā-tėr'ni-ti), *n.* All the sons and transmuted daughters, considered collectively, of like statistical mid-parents.

As all the Adult Sons and Transmuted Daughters of the *same* Mid-Parents form what is called a Fraternity, so all the Adult Sons and Transmuted Daughters of a *group* of Mid-Parents who have the same Stature (reckoned to the nearest inch) will be termed a *Co-Fraternity*.
Francis Galton, Natural Inheritance, p. 94.

cog[2], *n.*— **To slip a cog,** to make a single unsuspected mistake in one's work or calculations.

cog[2], *v. t.* 4. In *metal.*, to roll, especially to roll ingots into blooms.

cog. An abbreviation of *cognate*.

cogener (kō'jē-nėr), *n.* Same as *congener*.

Among the *Centrarchidæ*, the large-mouthed black bass is second only to its *cogener*, the small-mouthed species, as a game-fish.
Jordan and Evermann, Amer. Food and Game Fishes, [p. 357.

cogged (kogd), *p. a.* Provided with cogs: as, a *cogged* wheel.— **Cogged-wheel breathing** or **rhythm.** Same as *cogged breath-sound* (which see, under *breath-sound*).

cogging[3] (kog'ing), *n.* 1. The fitting in and working of the wooden teeth or cogs of mortise-wheels.— 2. The process of rolling steel blooms from ingots.

cogging-engine (kog'ing-en″jin), *n.* Any engine used for driving an ingot-mill or cogging-mill.

cogging-mill (kog'ing-mil), *n.* A rolling-mill in which steel blooms are rolled from ingots; an ingot-mill.

coggle[4] (kog'l), *n.* [Appar. based on *cog*[1].] In *ceram.*, a decorating wheel of wood or iron, usually grooved, designed to be run around the edges of pie-plates, to form the notches or indentations.

cogitation, *n.* 3. In pre-Kantian philosophy, especially in Descartes, Spinoza, and the Wolfians, consciousness, especially thoughts. Usually rendered 'thought' or 'thinking'; but any mode of consciousness was meant, especially that of immediate perception of objects, whether internal or external. In modern philosophy the term is not used at all. It would be convenient to give it the meaning of consciousness of an object—that grade of consciousness which makes the distinction of subject and object, or ego and non-ego, but does not think of generals or of signs as such.

cognac, *n.*— **Oil of cognac,** the trade-name for diluted fusel-oil.

cognitional (kog-nish'ọn-al), *a.* [*cognition* + *-al*[1].] Of or pertaining to cognition: as, *cognitional* judgments.

So many of our judgments are recognitional instead of being *cognitional*, that judgments usually appear to be instantaneous. *J. W. Powell*, Truth and Error, p. 281.

cognition-time (kog-nish'ọn-tīm), *n.* In *psychophys.*: (*a*) The total time of the cognitive reaction. (*b*) This time minus the time of the simple reaction. The cognitive reaction is a form of the reaction experiment in which the reactor is told, for example, that he will see a color or hear a tone, and that he is to react only when he has cognized the color as red, blue, etc., or the tone as the tone of a certain pitch, of a certain instrument, etc.

cognitive, *a.* **II.** *n.* In *gram.*, a particular form of a root word, expressing recognition or knowledge.

Abenaki awanoch, the *cognitive* of Penobscot awenoch, means Frenchman, the first whites with whom the early Abenakis were brought in contact.
Amer. Anthropologist, Jan.–March, 1902, p. 31.

cognitor (kog'ni-tọr), *n.* In *Rom. law*, the attorney or advocate of a party to a private suit; one who took up the defense of a person present in court.

cogon (kō'gōn), *n.* [Philippine Sp. *cogon*, < Tagalog and Bisaya *cogon*, Bicol *cogon-cogon*.] A name in the Philippine Islands of *Imperata arundinacea*, a grass which takes possession of abandoned clearings and covers vast tracts of savanna land. It furnishes excellent material for thatching, but is fit for pasture only when young and tender. See ★*alang-alang*.

cogonal (kō-gō-näl'), *n.*; pl. *cogonales* (-nä'lāz). [Philippine Sp., < *cogon* + *-al*, implying plantation.] A cane-field; land overgrown with cogon.

coguarantor (kō-gar'an-tôr), *n.* [*co-*[1] + *guarantor*.] A joint guarantor.

cogway (kog'wā), *n.* A railroad-track with a cog-rail, used on grades too steep for smooth wheels.

cohen (kō'hen), *n.*; pl. *cohanim* (kō-hä'nēm). [Heb. *kōhēn*.] Among the Jews, a priest. Jews bearing this name or one of its numerous variants (such as *Cohn, Cahen, Cahn, Coen, Coon, Kuhn, Cowen, Cowan*, etc.) are assumed to be descendants from the high priest Aaron. In the synagogue service the congregation is divided into three classes, as follows: (1) *Cohanim*, or priests, descendants of Aaron; (2) *Leviim*, or Levites, descendants of the patriarch Levi; (3) *Israelim*, or Israelites. The last are, of course, the most numerous. Many of the first category (the *Cohanim*) have secular names, to which, when signed in Hebrew, they affix the letters C. Z., an abbreviation of *cohen zedek*, 'righteous priest.'

cohenite (kō'hen-īt), *n.* [Named after Professor E. *Cohen* of Greifswald, Germany.] A compound of carbon with iron, nickel, and cobalt, $(Fe,Ni,Co)_3C$, identified in some meteoric irons.

coherence, *n.* 3. In *math.* See ★*adherence*, 6.

coherer (kō-hēr'ėr), *n.* In *elect.*, a tube filled with a conducting substance in powdered or granular form, as metal filings, which, when struck by an electric wave, as that sent out from a wireless telegraph station, decreases in electrical resistance, probably by the particles making a better contact with each other, and so is used to discover very minute electric waves, as in wireless telegraphy. After the passing of the electric wave the resistance of the coherer usually remains low, but it rises again when the tube is tapped.

coheritage (kō-her'i-tāj), *n.* The estate of one of several heirs to the same estate.

Cohiba (kō-hī'bä), *n.* [NL. (Rafinesque, 1836), said by its author to be of Haitian origin.] A genus of dicotyledonous plants belonging to the family *Hydrophyllaceæ*. See *Wigandia*.

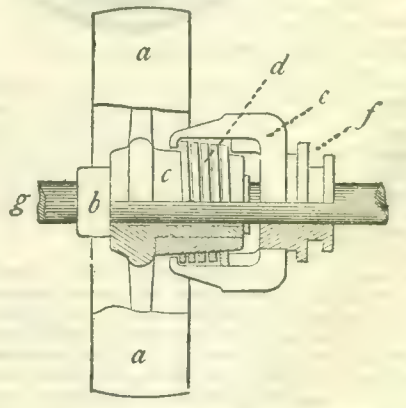
coho (kō'hō), *n.* [California Indian?] A salmon, *Oncorhynchus kisutch*, found from San Francisco northward and on the Asiatic coasts southward to Japan.

In the opinions of the canners . . . the *coho* should rank next after the king salmon in food value.
Bulletin U. S. Fish Com., XVIII. 6.

cohune (ko-hö'ne), *n.* [Native name in Honduras.] A pinnately leaved palm, *Attalea Cohune*, native of Central America. The fruit yields oil and is used in the same manner as the ivory-nut for turning small articles. See *Attalea* and *corozo*, 1.

coiffeur (kwo-fėr'), *n.* [F.] A hair-dresser.

coign, *n.* 2. In *geol.*, an original angular elevation of land around which as a corner-stone continental growth has taken place.



South of the Scandinavian *coign*.
Geog. Jour. (R. G. S.), XIII. 245.

coil[1], *v. t.*— **Coiled basketry.** See ★*basketry*.

coil[1], *n.* 4. A cylindrical hoop or tube formed by coiling a wrought-iron bar and then welding to form a solid piece: formerly used in building up Armstrong guns.— **Leiter's coil,** a coil of metal or rubber tubing through which a stream of hot or cold water may be made to pass: employed as a means of making thermal applications to the surface of the body.— **Reactive coil.** See ★*reactive*.— **Series coil,** in *elect.*, a coil placed in series with the other parts of the main circuit of any electrical machine or device, as a dynamo, motor, or arc-lamp, and traversed by the entire current flowing in that circuit.— **Shunt coil,** in *elect.*, a coil placed in parallel with a portion of the main circuit of any electrical machine or device, as an arc-lamp, dynamo, or motor, and traversed by a portion of the current flowing in the main circuit. The relative amount of current received by a shunt-coil is determined by the inverse ratio of its resistance to the resistance of the conductor with which it is in shunt.— **Tesla coil,** a form of induction-coil without an iron core and designed for the production of the form of high-frequency discharge known as the *Tesla* ★*discharge* (which see).

coil-boiler (koil'boi-lėr), *n.* A boiler made of one or more coiled tubes.

coil-clutch (koil'kluch), *n.* A form of friction-clutch in which a coil of steel rod or a wire rope is fastened to one element, and a cone upon the other is pressed into the inside of the coil. The multiple turns of the rod or coil make it seize upon the surface of the cone and hold with great power

Coil-clutch.

a, pulley loose on the sleeve or quill, *b*; *c*, split hub of pulley *a*; *d*, coil; *e*, jaw by which the coil is forced on or drawn off the taper hub *c*; *f*, groove for the fork of the lever (not shown) by which *e* is moved lengthwise on the hub; *g*, shaft to drive *a* or be driven by it.

coil-end (koil'end), *n.* Same as ★*coil-stand*.

coiler (koi'lėr), *n.* An apparatus, connected with a cotton-carding machine, for receiving the sliver and disposing of it in the form of coils, so that it may not become entangled.

coiler-can (koi'lėr-kan), *n.* The can of the coiler apparatus that receives the sliver from a cotton-carding machine. *Nasmith*, Cotton Spinning, p. 127.

coiler-head (koi'lėr-hed), *n.* The top part of the coiler apparatus of a cotton-carding machine, through which the sliver passes into the can. *Nasmith*, Cotton Spinning, p. 174.

coiler-motion (koi'lėr-mō″shọn), *n.* A mechanism, attached to a carding-machine, for receiving the sliver and laying it into coils.

coiler-plate (koi'lėr-plāt), *n.* The upper revolving part of the coiler, which receives the sliver from the cotton-carding machine and delivers it into the can. *Nasmith*, Cotton Spinning, p. 126.

coiler-roller (koi'lėr-rō″lėr), *n.* One of a pair of calender-rollers between which the sliver passes into the coiler-can from the cotton-carding or -combing machine. *Thornley*, Cotton-combing Machines, p. 235.

coil-flux (koil'fluks), *n.* In *elect.*, that part of the magnetic flux of a coil which is due to its own magnetism, and not to the presence of a magnetizable core or of anything capable of increasing the permeability of the magnetic circuit.

coil-gland (koil'gland), *n.* Same as *sweat-gland*. *Buck*, Med. Handbook, I. 79.

coiling-machine (koi'ling-ma-shēn″), *n.* In *wood-working*, a machine for bending and forming barrel-hoops by coiling the steamed straight hoops over a drum and holding them in the right form until they are stiff and rigid.

coil-stand (koil'stand), *n.* An upright casting or support for a coil of steam-pipes. Sometimes called a *coil-end*.

coin[1], *n.*—**Alliance coins**, in *Gr. numis.*, coins struck by two or more Greek cities in agreement for mercantile convenience, or for political reasons.—**Bætyl coin.** See ★*bætyl*.—**Family coins**, Roman silver denarii, struck under consuls.—**Postal and coin scales.** See ★*scale*[2].—**Subsidiary coin**, small coin used for change the legal-tender value of which is limited by statute. See *legal-tender currency*, under *tender*[2].

Coinage ratio, the ratio which expresses the equivalence in value between gold and silver under the (then existing) mint law. Thus, in the United States, under the law of 1837, it is 15.988 to 1: that is, one pound of gold can be coined into as many dollars as 15.988 pounds of silver. The coinage ratio is intended (except for subsidiary coins), where bimetallism is desired, to be identical with the average commercial ratio; if this is not the case the metal which is undervalued disappears from circulation as money. Thus under the law of 1792 the coinage ratio was fixed at 15 to 1, but this undervalued gold and it disappeared from circulation; in 1834 the ratio was changed to 16.002 to 1, and in 1837 to 15.988 to 1, but this undervalued silver and it practically disappeared from circulation (except in the form of subsidiary and abraded coins) until 1873, when it was demonetized. Since that date the fall in the value of silver has brought the commercial ratio down to about 34 to 1.

coin-catcher (koin'kach″ėr), *n.* A probang with a special device at the end, designed to hook under a coin or other similar object lodged in the esophagus, and so draw it out.

co-inherence (kō-in-hēr'ens), *n.* The state or quality of inhering together.

co-initial (kō-i-nish'al), *a.* [*co-*[1] + *initial*.] Originating together.

co-insurance (kō-in-shör'ans), *n.* See *insurance*.

Coir powder, the powder which separates in the manufacture of prepared cocoanut-fiber (for matting, etc.) from the husk of the cocoanut.

coke[1], *n.*—**Graphitized coke**, coke which has been converted into artificial graphite by the high temperature of an electric furnace in the presence of silicon in small quantity.—**Native coke**, an impure variety of carbon formed in nature by the destructive distillation of bituminous coal by contact with igneous rock. Called also *carbonite*.

coke-bed (kōk'bed), *n.* 1. A layer of coke which is put into a cupola before charging any of the iron. The amount of coke in this layer is proportionate to the amount of iron to be melted.—2. A porous stratum of coke and clinker in pieces of various sizes, laid to a depth of several inches below a mold for casting a piece of work having large surfaces and which is bedded in. Provision is thus made for carrying off the gas generated in the mold, there being vent-pipes to allow the gas to escape from the porous stratum.

coke-breeze (kōk'brēz), *n.* Coke from gas-works in pieces small enough to pass through a one-inch ring. In handling coke a proportion of breeze is formed by the breaking of the larger pieces. This breeze is screened from the remainder of the coke as it is a detriment to the use of the coke in fires of furnaces.

coke-dust (kōk'dust), *n.* Powdered coke: used for blacking foundry molds.

coke-furnace (kōk'fėr″nās), *n.* A furnace or heating-apparatus adapted to use coke as a fuel. Coke burns with a short flame and no smoke, and gives an intense local heat.

coke-gas (kōk'gas), *n.* The hot gas from a coke fire.

coke-kiln (kōk'kil), *n.* A kiln which is heated by the burning of coke.

coke-mill (kōk'mil), *n.* A mill for grinding coal or coke into a powder for use in blacking foundry molds. It is usually a closed revolving cylinder inside of which are heavy balls or rollers which crush the material. Also called *blacking-mill* and *coal-mill*.

coke-oven, *n.*—**Aitken's coke-oven**, a modification of the ordinary beehive coke-oven, intended to effect the recovery of tar and ammonia in making coke from bituminous coal.—**Appolt coke-oven**, one of the modern forms of oven for the manufacture of coke from bituminous coal, in which air is excluded from the interior of the coking-chamber.—**Breckon and Dixon's coke-oven**, an improved coke-oven with flues for conveying the gases during combustion beneath the floor of the oven. This improvement, introduced about 1860, is embodied in a few of the modern coke-ovens.—**Coke-oven tar.** See ★*tar*[1].—**Jameson coke-oven**, a modification of the common beehive oven, which provides for saving the tar and ammonia liquor by drawing off the vapors formed in the coking through pipes connected with a system of channels, covered with perforated tiles, in the bottom of the oven.—**Otto-Coppée coke-oven**, an oven or kiln for coking coal, with provision for the recovery of tar and ammoniacal liquor.—**Simon-Carvés coke-oven**, an oven or kiln for the manufacture of coke, specially contrived to save the volatile products given off, as well as the tar and the ammoniacal liquor. The fuel used consists almost entirely of the uncondensed combustible gases given off from the coal carbonized, and these gases are passed through separate flues surrounding the closed space for this coal, to which space no air is admitted.

coke-plate (kōk'plāt), *n.* 1. Tin-plate, the sheet-iron base for which is made of iron refined with coke as a fuel, as distinguished from charcoal-plate.—2. Iron plate made from puddled iron, which is inferior to charcoal-plate.

coke-scrubber (kōk'skrub″ėr), *n.* An apparatus filled with coke moistened with oil, used to purify street gas, which is forced through it. *W. L. Dibdin*, Public Lighting, p. 132.

coking-plate (kō'king-plāt), *n.* The dead-plate; a plate at the door of a furnace which uses bituminous coal, on which the fresh coal is placed and allowed to coke before being spread on the fire.

coking-stoker (kō'king-stō″kėr), *n.* A mechanical stoker or device for firing a furnace, which permits the fuel to coke before feeding it to the grate, thus burning the fuel with little or no smoke.

coky (kō'ki), *a.* [*coke* + *-y*[1].] Like coke; porous in structure from partial fusion and escape of volatile matter: said of the residue from charring certain kinds of bituminous coal. *Sadtler*, Handbook of Indust. Chem., p. 359.

col, *n.* 2. A name given by Abercromby in 1887 to the region on a weather-map between two anticyclones, where the isobars show a connecting neck or narrow region of lower pressure analogous to the col that affords a passage from one mountain peak to its neighbor: not to be confounded with a trough or an area of low pressure.

cola[2] (kō'lä), *n.* [Also *kola*; W. Afr., given also in other forms, as *kolla*, *korra*, *gorra*, *goora*.] 1. A tree of the family *Sterculiaceæ*, *Bichea acuminata* (*Cola acuminata* of Schott and Endlicher), which yields the cola-nut. See *cola-nut*.—2. [NL.] Any tree of the genus *Bichea*, which includes about 40 species of tropical African sterculiaceous trees having entire or lobed leaves and axillary clusters of unisexual or polygamous flowers.

colaborer, colabourer (kō-lā'bọr-ėr), *n.* A fellow-laborer; a colleague.

colacobiosis (kol″a-kō-bī-ō'sis), *n.* [NL., < Gr. *κόλαξ* (*κολακ-*), flatterer, + *βίωσις*, living.] A form of social symbiosis, or symbiosis between two colonies of ants of different species, one of which is parasitic on the other species; permanent social parasitism. *Wheeler*, 1901.

colacobiotic (kol″a-kō-bī-ot'ik), *a.* Of or pertaining to colacobiosis.

colalgia (kō-lal'ji-ä), *n.* [NL., < Gr. *κόλον*, colon, + *ἄλγος*, pain.] Pain in the colon.

colander, *n.* 2. A perforated hemispherical vessel used in casting shot. *Ure*.

colanine (kō'la-nin), *n.* [Also *kolanine*; < *cola*[2] + *-ine*[2].] A substance obtained from the cola-nut. It is probably a mixture of caffein tannate and a little theobromine tannate, and is used as a sedative in cases of seasickness.

cola-red (kō'la-red), *n.* The red coloring-matter of cola-nut, formed by the oxidation of cola-tannic acid.

colchic (kol'chik), *a.* [*colchic(um)*.] Derived from colchicum.—**Colchic acid**, an amorphous acid, $C_{16}H_{15}O_5N_7$, obtained from colchiceine by heating it with concentrated hydrochloric acid, which removes two methyl groups.

colchiceine (kol-chis'ē-in), *n.* [*colchic(um)* + *-e-* + *-ine*[2].] A colorless, crystalline, slightly bitter alkaloid, $C_{21}H_{23}NO_6 + \frac{1}{2}H_2O$, contained in meadow-saffron (*Colchicum autumnale*).

colchyte, cholchyte (kol'kīt), *n.* [Prop. *cholchyte*; = F. *colchyte*, < Gr. *χολχύτης*, a word found in pl. in papyri, with a fem. *χολχυτίδες*, pl., and explained as Egyptian, but prob. an error for **χοαχύτης*, < Gr. *χοή*, a pouring out, a drink-offering, libation, + *χύτης*, a pourer, < *χεῖν*, pour. See Van Herwerden, Lex. græcum supplet. et dial., 1902, p. 903.] A funeral director in ancient Egypt; one who provided liturgical services. *Wilkinson*.

colcol (kol'kol), *n.* [California Indian.] The shells of *Olivella*, which are strung and used as money by certain California Indians.

cold. I. *a.*—**Cold plague.** (*a*) A form of pernicious malarial fever in which death occurs during the cold stage. (*b*) Epidemic cerebrospinal meningitis in horses.—**Cold pole.** See ★*pole*[2].—**Cold rays.** See ★*ray*[1].—**Cold-rigor point**, the degree of cold (0° C.) at which a cell loses its irritability.—**Cold-stage**, the chill in malarial fever.—**Cold test.** (*a*) The determination of the temperature at which a gradually cooled sample of oil, especially lubricating oil, solidifies either wholly or partly. (*b*) The testing of the ductility of iron and steel bars and plates by bending, while cold, to a certain angle, 90°, both with and across the grain, to determine whether this can be done without fracture.—**Cold wall.** See ★*wall*[1].

II. *n.*—**Pole of cold.** See ★*pole*[2].—**Strangers' cold**, a catarrh which attacks the inhabitants of certain remote islands whenever they are visited by ships.

cold-blast (kōld'blast), *n.* and *a.* I. *n.* 1. A blast of air that has not been heated.—2. A blast that has been cooled by artificial means.

II. *a.* Using an unheated blast or one that has been cooled.

colder (kōl'dėr), *n.* [Also *calder*, *caulder*, *cholder*, *chaulder*; origin unknown.] 1. The husk or refuse of threshed wheat.—2. Rubbish from old buildings. [Prov. Eng. in both uses.]

cold-expressed (kōld'eks-prest″), *a.* Same as *cold-drawn*.

cold-frame (kōld'frām), *n.* A small glass-covered structure, and the bed of earth which it covers, used for starting plants in the spring, or to receive plants transplanted from hotbeds or greenhouses, or to carry semi-hardy plants over winter. It differs from a hotbed in that there is no heat in the soil except that which accumulates from the sun's rays.

cold-riveting (kōld'riv″et-ing), *n.* The process of heading-over rivets without first heating them. This is done only with rivets not over three eighths of an inch in diameter.

cold-rolled (kōld'rōld), *a.* Rolled while cold, instead of at a red heat; specifically, noting a metal which has become brittle from excessive rolling or hammering.

cold-rolling (kōld'rōl″ing), *n.* The process of rolling iron and steel plates or rods while they are cold. A smooth, finished surface is attained, resistant to abrasion, and needing no subsequent machining.

cold-saw (kōld'sâ), *n.* A saw for cutting cold metals; especially, a power sawing-machine used in cutting iron beams, rods, rails, etc. Such machines employ heavy circular saws driven at high speeds, the metals to be cut being clamped to a table and fed to the saw. In some machines the saw is fed to the metal. Steel disks driven at very high speeds are also used in place of saws, and are called *friction-disks*. In some smaller machines band-saws are used. There is also a metal-sawing machine which employs a reciprocating saw resembling a hack-saw. The large machines are also called *cold-saw cutting-off machines*. See *milling* ★*saw*.

cold-sawing (kōld'sâ″ing), *n.* The process of sawing cold metal with a circular saw or cold-saw.

cold-shortness (kōld'shôrt″nes), *n.* Brittleness when cold: a condition of wrought iron, steel, or other metal, in which the metal, on account of its brittleness, cannot be worked when cold without fracture or cracking at the edges. Compare *red-shortness*.

cold-shoulder (kōld'shōl″dėr), *v. t.* To 'give the cold shoulder' to; treat with studied coldness, indifference, or neglect.

cold-soldering (kōld'sod″ėr-ing), *n.* A process of amalgamating metallic substances by the aid of mercury. A hard amalgam, made of 5 or 6 parts of pure silver, 3 or 4 parts of tin, and from 3 to 5 per cent. of bismuth, is melted and cast into ingots, which are then reduced to fine filings. The filings are mixed, as required, with enough mercury to form a stiff paste which hardens in about an hour.

cold-spot (kōld'spot), *n.* In *physiol.*, a spot upon the skin which is sensitive to cold, but

insensitive to pressure, pain, or warmth: also termed a *cold-point*.

The warm-spots are more difficult of identification than the *cold-spots*. *E. B. Titchener*, Exper. Psychol., I. ii. 82.

cold-ulcer (kōld'ul″sėr), *n.* An ulcer on a finger or toe, resembling a chilblain, but due to interference with the local blood-circulation.

colein (kō'lē-in), *n.* [*Cole(us)* + *-in*².] A purple-red resinous compound, $C_{10}H_{10}O_5$, obtained from the leaves of *Coleus Blumei*.

coleopod (kō'lē-ō-pod), *n.* [NL. *coleopodium*, < Gr. κολεός, sheath, + ποίς (ποδ-), foot.] In certain myriapods, one of the accessory structures which form a sheath for the phallopods or essential parts of the external reproductive apparatus.

coleopodium (kō″lē-ō-pō'di-um), *n.*; pl. *coleopodia* (-ä). [NL.: see ★*coleopod*.] The peculiar protoplasmic process extruded by certain diatoms and believed by some to be the means of locomotion in these plants.

coleopterin (kol-ē-op'tē-rin), *n.* [*coleopter* + *-in*².] A red pigment found in the wing-covers of beetles.

coleopterology (kol-ē-op-tē-rol'ō-ji), *n.* [*Coleoptera* + Gr. *-λογία*: see *-ology*.] The science of *Coleoptera:* a branch of entomology.

Coleosporium (kō″lē-ō-spō'ri-um), *n.* [NL. (Léveillé, 1847), < Gr. κολεός, a sheath, + σπορά, seed (spore).] A genus of uredineous fungi having the æcidia usually produced on the leaves of conifers, and the uredospores and teleutospores on other hosts. The teleutospores form soft, reddish, waxy sori and germinate while attached to the host. *C. Senecionis* produces its teleutospores on species of *Senecio*, and its æcidia on *Pinus sylvestris*.

Coleroa (kol-ē-rō'ä), *n.* [NL. (Rabenhorst, 1851).] A genus of parasitic pyrenomycetous fungi having membranous or thin, leathery perithecia furnished with radiating bristles. The spores are ovoid, two-celled, hyaline, and greenish or brownish yellow. *C. Chætomium* attacks the leaves of species of *Rubus* in Europe.

colic, *n.*—**Copper-colic,** a colic, analogous to lead-colic, arising from chronic copper-poisoning.—**Crapulent colic,** a colic resulting from overeating.—**Menstrual colic,** pain in the abdomen due to obstruction to the free flow of the menstrual blood.—**Pancreatic colic,** pain in the abdomen due to obstruction in the excretory duct of the pancreas.—**Saburral colic,** pain attending intestinal indigestion.—**Uterine colic,** a colicky pain supposed to be due to slight muscular contractions of the non-gravid uterus.

colica, *n.* 2. Colic.—**Colica metallica, colica sicca.** Same as *lead-colic*.

colic-weed (kol'ik-wēd), *n.* The squirrel-corn, *Bikukulla Canadensis;* also, less frequently, the dutchman's-breeches, *B. Cucullaria*, and species of *Capnoides*.

colicwort (kol'ik-wėrt), *n.* 1. The colic-root, *Aletris farinosa*.—2. The parsley-piert, *Alchemilla arvensis*.

colitis, *n.*—**Amœbic colitis.** See ★*amœbic*.

coll. An abbreviation (*a*) of *college;* (*b*) of *collegiate*.

collæmia (ko-lē'mi-ä), *n.* [NL., < Gr. κόλλα, glue, + αἷμα, blood.] The presence of uric acid in colloidal form in the blood.

collage (ko-läzh'), *n.* [F., < *coller*, glue, clarify with gelatin, < *colle*, < Gr. κόλλα, glue.] The process of clearing wine by means of isinglass or gelatin.

colla parte (kōl'lä pär'te). [It., 'with the part.'] In *music*, a direction for the accompaniment to follow the tempo of a soloist or leading singer or player. In vocal music also expressed by *colla voce*.

collaps, *v.* and *n.* A simplified spelling of *collapse*.

collar, *n.*, 2. (*g*) (4). A deposit of shell matter about the siphonal funnels in some of the cephalopod mollusks. (*h*) In *plumbing*, a cone or ring on a pipe to check the flow of melted solder.—**Collar- and cuff-shaper,** a combined turning- and shaping-machine, made in several forms, all essentially bending-rolls adapted to starched fabrics; a collar-turner and -shaper.—**Compensating collar,** an annular ring or collar placed on the spindle of a drilling-machine, between the feed-screw and the grooved spindle, to form proper bearing-surfaces, and by the adjustment of which the wear of the collars and spindles can be taken up.—**False collar,** in a harness, a broad piece of soft leather cut to fit the horse's neck. It is worn under a round collar to equalize the pressure upon the neck.

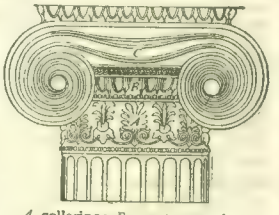
collar, *v. t.* 5. In *cricket*, to become complete master of (the bowling): said of the batsman. [Slang.]—6. To lay hold of; 'nab'; take possession of; in *foot-ball*, to tackle. [Slang.]

A gentleman has a glass of punch before him . . ., when another gentleman comes and *collars* that glass of punch, without a "with your leave." *Dickens*, Nich. Nickleby, xv.

collar-bearing (kol'är-bär″ing), *n.* A bearing for taking the end thrust on a shaft, made by forming or fastening a collar on the shaft and using one face of the collar as the bearing-surface.

collar-bound (kol'är-bound), *a.* In *mach.*, cramped between collars; so caught by collars as to make rotation difficult or impossible. Engine-shafts are sometimes collar-bound by the heating of bearings that run between collars.

collaret, *n.* 3. In *zoöl.*: (*a*) In certain goniatite cephalopods of Devonian age, one of a series of swellings in the shell which apparently represent successive positions of the stoma or shell-aperture. (*b*) The circle of tentacles in sea-anemones.



collar-gage (kol'är-gāj), *n.* A hollow cylinder for testing the size of a cylindrical piece.

collar-gall (kol'är-gâl), *n.* An indolent raw sore appearing on the shoulders of horses as a result of the irritation caused by an improperly fitting collar.

collargol (ko-lär'gol), *n.* [Gr. κόλλα, glue, + ἄργ(υρος), silver, + *-ol*.] A trade-name for a non-irritant combination of silver with proteid material (colloidal silver), intended for surgical use. *Nature*, March 26, 1903, p. 503.

collar-heart (kol'är-härt), *n.* *Naut.*, a heart-block which has one large hole in the center and a groove around the circumference, and is open at the end opposite the lanyard.

collarino, *n.* 2. The cylindrical part of any decorative capital. Thus the more elaborate Ionic style, as in the Erechtheum at Athens, has a broad band decorated with anthemions below the coussinet and between the volutes, and this is sometimes called *collarino*.

A, collarino; *B*, quarter-round or echinus; *C*, coussinet.

collar-nut (kol'är-nut), *n.* A nut having a cylindrical collar at one end. The collar is designed to provide a suitable bearing-surface and also to prevent a bur which has been formed on the corners of the nut from cutting into the end of the piece which bears against the nut.

collar-pad (kol'är-pad), *n.* A piece of sole-leather or metal shaped to fit a horse's neck under the top end of the collar.

collar-palm (kol'är-päm), *n.* A tool used by horse-collar makers for shaping the collar. It is of iron bent in the shape of a double elbow.

collar-pore (kol'är-pōr), *n.* A ciliated tube, or pore, connecting the cavity of the collar of *Balanoglossus* with the first gill-slit. *Parker and Haswell*, Zoölogy, II. 2.

Collateral power, in *law*, a power in which the donee has no estate in the land subject to the power.

collaterate (kọ-lat'ẹ-rāt), *v. t.*; pret. and pp. *collaterated*, ppr. *collaterating*. [*collater(al)* + *-ate*².] To use or pledge as collateral security. [Recent.]

collation, *n.* 12. (*a*) In *bibliog.*, detailed comparison of a book with a perfect copy, usually by specifying, by signature-marks or other indications, the number of leaves (blank as well as printed) and detachable plates or maps, present or absent, in the copy examined, as compared with a perfect copy. The process is usual in the case of all valuable books, especially old ones, it being a highly probable assumption that any book in hand is imperfect. (*b*) In *bookbinding*, the examination of the folded sections (signatures) of a book for the purpose of discovering omissions or misplacements of sections.

collationary (kọ-lā'shon-ạ-ri), *a.* and *n.* **I.** *a.* Of or pertaining to collation (in some sense).—**Collationary Fathers,** apparently, a religious society, so called; but perhaps a feigned name under which Erasmus veiled an allusion to the proselyting orders or priests of the Roman church.

They were placed in a house of *Collationary Fathers*. Except from this account of Erasmus, I never heard of these people, nor can learn any more about them. Erasmus says that they were a community who had nests all over Christendom, and made their living by netting proselytes for the regular orders. Their business was to catch in some way superior lads, threaten them, frighten them, beat them, crush their spirits, tame them, as the process was called, and break them in for the cloister.

Froude, Erasmus, p. 7.

II. *n.* A collationary father. See above.

The Franciscans and Dominicans admitted that without the *Collationaries'* help their orders would die out.

Froude, Erasmus, p. 7.

colla voce (kōl'lä vō'che). [It., 'with the voice.'] In *music*, a direction for a singer to follow the tempo of the leading singer. See ★*colla parte*.

collect, *v. t.* 4. In *horsemanship*, to gain control (of a horse) and bring it into a position where it has proper command of its powers.

By a judicious use of the curb rein, you collect a tired horse. . . . You draw his hind-legs under him, throw him upon his haunches, and render him less liable to fall even on his weary or weak fore-legs.

Art of Training Horses, viii. *N. E. D.*

Collecting-hairs. See ★*hair*¹.

collection, *n.* 8. In *logic*, many independent or discrete objects regarded as a single object composed of these objects. In this sense 'many' is to be taken as including the case of a single object regarded as being composed of itself alone. The modern logicomathematical science of multitude (often called the *theory of cardinal numbers*) relates to the magnitudes of collections.

9. A plural object: an individual object whose existence consists in the existence of whatever individuals may have been mentally connected and regarded as parts of it. Different logicians and mathematicians have different objects in mind in speaking of a 'collection,' without always recognizing that they are at cross-purposes. Most logicians are in the habit of thinking of objects as they would be if they were real, so that each is assumed to be in itself definitely distinguished from every other. With them, the identity of a collection lies in the identity of its individual members; so that whatever metamorphoses the different individuals might undergo, as long as their identities were conserved, that of the collection would remain. But if an individual member is destroyed or a new one created, a different collection is produced, though the definition of the *class* (which is a collection recognized as consisting of whatever existent objects possess a certain common character) may be unchanged. Most writers on pure mathematics, on the other hand, are in the habit of studying objects that are purely hypothetical, without any consideration of whether any such objects exist. These objects, being mere creatures of thought, possess only such individuality as is determinately predicated of them. They are what the logicians term 'indesignate individuals,' a name which fails to recognize the extrinsic, superimposed character of their individuality. A mathematician, for example, will think of a collection consisting of a dot, of a dot expressly supposed to be other than the former, and of a dot expressly supposed to be neither of the others. These dots, being mere creatures of thought, are entirely alike as long as they are not thought as unlike. But being expressly supposed to be each other than either of two, so they necessarily are in their hypothetical being. Thus the mathematician's collection, being a mere creature of thought, changes its identity as soon as it is altered at all, unless it be expressly supposed to remain the same collection. The logician's collection is also created by thought, but it is thought to exist in the real existence of its individual members. Thus the logician's collection has a derived existence distinct from its essence, which latter lies in the intention of the act of thought which severs the universe into two portions, the one to form the inside and the other the outside of the collection. Accordingly, a logician's collection may contain but a single member with which the collection is identical in existence, although its essence refers also to everything excluded. So, too, if to the question, 'What is in this box?' the answer be, 'Nothing,' this word, as a reply to that question, signifies the essence of a collection, namely of the one sole logical collection which has no existence.

Collective bargaining, in *polit. econ.*, the determination of wages and conditions of employment by agreements between an employer or a group of employers on the one hand, and a body of employees, acting in concert, on the other. In its simplest form it may be merely the determination of wages, etc., by agreement between a single employer and an informal union of his employees. More often it is extended to practically all the shops of one industry in a city or district, and sometimes in an entire country, as in the cotton-spinning industry in England and the glass-blowing industry in the United States.—**Collective suggestion, telesis.** See ★*suggestion*, ★*telesis*.

collectivistic (kọ-lek-ti-vis'tik), *a.* Pertaining or related to or accordant with collectivism.

In order to promote the realization of the ideal *collectivistic* state, Marxists are ready . . . to become the servants and supporters of capital.

Athenæum, July 7, 1894, p. 24.

collector, *n.* 8. [*pl.*] Same as *collecting-★hairs*.—9. In the manufacture of artificial silk, a device for collecting and coalescing several collodion filaments from the spinning-apparatus, and then winding them upon bobbins.

college, *n.*—**Agricultural college.** See ★*agricultural*.—**College settlement.** See ★*settlement*.—**College widow,** a woman residing in a college town who is assumed to have received the attentions of students of several successive classes, but remains unmarried. [Slang.]—**Land-grant college,** one of those colleges of the United States, which, under the Land Grant Act of 1862, and the supplementary law of 1890, received grants of land and money for the education of young farmers.

Collemaceæ (kol-ē-mā'sē-ē), *n. pl.* [NL., < *Collema* + *-aceæ*.] The now preferred form for the name of the lichen family *Collemei* (which see).

collembolan (ko-lem'bō-lan), *a.* and *n.* **I.** *a.* Pertaining to or having the characters of the *Collembola*.

II. *n.* One of the *Collembola*.

collenchyma, *n.*—**Bast-collenchyma.** See ★*bast*¹.

Colleri (kol'ẹ-ri), *n.*; pl. *Colleries* (-riz). One of a race occupying the country south of Trichinopoli, formerly so predatory that the word came to be the equivalent of 'thief' in that region.

Colletotrichum (kol-ē-tot'ri-kum), *n.* [NL. (Corda, 1837), so called from the glutinous character of the hairs; < Gr. *κολλητός*, glued, + *θρίξ* (*τριχ-*), hair.] A genus of melanconiaceous fungi having the fructifications (sporodochia) dark-colored and breaking through the surface of the host. Dark-colored setæ are produced among the sporophores. The spores are simple and hyaline or light-colored in mass. A number of the species produce serious diseases of cultivated plants. *C. Gossypii* attacks the cotton-plant. See ★*anthracnose of cotton.*

colliculate (ko-lik'ū-lāt), *a.* [NL. **colliculatus*, < L. *colliculus*, a little hill: see *colliculus*.] Having small eminences.

collidone (kol'i-dōn), *n.* [*collid(in)* + *-one.*] A basic substance related to collidine.

collier[1], *n.*—**Collier's stomach,** motor weakness of the stomach due to anemia.

Collier plant-louse. See ★*plant-louse.*

colligation, *n.* **3.** In *psychol.*, a form of mental connection or association in which the constituent elements, after combination, are as distinct as (or even more distinct than) they were or would be in isolation.

Simultaneous color contrast may serve as a typical instance of *colligation.*
O. Külpe (trans.), Outlines of Psychol., p. 21.

colligative (kŏ-lig'ā-tiv), *a.* Pertaining to or effecting colligation.—**Colligative properties,** in *phys. chem.*, properties which depend only on numbers of molecules: contrasted with *additive* and with *constitutive properties.*

But of the purposes served by the *colligative properties*, that of giving molecular measurements without recourse to the evidence afforded by chemical change is well known to be of the very widest application.
Rep. Brit. Ass'n Advancement of Sci., 1902, p. 14.

collimate, *v. t.* **2.** To render the line passing through the optical center of the object-glass of a telescope and the middle wire of its reticule strictly perpendicular (or sometimes parallel) to the axis on which the telescope turns: usually by the aid of a collimator, or of star-observations in reversed positions of the instrument.

Collimation axis. Same as *line of collimation.*

collimator, *n.*—**Floating collimator,** a small telescope attached to an iron float which swims in mercury. The collimator may be horizontal or vertical: in the latter case the float is a ring, the mercury cistern annular, and the collimating telescope points downward through the center of the ring.

collinal (kol'i-nal), *a.* [*colline* + *-al*[1].] Relating or pertaining to a colline.

Verrill refers to cases of apparent exothecal budding on the *collinal* ridges of Meandra.
Annals and Mag. Nat. Hist., Nov., 1902, p. 391.

colline, *n.* **2.** In *zoöl.*, one of the ridges of a meandriform coral.

collinear. **I.** *a.*—**Collinear relationship,** a geometrical relationship between two portions of space such that each point, line, and plane in the one has one and but one corresponding point, line, or plane in the other. The object-space of a lens and the image-space corresponding to it are thus collinearly related; every point in the latter being the image and only image of some point in the former.

II. *n.* A trade-name of a variety of ★anastigmat (which see).

collinearity (ko-lin-ē-ar'i-ti), *n.* [*collinear* + *-ity.*] The quality or fact of being collinear, that is, costraight.

collinearly (ko-lin'ē-ār-li), *adv.* In a collinear or costraight manner.

collingual, *a.* **II.** *n.* A person who speaks the same language as another.

In brief, the tribal relations of the Seri seem always to have been antipathetic, especially toward the aboriginal tribes of alien blood, in somewhat less measure toward Caucasians, and in least—yet still considerable—degree toward their own *collinguals* and (presumptive) consanguineals. *17th An. Rep. Bur. Amer. Ethnol.*, ii. 135.

Collinson's flower. The horse-balm, *Collinsonia Canadensis.*

colliquescence (kol-i-kwes'ens), *n.* [NL. **colliquescentia*, < L. *colliquescere*, become fluid, < *com-*, together, + *liquescere*, become fluid: see *liquescent.*] Same as *liquescence.*

Collision and damage, the technical name of a suit in admiralty brought to recover damages by reason of a collision between vessels upon navigable waters.

collocation, *n.*—**Collocations of matter,** those features of the physical universe which a complete dynamic explanation would leave unexplained, referring them to initial conditions, namely: the positions and velocities of all particles at any one instant, assumed as an origin of time-measurement.

collocational (kol-ō-kā'shon-al), *a.* [*collocation* + *-al.*] Of or pertaining to collocation.

In the *collocational* stage of syntax, the chief means resorted to for this end was repetition.
J. Earle, Philol. Eng. Tongue, ¶ 567.

collocative (kol'ō-kā-tiv), *a.* [*collocate* + *-ive.*] Based on collocation or order of arrangement; of the nature of collocation.

There are three kinds of instrumentality which are the most active in the production of this effect [a continuous and consistent signification in the parts of a sentence]. The first of these is collocation, or the relative position of words. . . . This . . . we call . . . flat or *collocative* syntax. *J. Earle*, Philol. Eng. Tongue, ¶ ¶ 552, 553.

collodiochlorid (kŏ-lō″di-ō-klō'rid), *a.* In *photog.*, noting a printing process in which the sensitive surface on glass or paper consists of collodion impregnated with silver chlorid.

collodiogelatin (kŏ-lō″di-ō-jel'a-tin), *a.* In *photog.*, noting a process in which a plate coated with washed collodion emulsion is immersed in a solution of gelatin, casein, or a similar substance, to perfect the film; or a plate coated with washed collodion emulsion is washed with hot water and covered with a thin film of rapid gelatin emulsion.

collodion, *n.*—**Albuminized collodion,** collodion which has been treated with a clear aqueous solution of egg-albumin, and then separated from the white precipitate.—**Blistering collodion,** the collodium cantharidatum of the U. S. Pharmacopœia.—**Cantharidal collodion,** a preparation of collodion containing the chloroformic extract of 60 parts cantharides in 100 parts of the finished liquid.—**Caustic collodion,** a solution of corrosive sublimate in collodion.—**Collodion emulsion.** See ★*emulsion.*—**Collodion sac method,** a method of increasing the virulence of bacteria by growing them in sacs composed of collodion (analogous to parchment dialyzers), introduced into the peritoneal cavity of an animal. *Med. Record*, April 4, 1903, p. 522.—**Collodion transfer,** in *photog.*, a finished picture produced in a collodion film on glass which by suitable preparation and handling may be removed from the glass and transferred to paper.—**Enamel collodion,** an unsensitized collodion used as a varnish for films or prints.—**Flexible collodion,** collodion with the addition of castor-oil and Canada turpentine. After the evaporation of the ether the collodion film remains soft and pliable owing to the addition.—**Methylic collodion,** in *photog.*, collodion made by the use of methylic instead of ethylic alcohol.—**Styptic collodion.** See *styptic.*

Collodionized paper, paper coated with a film of collodion. Photographs so covered may then be painted with oil colors.

collographic (kol-ō-graf'ik), *a.* Of or pertaining to the collograph or to collography.—**Collographic process.** Same as ★*collography.*

collography (ko-log'ra-fi), *n.* **1.** The manifolding of a writing or document by means of the collograph.—**2.** The art or practice of making prints from photographically prepared printing-surfaces of gelatin. There are two processes, known as *heliotype* and ★*collotype* (which see), analogous in principle but different in details.

Colloidal metals, metals in a peculiar condition of extreme subdivision, in which they remain for an indefinite time suspended or dissolved in water, and often present colors quite different from those exhibited by the same metals in massive form. Silver, gold, mercury, and platinum have been especially studied in this condition.

colloidize (kol'oi-diz), *v. t.*; pret. and pp. *colloidized*, ppr. *colloidizing.* [*colloid* + *-ize.*] To produce colloidal or jelly-like structure, as in the incorporation of guncotton with nitroglycerin and vaseline or camphor in the manufacture of smokeless powder.

collop, *n.* **5.** A rounded fold of flesh, as on some very fat animals.

colloped (kol'opt), *a.* Having rounded folds of flesh, as a very fat animal. *N. E. D.*

collophore (kol'ō-fōr), *n.* [Gr. *κόλλα*, glue, + *-φορος*, < *φέρειν*, bear.] In *entom.*, the ventral tube of the *Collembola.*

These turned out to be specimens of *Podura aquatica*, commonly called "Spring-tails," a low type of insect life, in which the mouth parts have degenerated, [and] a *collophore*, or sucker, has developed on the ventral side of the abdomen. *Knowledge*, Nov., 1903, p. 259.

colloq. An abbreviation of *colloquial.*

colloquialism, *n.* **2.** Colloquial style, quality, or usage: as, "a transcript of the *colloquialism* of the day," *Coleridge.*

colloturine (kol-ō-tū'rin), *n.* [Gr. *κόλλα*, glue, + L. *tus* (*tur-*), incense (?), + *-ine*[2].] A crystalline alkaloid found in small amount in the bark of *Symplocos racemosa.*

collotype (kol'ō-tīp), *n.* [Gr. *κόλλα*, glue, + *τύπος*, type.] **1.** A photomechanical process by which prints in greasy ink are obtained from a gelatin film used as a printing-surface. When bichromated gelatin is exposed behind a reversed negative and is washed, a greasy ink will adhere only to those places which have been affected by light. This property was discovered by Fox Talbot in 1853. It is usual to employ a thick glass plate (though metals and parchment paper also serve) for supporting the gelatin, and to cover this glass with a silicate, or an albumin solution, which is dried, as a substratum for the gelatin. More prints can then be run off. The surface of the developed gelatin is kept moistened with a mixture of glycerin and water. The ink is applied with a leather roller for the shadows, and a gelatin roller for the half-tones. The paper on which the proofs are pulled may be glazed or unglazed, and a protecting varnish may be put over the print.

Collotype would have done more justice to the 'Alphabet of Death' and the Old Testament wood-cuts than the line process which has been employed.
Athenæum, Dec. 19, 1903, p. 832.

2. A print from a photographically prepared film of gelatin upon a glass or metal plate.

collotypic (kol-ō-tip'ik), *a.* Of or pertaining to collotype productions or processes.

colloxylin, colloxyline (ko-lok'si-lin), *n.* [Gr. *κόλλα*, glue, + E. *oxy(gen)* + *-l-* + *-in*[2].] Same as *pyroxylin.*

colluctation, *n.* **2.** An agitation or disturbance of the particles of a substance. [Rare.]

Natural Baths, or Hot-Springs, do not owe their Heat to any *Colluctation* or Effervescence of the Minerals in them. *J. Woodward*, Nat. Hist. of the Earth, iii. 161.

colluvial (ko-lū'vi-al), *a.* [*colluvies* + *-al*[1].] Belonging to or composed of colluvies; consisting of alluvium in part and also containing angular fragments of the original rocks: contrasted with *alluvial* and *diluvial.*

Collybia (ko-lib'i-ă), *n.* [NL. (Endlicher, 1836), so named from the flat circular pileus; < Gr. *κόλλυβος*, a coin.] A large genus of white-spored agarics, having a fibrillose stem without volva or annulus and the gills mostly adnate. *C. radicata* is a very common and widely distributed species occurring in woodlands, and producing a long, root-like extension of the stem.

Collyrites (kol-i-rī'tēz), *n.* [NL., < Gr. *κολλυρίς*, a loaf of bread, + *-ites*, E. *-ite*[2].] A genus of spatangoid *Euechinoidea*, or sea-urchins, having the apical system disconnected, the bivium and trivium widely separated, and periproct posterior: typical of the family *Collyritidæ* and very abundant in the Jurassic and Cretaceous rocks.

collywest (kol'i-west), *adv.* [Also *colleywest, kolliwest.*] Same as *collyweston.* [Prov. Eng.]

collyweston (kol-i-wes'ton), *n.* [Appar. from the name of a person.] **1.** In the phrase 'It's all along of Colly Weston,' said when anything goes wrong.—**2.** Nonsense.—**3.** Opposition. [Prov. Eng. in all uses.]

collyweston (kol-i-wes'ton), *adv.* [Also *colleyweston, collywesson, collywest, galleywest*, etc.; from the noun.] In an opposite direction; often as an adjective, contrary, contradictory. [Prov. Eng.]

Colo. The official abbreviation of *Colorado.*

coloboma, *n.*—**Bridge coloboma,** a defect in the iris by which it is divided into two by a thin band of normal iris tissue.—**Coloboma palpebræ,** a fissure dividing the eyelid vertically.

colocentesis (kol″ō-sen-tē'sis), *n.* [NL., < Gr. *κόλον*, colon, + *κέντησις*, puncture.] In *surg.*, puncture of the colon to give egress to retained gases.

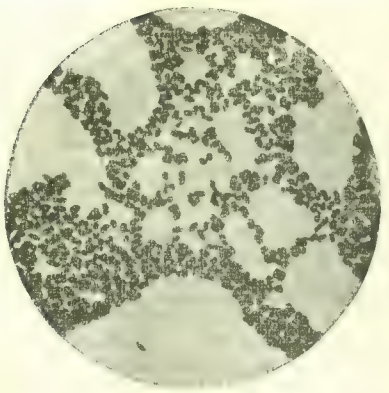
colocolic (kol-ō-kol'ik), *a.* [Gr. *κόλον*, colon, + *κόλον*, colon, + *-ic.*] Pertaining to two non-contiguous portions of the colon.

When a colectomy is impossible because of the site of the lesion, as, for instance, in the splenic flexure, an anastomosis is indicated, either *colo-colic* or ileo-sigmoid.
Therapeutic Gazette, Feb. 15, 1903, p. 102.

colocolostomy (kol″ō-kol-os'tō-mi), *n.* [Gr. *κόλον*, colon, + *κόλον*, colon, + *στόμα*, mouth.] In *surg.*, establishment of a permanent communication between two non-contiguous portions of the colon.

colocynth, *n.*—**Compound extract of colocynth,** a brown cathartic powder made by melting purified aloes 16 parts, adding alcohol 10 parts, soap 14 parts, extract of colocynth 16 parts, and resin of scammony 14 parts; heating to 120° C. until homogeneous; cooling; adding cardamom 6 parts, and reducing to a fine powder: the extractum colocynthidis compositum of the U. S. Pharmacopœia.

colo-enteritis (kol″ō-en-te-rī'tis), *n.* [Gr. *κόλον*, colon, + NL. *enteritis.*] Inflammation of both the large and the small intestine.



cologarithm (kō-log'a-rithm), *n.* The logarithm of the reciprocal of a number so taken that the mantissa is positive. The characteristic may be positive or negative.

Cologne brown. See ★*brown.*—**Cologne spirit,** a trade-name for common or ethyl alcohol freed with special care from fusel-oil or other disagreeably smelling impurities, and used in the manufacture of eau de Cologne and other perfumes: also frequently selected for pharmaceutical use.—**Cologne yellow.** See ★*yellow.*

colombiano (kō-lōm-bē-ä'nō), *n.* [Sp., < *Colombia* (see def.): see *Colombian.*] A silver coin of Colombia, of the value of 8 reales.

colon[3] (kō-lōn'), *n.* [Named after *Columbus*, Sp. *Colón*, the discoverer of America.] The silver peso or dollar of Costa Rica, of the value of 46½ cents or 100 centavos.

Colon bacillus. Same as ★*Bacillus coli communis.* See cut on following page.

Colon Bacillus (*Bacillus coli communis*) from agar culture.
Magnified 1000 times.
(From Buck's "Reference Handbook of the Medical Sciences.")

colonel, *n.* 2. In *angling*, the name of an artificial salmon-fly. **Colonel commandant,** the chief of a brigade of artillery, engineers, or marines in the British service.

Colonel Bogie. In *golf*, an imaginary player to whom is assigned, by the committee in charge, a score against which the players have to play.

This "*Bogie*" score usually represents par play over the green, and it is made known before the competition begins, so that each competitor knows what he has to do at every hole. Each player counts his score at every hole, and if he holes out at that particular hole in fewer strokes, or in the same number, or in more than the appointed number, he wins, halves, or loses the hole to "*Bogie*," as the case may be. At the end of the game the number of holes won from "*Bogie*" are placed against those lost to "*Bogie*," and the player who is the greatest number of holes up or the fewest down wins the competition.

W. Park, Game of Golf, p. 13.

colonial. **I.** *a.*—**Colonial goose,** a boned leg of mutton stuffed with sage and onions. [Australia.]

II. *n.* 2. *pl.* Colonial products, securities, etc.

colonialism, *n.* 3. The colonial principle or system: as, British *colonialism* works well. *Dicey.*

colonialist (kọ-lō′ni-ạl-ist), *n.* One who favors colonialism or the colonial principle.

colonic (kō-lon′ik), *a.* [Irreg. < *colon* + *-ic.* The normal adj. is *colic.*] Relating to the colon. *Buck*, Med. Handbook, I. 14.

colony, *n.*, 4. (*c*) A circumscribed aggregation of bacteria of the same species in artificial culture.

5. In *sociol.*, a group of individuals of like natures or having a common interest, living by themselves as a self-sufficient social organization.

Many schemes have been suggested, such as that carried out by the Salvation Army, for giving such men work in a labour *colony;* but as yet no scheme offers a solution.

Encyc. Brit., XXXII. 675.

Charter colony. See ★*charter.*—**Doctrine of colonies,** in *paleon.*, a proposition set forth and defended by the Bohemian paleontologist Barrande to account for the appearance of representatives of a fauna in rocks antedating the normal horizon of that fauna. He supposed this earlier partial appearance of a fauna to be due to the incursion of its species from an outside basin or neighboring province through the temporary breaking-down of geographical barriers, and the hypothesis involved the conception that the same faunas which were contemporaneous in adjoining provinces may be successive in the provinces independently. The invading congeries, finding itself in an environment unpropitious for its perpetuity, was soon extinguished, and the normal fauna resumed its occupancy until driven out and replaced by its permanent successor. These ideas have been combated by other geologists, and the phenomena involved in the Bohemian basin have been for the most part accredited to displacements by faulting; but it is now conceded that the fundamental conceptions involved in the theory are true for any normal succession of faunas, the culminant development of any fauna being preceded or heralded by the appearance of detached bodies of that fauna in the rocks before the earlier dominant fauna has departed. Such premature appearances have been termed *prenuncial faunas.*

colopexy (kol-ọ-pek′si), *n.* [Gr. *κόλον*, colon, + *πῆξις*, a fixing.] In *surg.*, an operation for the attachment of a too movable portion of the colon to the abdominal wall.

colophan (kol′ọ-fan), *n.* [*colophon(y)* + *-an.*] An amorphous resin obtained from elemi.

Colophene camphor. See ★*camphor.*

colophilene (kol′ọ-fi-lēn), *n.* [*coloph(ene)* + *-il* + *-ene.*] A hydrocarbon of uncertain identity, formed by treating colophene hydrochlorid with barium hydroxid.

colophonin (kol′ọ-fọ-nin), *n.* [*colophon(y)* + *-in*[2].] A crystalline compound (colophonin hydrate), $C_{10}H_{22}O_3 + H_2O$, formed when that portion of the oil obtained by distilling colophony which boils at 103–104° C. is allowed to stand for some days with water. The free colophonin is also crystalline.

colophonone (kol′ọ-fọ-nōn), *n.* [*colophon(y)* + *-one.*] An oily mixture obtained by the dry distillation of colophony.

coloproctia (kol-ọ-prok′ti-ạ), *n.* [Gr. *κόλον*, colon, + *πρωκτός*, anus.] Same as ★*colostomy.*

coloptosis (kol-op-tō′sis), *n.* [Gr. *κόλον*, colon, + *πτῶσις*, falling, lapse.] Prolapse of the colon.

colopuncture (kol′ọ-pungk-tụ̄r), *n.* [Gr. *κόλον*, colon, + L. *punctura*, puncture.] Same as ★*colocentesis.*

color, *n.* 18. *pl.* In *faro*, a system of play by which the cards bet upon are selected according to the color of the first winner or first loser.—19. *pl.* The commission of ensign in the British military service; usually *a pair of colours.*—20. In *calico-printing*, any mordant or pigment that is printed on cloth, made into a paste by means of some thickening substance, as starch, gum, etc.—**Acid color,** one of an important class of artificial dyestuffs; so named because they are applied in an acid bath. They are used in dyeing and printing animal fibers, but are of little or no value in the coloring of vegetable fibers.—**Acridine color,** a color related to acridine.—**Albumen colors,** in *textile printing*, colors which are held upon the fiber mechanically by means of coagulated albumen. They are, without exception, pigments.—**Alizarin colors,** a group of artificial dyestuffs which are related to alizarin in their composition and therefore belong to the larger group of anthracene colors. They are mordant colors, polygenetic in character, and noted for their fastness. The term is sometimes erroneously applied to mordant dyestuffs not related to alizarin.—**Animal color,** a color of animal origin. Such colors are derived chiefly from insects, and include such dyestuffs as cochineal, kermes, and lac-dye.—**Anthracene color,** one of an important group of coal-tar coloring matters directly related to anthracene. This group includes alizarin and other important mordant colors.—**Anticryptic colors.** See ★*anticryptic.*—**Apatetic colors.** See ★*apatetic.*—**Aposematic colors.** See ★*aposematic.*—**Azin color,** a color related to one of the azins.—**Azo color,** any artificial dyestuff which is an azo compound, that is, which contains one or more azo groups. The azo colors are very extensive, and are divided into a number of subclasses. See *coal-tar colors.*—**Basic color,** one of an important class of artificial dyestuffs, for the most part substituted ammonias and consequently basic in character. They dye cotton upon an acid mordant, commonly tannic acid, and dye wool directly. They are largely used in calico-printing and in the coloring of ginghams. As a class they are very fast to washing, but not fast to light. Also called *tannin colors.* For specific basic colors see ★*blue*, ★*green*, ★*red*, etc.—**Benzidine colors,** a name by which the direct cotton colors are sometimes designated, since benzidine is the starting-point in the preparation of many of them. **Christiansen's colors,** colors produced by submerging pieces of a clear colorless substance, such as glass in a colorless liquid of the same refracting power. Owing to the different dispersion of the solid and liquid the indices of refraction of the two are strictly identical for only a single wave-length. For other wave-lengths there is reflection of light at the faces between solid and liquid, and since the intensity of reflection depends on the difference of the indices, color-effects sometimes of great beauty result.—**Color index,** a term used in hematology to designate the relative amount of hemoglobin contained in a red blood-corpuscle. The index is obtained by dividing the hemoglobin percentage by the red-corpuscle percentage. **Colors of thin plates,** the colors produced by the interference of light reflected from the first with that reflected from the second surface of thin layers or films of any transparent substance.—**Color standard,** a classified assortment of pigments the color constants of which are known. Comparison with these makes it possible to designate approximately the character of other colors without determining their constants.—**Dead color.** (*a*) See *dead-coloring.* (*b*) Color which has no reflections.—**Diamine colors.** See ★*diamine.*—**Diazo color,** one of a class of coal-tar coloring matters containing two azo groups, but no more. They are for the most part direct cotton colors.—**Direct cotton colors,** an important group of coal-tar colors which possess the common property of dyeing unmordanted cotton in a neutral or slightly alkaline salt or soap bath. They also dye unmordanted wool in a neutral bath, but in most cases there are faster and cheaper acid colors which give similar results. Most of the direct cotton colors are of the diazo type and are derived from tetrazo compounds; a few are of the triazo type, and a still smaller number of the tetrakisazo type. Several coal-tar colors of the thiazol type also come under this head. Various names are assigned to them by different manufacturers, such as *benzidine colors, benzo-colors, Kongo colors, diamine colors, direct colors, diazo-colors,* and *tetrazo-colors.*—**Express color,** in *pleading*, matter inserted in a pleading in confession and avoidance, admitting an apparent right in the adverse party, but a right so insufficient in law as to require further pleading by the adverse party.—**Fechner's colors,** in *psychophysics*, the colors of the artificial spectrum-top.—**Flight of colors,** in *psychophysics*, the series of colors seen in the after-image of intensive white light, for example, after glancing at the sun.—**Hering's theory of color vision,** or **visual sensation,** in *physiol.* and *psychol.*, the theory propounded by E. Hering, in opposition to the Young-Helmholtz theory, that there are six fundamental visual sensations, arranged in three pairs of complementaries (red-green, blue-yellow, black-white) and corresponding to antagonistic processes in three 'visual substances.' The black-white substance is affected by any form of light stimulus; the other two substances respond only to their specific stimuli.—**Implied color,** in *pleading*, that color which arises from the nature of the defense, as when the facts alleged by the adverse party are admitted, but their sufficiency in law is denied by matters set forth in the pleading. See *express* ★*color.*

—**Ingrain colors,** insoluble colors which are actually formed upon and within the grain or body of the fiber during the coloring process. With one or two exceptions their application is confined to the vegetable fibers. The ingrain colors are chiefly insoluble azo compounds, as paranitraniline red, alpha-naphthylamine red, and developed primuline; but the term also includes mineral colors, as chrome-yellow, iron buff, and Prussian blue. The general process of application is to prepare the cloth with one compound and then pass it through a solution of a second substance which will react with the first and form an insoluble colored compound upon the fiber. See *paranitraniline* ★*red* and *iron buff.*—**Janus colors,** a group of coal-tar colors which simultaneously possess the characteristics of the acid and basic colors and also the peculiar property of dyeing unmordanted cotton in an acid bath. In composition they are characterized by containing sulphonic acid groups and both amido and azo groups. They are applied to wool as acid colors and to cotton as basic colors: or cotton may be dyed directly by them in an acid bath.—**Kongo colors,** a name by which the direct cotton colors are sometimes designated; so called from Kongo red, discovered in 1884, which was the first direct cotton color.—**Mode color,** a term used by textile colorists to denote compound color or shade of a subdued character. Light drabs and slate-colors are excellent examples of mode shades.—**Monoazo color,** one of a class of coal-tar coloring matters which contain one, and but one, azo group. They are for the most part acid colors.—**Monogenetic colors,** dyestuffs capable of producing only one color, or, at the most, tints or shades of one color. See also *polygenetic* ★*colors.*—**Mordant acid colors,** an important class of artificial dyestuffs which dye wool from an acid bath in the same manner as the acid colors, but possess the valuable property of forming chromium color-lakes when after-treated with some chromium mordanting principle, as potassium bichromate or chromium fluoride. The colors produced by this after-chroming are extremely fast to the common color-destroying agencies, and in many cases are as fast as the alizarin colors. They are for the most part carboxyphenol or salicylic acid derivatives.—**Newton's scale of colors,** a list of the colors of Newton's rings, counting from the center outward, as recorded by Sir Isaac Newton. The order of colors on Newton's scale is as follows: black, blue, white, yellow, red, violet, blue, green, yellow, red; purple, blue, green, yellow, red; green, red; greenish blue, red; greenish blue, pale red; greenish blue, reddish white.—**Nitroso color,** one of a class of coal-tar coloring matters which contain one or more nitroso groups. They are either mordant or mordant acid colors.—**Opposite color,** in *psychophysics*, an antagonistic or complementary color.—**Original color,** in *psychophysics*, a physiologically primary color.—**Oxazin color,** one of a class of coal-tar coloring matters containing an oxazin group.—**Oxidation colors,** in *calico-printing*, colors which are developed on the surface of the cloth from materials printed on, and afterward undergoing oxidation. The most important color so produced is insoluble aniline black.—**Oxyketone colors,** a class of dyestuffs, of which the most important is alizarin, originally derived from madder, but now manufactured artificially from the anthracene of coal-tar. It yields a number of derivatives also used in dyeing.—**Phthalic anhydrid color,** one of a group of coal-tar coloring matters related to phthalic anhydrid. This group includes the eosins.—**Polygenetic colors,** dyestuffs capable of producing different colors with different mordants. Thus alizarin, a polygenetic color, produces red with aluminium mordants, wine colors with chromium mordants, violet black with iron mordants, and orange with tin mordants.—**Principal color,** in *psychophysics*, one of the psychologically fundamental colors; red, green, blue, yellow, black, or white.—**Raised color,** in *calico-printing*, a color that is developed by a mordant or some other agency.—**Steam color,** in *calico-printing*, a mordanted color that is developed and fixed upon the fabric by steaming. Besides cotton and linen, silk and woolen goods are occasionally treated in this way.—**Stilbene color,** one of a group of coal-tar coloring-matters related to stilbene. They are for the most part direct cotton colors.—**Sulphid color.** Same as *sulphur* ★*color.*—**Sulphonated azo color,** one of a subdivision of the acid colors, which includes most of the acid reds, yellows, oranges, browns, and blacks.—**Sulphonated basic color,** one of a subdivision of the acid colors, made by treating certain of the basic dyestuffs with concentrated sulphuric acid.—**Sulphone colors,** a group of direct cotton coal-tar colors, derived from benzidine-sulphon-disulphonic acid. They are better suited for dyeing wool than for dyeing cotton.—**Sulphur color,** one of an important group of coal-tar coloring matters prepared by fusing various aromatic diamines and other organic compounds with sodium sulphid, sulphur, or thiosulphates. They are soluble in sodium sulphid solution, and in such a solution cotton may be dyed directly. They produce, for the most part, dull shades and include many fast blacks, browns, and blues. Also known as *sulphid colors.*—**Tannin color.** Same as *basic* ★*color.*—**Tetrakisazo color,** one of a class of coal-tar coloring matters containing four azo groups. They are direct cotton colors.—**Thiazin color,** one of a class of coal-tar coloring matters containing the thiazin group. They include the methylene and thionine blues.—**Triazo color,** one of a class of coal-tar coloring matters which contain three azo groups but no more. They are for the most part direct cotton colors.—**Triphenylmethane color,** one of a class of coal-tar coloring matters which are directly related to triphenylmethane. They include most of the basic colors and the sulphonated basic colors.—**With the colors,** serving in the active or standing army in contradistinction to serving in the reserve.—**Xanthene color,** one of a class of coal-tar coloring matters which are related in structure to xanthene. These colors include the phthalic anhydrid colors and pyronines.

Colorado grass. Same as *concho-grass.*—**Colorado group.** See ★*group*[1].

Colorado River trout. See ★*trout*[1].

color-blindness, *n.* Since it is estimated that one man in twenty-five is color-blind, the importance of recognizing this defect in railroad or maritime employees, whose occupation requires the ability to distinguish quickly between signals of different colors, is evident. Many

European governments and a few of the United States now have laws regulating the examination of applicants for such positions. The large railroad companies on their own account test the vision of new men and require all employees to submit to reëxamination at stated intervals. Numerous tests have been devised for this purpose, but practically only two are used in official examinations. One of these is nearly always founded on the wool test of Holmgren. In this a hundred or more skeins of wool, all different in color or shade, are placed in a pile, and the applicant is required to select first all the skeins corresponding in color to a light green skein. The test is then repeated with a rose-pink skein, and in some cases with a bright red one. The color-blind person hesitates in making his selections and matches the colors incorrectly. The other test consists in the use of a lantern so arranged as to show the light through one or more disks of glass, the color, size, and brightness of which can be varied so as to simulate lantern signals under different conditions of distance, fog, smoke, etc. The wool test is sometimes modified by having the skeins suspended side by side from a stick, so that the selections may be made more quickly. Instead of skeins of wool, colored blocks, small glass tubes filled with colored powders, or slips of paper of different colors, are sometimes used, or colored letters are printed on a colored background in such a way that some of them cannot be distinguished from the background by color-blind persons. In official examinations the acuteness of vision for form and the hearing are usually tested, as well as the function of color-perception. It should be added that the wool and lantern tests are by no means adequate tests of color-blindness at large. Many cases of red-green blindness are missed by the wool test; and the lantern test merely shows whether or not the employee can distinguish the particular colors used under the particular conditions of observation, not whether or not he is partially color-blind. To detect the less obvious cases of partial color-blindness, recourse must be had to some instrument of precision, such as Hering's color-blindness tester, in which the color-tone and brightness of complementary color-pairs can be accurately and measurably adjusted.

color-box, *n.* 3. In *calico-printing,* a long trough, attached to a cylinder printing-machine, for holding a color to be applied to an engraved roller.

color-chord (kul′ọr-kôrd), *n.* A fanciful term sometimes used to describe color combinations which are decidedly agreeable, like the russet and green of a forest, or the violet and yellowish green of the wistaria.

color-curve (kul′ọr-kėrv), *n.* A curve which shows the differences in the focal length of the object-glass of a telescope for rays of different color (wave-length).

color-defective (kul′ọr-dē-fek″tiv), *n.* One who is partially or completely color-blind. *Stud. Yale Psychol. Lab.,* VIII. 17.

color-disk (kul′ọr-disk), *n.* A disk for use in the color-wheel. See *Maxwell color-disks* (under *disk*); and ★*color-mixer,* and *Masson's* ★*disk* (with cuts).

colored sounds. See ★*sound*⁵.

color-hearing (kul′ọr-hēr″ing), *n.* A condition in which a certain sound calls up the memory of a certain color, and vice versa. See ★*chromæsthesia. Buck,* Med. Handbook, III. 603.

colorimeter, *n.*—**Hehner's colorimeter,** an apparatus for volumetric analysis by the color-method. Two graduated glass cylinders, with stop-cocks at the sides and with flat bottoms, are used—one to hold the solution having a standard color, the sample to be tested being placed in the other. The comparison of color is made by looking axially through the cylinders. Liquid is withdrawn from the one having the deeper tint until both are alike. The strengths of the solutions are inversely as the readings of the graduated scales. Thus if 100 cubic centimeters of the unknown solution give the same tint as 20 cubic centimeters of the standard, the unknown solution is one fifth as strong as the standard.—**Leed's colorimeter,** an apparatus for comparing the relative depth of color of liquids. The light is reflected from above by a mirror, and is transmitted lengthwise through the tubes, and the colors are compared in the mirror below the stage.—**Stead's colorimeter** or **chromometer,** an apparatus for the comparison of colored solutions, used in estimating the proportion of carbon in steel.

colorimetrical (kul-ọ-ri-met′ri-kạl), *a.* Same as *colorimetric.*

colorimetrically (kul″ọ-ri-met′ri-kạl-i), *adv.* Having reference to a colorimetric comparison; by means of the colorimeter.

colorimetry, *n.* 2. The quantitative measurement, as in chemical analysis, of a colored substance by comparing the depth of color of its solution with that of a solution of known strength of the same or a similarly colored substance.

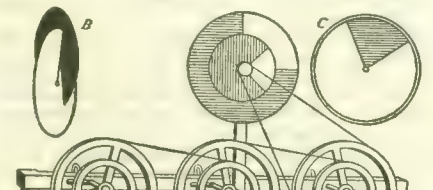
colorin (kō-lō-rēn′), *n.* [Sp. *colorin,* intense color, ‹ *color,* color.] A name in Mexico of several plants having bright-colored seeds which are sometimes used by the natives for beads, especially of *Erythrina coralloides,* a small thorny tree, with trifoliate leaves, belonging to the *Fabaceæ.*—**Colorin chiquito,** the Mexican rosary-pea, *Dolicholus phaseoloides,* a twining plant with small, hard, red-and-black seeds very closely resembling the common crabs'-eyes of the West Indies (*Abrus Abrus*). The plant, however, is easily distinguished by its trifoliate leaves, the leaves of *Abrus* being pinnate with many pairs of leaflets. See also ★*chilicote.*

coloring, *n.*—**Aggressive coloring.** See ★*aggressive.*—**Cryptic coloring,** animal coloring which serves to conceal its possessor, so as to hide it from its enemies or prevent its prey from discovering it. It may be for defense or for attack, general or special.—**Epigamic coloring,** sexual coloring which by its display serves to attract or stimulate the other sex during the courtship of animals.—**Episematic coloring,** animal coloring which serves as a recognition-mark for other individuals of the species.—**Procryptic** or **protective coloring,** organic coloring which serves to conceal its possessor from enemies.—**Pseudallosematic, pseudaposematic, pseudepisematic, pseudosematic coloring.** See ★*pseudaposematic,* ★*pseudepisematic,* ★*pseudosematic character.*—**Sematic coloring,** organic coloring which serves to alarm enemies or to bring together individuals of the species for their welfare.—**Synaposematic coloring,** warning or aposematic coloring like that of allied species.

coloring-wheel (kul′ọr-ing-hwēl), *n.* In *leather manuf.,* a wheel or drum into which skins are put with the coloring liquid and revolved until sufficiently colored. *Flemming,* Practical Tanning, p. 179.

coloristic, colouristic (kul-ọr-is′tik), *a.* Of or pertaining to color or coloring.

Instead of imitating the old masters, let us paint the *colouristic* charms that were unknown to them.
Encyc. Brit., XXXII. 449.



colouritype (kō-lor′i-tīp), *n.* [L. *color,* color, + Gr. *τύπος,* type.] The art of making photo-engraved plates or printing-surfaces that can be used for the production of prints in many colors from three plates only, respectively planned for the primary colors yellow, blue, and red. See ★*colortype.*

colorless, *a.* 2. In *bot.*: (*a*) Having no other color than green. (*b*) Pale or hyaline. *Jackson,* Glossary.

color-line, *n.* 3. In *psychophys.*: (*a*) The outline of the plane figure (circle, square, triangle) which gives a diagrammatic representation of color sensations and their interrelation. (*b*) Any straight line joining two points on or within the solid figure (sphere, double cone, double pyramid) which gives a diagrammatic representation of the totality of visual sensations.

colorman, *n.* 2. In *leather manuf.,* the man who mixes the dyes. Most factories have a special workman who attends to this.

color-mixer (kul′ọr-mik″sėr), *n.* In *psychophys.,* an instrument for the mixture of colors. The usual form of the instrument is the color-top or color-wheel. This consists essentially of a vertical or horizontal axle, capable of rotation at high speed, upon which may be

Color-mixer.
A, color-mixer; *B* and *C,* disks.

clamped disks of black, white, or colored cardboard. If the disks are slit along one radius, several may be fitted together, and mounted on the axle at the same time; the separate impressions on the retina then succeed each other so swiftly that only the result of mixture is seen. The color-wheel, electrically or mechanically driven, is one of the staple instruments of the psychological laboratory.—**Marbe's color-mixer,** a form of the color-wheel in which the relation of the sectors of the mounted disks may be changed at will during rotation.—**Reflection color-mixer,** a color-mixer in which a pane of clear glass is set, at a certain inclination, between two horizontal strips of colored paper. The observer, looking down through the glass, sees the reflection of one strip projected upon the image of the other.

color-pan (kul′ọr-pan), *n.* In *calico-printing,* a vessel, usually of copper, employed for dissolving and stirring thickeners and colors.

color-plate (kul′ọr-plāt), *n.* A printing-plate for one color only made for a print which is to be fully developed, in a perfect copy, by the printing of other colors from separately prepared plates.

color-screen (kul′ọr-skrēn), *n.* A plate of colored glass or other transparent medium, interposed in the path of a beam of light to absorb certain rays while allowing the rest to pass; specifically, a screen which cuts out all but the middle portion of the spectrum, so that when it is interposed before an isochromatic plate it becomes possible to obtain satisfactory photographs of celestial objects with refractors which are not photographically corrected.

color-slab (kul′ọr-slab), *n.* A slab or plate of white porcelain upon which little patches of the various colors used in porcelain-painting have been burned in to serve as a guide to the artist, showing the result each material will give in firing.

color-tone (kul′ọr-tōn), *n.* 1. Gradation and harmony of color.

'The most important part of *color-tone* atmosphere, Millet was fond of saying, 'can be perfectly rendered in black and white.'
J. Cartwright, in Burlington Mag., V. 52.

2. In *psychol.,* the color quality of a colored impression; chroma or hue, as opposed to brightness and saturation.

color-top (kul′ọr-top), *n.* A top the surface of which is systematically tinted in such a way that when it revolves it exhibits the phenomena of color-mixture by persistence of vision. See ★*color-mixer.*

color-tub (kul′ọr-tub), *n.* In printing calico by hand with blocks, a box for holding the color employed by the printer.

color-tube (kul′ọr-tōb), *n.* See ★*tube.*

colortype (kul′ọr-tīp), *n.* A pictorial print produced on the ordinary typographic printing-press by the three-color process from three photo-engraved plates that respectively convey the primary colors yellow, blue, and red. When the outline or form is indistinct, a fourth plate of black is sometimes added. Secondary and tertiary shades of color are made by the dissection and combination of the overlapping primary colors in the processes of printing.

color-weakness (kul′ọr-wēk-nes), *n.* Inability to distinguish colors at low degrees of saturation: for example, the inability to see the redness of a washed-out pink or the blueness of a navy blue.

color-wheel (kul′ọr-hwēl), *n.* A wheel designed to demonstrate the phenomena of color-mixture. See ★*color-mixer.*

colory, coloury (kul′ọr-i), *a.* and *n.* [*color* + *-y*¹.] **I.** *a.* 1. Abounding in color: as, good *colory* cows. [Colloq.]—2. Of a color that indicates excellence of quality: as, *colory* hops, or coffee, or tobacco.

II. *n.* A packer's grade of light leaf-tobacco, from which tobacco for pipes and cigarettes is manufactured. This grade of tobacco is produced chiefly in Maryland and Ohio and is largely exported.

Coloss. An abbreviation of *Colossians.*

colossalize (kō-los′ạl-īz), *v. t.* [*colossal* + *-ize.*] To render colossal; impart colossal proportions.

A third-rate author, owing his fame to his effigy *colossalized* through the lens of John Wilson.
Emerson, Letters and Social Aims, p. 188.

colostomy (ko-los′tọ-mi), *n.* [Gr. *κόλον,* colon, + *στόμα,* mouth.] In *surg.,* the establishment of a permanent opening (artificial anus) into some portion of the colon. *Med. Record,* July 11, 1903, p. 71.

colpalgia (kolp-al′ji-ạ), *n.* [NL., ‹ Gr. *κόλπος,* bosom, womb (vagina), + *ἄλγος,* pain.] In *med.,* pain in the vagina.

colpocystocele (kol-pō-sis′tọ-sēl), *n.* [Gr. *κόλπος,* womb (vagina), + *κύστις,* bladder, + *κήλη,* tumor.] In *surg.,* prolapse of the bladder which pushes before it the wall of the vagina.

colpocystotomy (kol″pō-sis-tot′ọ̄-mi), *n.* [Gr. *κόλπος,* womb (vagina), + *κύστις,* bladder, + *-τομία,* ‹ *ταμεῖν,* cut.] In *surg.,* incision into the bladder through the vagina.

colpodesmorraphia (kol-pō-des-mọ̄-raf′i-ạ), *n.* [NL., ‹ Gr. *κόλπος,* womb (vagina), + *δεσμός,* a band, + *ῥαφή,* a sewing.] In *surg.,* an operation for reducing the capacity of the vagina by removing a section of the mucous membrane and uniting the edges of the defects. The object of the operation is to furnish support to a prolapsed womb.

colpohysterectomy (kol-pō-his-tẹ-rek′tọ̄-mi), *n.* [Gr. *κόλπος,* womb (vagina), + *hysterectomy.*] In *surg.,* removal of the uterus by an operation through the vagina.

colpomyomectomy (kol-pō-mī-o-mek′tọ̄-mi), *n.* [Gr. *κόλπος,* womb (vagina), + *μῦς,* muscle, + *ἐκτομή,* excision.] In *surg.,* removal of a myoma of the uterus through an incision in the vaginal wall.

colporrhexis (kol-pō-rek′sis), *n.* [NL., ‹ Gr. *κόλπος,* womb (vagina), + *ῥῆξις,* breaking, ‹ *ῥηγνύναι,* break.] In *surg.,* a laceration of the vaginal wall.

colpos (kol'pos), *n.*; pl. *colpoi* (-poi). [Gr. *κόλπος*, the bosom, the lap, a deep hollow, bay, gulf, etc.: see *gulf*.] In Greek costume, a fold in a garment, as the chiton, above the girdle. It was sometimes used as a pocket.

colpostenosis (kol″pō-stē-nō'sis), *n.* [NL., < Gr. *κόλπος*, womb (vagina), + *στένωσις*, narrowing.] In *surg.*, stricture of the vagina.

colpotomy (kol-pot'ō-mi), *n.* [Gr. *κόλπος*, womb (vagina), + *-τομία*, < *ταμεῖν*, cut.] In *surg.*, incision into the vaginal wall.

colpoxerosis (kol pok-sē-rō'sis), *n.* [NL., < Gr. *κόλπος*, womb (vagina), + *ξήρωσις*, a drying up, < *ξηροῦν*, dry up, < *ξηρός*, dry.] In *med.*, extreme dryness of the vaginal mucous membrane.

colt, *v. t.* 2. To beat with a rope's end. See *colt*, *n.*, 4. *Marryat.*

colter, *n.* 2. In medieval armor, a two-handed Flemish weapon with one edge straight and the other curved: so called from its resemblance to the colter of a plow.

colt-ill (kōlt'il), *n.* An infectious catarrhal fever affecting horses. Young animals principally are attacked. One attack confers subsequent immunity. See *strangles*.

coltskin (kōlt'skin), *n.* The skin of a colt; as a trade term, leather made from skins of colts or of horses. *Flemming*, Practical Tanning, p. 397.

colt's-tail, *n.* 2. The small mare's-tail or cat's-tail (cirrus cloud): a portent of rain.

colugo (kō-lö'gō), *n.* [E. Indian.] The common name for the flying-lemur, *Galeopithecus volans*. Called also *kaguan* and *kubong*.

colulus (kol'ū-lus), *n.*; pl. *coluli* (-lī). [NL., dim. of L. *colus*, distaff.] A small comb-like sclerite at the base of and between the front spinnerets in many spiders. *Annals and Mag. Nat. Hist.*, Jan., 1904, p. 65.

Columbellaria (kol-um-be-lā'ri-ä), *n.* [NL.] A genus of platypodous gastropods with spiral ribs, long and narrow aperture, thickened and spirally ribbed outer lip. It occurs in the Upper Jurassic rocks.

Columbia black, blue, brown, etc. See ★*black*, ★*blue*, ★*brown*, etc.

Columbia formation. See ★*formation*.

Columbia River sucker, trout. See ★*sucker*, ★*trout*.

columbiad, *n.* 2. [*cap.*] An epic of Columbia, that is, America: used as the title of several poems, as one by J. L. Moore (1798), one, better known, by Joel Barlow (1808), and one in French (*La Colombiade*) by Madame de Boccage (1756).

Columbian[1], *a.*—**Columbian type**, a former name of a type-body now known as 16-point (.2213 of an inch).

Columbian[2] (kō-lum'bi-an), *a.* [*Columbus* + *-ian*.] Of or pertaining to Columbus; in *ethnol.*, pertaining to the period of American history beginning with the discovery of the continent by Columbus: called more definitely *post-Columbian*.

columbiform (kō-lum'bi-fôrm), *a.* [L. *columbus*, a dove or pigeon, + *form*, form.] Having the characters or appearance of a pigeon.

columbin[2] (kō-lum'bin), *n.* [*columbo* + *-in*[2].] A colorless, crystalline, bitter principle, $C_{21}H_{22}O_7$, contained in African columbo-root, *Jateorhiza palmata*.

columbine[2], *n.*—**Red** or **wild columbine**, *Aquilegia Canadensis*, a favorite American wild-flower, sometimes cultivated, with bright red showy nodding flowers: common on rocks from Nova Scotia to North Carolina and westward to the great plains. The large red columbine is *A. coccinea*, a larger and less common species with a similar but somewhat more restricted range.—**Tufted columbine**, a name applied to both *Thalictrum glaucum*, native in Spain, and *T. aquilegifolium*. The former is also called *Spanish-tuft*, and the latter *feathered columbine*. See *Thalictrum*.

columbium, *n.* 2. In *chem.*, a supposed new element announced in 1879 by J. L. Smith as present in the mineral samarskite: its existence has not been confirmed. Distinct from the previously known element columbium or niobium.

columbo, *n.*—**Extract of columbo.** See ★*extract*.

columbotitanate (kō-lum-bō-tī'tan-āt), *n.* [*columb(ic)* + *titan(ic)*[2] + *-ate*[2].] In *chem.* and *mineral.*, a compound in which the basic element or elements are united to the radicals of both columbic (niobic) and titanic acids, as in the mineral euxenite.

Columellar lobe, in the nomenclature of the septal sutures of the cephalopods, the median lobe on the dorsal surface of the whorl, which is usually the inner or concave surface. Also called *antisiphonal lobe*, *dorsal lobe*, and *interior lobe*.—**Columellar muscle**, in gastropods, a muscle that is attached to the columella and serves to draw the body into the shell.

column, *n.* 11. A short upright line which separates written or printed words or symbols. Its most common uses are to indicate, in copied or reprinted passages, especially title-pages, the ending of a line in the original copy, and in metrical works, liturgies, chants, etc., the close of a foot, rhythm, or measure.

12. The mast or vertical member of a hoisting apparatus, such as a crane, usually so constructed that no bracing or guys shall be required at the top to resist the bending stresses due to the load.—**Close column**, a battalion in column of companies or platoons with less than full distance between the subdivisions. Also called *battalion in mass*.—**Column at full distance**, a battalion in column of companies or platoons with such distance between subdivisions that the column can wheel into line.—**Column of files**, two files (or one file) of men faced to right or left.—**Column of fours**, a column composed of four files or of ranks of four.—**Diminished column**, one whose shaft is tapered. See *entasis* and ★*diminish*, *v. i.*, 2.—**Erosion column**, a tower-like form resulting from rain-wash and weathering of incoherent strata or loosely bound sediments with more resistant capping. *Amer. Jour. Sci.*, April, 1904, p. 265.—**Lotus column**. See *lotus* ★*capital*.—**Parallel columns**, two or more columns of printed matter placed side by side to show agreement or disagreement in words or expression.

columnal. II. *n.* A segment or joint of the stem of the *Crinoidea*.

columnar, *a.* 3. In *geol.*, divided into columns, by tension-joints, as is frequent in flows of basalt. The Giant's Causeway, in Ireland, is a famous instance. *Geikie*, Textbook of Geol., p. 136.—4. Arranged, written, or printed in columns, as in Chinese, Japanese, Korean, etc., writing.—**Columnar architecture, cell.** See ★*architecture*, ★*cell*.—**Columnar structure.** (*b*) In *petrog.*, a structure resulting from a system of cracks or joints whereby a rock is divided into prisms or columns, often six-sided: produced in igneous rocks by shrinkage upon cooling, in sedimentary rocks by loss of volume due to contact-metamorphism.

Columnaria (kol-um-nā'ri-ä), *n.* [NL., < LL. *columnaris*, columnar.] A genus of extinct *Tetracoralla* growing in compound stocks, composed of polygonal corallites, which bear horizontal tabulæ and two cycles of septa. It occurs in Silurian and Devonian rocks.

Columnia intermedia, an area of gray matter in the spinal chord, between the anterior and posterior horns.

columniated (ko-lum'ni-ā-ted), *a.* Same as *columnated*.

column-pipe (kol'um-pīp), *n.* 1. The pipe which conveys the drainage water in a mine shaft from the bottom pump to the surface.—2. The pipe and fixtures connecting a steam-boiler to the water-column which carries the water-gage and try-cocks.

colunar (kō-lū'när), *a.* [*co-*[1] + *lune* + *-ar*[3].] Pertaining to the same lune. If A and A′ be opposite points of a sphere, then the spherical triangles ABC, A′BC are colunar. Together they make up a lune.

colure, *n.* 2. In *vegetable pathol.*, a disease of the grape, characterized by the falling of the flowers and the imperfect development of the fruit. It has been attributed chiefly to unfavorable climatic conditions.

com. An abbreviation (*a*) of *commission*; (*b*) of *commoner*; (*c*) [*cap.*] of *commonwealth*.

coma[1], *n.*—**Diabetic coma**, the coma which often marks the final stage of diabetes mellitus.—**Uremic coma**, coma occurring in the later stages of uremia.

comale (ko-mä'le), *n.* [Sp., < Nah. *comalli*.] A flat disk or stone for baking corn-bread.

Comanche series. See ★*series*.

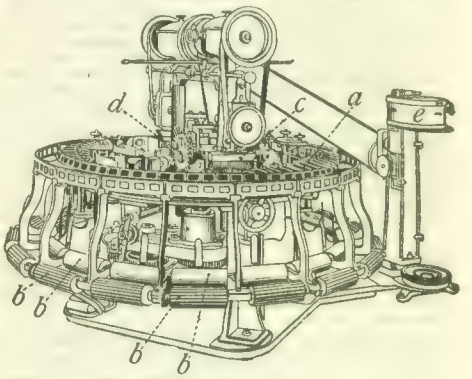
comatulin (kō-mat'ū-lin), *n.* [*Comatula* + *-in*[2].] A red pigment found in certain invertebrates (crinoids).

comb[1], *n.*, 2. (*m*) A series of points fastened to a stick, used in pricking the skin in tattooing. (*n*) *pl.* In *zoöl.*, paired ventral pectinated appendages of the abdomen of scorpions. They are of systematic importance. (*o*) A wooden form employed by riggers for weaving mats, etc. (*p*) In *agri.*, an implement with teeth and a long handle, used to strip the seed from grass or other low-growing plants; a seed-gatherer. (*q*) In *zoöl.*, one of the rows of immense cilia, fused at their proximal ends, which form the swimming-plates and serve as the locomotor organs of *Ctenophora*.

10. See ★*comb-flower*.—**Antlered comb**, in *poultry*, a comb formed of two divergent branches, or 'horns,' such as is found in some Polish fowls and in the La Flèche.—**Drone comb**, honeycomb in which drone-brood or drone-honey may be found.—**Segmented comb**, in *cotton-manuf.*, the needle-segment on the cylinder-comb of a combing-machine. See ★*comb-segment*.

comb[1], *v. t.* 4. To subject to a process or action similar to that of combing, as in dredging: as, to *comb* oyster-beds.

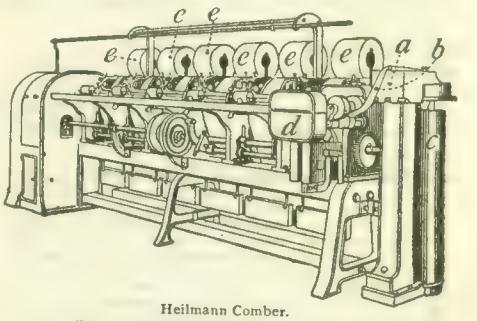
comb-bar (kōm'bär), *n.* In bobbin-net and lace-manufacture, an iron bar divided into a number of grooves, or combs, for guiding the thread-bobbins in forming the lace meshes. Also called a *conducting-bar*.



comb-basket (kōm'bas″ket), *n.* In *bee-keeping*, a receptacle for the combs in a honey-extractor.

comb-bucket (kōm'buk″et), *n.* In *bee-keeping*, a wooden bucket with a tight-fitting lid, used in transporting frames filled with honeycomb from the hives to the building where the combs are uncapped and the honey extracted.

comb-cylinder (kōm'sil″in-dėr), *n.* A revolving cylinder which performs the chief part of the combing process on a cotton-combing machine.



combed, *a.* 2. In *geol.*: (*a*) a term applied to prismatic crystals, especially of quartz, which grow toward each other from opposite walls of a fissure and interlock: used chiefly in describing mineral veins. Also *comb-in-comb*. (*b*) Surmounted by a sharp edge or comb.

comber[1], *n.* 3. A machine for combing cotton, wool, and other textile fibers.—**Alsatian comber**, a recent improvement of the Heilmann principle of cotton-comber, whereby the fluted segment is abolished and the nip and feed apparatus has a movement toward the detaching rolls, which permits an increased production to be passed through these rolls at each revolution of the cylinder.—**Bourcart's comber**, a cotton-combing machine having two sets of combs, which, with the necessary appliances, enable the machine to run at an increased speed for an increased production.—**Heilmann comber**, a machine used chiefly for combing cotton, to be used in the finer qualities of yarn, by means of nipping and combing devices that lay the fibers, of uniform length, parallel to each other for a continuous and even sliver. It was invented by Josué Heilmann of Mülhausen, Alsace, to whom an English patent was granted in 1846. It is substantially the same to-day as when first invented, the improvements being confined to mechanical details.

Noble Wool-comber.

a, conductors or boxes; *b*, *b*, *b*, *b*, creel-rolls; *c*, dabbing-brush; *d*, stroker or divider; *e*, coiler.

Heilmann Comber.

a, coiler; *b*, sliver; *c*, sliver-can; *d*, draw-box; *e*, lap.

comber-board (kō'mėr-bōrd), *n.* A perforated board, on a Jacquard loom, for keeping the harness-cords separate and in position.

comber-lap (kō'mėr-lap), *n.* A ribbon or web of cotton prepared for the operation of combing on a combing-machine.

comb-fish (kōm'fish), *n.* A name given in British Guiana to the saw-fish, *Pristis pectinatus*, one of the thick-tailed rays, having the rostrum produced and armed with spines at the edges.

comb-flower (kōm'flou″ėr), *n.* The purple cone-flower or black-sampson, *Brauneria purpurea*, so called from the stiff and sharp comb-like chaff of the receptacle. The name is extended to other species of the genus. The dry heads with persistent chaff are called *combs*.

combinantive (kom'bi-nan-tiv), *a.* [*combinant* + *-ive*.] Belonging to or like a combinant. *Sylvester*, 1853.

combinate, *a.* 2. Combined.

A work . . . thoughtfully planned out, so as to be wrought . . . by *combinate* minds, could never possess, if accomplished singly, the . . . character and intentions of its original designers.

Mrs. Browning, Letters to R. H. Horne, II. 110.

combination, *n.* **6.** At ball-pool, a designed shot by which a cue-ball makes one or more object-balls drive another into a pocket; at ordinary billiards one that similarly effects a carom or pocket.—**7.** In lace-manufacture, a complex arrangement of threads.—**8.** Same as *combination-room.*—**9.** Same as ★*combination garment.*—**10.** Specifically, in *organ-playing*, whatever stops are drawn for use in a particular piece or passage, or the tonal effect thus produced. The process or art of choosing the stops to be used is *registration*, but each particular choice is a *combination.*—**Back combination,** in *photog.*, that portion of a doublet lens which is situated nearest the focusing-screen.—**Combination and double-action die.** See ★*die*[3].—**Combination bearing.** See ★*bearing.*—**Combination bevel.** See ★*bevel.*—**Combination button** or **piston,** in *organ-building*, a push-knob belonging to some one section of the instrument, and usually placed just below its keyboard, by pushing which a stop or combination of stops for that keyboard can be called into action. If there is a series of such pistons, pushing one releases any previously in operation, and all can be released by a special piston called the *release.* The mechanism is either pneumatic or electric. Sometimes it actually moves the stop-knobs, in which case the combination not only replaces that previously obtained by the latter, but may subsequently be modified by drawing or retiring them; but sometimes the piston action does not affect the stop-knobs, in which case, if the piston is released, the combination through the knobs is reinstated. In some organs the combination secured by a particular piston is fixed, but in others it is adjustable in various ways according to taste. Compare *combination pedal* and *composition pedal.*—**Combination by volume,** in *chem.*, combination considered in respect to the definite volumes or bulks of substances in the gaseous state which are found to unite, and the definite volumes of the resulting compound substances when also gaseous, such volumes being compared under the same conditions of temperature and pressure. The volumes of solids and liquids which combine have also been studied, but do not exhibit relations of the same definiteness and simplicity.—**Combination by weight,** in *chem.*, combination considered with reference to the definite weights, or more properly masses (quantities of matter), of the substances which are found to combine with each other. See *law of equivalents,* under *equivalent, n.*—**Combination car, chock, die.** See ★*car*[1], *chock*[1], ★*die*[3].—**Combination garment,** a close-fitting undergarment consisting of undershirt and drawers woven in one piece. Also called a *union suit.*—**Combination laws,** certain British laws, both statute and common, directed against combinations of masters as well as of workmen: repealed in 1824.—**Combination light, scales, spring, tannage.** See ★*light*[1], etc.—**Theory of combinations,** the part of algebra which treats of the different arrangements of a number of objects or symbols into groups of a given nature.

Combinational distribution. See ★*distribution.*

combinatoric (kọm-bī-nạ-tor′ik), *n.* [*combinator-y* + *-ic.*] The theory of the formation, enumeration, and properties of the combinations, permutations, partitions, and variations of a finite number of elements according to different given conditions.

comb-in-comb (kōm″in-kōm′), *a.* Same as ★*combed,* 2.

combine, *v. i.*—**Combining weights,** in *chem.*, the relative quantities of different substances which are found to combine with each other: as, 35.18 parts of chlorin and 22.88 parts of sodium, or quantities in this proportion, are required to produce common salt.

combing-needle (kō′ming-nē″dl), *n.* One of a series of graduated needles which form the comb of a cotton-combing machine. They are attached to a cylinder known as the combing-cylinder.

combining-tube (kọm-bī′ning-tūb), *n.* The tapering tube or channel in the injector for feeding boilers, within which the feed-water meets the energizing steam-jet and combines with the latter. In the injector this combining-tube is convergent in section; in the ejector it is a divergent orifice.

comb-rib (kōm′rib), *n.* The meridional swimming-organ of a ctenophore, from which it derives its name.

comb-roller (kōm′rō″lėr), *n.* A roller having projecting teeth of radial or curved wire, to act upon fibers (as of cotton) and cause them to lie straight and parallel for the next process: used in spinning-machinery.

comb-segment (kōm′seg″ment), *n.* A section of the combing-cylinder of a cotton-combing machine. There are usually two segments, the needle and the fluted: the object of the former is to comb the fibers, and that of the latter to enable a tuft of cotton to be detached after it has been combed, and to aid in attaching it to the previously combed sliver.

comb-spring (kōm′spring), *n.* A series, or one of a series, of parallel springs attached to and projecting from a supporting base like comb teeth.

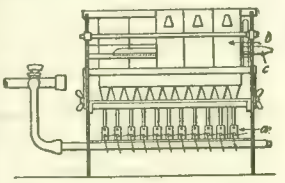
comb-stock (kōm′stok), *n.* The barrel or cylinder to which are attached the combing-needles of a cotton-combing machine. *Nasmith*, Cotton Spinning, p. 152.

comburent (kom-bū′rent), *a.* and *n.* [L. *comburens,* ppr. of *comburere,* burn up: see *combust.*] **I.** *a.* Supporting combustion.

II. *n.* Anything that supports combustion.

combust, *v. t.* **2.** To burn up or consume with fire. *Caxton.*

"Good Lord, you don't suppose that I would go spontaneously *combusting* any person?"



Dickens, Bleak House, xxxiii.

combust, *a.*—**Combust way,** in *astrol.*, the space in the second half of Libra, and through the whole of Scorpio.

combustion, *n.*—**Heat of combustion.** See ★*heat.*—**Isothermal combustion,** combustion which takes place at a constant temperature, or without change of temperature.—**Spontaneous combustion.** Besides the rapid oxidation, beginning at common temperature and leading to heating and ignition, of such materials as greasy rags, the pyrites of coal, etc., spontaneous combustion is in some cases exhibited by substances, such as zinc-ethyl and cacodyl, for which the temperature of ignition lies at or below the common temperature of the air, and which therefore take fire at once on coming in contact with atmospheric oxygen.—**Supporter of combustion,** in *chem.*, the substance, usually gaseous, and in the most common cases oxygen gas, which is relatively electronegative in the union with production of heat and light (combustion or burning) of two substances, the other, relatively electropositive, being spoken of as the *combustible* or *fuel.*—**Surface combustion process.** See ★*process.*

combustion-chamber (kọm-bus′chọn-chām″bėr), *n.* A space, of relatively large cross-section, behind the furnace which must be traversed by the hot gases from a boiler-grate, and in which they will be thoroughly mixed with oxygen and have an opportunity to burn completely. It is usually a chamber into which the gases pass directly from the fire-box.

combustion-furnace (kọm-bus′chọn-fėr″nās), *n.* The heating apparatus used in chemical laboratories in carrying out the usual process for the ultimate analysis of an organic substance by subjecting it to complete combustion and collecting the products. As originally devised by Liebig, it consisted of a trough of sheet-iron in which charcoal was burned; at the present day it usually consists of one or more rows of gas-jets with separate stop-cocks, serving to heat the tube of hard glass, or of platinum, in which the combustion is effected.—**Bunsen's combustion-furnace,** a form of heating-apparatus especially designed for the ultimate analysis of organic substances. From 10 to 20 Bunsen burners in line, each provided with a stop-cock and with an air-regulating slide, serve as the source of heat. The combustion-tube or other apparatus to be heated is supported in an iron trough lined with asbestos, while fire-clay tiles inclose it and form a chimney, confining the heat to the space about the tube. A high temperature is thus obtained.

Bunsen's Combustion-furnace.

a, Bunsen burners; *b*, tiles; *c*, combustion-tube.

combustion-tube (kọm-bus′chọn-tūb), *n.* A tube of hard (Bohemian) glass, infusible except at high temperatures, in which substances are subjected to heat, as in ultimate analysis.

comby (kō′mi), *a.* [*comb*[1] + *-y*[1].] **1.** Like a comb; specifically, in *geol.*, applied to banded mineral veins some or all of whose layers consist of thickly set, parallel prismatic crystals in section resembling a comb. *Geikie*, Textbook of Geol., p. 814.—**2.** Like a honeycomb; honeycombed; having many cavities.

comdt. An abbreviation of *commandant.*

comedist (kom′ẹ-dist), *n.* [*comed-y* + *-ist.*] A writer of comedies. *Athenæum.*

comedy, *n.* **5.** A narrative poem: applied to the *Divina Commedia* ('Divine Comedy') of Dante. See *Dante* and *Divina Commedia* in the Cyclopedia of Names.—**Light comedy,** a humorous and refined play with a more or less complex plot and a happy ending, representing events, situations, and scenes in ordinary life.—**Low comedy,** a broadly humorous or 'droll' comedy with no particular plot and tending to farce.

come-hither (kum-hiᵺ′ėr), *n.* [Also dial. *commither, comither, commether, comether, comother,* etc.] **1.** A persuasive call to a child or an animal. Compare ★*comether.*—**2.** A call to a horse to come toward one: usually to the left side, where the carter walks when driving without reins. [Prov. Eng. and Scotch.]

comendite (ko-men′dīt), *n.* [*Comende* on the island of San Pietro, S. W. coast of Sardinia, + *-ite*[2].] In *petrog.*, a name given by Bertolio (1895) to a variety of rhyolite with ægirite, arfvedsonite, or riebeckite.

comenic (ko-men′ik), *a.* [A metathesis of *meconic.*] Derived from meconic acid.—**Comenic acid,** a bibasic acid, $C_6H_4O_5$, obtained by boiling meconic acid with water or with hydrochloric acid.

come prima (kō′me prē′mä). [It.: *come,* as, < L. *quo modo,* in what manner; *prima,* at first, before, < L. *primā,* abl. fem. of *primus,* first: see *prime.*] In *music*, as at first: a direction for repetition.

comer, *n.* **2.** In *stock-raising*, an animal that is 'coming on' or promises well.

He has made good growth since he came before the public as a feature of the Nave dispersion, and still shows that remarkable looseness and elasticity of hide that indicates a "*comer*" when he is put next to the feed-box. *Rep. Kan. State Board Agr.*, 1901–1902, p. 202.

comes, *n.* **5.** In *astron.*, a small companion star in any double, triple, or multiple 'system.'

come sopra (kō′me sō′prä). *n.* [It.: *come,* as; *sopra,* < L. *supra,* above.] In *music*, as above: a direction for repetition.

comet, *n.* **1.** Comets are doubtless visitors, and not members of the solar system in any such sense as are the planets. Until recently it was believed that they come from interstellar space; but from the facts that hyperbolic orbits are extremely rare, and that there is no distinct arrangement of their orbits relative to the direction of the sun's motion in space, it now appears nearly certain that they originate in clouds of matter which partake of that motion, remote, outlying remnants of the huge nebula within which the solar system is supposed to have been developed. The distance from which they descend and to which they return is, however, generally so great that their orbits, though really elliptical, cannot be distinguished from parabolas in the part near the sun. The orbits of short period (Jupiter's comet-family for instance) are in all probability due to the capture of comets passing near one of the larger planets under such conditions that their speed is retarded, while the few hyperbolic orbits are explained by planetary encounters under the less frequent conditions which produce acceleration. The dimensions of comets are enormous: none less than 10,000 miles in diameter are recorded, and some have considerably exceeded the size of the sun itself. Their mass,

Borrelly's Comet of 1903.

From photographs made at the Yerkes Observatory. The two lower figures show the remarkable changes in the comet's tail which took place during about four hours on the night of July 24.

on the other hand, is relatively insignificant, as is demonstrated by the fact that in certain cases, when they have passed so close to a planet as to suffer violent perturbation and even disruption, the planet itself and its satellites have shown not the slightest effect from the encounter. The mean density of comets must therefore be extremely low,—comparable with that of the best artificial vacuum. But it does not follow that they may not contain dense particles of stone, or even iron, widely diffused in rarefied gas: indeed this is probable from the ascertained connection between comets and meteors, and from certain spectroscopic phenomena. While reflecting sunlight to some extent, the comet is also self-luminous with a light in some way excited by its approach to the sun, though not by simple heating. The spectrum is always mainly gaseous, and is usually marked by four bright bands identical with those shown by the blue cone of a Bunsen burner flame: there are, however, occasional exceptions, and when a comet has passed very near the sun, as in 1882, the bright lines of various metals have appeared in the spectrum. The gaseous spectrum must not be regarded as showing that the gas is the principal constituent of the comet's mass, but only that it is the one which is most conspicuously luminous; nor must it be taken as necessarily indicating a flame-like temperature: it is much more probable that the temperature is low, and that the gas shines by luminescence rather than by heat. While the tail of a comet is due mainly to solar repulsion, there is also distinct evidence of forces acting from within the comet itself, excited by the nearness of the sun. The tail often consists of a narrow stream or streams emanating from the comet's head, and this type is perhaps more frequent than the horn-shaped cone which envelops the head and widens out behind it, shown in the figure under *comet.* As to the energy which acts against gravitation and drives off the materials of the train, it is likely that several forces coöperate, namely, the recently dem-

onstrated repulsive power of light-waves upon minute particles, the action of electrified corpuscles and 'ions' liberated from intensely heated surfaces, and the influence of 'radioactive' substances presumably abounding in the sun: all these and others still are conceivable and not improbable. Photography promises much in the study of these bodies, and has already brought out many interesting facts. The light of comets is strongly actinic, and the photograph reveals much which the telescope utterly fails to show.

5. In *photog.*, a comet-shaped defect appearing on gelatin dry plates. *Woodbury*, Encyc. Dict. of Photog., p. 132.—**Biela's comet.** A short-period comet discovered by Biela in 1826, the second of its class. Its period is 6.6 years. In 1846 it separated into two, and has not been seen since its reappearance in 1852. The Andromedid or Bielid meteors, appearing in occasional meteoric showers about the 20th to the 23d of November, travel in its orbit, and are supposed to be the products of its disintegration.

Cometary nebula. See ★*nebula*.

comet-family (kom'et-fam″i-li), *n.* A number of periodic comets which have orbits that nearly intersect the orbit of one of the larger planets and are supposed to have been captured on some past occasion of near approach, their orbits having then been transformed from parabolas to ellipses. Jupiter's comet-family comprises nearly thirty members with periods ranging from three to eight years. Saturn is credited with two, Uranus with two, and Neptune with six.

comet-group (kom'et-grōp), *n.* A number of comets which, though certainly distinct, have orbits almost identical, and are presumed to have had a common origin. Four or five such comet-groups are recognized, the most remarkable of which is composed of the great comets of 1668, 1843, 1882, and 1887, all of which passed extremely near the sun.

comether (kọ-meᵺH'ėr), *n.* [Also *comedher, commither;* a dial. pronunciation of *come hither*, used in coaxing children, cows, horses, etc.: see ★*come-hither*.] **1.** Used in the phrase 'to put one's (or the) comether on (a person),' that is, to subject him to coaxing or wheedling; to win him over by flattery or persuasion, beguile him. [Prov. Eng. and Irish.]

How does ut come about, sorr, that whin a man has put the *comether* on wan woman he 's sure bound to put ut on another? . . . An ye thought ye 'd put the *comether* on her. *R. Kipling*, Courting of Dinah Shadd, ii.

2. Friendly intercourse. [Irish.]—**3.** Matter; affair. [Irish.] *Eng. Dial. Dict.*

cometoid (kom'e-toid), *a.* and *n.* **I.** *a.* Resembling a comet.

II. *n.* A name proposed in 1805 (but never adopted) for the asteroids, on account of their eccentric orbits.

comet-seeker, *n.* **2.** An astronomer who makes a specialty of seeking comets.

comforter, *n.*—**Job's comforter.** (*a*) One who (like Job's three friends), while professing to comfort and console a friend in affliction, really makes matters worse by argumentative fault-finding, or the like. (*b*) A boil: in allusion to those with which Job is supposed to have been afflicted. [Colloq. in both uses.]

Com.-in-Chf. An abbreviation of *Commander-in-chief*.

comitative (kom'i-tā-tiv), *a.* [NL. **comitativus*, < L. *comitatus*, accompaniment: see *comitatus*.] **1.** That serves to express accompaniment, association, or connection; associative.

A small number of adverbial prefixes are found only in combination with other elements. Thus: . . . (*b*) The *comitative* prefix *sa*, used instead of the preposition *sâm*, and exchangeably with *sahâ*, before nouns and adjectives.
Whitney, Sanskrit Grammar, p. 364.

2. In *gram.*, noting the case expressing companionship (with). Also as a noun. *Amer. Anthropologist*, Jan.–March, 1903, p. 26.

comiteco (kō-mi-tā'kō), *n.* [Mex. Sp.] A stimulating liquor distilled from a species of agave. [Mexico.] *Sci. Amer. Sup.*, Dec. 12, 1903, p. 23365.

comitium (kọ̄-mish'i-um), *n.* [L.: see *comitia*.] In *Rom. hist.*, the meeting-place of the comitia (which see).

comitiva (kō-mi-tē'vä), *n.* [It., a party, for **comitativa*, < L. *comitatus*, a company: see *comitatus*.] An organized band of brigands or of lawless people. [Southern Italy.]

comi-tragedy (kom-i-traj'e-di), *n.* [*comi*(*c*) + *tragedy*. Cf. *tragicomedy*.] A tragedy with a comic element in it.

I know no better method . . . than . . . quoting . . . a passage in which he transfers the whole *comi-tragedy* from Italy of old to England in 1861.
Kingsley, Roman and Teuton, Lecture ii.

Comley sandstone. See ★*sandstone*.

comm. An abbreviation (*a*) of *Commander;* (*b*) of *commentary;* (*c*) of *commerce;* (*d*) of *commonwealth*.

Comma degeneration, progressive degeneration of the nervous substance comprising the comma tract.—**Comma tract,** a tract of white nerve-fibers found within the posterior external column of the spinal cord.—**Gray comma,** an American nymphalid butterfly, *Polygonia progne*, found in the northeastern United States and Canada. Its larvæ feed on the elm, currant, and gooseberry.—**Green comma,** an American nymphalid butterfly, *Polygonia faunus*, common in the northern United States and Canada. Its larvæ feed on the alder, willow, black birch, currant, and gooseberry.

command, *n.*—**9.** In *whist* and *bridge*, the best card of a suit, usually of one which the adversaries are trying to establish.

commandeer (kom-an-dēr'), *v. t.* [D. *commandeeren*, < F. *commander*, whence E. *command*, *v.*] **1.** To order (the enrolled militia) into active military service: originally with reference to the late Dutch republics of South Africa, which were charged with forcing aliens also into the military service.

The naïve claims put forward by the Boers to some special Providence—a process which a friendly German critic described as "*commandeering* the Almighty."
A. Conan Doyle, Great Boer War, xiii.

2. To seize private property for military or other public use.—**3.** To seize public or private property for private use, under color of military necessity or right; steal from a helpless victim. [Humorous.]

However, we were able by using the *commandeered* property of the Boer frau, to produce a newspaper of pretentious size and considerable importance.
J. Ralph, in War's Brighter Side, p. 52.

commandeer (kom-an-dēr'), *n.* The act of commandeering.

"So here's my bloomin' health," says he; "I'm on the *commandeer*."
And without another word he commandeered it.
War's Brighter Side, p. 157.

commando, *n.* **2.** The enrolled militia of an electoral district in the late Dutch republics of South Africa.—**3.** A unit of the Boer army commanded by an officer whose title was *Commandant*.

A messenger was also sent to warn the Fauresmith *commando* of 400 to 500 men, which was approaching the town, that they had better disperse.
J. Ralph, in War's Brighter Side, p. 90.

To go on commando, to take the field or join an armed force in the field.

We sailed *upon commando*
To vierneuk our Brother Boer—
A landlord and a Protestant,
What could the bhoys want more?
R. Kipling, The Friend, in War's Brighter Side, p. 136.

commelinaceous (ko-mel-i-nā'shius), *a.* Of, pertaining to, or having the characters of the *Commelinaceæ*.

commensally (ko-men'sal-i), *adv.* In the manner of a commensal.

commerce, *n.*—**Bureau of Foreign Commerce.** See ★*bureau*.—**Interstate commerce law.** See ★*law*1.

commerce-destroyer (kom'ėrs-des-troi″ėr), *n.* A type of cruiser designed with special reference to the destruction of an enemy's commerce. It has high speed and coal endurance, with comparatively weak offensive and defensive powers.

commerce-destroying (kom'ėrs-des-troi″ing), *n.* The systematic pursuit and capture of merchant vessels of the enemy, by armed cruisers especially devoted to this purpose. It is the modern equivalent of privateering, which has been abolished among civilized nations.

The advantage of geographical nearness to the enemy, or to the object of attack, is nowhere more apparent than in that form of warfare which has lately received the name of *commerce-destroying*, which the French call guerre de course. This operation of war being directed against peaceful merchant vessels which are usually defenceless, calls for ships of small military force.
Mahan, The Influence of Sea Power upon History, p. 30.

Commercial agency. See *mercantile* ★*agency*.—**Commercial botany.** See ★*botany*.—**Commercial geography.** See ★*geography*.—**Commercial pitch.** Same as *auction-pitch* (which see, under *pitch*1).

commercialism, *n.* **3.** A commercial custom or expression.

The excruciating *commercialism* 'Maria wrote Mrs. Inchbald' for 'wrote to Mrs. Inchbald' defaces almost every page. *Athenæum*, Mar. 3, 1883, p. 273. *N. E. D.*

4. The supremacy of commercial over moral considerations; regard for commercial or financial advantage only: as, *commercialism* in politics.

commercialist (kọ-mėr'shal-ist), *n.* A commercial person; an adherent of commercialism.

Heaven forbid that the clamour philosophizing *commercialists* should prevail!
Southey, Espriella's Letters, xxxviii.

commerciality (kọ-mėr-shi-al'i-ti), *n.* Commercial quality or spirit: as, "the *commerciality* of modern artists," *Pall Mall Gazette*, Oct. 4, 1889.

commercialization (kọ-mėr″shal-i-zā'shọn), *n.* [*commercialize* + *-ation*.] Conversion to commercial character or uses: as, the *commercialization* of the military railways of India or Russia.

commercialize (kọ-mėr'shal-īz), *v. t.*; pret. and pp. *commercialized*, ppr. *commercializing*. [*commercial* + *-ize*.] To render commercial in character, methods, or spirit; make a matter of trade.

Agriculture . . . has been . . . *commercialized*, and really a branch of trade.
J. Bryce, Amer. Commonwealth.

commerge (kọ-mėrj'), *v.*; pret. and pp. *commerged*, ppr. *commerging*. [L. *com-*, together, + *mergere*, drown, bury: see *merge*.] **I.** *trans.* To merge together; mingle.

II. *intrans.* To come together; coincide. *Carlyle*.

commergence (kọ-mėr'jens), *n.* The condition of mingling, particularly mingling of blood.

commers, *n.* See ★*kommers*.

commissary, *n.* **5.** [F. *commissaire de police*.] A superior officer of police in France. *Macaulay*.—**6.** A general store for supplying workmen in any large industry.

commissary-general, *n.* **2.** A chief commissary.

commission, *n.* **9.** In naval use, a period of active service of a war-ship, from the time she is put into commission until she is again out of commission. In the British navy this period is from 2 to 5 years. In the United States navy there is no fixed length of commission.

The commanding officer of one of these ships has stated "that they may go through a *commission* and never heel or roll more than one or two degrees."
White, Manual of Naval Arch., p. 245.

Commission of stamps, in *Eng. law*, the commissioners of inland revenue who had the care and management of the stamp-duties.—**International Polar Commission** a commission representing ten of the most important nations, appointed for the purpose of carrying out the proposition of Lieutenant Weyprecht, that there be at least one year of simultaneous meteorological, magnetic, and other physical work executed by all nations of the globe within the arctic circle. The period August 1st, 1882–Sept. 1st, 1884, was agreed upon for this work, and about twenty stations were occupied in the arctic region, and ten in the antarctic. All of the observations made have been published by the respective governments.—**Out of commission,** (*naval*), not in active service, as a war-ship laid up in ordinary, or in reserve without officers and crew: by extension, said of anything not in condition for use or not in working order.—**United States Commission of Fish and Fisheries.** See ★*Bureau of Fisheries*.

commission, *v. t.* **3.** To order, as a war-ship, into active service, or to place in commission with formal ceremony.

commissioner, *n.* **5.** A betting-broker at a race-track. [Slang.]—**Commissioner of array.** See ★*array*.—**Shipping commissioner,** an officer appointed by the circuit courts of the United States for a port of entry, whose duty it is to facilitate and superintend the hiring and discharge of seamen; to secure the presence on board at the proper time of the men employed, and to facilitate apprenticeship to sea-service, etc. The officer in the United Kingdom charged with these duties is called the *shipping-master*.

commissionership, *n.* **2.** The district under a commissioner.

If the Government is wise they will add to his *commissionership* the whole of the Kalahari desert.
Pall Mall Gazette, November 19, 1884.

Commissura aberrans, a band of commissural fibers crossing the epithelial roof of the third ventricle midway between the dorsal (hippocampal) and superior (habenular) commissures: present in *Lacertilia* and *Sphenodon*. The commissura aberrans indicates in the mesial plane the caudal limit of the attachment of the cerebral hemisphere to the rest of the neural tube. *G. E. Smith*.—**Commissura ansata,** fibers of nervous substance which pass across the optic chiasm between the tuber cinereum and the lamina terminalis cinerea.—**Commissura cruciata,** the decussating fibers of the optic chiasm.—**Commissura dorsalis,** a band of fibers, in or near the lamina terminalis, which extends into each hemicerebrum and ultimately enters the hippocampus. Som. have homologized this structure in the lower vertebrates with the rudiment of the fornix or callosum, or both.—**Commissura fornicis,** a term sometimes used to designate the fornix of the brain in mammals. The name has been provisionally applied by Wilder to a transverse band just ventrad of the crista fornicis. In the lower vertebrates it is identical with the *commissura aberrans* of Smith.—**Commissura habenularum,** a band of fibers passing transversely in the roof of the third ventricle near the anterior peduncles of the epiphysis. The peduncle is known as the habena or habenula. The commissure takes its name from its position adjacent to the habenulæ. Also called *superior commissure* and *supra commissure*.—**Commissura ventralis,** a band of fibers, in the lamina terminalis, which extend into the corpora striata. In many forms some of the fibers pass in a posterior direction, and the two divisions of this commissure are termed, respectively, the *olfactory* and *temporal* portions. It is synonymous with *anterior commissure* and *precommissure*, the latter terms being more commonly used in connection with the higher vertebrates. Also applied to the anterior commissure of the spinal cord.

commissure, *n.*—**Arcuate commissure.** Same as *Gudden's* ★*commissure*.—**Gudden's commissure,** a bundle of nerve-fibers, at the posterior part of the optic

chiasm, running along the mesial side of the optic tracts to join the internal geniculate bodies of the two sides. Also known as the *inferior* or *arcuate commissure*.—**Hippocampal commissure**, a term sometimes used to indicate the fusion of the hippocampi on the median line to form the fornix. In the lower vertebrates it is synonymous with ★*commissura fornicis* and ★*commissura aberrans*. Some have homologized it with the ★*commissura dorsalis*.—**Inferior commissure**. Same as *Gudden's* ★*commissure*.—**Postchiasmatic commissure**, a band of fibers immediately posterior to Gudden's commissure. It is closely applied to the optic chiasm and appears to give fibers to it: described by Edinger in reptiles and by Boyce and Warrington in birds.—**Superior commissure**. Same as ★*commissura habenularum*.—**Supra-infundibular commissure**, a bundle of fibers situated near the caudal attachment of the infundibulum to the brain. It appears to arise in the lateral walls of the third ventricle.

commit[2] (kom'it), *n.* [Said to be a mistaken form for the F. *comète*, comet. The game was invented during the appearance of Halley's comet, and the idea of the game is that of a string of cards forming a tail to the one first played.] A game of cards. The eight of diamonds is thrown out of a full pack. Cards are dealt out one at a time as far as they will go, any remaining being left on the table for stops. The eldest hand leads, and every card in sequence and suit with it must come in order, the play being much the same as in newmarket (which see), the first to get rid of all his cards winning the pool.

commodatum (kom-ō-dā'tum), *n.* [ML.: see *commodate*.] In *law*, a kind of bailment in which property is loaned to another to be returned without compensation for its use.

commodo (kom'ō-dō), *a.* [It., easy, moderate: see *commodious*.] In *music*, easy or moderate, as in *a tempo commodo*, in moderate time.

Common counts. See ★*count*[1].—**Common feeling**, in *psychol.*, the general feeling of bodily comfort or discomfort, which is conditioned mainly upon the mass of organic sensations that constitute the background of consciousness. See *cœnesthesis*.

> The *common feeling* is always the immediate expression of our sensible comfort and discomfort, and is therefore, of all our composite feelings, most closely related to the simple sense-feelings.
> *W. Wundt* (trans.), Outlines of Psychol., p. 161.

Common traverse. See ★*traverse*.

commonage, *n.* 3. The commonalty.

> The whole baronetage, peerage, *commonage* of England.
> *Thackeray.*

common-law marriage. See ★*marriage*.

communal, *a.* 3. Of or pertaining to the commune of Paris (which see, under *commune*[2]).—**Communal forest.** Same as *town* ★*forest*.—**Theory of communal intensity.** See ★*intensity*.

communality (kom-ū-nal'i-ti), *n.* [ML. **communalitas*, < *communalis*, common: see *communal* and commonalty.] The condition of belonging to a community.

> Finally the material sacrifice commonly leaves dependents (widows, children, and perhaps agelings) to be supported by the informal public bounty of tribal life, or perhaps to be distributed among scattered families in such manner as to strengthen sentiments of *communality* and to keep alive the sense of community in interests.
> *Smithsonian Rep.*, 1901, p. 76.

communalization (kom″ū-nal-i-zā'shon), *n.* [*communalize* + *-ation*.] The act of communalizing or of rendering communal; specifically, the abolition of private ownership in certain kinds of property in which the public is interested, such as land, water, light, etc., and the vesting of it in the commune or local community for the common good; the conversion of private ownership and management into communal ownership and management.

communalize (kom'ū-nal-īz), *v. t.*; pret. and pp. *communalized*, ppr. *communalizing*. 1. To render communal; to convert into municipal property, as water-works, street railroads, etc. —2. To convert to a belief in communal ownership and initiative.

communalizer (kom'ū-nal-ī-zėr), *n.* One who advocates or favors the communalization of land and some other kinds of property in which the general public is interested.

communicant, *a.* 2. In *anat.*, same as *communicating*; noting one of several nerves or arteries. *Buck*, Med. Handbook, II. 251.

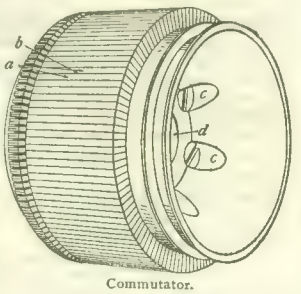
communication-room (kọ-mū-ni-kā'shon-röm), *n.* In a war-ship, a compartment with sound-proof walls below the protective deck, containing a steering-wheel, the switchboards for telephones and speaking-tubes, and engine and steering telegraphs, which forms a central station for the interior signaling apparatus and other means of communication throughout the ship.

Communion in both kinds, the reception of the sacrament of the eucharist under the forms of both bread and wine.

communionist (kọ-mū'nyọn-ist), *n.* Same as *communicant*.

communistery (kom-ū-nis'tẹ-ri), *n.* A communist habitation. *N. E. D.*

communitive (kọ-mū'ni-tiv), *a.* [Irreg. < *communit-y* + *-ive*.] Of or belonging to a community. *N. E. D.*



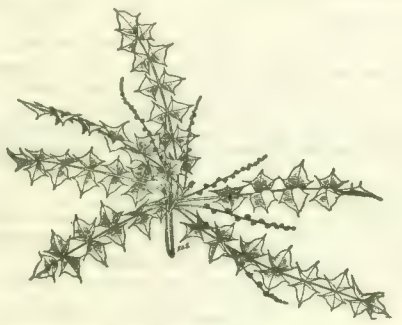
communitorium (kọ-mū-ni-tō'ri-um), *n.*; pl. *communitoria* (-ä). [*communit-y* + *-orium*.] The home of a (socialistic) community; a settlement on communistic principles. *N. E. D.*

communization (kọ-mū-ni-zā'shọn), *n.* [*communize* + *-ation*.] The making of anything the public property of the community.

communize (kọm'ū nīz), *v. t.* [L. *communis*, common, + *-ize*.] To make common; make (something) the property of the community. *N. E. D.*

commutate (kom'ū-tāt), *v. t.*; pret. and pp. *commutated*, ppr. *commutating*. [L. *commutatus*, pp. of *commutare*, change: see *commute*.] To change; commute; specifically, to change the direction of, as an electric or magnetic circuit, or part of a circuit.

commutator, *n.* 3. In *elect.*, that part of a continuous-current dynamo-electric machine which, by revolving in contact with the brushes, turns or directs the electrical actions in the armature coils of the machine so as to make the current and the voltage in the external circuit continuous. It usually consists of a large number of copper bars, connected with the armature coils of the machine, and separated from each other by mica insulation.



Commutator.
a, commutator bars; *b*, mica insulation; *c*, clamping-screws; *d*, shaft-hole.

4. In *photog.*, a device for automatically effecting the exposure of a number of photographic plates at various predetermined instants during a total eclipse of the sun. *D. P. Todd*, in Rep. Brit. Ass'n Advancement of Sci., 1901, p. 541.

commutual, *a.* 2. Contiguous; adjoining; noting, in *anat.*, two surfaces in apposition or nearly so.

Comocladia (kō-mō-klā'di-ä), *n.* [NL. (Patrick Browne, 1756), < Gr. *κόμη*, hair, foliage, + *κλάδος*, shoot, branch.] A genus of plants of the family *Anacardiaceæ*. They are shrubs or trees, with odd-pinnate leaves, clustered toward the ends of the branches, the leaflets usually mucronatedentate. The flowers are minute and are disposed in axillary panicles nearly as long as the leaves. There are about ten species, natives of the West Indies and Central America. The fruits of *C. integrifolia* and *C. dentata* furnish a black dye. The abundant glutinous juice of *C. ilicifolia* and other species which turns black on exposure to the air, is poisonous to the touch.

Comocladia ilicifolia, a branch bearing leaves and spikes of minute flowers (reduced). (From Engler and Prantl's "Pflanzenfamilien.")

comoid (kō'moid), *a.* [Gr. *κόμη*, hair, + *εἶδος*, form.] Hair-like; resembling hair: in *meteor.*, noting the hair-like structure of some kind of cirrus clouds (mare's-tail cirrus).

comortgagee (cō-môr-gā-jē'), *n.* One of several parties to whom the same mortgage is made.

comospore (kō'mọ-spōr), *n.* (Gr. *κόμη*, hair, + *σπορά*, seed.] In *phytogeog.*, a plant whose seed or fruit is provided with hairs or bristles as a help to dissemination. *F. E. Clements.*

compact[1], *a.* 6. In *petrog.*, dense without pores: also applied to extremely fine-grained textures in which the individual crystals or grains cannot be seen by the unaided eye: equivalent to *aphanitic*, *cryptocrystalline*, and ★*cryptoclastic*.

companion[1], *v. t.*—**II.** *intrans.* To associate or keep company: used with *with*: as, to *companion* with vagabonds.

companionage (kọm-pan'yọn-āj), *n.* The whole body of Knights' Companions, or a list of them: as, "The Peerage, Knightage, Baronetage, and *Companionage* of the British Empire." (Title of a book.)

companion-cropping (kọm-pan'yọn-krop'ing), *n.* The practice of growing companion crops (which see, under ★*crop*).

companion-hatch (kọm-pan'yọn-hach), *n.* *Naut.*, a hatch fitted with companion-ladders for access to living quarters.

companion-ladder, *n.* 2. A sloping ladder with flat treads or steps, for passage from one deck to another.

company, *n.*—**Bearer company**, a company of soldiers whose duty is to remove the wounded from the battlefield.—**Catalan Grand Company**, a body of adventurers which Peter of Aragon brought into Sicily in 1282 against Charles of Anjou. In 1302 they entered the service of the Byzantine Emperor Andronicus against the Turks. When their chief Roger di Flor was assassinated in 1306, they abandoned the emperor and settled in the duchy of Athens, where they remained until the end of the fourteenth century.—**City company**, one of the corporations that historically represent the medieval trade and craft gilds of London.—**Company's rupee.** See ★*rupee*.—**One-man company**, a pretended association of several persons for the purpose of carrying on an enterprise which in reality is owned and controlled by a single person. *Encyc. Brit.*, XXVII. 177.—**Trust-company.** See ★*trust-company*.

company-boat (kum'pạ-ni-bōt), *n.* A guest-boat; a beamy gig having side-seats in the after half and an awning over the cockpit. It is used on English rivers.

comparascope (kom-par'ạ-skōp), *n.* [Irreg. < L. *comparare*, compare, + Gr. *σκοπεῖν*, view.] In *microscopy*, a device attached to an ordinary microscope for the simultaneous comparison of two slides.

comparator, *n.*, 1. The standards to be compared are usually metal bars with transverse lines ruled upon them, and it is the distance between these lines which is to be determined. In some cases the entire length of the bar constitutes the standard of length. The distances to be compared are usually very nearly equal in length, and the measurement to be made is of the small difference between them and not of the whole length of the standard. The comparator in the form commonly employed consists of a rigid bed or plate upon which the standard bar is placed in a horizontal position. Provision is made for the raising and lowering and lateral shifting of each end of the bar mechanically, and also for its longitudinal movement, so that it can be brought into perfect alinement under two microscopes mounted above it with axes vertical. The microscopes, which have micrometer eyepieces, are focused upon the rulings at the ends of the standard bar, with the cross-hairs in the eyepieces accurately set upon the lines. These adjustments made, the bar is removed without disturbing the microscopes, and the one to be compared with it is put in its place. When the ruling at one end is brought precisely under the cross-hairs, that at the other end will be somewhat out of coincidence on account of the inequality in the length of the bars. This small difference is measured by noting the revolutions of the micrometer-screw of the eyepiece necessary to bring the cross-hairs over the line. To provide for cases in which the inequality is such as to bring the line entirely out of the field, this microscope is sometimes so mounted that it can be moved longitudinally in the direction of the length of the bar and its motion measured by means of a micrometer-screw. For the comparison of standards in which the length to be determined is the entire length of the bar instead of the distance between transverse lines ruled upon its surface, various other devices of precision are used. In some comparators one end of the bar is placed against a rigid stop or plug, and a delicate micrometer-screw, mounted to run parallel to the axis of the bar, is turned until it comes into contact with the free end. The position of contact is sometimes indicated electrically. The optical lever or tipping mirror of Saxton is likewise employed for determining the position of the free end of the bar, the angular movement of the mirror being determined by means of a reading telescope and scale. The most refined and sensitive method for the comparison of lengths is doubtless that employed in the *interference comparator*, a modification of the interferometer due to Michelson, and by him employed for the study of the meter and the determination of that standard in terms of the wave-length of light. See ★*interferometer*.

2. A vessel in which liquid is kept rapidly stirred and at a uniform constant temperature so that thermometers immersed in it must all be maintained at the same temperature. Simultaneous readings of the secondary thermometers and the standard are made, and the corrections to the former are thus determined for a wide range of temperatures. —**Transfer comparator**, an instrument for comparing the distances between or over the ends of contact points on a gage to the distances defined on a standard bar.

comparison, *n.*—**Associative comparison**, in Wundt's psychology, a connection of two sensations, in which the quality of each is determined by its relation to that of the other: exemplified in the phenomena of visual contrast.—**Comparison of hands**, in *law*, the admission in evidence of writings otherwise irrelevant, solely for the purpose of determining by comparison whether a certain writing was written by a certain person.—**Comparison spectrum.** See ★*spectrum*.—**Method of paired comparisons**, in *experimental psychol.*, a form of the method of impression, employed in the study of the affective

processes. A number of stimuli—for example, colors—are prepared, and are presented to the observer two at a time, the pairs being so constituted that every color is given once along with every other. The observer declares which member of the pair before him is the more pleasant or the more unpleasant. The judgments are recorded. When the whole series has been worked through, the experimenter plots an 'affective curve': the abscissæ are the color stimuli, in serial order, and the ordinates represent the number of times that the particular colors have been preferred to their rivals. *E. B. Titchener*, Exper. Psychol., I. ii. 151.

comparison-star (kom-par'i-son-stär), *n.* A star of known position used as a reference-point from which to determine the position of some planet, comet, or other object near it.

compartment, *n.* **4.** A division or chamber in any part of a plant or of an animal.—**5.** In *forestry*, the unit of area treated in a working plan. The size and the shape of compartments are determined mainly by topographic features.—**Compartment line,** in *forestry*, the boundary of a ★compartment (which see). It may be marked by a road, a ride, or a natural feature, such as a stream or the crest of a ridge. In Europe, when other demarcation is wanting, clean cuttings upon narrow strips are made to mark the boundaries of a compartment. These are known as *rides*. A ride which separates two cutting series, and thus runs parallel to the prevailing wind direction, is called a *major ride*, while those rides which complete the demarcation of the compartments are known as *minor rides*.—**Compartment system.** See ★*stand method*.—**Wing-compartment,** one of a series of watertight compartments of a war-ship, formed between the outboard longitudinal bulkhead and the ship's side below the protective or lower deck.

compartmental (kom-pärt-men'tal), *a.* [*compartment* + *-al*[1].] Pertaining to or consisting of compartments; divided into compartments.

The cells may or may not be *compartmental*, the latter type predominating. The conditions favor the series connection of the electrodes.

Electrochem. Industry, July, 1903, p. 378.

compass, *n.* **11.** [*cap.*] In *astron.*, a small southern constellation.—**Compass caliper.** See ★*caliper*.—**Compass corrections** (*naut.*), the quantities (points or degrees) which must be applied to courses or bearings in order to obtain correct magnetic readings.—**Compass course,** the course steered by compass, independent of leeway, variation, deviation, currents, send of the sea, etc.—**Compensated compass,** a compass which has been corrected for deviation by the employment of magnets.—**Declination compass,** a compass arranged to measure the variation of the magnetic needle from the astronomical meridian.—**Demagnetized compass,** a compass the needle of which has lost its magnetism. Electric disturbances have been known to produce this effect.—**Dry-card compass.** Same as *dry* ★*compass*.—**Dry compass,** a compass which is inclosed in an air- instead of a liquid-chamber: also known as a *dry-card compass*.—**Elevated compass,** any compass that is elevated beyond the influence of the ship's iron, which, being more or less magnetized, is liable seriously to affect the pointing of the magnetic needle. Under this head are included *masthead*, *pole*, and *tripod compasses*.—**Hanging compass,** a tell-tale compass; an inverted compass; one that is suspended face downward from a deck beam.—**Liquid compass,** a compass the card of which is inclosed and completely submerged in a chamber filled generally with 35 parts of alcohol and 65 parts of distilled water, the freezing-point of the mixture being —10° F. Compasses used in arctic work have their bowls filled with pure alcohol. The disadvantage of undiluted alcohol is that it eats the paint on the card. The Germans have successfully used refined oil for their liquid compasses.—**Masthead compass,** a compass placed aloft at the lower masthead in order to elevate it above the influence of the iron in the ship's hull, deck-fittings, machinery, etc.—**Oil-compass,** a liquid compass the card of which floats in oil instead of in alcohol.—**Pole-compass,** a compass elevated above the deck on the end of a pole, access to it being had by means of a short ladder. It is supposed to be sufficiently high above the deck to be removed from the sphere of influence of the ship's iron.—**Solar compass,** an apparatus, invented by Burt in 1836, attached to a surveyor's theodolite, and enabling the observer to determine the true meridian by a simple setting of the sights upon the sun. In the later forms a small telescope is used instead of sights, and the apparatus is called a ★*solar attachment*, of which there are various forms.—**Spirit compass.** Same as *liquid* ★*compass*.—**Tripod-compass,** a compass so named from the three-legged stand on which it is elevated: a form of pole-compass.—**Weber's compass,** a form of esthesiometer.

compass, *v.* **I.** *trans.*—**7.** To grasp mentally; comprehend.

"Forebodings of ill . . . that cannot be *compassed*."

Longfellow.

8. To adjust or orient by means of a compass.

II. *intrans.* To level a compass.

compass-bearing (kum'pas-bār″ing), *n.* The direction of an object as indicated by a magnetic compass.

compass-error (kum'pas-er″or), *n.* Same as *deviation of the compass* (which see, under *deviation*).

compass-joint (kum'pas-joint), *n.* A joint having parallel and concentric disks permitting relative motion or opening in one plane, as in a drawing-compass.

compass-plant, *n.* **3.** In California, *Wyethia angustifolia* and other species, coarse composites with sunflower-like heads, whose large erect leaves are said to stand with their edges north and south. *M. E. Parsons*, Wild Flowers of California.— **4.** The prairie bird's-foot trefoil, *Lotus Americanus*, of the western United States, the numerous distichous branches of which are polarized on the stem after the manner of the leaves of other compass-plants.

Compass-plant (*Lotus Americanus*).
One fourth natural size.

We have then in this plant another example of a true *compass plant*, but involving an entirely different principle from that of *Silphium laciniatum* L., *Lactuca Scariola* L., etc., in which it is the leaves and not the branches that are affected.

Plant World, May, 1898, p. 118.

compass-rose (kum'pas-rōz), *n.* The ornamental diagram of a compass found printed on some charts.

compass-weed (kum'pas-wēd), *n.* A name of the prickly lettuce, *Lactuca Scariola*, and probably of any of the compass-plants. It is also applied to one of the button-weeds, *Diodia teres*, in allusion, perhaps, to its radiate habit.

compelled (kom-peld'), *p. a.* In *pathol.*, involuntary; compulsory: noting movements and attitudes in certain diseases of the central nervous system.

compellent (kom-pel'ent), *a.* [L. *compellens* (*-ent-*), ppr. of *compellere*, compel: see *compel*.] Compelling; compulsive.

And when we bear
Our virtue outward most impulsively,
Most full of invocation, and to be
Most instantly *compellant*, certes, there,
We live most life!

Mrs. Browning, Sonnet, Love, l. 6.

compendency (kom-pen'den-si), *n.* [NL. **compendentia*, < **compendens*, hanging together: see *compendent*.] In *math.*, connectivity.

This doctrine of the *compendency* of surfaces is a creation of Riemann's.

W. B. Smith, Modern Geometry, p. 145.

compendent (kom-pen'dent), *a.* [NL. **compendens* (*-ent-*), ppr. of **compendēre*, hang together, < *com-*, together, + *pendēre*, hang.] Connected; closed.

The straight is thus a closed line *compendent* through its point at infinity.

Merriman and Woodward, Higher Mathematics, p. 73.

compensated (kom'pen-sā-ted), *p. a.* Adjusted so as to neutralize or balance differences or deviations; as a compensated balance or pendulum.—**Compensated alternator.** See ★*alternater*.—**Compensated constant-pressure gas-thermometer.** See ★*gas-thermometer*.—**Compensated motor.** See ★*motor*.

compensating (kom'pen-sā-ting), *p. a.* Adjusting so as to neutralize or balance differences; producing compensation; characterized by compensation; compensatory.

A *compensating* mixture of sweet and salt gives rise to an insipid, flat, alkaline taste.

E. B. Titchener, Exper. Psychol., I. ii. 110.

Compensating exciter. See ★*exciter*.—**Compensating compound wedge.** See ★*wedge*.

compensating-gear (kom'pen-sā-ting-gēr″), *n.* A device for connecting the two parts of a shaft in such a manner that one part can run at varying speeds relatively to the other part; specifically applied to the driving-device which connects the two parts of the driving-axle of a motor-car. This compensating-gear allows one wheel to travel further than the other in turning corners. Called also *differential gear* and *compensation-gear*.

compensation, *n.* **6.** In *pathol.*, an increase in functional power of some organ or part of an organ to make up for a defect in another organ or in another part of the same organ.—**7.** In *psychophysics*, the neutralization of a sensation by a stimulus process of a complementary or antagonistic kind.

The principle of smell *compensation* is familiar to us in everyday life.

E. B. Titchener, Exper. Psychol., I. ii. 131.

8. In *vegetable teratol.*, the occurrence of opposite abnormal conditions in different parts of the same plant, as an atrophied condition of one part associated with a hypertrophied condition of another. *Masters.*—**Compensation of functions,** in *neurol.*, the law or principle that inhibition of the activity of one region of the cerebral cortex is always connected with increased activity in the regions with

which it is interrelated. *W. Wundt* (trans.), Outlines of Psychol., p. 274.—**Compensation supply,** or **compensation water,** water held in reservoirs to be delivered in a river in compensation for water which is claimed by riparian owners.

The water supplied to the stream from such a reservoir is known as "*compensation* water," and is generally a first charge upon the works. *Encyc. Brit.* XXXIII, 771.

compensation-sac (kom-pen-sā'shon-sak), *n.* In certain polyzoans, a structure lying inside the body cavity, and communicating with the external water; regarded as the apparatus by which the protrusion and retraction of the polypide is effected. *Jullien.*

compensator, *n.* (*c*) In *elect.*, an autotransformer, frequently employed to compensate for variations of voltage. See ★*autotransformer*. (*d*) In *photog.*, an apparatus designed to render the illumination of a field uniform. It consists of a plano-convex lens of smoky glass, and a plano-concave lens, of equal curvature, of plain crystal glass so united as to make a thin glass with parallel sides. (*e*) In *optics*, a device for producing a known and measurable retardation of a beam of light. One of the simplest forms of compensator is that used by Jamin in making measurements with his refractometer. (See ★*interferometer*.) In this refractometer there are two parallel beams of light the difference of phase of which is to be determined. If these beams are made to pass through two similar glass plates, they will suffer equal retardation when the plates are parallel; but if one of the plates is turned through an angle, thus varying the distance through the glass traversed by the ray, the retardation will be increased. Jamin's compensator, fig. 1, consists of two such plates of glass mounted upon a common axis and making a small constant angle with one another. By rotation of these plates upon the axis, the relative retardation of the rays passing through them can be varied at will; and if the two rays, before traversing the compensator, differed in phase, this difference of phase can be reduced to zero by turning the compensator to the proper angle. From the size of this angle the original difference of phase can be computed. Senarmont's compensator consists of a quarter-wave plate, that is, a plate of crystal of such thickness that it introduces a difference of phase $\frac{\pi}{2}$ between the two components of a beam of light propagated through it. It has many uses in the study of polarized light, such as the determination of the principal axes of the vibration form of an elliptically polarized ray. Babinet's compensator consists of two wedges of quartz placed together as shown in fig. 2. In one of the wedges the optic axis is parallel to the face of the prism and perpendicular to its axis. The optic axis, *o*, of the other prism is parallel to its face and also to the axis of the prism. A beam of plane-polarized light reaching the compensator in a direction perpendicular to the surface *ab* will be resolved into two components. The component which is more retarded in passing through the upper wedge will be relatively less retarded in the lower wedge, and *vice versa*; and the difference of phase between the two components after passage through the compensator varies with the distance of its path from the central line. Soleil's compensator, which is used in Soleil's saccharimeter, consists of two wedges of quartz, cut perpendicular to the axis, which turn the plane of polarization of light in the same direction. The wedges are so mounted that they can be made to slide past each other along their common face and thus constitute a plate the thickness of which may be varied at will. The object and use of the compensator is to introduce any desired amount of left-handed rotation of the beam of light so as precisely to compensate for and thus measure the right-handed rotation of the sugar solution through which the light has previously passed. Kerr's compensator, which was used by him in his observations on the reflection of plane-polarized light from a magnetic pole, consists of a strip of glass which, when stretched, becomes doubly refracting. When interposed in the path of a ray of light elliptically polarized by reflection from the magnet, it could be stretched until the difference of phase of that ray was compensated or reduced to zero, and in this way the character of the polarized light produced by such reflection could be determined.

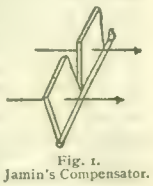


Fig. 1.
Jamin's Compensator.

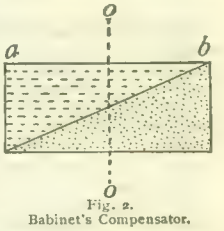

Fig. 2.
Babinet's Compensator.

Compensatory hypertrophy. See ★*hypertrophy*.

compete, *v. i.*—**2.** In *polit. econ.*, to engage in rivalry in the sale or purchase of a commodity or service; also, figuratively, of a commodity or service, to be open to choice as against some other commodity or service. Thus iron is said to compete with stone in the construction of buildings; water routes compete with railways in the handling of traffic.

competence, competency, *n.* **5.** In *phys. geog.*, the ability of a stream to transport the amount of land waste that is brought into it.

competent, *a.* **5.** In *phys. geog.*, of a stream, capable of transporting fragments of a given size.—**6.** In *geol.*, having sufficient firmness and strength to transmit pressure to other strata or to lift an overlying burden, as a rock or stratum.

competition, *n.* **4.** In *polit. econ.*, rivalry in the purchase or sale of a commodity or service: as, the *competition* of wage-earners lowers

wages; British merchants have to meet German *competition.*—**Competition price.** See ★*competitive price.*—**Competition rent,** rent determined by active competition on the part of landlords and tenants, as opposed to customary rent and monopoly rent.—**Potential competition,** a condition of things which would amount to actual competition were a particular change, such as a rise in price, to take place.

Competitive price, the price determined by active competition on the part of both buyers and sellers, as opposed to monopoly price and customary price.

compilatory (kọm-pī'la-tō-ri), *a.* Of or belonging to a compilator or compiler; connected with, or incident to, compilation: as, *compilatory* judgment; *compilatory* labors.

compile, *v. t.* **6.** To score, earn, 'pile up' (usually of a large number of runs). [Cricket slang.]

compital (kom'pi-tal), *a.* [L. *compitalis,* ‹ *compitum, competum,* a place where several ways meet, the cross-ways, ‹ *competere,* come together, meet: see *compete.*] **1.** In *Rom. antiq.,* belonging to the cross-ways. The *lares compitales* were domestic deities whose shrines stood on the street-corners.

2. In *bot.*: (*a*) Intersecting and crossing at various angles: said of the veins of leaves. (*b*) Situated at the point of junction of two veins; said of the sori of ferns.

complaisance, *n.*—**Operation of complaisance,** in *surg.,* an operation which is not urgently demanded to save life, and which therefore may be delayed until all the conditions are most favorable.

complanation, *n.* **2.** A flattening or flattening out: as, a crater of *complanation. Dana.*

complement, *n.* **8.** In *physiol. chem.,* same as ★*alexin.* See the extract.

Two principles are concerned in lysis. These principles are different in origin. One — that which is stable — is the product of immunization, and, on account of certain combining properties possessed by it, they call it the 'intermediary body.' The other is normally present in the body juices, but is easily destroyed by heat and tends to disappear spontaneously when the fluids are removed from the body This latter principle, on account of the complemental nature of its action, they [Ehrlich and Morgenroth] propose to call the *complement.* . . . This body is called 'alexin by Bordet, and probably agrees in part with the body of the same name described by Buchner. Metchnikoff calls it 'cytase.' *Jour. Exper. Med.,* VI. 282.

Complement of the humidity. See ★*humidity.*—**Deviation of the complement.** In the simultaneous presence of receptors, complements, and an excess of amboceptors the complements may be largely taken up by the amboceptors and prevented from acting upon the receptors.—**Phonetic complement.** See the extract.

The Assyrian scribes usually attached one or more phonetic characters to the ideographs they employed, in order to indicate their pronunciation in a given passage; but these *phonetic complements,* as they are termed, were frequently omitted in the case of well-known proper names, such as those of the native kings and deities.
A. H. Sayce, Anc. Monuments, p. 19.

complementarism (kom-plē-men'ta-rizm), *n.* The state or property of being complementary or antagonistic. *E. B. Titchener,* Exper. Psychol , I. ii. 15.

Complementary air. See ★*air*1.—**Complementary male,** in certain cirripeds and myzostomidan worms, a dwarf male that lives as a parasite upon the ordinary hermaphrodite individuals which appear to be unable to fertilize themselves.—**Complementary rocks,** a name suggested by Brögger (1894) for igneous rocks, found associated together in one locality, whose compositions are such that when they are combined they represent the magma from which they are supposed to have originated by processes of differentiation. Thus pyroxenite and anorthosite are complementary rocks whose combination is equivalent to gabbro.

complementative (kom-plē-men'ta-tiv), *a.* [*complement,* v., + *-ative.*] In *philol.,* serving to complement a notion or its expression: applied to certain verb forms in some agglutinative languages.

The highly agglutinating character of this language [the *Kuki-Lushai* of North Kachar Hills and parts of Nagaland] is evident from the numerous conjugations given by Mr. Soppit, for some of which he has no names, but which may be called Acceleratives, Retardatives, *Complementatives,* and so on. *Keane,* Man Past and Present, p. 185.

complementoid (kom-plē-men'toid), *n.* [*complement* + *-oid.*] In *physiol. chem.,* a complement (see ★*complement,* 8) which has lost its zymotoxic group, but retains the haptophoric group for the amboceptor.

complementophile (kom-plē-men'tō-fīl), *a.* [*complement* + Gr. *φιλεῖν,* love.] In *physiol. chem.,* having affinity for the complement (see ★*complement,* 8); noting that group of an amboceptor which unites with the complement.

If the two components are present in corresponding quantities the amboceptor will unite with the bacterium by its haptophore group, the complement will then fit into the *complementophile* group of the amboceptor and the bacterium will be destroyed.
Lancet, April 4, 1903, p. 943.

complementophilic (kom-plē-men-tō-fil'ik), *a.* Same as ★*complementophile.*

Complete hernia, etc. See ★*hernia,* etc.—**Complete perspectives,** in *geom.,* two figures such that to every point of one corresponds a point of the other, to every straight of the one a straight of the other, to every join of the one the join of the corresponding points of the other, and to every cross of the one the cross of the corresponding straights of the other.—**Complete reaction,** in *psychophysics,* the sensorial form of the simple reaction, in which the reactor's attention is directed upon the stimulus, and not upon the movement of response. *E. B. Titchener,* Exper. Psychol., I. i. 123.

completion, *n.*—**Equivalent by completion.** See ★*equivalent.*

complex, *n.*—**Cell complex,** a mass of closely united or intertwined cells, as in the case of certain fungi.—**Cosingular complexes,** such complexes as have the same singular surface.—**Fundamental complex.** Same as ★*basement complex.*—**Line-complex,** the assemblage of straight lines which satisfy one given condition, that is, of lines whose coördinates satisfy one equation of given form. Since a line has four coördinates, the lines of a line-complex are triply infinite, or ∞^3, in number.—**Pallial complex,** the mass of organs, including the gills, osphradia, nephric and genital ducts, which lie near one another in the mantle-chamber of gastropod mollusks and may be considered as an anatomical unit.—**Quadratic complex,** a complex in which the equation of the line-complex is of the second degree in the coördinates. The quadratic complex involves 19 constants.—**Tetrahedral complex,** the quadratic complex composed of the lines which meet the faces of a given tetrahedron in four points whose double ratio or cross ratio is constant. A tetrahedral complex is determined by its fundamental tetrahedron and by one of its lines or by the cross ratio of the complex. Since the fundamental tetrahedron may be chosen in ∞^{12} ways, there are ∞^{13} tetrahedral complexes.

complex (kom'pleks), *v. t.* [*complex, a.*] To combine intricately; involve; mix up.

Murdered thus
Mutatione vestium, in disguise,
Whereby mere murder got *complexed* with wile.
Browning, Ring and Book, viii. 1319.

complexion, *n.* **5.** In *psychol.,* a term proposed for a certain type of mental connection or association. See the extract.

The melody, e. g., is a *complexion.* It contains both the consolidating contents, the various notes played or sung, the members of the *complexion;* and the consolidated contents, i. e., the new factor that emerges when the notes are taken together, the unifying factor in the *complexion,* the 'taken-togetherness' itself, the unity of the new fund that cancels the old debts.
I. M. Bentley, in Amer. Jour. Psychol., XIII. 280.

complication, *n.* **6.** In *psychol.,* the simultaneous association of perceptions or ideas of different senses.

These connections of ideas of disparate senses which are referred to the same objects, and so belong closely together, we may term with Herbart *complications.*
W. Wundt (trans.), Human and Animal Psychol., p. 285.

Let us call the reproducing presentation *A,* and that with which it has been associated *B;* the reproduced presentation may be denoted by *b* . . . . When *b* is an integral part of *A* and incapable of independent existence, the process is called *complication,* because the result is merely a change in the constitution of *A,* and for the most part an increase in its complexity.
G. F. Stout, Manual of Psychol., p. 90.

Complication pendulum, in *exper. psychol.,* an instrument for presenting a series of visual stimuli any term of which may be accompanied by some disparate stimulus (sound, pressure, electric shock). The primary visual series is given with the movement of a clock-hand over the divisions of a dial; the complicating stimulus is thrown in, at the required moment, by a gear attached to the pendulum of the clock-work. The instrument was devised by Wundt for the study of attention: although the selected visual impression and its complicating sound, etc., are objectively coincident, they are not necessarily 'apperceived' as coincident; there may be a 'temporal displacement' of the two simultaneous impressions, according to the direction of attention. Recently the complication pendulum has been replaced by the *complication clock:* the difference between the two instruments is that the hand of the clock moves uniformly round its dial, whereas the pointer of the older apparatus repeats the acceleration of the pendulum movements.

complt. An abbreviation of *complainant.*

Component society. See ★*society.*

comport2 (kom'pōrt), *n.* A perverted form in trade catalogues, etc., of *compote,* 2.

composimeter (kọm-pō-sim'e-tėr), *n.* [Irreg. ‹ *composi(tion)* + Gr. *μέτρον,* measure.] A device used in connection with gas-engines for indicating the calorific value of the gas employed in the engine.

composit, *a.* A simplified spelling of *composite.*

composite bow, dike, forest, etc. See ★*bow*2, *etc.*

compositeness (kọm-poz'it-, kom'pō-zit-nes), *n.* Composite structure or make-up; composite character or quality.

From an early date the *compositeness* of this work [Book of Enoch] was recognized. *Encyc. Brit.,* XXV. 490.

composition, *n.* **12.** In *chem.,* the kind and relative amounts of the components of a compound; commonly, the kind and relative weights of the elements, or the kind and number of the atoms, which make up the compound. The gravimetric composition states the relative weights of the components; the volumetric composition their relative volumes; the centesimal or percentage composition their percentages; and the atomic composition or the molecular composition, the kind and number of the atoms which make up their molecules. For example, the gravimetric composition of water is 1 part by weight of hydrogen and 7.94 parts by weight of oxygen; the centesimal composition is 11.19 per cent. of hydrogen and 88.81 per cent. of oxygen; the volumetric composition is 1 volume of oxygen and 2.0027 volumes of hydrogen; the atomic or molecular composition is 1 atom of oxygen and 2 atoms of hydrogen. The composition belonging to the critical temperature is a critical composition and a solution of such composition a critical solution.—**Critical composition of solution.** See ★*solution.*—**Demotic, social composition.** See ★*demotic,* ★*social.*

Compositors' cramp, an occupation neurosis, analogous to writers' cramp, which affects the muscles of the forearm and hand in type-setters.

compost1, *n.* **3.** A compost is any mixture of a not easily decomposable substance containing plant-food, with more putrescible substances or with chemicals to secure decomposition and render available the fertilizing constituents of the whole. The typical compost is a combination of peat with dung, fish, or the like, moisture being supplied if wanting. The nitrogen of the latter substances is absorbed and conserved while the organization of the woody matter is broken down and its content of plant-food released. Straw, dead leaves, and any kind of litter may be used in the place of peat. Another class of composts are made by the combination with peat of alkaline substances, particularly lime, with or without salt, also wood ashes, peat ashes, or gas-lime. Composts are also made of bones with lime and wood ashes.—**Compost heap,** a compact pile of the materials of a compost, at first in layers. The material is usually turned over with a fork several times to assist decomposition. A trench or pit is employed in the reduction of bones.

compost1, *v. t.* **3.** To form or convert into compost. See ★*compost*1, *n.,* 3.

compost2†, *n.* [OF. *compost,* an erroneous form of *compot,* ‹ LL. *computus* ‹ L. *computare,* compute: see *compute, v.* and *n.*] A computation or calendar of astronomical and ecclesiastical data. *N. E. D.*

composting (kom'pōst-ing), *n.* [*compost v.* + *-ing*1.] The operation of making a compost or of making into a compost with the proper substance.

Thorough *composting* with lime is a remedy for these conditions [that is, the injurious action of muck].
Yearbook U. S. Dept. Agr., 1901, p. 170.

compound1, *v. t.* **9.** To make (a steam-engine) operate on the compound principle, whereby the steam expands first in a small cylinder and does work in propelling the piston, and thence exhausts into a larger low-pressure cylinder, where it expands still further until released at the exhaust when the traverse is completed.

The era of *compounding,* as applied to locomotives, was inaugurated by Mr. A. Mallet in 1876 in France, followed by Mr. A. von Borries in Germany, Mr. T. W. Worsdell and Mr. F. W. Webb in England, and Mr. S. M. Vauclain in America, all about the year 1889.
Encyc. Brit., XXXII. 152.

compound1. **I.** *a.*—**Compound arch, balance-rudder.** See ★*arch*1, ★*balance-rudder.*—**Compound crystal,** a twin crystal. See *twin*1 II, 3.—**Compound dike.** Same as *composite* ★*dike.*—**Compound evolution, flexure,** etc. See ★*evolution,* ★*flexure,* etc.

II. *n.*—**Copulated compound** in *chem.,* a compound formed by the union of two other compounds and exhibiting to some extent the chemical character of the one modified by that of the other. Originally the term, which is now out of use, was applied to compounds of organic with inorganic substances. Also called *conjugated compound.*—**Cyclic compounds.** See ★*cyclic.*—**Lard compound,** trade name for an imitation of hog's lard, made from the stearin left in the production of oleo-margarin, refined cotton-seed oil, and, usually, some actual lard. Also known as *compound lard.*—**Psychical compound.** See ★*psychical.*

comprehensive, *a.* **4.** In *logic,* intensive; relating to logical comprehension.

It is an axiom in logic that the more extensive any general term is, it is the less *comprehensive. Reid.*

5. In *biol.,* of a general or synthetic type of structure. See *synthetic,* 3.—**Comprehensive type,** in *paleon.,* any ancient organism possessed of characters which in geologically later periods have become distributed among different and more highly specialized groups. The comprehensive type always precedes the specialized type in time, and the sum of its characters, once broken up, is never recombined at a later date. Also called *generalized type.*

compress, *n.* **4.** An establishment in which cotton-bales are compressed for transportation. [U. S.]

Compressed-air motor. Same as *air-motor* (which see, under *motor*).

compressibility, *n.*—**Adiabatic coefficient of compressibility.** See ★*coefficient.* **Isothermal coefficient of compressibility.** See ★*coefficient.*

compressing-bottle (kọm-pres'ing-bot'l), *n.* A stout glass vessel for the digestion of substances under pressure.

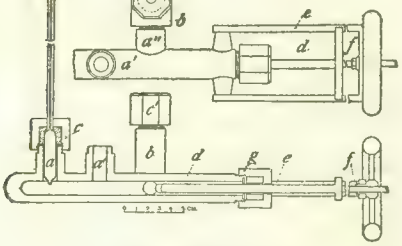
compression, *n.*—**Center of compression.** See ★*center*1.—**Compression atrophy, beam,** etc. See ★*atrophy,* etc.—**Compression by stages,** a process of compression in which a gas is introduced successively

into a series of cylinders which decrease in size as the pressure increases. A compressor or pump with four such cylinders, for example, is called a four-stage compressor. —**Compression myelitis.** See ★*myelitis.*—**Compression of the brain,** intracranial pressure caused by an effusion of blood, a tumor, depressed fracture of the skull, etc. The usual symptom is coma, but there may be convulsions.—**Compression of the poles,** of the earth or other planet, its oblateness, that is, the ratio of the difference between its equatorial and polar diameters to the equatorial diameter.—**Isothermal compression,** compression of a fluid, or other body, under conditions involving no change of temperature.

compressional (kọm-presh′ọn-al), *a.* [*compression* + *-al*[1].] Of or pertaining to compression, that is, to the strain due to a stress, such as hydrostatic pressure, which tends to produce diminution of volume without shearing. See *elasticity.*—**Compressional energy,** energy stored in an elastic medium as the result of work done in compressing it.—**Compressional strain,** a strain in an elastic body resulting from and corresponding to compressional stress.—**Compressional strength,** that property of an elastic body by which it resists compression. Compressional strength is denoted by the bulk modulus in cases in which the stresses tend to reduction of volume, and by the stretch modulus when the stress is longitudinal.—**Compressional stress,** stress which tends to reduce the length, breadth, thickness, or volume of a body.—**Compressional wave.** See ★*wave*[1].

compression-chamber (kọm-presh′ọn-chām″bėr), *n.* A space or compartment the volume of which can be reduced, usually by the pushing in of a piston or plunger, for the purpose of compressing the contents; a compressing-cylinder.

compression-coupling (kọm-presh′ọn-kup″ling), *n.* A form of shaft-coupling for uniting lengths of driving-shaft end to end, in which the two ends each have a split cone keyed on. These two cones are drawn in and compressed by bolts against two complementary female cone surfaces inside a cylindrical casing which receives both of the split cones. The coupling shows no bolts, and can be used to carry a driving-belt.



compression-curve (kọm-presh′ọn kėrv), *n.* That curve or part of an indicator-diagram from an engine which shows the pressures in the cylinder on that part of the return stroke which takes place after the exhaust-port has closed.

compression-cylinder (kọm-presh′ọn-sil″inder), *n.* **1.** Same as ★*air-compressor,* *n.*—**2.** A form of cylinder in which air is retained under pressure to act as a pneumatic spring under shock or impact, as in the recoil of gun-carriages.

compression-engine (kọm-presh′ọn-en″jin), *n.* A gas-engine in which the mixed charge is subjected to compression before being ignited. The advantage of employing compression is that the pressure resulting from the explosion of the charge is very much higher than at atmospheric pressure. For this reason the economy and efficiency of the engine are increased.

compression-faucet (kọm-presh′ọn-fâ″set), *n.* A faucet in which the valve is closed by pressure only.

compression-machine (kọm-presh′ọn-ma-shēn″), *n.* **1.** An air-compressor; a machine for compressing any substance.—**2.** A testing-machine for finding the compressive strength of materials.—**3.** A machine for determining the physical constants of gases, as vapor pressure, critical temperature, etc. It consists of a wrought-iron barrel to hold mercury, into which compression-tubes for gases, and manometers are inserted at *a*, *a′*, and *a″*. The caps as at *a*, and *a′*, the latter attached to the off-set *b*, serve to keep the manometers in place. Pressure is exerted on the gases when by turning the screw *f*, held by the guide-bars *e*, and the cap *g*, the plunger *d* is forced against the mercury in the barrel.

Compression-machine.
(From Travers's "Study of Gases.")

compression-member (kọm-presh′ọn-mem″bėr), *n.* Any part of a structure, as a bridge or a building, in which the stresses due to the loads produce compression.

compression-pump (kọm-presh′ọn-pump), *n.* A pump for the compression of air or other gas, either as a source of power, for convenience of storage, or for producing liquefaction as in the manufacture of liquid air.

compression-valve (kọm-presh′ọn-valv), *n.* A valve whose opening or release will relieve excessive compression behind it: used in internal combustion motors to relieve an inconvenient compression when such motors are to be started by hand. Often called *relief-valve.*

compressorium, *n.* **2.** Same as *compressor, (a).*

compromission (kom′prọ-mish″ọn), *n.* [LL. See *compromise.*] Compromise: used now only in the following phrase.—**Election by compromission,** election to an office by a committee to whom power to elect has been delegated.

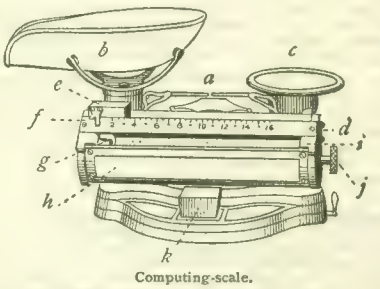
comptograph (komp′tọ-grâf), *n.* [Badly formed from L. *comp(u)tare,* count, + Gr. γράφειν, write.] A key-actuated machine which prints or lists successive numerical items on paper, adds the items, and, at the will of the operator, records their sum.

comptometer (komp-tom′ẹ-tėr), *n.* [Badly formed from L. *comp(u)tare,* count, + Gr. μέτρον, measure.] A key-actuated machine for performing addition, subtraction, multiplication, and division. It has nine keys and one lever for each column of figures; the keys actuate the levers, and the levers figure-wheels which indicate results. *Engin. Mag.,* July, 1904, p. 612.

Compulsive insanity. See ★*insanity.*

Compulsory idea, an imperative concept, or obsession, which completely dominates the will.

compunctious, *a.* **2.** Troubled with a feeling of compunction.



> Spears had been deeply *compunctious* for the part he had taken. *Mrs. Oliphant. N. E. D.*

computant (kom′pū-tant), *n.* [L. *computans (-ant-),* ppr. of *computare,* compute.] A computer; an arithmetician. *Carlyle,* German Romance.

computative (kọm-pūt′ạ-tiv), *a.* [NL. **computativus,* < L. *computare,* compute.] Given to computation; calculating. *Ruskin.*

computing-machine (kọm-pū′ting-ma-shēn″), *n.* A machine which performs the simpler operations of arithmetic by mechanical means.

computing-scale (kọm-pū′ting-skāl″), *n.* A combined weighing and price-calculating ma-

Computing-scale.

a, weighing-beam indicator—beam not shown; *b*, tray holding goods to be weighed; *c*, platform for weights; *d*, weight-scale; *e*, sliding-weight; *f*, pointer indicating weight on scale; *g*, pointer indicating price at that weight; *h*, casing inclosing computing mechanism; *i*, price scale; *j*, operating-handle controlling computator; *k*, extra weight.

chine. It consists essentially of a beam, spring, or platform weighing-scale, and a mechanical computing-machine affixed to the weighing-scale. The computing mechanism may be of any form and be joined to any type of weighing-machine, the essential feature being that the method of indicating the weight shall be so applied that it also indicates the selling price of the article weighed. In the illustration a simple form of beam-scale is shown, the sliding-weight, resting on the graduated scale, appearing at the left. Beneath the scale-beam is shown the cylindrical casing inclosing the price-calculating mechanism. This consists essentially of a revolving cylinder, marked in figures representing cents, arranged in parallel horizontal lines and operated by the nurled screw at the right. On turning the screw the cylinder is revolved until the line of figures calculated for any particular price is brought into view in front. On weighing any article in the scale the weight is moved until the beam balances, when a pointer on the lower side of the weight indicates the computed price in cents on the computing-cylinder.

compy. An abbreviation of *company.*

comr. An abbreviation of *commissioner.*

Comrade palmer-worm. See ★*palmer-worm.*

com.-sergt. An abbreviation of *commissary-sergeant.*

Comstock lode. See ★*lode.*

Com. Ver. An abbreviation of *Common Version* (of the Bible).

con[6] (kon), *a.* Short for 'confidence': as a *con* man; a *con* game. See *confidence man, confidence game* (under *confidence*).

Con. An abbreviation (*a*) of *Consul;* (*b*) [*l. c.*] of *conclusion.*

conacaste (kō-nä-käs′tā), *n.* [Guatemalan.] The eardrop-tree, *Enterolobium cyclocarpum,* or its fruits. The latter are sometimes used for tanning, like divi-divi.

con agilità (kon ä-jē-lē-tä′). [It.] In *music,* with agility or nimbleness: used especially of the vocal execution of rapid runs or figures.

con anima (kon ä′ni-mä). [It.] In *music,* with animation.

Conant dollar. See ★*dollar.*

conarite, *n.* See ★*connarite.*

conation, *n.* **3.** In *sociol.,* social effort, especially that put forth by a community to transform its environment. *L. F. Ward,* Pure Sociol., p. 247.

concameration, *n.* **4.** In *anat.,* an arrangement in the form of connecting cavities or hollow cells.—**5.** The vault or sphere of the heavens; one of the celestial 'spheres' of older astronomy. *N. E. D.*

concassation (kon-ka-sā′shọn), *n.* [NL. **concassatio(n-),* for, **conquassatio(n-),* < **conquassare,* < L. *con-,* together, + *quassare,* crush: see *quash*[2].] The reduction of roots or woods to small fragments, that their active principles may be more easily extracted by solvents.

concatenation, *n.* **3.** The association of a number of nerve-cells in a series to form a nerve or nerve-tract.—**4.** In *elect.,* same as *cascade* ★*connection, (b).*

concave, *n.* **4.** The vault or arch of heaven: as, "the blue *concave.*"—**5.** A playing card so trimmed that it can be separated from others according to the purpose for which the pack was prepared.

conceiv, *v. t.* and *i.* A simplified spelling of *conceive.*

concelebrate, *v.* **II.** *intrans.* In the *Rom. Cath. Ch.,* to repeat, as a newly ordained priest, the words of the mass along with the ordaining bishop, who celebrates.

concelebration (kon-sel-ē brā′shọn), *n.* The act, of a newly ordained priest, of repeating the words of the mass along with the ordaining bishop, who celebrates.

concento (kon-chen′tō), *n.* [It., < L. *concentus,* harmony: see *concentus.*] Harmony; in *music,* indicating the simultaneous sounding of the tones of a chord: opposed to *arpeggio.*

concentration, *n.* (*c*) Concentration may be: (1) The reduction of volume by the process of concentrating, as by the evaporation of water from a solution, or the removal of gangue from an ore. (2) The strength of a solution as increased by concentrating it and as depending on the amount of some dissolved substance contained in a given volume of the solution. (3) The strength of a solution as depending on the amount of some substance dissolved in a given amount of the solution, simply, and without reference to any process of concentrating it: it may be measured in percentage, or by specific gravity of the solution. (4) The number of gram-atoms or gram-equivalents or gram-molecules of the dissolved substance, as the case may be, which are contained in unit volume of the solution. The unit volume is commonly the liter, but sometimes the cubic centimeter. A solution containing one gram-molecule, etc., in the liter is called a *normal solution;* and one containing one tenth of a gram-molecule, etc., in the liter is called a *decinormal solution,* often written 0.1 normal, or $\frac{n}{10}$ solution. (5) The number of gram-atoms, gram-equivalents, etc., contained in the unit volume, although not in solution, as in case of gases or vapors. (*g*) In Herbart's pedagogic system, same as ★*absorption,* 2.—**Concentration camp, deposit.** See ★*camp*[2], ★*deposit.*—**Ionic concentration,** in *phys. chem.,* the number of gram-atoms or gram-equivalents of an ion which are contained in the unit volume of a solution.—**Molecular concentration,** in *phys. chem.,* the ratio of the number of molecules of a dissolved substance which are contained in a given volume to the number of molecules of the solvent contained in the same volume.

concentrator, *n.* **4.** An apparatus wherein solutions or other products of manufacture are concentrated.—**Belt-concentrators,** a class of concentrating-machines in which the work is done on the surface of an inclined endless belt, usually of rubber, over which the pulp flows. The heavier minerals are retarded by friction, while the lighter ones move more rapidly. The separation is aided by mechanical jarring or shaking of the frame which carries the belt. Also called *belt-table.*—**Centrifugal concentrator,** a machine for separating minerals by centrifugal force. In one form the ore particles are thrown from a rapidly revolving disk outward into a series of concentric troughs, the denser grains being thrown farther than the lighter grains of gangue.

concept, *n.*—**Classific concept,** the governing idea of a system of classification or of any part of such a system.

conceptacle, *n.*—**Neutral, sterile,** or **vegetative conceptacle.** Same as *cryptostoma.*

concept-feeling (kon′sept-fē″ling), *n.* In *psychol.,* a characteristic feeling which accompanies the consciousness of vicarious or symbolic value attaching to the concept-idea. Also called *conceptual feeling.*

concept-idea (kon′sept-ī-dē″ạ), *n.* In *psychol.,* an idea which is recognized as having only a

vicarious or symbolic value; an idea which serves as the vehicle of the logical concept. Also called *conceptual idea.*

They serve to invest the *concept-idea* with the consciousness of its vicarious significance, and with the resultant concept-feeling.
W. Wundt (trans.), Human and Animal Psychol., p. 310.

conceptionist, 2. A member of the Roman Catholic religious order of the Sisters of the Conception of Our Lady, founded in Portugal by Beatrix de Sylva in 1484.

Conceptual time. See ★*time*[1].

conceptually (kon-sep′tū-al-i), *adv.* As a mental conception.

A substance is neither actually nor *conceptually* the sum of its radicals. *Nature*, Sept. 18, 1902, p. 501.

concert, *n.*—**The European concert,** the great powers of Europe when acting together diplomatically. See *the powers*, under *power*[1].

concertante, *a.*, (*b*) An old term used to designate orchestral parts or instruments that were employed throughout a piece: opposed to *ripieno* parts, which were used only at intervals for fuller effect.

concert-hall (kon′sėrt-hâl), *n.* A hall in which concerts, chiefly, are given.

concertinist (kon-sėr-tē′nist), *n.* [*concertina* + *-ist.*] One who plays upon a concertina.

concertino, I., *n.* 2. In a ★concerto grosso (which see), the group of solo instruments taken collectively.

concertist (kon′sėr-tist), *n.* [*concert* + *-ist.*] A performer in a concert. [Colloq.]

concertistic (kon-sėr-tis′tik), *a.* In *music*, pertaining to or after the manner of a concert: usually in distinction from *ecclesiastical* or *operatic.* [Rare.]

concertize (kon′sėr-tīz), *v. i.*; pret. and pp. *concertized*, ppr. *concertizing.* [*concert* + *-ize.*] To give or perform in a concert. [Colloq.]

concerto, *n.*—**Concerto grosso** 'great concerto,' a concerto in which a group of solo instruments occupies the principal place.

concession, *n.* 4. In China, Korea, and other countries where extraterritoriality prevails, a tract of land at or near a sea- or river-port, set apart for the use of the citizens and subjects of the treaty-nations when that port is opened by treaty to foreign residence and trade: as, the French and British *concessions* at Shanghai; the British *concession* at Han-kau; the Foreign *Concession* at Tientsin, etc. Here foreigners may lease land and erect such dwellings and other buildings as are required in their business, and in most instances the right of municipal self-government has been acquired by agreement with the sovereign power.

concessionaire (kon-sesh-on-ār′), *n.* [F.] A concessioner or concessionary.

The rules to which exhibitors, *concessionaires*, and state and foreign governments must conform in the erection and maintenance of structures on the St. Louis Exposition grounds have received the final approval of all authorities concerned.
Elect. World and Engin., Jan. 24, 1903, p. 148.

conch, *n.* 8. In the cephalopod mollusks, the postembryonic shell: contrasted with *protoconch* or *embryonal shell*, and with *shell*, a term which loosely covers the entire external skeleton.—9. (*a*) The whelk, *Fulgur carica*; (*b*) the helmet-shell, *Cassis.*—10. In *Rom. antiq.*, the name for various small vessels used for oil, salt, etc.

conch[2] (kongk), *n.* Same as ★*conk*[2].

conch., conchol. Abbreviations of *conchology.*

concha, *n.* 4. Same as ★*conch*, 10.

The admirable figure of Marforius, casting water into a most ample *concha*. *Evelyn. N. E. D.*

5. The thin, translucent shell of a bivalve mollusk, sometimes used for window-panes in the East Indies.

conchal (kong′kal), *a.* [*concha* + *-al.*] Relating to or resembling a concha.

Conchidium (kon-kid′i-um), *n.* [NL., ⟨ Gr. *κόγχη*, a shell, + *-idium*, dim.] A genus of extinct brachiopods of the family *Pentameridæ*, having in the ventral valve a spondylium supported by a median septum and two vertical septa in the dorsal valve. The shells are strongly ribbed on the exterior. The genus is widely distributed in Silurian and Devonian rocks.

conchifragous (kon-kif′ra-gus), *a.* [Gr. *κόγχη*, a shell, + L. *-fragus*, ⟨ *frangere*, break.] Shell-breaking: said of the jaws of animals adapted for feeding on shellfish.

Cranium.—Agreeing in most characters with the existing Cheloninæ, but specialized for a *conchifragous* habit; short, very broad, with external nares directed as much upward as forward.
Amer. Jour. of Sci., Sept., 1904, p. 192.

conchite, *n.* 2. A form of calcium carbonate, forming a considerable part of the calcareous secretions of molluscan shells and supposed to have specific characters. It is probably only a form of aragonite.

conchitis (kong-kī′tis), *n.* [NL., ⟨ *concha* + *-itis.*] Inflammation of the external ear.

conchoid, *n.*—**Spherical conchoid,** a curve like a conchoid, but on a sphere.

conchoidal, *a.* 2. In *math.*, pertaining or relating to the conchoid: as, Holm's *conchoidal* screw.

conchoidally (kong-koi′dal-i), *adv.* In a conchoidal curve.

The sandstone of this formation has the peculiarity of fracturing *conchoidally*. *Pop. Sci. Mo.*, LIV. 64.

conchologize (kong-kol′ō-jīz), *v. i.*; pret. and pp. *conchologized*, ppr. *conchologizing.* [*conchology* + *-ize.*] To collect or study shells. *Kingsley.*

conchorhynchus (kong-kō-ring′kus), *n.* [NL., ⟨ Gr. *κόγχη*, a shell, + *ῥύγχος*, a snout.] One of the names which were applied to the horny jaws of the fossil cephalopod *Temnocheilus bidorsatus*, of the Triassic rocks, before it was known to what shell they appertained.

conchotome (kong′kō-tōm), *n.* [Gr. *κόγχη*, shell, + *-τομος*, ⟨ *ταμεῖν*, cut.] An instrument for dividing one of the turbinals in the nose.

conchula (kong′kū-lä), *n.*; pl. *conchulæ* (-lē). [NL., dim. of L. *concha*, a shell.] The thickened, lobed extremity of the siphonoglyph in *Siphonactinidæ.*

conchyliferous (kong-ki-lif′e-rus), *a.* [Gr. *κογχύλη*, a shell, + L. *ferre*, bear.] Same as *conchiferous.*

concis. An abbreviation of the Latin *concisus*, cut.

conclusiuncule (kon-klō′zi-ung-kūl), *n.* [L. *conclusiuncula*, dim. of *conclusio*(*n-*), conclusion.] A trifling conclusion: one of the stock sophisms of traditional logic.

concomitant, *a.* 2. In *bot.*, running side by side, as bundles which are not separated by other bundles.

concordance, *n.* 4. In *music*, concord or consonance in the technical sense of these words: opposed to *dissonance* or *discord.*

Concord axle, buggy, coach, hame. See ★*axle*, etc.

concrescence, *n.* 5. In *embryol.*, the formation of the body of the vertebrate embryo by the growing together of the lips of the blastopore.

concrescent (kon-kres′ent), *a.* [L. *concrescens* (*-ent-*), ppr. of *concrescere*, grow together: see *concrescse.*] Growing together; coherent.

A single male flower consists of an axis enclosed at the base by an inconspicuous perianth formed of two *concrescent* leaves and terminating in two, or as many as eight, shortly stalked or sessile anthers.
Encyc. Brit., XXIX. 191.

concrete, I. *a.* 5. In *bot.*, growing together.

II. *n.*—**Adobe concrete.** See ★*adobe.*—**Armored concrete.** Same as *reinforced* ★*concrete.*—**Reinforced concrete,** any form of concrete construction in which the concrete is reinforced by the use of steel or iron bars, rails, rods, wires, netting, etc., bedded in it, to give it additional strength and solidity. In the most important form, called *steel concrete*, the concrete is reinforced by corrugated bars of steel or expanded metal. It is used in erecting bridges, culverts, sewers, fire-proof floors and roofs, footings, and walks or foundations. The steel is disposed in the mass of the concrete to resist the various strains to which the structure may be subjected. Thin floors, walls, and roofs are reinforced by sheets of expanded metal; foundations, bridges, arches, sewers, etc., are strengthened by bars of steel having right-angled corrugations.

concrete, *v. t.* 3. To treat or lay with concrete: as, to *concrete* the foundations of a building; to *concrete* a cellar floor, or a sidewalk.

concrete-mixer (kon′krēt-mik″sėr), *n.* A machine for mixing cement, sand, crushed or broken stone, and water in varying proportions for making concrete. The most common type is a rotary cylinder operated by a small portable engine or motor, and arranged with suitable inlets for the water and other materials, and for stirring and mixing them, etc.

concretion, *n.* 5. In old *chem.*, reduction of a liquid to a solid, commonly by partial evaporation.

Concretionary granite. See ★*granite.*

concretize (kon-krē′tīz), *v. i.*; pret. and pp. *concretized*, ppr. *concretizing.* [*concrete* + *-ize.*] To make specific; give definiteness to.

The method of resolving bodies into particles I call analysis, and the proof of analysis is synthesis. I use the term analysis with a specific meaning, to distinguish it from abstraction. The proof of abstraction is *concretizing*. *J. W. Powell*, in Amer. Anthropol., July–Sept., 1901, [p. 409.

concur, *v. i.* 6. (*a*) In *law*, to assert, with other claimants, a claim against the estate of an insolvent. (*b*) In *Eng. law*, to unite in two or more persons the title to a single estate.

concur (kon-kėr′), *n.* [*concur, v.*] In *mod. geom.*, the straight determined by two coplanar flat pencils.

concurrence, *n.* 5. In *math.*, the meeting of lines, surfaces, etc.—6. In *mod. geom.*, the meeting-point or cointersection-point of three or more lines.—7. In French law, equality of rights of several parties in the same subject-matter or thing.

concurrency, *n.* 2. In *logic*, a relation in which no individual object stands to any other than itself, such as 'being at once black and also —.'

concusconine (kon-kus′kō-nin), *n.* [*con-* + *cusconine.*] A crystalline alkaloid, $C_{23}H_{26}O_4N_2+H_2O$ found in the bark of *Remijia purdieana.* The hydrate melts at 144° C., the anhydrous alkaloid at 208° C.

concussion-bellows (kon-kush′on-bel″ōz), *n.* Same as *winker*, 6.

concussion-table (kon-kush′on-tā″bl), *n.* A table for sizing and sorting rock or ore by means of a sidewise jarring motion which, in combination with the effect of gravity, brings particles of the same size or of the same specific gravity into separate groups and results in a mechanical separation.

Condemnation money. See ★*money.*

condensance (kon-den′sans), *n.* [*condense* + *-ance.*] In *elect.*, a negative reactance or capacity reactance. See ★*reactance.*

condensate, *a.* **II.** *n.* The substance formed by condensation.

Culture liquids tainted by the filter, the absorbing liquid, and the *condensate*. *Buck*, Med. Handbook, I. 157.

condensation, *n.* 3. In *organic chem.*, the union of two carbon atoms which may be in the same or in different molecules. Thus acetylene, C_2H_2, condenses to benzene, C_6H_6. In recent years the term has been applied to reactions involving the union of a carbon atom to an atom of some other polyvalent element, usually accompanied by the removal of the elements of water. Thus acetaldehyde, C_2H_4O, and hydroxylamine, NH_2OH, condense to form acetaldoxime, C_2H_4NOH, and water, H_2O.—**Aldol condensation, temperature of condensation, condensation theory.** See ★*aldol*, ★*temperature*, ★*theory.*

condensational (kon-den-sā′shon-al). *a.* [*condensation* + *-al*[1].] Of or pertaining to condensation; having the power to condense or reduce the volume of a substance.

And why may one attribute to ionised air different *condensational* properties, according as positive or as negative ions are in question, without having first established that the corresponding air nuclei do not differ in size sufficiently to account for the *condensational* difference observed. *Nature*, Dec. 3, 1903, p. 104.

Condensational energy, wave. See ★*energy*, ★*wave*[1].

Condensed numbers. See ★*number.*—**Extra condensed type,** any face or style of printing-type that is unusually narrow for its height.

This line is in Extra Condensed on 8-point body.

condenser, *n.* (*f*) A device for removing from a current of gas such elements as will be caused to fall out from the gas by reducing its temperature. Tar and ammonia are separable in this way.—**Abbé condenser,** a form of achromatic condenser (which see, under *achromatic*).—**Ammonia condenser.** See ★*ammonia.*—**Condenser yarns,** a trade-name applied to cotton yarns spun from roving made on a carding-machine with a condenser apparatus.—**Counter-current condenser,** a jet-condenser in which the direction of the current of air taken away from the condensed water is contrary to the direction of the current of injection-water; consequently the air passes through the injection-water and is thoroughly cooled.—**Reflux condenser,** a condenser so adjusted as to return condensed vapors to the vessel from which they came. *Amer. Chem. Jour.*, Jan., 1903, p. 39.

condensery (kon-den′sėr-i), *n.* [*condense* + *-ery.*] An establishment where condensed milk is prepared.

condensing-engine (kon-den′sing-en″jin), *n.* See ★*engine.*

condiction (kon-dik′shon), *n.* [L. *condictio*(*n-*), ⟨ *condicere*, agree, promise, proclaim, reclaim, etc.: see *condition.*] In *Rom. law*, an action of a personal nature, founded upon an obligation to perform a certain and defined service or to give or do a certain thing.

condictitious (kon-dik-tish′us), *a.* [LL. *condicticius*, ⟨ *condictus*, pp. of *condicere*, reclaim: see ★*condiction.*] Of or pertaining to condiction.

condidit (kon′di-dit), *n.* [From the principal word in the plea, L. *condidit*, 'he made' (the will), perf. ind. third pers. sing. of *condere*, put together, make, compose, etc.; see *condiment.*] In *eccles. law*, a plea to a libel alleging that the decedent made the will in suit, and that he was of sound mind at the time.

condition, *v. t.* 7. In the tobacco trade, to spray with a 2-per-cent. solution of glycerin. This operation is performed only on chewing, plug, and cigarette tobaccos.

conditioner (kon-dish'on-ėr), *n.* [*condition* + *-er*[1].] In *milling*, a machine for drying damp or musty grain and bringing it into proper condition for use. It consists of a tall tower, the upper part of which is formed of a series of circular blinds and the lower part (one third) of woven-wire netting. Inside the tower, and extending throughout its length, is a pipe or cylinder of perforated sheet-metal. The damp grain is fed into the top of the tower, and falls to the bottom in a cylindrical sheet between the outside blinds and netting and the central perforated metal pipe. In falling, the grain is first exposed to a heavy blast of hot air which passes through the perforations in the central pipe, escaping through the grain and the blinds to the open air. Falling still lower, it meets a blast of cold air, which, passing through the falling grain, escapes through the wire netting. The heating, drying, and cooling leave the grain clean, dry, and in good condition.

condol (kon-dōl'), *n.* [Philippine Sp., < Tag. *condol.*] A name in the Philippine Islands and Guam of the ash-pumpkin or wax-gourd, *Benincasa hispida*, the fruit of which is used as a vegetable and is preserved as a sweetmeat. See *benincasa*.

Condolence council, a tribal council of the Iroquois held after the death of a sachem. During the council the successor of the deceased sachem was installed.

He was engaged on the Grand River reservation in Canada, where he successfully made special effort to obtain the chants and speeches used in the *condolence council* of the league. *Smithsonian Rep.*, 1890, p. 49.

condonance (kon-dō'nans), *n.* [*condone* + *-ance.*] Condonation. *Athenæum.*

Condroz psammites. See ★*psammite.*

Condrusian (kon-drō'si-an), *a.* and *n.* [L. *Condrusi*, n. pl., name of a people in Belgic Gaul, in the district now called *Condroz.*] **I.** *a.* In *geol.*, a term applied to the uppermost division of the Devonian rocks in Belgium and northern France, being otherwise known as the *Psammites of Condroz* and constituting the upper of two subdivisions which together make the Famennian stage.

II. *n.* The Condrusian division.

conduct, *v. t.*—**Conducting cells, sheath.** See ★*cell*, ★*sheath.*

conduct[1], *n.* 10†. The arrangement and composition of a picture. *Walpole.*

conductance (kon-duk'tans), *n.* [*conduct* + *-ance.*] In *elect.*: (*a*) the conducting power of a given mass of specified material of specified shape and connections. *Standard Elect. Dict.* (*b*) in alternating-current circuits, the energy component of admittance, defined as the ratio of the energy current divided by the electromotive force. See ★*admittance*, 6.—**Specific conductance,** in *elect.*, conductivity; the conductance of a portion (of any given material) one centimeter long and one square centimeter in cross-section.

conducting-bar (kon-duk'ting-bär), *n.* Same as ★*comb-bar.*

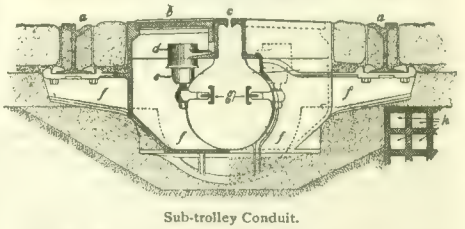
conduction, *n.* 4. In *physiol.*, the transfer of nervous influence along a nerve-fiber or of the contractile force from point to point in muscle-tissue.

Just as in a nerve fiber, when excited by a localized stimulus, the excited state spreads from the excited point to the adjacent unexcited ones, so in muscle the "contraction," when excited at a point, spreads to the adjacent uncontracted parts. Both in muscle and in nerve this spread is termed "*conduction.*" *Encyc. Brit.*, XXXI. 738.

Avalanche conduction. See ★*avalanche.*—**Fourier's law of conduction.** See ★*law*[1].—**Wernicke's aphasia of conduction.** Same as *word-deafness.*

Conductive tissue, in *bot.*, same as *conducting tissue* (which see, under *tissue*).

conductivity, *n.* 2. In *physiol.*, the power of a nerve to conduct an impulse.



When a nerve is divided it will lose its motor *conductivity* only after the lapse of some time.
Lancet, April 18, 1903, p. 1089.

Conductivity of the atmosphere. (*a*) The calorimetric conductivity of the atmosphere expressed in absolute units of heat, or the number of calories conducted through a unit distance and a unit mass of air in a unit of time under the influence of a unit gradient of temperature. This small quantity becomes very important in meteorology, where it is converted into thermometric conductivity. (*b*) The thermometric conductivity of the atmosphere; the change in temperature of the atmosphere due to its calorimetric conductivity. It is equal to the latter divided by the specific heat of a unit volume, or by the product of the specific heat of a unit mass multiplied by the density of the gas. It is therefore a large quantity in the upper regions of the atmosphere.—**Coefficient of thermometric conductivity.** See ★*coefficient.*—**Conductivity water,** in *phys. chem.*, water specially purified for use in measuring the electrical conductivity of solutions. Ordinary water is commonly regarded as a fairly good conductor of electricity; even distilled water is far from being a non-conductor; but most of its conducting power depends on the presence of dissolved substances, such as ammonia and carbon dioxid. Water freed as far as possible from these is used in experiments on the conductivity of solutions.—**External conductivity.** See ★*emissivity.*—**Magnetic conductivity,** the magnetic induction of a circuit divided by the magnetizing force; magnetic permeability or specific permeance; the reciprocal of reluctivity.—**Molecular conductivity,** in *phys. chem.*, the specific electric conductivity of a solution divided by the concentration; the conductivity which would be exhibited by a solution of the specified concentration, and of such volume as to contain one gram-molecule of the dissolved substance when entirely inclosed between large electrodes one centimeter apart.—**Specific conductivity.** Same as *specific* ★*conductance.*—**Surface conductivity,** radiating power expressed in terms of the heat emitted per second by a square centimeter of surface when the radiating body has a temperature one degree centigrade above its surroundings. Also called *emissivity.*—**Thermal conductivity,** a physical constant used to express quantitatively the rate of transfer of heat through a medium by conduction. The conductivity, k, is the quantity of heat which would pass, in a unit of time, between the opposite faces of a layer of the substance of unit area and unit thickness when the difference of temperature between the faces is one degree. See *conduction* and *conductivity.*—**Thermometric conductivity.** Same as *thermal* ★*diffusivity.*

conductor, *n.* 9. Specifically, in *elect.*, a substance through which electric currents can flow. Metals are the best conductors; glass, rubber, air, etc., are very poor conductors. The following divisions may be made: (1) Conductors of the first class, or metallic conductors, as the metals, carbon, silicon, etc., which, except that they are heated, are not affected by the current. (2) Conductors of the second class, or electrolytic conductors, as salt solutions, in which the passage of the current is accompanied by chemical action. (3) Pyroelectrolytes, as glass and magnetite, which are non-conductors or poor conductors at ordinary temperatures, but which become good conductors at high temperatures. (4) Gaseous conductors, as gases at low pressures, which carry the current only if the electromotive force is high and which then show luminosity. (5) Arcs, that is, vapors of first-class conductors, which become conducting by the passage of the current.—**Conjugate conductors,** in *elect.*, two conductors which form parts of a divided circuit and are so placed that an electromotive force in the one produces no current in the other.—**Cord conductor,** in *elect.*, a conductor consisting of many fine strands twisted or braided together and covered with flexible insulating material. Cord conductors are used in making switchboard connections and for many other purposes where a flexible conductor is desirable.—**Core conductor,** a form of apparatus used in experiments in electrotonus, in which there is a metal wire, or core, through which the current is conducted.—**Neutral conductor,** in a three-wire or Edison system of low-tension electric distribution, the middle conductor, which has against each of the two outside conductors half the voltage existing between the outside conductors. In a direct-current three-wire distribution the two outside conductors are the *positive* and the *negative* conductors respectively.

conductor-rail (kon-duk'tor-rāl), *n.* In *electrotechnics*, a metallic rail by means of which the electric current is conveyed to motors of an electric railway.

conduit[1], *n.*—6. Same as ★*copula*, 9.—**Electric conduit,** a permanent tubular space or system of spaces or ducts designed to receive insulated electric conductors.

Sub-trolley Conduit.

a, traffic-rail; *b*, cover-plate; *c*, slot-rail; *d*, holder; *e*, insulator; *f*, yoke; *g*, working conductor; *h*, conduits for cables.

Sub-trolley conduit, a sub-surface inclosed space with openings at the top, intended to support and protect the working conductors of a sub-trolley electric railway.

conduplication, *n.* 2. Specifically, in *bot.*, a form of estivation in which the sides of an organ are applied to each other by their faces.

condurangin (kon-dū-rang'gin), *n.* [*condurango*, var. of *cundurango*, + *-in*[2].] A name given to two glucosides, $C_{20}H_{32}O_6$ and $C_{18}H_{28}O_7$, found in the bark of the South American plant cundurango, *Marsdenia Cundurango.* They are powerful nerve-poisons.

condylarth (kon'di-lärth), *n.* A member of the group of extinct mammals termed the *Condylarthra.*

condylarthran (kon-di-lär'thran), *a.* and *n.* **I.** *a.* Of or pertaining to the *Condylarthra.*

II. *n.* A member of the *Condylarthra.*

condylarthrosis (kon″di-lär-thrō'sis), *n.* [Gr. *κόνδυλος*, knuckle, + *ἄρθρωσις*, articulation.] In *anat.*, a form of hinge-joint, usually with some lateral movement, in which a condyle of one bone fits into a suitable depression in the opposite bone.

condyle, *n.*—**Mandibular condyle,** in *ornith.*, the facet on the distal end of the quadrate for the articulation of the jaw or mandible.—**Pterygoid condyle,** in *ornith.*, the projecting rounded facet on the anterior edge of the quadrate for the articulation of the pterygoid.

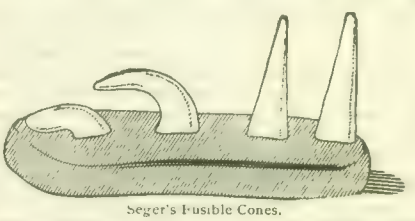
condylion (kon-dil'i-on), *n.*; pl. *condylia* (-ä).

[NL., < Gr. *κονδύλιον*, dim. of *κόνδυλος*, socket: see *condyle.*] In *craniom.*, a corner of the condyle of the lower jaw. The lateral and the medial condylia are distinguished.

Condyloid joint. Same as ★*condylarthrosis.*

condylomatoid (kon-di-lom'a-toid), *a.* [*condyloma*(*t-*) + *-oid.*] Resembling a condyloma. *Buck*, Med. Handbook, I. 51.

condylome (kon'di-lōm), *n.* Same as *condyloma.*



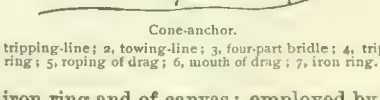
condylotomy (kon-di-lot'ō-mi), *n.* [Gr. *κόνδυλος*, knuckle, + *-τομία*, < *ταμεῖν*, cut.] In *surg.*, removal of the whole or of a part of the condyle of a bone.

cone, *n.* 2. (*i*) The conical top of a helmet or of a hat.

He smote him on the helmet's *cone*, where streamed
The horse-hair plume. *Bryant*, tr. of Iliad, I. iv. 579.

(*j*) The crystalline lens of the compound or faceted eye (ommateum) of an insect.

Alluvial cone, in *phys. geog.*, a fan-shaped deposit of detritus formed by a stream at the mouth of a ravine; an alluvial fan.—**Antipodal cone,** in *cytol.*, the cone-shaped bundle of fibers opposite the spindle-fibers in the karyokinetic figure of the dividing-cell.—**Apical cone, asymptote cone.** See ★*apical*, ★*asymptote.*—**Cone of eruption,** a volcanic cone formed by the accumulation of erupted material, such as dust and ashes.—**Cone of growth,** in *bot.*, the growing point at the apex of a stem, which is conical in shape.—**Cone of light.** Same as ★*light-spot.*—**Cone of planes,** the planes of correlated straights of two copunctal non-coplanar flat pencils, projective but not perspective.—**Cone of shade** or **shadow,** in *astron.*, the conical shadow projected into space by a planet.—**Parasitic cone,** a secondary cone formed at a temporary vent; an offshoot from the main volcanic vent.—**Pyrometric cones.** Same as *Seger's* ★*cones.*—**Reverse cones.** (*a*) Cones which when used in pairs have their similar bases together, so that their elements run in opposite directions or make an angle with each other: used in bearings of lathe head-stocks, and in roller-bearings as used in motor-cars. (*b*) A pair of equal cones with parallel axes, but with the small base of one in line with the large base of the other, at such a distance that an endless belt on their surfaces or an idle transmitting-wheel between them can transmit power from one to the other. In either form the device may be used to transmit a varying velocity ratio by adjusting belt or wheel so that a large circumference of driver is opposite a small circumference of driver, or the reverse.—**Seger's cones,**



Seger's Fusible Cones.

a series of pyramids or cones of varying fusible composition, each melting at a different temperature, used to determine the several degrees of heat in porcelain-kilns: first devised by Lauth and Vogt at Sèvres, and perfected by Seger at the Royal Berlin Porcelain Works. There are 60 in the series. The first indicates a temperature of 590° C. and the last one of 1,890° C. Many of the cones contain alumina and silica in the proportion $Al_2O_3 + 10SiO_2$. Those melting at high temperatures contain only Al_2O_3 and SiO_2 in varying proportion, while those indicating lower temperatures contain K_2O, CaO, Fe_2O_3, $Na_2O + PbO$, with SiO_2 and B_2O_3. They are inserted at windowed draft-holes in the kiln, and the degree of heat is determined by their point of fusion.—**Tactile cone,** in some trematoids, one of the conical elevations bearing groups of non-motile sensory cilia.—**Torrential cone,** a fan-shaped deposit of detritus built on the land by rivers.—**Vertex of a cone,** the apex.—**Visual cone,** in *optics*, the cone of rays whose vortex is at the retina and whose surface is determined by the pupil of the eye or, when looking at a small object, by the boundaries of the object.

cone, *v.* **II.** *intrans.* To bear cones: said of coniferous trees.

cone-anchor (kōn'ang″kor), *n.* A sea-anchor or drag in the shape of a cornucopia, made of

Cone-anchor.

1, tripping-line; 2, towing-line; 3, four-part bridle; 4, tripping line ring; 5, roping of drag; 6, mouth of drag; 7, iron ring.

an iron ring and of canvas: employed by vessels in heavy weather to keep them headed to the sea and wind, and to prevent them from drifting rapidly to leeward.

M. Heureux dropped his *cone-anchor* and waited until a tug-boat, sent out especially from Dunkerque, threw a rope to the car, by which the balloon was tugged easily and reached Dunkerque fully inflated.
Nature, Sept. 4, 1902, p. 447.

cone-bearing (kōn'bār″ing), *a.* Coniferous; belonging to the *Pinaceæ* or any of the families of the order *Pinales.*

cone-belt (kōn'belt), *n.* A descriptive name for a form of furnace-tube which is made up of a series of frustums of cones riveted together.

cone-cell (kōn'sel), *n.* In *histol.*, one of the cells which secrete the crystalline cone in the ommatidium of the compound eyes of crustaceans and insects.

cone-clutch, *n.*—**Internal cone-clutch,** a friction-clutch in which the contact-surface is an internal cone. Usually the contact is made by pushing a disk with a conical rim into the internal cone.

cone-drive (kōn'driv), *n.* A device consisting of two cones of equal slant on parallel shafts, with their bases in opposite directions, and a leather loop pressed between them at one point. The leather loop can be shifted along, and as the distance between the cones is constant, one cone can drive the other with different velocity-ratios.

cone-drum (kōn'drum), *n.* An elongated cone-shaped pulley or wheel. *Taggart*, Cotton Spinning, I. 18.

cone-duster (kōn'dus″tėr), *n.* A machine consisting of a conical cylinder armed with teeth and revolving in a cylindrical casing armed with teeth on the inside; a devil. The stock fed into the machine is caught between the fixed and the revolving teeth, and is torn apart or opened and the dust shaken out.

conejo (kō-nā'hō), *n.* [Sp. *conejo*, a rabbit, < L. *cuniculus*, a rabbit: see *cony*.] **1.** A fish, *Alepisaurus altivelis*, of the family *Alepisauridæ:* found in rather deep water in the West Indies.—**2.** Same as ★*rabbit-fish*, 4.

cone-key (kōn'kē), *n.* A frustum of a cone in which is a cylindrical hole, used for keeping a wheel in place on its shaft when the hole in the wheel is larger than the shaft. The wheel is bored conically, and the cone-key, after being turned to fit it, is cut into three pieces, so that it may be forced tightly into the wheel and keep it concentric with the shaft. Such a key can be used to fasten a wheel which has to pass over a section of the shaft larger than that where it is fastened.

Conemaugh series. See ★*series*.

cone-nose, *n.*—**Blood-sucking cone-nose.** Same as *gigantic* ★*bedbug*.

cone-pick (kōn'pik), *n.* A form of overpick-motion for throwing the shuttle of a loom, applied to some fast-running looms for weaving light and medium cotton fabrics: named from a cone-shaped antifriction roller which is a part of it. *Fox*, Mechanism of Weaving, p. 314.

cones (kōnz), *n.* [Origin unknown; perhaps orig. alluding to 'cones' of paper used in scattering the flour over the loaves and troughs.] A fine white flour used by bakers to 'dust' their loaves and troughs.

cone-screw (kōn'skrō), *n.* A threaded cone or frustum of a cone: used in cases where the screwed joint is liable to be subjected to very heavy pressures and it is desirable that the end of the screw shall not bottom or jam in its hole. It is used on the ends of punches for heavy hydraulic cupping-presses.

con espressione (kon es-pres-i-ō'ne). [It.] In *music*, with expression or feeling.

cone-spring (kōn' spring), *n.* A spiral wire spring wound, not in one plane, but as a helix on a cone. By this method of winding, the turns of wire fit one inside another when the spring is compressed, thus allowing it to close to practically the thickness of the wire.

Cone-spring.

cone-stand (kōn' stand), *n.* A stand or pedestal, of a conical shape, forming the lower fixed part of a mount for light guns.

conf. An abbreviation of *conference*.

confection, *v. t.* **2.** To make up (elaborate articles of female attire). [French, occasionally used in English.]

confederalist (kon-fed'ėr-al-ist), *n.* [*confederation*) + *-al*[1] + *-ist* (after *federal*).] One who believes in confederation, with preservation of the autonomy of each component group, as a form of social or political organization.

confederationist (kon-fed-e-rā'shon-ist), *n.* One who favors or supports confederation or a confederation.

confelicity (kon-fē-lis'i-ti), *n.* [*con-* + *felicity*.] Participation in the joy of others; sympathy.

The *confelicity* . . . is . . . as rare as comparison is commonplace, and is far fainter and less educible or contagious. *G. S. Hall*, Adolescence, II. 581.

conference, *n.*—**Synodical Conference,** the largest of the Lutheran general bodies in the United States, organized in 1872 by the delegates from the Missouri, Ohio, Wisconsin, Minnesota, Illinois, and Norwegian synods. The conference proclaims Lutheranism of the most positive character, and an unreserved acceptance of the Augsburg Confession. The members are called *Missourians*, from the name of the largest synod.

conferted (kon-fėr'ted), *a.* [L. *confertus*, pp. of *confercire*, cram together, < *com-*, together + *farcire*, cram: see *farce*, *v.*] In *bot.*, crowded closely together.

Confervales (kon-fėr-vā'lēz), *n. pl.* [*Conferva* + *-ales*.] An order of the grass-green algæ, or *Chlorophyceæ*, containing some 10 or 12 families and widely distributed.

confession, *n.*—**Augsburg Confession.** See *confession*, 3.

confessionalian (kon-fesh-o-nā'liąn), *n.* One who favors formal confessions or articles of faith. *N. E. D.*

confessionism (kon-fesh'on-izm), *n.* [*confession* + *-ism*.] A morbid tendency to pour out one's psychological states, mental struggles, hopes, fears, longings, likes, dislikes, etc., in diaries, autobiographies, and the like.

Women are more easily hypnotized, more prone to jealousy, ill-temper, and *confessionism*.
G. S. Hall, Adolescence, I. 490.

confessive (kon-fes'iv), *a.* Giving knowledge of something not obvious; indicative.

An exclamation too *confessive* of the ardour of the address. *New Monthly Mag.*, II. 351.

confessorial (kon-fe-sō'ri-al), *a.* [LL. *confessorius* (< *confessor:* see *confessor*) + *-al*[1].] Pertaining to the office of a confessor.

The Priest's Tale is a sermon, prolix indeed, but, except in . . . holding up the *confessorial* office of the Priesthood, . . . moral in its scope.
Milman, Latin Christianity, VI. xiv. 7.

confidante, *n.* **2.** The name given by the English designer Hepplewhite to a species of sofa, similar to an ordinary stuffed couch, with additional seats at the ends, all made in one.

configuration, *n.*, **5.** (*b*) A system of a finite number of points with their duals.

The diagram illustrating this theorem is worthy of notice as representing a class of remarkable *configurations* characterized by a certain regularity of form. It consists of ten points and ten straight lines; three of the ten points lie upon each of the straight lines, and three of the ten lines pass through each of the points.
T. F. Holgate, Geom. of Position by Reye, p. 5.

6. In *organic chem.*, the arrangement of the atoms within the molecule, especially that arrangement in space which occasions optical activity.—**Algebraic configuration.** See ★*algebraic*.—**Maclaurin's configuration,** in *projective geom.*, the figure for the dual theorems:

A tetrastim with dots in a conic range has each pair of codots costraight with a pair of fan points of the tetragram of tangents at the dots.	A tetragram with sides in a conic pencil has each pair of diagonals copunctal with a pair of connectors of the tetrastim of contacts on the sides.

confined, *p. a.* **3.** Restricted to the service of one employer, as a laborer hired by him for the year; as, "a numerous body of *confined* labourers," *Daily News* (London), July 20, 1888.

confinedly (kon-fī'ned-li), *adv.* In a confined, limited, or restricted manner, sense, or degree.

The beauties of Nature, as they have been *confinedly* called. *Lamb*, Life and Letters, I. 214. *N. E. D.*

confirmand (kon-fėr-mand'), *n.* [L. *confirmandus*, that is to be confirmed, gerundive of *confirmare*, confirm.] A candidate for confirmation. *N. E. D.*

confirmant (kon-fėr'mant), *n.* One who confers the sacrament of confirmation.

confiscatable (kon-fis'kā-ta-bl), *a.* [*confiscate* + *-able*.] Liable to be confiscated: as, undeclared goods are *confiscatable*.

conflagrate, *v.* **II.** *intrans.* To burst into flame; take fire, either literally or figuratively. *Carlyle*.

conflagrative (kon-flā'gra-tiv), *a.* Incendiary: as, the *conflagrative* Russians. *Carlyle*.

conflagrator (kon-flā'gra-tor), *n.* [NL. **conflagrator*, < L. *conflagrare:* see *conflagrate*.] One who sets on fire; an incendiary. *N. E. D.*

conflate, *a.* **2.** In *diplomatics*, marked by conflation; inadvertently formed by combining two different readings into one: as, a *conflate* text or passage. *Westcott and Hort.*

confluence, *n.* **4.** In *psychol.*, the mutual assimilation of mental processes set up by adjacent stimuli: opposed to *contrast*. *E. B. Titchener*, Exper. Psychol., I. ii. 323.

Confluent fruit, measles. See ★*fruit*, ★*measles*.

conflux, *n.* **3.** The point or place where lines meet.

confocal, *a.* **II.** *n.* A figure having the same focus as another.

A theorem which of course includes the corresponding proposition for *confocals* in plano.
Rep. Brit. Ass'n Advancement of Sci., 1902, p. 506.

Conform ferment. See ★*ferment*.

conformable, *a.* **6.** Specifically, that accepts and conforms to the usages of the Anglican Church.

Yet this man that stopped his ears like the adder to the charms of the Bishop, was after persuaded by a lay-man, and grew *conformable*. *Sir J. Harrington.*

conformal (kon-fôr'mal), *a.* [*conform*, *a.*, + *-al*[1].] **1.** Of the same form.—**2.** In *math.*, conserving angles or establishing infinitesimal similarity.

If ds is the element of arc on the plane, $d\sigma$ that corresponding to it on the sphere, we have

$$d\sigma = \frac{ds}{x^2+y^2+1},$$

a formula of great importance hereafter, inasmuch as it indicates the *conformal* character of the representation.
F. Hardcastle, Riemann's Theory of Algebraic Functions, [p. 15.

Conformal representation. See ★*representation*.

conformer, *n.* **2.** An apparatus for obtaining a graphic tracing of the form of the body.

conformist, *n.* **2.** In *entom.*, a British collector's name for a noctuid moth, *Xylina conformis*.

conformity, *n.* **4.** In *geol.*, parallelism of dip and strike between two strata or groups of strata. It may be produced by faulting, differing in this respect from conformability.

conformly (kon-fôrm'li), *adv.* In a conform way; so as to conserve angles.

con forza (kon fôrt'sä). [It.] In *music*, with force or power.

confrunt, *v.* A simplified spelling of *confront*.

confusion, *n.*—**Confusion of goods,** in *law*, an admixture of the property of two or more persons so that the individual property of each cannot thereafter be determined.

Confusional insanity. See ★*insanity*.

Cong. An abbreviation (*a*) of *Congregation*, *Congregational*, or *Congregationalist;* (*b*) of *Congress* or *Congressional*.

congelation, *n.* **3.** The deposition of a mineral substance, as from an aqueous solution, either in crystals or otherwise: used particularly in regard to the formation of stalactites.

congener, *n.* **2.** In *anat.*, a muscle which acts with another in producing the same movement.

conger[1], *n.*, **1.** Most of the species undergo a metamorphosis, the young being loosely organized and transparent, band-shaped, and with very small head. The body grows smaller with increased age, owing to the compacting of the tissues, until the age when the growth in the usual direction begins.

In 1864 the American naturalist, Gill, published the conclusion that L[eptocephalus] morrisii was the young or larva of the *conger*, and Leptocephali generally the young stages of species of Murænidæ. In 1886 this conclusion was confirmed from direct observation by Yves Delage, who kept alive in a tank at Roscoff a specimen of L. Morrisii, and saw it gradually transformed into a young *conger*. *Encyc. Brit.*, XXVII. 685.

conger-eel, *n.* **4.** In Australia, *Leptocephalus labiatus*, *Leptocephalus conger* L., and *Gonorhynchus Gronow*.

Congeria (kon-jē'ri-ą), *n.* [NL., from *Conger*, a surname.] A genus of extinct *Pelecypoda* having large mytiliform shells with double myophores: abundant in the Pliocene Tertiary.—**Congeria stage,** in *geol.*, the lowest stage of the Pliocene Tertiary in the Vienna basin: so named from the abundance of the molluscan genus *Congeria*.

congestin (kon-jes'tin), *n.* [*congest* + *-in*[2].] A poison found in the tentacles of *Actiniæ*.

congestion, *n.*—**Active congestion,** arterial congestion due to greater afflux of blood to the part: distinguished from *passive* or *venous congestion*, which arises from obstruction to the escape of blood from the part.

Conglobate gland. See ★*gland*.

conglomerate, *n.*—**Allegrippus conglomerate,** in *geol.*, a mass of gray sandstones and conglomerates occurring in central Pennsylvania. It attains a thickness of 1,600 feet, and is regarded by the geologists of that State as equivalent to the lower part of the Chemung stage of New York, that is, as appertaining to the Upper Devonian.—**Bloomsbury conglomerate,** in *geol.*, a division of Middle Devonian age underlying the Dadoxylon sandstone in New Brunswick.—**Crush conglomerate,** in *geol.*, an aggregate of rounded fragments of rock, produced by the crush along a fault-line.—**Dwyka conglomerate,** in *geol.*, a formation in South Africa of great thickness and extent, composed of pebbles and boulders, the latter often weighing a ton or more. It contains no fossils, but is regarded by most writers as a sheet of glacial deposits, the age of which has not been definitely ascertained, though it doubtless belongs to the closing stages of Paleozoic time.—**Mispec conglomerate,** in *geol.*, a division of the Middle Devonian series in New Brunswick.—**Olean conglomerate,** in *geol.*, a subdivision, in New York, of the Upper Carboniferous or Pennsylvanian series, the highest and latest of the Paleozoic rocks in that State. It is a quartz-pebble conglomerate overlain by a small amount of shale, and has been found to contain plant remains of the age of the Pottsville sandstone of Pennsylvania.—**Oneida conglomerate,** in *geol.*, a division of the Paleozoic series in New York, lying

at the base of the Upper Silurian, above the Lorraine beds and below the Medina sandstone. It consists largely of white-quartz conglomerate and sand, and carries no fossils, but attains considerable thickness, especially in eastern New York, where it constitutes the greater part of the Shawangunk Mountains and is termed the Shawangunk grit.—**Panama conglomerate**, in *geol.*, a conglomerate lentil in the midst of the Cattaraugus red-shale formation of the Paleocarbonic series in Cattaraugus and Chautauqua counties, New York, and McKean and Warren counties, Pennsylvania. It has also received the names of *Salamanca, Mount Hermon, Pope Hollow,* and *Tu ta conglomerate.*—**Prieska conglomerate**, in *geol.*, a conglomerate of Upper Carboniferous or Permian age in the Orange River Colony, South Africa, regarded by some writers as of glacial origin.—**Skunnemunk conglomerate**, in *geol.*, a local conglomerate of great thickness capping the Skunnemunk and Bellvale mountains, in southeastern New York, and overlying the Middle Devonian Bellvale flags.—**Wolf Creek conglomerate**, in *geol.*, a local conglomerate in Allegany and Cattaraugus counties, New York, lying on the Cattaraugus shales and containing the earliest evidences of the Carboniferous fauna in this section.

conglutinated (kon-glö′ti-nā-ted), *p. a.* Same as *conglutinate, a.*

Congo blue, brown, etc. See *Kongo* ★*blue,* ★*brown,* etc.

Congolese (kong-gō lēz′), *a.* [*Congo* + *-l-* + *ese* (prob. after *Angolese,* from *Angola*).] Of or pertaining to the Kongo region, especially to the Kongo Free State. Also *Kongolese.*

congonha (kon-gōn′yä), *n.* [Brazilian.] A shrub of southern Brazil, *Villaresia Congonha,* belonging to the family *Icacinaceæ.* From its leaves is prepared a beverage like mate, and on the Paraguay river it is called *mate.*

congo-root (kong′gō-röt), *n.* Same as *Samson's snakeroot,* under *snakeroot.*

congratulant, *a.* **II.** *n.* One who congratulates: a congratulator. *Carlyle.*

Cong. Rec. An abbreviation of *Congressional Record.*

congreganist (kong′grē-gan-ist), *n.* [F. *congréganiste,* irreg. < *congrégan(t),* congregant, + *-ist.*] In the *Rom. Cath. Ch.,* one who belongs to one of those religious associations which go under the common name of *congregations.* See *congregation,* 6.

congregant (kong′grē-gant), *n.* [L. *congregans* (*-ant*), ppr. of *congregare,* congregant.] A member of a congregation or assembly.

congregation, *n.* **10.** The coming together of the elements of a population by immigration, as opposed to the growth of a population by a birth-rate in excess of a death-rate. It is an aggregation of individuals or of families that have not been living together from their birth, and that therefore come together as partial or entire strangers. *Giddings,* Prin. of Sociol., p. 91. See *genetic* ★*aggregation.*

congregationalize (kong-grē-gā′shon-al-īz), *v. t.*; pret. and pp. *congregationalized,* ppr. *congregationalizing.* [*congregational* + *-ize.*] To render congregational in regard to polity: as, to *congregationalize* a Presbyterian church.

congregationist (kong-grē-gā′shon-ist), *n.* [*congregation* + *-ist.*] A member of a (Roman Catholic) congregation; a congregant.

congregativeness (kong′grē-gā-tiv-nes), *n.* Tendency to congregate or form assemblies, communities, etc., as for protection, social enjoyment, profit, etc.

congregator (kong′grē-gā-tor), *n.* [LL. *congregator,* < *congregare,* assemble; see *congregate.*] An assembler; one who collects, calls, or brings together.

He was the *congregator* of those great spirits who presided over the resurrection of learning.
J. A. Symonds, Study of Dante, vii. 4.

congressionalist (kon-gresh′on-al-ist), *n.* [*congressional* + *-ist.*] A member of a congressional party; one who favors or supports congressional action or congressional measures.

congressist (kong′gres-ist), *n.* [*congress* + *-ist.*] A member of a congress (as of scientists, educators, or the like).

Contribute . . . to the enlargement of the geological experience and knowledge of the *congressists.*
Nature, Sept. 24, 1903, p. 515.

congruence, *n.* **5.** In *geom.,* identity in shape and size. Its symbol is ≡.

In the traditional geometry the foundation of all proof by Euclid's method consists in establishing the *congruence* of magnitudes.
G. B. Halsted, in Popular Astronomy, VIII. May, 1900, [p. 277.

6. In *line geom.,* a set of ∞^2 lines, such that any two given conditions determine a definite finite number of lines of the set.

To any set of ∞^2 lines the name *congruence* is attached.
C. M. Jessop, A Treatise on the Line Complex, p. vii.

congruent, *a.* **5.** In *geom.,* identical in shape and size.

But since no part of a curve can be *congruent* to any piece of a straight, so, for example, no part of a circle can be equivalent to any sect.
G. B. Halsted, in Pop. Astron., May, 1900, p. 277.

congruism (kong′grö-izm), *n.* [F. *congruisme,* < NL. **congruismus,* < L. *congruus,* suitable, congruous: see *congruous.*] In *theol.,* the theory which makes the efficacy of grace depend upon its congruity with the conditions or circumstances under which it is granted.

congruist (kong′grö-ist), *n.* [F. *congruiste,* < NL. **congruista,* < L. *congruus,* congruous: see *congruous.*] In *theol.,* one who holds the theory of congruism.

congruistic (kong-grö-is′tik), *a.* Pertaining to congruism or congruists.

Congruous grace. See ★*grace.*

Coniacian (kō-ni-ā′shian), *a.* and *n.* [NL. **Coniacianus* for **Coniacanus,* < ML. *Coniacum,* Cognac.] **I.** *a.* In *geol.,* pertaining to a division or substage of the Cretaceous formation in France and Belgium, consisting mainly of white chalk and constituting the lowest member of the Senonian: essentially equivalent to the Dover Chalk in the English succession. It lies below the Santonian and above the Angoumian.

II. *n.* The Coniacian division.

Conic pencil, range. See ★*pencil*[1], ★*range.*

conic, *n.*—**Conjugate conics,** in *geom.,* two concentric conics when the polars, with respect to them, of any point are parallel, and equidistant from the common center.—**General conic,** in *geom.,* the locus of the general equation of the second degree between two variables, $Ax^2 + 2Hxy + By^2 + 2Gx + 2Fy + C = 0$.—**Particular conic,** in *geom.,* the locus arising from giving special values to the constants in the general equation of the second degree between two variables.

coniceine (kō-nis′ē-in), *n.* [*con(ine)* + *-ic* + *-e-* + *-ine*[2].] An alkaloid, $C_8H_{15}N$, which exists in three forms—*α*- and *β*-coniceine, obtained by heating conhydrine with hydrochloric acid (the first is a liquid which boils at 158° C., the second melts at 41° C.), and *γ* -coniceine, found in crude conine. The last boils at 173° C. and is 18 times more poisonous than conine, which it resembles.

conicine (kon′i-sin), *n.* [*con(ine)* + *-ic* + *-ine*[2].] Same as *conine.*

conico-elongate (kon″i-kō-ē-lông′gāt), *a.* Extended in cone-like form.

conicograph (kon′i-kō-graf), *n.* [Gr. κωνικός, conic, + γράφειν, write.] A conic-describing instrument. *Sylvester.*

conicohemispherical (kon″i-kō-hem-i-sfer′i-kal), *a.* Blending in shape the cone and hemisphere.

conicopoly (kon-i-kop′ō-li), *n.* [Tamil *kanakka,* an account or writing, + *pillai,* a person (used also as a title of respect).] In the presidency of Madras, a native writer or clerk. *Yule and Burnell.* [Anglo-Indian.]

conicosubulate (kon″i-kō-sub′ū-lāt), *a.* Slenderly conic; tapering toward a point.

conid[2] (kō-nid′), *n.* [*conidium.*] A shortened and Anglicized form of *conidium.*

conidian (kō-nid′i-an), *a.* Same as *conidial.* [Rare.]

conidiospore (kō-nid′i-ō-spōr), *n.* [*conidium* + Gr. σπορά, seed (spore).] Same as *conidium.*

coniferyl (kō-nif′e-ril), *n.* [*conifer* + *-yl.*] The radical $C_9H_9O_2$.—**Coniferyl alcohol,** the 3-methyl ether of 3, 4-phendiolpropenylol, $CH_3OC_6H_3(OH)C_3H_4OH$. It crystallizes in prisms which melt at 74° C. It is formed, together with glucose, by the action of emulsin on coniferin.

conimene (kō′ni-mēn), *n.* A sesquiterpene, $C_{15}H_{24}$, obtained from icica resin. It boils at 264° C.

coniopterygid (kō″ni-op-ter′i-jid), *a.* and *n.* **I.** *a.* Of or belonging to the family *Coniopterygidæ.*

II. *n.* A member of the family *Coniopterygidæ.*

Coniosporium (kon-i-ō-spō′ri-um), *n.* [NL. (Link, 1809), < Gr. κόνις, powder, + σπορά, seed (spore).] A genus of hyphomycetous fungi which have the hyphæ and sporophores very short and produce a powdery layer of dark simple spores on the surface of the host. About 75 species have been described, mostly saprophytic. *C. Arundinis* is a common species on *Arundo.*

Coniothyrium (kon-i-ō-thir′i-um), *n.* [NL. (Corda, 1840), < Gr. κόνις, powder, + θυρεός, shield (perithecium).] A genus of sphæropsidaceous fungi which have the pycnidia mostly scattered and embedded in the surface of the host. The spores are small, ellipsoid, and dark-colored. Over 150 species have been described, some of which are parasitic. *C. Diplodiella* is the cause of the white-rot of the grape. See *grape-rot.*

coniscope, koniscope (kon′i-skōp), *n.* [Gr. κόνις, dust, + σκοπεῖν, view.] An apparatus for making visible and estimating the quantity of dust in the atmosphere, as distinguished from the dust-counter which is supposed to give an absolute measurement of the number of dust-particles. Specifically, Aitken's koniscope, consisting of a tube inclosing moist paper. When the inclosed air is nearly saturated and is allowed to expand slightly it forms a light mist, and the light transmitted through the tube is dimmed and colored in proportion to the number of dust-particles that serve as nuclei for condensation.

conj. An abbreviation (*c*) of *conjugation.*

conjective (kon-jek′tiv), *a.* [*conject* + *-ive.*] In *projective geom.,* said of two projective primal figures of the same kind of elements when both are on the same bearer.

conjecturably (kon-jek′tū-ra-bli), *adv.* In a conjectural manner; by way of conjecture.

conjectural, *a.* **2.** Given to conjecturing or to depending on mere conjecture: as, a *conjectural* critic.

conjoined, *p. a.* **2.** Bimanual: noting a method of examination or manipulation of an organ with the two hands.—**Conjoined manipulation,** use of the two hands, one externally, the other internally, in obstetrical operations.

Conjoint bundle, in *bot.,* a vascular bundle composed of wood and bast.

conjugable (kon′jö-ga-bl), *a.* [NL. **conjugabilis,* < L. *conjugare,* conjugate.] Capable of being conjugated.

conjugata (kon-jö-gā′tä), *n.* [NL.: see *conjugate.*] The anteroposterior diameter of the human pelvis from the promontory of the sacrum to the symphysis pubis. Also called *conjugate diameter.*—**Conjugata vera** (true conjugata), the diameter of the pelvis measured from the upper and posterior portion of the symphysis pubis to the second sacral segment.

conjugate, I. *a.* **6.** In *gearing,* said of tooth-profiles when they are of such a form that one will drive the other with a constant velocity-ratio, that is, when the ratio of the angular velocity of the driver to that of the driven is constant. The necessary condition for a constant velocity-ratio is that a normal to the two curves at the point of contact shall cut the straight line joining the centers of the gears at the point where it is intersected by the two pitch-circles.

7. United by a transverse furrow, as the paired ambulacral pores of the echinoids.—**Conjugate conics, foramen, spiral, sulphates.** See ★*conic,* etc.—**Harmonically conjugate points.** Same as *harmonic conjugates.*

II. *n.*—**Isogonal conjugates,** two points so related to a triangle that the two rays through them from any vertex are isogonals with reference to that angle. The isogonal conjugate to the centroid of a triangle is called the *Lemoine point* of the triangle.—**Isotomic conjugate.** (*a*) Of a point A with respect to the sect BC, a point A such that the sect AA′ has the same mid-point as BC. (*b*) Of a point O with respect to the triangle ABC, a point O′ such that on it are copunctal AX′, BY′, CZ′ when X′, Y′, Z′ are the isotomic conjugates, with respect to the sides, of X, Y, Z the points where transversals from A, B, C through O meet the sides.

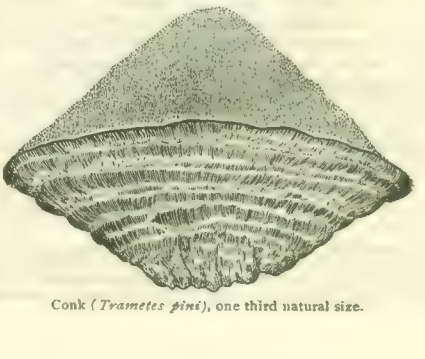
conjugate, *v. t.*—**Conjugated double unions.** See ★*union.*

conjunction, *n.*—**Causal conjunction.** See ★*causal.*

conjunctival fold, reflex. See ★*fold*[1], ★*reflex.*

conjunctive threads, tissue. See ★*thread,* ★*tissue.*

conjunctivitis, *n.*—**Egyptian conjunctivitis.** Same as *trachoma.*—**Spring** or **vernal conjunctivitis,** a form of inflammation of the conjunctiva which prevails especially in the spring.



conjure, *v. t.* **4.** To exorcise or 'lay'; quiet; allay.

The mutinous spirit of the army had been *conjured* by the intrigues of a woman, when the name of the Roman Princeps had failed to coerce it.
C. Merivale, Rom. Empire, V. xlii.

conjustment (kon-just′ment), *n.* [*con-* + (*ad*)*justment.*] Adjustment.

The *conjustment* of man and environment.
W. J. McGee, Smithsonian Rep., 1901, p. 78.

conk[2] (kongk), *n.* [Also *conch, konk;* prob. a figurative use of *conch,* a shell, etc. Com-

Conk (*Trametes pini*), one third natural size.

pare the slang use of *cocoanut*, *knob*, etc., as 'head.'] 1. The head. [Prov. Eng. slang.]—2. The nose. [Prov. Eng. slang.]—3. In *bot.*, a tough, leathery, or woody fungus, especially *Trametes pini*, whose fruiting bodies are bracket-like in form and occur upon the trunks of trees, producing a decay of the timber. [Colloq.]

The *conk* or bracket seen on affected trees is the fruiting organ. On its under side are innumerable minute spores or seeds. These float through the air and lodge upon other trees. *Conk* spores never enter through the bark, but usually through the scars of broken branches. Once the spore is established, root-like fibers grow inward, destroying the structure of the wood. When sufficient nourishment has been extracted a small *conk* is produced, which grows by annual layers on its under side, and in turn liberates millions of spores.
Bureau of Forestry, Bulletin 33, p. 15.

conker (kongk'ėr), *n.* [*conk*[2] + *-er*[1].] 1. A snail-shell.—2. A snail-shell or a horse-chestnut used in a boys' game, in which the object is to break the snail-shell or horse-chestnut by striking it with another.—3. *pl.* The game itself. [Prov. Eng. in all uses.] *Eng. Dial. Dict.*

conky (kongk'i), *a.* [*conk*[2] + *-y*[1].] Attacked by fungi called conks: as, a *conky* hemlock. See ★*conk*[2], 3. [Colloq.]

Conn. An abbreviation of *Connecticut.*

Connaraceæ (kon-a-rā'sē-ē), *n. pl.* [NL (Robert Brown, 1818), < *Connarus* + *-aceæ*.] A family of dicotyledonous archichlamydeous plants of the order *Rosales*, typified by the genus ★*Connarus* (which see), and characterized by 5-merous, chiefly hermaphrodite flowers with separate carpels. There are 19 genera and about 160 species, mostly tropical woody climbers or lianas, with odd-pinnate leaves and flowers in racemes.

connaraceous (kon-a-rā'shius), *a.* Of or belonging to the family *Connaraceæ.*

connarite (kon'a-rīt), *n.* [Also *konnarite* and (incorrectly) *conarite* or *konarite*, < Gr. *κόνναρος*, an evergreen tree, + *-ite*[2].] A hydrated nickel silicate occurring in bright green crystalline grains.

Connarus (kon'ä-rus), *n.* [NL. (Linnæus, 1753, first proposed by him in 1747), < Gr. *κόνναρος*, the name of some unidentified evergreen tree.] A genus of dicotyledonous evergreen trees or shrubs, type of the family *Connaraceæ.* They are characterized by their odd-pinnate coriaceous leaves with entire leaflets, and small white flowers in axillary and terminal panicles. The flowers have five densely pubescent ovaries, one of which develops into an oblique stipitate capsule, the other four being usually abortive. About 70 species are recognized, natives of tropical and subtrophical regions of America, Africa, and Asia, being particularly abundant in the Malay archipelago. See *pigeonwood* (*d*) and *zebra-wood*, 1.

connation, *n.* 3. In *bot.*, the act of growing together, or the state of being grown together, as in connate leaves or petioles. See *connate leaf* (cut), under *connate.*

connect, *v.* **I.** *trans.*—**Connected surface.** See ★*surface.*

II. *intrans.* 2. To make connection in time and place (with another train or boat): as, the boat *connects* with the train at Fall River.

connectible, connectable (kọ-nek'ti-bl, -ta-bl), *a.* Capable of being connected.

Connecticut River sandstone. See ★*sandstone.*

Connecticut trough. See ★*trough.*

connecting-zone (kọ-nek'ting-zōn), *n.* In *bot.*, the zone or girdle connecting the valves of a diatom. See *hoop*[1], 4.

connection, *n.* 8. Whatever connects or is used to connect; a connecting part or thing: as, hot-water *connections.*—**Cascade connection,** in *elect.*: (*a*) Connection in series, that is, so that the same current passes through different apparatus, as Leyden jars. (*b*) Inductive series connection of induction motors or transformers, that is, such connection that the primary of the first apparatus connects to the supply-circuit, the secondary of the first to the primary of the second apparatus, the secondary of the second apparatus to the receiving-circuit or to the primary of a third apparatus, etc. Usually called *concatenation* or *tandem connection.*—**Huntingdon Connection,** the sect of Methodists organized in England by the Countess of Huntingdon (1760). The Connection still exists, with about 30 chapels. See *Huntingdonian.*—**Multi-circuit connection,** in *series arc-lighting*, a method of connecting in series alternately an arc-circuit consuming voltage and a section of the arc-light generator or constant-current transformer generating this voltage. By this means a very large number of arc-lamps can be operated from one machine or transformer without excessive voltages in any arc-circuit.—**New Connection.** (*a*) A body of Baptists in England which seceded in 1770 from the General or 'Arminian' Baptists, condemning the Unitarian tendencies in the latter and holding to the original Arminian doctrines. (*b*) A body of Methodists in England which seceded from the Wesleyan Methodist Connection (1797), advocating the distribution of power of government between the ministers and the laity.—**Ring connection, star connection,** in *elect.* See ★*polyphase.*—**Tandem connection.** Same as *cascade* ★*connection.*

connectionalism (kọ-nek'shọn-al-izm), *n.* [*connectional* + *-ism*.] The theory and practice of the system of the Methodist connection, that is, the complete organization and unification of the different societies by means of the class-meeting, the itinerant ministry, the conference, etc.

connection-peg (kọ-nek'shọn-peg), *n.* In *elect.*, a metallic peg or plug, usually conical, employed in making temporary electrical connections. For this purpose the peg is inserted in the conical hole of a contact-block or connection-strip or between two blocks or strips, serving in the latter case to bridge the gap between the blocks or strips.

connection-plug (kọ-nek'shọn-plug), *n.* In *elect.*, same as ★*connection-peg.*

connection-strip (kọ-nek'shọn-strip), *n.* In *elect.*, a metallic strip joining points on a switchboard between which permanent electrical connection is desired, or serving a similar purpose in the case of any other electrical apparatus.

connective, *a.*—**Connective arrangement,** that special feature of the psychophysical organism, whatever it may be, by virtue of which attention and volition after they cease, as far as the subject can be aware, leave behind a continuance of their effects, perhaps more efficient than they. Thus, in reading music one first notices the clef, and then, without further apparent attention to it, proceeds to read the music without difficulty, although the signification of every note depends upon the clef, the thought of which does not consciously persist through the reading. *G. F. Stout*, Anal. Psychol., I. 124.—**Connective-tissue tumor.** See ★*tumor.*

connectivity (kon-ek-tiv'i-ti), *n.* [*connective* + *-ity*.] In *math.*, the order of connection. In Riemann's theory the connectivity of a surface is p, the number of loop-cuts which can be drawn on the surface without resolving it into distinct pieces. For the sphere, p = 0, since it is divided into 2 disconnected regions by any closed curve drawn on its surface. For the ordinary anchor-ring, p = 1; a cut can be made along one and only one closed curve — though this may have a very arbitrary form — without resolving the surface into distinct portions.

connector, *n.* (*d*) In *geom.*, one of the ranges determined by *n* coplanar points ('dots') in a polystigm.

In the case of a tetrastigm, it is often convenient to use the word opposite. Thus, in the tetrastigm ABCD the *connector* CD is said to be opposite to the *connector* AB; and AB, CD are called a pair of opposite *connectors.* It is evident that the six *connectors* of a tetrastigm consist of three pairs of opposite *connectors.*
R. Lachlan, Mod. Pure Geom., p. 83.

connexionalism, *n.* See ★*connectionalism.*

conning-tower, *n.*—**Conning-tower shield,** an armor-plate at the rear of the entrance at the back of a conning-tower to protect the opening from the enemy's projectiles.—**Conning-tower tube,** an armored tube, extending from the floor of the conning-tower to the protective deck, in the interior of which are placed the transmission-shafts of steering-gear, speaking-tubes, signal-wires, etc., leading from the conning-tower below.

conniption (kọ-nip'shọn), *n.* [A made word of Latin appearance, as it were a blend of *con(vulsion)* and *(er)uption.*] An attack of hysteria; a fit of rage or vexation. [Slang, U. S.]

connive, *v. i.* 6. In *biol.*, to be connivent.

connivence, *n.* 2. In *nat. hist.*, the convergence of parts toward a common point. Same as *connivency*, 2.

The *connivence* of the anthers in a cone.
Lindley, Nat. Syst. Bot., p. 225. *N. E. D.*

connoisseurship, *n.* 2. Skill as a connoisseur; proficiency as an art critic.

Conoquenessing sandstone. See ★*sandstone.*

connotively (ko-nō'tiv-li), *adv.* In a connotive manner.

Among some primitive peoples, individual names are applied *connotively* in such manner as to indicate order or rank, which is synonymous with position in the camping group. *Smithsonian Rep.*, 1892, p. xxiv.

connubium (kọ-nū'bi-um), *n.* [NL. use of L. *connubium*, marriage.] In *bot.*, the stage at which the protoplasm of filamentous algæ coalesces in conjugation.

conocarpium (kō-nọ-kär'pi-um), *n.*; pl. *conocarpia* (-ä). [NL.] Same as *conocarp.*

Conoceras (kọ-nos'e-ras), *n.* [NL., < Gr. *κῶνος*, a cone, + *κέρας*, a horn.] A genus of nautiloid cephalopods or orthoceratites, having a straight shell with closely crowded septa in which the funnels are split on one side, the hiatus being closed by a flattened fold extending from one funnel to the next. It is of Lower Silurian age.

Conocoryphe (kō-nọ-kor'i-fē), *n.* [Gr. *κῶνος*, a cone, + *κορυφή*, vertex.] A genus of trilobites of Cambrian age, with rather small head, free cheeks carrying the genal spines, thorax

with 14 segments, and small pygidium. The genus is also called *Conocephalites.*

Conoidal pump. See ★*pump*[1].

conoodle, *v.* See ★*canoodle.*

conopid (kō'nọ-pid), *a.* and *n.* **I.** *a.* Of or belonging to the dipterous family *Conopidæ.*

II. *n.* A member of the family *Conopidæ.*

conopodium (kō-nọ-pō'di-um), *n.*; pl. *conopodia* (-ä). In *bot.*, a conical receptacle.

Conorbis (kō-nor'bis), *n.* [L. *conus*, a cone, + *orbis*, a circle.] A genus of gastropods belonging to the family *Conidæ*, which have a high spire and curved, deeply notched outer lip. It occurs in the Eocene and Oligocene Tertiary.

Conoryctidæ (kō-nọ-rik'ti-dē). *n. pl.* [NL., < *Conoryctes*, the type genus, + *-idæ*.] A family of extinct primitive edentate mammals belonging to the subborder *Ganodonta.* The species are from the Wasatch (Eocene) of the western United States. *Wortman*, 1896.

conotheca (kō-nọ-thē'kä), *n.*; pl. *conothecæ* (-sē). [NL., < Gr. *κῶνος*, a cone, + *θήκη*, a box.] In the extinct dibranchiate cephalopods termed belemnites, the thin lining of the phragmacone, which is produced forward on the dorsal side into the proöstracum.

conothecal (kō-nọ-thē'kal), *a.* Pertaining to or resembling a conotheca.—**Conothecal striæ,** the striations on the membranous investment of the conotheca of the belemnites.

con ottava (kon ot-tä'va). [It.] In *music*, with the octave, usually the octave above: a direction added to a melody that is to be played in octaves. Abbreviated *con 8va*, *con 8vi*, or simply *8va*, *8vi.*

conplane (kon'plān), *a.* [*con-* + *plane*[1].] Coplanar; situated in a common plane.

conquer-John (kong'kėr-jon), *n.* The smaller or dwarf Solomon's-seal, *Polygonatum biflorum.* See *Solomon's-seal*, 1.

conquien (kon-ki-ān', in Texas usually kōn-kan'), *n.* [Sp. *con quien*, 'with whom?'] A Mexican game of cards for two players. The court cards are all thrown out. Each of the players receives ten cards, two or three at a time. The top of the stock is turned face up, and each in turn says whether or not it shall remain with him. To use it, he must combine it with two or more others in the same suit to make a sequence, or with two or three others of the same denomination. For every card taken from the stock the user must discard one from his hand. All combinations are left face up on the table, and the first to get down eleven cards wins. If neither gets down eleven, it is a tableau or tie.

conquinine (kon'kwi-nin), *n.* [*con-* + *quinine.*] Same as *quinidine.*

Cons. An abbreviation (*a*) of *Constable*; (*b*) of *Constitution*; (*c*) [*l. c.*] of *consonant*; (*d*) of *consul.*

consanguineal, *a.*—**Consanguineal organization,** a social organization based on consanguineous groups.

II. *n.* A person consanguineous with another one.

consanguined (kon-sang'gwind), *a.* Related by birth to another.

consanguineous, *a.* 4. In *petrog.*, derived from a common parent magma: said of igneous rocks.

consanguinity, *n.* 2. In *petrog.*, the genetic relationship existing between those igneous rocks of one locality which have been derived from a common parent magma by processes of differentiation.

conscience-stricken (kon'shens-strik"n), *a.* Same as *conscience-smitten.*

conscientialism (kon-shi-en'shal-izm), *n.* [L. *conscientia*, consciousness (see *conscience*), + *-al*[1] + *-ism*.] The doctrine that an external world is a hypothesis founded on our experience and that this hypothesis ought to be rejected as unnecessary. This is entirely different from the opinion of pragmaticism, which is that nothing exists but objects of consciousness, but that this means possible consciousness, since consciousness in its wider sense is only possibility, and that the external world is entirely contained in that consciousness.

consciousness, *n.*—**Action consciousness,** in *psychol.*, the consciousness immediately preceding, accompanying, and immediately following the performance of an action; specifically, consciousness during the reaction-experiment. *E. B. Titchener*, Exper. Psychol., I. i. 118.—**Association consciousness, associative consciousness,** in *psychol.*, the contents and disposition of consciousness during the process of association of ideas; specifically, consciousness during the associative reaction. *E. B. Titchener*, Exper. Psychol., I. i. 201.—**Consciousness of kind,** the awareness or consciousness on the part of any individual that another individual is in any respect, physical or mental, like himself.

The *consciousness of kind*, then, is that pleasurable state of mind which includes organic sympathy, the perception of resemblance, conscious or reflective sympathy, affection, and the desire for recognition.
Giddings, Inductive Sociol., p. 99.

Cosmic consciousness, a mystical consciousness of the life and order of the universe.—**Disaggregation of consciousness,** the separation of consciousness into more or less disconnected consciousnesses, of which the most striking instances are those of multiple personality. Hypnosis, which has been defined as an inhibition of inhibition, is thought by some writers to be due to a loss of the normal harmony between the action of higher and lower nerve-centers. These writers regard all suggestibility as dependent upon a separation of the controlling and the reflex consciousnesses. In a state of drowsiness the ideas do not hang together; and this is an incipient disaggregation of consciousness. But it is evident that we cannot be directly aware of a disaggregation of awareness, since we "refer our ideas to ourselves," that is to say, have a certain union or harmony of such awareness as there is for us, "ourselves" consisting in this union. Consciousness is essentially a being of wholes.—**Double consciousness, dual consciousness,** in *psychol.*, double or alternating personality; the apparent coexistence or alternation of two selves or persons in one and the same individual. It sometimes happens, with hypnotic subjects, that memory is continuous from hypnosis to hypnosis, as it is from normal state to normal state; so that there seem to be two distinct minds or selves (the normal self and the hypnotic self) within the single individual. Here, however, the facts readily admit of explanation in terms of the known laws of memory. If we wish to revive a past experience, we must reproduce, so far as may be, the total conscious contents that constituted that experience. Now there is a marked difference between the consciousness of profound hypnosis and the waking consciousness. Hence there is no reason why one should remember from hypnosis to waking, or conversely; while there is no reason, psychologically, why memory should not persist from like state to like state, whether the state be normal or abnormal. Much more difficult of explanation are those pathological cases in which the whole mental life of the individual appears to be ruptured, so that two dissociated mental existences present themselves, either in alternating sections, or side by side at the same time. It should, however, be noted that analogies to this condition are afforded by the normal life, and that it is possible to work out a fairly continuous series of instances connecting the abnormal with the normal. Even, then, if we cannot account in detail, and in the particular case, for the sudden transition from a primary to a secondary consciousness, we can at least point to general characters of the human mind from which these extreme symptoms derive.

The psychologists of France, during the past few years, have been diligently at work studying the phenomena of *double consciousness* and double personality in hysterical individuals.

A. Binet (trans.), Double Consciousness, p. 14.

Field of consciousness, in *psychol.*, consciousness considered on the analogy of visual perception. As in the field of vision there is an area of clear perception and a surrounding region of obscure perception, so in the field of consciousness we have the focal area of attention and the marginal or peripheral region of inattention.—**Principle of the economy of consciousness,** the principle that, in understanding anything, we do not actually recall in consciousness more than is necessary for the purpose.—**Reaction consciousness,** in *psychophys.*, consciousness immediately preceding, during, and immediately following a reaction-experiment.

The *reaction consciousness* is the laboratory form of the action consciousness of everyday life.

E. B. Titchener, Exper. Psychol., I. i. 118.

con. sect. An abbreviation of *conic section* or of *conic sections*.

consensually (kon-sen′sū-al-i), *adv.* By consensus or consent.

Consensus gentium, the general persuasion of mankind. This was urged by the Stoics as a confirmation of the opinion that there are immortal gods. The argument was adopted by the scholastic doctors and has been employed by theists ever since.

Consent rule, in *law*, in an action of ejectment, an entry on the record by the defendant confessing the lease, entry, and ouster, and insisting upon title alone.—**Universal consent,** the unanimous assent of all contemporary sane men, or, at least, of all men who are at present qualified to express an opinion which ought to weigh in the mind of a reader. Propositions which are admitted by universal consent ought to be reckoned as absolutely certain, according to the philosophy of common sense, but not in any very exact sense. Thus, it is a matter of universal consent that human thought can cause motions of matter; but when it comes to an exactly defined philosophical statement of this point, there is no universal consent, nor would it have any value if there were.

consentian (kon-sen′shian), *a.* [L. *consentes*, a word of unknown origin (Etruscan ?) and meaning, in the phrase *dii consentes*.] Of or belonging to the *dii consentes*, or twelve superior deities of the Etrusco-Roman religion. *N. E. D.*

consentience, *n.* 2. Agreement of opinion; the quality of being consentient (in sense 1): as, "the *consentience* of contemporary historical witnesses," *Nineteenth Century*, Oct., 1879, p. 679.

consentient, *a.* **II.** *n.* One of two or more agreeing and mutually consenting minds. *Ross*, Moot Points in Sociol., VIII. 762.

consequence, *n.* 7†. In *astron.*, motion from an earlier to a later sign of the zodiac, or from west to east; direct motion.

consequent, *a.* 4. In *phys. geog.*, resulting directly from original conditions; having a course determined by the form or slope of an initial land-surface: as, a *consequent* divide, *consequent* drainage, a *consequent* river, a *consequent* valley, etc. Contrasted with ★*insequent*, 2, ★*obsequent*, 2, ★*antecedent*, 2.

conserv, *v. t.* and *n.* A simplified spelling of *conserve*.

conservation, *n.* 3. In England, a court or board of commissioners having jurisdiction over a port (as London, Liverpool, etc.) or of a river (as the Thames, the Mersey, etc.), and charged with the regulation as well as the conservation of its navigation, fisheries, etc.—**Conservation of areas.** See ★*area*.—**Conservation of density in phase.** See the extract.

In an ensemble of mechanical systems identical in nature and subject to forces determined by identical laws, but distributed in phase in any continuous manner, the *density-in-phase* is constant for the varying phases of a moving system; provided that the forces of a system are functions of its coördinates, either alone or with the time.

J. W. Gibbs, Statistical Mech., p. 9.

Conservation of extension in phase. See the extract.

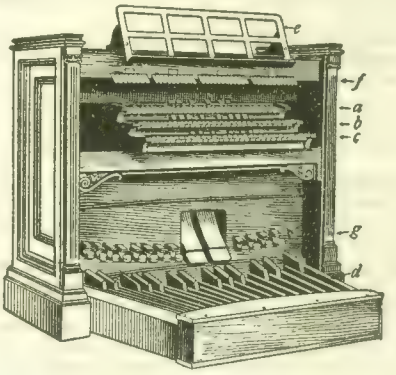
When the phases bounding an extension in phase vary in the course of time according to the dynamical laws of a system subject to forces which are functions of the coördinates either alone or with the time, the value of the extension-in-phase thus bounded remains constant. In this form the principle may be called the principle of *conservation of extension-in-phase*.

J. W. Gibbs, Statistical Mech., p. 10.

Law of conservation of mass, the law that the mass of any system is unchanged by any process which takes place within that system.—**Law of conservation of matter,** the general fact that in the innumerable changes of properties undergone by matter, involving the production and the disappearance of particular substances, there is neither creation nor destruction of matter in the abstract, or, in other words, that the total quantity of matter in existence, as far as observable by us, is unchangeable. Thus, when a piece of wood burns it ceases to exist as wood, and at the same time a part of the oxygen of the surrounding air ceases to exist as oxygen gas, but instead of these there come into existence and mingle with the remaining air carbon-dioxid gas and vapor of water, and the sum of the quantities of these newly formed substances exactly equals the sum of the quantities of those which have disappeared.

conservatist (kon-sėr′va-tist), *a.* and *n.* Conservative, or a conservative.

conservative organs. See ★*organ*[1].



consider, *v. i.* 3. To look carefully or attentively. *Lev.*, xiii. 13.

consideration, *n.*—**Illegal consideration,** a consideration which will not support a contract by reason of the fact that the thing done or promised is contrary to public policy.—**Impossible consideration,** a consideration which from its nature cannot be performed. Such a consideration is void in law.—**Meritorious consideration,** a consideration based upon natural love and affection. A contract depending upon such consideration will be sustained in a court of equity where the relations of the parties are such as father and son, brother and sister, husband and wife, etc.; otherwise not.—**Moral consideration,** a consideration based upon moral duty, but which carries with it no legal obligation.—**Past consideration,** something done prior to the making of a contract. The contract cannot be enforced upon a past consideration alone.

consigne, *n.* 2. A form of punishment consisting in confinement to prescribed limits.

Consilience of inductions, the agreement in final result of scientific investigations along widely different lines of research: a term introduced by Whewell. Instances of this phenomenon are extremely rare. But the agreement between the determinations of the number of atoms in a molecule by osmotic pressure and the depression of the freezing-point of solutions, the rough agreement of different estimates of the size of molecules, the agreement of the different ways of determining the velocity of light, etc., may be considered as a consilience of inductive arguments in favor of the different general principles upon which these various determinations were based.

consimilar, *a.* 2. In *bot.*, having both sides alike: specifically applied to the valves of a diatom.

Console.

a, swell-organ keyboard or manual, with six combination pistons above affecting the swell-organ stops; *b*, great-organ keyboard or manual, with eight combination pistons; *c*, choir-organ keyboard or manual, with six combination pistons; *d*, pedal-organ keyboard, which is both concave and radiating; *e*, music-rack; *f*, tilting tablets, controlling both stops and couplers (taking the place of the draw-knobs formerly used), grouped according to the keyboards to which they belong, those of the pedal organ being on the left, those of the choir-organ next, etc.; *g*, combination pedals, with two swell pedals in the center, the one belonging to the swell-organ, the other to the choir-organ.

consistency, *n.*—**Rule of consistency,** a designation sometimes applied to Kant's moral law, "Act only on such a principle as thou canst will should be universally adopted."

consistent equations. See ★*equation*.

consociationism (kon-sō-shi-ā′shon-izm), *n.* The theory and practice of consociatism.

consolation, *n.*—**Dutch consolation,** the thought that things might be worse, or might have been worse.

console[2], *n.* 4. In *organ-building*, the desk in which the keyboards and stop-action are contained and before which the player sits. Where the action is pneumatic or electric, the console may be quite detached from the rest of the instrument and even capable of movement from one position to another, the action being transmitted through tubes or wires. In this case it is said to be movable. See cut in preceding column.—**Detached console.** See ★*console*[2], 4.—**Movable console.** See ★*console*[2], 4.

Consolidated annuities. See *annuity* and *consols*.—**Consolidated content.** See *Funded* ★*content*

consolidating-apparatus (kon-sol′i-dā-ting-ap-a-rā″tus), *n.* In the crinoids of the family *Cupressocrinidæ*, a peculiar annular structure situated on the upper interior margin of the calyx between the arm-bases.

consolidation, *n.* 7. In *geol.*, the mechanical process by which separated parts of a rock are brought closer together through pressure. The pressure may be due to superincumbent weight or lateral thrust, or it may accompany mineral growth and metasomatism. Fine sediments, such as silts or muds, are most affected by this process. The included water, which largely acts as a separating film in them, is squeezed out, bringing the mineral particles into contact. This, together with mechanical readjustments of the particles themselves, results in great increase of cohesion. *Van Hise*, U. S. Geol. Sur., Monograph 47, p. 59b.

8. In *finance*, the combining of two or more sources of revenue into a common fund, or of varied forms of public indebtedness into a stock bearing interest at a uniform rate. *N. E. D.*

consolute (kon-sō-lūt′), *a.* [*con-* + *solute*.] In *phys. chem.*, commonly soluble: when two solvents which do not mix are in contact and have each in solution a given third substance, the latter is sometimes said to be *consolute*, that is, to be a solute common to the two solvents.

He showed that in the case of two non-miscible liquids and a *consolute* liquid, the equilibria can be represented by the mass law equation, and that there are only two sets of equilibria over the whole range of concentration, and these are represented by two different equations.

Jour. Phys. Chem., April, 1904, p. 248.

conspiracy, *n.* 3. An ancient writ which was issued against parties alleged to be guilty of a conspiracy to indict a party for treason or a felony.

conspirital (kon-spir′i-tal), *a.* [In form, < L. *com-*, together, + *spirit*(*us*), spirit, + *-al*. The sense implies a formation from *conspire* or *conspir*(*acy*) + *-ital*.] Constituted conspiracy.

Unscrupulous adventurers . . . create relations of personal allegiance by means of bribery, patronage and preferment. Intrigue and conspiracy are the social bonds. The social type is the *conspirital*.

Giddings, in Am. Jour. Sociol., X. 169.

const. An abbreviation (*a*) of *constitution*; (*b*) of *constable*.

constable, *n.* 3. The commander of a constabulary or company of men-at-arms.

In the matter of administrative organization the men-at-arms were distributed into constabularies, being commanded by officers called *constables*.

J. W. Fortescue, Hist. Brit. Army, I. i. 2.

constancy, *n.* 4. A constant job: as, "a *constancy* and good wages promised for a good workman," *The Scotsman* (advt.).

constant. I. *a.*—**Constant current.** See ★*current*[1].—**Constant-deviation spectroscope.** See ★*spectroscope*.—**Law of constant heat sums, law of constant proportion.** See ★*law*[1].

II. *n.*—**Affinity constants.** See ★*affinity*.—**Capillary constant,** a numerical constant denoting the attraction between two surfaces to which the phenomenon of capillarity is due.—**Constant of aberration.** (*b*) The semimajor axis of the aberrational ellipse which every star apparently describes in a year on account of the aberration of light. It is very nearly 20.5″.—**Constant of capillarity.** See *capillary* ★*constant*.—**Constant of light-equation,** the number of seconds by which the distance of a body, expressed in astronomical units, must be multiplied to give the corresponding equation of light. (See *equation*.) It is 499[s], the time in which light travels from the sun to the earth.—**Constant of nutation,** the semimajor axis of the nutational ellipse described in 19 years by the axis of the earth under the nutational disturbance produced by the moon. Its value is 9.21″.—**Constant of precession,** the average amount by which the equinox moves annually westward along the ecliptic. Its value is at present 50.25″.—**Cyclic constant,** the constant by which a many-valued function changes on describing a cycle.—**Dielectric constant,** in *elect.*, the specific inductive capacity of an insulating medium, measured as the ratio of the capacity of a condenser with this medium as insulator, and the capacity of the same condenser with air-insulation.—**Diffusion constant,** a numerical constant or coefficient denoting the

rate of liquid or gaseous diffusion.—**Dissociation constant,** in *phys. chem.*, a number from which can be computed the degree of dissociation at any desired dilution of any electrolyte which obeys a certain law. The degree of dissociation varies greatly with the varying volume in which a gram-molecule of the electrolyte is dissolved, but from the variable dissociation of an electrolyte we can compute in many cases a quantity which does not vary with the dilution. For an electrolyte which dissociates into two ions, in many cases, if we put m for the degree of dissociation at any volume represented by v, which stands for the number of liters which contain one gram-molecule of the solute, we find $\frac{m^2}{(1-m)v}$ = a constant; and the numerical value of this quantity is the dissociation constant for the given substance.—**Electrical constant,** a numerical quantity, such as the specific inductive capacity, employed to designate or describe some electrical property of a body.—**Kerr's constant,** the quantity K in the expression $\epsilon = K I_N$, where ϵ is the rotation of the plane of polarization of a ray of polarized light reflected from the surface of a magnet and I_N is the normal component of magnetization. Kerr's constant is used in the optical method of measuring the strength of the magnetic field.—**Kundt's constant,** the constant quantity ψ in the equation $\epsilon = \psi I d$, which expresses the power of ferromagnetic substances (taken in thin layers) to turn the plane of polarization of transmitted light. The angle of rotation is ϵ; I is the strength of the magnetic field; and d is the thickness of the layer.—**Level constant.** See ★*level*[1].—**Newtonian constant.** Same as *gravitation constant* (which see, under *constant*).—**Optical constant,** a numerical quantity, such as the index of refraction, employed to designate or describe some optical property of a substance.—**Precession constant,** the quantity $\frac{C-A}{A}$, where C is the moment of inertia of the revolving body about its polar axis and A is its moment of inertia about an equatorial diameter. The seven numerical quantities used to compute the precession of the equinox are also called *precession constants.*—**Radiation constant,** the heat, in calories, lost by radiation from a unit surface in a unit of time when the radiating body has a temperature one degree centigrade above its surroundings; the emissivity.—**Solar constant.** See *solar.*—**Spheroidal constant,** one of the numerical quantities, such as the ratio of the axes, used in astronomy to define quantitatively the form of the earth.—**Temperature constant,** in *phenology,* the thermal constant.—**Thermal constant,** the phenological constant; the total quantity of heat or day degrees required by a plant in order to attain any phase of plant life. This is not, strictly speaking, a constant, and the various attempts to define and compute it are known by the names of the respective authors, as follows: *Adanson's constant* (1750), the sum of all the positive mean daily temperatures on the centigrade scale, counting from the beginning of the year. *Boussingault's constant* (1837), the same as Adanson's except that it counts from the beginning of vegetation. *Marie Davy's constant* (1880), the sum of all the mean daily actinometric degrees in full sunshine, counting from the date of vegetation. *Gasparin's constant* (1847), the sum of all effective temperatures (the excesses of mean daily temperatures in full sunshine above 5° C.), counted on the centigrade scale and from the date in the springtime when such effective temperature is first attained. *H. Hoffman's constant* (1857), the sum of all daily maximum temperatures above freezing, (the positive maxima) on Réaumur's scale, counting from January 1 to the attainment of any given phase of development. *Linsser's thermal constant* (1867), the sum of all mean daily temperatures above 0° C. in the shade, counting from the date when the annual minimum occurs up to any phase of vegetation. *Linsser's local annual thermal constant* (1867), the sum of all the mean daily temperatures above 0° C. in the shade for the whole year at any locality. *Linsser's physiologic thermal constant* (1867), the sum of all the positive daily mean temperatures from germination to the attainment of any phase of vegetation, divided by his local annual thermal constant. *Linsser's local climatic constant* (1869), the sum of all the local rainfalls from germination up to the attainment of any phase divided by the local annual thermal phenological constant. *Hervé Mangon's constant* (1875), the sum of all the positive excesses of mean daily shade-temperatures above 5° C. (T.°—5° C.), counted on the centigrade scale and from the date of vegetation. *Quetelet's constant* (1845), the sum of the squares of the positive daily temperatures, centigrade scale, counting from the date of the awakening of vegetation, when the mean daily temperature is 6° C. *Réaumur's constant* (1735), the sum of all the mean daily temperatures on the Réaumur scale, counting from the date of vegetation.—**Verdet's constant,** the quantity ω in the expression $\epsilon = \omega H d$, where ϵ is the rotation of the plane of polarized light in passing through a layer, of thickness d, of a substance so placed in a magnetic field of intensity H that the light travels in the direction of the lines of force. Verdet's constant (ω) is the rotation per unit variation of magnetic potential. It depends upon the wave-length of the light, the nature of the substance, and the temperature of the latter.

constantan (kon′stan-tan), *n.* [From *Constant,* a personal name.] An alloy consisting of 60 per cent. copper and 40 per cent. nickel. Its electrical resistance, which is more than 50 times that of copper, varies inappreciably with change of temperature; its thermo-electromotive force in combination with copper is very large. It may be heated to 300° C. without oxidation. It is freely ductile.

Constantinian (kon-stan-tin′i-an), *a.* Of or pertaining to Constantine the Great, a Roman emperor, or his reign (306–337 A. D.).

constantino (kon-stan-tē′nō), *n.* [Amer. Sp.] A fish, *Centropomus robalito,* of the family *Centropomidæ:* found from Mexico to Panama.

Constellaria (kon-stel-ā′ri-ä), *n.* A genus of trepostomatous bryozoans growing attached to foreign bodies and having thin-walled cells with abundant mesopores and the surface of the zoaria covered with star-shaped maculæ. It is of Silurian age.

constituent. **I.** *a.*—**Constituent society,** a society which is a constituent part of a larger social order, for example, a business corporation, a church, a political party, or a club. In the constituent society individuals work or find pleasure together, though they may not dwell in the same neighborhood or even in the same state. In the ★component society (which see) individuals dwell together and may or may not work together. *Giddings,* Elem. of Sociol., p. 7.

constitution, *n.*—**Constitution Church,** the church which was established in France by the decree of the Constituent Assembly, July 12, 1790. This decree provided that all bishops should be elected by local conventions of the clergy, without recourse to the holy see, and that the entire clergy should take an oath to maintain the civil constitution provided by the assembly.—**Provincial constitutions,** the decrees of provincial synods held under divers archbishops of Canterbury. *Bouvier,* Law Dict.—**Social constitution.** See ★*social.*

Constitutional Law. (*a*) A valid law; one which is not unconstitutional. (*b*) That branch of the law which defines and interprets the scope and meaning of a constitution.

constitutionally, *adv.* **4.** As regards constitution or composition: as, the substances differ both toxicologically and *constitutionally.*

constitutive, *a.* **3.** In *phys. chem.,* a term introduced by Ostwald to denote those properties of a compound which depend on the constitution of the molecule, or on the mode of union and arrangement of the atoms in the molecule. For instance, of two molecules having the same number of the same atoms, one turns the plane of polarized light to the right and the other to the left; this difference is obviously due to something in the structure of the molecule—it is a *constitutive* property, as distinguished from an *additive* or a *colligative* property.—**Constitutive government.** See ★*government.*

constrain, *v. t.* **6.** In *mech.*: (*a*) To prevent the occurrence of (motion), except in a particular direction: as, the relative motions of the parts of any machine are always *constrained.* (*b*) To prevent the operation of the motion of (a material point or body), except in a particular and definite manner: as, to *constrain* a part of a mechanism.—**Constrained system,** a system of points subject to constraints, that is, forces regarded as infinite which compel a certain relation between their motions.

construct, *a.* **II.** *n.* **1.** Something constructed or created.—**2.** In *compar. psychol.,* the mental picture answering to a real or a possible object of sense: regarded as the mental result of the action of external stimuli.

In all these cases, the object is constructed at the bidding of certain sensations, which suggest to my mind the associated qualities. The object is a *construct.*

C. L. Morgan, Animal Life and Intelligence, p. 312.

3. In *math.,* a configuration or surface.

The notion of monogenic *construct* is wider than that of a monogenic function. *Ency. Brit.,* XXVIII. 541.

constructible (kon-struk′ti-bl), *a.* Capable of being constructed.

construction, *n.*—**Bureau of Construction and Repair.** See ★*bureau.*—**Hennebique construction,** a system of construction in concrete reinforced by steel or iron introduced in various ways. It was first brought to perfection by M. François Hennebique, a French builder. See *reinforced* ★*concrete.*—**Huygens's construction,** a geometrical method, first employed by Huygens, for representing the front of a light-wave. It consists of a set of equal semicircles the centers of which are equidistant points along a line, AB, which represents the front of the wave at a given instant, *t.* The envelop of the semicircles is the wave-front at a later time, *t,* such that their radius measures the progress of the wave during the intervening interval.—**Mill construction,** in *arch.,* construction by means of solid timbers and thick planks with no inclosed hollow spaces. Thus the floors are of very thick planks resting directly on girders. Such a building resists fire, and is often said to be of *slow-burning construction.*—**Terrace of construction.** Same as *alluvial* ★*terrace.*

Huygens's Construction.

constructional, *a.* **2.** Controlled by the original and still prevailing surface attitude and structure of the land: said of watercourses. See ★*consequent* and ★*attitude.*—**3.** Formed by or resulting from consequent drainage: said of land-forms: as, a *constructional* divide or valley.—**Constructional slope.** See ★*slope.*

construction-train (kon-struk′shon-trān), *n.* A train of cars adapted to the conveyance and application to use of the materials for the construction or repair of railroads.

Constructive theft. See ★*theft.*

construe, *v.* **II.** *intrans.* To yield to or admit of grammatical analysis or interpretation: as, a sentence that will not *construe.*

consubstantialist, *n.* **2.** Same as ★*consubstantiationist.*

consubstantiationist (kon″sub-stan-shi-ā′-shon-ist), *n.* One who holds the doctrine of consubstantiation.

consul, *n.* **5.** Formerly, in southern France and Catalonia, a municipal magistrate. *N. E. D.*—**6.** Formerly, within the foreign colony or settlement of a town, the representative chief of the merchants and their intermediary with the local government. *N. E. D.*—**7.** A local representative of a cyclists' touring club.

consul (kon′sul), *v. t.* [*consul, n.*] To submit (an invoice) for certification to the consul of a country to which goods are consigned.

Consular bureau. See ★*bureau.*—**Consular court,** a court of justice presided over by a consul. Such courts are established only in countries where extraterritoriality (which see) has been conceded by treaty to other foreign nations, as by China, and formerly also Japan. The jurisdiction of these courts is limited to suits arising between the consuls' own countrymen, and to hearing and deciding suits brought against any of them by subjects of the country in which the court is established.

Consultation game, in *chess,* a game in which two or more persons play on one side and the moves are made after joint deliberation.

consumption, *n.* **5.** In *Rom. law,* loss of a right of action after commencement of the suit.—**Acute, galloping, hasty, or rapid consumption,** pulmonary tuberculosis running a rapidly fatal course.—**Hatters' consumption,** a catarrhal condition of the bronchial tubes and pulmonary alveoli, due to the inhalation of particles of felt, silk, or other materials used in the manufacture of hats.—**Luxus consumption,** the ingestion of an excessive amount of albuminoid food, far beyond the needs of the organism.—**Potters' consumption,** same as *potters'* ★*asthma.*

consumption-weed (kon-sump′shon-wēd), *n.* The round-leaved wintergreen, *Pyrola rotundifolia*: so called from its supposed medicinal virtues.

consumptive, *a.* **5.** Indicating the presence of consumption: as, a *consumptive* cough.

contact[1], *n.* **4.** In *geol.,* the surface of juncture, specifically of an igneous intrusion and its containing-walls, along which mineralogical and structural changes, and especially ore-deposits, are often developed; also applied to the surface of juncture of any two contrasted rocks.—**5.** In *anthropol.,* the meeting of tribes or peoples of different culture, particularly that of a primitive tribe with the trade and influence of a superior people.—**6.** In *psychol.*: (*a*) A light pressure upon the skin; a low degree of intensity of the adequate stimulus of the pressure-spots. (*b*) A weak sensation of pressure. Some psychologists regard the sensation of contact as qualitatively different from the sensation of pressure. In all probability, however, the two are simply degrees of one and the same sensible quality.

Still other points on the skin, very wealthily interspersed amongst the others, give us, if excited in isolation, sensations of *contact* or of pressure.

Royce, Outlines of Psychol., p. 133.

Contact sensation: Ger. Berührungsempfindung; F. sensation de contact; Ital. sensazione di contatto. A sensation made up probably (Dessoir) of touch sensation and pressure sensation.

Baldwin, Dict. Philosophy and Psychology.

Angle of contact. (*b*) See ★*angle*[3].—**Center of contact,** the point of intersection of two tangents at two points of contact of two conics or other plane curves.—**Circumaxial contact.** See ★*circumaxial.*—**Contact action.** An important application of this principle to industrial purposes is the manufacture of sulphuric acid by the combination of sulphur dioxid with additional oxygen, on passing these gases over heated platinum in a finely divided state, the platinum remaining unchanged, while the resulting sulphur trioxid is conducted into water: spoken of as the *contact process* for the manufacture of sulphuric acid.—**Contact difference of potential, electricity, electromotive force, metamorphism, mineral.** See ★*potential,* ★*electricity,* ★*electromotive,* ★*metamorphism,* ★*mineral.*—**Contact paper,** in *photog.,* sensitized paper used for contact-printing.—**Contact phenomena,** effects produced upon older rocks by the introduction of an igneous mass, as a dike or an intruded sheet. The presence of the more highly heated body, with its attendant mineralizers and the circulation of waters induced, leads to many changes in the minerals and rock-structures near the contact.—**Contact print,** in *photog.,* a print made by the exposure to light of a sensitive surface placed behind and in contact with a negative or other object to be copied. See *contact-printing,* below.—**Contact-printing,** in *photog.,* a process in which sensitized paper or glass is printed in contact with the negative; also, printing upon bromide paper behind, and in contact with a negative, exposed a few feet away from an artificial source of light.—**Contact process,** in *phys. chem.,* a process which is accelerated to a useful rate by contact of the acting substance with another substance which is left unchanged at the end of the process; a catalytic process. See *catalysis* and ★*contact action.*—**Contact reaction,** in *phys. chem.,* a reaction which is much accelerated by contact of the acting substance with another substance that is left unchanged at the end of the reaction; a catalytic reaction.—**Contact substance,** in *phys. chem.,* a substance which accelerates a contact reaction.—**Contact transformation,** in *math.,* a transformation which changes

an element by such substitutions as transform into itself the linear differential equation $dz - pdx - qdy = 0$. Two manifoldnesses, having a contact, that is, having a surface-element in common, are changed by the transformation into two others which also have a contact; hence the name given by Lie to the transformation.—**Contact vein.** Same as *contact deposit*.—**Internal contact,** the apparent contact of the edge of the disk of the moon at the time of an annular eclipse, or of the planets Venus or Mercury at the time of transit with the inner edge of the sun: opposed to *external contact*, when the moon or planet appears to touch the sun's disk from the outside.—**Optical contact,** in *photog.*, the contact of any two substances brought into close union with each other and presenting two instead of four surfaces, as a silver-backed mirror.—**Sensation of double contact.** (*a*) The sensory experience which arises when a movable object, as a stick or a pencil, is thrust or pressed by the hand against a second object, or passed over its surface; the experience of projected touch, in which the sensations appear to have their origin, not in hand or arm, but at the tip of the stick or pencil. (*b*) The sensations aroused by pressure of one part of the skin upon another. (*c*) The twofold sensation (pressure followed by pain) which arises when the skin, for example, of the wrist is tapped with the point of a needle whose shaft is held loosely between the finger and thumb of the other hand.—**Sliding contact,** the communication of motion by means of surfaces which drive with a necessary slipping of one surface on the other, as distinguished from rolling contact, where no slip occurs. Sliding contact occurs when the driving is by cams, the teeth of wheels, screws, wedges, and pin-joints.—**Wipe contact.** (*a*) Interrupted contact; the touching of one part of a machine by another in the course of the travel of either part; the wiping of one part of a machine or engine by another. (*b*) A method of making an electric arc pass between terminals by interrupting an electric circuit, the contact points passing over each other with a sliding or wiping contact. The arc terminals are kept free of oxid or deposit, because the surfaces are cleansed by the sliding action.

contact[2] (kon-takt′), *n.* [L. *contactus:* see *contact*[1], *n.*] One who has been exposed to an infectious disease by contact or near association with a person suffering from it. *Med. Record*, Feb. 28, 1903, p. 346.

contact-bed (kon′takt-bed), *n.* **1.** A layer of filtering-material in a basin of a sewage purification works. The material to be acted on is introduced into the basin and allowed to remain for a time sufficient to be exposed to action by the bacterial energies of the bed. When the process is sufficiently complete, the sewage is decanted, or filtered, and the contact-surface of the filter exposed to sun and air, for the process of growth of aërobic microbes, whose action is to hasten oxidation of the next charge, and its change to harmlessness. The filling of interstitial spaces in the contact-bed with air makes the bed more active. Sometimes called an *aërated filter*.—**2.** In *geol.*, a bed lying next to (in contact with) a formation of a different character.

contact-block (kon′takt-blok), *n.* In *elect.*, a metallic block forming part of an instrument, as a rheostat, and serving, in conjunction with a peg, plug, screw, or brush, to convey current to any portion of the electric circuit with which it may be connected.

contact-irritation (kon′takt-ir-i-tā″shọn), *n.* The irritation produced in the cells of a plant by the contact of an insect or fungus, which frequently stimulates growth and produces slight abnormalities.

Others . . . supplement mere *contact-irritation* and shading by actual absorption from the external cells.
H. M Ward, Disease in Plants, p. 135.

contact-pin (kon′takt-pin), *n.* In *elect.*, a metallic pin by means of which contact for the conduction of current is secured between the parts of any electrical apparatus.

contact-ring (kon′takt-ring), *n.* In *elect.*, a metallic ring on the shaft of a dynamo or motor, or of any electrical apparatus, for the transmission of current, by sliding contact, between the fixed and moving parts.

contact-screw (kon′takt-skrö), *n.* In *elect.*, a screw by means of which metallic contact for the conduction of current is secured between the parts of any electrical apparatus.

contact-stud (kon′takt-stud), *n.* In *elect.*, a stud or peg by means of which metallic contact for the conduction of current is secured between the parts of any electrical apparatus.

contact-vein (kon′takt-vān), *n.* A vein following the plane of contact between different rock-formations.

contagion, *n.* **5.** A contagious disease.—**Psychical contagion,** the propagation of nervous disorders through imitation, as when chorea attacks many children in a school. The dancing manias of the middle ages are typical examples of psychical contagion.

contagiosity (kọn-tā-ji-os′i-ti), *n.* [*contagious* (L. *-iosus*) + *-ity*.] Contagiousness.

Contagium vivum [L., living contagium], a living germ of infectious disease, either a bacterium or a protozoan parasite.

contain, *v. t.* **9.** To hold (a body of troops) in position, usually by deploying the containing force in its front and threatening an attack.

Regiments or even brigades lying flat on the ground, . . . their presence in front of the enemy will have the advantage of *containing* him; but in the open, across which an enemy has to advance, a containing force of a proportion of one man to five of the enemy is quite sufficient. *H. A. Gwynne*, in War's Brighter Side, p. 174.

contano (kon′tä-nō), *v.* [It., 'they count' (time), pres. ind. 3d pers. pl. of *contáre*, count[1], *v.*] In writing music for an orchestra, a direction that a particular instrument is to be silent for a time. Abbreviated *cont.*

content[3], *n.* **6.** The amount or quantity yielded.

The director of the Arizona Experiment Station reported that the sugar *content* in pounds per acre from five characteristic soils of that Territory ranged from 1,491 to 3,361 pounds. *Yearbook U. S. Dept. Agr.*, 1901, p. 41.

Funded content, in *psychol.*, a mental content of the second order, supposed to be produced by the bringing together of other contents into a unitary whole; a form quality, or form of combination.

Funded or consolidated *contents* are, then, such contents as are produced by bringing together, in a very intimate way, various part-contents.
I. M. Bentley, in Amer. Jour. Psychol., XIII. 279.

conterminousness (kon-tėr′mi-nus-nes), *n.* The condition of being conterminous.

contestation, *n.* **5.** Same as *contention*, 5.

contiguity, *n.*—**Synthesis of contiguity.** See ★*synthesis*.

continent, *n.*—**Indo-African continent,** a term referring to the former more or less extensive union of Asia and Africa by a supposed land connection in the vicinity of the southern end of the Red Sea. This is indicated by soundings, but especially by the character of the fossil fauna of the Sivalik Hills, India.—**Dark Continent,** Africa.

Continental divide. See ★*divide*.—**Continental glacier, high, islands,** etc. See ★*glacier*, ★*high*, ★*island*[1], etc.

continentalism (kon-ti-nen′tạl-izm), *n.* [*continental* + *-ism*.] A view, opinion, custom, action, expression, or way of doing things that is peculiar to or characteristic of the continental part of Europe.

continentality (kon″ti-nen-tal′i-ti), *n.* [*continental* + *-ity*.] **1.** The character of being continental. — **2.** In *meteor.*, the extent to which the climate of any spot agrees with the typical continental climate. As defined by Zenker this is measured by the annual range of temperature divided by the sine of the latitude; but he uses the arc itself.

continentalize (kon-ti-nen′tạl-iz), *v. t.*; pret. and pp. *continentalized*, ppr. *continentalizing*. [*continental* + *-ize*.] To make continental; infect with the ideas and ways of the continent of Europe.

contingency, *n.* **4.** In *biometry*, a method of studying statistically biological data that do not admit of numerical expression.

I think . . . I have surmounted the difficulty of scale orders by applying the new method of *contingency*, which completely dispenses with any scale order.
Pearson, in Biometrika, March and July, 1904, p. 150.

Contingent damages, debt. See ★*damage*, ★*debt*.

continuant, *n.* **2.** A consonant such as *f*, *v*, *s*, *z*, etc., the sound of which may be indefinitely prolonged, as distinguished from a 'stop,' such as *p*, *b*, etc., which involves a complete closure of the mouth.

continuating (kọn-tin′ū-ā-ting), *p. a.* Serving to continue.—**Continuating glasses.** See ★*glass*.

Continuation school, a school in which instruction is given, usually in the evening, in continuation or extension of that given in the ordinary day-schools; an evening-school for popular instruction by lesson or lecture. [Eng.] *Nature*, Sept. 17, 1903, p. 492.

continuative, *n.* **3.** In *philol.*, a form that indicates continuation.

The *continuative* [in the Chinook verb] is a purely intransitive tense, because in transitive verbs the object limits the action in such manner as to preclude the possibility of its occurrence.
Amer. Anthropologist, April–June, 1900, p. 213.

Continued fraction of the second order. See ★*fraction*.—**Continued rest.** See ★*rest*[1].

continuist (kọn-tin′ū-ist), *n.* [L. *continuus*, continuous, + *-ist*.] One who holds that a certain thing is continuous; as, specifically, that a declaration or prophecy in the Revelation of St. John refers in part to the past and continues to refer for the rest to the future.

continuity, *n.* **4.** In *biol.*, the existence of successive generations of living beings without any gap or interruption of material composition. See ★*germinal continuity*.—**Amputation in continuity.** See ★*amputation*.—**Doctrine of continuity,** the doctrine that all real variations are continuous and without sudden jumps. The doctrine was particularly advocated by Leibnitz, and more and more fully as his reflections advanced. There are many varieties of the doctrine. Thus, it may be held absolutely or only as a regulative principle, or even only as a sound working hypothesis. It may be held as strictly applying to every character (so that, for example, its advocate will contend that things are more or less real but not absolutely real, etc.) or it may be held under definite or indefinite restriction. The continuity predicated may also be understood in several senses.—**Germinal continuity.** See ★*germinal*.—**Protoplasmic continuity,** in *cytol.*, the connection, by means of very delicate strands of protoplasm, between the living substance of adjacent cells. In plants these strands pass through minute pores in the cell-walls.—**Synthesis of continuity,** direct union of the ends of a fractured bone or the lips of a wound.

continuo (kọn-tin′ū-ō), *n.* [It. *basso continuo*, 'continued bass.'] Same as *figured bass*, which see, under *bass*[3].

Continuous action. See ★*action*.—**Continuous current.** See ★*current*[1], 6.—**Continuous flow calorimeter.** See ★*calorimeter*.

continuum, *n.* **2.** In *math.*, the whole system of positive and negative integral, fractional, and irrational numbers.

contort (kọn-tôrt′), *a.* [L. *contortus*, pp.: see *contort*, *v.*] Twisted; contorted.

contortion, *n.* **3.** In *vegetable teratol.*, an irregular twisting or bending of the stems or branches of plants, due to various causes, usually accidental. *Masters.*—**4.** In *geol.*, the disordered attitude of irregularly folded stratified rocks. *Geikie*, Text-book of Geol.

contour, *n.*—**Complex contour,** in *math.*, a contour consisting of several curves.—**Simple contour,** in *math.*, a non-intersecting closed curve which is a contour.

contour, *v.* **II.** *intrans.* To follow a level line on an irregular slope; imitate the path of a contour-line.

The cliffs and beaches that *contour* around the slopes of the mountains of Utah, where the waves of Lake Bonneville once beat, in many ways resemble the elevated shore lines of western Scotland.
W. M. Davis, Elem. Phys. Geog., p. 319.

contra (kon′trä), *n.* [*contra, adv.*] The contrary or opposite side or thing; in *bookkeeping*, the opposite side or column of an account; especially the right-hand or credit side (in which appear the items against the person whose books are kept).

contra-. (*c*) In *organ-building*, in the names of stops, indicating a stop whose tones are an octave below the pitch of the keys used: as, *contragamba*, etc.

contrabourdon (kon′trạ-bör″don), *n.* In *organ-building*, a stop giving tones an octave lower than the usual bourdon.

contract, *n.* **6.** A contracted word; a contraction.—**7.** In card games in which bids are made, the number of tricks or points which the bidder undertakes to win.—**Certain contract,** in *law*, a contract in which the thing to be done presumably rests upon the will of the party, or when, in the ordinary course of events, it must happen in the manner agreed upon.—**Contract job,** a piece of work executed according to conditions (respecting quality of workmanship, time of delivery, price, etc.) determined by contract in advance of execution: contrasted with a piece of work executed in anticipation of sale, or production for the open market.—**Contract of beneficence,** in *Louisiana law*, a contract in which a benefit is secured to only one of the contracting parties, as a gratuitous loan.—**Contract prices,** prices determined, by contract, in advance of the production of goods: contrasted with *market prices*. The term is sometimes used to designate competitive prices, as distinguished from customary prices.—**Contract surgeon.** See ★*surgeon*.—**Contract system,** the system of obtaining public supplies, or the performance of public services, through the intervention of a contractor, instead of through direct public management or through direct purchase in the open market.—**Dependent contract,** a contract containing one or more dependent covenants. See *dependent covenant*, under *covenant*.—**Gratuitous contract,** a contract in which the object is to benefit the party with whom it is made without any consideration to the other party. Such a contract is not binding unless under seal.—**Hazardous contract,** in *Louisiana law*, a contract in which the performance of that which is the object, or one of the objects, of the contract depends upon an uncertain event.—**Independent contract,** a contract in which the things to be performed by the various parties have no relation to each other as equivalents or as mutual considerations.—**Naked contract.** Same as *nude pact*, which see, under *nude*.—**Nude contract.** Same as *nude pact*, which see, under *nude*.—**Obligation of contract,** the duty imposed by law upon a party to a contract.—**Onerous contract,** a contract in which the consideration is inadequate to that which is given or promised.—**Separable or severable contract,** a contract in which several considerations and corresponding obligations are so expressed as to render the contract susceptible of divisibility in such a way that each or one consideration may be enforced upon the performance of its corresponding obligation.

contracted, *p. a.* **5.** In *gram.* and *phonetics*, shortened by combination or by omission of letters or sounds. See *contract, v. t.*, 3, and *contraction*, 3.

contractile cells. See ★*cell*.

contraction, *n.*—**Anodal closure contraction,** muscular contraction occurring at the anode when the circuit is closed.—**Cathodal closure contraction,** muscular contraction occurring at the cathode at the moment of closure of the circuit.—**Cathodal duration contraction,** muscular contraction occurring at the cathode and continuing during the entire time of the passage of the current.—**Clonic contraction,** an intermittent muscular contraction alternating with intervals of relaxation.—**Coefficient of contraction.** See ★*coefficient*.—**Contraction volume.** See ★*volume*.—**Isometric contraction,** the change in tension in a muscle whose extremities are fixed, upon the application of a stimulus:

opposed to *isotonic* ★*contraction*.—**Isotonic contraction,** the shortening of a muscle upon the application of a stimulus, with approximation of its extremities: opposed to *isometric* ★*contraction*.—**Pflüger's law of contraction,** the law that the stimulation of a nerve by an electric current is stronger at the occurrence of catelectrotonus than at the disappearance of anelectrotonus. It has been ascertained that a nerve is stimulated by an electric current at the moment that the current is made and at the moment that it is broken. As the current is closed, the stimulation occurs at the negative pole; as it is opened, it takes place at the positive pole.—**Tetanic or tonic contraction.** Same as *tetanic spasm*, which see, under *tetanic*.—**Volkmann's contraction,** paralytic flexion of the fingers, presumably caused by tight bandaging in cases of injury to the arm.

contraction-ring (kon-trak'shon-ring), *n.* See the following phrase.—**Contraction-ring of Bandl,** a circular constriction of the pregnant uterus, caused by unequal contraction of the muscular segments, sometimes occurring in threatened rupture of that organ.

contractment (kon-trakt'ment), *n.* Contraction; abridgment.

A very masterly production; . . . with judicious *contractments*, might be rendered an interesting Drama on the stage. *Athenæum*, March 23, 1895, p. 379.

contracurrent (kon-trä-kur'ent), *a.* Noting optical systems in which conjugate focal lengths are of opposite signs, so that if a point moves from right to left its image will move from left to right, and if a point moves in the direction in which the light travels its image will move along the conjugate ray in the direction in which the light travels.

contradeciduate (kon″trä-dē-sid'ū-āt), *a.* Noting that condition in which the fetal placenta does not leave the uterus after birth, but is broken up and absorbed. This occurs in the mole and the bandicoot, the latter being noteworthy as a marsupial having a small placenta. *Parker and Haswell*, Textbook of Zool., II. 562.

contradiscriminate (kon″trä-dis-krim'i-nāt), *v. t.*; pret. and pp. *contradiscriminated*, ppr. *contradiscriminating*. To discriminate contrastively. *Sir W. Hamilton*, **Metaphysics,** Lecture X.

contragamba (kon-trä-gam'bä), *n.* In *organ-building*, a stop giving tones an octave lower than the usual gamba.

contra-generic (kon″trä-jē-ner'ik), *a.* [L. *contra*, against, + *generic*.] Pertaining to characteristically opposite kinds or forms within any specified family, or class of things.

contralation (kon-tra-lā'shon), *n.* [*contra-* + *lation*.] A lation which does not subsist between the members of every pair reciprocally. An *essential contralation* is a lation which must by logical necessity be a contralation; a *potential contralation* is a lation which is under no logical necessity of subsisting between the members of every pair in both orders.

contrambilation (kon-tram-bi-lā'shon), *n.* [*contra-* + *ambi-* + *lation*.] A relation in which no individual of the universe of discourse stands to any other than itself; a concurrency.

contranominal (kon-trä-nom'i-nal), *a.* [L. *contra*, against, + *nomen*, name: see *nominal*.] In *math.*, containing contrasted terms. If *x* is *y*, then non-*y* is non-*x*, and two such statements are called each the *contranominal*, or *contranominal form*, of the other.

contraparallelogram (kon″trä-par-a-lel'ō-gram), *n.* A plane quadrilateral having its alternate sides equal but not parallel, two of them being crossed; the figure formed by the non-parallel sides and the diagonals of an isosceles trapezoid.

Contraparallelogram.

contraperlation (kon″trä-pėr-lā'shon), *n.* [*contra-* + *per-* + *lation*.] A relation in which some individual of the universe of its relate does not stand to any individual of the universe of its correlate.

contrapone (kon-tra-pōn'), *v. t.*; pret. and pp. *contraponed*, ppr. *contraponing*. To convert by contraposition (which see). *Bowen*, Logic, vi.

contraposaune (kon″tra-pō-zou'ne), *n.* In *organ-building*, a stop giving tones an octave lower than the usual posaune or trombone.

contrapositive (kon-trä-poz'i-tiv), *a.* and *n.* I. *a.* Of, pertaining to, or produced by contraposition: as, *contrapositive* propositions; *contrapositive* conversion.

II. *n.* In *logic*, a contrapositive proposition.

contrapposto (kōn-trap-pōs'tō), *n.* [It., pp. of *contrapporre*, < L. *contraponere*, set opposite: see *contrapose*.] In pictorial or sculptural composition, the crossing of limbs and contrasting of masses which is especially pronounced in the works of Michelangelo.

In the figure of the soldan he gives a superb instance of almost Michel-angelesque *contrapposto*.
B. Berenson, in Burlington Mag., III. 20.

contrareperlation (kon″trä-rē″pėr-lā'shon), *n.* [*contra-* + *re-* + *per-* + *lation*.] A relation whose converse is a contraperlation.

contrast, *n.* 5. In *psychol. optics*, the reciprocal induction of colors and brightnesses in the present field of regard. Contrast is essentially a matter of the present moment; under steady fixation the phenomena of contrast give place to those of adaptation. The chief laws of contrast are as follows: (*a*) Contrast always takes the direction of greatest qualitative difference—red-green, blue-yellow, black-white, etc. (*b*) The effect of contrast varies directly with the degree of saturation of the inducing color. (*c*) The nearer together the contrasting surfaces, the greater is the contrast-effect. (*d*) Color-contrast is maximal when brightness-contrast is absent. (*e*) The contrast-effect is enhanced by the elimination of boundary lines or contours.

6. In *psychol.*, generally, any supposed intensification or throwing into relief by juxtaposition with an opposite.

The third law, that of *contrast*, applies to the ethnic mind the curious fact in mental life that a prolonged devotion to one idea leads to a reaction in which the opposite of that idea becomes dominant.
Brinton, Basis of Social Relations, p. 43.

Law of psychical contrasts, in Wundt's *psychol.*, one of the three general psychological laws of relation. The subjective components of our immediate experience are arranged in groups made up of opposite qualities, and these opposites obey in their succession the general law of intensification through *contrast*. *W. Wundt* (trans.), Outlines of Psychol., p. 324.

Marginal contrast, the contrast-effect produced at the apposed edges of two contiguous contrasting surfaces. See ★*contrast*, 5.

contrast-color (kon'trast-kul″or), *n.* A color due to contrast and not to the character of the objective stimulus. *E. B. Titchener*, Exper. Psychol., I. i. 19.

contrast-disk (kon'trast-disk), *n.* A party-colored disk, which when mounted on the color-mixer shows the phenomena of brightness and color-contrast. *E. B. Titchener*, Exper. Psychol., I. i. 17.

contrast-feeling (kon'trast-fē″ling), *n.* In Wundt's *psychol.*, a composite feeling, made up of partial feelings of opposite character, and deriving its own characteristics from this combination: for example, the feeling that accompanies tickling.

contra-stimulant, *n.* 2. A remedy which possesses the property of depressing the vital forces: the opposite of *stimulant*.

contra-stimulation (kon″trä-stim-ū-lā'shon), *n.* The use of contra-stimulants. See ★*contra-stimulus*.

contra-stimulism (kon″trä-stim'ū-lizm), *n.* [*contra-stimulus* + *-ism*.] Medical practice based upon the doctrine of contra-stimulus.

contra-stimulist (kon″trä-stim'ū-list), *n.* [*contra-stimulus* + *-ist*.] An adherent of the medical theory of contra-stimulus.

contra-stimulus (kon″trä-stim'ū-lus), *n.*; pl. *contra-stimuli* (-lī). [L. *contra*, against, + *stimulus*, stimulus.] A force which tends to diminish vital action.—**Doctrine of contra-stimulus,** the doctrine of Rasori, that all vital processes depend upon stimulus, or exciting force, and contra-stimulus, or depressing force. When these two forces are in equilibrium the condition is that of health; when one or the other is in excess disease is present and is to be combated by either a stimulant or a contra-stimulant.

contrastment (kon-trast'ment), *n.* The act of contrasting: contrasting.

contrast-plane (kon'trast-plān), *n.* In a photometer-screen, the plane between the comparison-prisms.

contrast-stain (kon'trast-stān), *n.* Same as ★*counter-stain*.

contratabulant (kon-trä-tab'ū-lant), *n.* [A modern term, irreg. < *contratabul*(*ar*) + *-ant*.] In *civil law*, a possessor or claimant of goods of a decedent contrary to his will or testament.

contratabular (kon-trä-tab'ū-lär), *a.* [A modern term, < L. *contra*, against, + *tabula*, a writing, a will: see *tabular*.] In *civil law*, contrary to or not in accordance with the terms of a will or testament.

contratempo (kon-trä-tem'pō), *n.* [It. *contratempo* = F. *contretemps*: see *contretemps*.] In *music*, same as *syncopation*.

contravindicate (kon-trä-vin'di-kāt), *v. i.*; pret. and pp. *contravindicated*, ppr. *contravindicating*. [LL. *contravindicare*, < L. *contra*, against, + *vindicare*, claim: see *vindicate*.] In *Roman law*, to make an affirmative defense; counter-claim.

contravindication (kon″trä-vin-di-kā'shon), *n.*

In *Roman law*, an affirmative defense; a counter-claim.

contrectation, *n.* 2. In *civil law*, such handling and removing of goods as will amount to theft if they are not restored to their original place.

cont. rem. An abbreviation of the Latin *continuetur remedium*, 'let the remedy be continued.'

contretemps, *n.* 2. In *music*, same as *syncopation*.

contrivancy (kon-trī'van-si), *n.* [*contrive* + *-ancy*.] The contriving faculty, or its exercise.

Jack, then, grew up a rather serious boy, full of strange knowledge, with a passionate love for everything that spoke of *contrivancy* and the mastery of Nature.
Besant and Rice, This Son of Vulcan, ii. 1.

contrive[1], *v. t.* 3. To make out; discover; imagine: as, what had become of him I could not *contrive*. [Colloq.]

control, *n.* 4. Whatever serves to control or check; particularly, a standard of comparison by which, as in scientific investigation or experiment, inferences or results already obtained are checked.

Further study in physiological chemistry, experimental pathology, and allied studies must be undertaken to isolate the exact toxic agents, care always being exercised in maintaining normal *controls* and excluding the products of the disease from those causing it.
Med. Record, Feb. 14, 1903, p. 253.

5. A person or persons who control a business, or act as a check on others concerned.

A resident rival and *control* upon the Doge. *Milman*.

6. In *spiritualism*, the supposed spirit who is alleged to control or direct the action and utterances of a medium.

Everything known to the normal Mrs. T. must be considered equally known to the ostensible "*control*" speaking with Mrs. T.'s mouth.
Sir Oliver Lodge, in Proc. Soc. Psychical Research, [XVII. 65.

7. In racing with motor-cars or motor-cycles, the authorized persons along the route who observe and record the times of arrival and departure of the cars, maintain the time and rate schedule if there is any, and enforce the regulations of the contest.

II. *a.* Of the nature of or used as a control.

Since it is impossible to tell, without removing bits of muscular tissue by a surgical operation, whether any mouse is infected spontaneously, even a severe infection being compatible for many months with a sleek appearance and the usual vivacity, *control* observations were made upon mice during the whole period of the investigation. *Jour. Exper. Med.*, Nov. 29, 1901, p. 9.

Control mice, which were not previously injected with this new Aronson serum, all died when injected with the same fatal dose of streptococcus bouillon.
Med. Record, March 7, 1903, p. 374.

Control test. See ★*test*[1].

controller, *n.* Specifically—2. An officer who has certain duties to perform in examining the accounts and managing the financial affairs of a public or private corporation, or of a city, state, or government. Two controllers are employed by the government of the United States—the *controller of the Treasury* and the *controller of the currency*; the latter administers the laws relating to the national banks. There is also an assistant controller of the Treasury. Some States and cities also have officers styled controllers, with similar duties. [In this sense often spelled *comptroller*, a false form (see the etymology).]

Should we have ministers of the church to be *comptrollers* of the myntes? *Latimer*, Ploughers (Arb.).

My excellent friend Sir Byam Martin, *Comptroller* of the Navy. *Sir J. Ross*, N. W. Pass., II. 8.

4. In *mech.*, a part of an apparatus or an adjunct which controls the motion or operation of the main part. Specifically, in *elect. engin.*, a compact arrangement of switches, contacts, electromagnets, and rheostats, manipulated by one or more handles or hand-wheels, by means of which one or more electric motors, connected by electric wires to the controller, are started or stopped, or their speed is controlled: as, an electric street-car *controller*; an electric turret-turning *controller*.

5. In *ship-building*, a heavy iron block secured to the deck near a hawse-pipe, with a movable section so arranged that the chain cable passing over it is held or allowed to run out as the movable section is lowered or raised.—**Master controller,** in the multiple-unit system of electric-railway operation, a main controller, which operates the controllers in the individual units or cars from one point.

controlling-bit (kon-trō'ling-bit), *n.* A bit consisting of a long piece of rawhide with loops at the ends for rein-rings. The mouthpiece is formed into a loop, the two ends running parallel and held together by small metal rings: the double portion of the loop is put into the horse's mouth, the single portion passing under the jaw.

controlling-valve (kon-trō'ling-valv), *n.* Any valve for regulating pressure or speed, as with steam, air, or water, in motors or other machinery.

controversialism (kon-trō-vėr'shal-izm), *n.* A controversial spirit, tendency, or habit.

conular (kon'ū-lär). *a.* [*conul(us)* + *-ar*[1].] Cone-shaped; having a tendency to assume the shape of a cone; in *zoöl.*, said of the cusps or ridges of teeth. [Rare.]

The specimen, which belongs to *M. latidens* or a closely related species, exhibits an interesting stage in the passage of the molar teeth of the Proboscidea from the *conular* type of the mastodons to that of the elephants, where the enamel is arranged in numerous transverse laminæ. *Science*, April 8, 1904, p. 585.

conule (kon'ūl), *n.* [NL. *conulus.*] In sponges, same as ★*conulus.*

conulus (kon'ū-lus), *n.*; pl. *conuli* (-lī). [NL., dim. of L. *conus*, cone: see *cone.*] In sponges, a tent-like elevation of the surface, produced by the vertical projection of the principal fibers of the skeletal system.

co-numerous (kō-nū'mė-rus), *a.* [*co-*[1] + *numerous.*] Co-extensive, or equal in number.

Organs or senses . . . *co-numerous* with the modes of existence.
D. Masson, Recent Brit. Philos., p. 133. *N. E. D.*

conus, *n.* **3.** A patch of atrophied choroid near the optic papilla in myopia.

conv. An abbreviation (*a*) of *convent;* (*b*) of *convention.*

convalescence, *n.* **2.** In *Roman law*, the establishment of a right or title by the retroactive effect of removing an original defect in its validity.

convallamaretin (kon″val-a-mar'e-tin), *n.* [*convallamar(in)* + Gr. *ῥητίνη*, resin.] A crystalline compound, $C_{20}H_{36}O_8$ (?), formed, together with a sugar, by the hydrolysis of convallamarin.

convallaretin (kon-va-lar'e-tin), *n.* [*Convalla(ria)* + Gr. *ῥητίνη*, resin.] A crystalline product, $C_{14}H_{26}O_3$, obtained by warming the glucoside convallarin contained in the lily-of-the-valley (*Convallaria majalis*) with dilute mineral acids.

Convallariaceæ (kon-va-lā-ri-ā'sē-ē), *n. pl.* [NL. (Link, 1829), < *Convallaria* + *-aceæ.*] A family of monocotyledonous plants of the order *Liliales*, the lily-of-the-valley family, included by some botanists in the family *Liliaceæ.* It includes about 23 genera, of which *Convallaria* is the type, and 215 species, scapose or leafy-stemmed herbs of temperate climates, and some showy or even fragrant flowers. See *Convallaria, asparagus, Paris,* and *Trillium.*

convected (kon-vek'ted), *a.* Transferred, as heat, by means of a convection current.

convection, *n.*—**Compound atmospheric convection,** the total transfer of heat from one part of the atmosphere to another by two distinct methods: (*a*) by currents of air or water carrying heat with them by virtue of their specific capacity for heat; (*b*) by liberation of the latent heat of evaporation which remains with the aqueous vapor contained in the air until it is liberated by condensation into cloud. In so far as the liberated heat remains in the cloud, it may be consumed in reëvaporating the cloudy particles or be lost by radiation; in so far as it is brought down to the earth with the rain or snow, it affects the local climate powerfully.—**Electric convection,** a term used for the conduction of electrolytes and of gases; motion accompanies the conduction in these cases. See ★*conductor,* 9.

convectional (kon-vek'shon-al), *a.* [*convection* + *-al*[1].] Pertaining to or of the nature of convection; caused or formed by convection.

The pressure is comparatively uniform below the sun's surface, and widely discontinuous at the surface. Hence, the *convectional* currents and the dependent phenomenon of rotation in latitude are leisurely motions compared with the explosive action at the surface layers.
U. S. Monthly Weather Rev., Feb., 1904, p. 77.

Convectional circulation. See *general* ★*circulation of the atmosphere.*—**Convectional currents,** vertical interchanges due to differences of temperature in any liquid or gas.

Convective resistance, resistance in a moving fluid due to changes in its motion and particularly to the formation of surfaces of discontinuity. In the atmosphere convective friction may be due to the mixing of warm and cold air or to the mixing of eddies produced by obstacles.

convenance (kon″ve-nans', F. pron. kôn-ve-noṅs'), *n.*; pl. *convenances* (-noṅs'). [F.: see *convenience.*] **1.** That which is becoming or proper; conventional propriety.

The duration of a glance
Is the term of *convenance.*
Emerson, The Visit, l. 24.

2. *pl.* The conventionalities of life.

This careless . . . widow is evidently but ill qualified to take charge of unsophisticated Gladys, with her utter ignorance of London *convenances* and proprieties.
Spectator, April 9, 1881, p. 476.

Mariage de convenance [F.], a marriage based on considerations of family interests, such as birth, position, fortune, or the like, rather than on personal predilection.

convenience (kon-vē'niens), *v. t.*; pret. and pp. *convenienced*, ppr. *conveniencing.* To provide with facilities and accommodations which make for ease, comfort, effectiveness in action, movement, or the like; accommodate.

conventicular (kon-ven-tik'ū-lär), *a.* [L. *conventiculum*, assembly, + *-ar*[3].] **1.** Of the nature of a conventicle: as *conventicular* meetings.—**2.** Characteristic of conventicles or of those who attend them

You can, by an infallible diagnosis, detect the *conventicular* Gothic. *Saturday Rev.*, Aug. 27, 1864, p. 271.

convention, *n.* **8.** In the *fine arts*, a generalization of nature which expresses certain phases of the actual and suppresses others, according to custom or tradition.

A gorgeous *convention* has been substituted for any attempt to render the literal tints of nature.
W. Armstrong, Portfolio, N. S., XIV. 78.

9. In *card-playing*, a play adopted for convenience: as, in bridge, leading a heart when the pone doubles a no-trumper, or scoring spades without playing when the make is not doubled and the score is not 20 or better.

conventional, *a.* **7.** In *card-playing*, noting any method of conveying information which is not based on the principles of the game, such as the trump signal, the American leads, etc.—**Conventional heir,** one who succeeds to an inheritance by reason of a contract (for example, a marriage contract) to that effect.

conventionalism, *n.* **3.** In *anthrop.*, the tendency of human activities to lose their significance in the course of the development of culture, and to become conventional.—**4.** In the *fine arts*, the tendency of realistic representations of animals, plants, and other natural forms to become more conventional; in the course of the development of decorative art, the tendency of realistic motives to change into geometrical forms.

conventionism (kon-ven'shon-izm), *n.* [*convention* + *-ism.*] Mere conventional custom; conventionalism.

The researches conducted in the Bureau have already rendered it clear that decoration, as indeed the greater portion of the fine arts, arises in symbolism and develops through *conventionism;* and the researches of the year suggest a related genesis for industries.
An. Rep. Bur. Amer. Ethnol., 1898–99, p. xiv.

conventionist, *n.* **2.** A member of a convention.

conventionize (kon-ven'shon-īz), *v. t.*; pret. and pp. *conventionized*, ppr. *conventionizing.* [*convention* + *-ize.*] Same as *conventionalize.* *J. W. Powell*, An. Rep. Bur. Amer. Ethnol., 1897–98, p. xx.

converge, *v. i.* **2.** In *biol.*, to exhibit resemblances which are not inherited from a common ancestor.

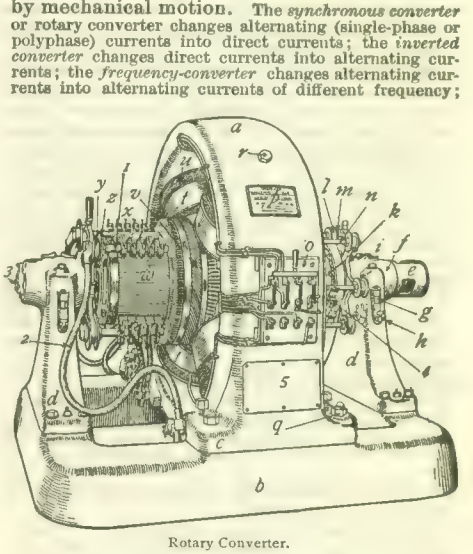
convergence, *n.* **3.** In *biol.*, the manifestation of a tendency, among allied or diverse groups of organisms, to assume series of modifications by the same methods or along parallel lines, and with somewhat similar results. Thus, through successive rock strata representing periods of time, species originally dissimilar evolve in such a manner that the derived forms of each series resemble each other much more than do the ancestral forms. The term is also applied to a like developmental process in a single organ or group of organs. Convergence is the process of which homomorphy is the result.

If two species, belonging to two distinct though allied genera, had both produced a large number of new and divergent forms, it is conceivable that these might approach each other so closely that they would all have to be classed under the same genus; and thus that the descendants of two distinct genera would converge into one. But it would in most cases be extremely rash to attribute to *convergence* a close and general similarity of structure in the modified descendants of widely distinct forms.
Darwin, Origin of Species, iv.

Absolute convergence, the convergence of a series which would still converge if for every term were substituted the modulus of that term. It is a theorem that absolute convergence is the same as unconditional convergence. Non-absolute convergence is called *semiconvergence.*—**Convergence frequency,** in a spectrum series of lines (see ★*series*), the limiting frequency or wave-number (the reciprocal of the wave-length) toward which the higher members of the series asymptotically converge, crowding more and more closely together as they approach it. It is the value of N_0 in the formula which expresses the law of the series, namely, $N = N_0 - \frac{A}{m^2} - \frac{B}{m^4}$, in which N is the wave-number or frequency of any line in the series, A and B are coefficients determined by observation, and m is an integer—1 for the first line of the series, 2 for the second, and so on. *A. M. Clerke*, Problems in Astrophysics, p. 53.

convergent, *a.* **2.** In *biol.*, illustrative of or due to convergence; similar in structure but different in origin (polyphyletic).

[It] seems probable that the three orders of Ratitæ arose independently from primitive Carinatæ, and that the entire division is to be looked upon as a *convergent* or polyphyletic group, owing its distinctive characters, not to descent from a common ancestor, but to the independent acquisition of similar characters under the influence of like surroundings. *Parker and Haswell*, Zoology, II. 416.



Convergent analogy, ladybird, lens. See ★*analogy,* ★*ladybird,* ★*lens.*—**Convergent squint.** Same as *convergent strabismus.*

converging, *p. a.* **2.** Capable of causing convergence: as, a *converging* lens.—**Converging associations,** associations which coöperate in tending to revive in consciousness the same idea.

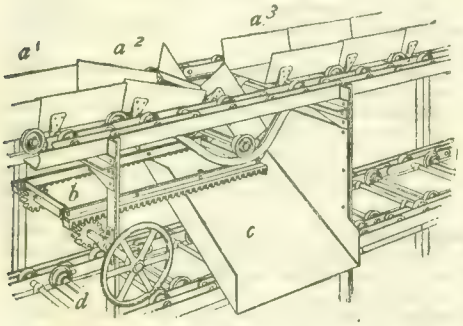
conversion, *n.* **10.** Substitution of or exchange for something else, especially of one kind of property for another; specifically, the change of an issue of public securities, of bonds, debentures, stocks, shares, etc., into another of different character or with an altered (generally reduced) rate of interest. Also attributively: as, *conversion* scheme, *conversion* operation, etc. *N. E. D.*—**11.** In *ship-building*, the selection, laying out, and working of plank and timber so as to have the least possible waste.—**12.** In *forestry*, a change from one system of forest management to another, as from the sprout system to the seed system.—**13.** In *steel manuf.*, the process of changing iron into steel, especially by the cementation process. See *cementation.*—**Constructive conversion,** in *law*, such an act, in reference to the personal property of another, as will be deemed in law to constitute an appropriation of the property although there may be no actual taking.—**Direct conversion,** in *law*, the actual wrongful taking of the personal property of another and appropriation of the same to the taker's use.

convert, *v. t.* **9.** In *ship-building:* (*a*) To work up, as rough plank or timber, into the shape required for use on a vessel. (*b*) To alter so as to change the type to which a vessel belongs: as, to *convert* a steamer into a sailing-ship.—**Converted gun.** See ★*gun*[1].

converter, *n.* **3.** In *elect.*, an apparatus for changing electric power into a different form by mechanical motion. The *synchronous converter* or rotary converter changes alternating (single-phase or polyphase) currents into direct currents; the *inverted converter* changes direct currents into alternating currents; the *frequency-converter* changes alternating currents into alternating currents of different frequency;

Rotary Converter.

a, field-frame; *b*, base; *c*, foot; *d*, pillow-blocks; *e*, speed-limiting device; *f*, bearing; *g*, oil-gage; *h*, pet-cock; *i*, oil-cup cover; *k*, collector-ring; *l*, alternating-current brush-holder yoke; *m*, insulator; *n*, alternating-current brush-holder stud; *o*, field break-up switch; *p*, name-plate; *q*, holding-down bolts; *r*, pole-piece bolt; *s*, field break-up switch-leads; *t*, shunt field-winding; *u*, series field-winding; *v*, armature; *w*, commutator; *x*, direct-current brush; *y*, direct-current brush-holder yoke; *z*, insulation; *1*, direct-current brush-holder stud; *2*, armature-lead; *3*, end-play device; *4*, alternating-current brush; *5*, hand-hole cover.

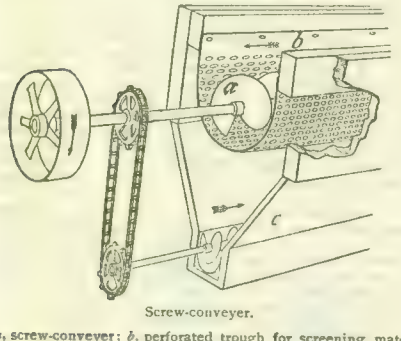


the *phase-converter* changes alternating, usually single-phase, currents into alternating currents of a different number of phases; the *direct-current converter* changes direct into direct currents. The most common type is the synchronous converter, commonly called *converter* or *rotary converter*, which is used for changing the transmitted polyphase alternating current into direct current for use on electric railways, for lighting, etc.—**Holley's modification of the Bessemer converter,** an improvement of the Bessemer converter introduced by A. L. Holley, which consisted in a removable bottom which greatly increased the rapidity of working, as many as 100 blows being thus obtained in 24 hours in one converter. Holley's invention also made it possible to renew the lining of the bottom, which wears out in about 20 blows, without changing that of the body of the converter, which lasts for many thousand blows.

Convertible anastigmat, lens. See ★*anastigmat,* ★*lens.*—**Kater's convertible pendulum.** See ★*pendulum.*

converting-pot (kon-vėr'ting-pot), *n.* A chest or trough of fire-brick or fire-stone into which bar-iron is put for cementation.

convex, *a.* **3.** In *geom.*, having no reëntrant angle.—**Convex polyhedron,** one which has no summits on different sides of the plane of a face.



conveyer, *n.* **4.** In *transportation*, a general term applied to a variety of machines used in moving coal, grain, and other materials in bulk over short distances, in a horizontal direction or up and down moderate inclines. Conveyers are named from the material transported (as *box-*, *coal-*, *hide-*, *paper-*, or *log-conveyer*) and also from the method of operation. An *apron-conveyer* consists of endless chains upon which wood or metal slats are placed close together, forming a continuous traveling platform. It is closely allied to the ★*carrier* (which see). A *belt-conveyer* employs a broad endless belt of leather, rubber, or similar fabric, running over stationary rollers placed at equal distances apart. When in operation a stream of light material, such as grain, can be fed to the belt and be transported at high speed in large quantities. If the feed corresponds to the speed of the belt, the material can be handled without loss, since the slight vibration of the belt, when in motion, causes the load to gather at the center where it rests during transit or until the belt changes its direction by turning over a horizontal roller at the point of delivery. Two types of idle rollers are used with belt-conveyers to support the belt. For very light materials a horizontal roller is used; for coal, wet sand, broken stone, and heavy materials the rollers are disposed in sets of three, one small horizontal roller in the middle and two others, each inclined toward the center to give the belt a dishing or trough-like surface for the purpose of concentrating the load in the middle of the belt and thus preventing loss over the sides. Belt-conveyers are in general use in all industrial and engineering plants where large quantities of heavy ores, coal, ashes, etc., must be moved over distances of a thousand feet, more or less, and up moderate inclines. For direct lifts, short belts, each at a slight incline, arranged in series, one feeding into the next, are often used. To pass at a right angle two belts are used, one delivering to the other at a slightly lower level. A *bucket-conveyer* is one having V-shaped buckets fixed and sometimes pivoted to a pair of chains. As a *flight-conveyer*, it can be operated in a horizontal direction by using the buckets as flights to drag the material to be removed along a trough. The same buckets can also be used to pick up and lift the material in a vertical direction. When used in both directions the machine is a *combined conveyer and elevator*. An *endless-trough conveyer* is one in which chains

Endless-trough Conveyer with Dumper.

a, buckets forming continuous trough, traveling on two pairs of flanged wheels on different tracks; *a*¹, loaded; *a*³, entering dumper, forward wheels follow loop track, rear wheels on straight track; *a*², empty troughs; *b*, dumper; *c*, chute; *d*, hand-wheel controlling dumper.

carry a sheet-metal trough open at each end. The buckets fit one into another and form a continuous trough, used to convey spikes, bolts, castings, etc. A *flight-conveyer* consists of a trough, of square or semicircular section, through which scrapers, called *flights*, supported by traveling chains, drag the loose material. (See cut under *monobar* ★*chain*.) In some forms the boxes, barrels, or other packages of goods are pushed along a smooth wooden platform by means of lugs or low flights attached to conveyer-chains. A *rotary conveyer* is a cylindrical conveyer of the screw type mounted on wheels and made to turn upon its axis. It is used to dry and mix the material which is being transported through it. A *screw-conveyer*

Screw-conveyer.

a, screw-conveyer; *b*, perforated trough for screening material in transit; *c*, trough for screw-conveyer transporting screenings from *b*. Arrows show direction of travel.

employs a trough of a cylindrical section, fitted with a helicoidal screw, which is supported by a shafting in the trough. The screw fits the trough so closely that in turning it forces the material along the trough in the direction of the thrust of the screw. The troughs used in screw-conveyers are sometimes made of perforated metal which serves as a screen in cleaning the material from dust, lint, etc.—**Hoist-conveyer**, a cableway or wire-rope tramway in which the load to be conveyed can be hoisted from the ground to the tramway; a lifting wireway: used in sewer and subway construction. Not properly a conveyer, though often so called.—**Push-plate conveyer**, a device for transporting loose material, such as coal, crushed stone, or sand, for short distances. It consists of an endless chain, to which plates are fastened at regular intervals, and a wooden or metal trough in which the material slides. The plates stand at right angles to the chain and push the material along as the chain is pulled. See *flight-conveyer*, above.

convicine (kon'vi-sin), *n.* [*con-* + *Vicia* + *-ine*².] A crystalline alkaloid, $C_{10}H_{15}O_8N_3 + H_2O$, found in the seeds of vetch, *Vicia sativa*.

convictional (kon-vik'shon-al), *a.* [*conviction* + *-al*¹.] Relating to conviction, settled belief, or opinion.

convincing (kon-vin'sing), *p. a.* Of a nature to convince or persuade; such as to convince or impress seriously or to win one's sympathy or assent; in *art criticism*, exhibiting completeness and propriety.

Convocation week, the week in which the first day of January falls. This week has been recently set aside by some American societies and universities, on the initiative of the American Association for the Advancement of Science, for the holding of meetings of scientific and other learned societies.

Convoluted tubule. See ★*tubule*.

convolution, *n.*—**Central convolutions**, the convolutions which border on the central sulcus.—**Wernicke's convolution**, the first temporosphenoid convolution of the brain.

convolutional (kon-vō-lū'shon-al), *a.* Relating to or like a convolution.

convolutionary (kon-vō-lū'shon-ā-ri), *a.* Of or relating to a convolution or convolutions, particularly to the convolutions of the brain.

Many of these are so excellently preserved that every detail of the *convolutionary* pattern can be recognised, and by transferring it to the surface of the cranial cast an accurate model showing exactly the size, shape, and arrangement of the sulci with perfect accuracy can be obtained. *Nature*, Nov. 5, 1903, p. 8.

convolvulinol (kon-vol'vū-lin-ōl″), *n.* [*convolvulin* + *-ol*.] A crystalline substance said to have been obtained by the hydrolysis of convolvulin. Later observers have failed to find it.

convolvulonolic (kon-vol″vū-lon-ol'ik), *a.* [*convolvulinol* + *-ic*.] Derived from convolvulin.—**Convolvulonolic acid**, an acid, $C_{15}H_{30}O_3$, obtained by the hydrolysis of convolvulinic acid with dilute sulphuric acid. It is monobasic and melts at 51.5°C.

Convolvulus moth, a European and African sphingid moth, *Phlegethontius convolvuli*, whose larva feeds on the foliage of plants of the family *Convolvulaceæ*.

convulsant (kon-vul'sant), *a.* and *n.* [*convulse* + *-ant*.] **I.** *a.* Causing muscular spasms.

II. *n.* An agent which causes muscular spasms.

convulsibility (kon-vul-si-bil'i-ti), *n.* A tendency to convulsion or the capability of being convulsed. *Buck*, Med. Handbook, III. 275.

convulsion, *n.*—**External convulsion**, spasmodic contraction of the voluntary muscles.—**Internal convulsion.** (*a*) Spasmodic contraction of the involuntary muscles. (*b*) Same as *laryngismus stridulus*.

convulsion-root (kon-vul'shon-rōt), *n.* The Indian-pipe, *Monotropa uniflora*. See *Monotropa* (cut). Also called *convulsion-weed*.

cony, *n.* **8.** The West Indian agouti, *Dasyprocta cristata*, so called by the early English colonists from its fancied resemblance to a rabbit.

There are no quadrupeds, natives of Dominica, except the Indian *Coney*, which is nearly the size of a rabbit.
T. Alvord, Hist. of Island of Dominica, p. 45.

9. The name of several West Indian serranoid fishes: (*a*) The guativere, *Cephalopholis fulvus*. (*b*) *Cephalopholis cruentatus*, a brown fish with many spots, called in Spanish *enjambre*.

conylene (kon'i-lēn), *n.* [*con(ine)* + *-yl* + *-ene*.] A hydrocarbon, C_8H_{14}, formed by distilling trimethylconine. It is an oil which boils at 127° C.

conyrine (kon'i-rin), *n.* [*con(ine)* + *-yr* (varied from *-yl*) + *-ine*².] An oily base, $C_5H_4N.C_3H_7$, which boils at 172° C. and is obtained by heating conine with zinc chlorid.

coobah (kō'bä), *n.* [Aboriginal Australian.] In Australia, a small tree, *Acacia salicina*. It yields an excellent tan-bark and its wood is close-grained, heavy, dark brown, and nicely marked. The aboriginals make boomerangs and the colonists furniture from it. Also called *native willow*.

coöbligant (kō-ob'li-gant), *n.* One who binds or has bound himself with another or others in regard to some matter; one who is under some obligation jointly with another or others.

coöbligor (kō-ob'li-gôr), *n.* One of several parties bound by the same obligation.

cook¹, *v. t.* **5.** In *tobacco-manuf.*, to overheat (tobacco) in the process of sweating in bulk, depriving it of the power of heating up again. This happens when the temperature is kept long at 65° F. or raised still higher.

The oxidase and catalase are now killed. Such tobacco is called *cooked*. *U. S. Dept. Agr.*, Rep. No. 65 (1900), p. 46.

cook¹, *n.* **2.** Same as ★*cook-fish*.

cook-camp (kůk'kamp), *n.* The building used as kitchen and dining-room in a logging-camp. [U. S.]

cooker, *n.* **2.** Specifically, a receptacle in which food may be cooked by steam. A common form is that of a sheet-metal vessel resembling the portable oven of a gas-stove, fitted with shelves for the various foods to be steamed. Water is placed in a tank below, and, on placing the cooker on the stove, steam is formed which fills the entire vessel and cooks the food. A portion of the steam escapes into a condenser, and the resulting hot water returns by gravity to the tank. In other forms steam from some outside source is led by pipes through the cooker, causing the water inside to heat and cook the food. Another cooker consists of a double plate, the space between the plates being filled with steam: the *oyster-cooker* used in restaurants is an example of this type. The *fireless cooker* (or *stove*), which is set in an insulating outer case, completes the working process, which must be begun in the ordinary way. Steam soup-kettles and steam-kettles used in canneries and in cooking food for cattle are steam cookers.

cook-fish (kůk'fish), *n.* A labroid fish, *Labrus bimaculatus*.

cook-house, *n.* **2.** A building or room, whether detached from a house or attached to it, in which cooking is carried on.

cook-shop (kůk'shop), *n.* A shop where food is cooked and sold.

cool¹, *v. t.* **5.** In *painting*, to strengthen (colors) on the blue and violet side of the spectrum, or to reduce (reds and yellows).

coolamin (kō'la-min), *n.* [Australian.] A drinking-cup made of a hollow gum-tree knot.

coold, *pp.* A simplified spelling of *cooled*.

cool-drawn (kōl'drân), *a.* Same as *cold-drawn* (which see).

cooler, *n.* **2.** (*b*) In *motor-car construction*, the apparatus used to lower the temperature of the circulating water which keeps the cylinder walls of the internal-combustion motor from overheating. It is an air-surface condenser, with air circulating around the exterior surface of tubes containing the water; or the water may be on the outside surface and the air pass through the bores. In the first type, radiating and contact surface are increased by spines or coils projecting from the tube-surface; for the second, the cooler is often made with hexagonal tubes so as to get the greatest number in a given space. Such coolers or radiators are called *honey-comb coolers*. The water can usually be kept at about 180° F., but when the car moves very slowly the water may be forced to the boiling-point.

4. A heavy square horse-blanket of sufficient size to envelop the horse's body.—**5.** A cooling drink.—**Remsen cooler**, a compound of Old Tom gin, lemon-peel, club soda, and cracked ice.—**Renwick cooler**, same as *Remsen* ★*cooler*, except that ginger-ale takes the place of soda.

coolgardite (kōl'gär-dīt), *n.* [*Coolgardie* (see def.) + *-ite*².] A supposed gold telluride from the Coolgardie gold-field in Western Australia: probably only a mixture of known species.

coolibah (kō'li-bä), *n.* [Also *coolibar*: aboriginal Australian name.] In western Queensland, a tree, *Eucalyptus microtheca*, the wood of which is reddish brown, remarkably hard, heavy and elastic, and useful in building. Also called *goborro*, and by the colonists *bastard*, *black*, or *flooded box*.

cooliman (kō'li-man), *n.* [Also *coolaman*, *coolamin*, *coolieman*, *koolaman*: aboriginal Australian.] A small trough of wood or bark used for carrying food or water.

The "gins" and "picaninnies" go carefully over the ground with a pointed stick in one hand and a wooden "*cooliman*" . . . in the other, gathering up any lizard, snake, or grub which has perished in the flames.
Geog. Jour. (R. G. S.), XI. 262.

cooling-bridle (kō'ling-brī″dl), *n.* A bridle consisting of a single strap, with buckles and chapes on the ends by which the bit is attached. It has no brow-band or throat-latch.

cooling-cell (kō'ling-sel), *n.* In *photog.*, a cell with parallel glass sides, which contains water or a solution of alum and is placed in front of a lantern to shield plates used in projection from the action of heat.

cooling-drum (kō'ling-drum), *n.* **1.** An enlarged section of a pipe used to increase the area for the radiation of heat.—**2.** A drum or cylinder containing a refrigerating-coil; a condenser.

cooling-pond (kō'ling-pond), *n.* A pond the water of which, having been used for condens-

ing purposes in a steam-engine either in a jet or a surface-condenser, is exposed to the air and cooled so as to be used again.

cooling-stack (kö'ling-stak), *n.* Same as ★*cooling-tower*.

cooling-stove (kö'ling-stōv), *n.* An apparatus for lowering the temperature of the air of a room in hot weather. A mixture of broken ice and salt is placed in a sheet-metal vessel, and the air of the room passes downward through flues in contact with the freezing-mixture, and so out into the room. *Sci. Amer.*, May 16, 1903, p. 372.

cooling-surface (kö'ling-sėr″fās), *n.* **1.** A surface on which steam is condensed.—**2.** Any surface which is cool enough to abstract heat from the substance on one side of it, as in the coils which circulate brine in cold-storage rooms or in ice-making plants.

cooling-table (kö'ling-tā″bl), *n.* A place where rolled sections of metal are placed as they come from the rolls to allow them to cool and harden before being straightened and finished.

cooling-tower (kö'ling-tou″ėr), *n.* A device for cooling the water used in a steam-condenser or refrigerating-plant. It consists of a series of drip-pans placed one above the other in a water-tight tower, in combination with an air-blast. The hot water from the condenser is pumped into the uppermost pan, and falls from it in a shower to the next pan, and from this to the next, and so on until it reaches the reservoir below. A fan delivers a large volume of air under moderate pressure to the tower near its base, the air rising through the falling water and escaping through blinds at the top of the tower. The water passing through the tower is cooled from 15° to 30°, and can then be again used in the condenser.

coolooly (kö-lö'li), *n.* In Algiers, a person of mixed blood.

cool-tankard, *n.* **2.** The borage, *Borago officinalis*, used in preparing the beverage so named.

coolth (költh), *n.* [*cool* + *-th.*] **1.** Coolness: the opposite of *warmth*. [Now chiefly dialectal.]

My father and Mrs. Thrale seated themselves out of doors . . . for *coolth* and chat.
Mme. d'Arblay, Diary, I. 379.

2. A cold in the head. [Prov. Eng.]

coom[3] (köm), *n.* [Dial. form of *culm*[1].] The wooden frame used in building the arch of a bridge. [Scotch.]

coombe-rock (köm'rok), *n.* [*coombe* = *comb* + *rock*[1].] A term which has been applied in Sussex, England, to unstratified loose Pleistocene materials which have been regarded as due to the action of heavy rains while the ground below the surface was permanently frozen.

coom-ceiled (köm'sēld), *p. a.* Having an arched or sloping ceiling, as an attic or garret. [Scotch.]

coomed (kömd), *a.* Arch-shaped. [Scotch.]

coomy (kö'mi), *a.* [*coom*[1] + *-y*[1].] **1.** Full of coom or dust: as, very *coomy* coal.—**2.** Begrimed with coal-dust and soot: as, *coomy* hands and face. [Scotch in both senses.]

coon, *n.* **4.** A negro. [U. S. slang.]—**To go the whole coon,** to go the whole hog. [Slang.]—**To hunt the same old coon,** to keep on doing the same thing. [Colloq.]

cooncan (kön-kan'), *n.* See ★*conquien*.

coon-cat (kön'kat), *n.* A name in New England of a large, long-haired variety of the domesticated cat, with ringed tail, whose pelage suggests that of a racoon.

coon-dog (kön'dog), *n.* A dog trained to follow and tree racoons.

coonery (kö'nėr-i), *n.* [*Coon* + *-ery.*] The aims and methods of the 'Coons' of the old Whig party in the United States. See *coon, n.*, 2.

coon-root (kön'röt), *n.* The bloodroot, *Sanguinaria Canadensis*.

coon-song (kön'sông), *n.* [Probably so named < ★*coon, n.*, 4, + *song.*] A popular song, such as is common among the negroes in the southern United States. [Colloq.]

coöperancy (kō-op'ę-ran-si), *n.* [*coöperan(t)* + *-cy.*] Coöperant relation or state.

This conception of a reign of law, amid which and under which we live, affects the emotions in various ways: at times it may cause despondency, but . . . . we shall more and more find occasion for joy and triumph in the *co-operancy* of the energies of humanity with those of their giant kindred, light, and motion, and heat, and electricity, and chemical affinity.
Edward Dowden, Studies in Literature, p. 99.

coöperation, *n.* **3.** In *psychol.*, the process by which a mental group, in the exercise of its apperceptive function, prompts other groups to a similar activity. *G. F. Stout*, Anal. Psychol., II. 128.

Cooper's lemming-mouse. See ★*lemming-mouse*.

coöptative (kō-op'ta-tiv), *a.* [*coöptate* + *-ive.*] Chosen by coöptation: as, *coöptative* governors of an institution, as distinct from representative governors.

coöpted (kō-op″ted), *p. a.* Chosen by coöptation.

It may be remarked that of 271 schemes approved by the Board of Education, some two-thirds provide for such *co-opted* members with expert knowledge.
Nature, Feb. 11, 1904, p. 344.

coorash (kö-räsh'), *n.* [Ar. *kurāsh*, scratching, < *karasha*, drive away, hurry, scratch.] A pruritic skin disease accompanied by a pustular eruption: common in parts of Africa.

coördinate. **I.** *a.*—**Coördinate paper.** See ★*paper*.

II. *n.*—**External coördinate,** in *statistical mech.*, a coördinate of a body external to a given system but upon which, in part, the potential energy of the system depends.—**Positional coördinate,** a coördinate which serves to define or locate a point or system.—**Projective coördinates.** From von Staudt's quadrilateral construction (see ★*quadrilateral*) is obtained a purely descriptive, projective, non-metrical definition of cross-ratio; and, given a pair of points, it is possible to obtain, without the use of any ratio or measurement, the harmonic conjugate to any third point of the same straight line. Starting with any 3 points on a straight line, assign to them arbitrarily the numbers 0, 1, ∞; then find the harmonic conjugate to the first with respect to 1, ∞, and assign to it the number 2; then find the harmonic conjugate to the point 1 with respect to 2, ∞, and assign to it the number 3; and so on. By introducing such a numerical system on 2 straight lines, or on 3, the projective coördinates of any point in a plane or in space are obtained.

coorongite (kö'rong-īt), *n.* [*Coorong* (see def.) + *-ite*[2].] A mineral substance resembling india-rubber: found in the Coorong district of South Australia. *Groves and Thorp*, Chem. Technol, II. 129.

coörthotomic (kō-ôr-thō-tom'ik), *a.* [*co-*[1] + *orthotomic.*] In *math.*, crossing at right angles at every intersection: said of a set of curves.

coot, *n.* **1.** The name is variously applied in different localities to rails, gallinules, and ducks. Thus the hyacinthine gallinule, *Porphyrio hyacinthus*, is known as the *purple coot;* the scoter *Œdemia perspicillata*, as the *surf-coot;* and another scoter, *O. Americana*, as the *whistling coot*.

cop[1], *n.* **11.** In *golf*, the face of a bunker.

Cop. An abbreviation (*a*) of *Copernican;* (*b*) of *Coptic;* (*c*) [*l. c.*] of *copper*.

copa de oro (kō'pä dā ō'rō). [Sp., 'cup of gold.'] The California poppy, *Eschscholzia Californica:* so named by the Spanish Californians for its brilliant yellow flowers.

copaibic (kō-pā'bik), *a.* Same as *copaivic*.

copal, *n.*—**Mexican copal,** a resin derived from several species of *Terebinthus:* as *copal amargo* from *T. bipinnata* (*Bursera bipinnata* of Engler); *copal blanco* and *copal de penca* from *T. Jorullensis* (*B. Jorullensis* of Engler); and *copal de santo* from *T. Mexicana* (*B. Mexicana* of Engler) and from *T. Jorullensis*. The resin of *T. Jorullensis* is also called *goma de limon* and *Mexican elemi*). See *Bursera* and *copal*.

copalcocote (kō-päl-kō-kō'tā), *n.* [Mex. *copalcocote*, < Aztec *copalxocotl*, < *copalli*, gum or resin, + *xocotl*, fruit.] *Cyrtocarpa procera*, a small Mexican tree belonging to the sumac family, with odd-pinnate leaves having entire leaflets. It bears a yellow, acid, plum-like fruit, called *ciruela* by the Spaniards, with a resinous mesocarp and a stony endocarp, which is used medicinally.

copaliferous (kō-pa-lif'ę-rus), *a.* [E. *copal* + L. *-fer*, < *ferre*, bear.] Producing copal: as, *copaliferous* sand.

copalillo (kō-pä-lēl'yō), *n.* [Sp. *copalillo*, dim. of *copal*, which see.] *Exothea Copalillo*, a Mexican tree belonging to the *Sapindaceæ*, having upright branches, abruptly pinnate leaves with usually two pairs of entire leaflets, and berry-like fruit.

copalite (kō'pal-īt), *n.* [*copal* + *-ite*[2].] Same as *copalin*.

Copalm balm. Same as copalm balsam (which see, under *balsam*).

copang (kō'pang), *n.* [Also *cupang, coupang, kupang*, < Malay *kūpang*, a copper coin, = Jav. *kobang* = Jap. *koban:* see *coban*.] A Malayan copper coin.

copatentee (kō-pat-en-tē'), *n.* [*co-*[1] + *patentee.*] One who holds a patent jointly with another or others.

cop-dyeing (kop'dī″ing), *n.* The process of dyeing yarn upon the cop, in order to save the expense of reeling it into skeins and rewinding it upon bobbins. Many machines have been devised for this purpose but none has been entirely satisfactory.

cope[1], *v. t.* **3.** To muzzle, as a ferret, by sewing or tying up its mouth.—**To cope off,** to lift or draw that part of a pattern which is embedded in the top box or cope of a foundry-flask. The cope is lifted off and turned over for this purpose.

cope-head (kōp'hed), *n.* In *wood-working*, an attachment to a tenoning-machine for forming a coping on the tenon. See *tenoning-machine*.

copellidine (kō-pel'i-din), *n.* Hexahydrocollidine, or 2-methyl-5-ethyl piperidine, $C_5H_{11}N$. $CH_3.C_2H_5$, a basic oil which boils at 162° C. and has a disagreeable ammoniacal odor.

coper[4] (kō'pėr), *n.* [Also *cooper;* < D. and Flem. *kooper*, buyer, trader, < *koopen*, buy, trade: see *cope*[2], *v.*] A kind of floating grog-shop, stocked with indifferent liquors, tobacco, etc., which accompanies or plies its trade among the North Sea fishing-fleets.

cope-ring (kōp'ring), *n.* A metal ring with trunnions, used to carry the sand and loam which form the cope of a loam-mold.

coperiodic (kō-pē-ri-od'ik), *a.* [*co-*[1] + *periodic.*] Synchronous as to period; undergoing periodic fluctuations or changes in equal intervals of time.

Copernicanism (kō-pėr'ni-kan-izm), *n.* The astronomical theory of Copernicus; that is, the doctrine that the earth and all the planets (except the moon and telescopic satellites discovered since the enunciation of the doctrine) revolve round the sun. Originally no definite meaning could be attached to this statement unless one regarded vacuous space as a real substance, an opinion which is now out of vogue; but the dynamics of rotation supplies a meaning which is true and which does not (at least, explicitly) suppose space to be a thing.

coperta (kō-per'tä), *n.* [It. *coperta*, a cover: see *covert.*] In *ceram.*, the final film of glaze put on the later Italian majolica-painting which acted like a varnish and increased the brilliance of the colors. This practice was not followed in France. *M. L. Solon*, French Faïence, Glossary.

cop-frame (kop'frām), *n.* A machine for winding yarn on a cop.

cophasal (kō-fā'zal), *a.* [*co-*[1] + *phasal.*] Being in or having the same phase.

copigue (kō-pē'gwā), *n.* [Also *copihue;* a native name in Chile.] *Lapageria rosea*, a half-woody climber, belonging to the lily family, with beautiful rose-colored or crimson flowers and sweet edible berries the size of a hen's egg. [Chile.]

coping-brick (kō'ping-brik), *n.* A brick cast to a shape fitting it to form part of a coping, as with a single or a double slope on its upper surface.

copinol (kō-pē-nōl'), *n.* [Central Amer.] Same as ★*guapinol*.

copivi (kō-pē'vē), *n.* Same as *copaiba*.

coplaintiff (kō-plān'tif), *n.* [*co-*[1] + *plaintiff.*] One of several parties plaintiff in the same action.

coplanarity (kō-plā-nar'i-ti), *n.* [*coplanar* + *-ity.*] The quality of being coplanar or of lying in the same plane.

The divergence from *coplanarity* as a rule has small importance. *Biometrika*, Aug., 1902, p. 413.

copopod (kō'pō-pod), *a.* and *n.* Same as *copepod*.

copper[1]. **I.** *n.* **8.** The plate of copper which contains or is intended to contain on its surface the engraved or etched design prepared for printing.—**Aceto-arsenite of copper.** Same as *Paris green*.—**American copper,** *Heodes hypophlæas*, a butterfly of the family *Lycænidæ*, common in the Atlantic United States where in the larval state it feeds on sorrel.—**Ammonionitrate of copper,** a substance, $4NH_3.Cu(NO_3)_2$, which has been proposed for use as an explosive agent, to be granulated and fired by a detonator.—**Bronze copper,** an American butterfly, *Chrysophanus thoe*, of the family *Lycænidæ*, the male of which has wings of a coppery brown spotted with black, the female's wings being orange-red with black spots. It is of wide distribution, and the larva feeds on curled dock, knotweed, and prickly ash.—**Copper arsenite,** a substance occurring in various green powders (as Paris green, emerald-green, Schweinfurt green, etc.) used as pigments and as insecticides.—**Copper barilla.** Same as ★*barilla*, 2.—**Copper bath colic.** See ★*bath*[1], ★*colic*.—**Copper glass.** Same as *Alexandria blue* (which see, under *blue*).—**Copper mixture of Gironde,** the original name for Bordeaux mixture used in spraying plants as a fungicide.—**Copper-pitch ore,** a not uncommon silicious ore of copper occurring in massive form with a dark-brown or black color and usually a dull, pitchy luster. It often contains besides copper other metallic oxids, as of iron, zinc, manganese, etc., and has been regarded as an impure chrysocolla; this, however, is not generally true, and in some cases it seems to be a definite compound. See ★*melanochalcite*.—**Copper rock,** ore containing native copper. [Lake Superior.]—**Copper silicide.** Same as ★*silicon-copper*.—**Copper sucrate,** a fungicide solution used in spraying fruit-trees and other plants: made with 4 pounds of crystallized sulphate of copper, 5 pounds of lime, 2 pounds of molasses, and 45 gallons of water.—**Manhès copper process,** the process of refining copper matte in a Bessemer converter

with twyèrs in the side of the vessel and above the level of the molten metal. The advantage of the Manhès converter lies in the fact that it protects the pure copper at the bottom from the blast and that it prevents the setting metal from closing the twyers. It is now replaced by newer designs.—**Moss copper**, metallic copper in fine filaments resembling moss which sometimes exudes from copper matte during the contraction of the latter in one of the stages of copper-smelting by the Swansea process. —**Phosphide of copper, silicium copper.** See ★*phosphide*, ★*silicon-copper*.—**Potassium cyanide copper process.** See ★*cyanide process*.—**Stamp copper**, native copper which has been separated from the copper rock by stamping and washing, as distinguished from mass copper and barrel-work. [Lake Superior.]—**Underpoled copper**, copper from which the suboxid has not been sufficiently removed by poling.

II. *a.*—**American copper hindwing.** See ★*hindwing*.—**Copper age, luster.** See ★*aye*, ★*luster*2.

copper[1], *v. t.* **3.** To coat with copper: as, to *copper* type; also, to color by means of a salt of copper: as, to *copper* pickles, etc., in order to make them a bright-green color.

The colouring of preserved peas by the use of a little copper sulphate is on a different basis, as the copper is considered liable to produce injury to health, and many vendors of *coppered* peas have been fined during recent years; yet the public object to purchase preserved peas of the natural brown colour. *Encyc. Brit.*, XXV. 92.

copper[2] (kop'ėr), *n.* A policeman. See *cop*[4]. [Slang.]

copper-bill (kop'ėr-bil), *n.* A centrarchoid fish, *Lepomis pallidus*, found in the eastern United States.

copper-blende (kop'ėr-blend), *n.* Same as *tennantite*.

copper-bloom (kop'ėr-blōm), *n.* Same as *chalcotrichite*.

copper-cut (kop'ėr-kut), *n.* and *a.* **I.** *n.* A plate engraved on copper. *Carlyle*, French Rev., III. iii.

II. *a.* Pertaining to a copper-cut.

copperhead, *n.* **4.** A private token, equal to one cent, struck in the United States during the Civil War.—**5.** In *ornith.*, the yellow-headed blackbird, *Xanthocephalus xanthocephalus*, of the western United States: so called from the reddish-yellow color of its head.

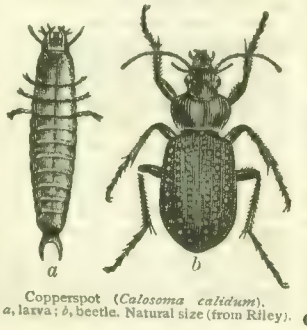
coppering-hammer (kop'ėr-ing-ham″ėr), *n.* See ★*hammer*[1].

copper-manganese (kop″ėr-mang-gạ-nēs'), *n.* Same as *crednerite*.

copper-Maori (kop″ėr-mä'ō-ri). [A colonial rendering of Maori *kapura*, the common fire used for cooking (or from *kopa*, the hole scooped out for a native oven?), + *Maori*, Maori ('native').] In New Zealand, a native oven.

copper-nose, *n.* **2.** A disease, *acne rosacea*, of the nose, caused sometimes by excessive use of alcohol.—**3.** A person having this disease; a drunkard.

copperplate (kop'ėr-plāt), *v. t.*: pret. and pp. *copperplated*, ppr. *copperplating*. To engrave or etch on a plate of copper for the production of a printing surface.



copper-schist (kop'ėr-shist), *n.* A schistose or slaty bituminous and very persistent bed, which carries copper-ores containing some silver, in the Mansfeld district, Saxony. The geological horizon is the Permian. The industry is a very old one, the mines are extensive, and the metallurgical problems, on account of the aluminous nature and relatively low-grade of the ore, are of special interest and importance. The rock is rather a shale or slate than a schist.

copperskin (kop'ėr-skin), *n.* A member of the American race; a redskin.

copper-slate (kop'ėr-slāt), *n.* A clay-slate in the Mansfeld district, Saxony, which carries copper ore.

copper-smoke (kop'ėr-smōk), *n.* The gases which escape from the hearth of a reverberatory furnace in which copper ores are roasted. They consist of sulphurous acid, with a little of the vapor of sulphuric acid, and hydrofluoric acid gas, and are very harmful to the surrounding country.

copperspot (kop'ėr-spot), *n.* An American carabid beetle, *Calosoma calidum*, having the black elytra dotted with copper-colored spots. [Local, Canada.]

Copperspot (*Calosoma calidum*). *a*, larva; *b*, beetle. Natural size (from Riley).

coppertail (kop'ėr-tāl), *n.* A person of low social standing. [Bush cant, Australia.]

copperwork, *n.* **2.** In *candy-making*, the copper kettles, pans, caldrons, and other vessels collectively in which syrups, pastes, conserves, etc., are boiled or otherwise treated in cooking candy.

Coppery leaves, leaves which show yellowish spots, gradually becoming a reddish-brown or copper color, due to injury caused by the so-called red spider, species of *Tetranychus*.

coppet (kop'et), *n.* [*cop*[1] + *-et*.] A small knoll; a hummock; a hammock. [Florida and Bermuda.]

The '*coppets*' or 'hammocks,' as they are called in Florida, are areas devoid of either pines or palmettos and often occupy isolated areas entirely surrounded by pine forests as in southern Florida.

Science, July 22, 1904, p. 113.

Coppice forest. Same as *sprout* ★*forest*.—**Coppice system.** Same as ★*sprout system*.—**Standard coppice system.** Same as *reserve* ★*sprout method*.

coppice-shoot (kop'is-shōt), *n.* Same as *sprout*, 1, (*b*).

coppice-wood (kop'is-wůd), *n.* A wood with underbrush. *Bacon*.

copping-beam (kop'ing-bēm), *n.* A beam which forms part of the machine by which thread is formed into cops.

coppy[2] (kop'i), *n.* [*cop*[1] + *-y*[1].] A crested fowl, such as the Houdan or Polish. [Local, Eng.]

copracrasia (kop-ra-krā'si-ä), *n.* [Gr. *κόπρος*, excrement, + *ἀκρασία*, powerlessness.] Loss of power to retain the feces.

copragogue (kop'ra-gog), *a.* and *n.* [Gr. *κόπρος*, excrement, + *ἀγωγός*, leading.] **I.** *a.* Cathartic.

II. *n.* A cathartic remedy.

cop-reel (kop'rēl), *n.* A machine for winding yarn into hanks from mule-cops.

coprin (kop'rin), *n.* [*Coprinus*.] A fungus of the genus *Coprinus*.

coprodæum (kop-rō-dē'um), *n.*; pl. *coprodæa* (-ä). [Gr. *κόπρος*, dung, + (irreg.) *δαίειν*, divide.] In *anat.*, the anterior division of the cloaca which receives the rectum in such animals as birds: correlative with *proctodæum* and ★*urodæum*.

coprolalia (kop″rō-lā'li-ä), *n.* [NL., < Gr. *κόπρος*, dung, + *λαλεῖν*, speak.] A morbid tendency to indecent speech.

coprolite, *n.* **2.** Any rounded concretionary mass or pebble containing largely calcium phosphate and representing the more or less altered debris of fossil bones, teeth, etc., used as a source of phosphoric acid in the manufacture of fertilizers. *Thorpe*, Dict. Applied Chem., I. 609.—**Radiolarian coprolites,** round or cylindrical bodies, often attaining the size of a goose-egg, found in the Lias of Germany. They contain great numbers of radiolarians. "They probably originated from fish or cephalopods which had fed upon *Crustacea*, *Pteropoda*, and similar pelagic organisms whose stomachs were already full of radiolarian skeletons." *Haeckel* (quoted in Nicholson and Lydekker, Manual of Paleont., p. 148).

coprologist (ko-prol'ō-jist), *n.* A writer or painter whose work is characterized by filth or indecency. *Fortnightly Rev.*

coprology (ko-prol'ō-ji), *n.* [Gr. *κόπρος*, dung, + *λέγειν*, gather.] **1.** The collection or a collection of filth or dung; figuratively, filth in literature or art.

How far poetry may be permitted to go in the line of sensual pleasure or sexual emotion may be debatable between the disciples of Ariosto and the disciples of Milton; but all English readers, I trust, will agree with me that *coprology* should be left to Frenchmen.

A. C. Swinburne, Ben Jonson, ii. 94.

coprophagy (ko-prof'ạ-ji), *n.* [Gr. *κόπρος*, excrement, + *φαγεῖν*, eat.] The habit, found among insects, of customarily feeding upon excrement. It also occurs as a pathological condition in man.

coproprietorship (kō-prō-prī'e-tọr-ship), *n.* Joint proprietorship or ownership.

Coprosma (kō-pros'mä), *n.* [NL. (Forster, 1776), < Gr. *κόπρος*, dung, + *ὀσμή*, smell. The allusion is to the odor of the herbage in some species.] A genus of plants of the family *Rubiaceæ*. They are shrubs or small trees with opposite or whorled, entire leaves, and white or greenish, mostly inconspicuous flowers, either axillary or terminal and borne singly or in small cymes or heads, the fruit consisting of a 2- or 4-celled berry. There are about forty species, extending from New Zealand and Australia to Java, the Hawaiian Islands, and Juan Fernandez. *C. Baueri* is sometimes cultivated in greenhouses for its small, coral-red, ornamental fruits. *C. fœtidissima* is the *sterile wood*, and *C. lucida* the *karamu* or *coffee-bush*, of New Zealand. See *sterile wood*, under *sterile*, and ★*coffee-bush*.

coprosterol, *n.* See ★*koprosterol*.

cops[1], *n.* A former (and recent simplified) spelling of *copse*.

cops[2] (kops), *n.* [Also *copse*, < ME. *cops*, < AS. *cops*, var. of *cosp* (= OS. *cosp*), a shackle.] **1†.** A shackle for the hands or feet. [Anglo-Saxon use.]—**2.** A hasp. [Prov. Eng.]—**3.** A bow-shaped piece of metal, bent into the form of a capital U, used as a holdfast at the end of a pole or beam (of a plow or wagon, etc.); a clevis. [Prov. Eng.]

copse[2], *n.* Same as ★*cops*[2].

Copt. An abbreviation of *Coptic*.

copula, *n.* **5.** In *bot.*, same as *zygospore*.—**6.** In *zoöl.*, the cell resulting from the union of a microgamete and a macrogamete among the *Sporozoa*.—**7.** In *chem.*, one compound substance united with and modifying the character of another. See *copulated* ★*compound*. *E. von Meyer*, Hist. Chem., p. 283.—**8.** A commissure; the corpus callosum.—**9.** In *music*, a brief connecting passage, especially between the subject and answer of a fugue. Also called *codetta* or *conduit*.—**10.** Same as ★*amboceptor*.—**11.** In *ichth.*, same as *actinost*.

copulated (kop'ů-lā-ted), *p. a.* United by a copula; joined.—**Copulated compound.** See ★*compound*.

copulation, *n.* **3.** In *chem.* See *copulated* ★*compound*. *E. von Meyer*, Hist. Chem., p. 325.

copunctal (ko-pungk'tal), *a.* [L. *co-*, together, + *punctum*, point, + *-al*[1].] In *geom.*, being on the same point; concurrent.

Planes all on the same point, or straights all with the same cross, are called *copunctal*.

Merriman and Woodward, Higher Mathematics, p. 71.

cop-winder (kop'wīn'dėr), *n.* A machine for winding yarn from the skein upon a bobbin or pirn for weaving.

copy, *n.*—**Close copy,** formerly a copy of legal instruments which might be written continuously without breaking off in order to leave only a given number of words on each sheet. In an office copy, each sheet was to contain only a prescribed number of words.

copygram (kop'i-gram), *n.* Same as ★*copygraph*.

copygraph (kop'i-grȧf), *n.* [*copy* + Gr. *γράφειν*, write.] **1.** Same as *hectograph*.—**2.** A print produced by copygraph.—**3.** A printing-type of peculiar face, made to imitate the characters of a type-writing machine.

copy-head (kop'i-hed), *n.* A line of writing set at the head of each page of a child's copy-book, as a model of penmanship to be copied or imitated.

coquille, *n.* **2.** A shell, or a dish in the form of a shell, in which preparations of fish, etc., are served.—**3.** *pl.* Spectacles of concavo-convex glass, usually tinted or smoked, used as a protection to the eyes.—**4.** A mistake in printing, in which one letter is substituted for another.

Cor adiposum. Same as *fatty* ★*heart*.—**Cor arteriosum** [L., arterial heart], the left side of the heart, which contains arterial blood.—**Cor bovinum** [L., ox heart], a greatly hypertrophied heart.—**Cor dextrum** [L., right heart]. Same as ★*cor venosum*.—**Cor sinistrum** [L., left heart]. Same as ★*cor arteriosum*.—**Cor taurinum.** Same as ★*cor bovinum*.—**Cor venosum** [L., venous heart], the right half of the heart, which contains venous blood.

Cor. An abbreviation (*b*) of *coroner*; [l. c.] (*c*) of *correlative*, (*d*) of *correspondence*, *correspondent*, and *corresponding*.

coracite (kor'ạ-sīt), *n.* [Gr. *κόραξ*, crow, + *-ite*[2].] A partially altered uraninite, or pitchblende, from the north shore of Lake Superior.

coracler (kor'ạ-klėr), *n.* [*coracle* + *-er*[1].] A fisherman who uses a coracle. *N. E. D.*

Coracohumeral groove, in *ornith.*, the well-defined impression on the anterior side of the proximal end of the humerus.

coracoid, *n.* (*e*) In *ichth.*, a large bone of the shoulder-girdle; the clavicle; not homologous with the coracoid of Agassiz or of Parker, or the coracoideum of Vogt and Yung. *Starks*, Synonymy of the Fish Skeleton, p. 521.

coracoideum (kor″ạ-kō-id'ē-um), *n.*; pl. *coracoidea* (-ä). In *ichth.*, the supraclavicle; a bone of the shoulder-girdle of fishes between the clavicle and the post-temporal: not homologous with the coracoid of Parker, Agassiz, or Owen. *Starks*, Synonymy of the Fish Skeleton, p. 520.

coracoradialis (kor″ạ-ko-rā-di-ā'lis), *n.* [NL., < *coraco(ides)*, the coracoid, + *radius*, radius.] The short head of the biceps muscle.

coraco-ulnaris (kor″ạ-kō-ul-nā'ris), *n.* [NL., < *coraco(ides)*, the coracoid, + *ulna*, ulna.] Fibers of the biceps muscle attached to the fascia of the forearm.

coradgee, *n.* See ★*koradji*.

coral, *n.*—**Black coral,** any coral having a black horn-like axis, as the antipatharians; also applied to the black axis of certain gorgonians.—**Coral bead-tree, bean,**

calculus, fern, hairstreak, rock. See ★*bead-tree*, etc. —**Deep-sea coral zone.** See ★*zone*.—**Honeycomb coral,** a coral of the genus *Favosites*, so named from the regular hexagonal cells and transverse floors or tabulæ.—**Mexican coral bean.** See ★*bean*[1].—**Rose coral,** any species of *Isophyllia*, the polyps of this genus being large and bright-colored.—**White coral,** a branched coral of the Mediterranean, *Amphihelia oculata*.—**Yellow coral,** the yellow form of the hydrocoralline, *Distichopora nitida*.

coral-and-pearl (kor″al-and-pėrl′), *n.* The wild red baneberry, *Actæa rubra*, so called from its pearly-red berries.

coral-bead (kor′al-bēd), *n.* A climbing vine, with red drupes, of the genus *Epibaterium*, of the moonseed family. See ★*Epibaterium*.

coral-creeper (kor′al-krē″pėr), *n.* A trailing leguminous vine of Australia, *Hardenbergia coccinea* (*Glycine coccinea* of Curtis), bearing scarlet flowers. Also called *bleeding-heart*.

coral-gall (kor′al-gâl), *n.* One of the excrescences, of varied shape and size, produced on different kinds of coral by the action of barnacles, crabs and epizoic animals of other species.

These *coral-galls* may be found on the Milleporas and Madreporas of a certain portion of a reef and be absent from all the other genera of neighbouring corals. The crab-galls that are found so commonly and in such abundance upon Pocilloporas and Seriatoporas in certain parts of the Pacific and elsewhere are found only in cases of extreme rarity in other corals.

Nature, Sept. 10, 1903, p. 457.

coral-grove (kor′al-grōv), *n.* A group of arborescent corals growing together.

coralillo (kō-rä-lēl′yō), *n.* [Cuban Sp., dim. of *coral*, coral.] *Antigonon leptopus*, an ornamental climbing-vine of the family *Polygonaceæ*, which bears clusters of showy pink flowers.

coralist (kor′al-ist), *n.* [*Coral* + *-ist*.] A worker or dealer in coral.

Corallana (kor-a-lā′nä), *n.* [NL., < *corallum*, coral: see *coral*. The first species was found among corals.] The typical and only genus of the family *Corallanidæ*. *Dana*, 1852.

Corallanidæ (kor-a-lan′i-dē), *n. pl.* [NL., < *Corallana* + *-idæ*.] A family of cymothoid isopod crustaceans typified by the genus *Corallana*.

corallar (kō-ral′ăr), *a.* [*coral* + *-ar*.] Pertaining to a corallum or corål.

corallet (kor′a-let), *n.* [*corall-um* + *-et*[1].] The skeleton of one of the individuals in a compound corallum. *Dana*.

corallian (kō-ral′i-an), *a.* and *n.* [L. *coralli-um*, coral, + *-an*.] 1. Having the character of coral, or containing coral.—2. Specifically, in *geol.*, noting a division of the Jurassic system lying above the Oxfordian and below the Kimmeridgian and in England including the coral rag, coralline oölite, and calcareous grit.

In the English succession it constitutes the upper division of the Middle oölites and is characterized by its great abundance of corals in massive banks. In France and the Alps the parallel division is the Sequanian.

II. *n.* In *geol.*, the corallian division.

corallic (kō-ral′ik), *a.* [L. *corall-um*, coral, + *-ic*.] Having the character of or resembling coral.

Corallidæ (kō-ral′i-dē), *n. pl.* [NL., < *coralli-um* + *-idæ*.] A family of alcyonarian *Anthozoa*, of the order *Pseudaxonia*, in which the axis is a dense calcareous mass formed by the fusion of spicules. It includes the genera *Corallium* and *Pleurocorallium*. See *Coralliidæ*.

corallidomous (kor-a-lid′ō-mus), *a.* [L. *corallum*, coral, + *domus*, Gr. δόμος, house.] Living on coral reefs, as certain mollusks, crustaceans, and other organisms.

corallinaceous (kor″a-li-nā′shius), *a.* Belonging to the family (of algæ) *Corallinaceæ*.

coralline. I. *a.*—**Coralline crag, limestone.** See ★*crag*[1], 2, ★*limestone*.

II. *n.* 4. Commercial rosolic acid.

coral-milk (kor′al-milk), *n.* The circulating fluid in the channels of compound corals.

The nutritive fluids, after elaboration by the polyps, are conveyed into the larger deep-seated parallel tubes: the nutrient fluid contained in these tubes resembles milk so much that it is known by the name of *coral-milk*.

T. Rymer-Jones, Animal Kingdom, p. 128.

coral-pea (kor′al-pē), *n.* Same as ★*coral-creeper*.

coral-polyp (kor′al-pol″ip), *n.* An individual zoöphyte of a coral polypidom.

coral-red (kor′al-red), *n.* and *a.* I. *n.* The red color peculiar to the variety of coral known as *Corallum rubrum*.

II. *a.* Having this color; covered with a glaze of this hue: as, a *coral-red* vase.

coralroot, *n.*—**Crested coralroot,** an orchidaceous plant, *Hexalectris aphyllus*, of the southern United States, similar to *Corallorhiza*, but distinguished by crested ridges on the lip of the flower.

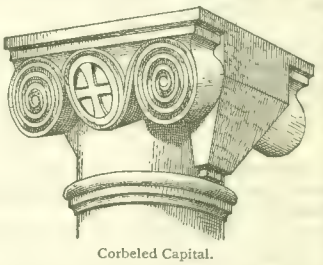
Coral-spot disease. See ★*disease*.

coral-thrombus (kor′al-throm″bus), *n.* A red thrombus formed in a short time from slowly moving blood, the coagulating fibrin having entangled the red corpuscles before they had time to sink.

In the larger vessels considerable fibrin and a homogeneous material resembling *coral-thrombi* are seen.

Jour. Exper. Med., Oct. 25, 1900, p. 157.

coral-tree, *n.*—2. A small tree of northern India, North China, Korea, and Japan, *Hovenia dulcis*, belonging to the buckthorn family. It bears a small fruit consisting of a three-seeded capsule resting on an enlarged, fleshy, arched peduncle, resembling a piece of red coral. This peduncle is edible and contains a sweet juice with a pear-like flavor. Also called *Japanese raisin-tree*.—**Bat's-wing coral-tree,** an Australian tree, *Erythrina Vespertilio*, 30 to 40 feet high, having exceedingly light and spongy wood which is used by the aborigines for making shields. Called also *cork-tree*.



corbeau (kōr-bō′), *n.* [F., raven: see *corbel*[2].] A very dark green color.

corbeille, *n.* 2. A fancy flower- or fruit-basket.

The full *corbeille* of blushing bloom.

Charlotte Brontë, Shirley, xxxii.

corbel[1], *v. t.*—**Corbeled capital,** in *columnar arch.*, a capital which has one or more distinctly marked corbels, consoles, or brackets projecting from its mass. In Syrian architecture of the fourth to the sixth centuries this form was used to diminish the length of the unsupported epistyle between two capitals. In most cases there were two of such projections, so that the capital was oblong in plan. In a few cases there were three, so that an epistyle at a right angle with the main epistyle was carried.

Corbeled Capital.

H. C. Butler, Architecture and Other Arts, p. 177.

corbelated, corbellated (kôr′be-lā-ted), *p. a.* Furnished or decorated with corbels; corbeled.

corbel-block (kôr′bel-blok), *n.* 1. A corbel when made of a single piece of stone, terra-cotta, or the like.—2. A stone in a compound corbel made up of several courses, one block of the three or four composing the corbel.

corbel-tabling (kôr′bel-tā″bling), *n.* 1. A corbel-table (which see, with cut).—2. Building by means of rows of corbels or corbel-tables. In Romanesque architecture the corbel-tabling of the cornices is a distinctive feature.

corbie-gable (kôr′bi-gā″bl), *n.* Same as *stepped gable*.

corbillard (kôr-bē-yär′), *n.* [F., a young raven, a hearse, a coach.] A French state coach formerly in use. It had a top supported by six pillars, three on a side. The quarters were inclosed by curtains and the doorways were closed by leather screens, behind which were seats for the pages.

corbina (kôr-bē′nä). *n.* [Sp. *corbina*, *corvina* (NL. *Corvina*), name of several fishes so called from their black color or black fins; prop. fem. of *corvino*, < L. *corvinus*, of the raven or crow: see *corvine* and *corbin*, and compare *Corvina*.] A much-esteemed food-fish, *Corvina deliciosa*, of the western coast of South America, sometimes attaining a length of over 6 feet. The corbina is frequently shipped inland.

corbin-bone (kôr′bin-bōn), *n.* The crow's bone; the hindmost segment of the breast-bone of a deer, technically known as the xiphoid.

corbineta (kôr-bē-nā′tä), *n.* [Sp., dim. of *corbina*, a crow: see ★*corbina*.] A sciænoid fish, *Bairdiella icistia*, found on the west coast of Mexico.

corbule (kôr′būl), *n.* [NL. *Corbula*.] A bivalve of the family *Corbulidæ*.

corcopali (kôr-kop′a-lē), *n.* The edible, acid fruit of *Garcinia Indica*, a slender tree of the gamboge family, native to India. The fruit is purple, and of the size and shape of a small orange. It is somewhat astringent and has long been employed in India for the preparation of a cooling beverage, useful in cases of fever.

cord[1], *n.* 9. An imperfection on the surface of glass. See ★*cordy*.—**Amniotic cord.** See ★*amniotic*.—**Axial cord.** See ★*axial*.—**Bedford cord,** a heavy rib-weave running lengthwise of the fabric: seen chiefly in women's dress-goods.—**Cord area.** See ★*area*. **Cord foot,** one lineal foot of a pile of cord-wood cut in 4-foot lengths and piled 4 feet high; equal to 16 cubic feet.—**Ferrein's cords,** the true vocal cords.—

Gangliated cord, the sympathetic nerve.—**Gubernacular cord,** in *embryol.*, a fibrous cord connecting the embryonic mammalian testis with the skin of the scrotum and disappearing after the descent of the testis.—**Stigmatal cord,** in *entom.*, one of the temporarily functionless solid tracheal branches running from the main longitudinal trachea to aborted thoracic stigmata in the nymphs and larvæ of certain insects of the neuropteroid series, as *Ephemeridæ*, *Perlidæ*, *Odonata*, and *Trichoptera*. In the adults they become functional. *A. S. Packard*, Text-book of Entom., p. 460.—**Willis's cords,** fine fibrous cords which cross the sinuses of the dura mater: also called *trabeculæ of Willis* and *chordæ Willisii*.

cord[1], *v.* II. *intrans.* To become hard and cord-like: noting a condition occasionally encountered in the blood-vessels.

From obstruction of the jugular there are often *cording* of the vein, swelling and œdema of the tissues and glands about the vein, and cellulitis of the neck.

Buck, Med. Handbook, III. 658.

cordage, *n.* 2. The quantity of wood, in cords, on a given area of land.

Cordaitaceæ (kôr″da-i-tā′sē-ē), *n. pl.* [NL. (Engler, 1887), < *Cordaites* + *-aceæ*.] A family of gymnospermous fossil plants of the order *Cordaitales*, typified by the genus *Cordaites*. It is characterized by unisexual flowers, the staminate stalked with 3–4 cylindrical stamens consisting of a simple pollen-sac; the fertile borne on short, filiform peduncles in the axils of bracts, many of which, crowded together on an axis, form spikes. Several genera are recognized, and generic names have been applied to various parts found detached from the stems. They were trees or woody plants with broad, longitudinally nerved leaves, ranging from the Devonian through the Carboniferous. See *Cordaites*.

cordaitaceous (kôr″da-i-tā′shius), *a.* Belonging or related to the family *Cordaitaceæ*.

cordaitalean (kôr″da-i-tā′lē-an), *a.* [*Cordaitales* + *-an*.] Belonging or related to the fossil plant-order *Cordaitales*.

Cordaitales (kôr″da-i-tā′lēz), *n. pl.* [NL. (Engler, 1892), < *Cordaites* + *-ales*.] An order of fossil gymnospermous plants, usually made to include the families *Cordaitaceæ* and *Dolerophyllaceæ*: doubts, however, exist with regard to the latter. They range from the Devonian to the Permian, and are regarded by many as the ancestors of the *Ginkgoales*.

cordaitean (kôr-da-i-tē′an), *a.* [*Cordaites* + *-an*.] Belonging or related to the fossil plant-genus *Cordaites*, or to the family *Cordaitaceæ*.

cordein (kôr′dē-in), *n.* [*cord(ol)* + *-e-* + *-in*[2].] The trade-name of methyltribromsalol or methyl cordol. Its use in medicine is similar to that of cordol.

cordicole (kôr′di-kōl), *n.* [NL. *cordicola*, < L. *cor* (*cord-*), heart, + *-cola*, < *colere*, till, worship: see *cult*.] A worshiper of the heart: a name applied to members of Roman Catholic societies who worship the 'sacred heart' (of Jesus).

cording[1], *n.* 3. In *sewing-machine work*, the stitching, with special machines, of cords on cloaks, corsets, uniforms, and other garments.

cordite (kôr′dīt), *n.* [*cord*[1] + *-ite*[2].] A smokeless powder, introduced in 1889, and adopted in the British military and naval service for small arms and guns of all calibers. It is brown in color, and was originally composed of 58 parts of nitroglycerin, 37 parts of guncotton, and 5 parts of mineral jelly (vaseline). A modification is used which is composed of 65 parts of guncotton, 30 parts of nitroglycerin, and 5 parts of mineral jelly. It is made in the form of cords or cylinders by pressing the composition through holes of varying size. Cordite imparts a high velocity to the projectile without undue pressure, is very stable under extreme climatic conditions, and its ballistic properties are not seriously affected by moisture. The objection to it is that the high degree of heat developed upon combustion causes rapid erosion of the bore of the gun.

cordol (kôr′dol), *n.* [*cord*[1](?) + *-ol*.] The trade-name of tribromphenyl salicylate, $HOC_6H_4COOH_6H_2Br_3$, prepared by the action of bromine on salol. It crystallizes in colorless needles, and is used in medicine as a gastric sedative and intestinal antiseptic.

cordoned (kôr′dond), *p. a.* Decorated with an encircling band in relief: as, a *cordoned* vase of old Satsuma.

cord-peg (kôrd′peg), *n.* In *elect.*, the metallic peg or plug attached to the end of a flexible conducting-cord for making switchboard connections. Such pegs are employed in telephone service and in other cases where circuits for small currents are needed.

corduroy, *v. t.* 2. In splitting a hide, to make uneven lines or spots on the flesh side of it. *Davis*, Manuf. of Leather, p. 203.

cordy (kôr′di), *a.* [*cord*[1] + *-y*[1].] Stringy; in *glass-manuf.*, noting a defective condition resulting from impurities. See also *wreath*, 4.

cordylite (kôr′di-līt), *n.* [Gr. κορδύλη, club, + *-ite*[2], in allusion to the shape of the crystals.]

A cerium fluocarbonate related to parisite but peculiar in containing barium: found in southern Greenland.

cordylurid (kôr-di-lū′rid), *a.* and *n.* **I.** *a.* Of or belonging to the dipterous family *Cordyluridæ*.

II. *n.* A member of the family *Cordyluridæ*.

cordylus (kôr′di-lus), *n.*; pl. *cordyli* (-lī). [NL., < Gr. κορύλη, a club.] In the medusoid of *Hydromedusæ*, an exumbral structure, possibly a modified tentacle, placed between tentacles and consisting of a core of vacuolated endoderm cells covered by flattened ectoderm. *W. K. Brooks.*

Sensory Club (Cordylus) of Onychoteuthis sp., showing the hooks and clusters of fixing-cushions and acetabula below them. Nearly one half natural size. (From "Cambridge Natural History.")

core-bar (kōr′bär), *n.* A bar of iron upon which a round core is struck up. The bar is placed on the bearings of core-trestles and loam is laid on it and struck to shape by revolving it against the edge of a board cut to the required outline. Core-bars vary in diameter with the sizes of the cores required, ranging from a half inch to twelve inches or more, and when of large diameter, such as are used in gun-construction, are called *core-barrels*.

core-barrel, *n.* 2. In *mining* and *rock-drilling*, a form of boring-bit carrier for use in making annular holes in rock with the diamond drill. The barrel consists of a wrought-iron tube of the diameter of the hole outside, with spiral grooves along its length to allow escape of water and refuse. The core passes up inside the barrel. See ★*core-borer*.

core-bench (kōr′bench), *n.* A bench where small foundry cores are made.

core-board (kōr′bōrd), *n.* Same as *loam-board*.

core-borer (kōr′bōr″ėr), *n.* In *mining*, a type of machine for deep boring having an annular cutting-bit. To this type belong the diamond drill and the calyx drill.

Core-box machine, a molding-machine fitted with cutters adapted to form in wood patterns for core-boxes.—**Core-box plane,** a plane for making the hollow cylinders within which the cores are to be molded.

core-carriage (kōr′kar″āj), *n.* A low iron car on which cores and molds which are to be baked are run into the core-oven.

Core conductor. See ★*conductor*.

corediastasis, corediastole. Erroneous forms for ★*corodiastasis* and ★*corodiastole*.

core-drill (kōr′dril), *n.* Same as ★*core-borer*.

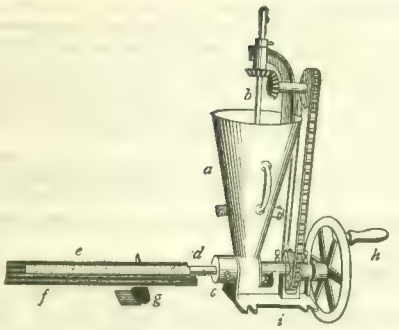
core-drilling (kōr′dril″ing), *n.* Drilling with an annular bit, usually of diamonds set in a holder, so that a core is left in the axis of the tube. From the core the strata which have been pierced can be determined.

Core-drilling is indispensable in a great variety of engineering and mining enterprises, affording, as it does, a means for drilling out a sample core or column of rock, which enables one to tell at a glance the exact nature of the substrata. *Sci. Amer.*, July 18, 1903, p. 44.

core-extractor (kōr′eks-trak″tor), *n.* In *mining*, a conical-toothed clutch in the lower end of the core-barrel by which the core is detached and raised.

coreid (kō′rē-id), *a.* and *n.* **I.** *a.* Of or belonging to the heteropterous family *Coreidæ*.

II. *n.* A member of the family *Coreidæ*.



coreine (kō′rē-in), *n.* A mordant coal-tar color of the oxazin type, derived from the amide of dihydroxybenzoic acid. It dyes chromium-mordanted wool blue.—**Coreine AB** and **AR,** mordant coal-tar colors of the oxazin type, made by heating coreine RR with aniline and then sulphonating the product. It dyes chromium-mordanted wool blue.—**Coreine 2R,** a mordant coal-tar color of the oxazin type, derived from gallocyanine. It dyes chromium-mordanted wool a bright blue. Same as *celestine* ★*blue*.

core-iron (kōr′ī″ėrn), *n.* A small wrought-iron rod from ⅛ to ¼ of an inch in diameter, used in forming a center for a foundry core. This is necessary in slender cores in order to make them sufficiently strong to withstand the pressure of the iron.

co-relation, *n.* 2. Specifically, in *vegetable teratol.*, the association of one malformation with others in the same plant: illustrated in *peloria*, etc. *Masters*.

core-loss (kôr′lôs), *n.* The loss of power in the iron core of electric machinery, consisting of the hysteresis loss and the eddy-current loss in the iron.

core-machine (kōr′ma-shēn″), *n.* In *foundry work*, a hand-power machine for pressing prepared molding-sand into cylindrical forms for use as cores. The sand is placed in the hopper end and by the revolution of a vertical plug is forced out of the bottom of the hopper, through a die that forms it into long cylinders, deposited on a tray, and cut into lengths ready for the core-oven.

Core-machine.

a, hopper; *b*, screw, pressing the mixed sand, flour, and oil through the forming-die; *c*, forming-die; *d*, core-tube; *e*, plastic core delivered upon corrugated tray; *f*; *g*, adjustment to keep tray level and to shift it until filled; *h*, operating-handle; *i*, base, resting on work-bench. Capacity 200 feet of core an hour.

core-maker (kōr′mā″kėr), *n.* One who or that which makes cores; specifically, a workman employed in a foundry whose business it is to mold and bake sand or loam cores.

coreometer, *n.* See ★*corometer*.

core-oven (kōr′uv″n), *n.* In *foundry work*, an oven for drying and baking small cores. It may be a simple sheet-metal box placed over a small furnace or a large brick oven heated by coal or gas. The cores are placed upon triangular shelves which are pivoted at one corner. The oven is fitted with two doors placed at right angles, so that whether the shelf is in the oven or swung outside the oven is always closed by one of the doors.

core-packing (kōr′pak″ing), *n.* Packing placed around a core to increase its strength and durability. The material for both core and covering depends on the service required of the packing.

core-peg (kōr′peg), *n.* A peg or support for a core which is made of a number of parts. The various parts are set on the peg and are then fastened together.

core-plate (kōr′plāt), *n.* A thin annular cast-iron plate used in making a framework or skeleton for large cores. Several of these plates are fastened to a central bar, the space between them is filled with twisted hay, and the whole is covered with loam.

core-ring (kōr′ring), *n.* A ring of cast-iron which supports a core and, when the casting is poured, melts and becomes a part of the casting.

core-rod (kōr′rod), *n.* Same as ★*core-iron*.

co-respondency (kō-re-spon′den-si), *n.* The fact of being co-respondent, as in a suit for divorce.

core-stove (kōr′stōv), *n.* A stove for heating a core-oven in a foundry.

core-trestle (kōr′tres″l), *n.* A strong trestle, usually of metal, having V-bearings on its top in which a core-bar is laid. To the end of this core-bar is fastened a crank by which it can be turned to shape the core as in a rough sort of lathe.

core-tube (kōr′tūb), *n.* 1. Same as *core-barrel*. —2. The inner tube of a built-up gun.

core-vent (kōr′vent), *n.* In *founding*, a small hole or passage made in a core for the escape of gas. The best way to make it is to lay a string in the core when the latter is being made, and to burn it out after the core is baked. Sometimes small wires are placed in the core and withdrawn after it is baked.

core-wall (kōr′wâl), *n.* A wall of solid masonry in the interior of a dam, dike, or causeway which is constructed chiefly of sand or earth. *H. M. Wilson*, Irrigation Engineering, p. 350.

corf, *n.* 3. A small mine-car of wood or iron.

corf-cage (kôrf′kāj), *n.* The cage or elevator in which corfs are hoisted to the surface. [Eng.]

corial (kō-ri-äl′), *n.* [Sp. *corial*, appar. perverted from Arawak *kuljara*.] In Guiana, a dugout canoe pointed at both ends.

coriandrol (kō-ri-an′drōl), *n.* [L. *coriandrum*, coriander, + *-ol*.] A colorless fragrant liquid compound, $C_{10}H_{18}O$, contained in oil of coriander.

Coriariaceæ (kō″ri-ā-ri-ā′sē-ē), *n. pl.* [NL. (Dumortier, 1829), < *Coriaria* + *-aceæ*.] A family of dicotyledonous choripetalous plants of the order *Sapindales*, containing the genus *Coriaria* only, and characterized by 5-merous diplostemonous flowers. They are woody plants with opposite or whorled entire leaves without stipules, and axillary or clustered flowers. The genus *Coriaria* is remarkable for its wide distribution in both hemispheres of the old world, and is also found fossil in the Tertiary of Europe. See *Coriaria*.

coridine (kor′i-din), *n.* A monacid base, $C_{10}H_{15}N$, found in coal-tar. It boils at 211° C.

coriin (kō′ri-in), *n.* [*cori*(*um*) + *-in*².] An albuminoid substance which cements together the fibers of the corium.

corimelænid (kor-i-me-lē′nid), *n.* A member of the heteropterous family *Corimelænidæ*. Also used adjectively.

corindin (kō-rin′din), *n.* [Formation not clear.] A ptomaïne, $C_{10}H_{15}N$.

coring-out (kōr-ing-out′), *n.* The process of making hollow castings by the use of cores, as distinguished from forming the interior by a block of greensand.

coring-up (kōr-ing-up′), *n.* The process of putting the cores in place in a foundry-mold before closing it up by putting on the cope.

corinth (kor′inth), *n.* 2. A name applied to several coal-tar colors which dye currant-red and other reddish shades.—**Glycin corinth,** a direct cotton coal-tar color of the diazo type, derived from benzidine. It dyes unmordanted cotton currant-red in an acid bath.—**Kongo corinth B** and **G,** direct cotton colors of the disazo type, the former derived from tolidine, the latter from benzidine. They dye unmordanted cotton brownish violet in a soap bath.

Corinthian, *a.* 4. Elegantly ornate; florid: applied to literary style.

I have already spoken of the Attic and the Asiatic styles; besides these, there is the *Corinthian* style. . . . It has not the warm glow, blithe movement, and soft pliancy of life, as the Attic style has; it has not the over-heavy richness and encumbered gait of the Asiatic style; it has glitter without warmth, rapidity without ease, effectiveness without charm. Its characteristic is, that it has no soul. *M. Arnold*, Essays in Criticism, p. 87.

Corinthian atrium. See ★*atrium*.

Corinthianesque (kō-rin″thi-an-esk′), *a.* [*Corinthian* + *-esque*.] Resembling the Corinthian style: as, *Corinthianesque* pillars.

Corinthianism (kō-rin′thi-an-izm), *n.* [*Corinthian* + *-ism*.] Corinthian conduct or theory; that is, the unrestrained pursuit of worldly pleasure.

Corinthianize, *v. i.* 2. In *arch.*, to design or to be designed somewhat in the spirit of the Corinthian order. Thus the Byzantine capitals of the fifth century and later, founded upon sharp, thistle-like leafage resembling the acanthus, are assumed to be deliberate imitations of Corinthian capitals, and may be said to be *Corinthianized*.

coriomyrtin (kō″ri-ō-mėr′tin), *n.* Same as *coriamyrtin*.

coriosulphurine (kō″ri-ō-sul′fū-rin), *n.* [L. *corium*, skin, + *sulphur*, sulphur, + *-ine*².] A yellow pigment found in the skin of certain birds.

corisid (kor′i-sid), *n.* A member of the heteropterous family *Corisidæ*. Also used adjectively.

corium, *n.* 3. A tunic of leather with overlying flaps. It appears in the Bayeux tapestry, and was used as late as the time of Henry III. *Myrick*, Antient Armor, I. 2.—**Corium phlogisticum,** an unusually thick crust formed on blood drawn during the height of an inflammation. See *buffy coat*.

Corixidæ (kō-rik′si-dē), *n. pl.* Same as *Corisidæ* (which is the preferred spelling).

cork[1], **I.** *n.* 5. *pl.* (*a*) A game played with corks colored differently on the sides and so trimmed that they may fall either way, the players betting on whether the majority thrown will fall red or black. Sometimes called *props*. (*b*) In France and Belgium, a game, a mixture of quoits and bowls. (*c*) A variety of skittle-pool.—**Burnt cork,** charred cork used to blacken the face, as in making up for a 'negro minstrel,' or to emphasize the eyebrows, etc.

II. *a.*—**Cork belt,** a cork life-preserver made to be fastened around the waist.—**Cork leg,** an artificial leg made of cork: now usually applied to one made of wood or other material.

cork[1], *v. t.* 4. In *currying*, to grain. [Rare.] *Modern Amer. Tanning*, p. 83.

cork-board, *n.* 2. In *currying*, a board, with a cork surface, used by a workman to board or grain a skin or hide. *Modern Amer. Tanning*, p. 83.

cork-borer (kôrk′bōr″ėr), *n.* Any one of the following insects, which bore into the corks of wine-bottles: *Rhizophagus bipustulatus*, a nitidulid beetle; *Tinea cloacella*; *Endrosis lactulla*; and *Asopia farinalis*. One of the sow-bugs, *Oniscus murarius*, also has this habit, but probably only follows insect damage.

cork-elm (kôrk′elm), *n.* A majestic forest-tree, *Ulmus racemosa*, of the more northeastern parts of North America, but ranging from Quebec to Nebraska and south to northern New Jersey and Missouri. It reaches a height of 100 feet, the trunk, which sometimes attains a diameter of 3 feet, often being free of branches for 60 feet. The

habit is wholly unlike that of the white elm, the top being relatively small for so large a tree. The bark of old trees is deeply divided by fissures into broad, corky ridges. The wood has most of the valuable qualities of the elm, and is largely employed in the manufacture of agricultural implements, wagon-hubs, and railway-ties, and for the foundations of buildings. It is planted sometimes for shade and ornament, but lacks the umbrageous qualities as well as the grace and beauty of the American elm.

Harris's Cormorant (*Nanopterum harrisi*).

corking (kôr'king), *n.* The undesirable effect produced in wines by fungi in the cork.

In order to destroy the fungi the spores or mycelium of which exist in cork and give rise to volatile substances, which in their turn give rise to what is known as *corking* in wines or other fluids, the corks employed should be sterilized in vacuo. *Lancet*, June 8, 1904, p. 1758.

corking (kôr'king), *a.* [Cf. *corker*.] Fine; 'bully.' [Slang.]

corkir (kôr'kėr), *n.* [Also *korkir*, *korker*, < Gael. *corcur*, crimson, = Ir. *corcur*, scarlet, OIr. *corcur*, purple, = W. *porphor*, < L. *purpura*, purple: see *purple*. See also *cork*[4].] A kind of lichen which furnishes a crimson dye.

cork-paint (kôrk'pānt), *n.* In *ship-building*, a paint applied to iron surfaces to prevent condensation of moisture from the atmosphere, or sweating. A sticky varnish is first applied to the surface, and finely granulated cork is thrown against it. The adhering cork is afterward painted over with ordinary paint.

cork-pool (kôrk'pöl), *n.* See ★*pool*[2].

cork-rope (kôrk'rōp), *n.* The rope to which the corks of a fish-net are attached.

corkscrew, *n.* **2.** A geared logging-locomotive. [Slang.]—**Devil's corkscrews,** spiral bodies, described under the generic name ★*Daimonelix* (which see, with cuts), of large size, often having a vertical height of from 5 to 10 feet, and sometimes coiled about a solid cylindrical axis. They occur in a vertical position in the Miocene rocks of Nebraska, and were originally regarded as casts of the borings of rodents. The latest investigations show that the bodies are constituted of a probably vegetable cellular tissue composed of loose oblong tubules variously intertwined.

corkscrew-plant (kôrk'skrö-plant), *n.* See *Spiranthes*.

cork-tree, *n.* **2.** In Australia: (*a*) *Hakea lorea*, a tree of the family *Proteaceæ*, giving strong, durable timber: so called in allusion to its rugged bark. (*b*) Same as *bat's-wing* ★*coral-tree*.—**New Zealand cork-tree,** a tiliaceous tree, *Entelea arborescens*, having extraordinarily light wood.

cork-wax (kôrk'waks), *n.* Same as *cerin*, 2.

cork-wing (kôrk'wing), *n.* *Crenilabrus melops*, a labroid fish found on the coasts of Europe.

corkwood, *n.* **2.** In Australia, any one of several trees having very light or soft and easily worked wood, or the wood itself. The three most important are *Duboisia myoporoides*, a solanaceous tree having white or yellowish firm, soft wood, and bark resembling that of the cork-oak: also called *corkwood-elm*; *Endiandra Sieberi*, a lauraceous tree with light-brown soft wood suitable for cabinet-work; and *Schizomeria ovata*, of the family *Cunoniaceæ*, which has wood exceedingly light in weight.

3. See ★*whau*.

corkwood-elm (kôrk'wůd-elm″), *n.* See ★*corkwood*, 2. See also *Duboisia* and *duboisine*.

Corky dike, a local name in the *Acadian* provinces of a variety of soil which contains many vegetable fragments and fibers. *J. W. Dawson*, Acadian Geol., III. 25.—**Corky warts,** pathological formations of cork in the form of wart-like excrescences on roots and tubers. They frequently occur in connection with scab of potato-tubers and beets, and are mostly due to the action of bacteria and fungi.

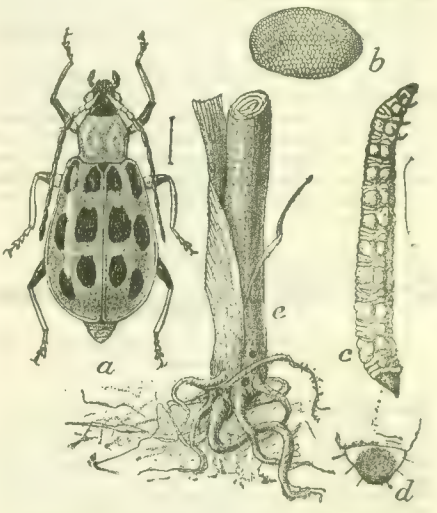
cormidium (kôr-mid'i-um), *n.*; pl. *cormidia* (-ä). [NL., < Gr. *κορμός*, a trunk (see *cormus*), + dim. *-ιδιον*.] A group, in a cormus, of the morphological units or persons of which it is composed. In the siphonophores the cormidia are often arranged at regular intervals upon the stem, separated by internodes.

The *cormidium* consists of a gonophore and a sterile person with bract, siphon, and capturing filament. *Lang* (trans.), *Comp. Anat.*, p. 112.

cormogenous (kôr-moj'e-nus), *a.* In *bot.*, having a corm.

cormoid (kôr'moid), *a.* Resembling or having the character of a corm. *Syd. Soc. Lex.*

cormophylogeny (kôr″mō-fī-loj'e-ni), *n.* [Gr. *κορμός*, a trunk, + *φῦλον*, a tribe, + *-γενεια*, < *γεν-*, produce (see *phylogeny*).] Same as *cormophyly*.



cormorant, *n.*—**Harris's cormorant,** *Nanopterum harrisi*, a large flightless cormorant confined to the vicinity of Narborough Island, of the Galapagos group: discovered by Charles Miller Harris in 1897, and named for him. See cut in first column.

cormus, *n.* **3.** In *biol.*, a morphological individual or morphon of the fourth order, composed of two or more persons organically connected into a compound organism. A siphonophoran is a cormus in this sense, since its constituent members are persons; but a tree is not. Sometimes *corm*. See *person*, 8.

corn[1], *n.*—**Corn-and-cob meal,** the product of grinding the whole ear of Indian corn. The combination of grain and cob has been found advantageous for stock-feeding.—**Corn-belt** (of the United States), the States where Indian corn is most extensively grown. These are seven in number: Illinois, Iowa, Kansas, Nebraska, Missouri, Indiana, and Ohio.—**Corn bran,** the external coating of the kernel of maize, separated by grinding and bolting. In a compressed state, with the addition of water, and of salt as a preservative, it is sold as food for cattle.—**Corn chop,** coarsely ground or cracked Indian corn used for feeding stock.—**Corn ear-worm,** the larva of a cosmopolitan noctuid moth, *Heliothis armiger*, which feeds on ears of maize. Also known as the *boll-worm* and *tomato fruit-worm*.—**Corn ergot.** See ★*ergot*[1].—**Corn flour.** (*a*) Corn meal. (*b*) Same as *corn-starch*, 2.

The only form of corn as human food at all known abroad is corn starch, which is sold principally in the British Isles under the name of *corn flour*. *U. S. Dept. Agr.*, Use of Maize in Europe, 1891, p. 5.

(*c*) A term applied to flour made from rice or other grain. [Eng.] (*d*) A recent product which consists of the finely ground grain of Indian corn exclusive of the chit or germ. It is finer than corn meal, and being nearly free from oil is of better keeping quality; but it has lost the corn flavor and lacks gluten, and hence must be used in mixture with strong wheat flour.—**Corn meal,** the grain of Indian corn ground to varying degrees of fineness: used for making mush and the different kinds of corn bread, and also for feeding animals. See ★*corn flour* and *samp*.—**Corn oil,** an oil derived from the germ of the grain of maize as a by-product in the manufacture of glucose. It is used to some extent in soap-making and as a substitute for linseed-oil in painting, and, having a fine flavor, it is often mixed with olive-oil, as also sometimes with cod-liver oil. It is also vulcanized and mixed with rubber.—**Corn plant-louse,** an American aphidid, *Aphis maidis*, living on Indian corn.—**Corn root-louse,** an American aphidid, *Aphis maidi-radicis*, which lives for at least a part of its existence on the roots of Indian corn.—**Corn-root web-worm,** the larva of an American crambid moth, *Crambus zeellus*, which feeds on the roots of maize and forms a webbed cocoon near the base of the stalk.—**Corn root-worm,** the larva of either of two American chrysomelid beetles, *Diabrotica longicornis* and *D. duodecim punctata*. See *Southern* ★*corn-root worm*, with cut.—**Corn-seed maggot,** the larva of an American anthomyiid fly, *Pegomya fusciceps*, which damages seed-corn in the ground.—**Corn-stalk maggot,** the larva of an American fly, *Chætopsis ænea*, which lives in a cavity formed within the stems of maize, wheat, oats, and sugar-cane.—**Corn trash,** the husks or shucks of Indian corn. [Southern U. S.]—**Corn-wireworm,** the larva of an American elaterid beetle, *Melanotus cribulosus*, which injures growing maize.—**Cuzco corn,** a Chilean Indian corn of many varieties. It belongs to the soft type, and has the kernels larger than in any other sort, sometimes an inch long.—**Danubian corn,** an Indian corn grown in commercial quantity in southeastern Europe, preferred for chicken feed on account of its small grains. It is thought to belong to the 'golden pop-corn' race.—**Dent corn.** See ★*maize*.—**Flint corn.** See ★*maize*.—**Fodder corn,** maize intended for green or dry forage; specifically, any variety of maize specially adapted for use as forage, that is, producing abundant foliage and, if intended for green-feeding, having a long season. Though the corn-plant grows richer in content with maturity, it is fed green with advantage for certain purposes, particularly for soiling. Fodder corn is often sown broadcast or in drills, more thickly than corn intended for grain.—**Green corn,** in *zoöl.*, a cylindrical mass of yellowish egg-capsules of certain whelks, *Buccinum*.—**Horse-tooth corn,** a group of varieties of dent corn which have long, flat kernels.—**Hulled corn.** See *hull*[1], *v. t.*—**Indian corn.** See *maize* and *Zea*.—**Jerusalem corn.** See ★*Kafir-corn*.—**Kafir corn.** See ★*Kafir-corn*.—**Large corn-stalk borer.** Same as *sugar-cane borer*.—**Mummy-corn,** Indian corn found with mummies in Peru and Chile.—**Pharaoh's corn.** Same as *mummy-wheat*.—**Snapped corn,** corn ears picked, usually somewhat before they are ripe, and, with some of the inner husks adhering, fed to stock.—**Southern-corn leaf-beetle** an American chrysomelid beetle, *Myochrous denticollis*.—**Southern-corn root-worm,** the larva of an American chrysomelid beetle, *Diabrotica duodecimpunctata*, also known as the *12-spotted cucumber-beetle* or *12-spotted Diabrotica*.

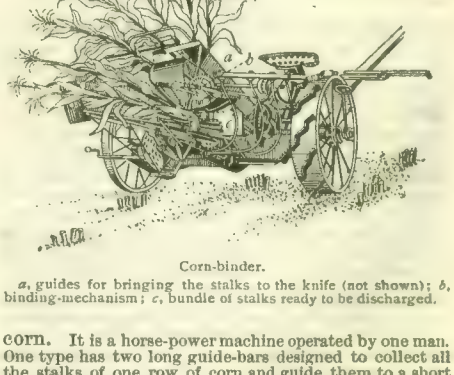
Southern-Corn Root-worm (*Diabrotica 12-punctata*).

a, beetle; *b*, egg; *c*, larva; *d*, anal segment of larva; *e*, work of larva at base of cornstalk. All much enlarged except *e*, which is reduced. (After Riley, U. S. D. A.)

Sugar corn. (*a*) A variety of sweet corn. See ★*maize*. (*b*) A brand of corn-feed made up mostly of the hulls and germs of maize-kernels.—**Tassel corn,** a sport, produced by various types of maize, in which kernels are borne on the tassel.—**White Egyptian corn.** Same as ★*chicken-corn*.—**Yankee corn,** flint corn: so called in the West because grown chiefly in New England.

corn[1], *v. i.* **2.** To form corns or seeds in the ear or pod; kern: said of cereals or pulse. *N. E. D.*

corn[2], *n.*—**Soft corn,** a corn formed between the toes and constantly macerated by the perspiration of the foot.



Corn. An abbreviation of *Cornish* and of *Cornwall*.

cornacuspongian (kôr-nak-ū-spon'ji-an), *a.* and *n.* **I.** *a.* Having the characteristics of the *Cornacuspongiæ*.

II. *n.* An individual of the order *Cornacuspongiæ*.

corn-aphis (kôrn'ā″fis), *n.* An American aphidid, *Aphis maidis*, found commonly on Indian corn.

corn-binder (kôrn'bīn″dėr), *n.* In *agri.*, a harvesting-machine for cutting, gathering, and binding together the stalks of Indian

Corn-binder.

a, guides for bringing the stalks to the knife (not shown); *b*, binding-mechanism; *c*, bundle of stalks ready to be discharged.

corn. It is a horse-power machine operated by one man. One type has two long guide-bars designed to collect all the stalks of one row of corn and guide them to a short reciprocating knife placed at the throat between the bars. The machine is driven along the row, and gathers, cuts, and bends down the stalks into a compact bundle, which is bound and discharged behind the machine or held until a number of bundles accumulate, when all may be discharged at once for convenience in shocking. See *mower* and ★*corn-shocker*.

corn-boggard (kôrn'bog″ärd), *n.* A scarecrow set up in a corn-field.

As he sat in his shirt-sleeves and stocking-feet, . . . he was more than usually grotesque, 'As slamp an wobbly as an owd *corn-boggart*,' so his neighbors described him. *Mrs. Humphry Ward*, David Grieve, i. 4.

corn-brake (kôrn'brāk), *n.* A plantation of maize. [U. S.]

corn-broom (kôrn'bröm), *n.* A broom made from the branching panicles of broom-corn.

corn-crowfoot (kôrn′krō″fůt), *n.* See ★*crowfoot.*

corn-doctor (kôrn′dok-tọr), *n.* A chiropodist. [Colloq.]

cornea, *n.*—**Conical cornea,** a conical anterior bulging of the cornea. Also called *keratoconus* and *staphyloma cornæ.* See *staphyloma.*—**Cornea globosa.** Same as *buphthalmos.*—**Hernia of the cornea.** Same as *ceratocele.*—**Sugar-loaf cornea.** Same as *buphthalmos.*

Corneal astigmatism. See ★*astigmatism.*

cornein (kôr′nē-in), *n.* [L. *corneus,* horny, + *-in*2.] 1. A nitrogenous compound which forms the chief organic portion of the corals *Antipathes* and *Gorgonia.* It is related to spongin, fibroin, and sericin.—**2.** An igneous rock of a compact, tough, and horn-like texture. Dana refers to this name as an equivalent of *aphanite.* It was applied by De la Bèche to a variety of trap-rock found in Pembrokeshire. Also *corneine.*

cornel, *n.*—**Silky cornel,** *Cornus Amomum,* an American shrub from 3 to 10 feet high, with ovate, silky pubescent leaves and purplish twigs, found along streams from New Brunswick to Florida and westward to the Dakotas and Texas. Also called *swamp-dogwood* and *kinnikinick.*

corneoblepharon (kôr″nē-ō-blef′a-ron), *n.* [NL. *cornea,* cornea, + Gr. *βλέφαρον,* eyelid. The form does not exactly express the notion defined.] Adhesion between the cornea and the eyelid.

corneo-iritis (kôr″nē-ō-ī-rī′tis), *n.* [NL., < *cornea* + *iritis.*] Inflammation of the cornea and the iris. *Lancet,* May 30, 1903, p. 1516.

corneole (kôr′nē-ōl), *n.* [NL. *corneola,* dim. of *cornea,* cornea.] The anterior transparent part of each of the segments of the compound eye of insects. *Syd. Soc. Lex.*

corner, *n.* **10.** Specifically, a projecting angle in the side of an instrument of the viol family. In instruments of the true violin group there are two corners on each side, between which is the concave indentation called the *waist.* See ★*block*1, 19.—**11.** In *math.,* a vertex or summit of a polyhedron.—**12.** In *field hockey,* a free hit against the defending side, made within three feet of the nearest corner flag.—**Amen corner.** See ★*amen.*—**Corner binds,** in *forestry,* four stout chains, used on logging-sleds, to bind the two outside logs of the lower tier to the bunks and thus give a firm bottom to the load. [Newfoundland].—**Corner quadrat.** See ★*quadrat.*—**Dead corner,** a manufacturer's name for any corner or angle in the lead chambers used in making sulphuric acid, in which the gases stagnate or fail to be mixed as they should be by motion.—**Round the corner,** in *poker,* a straight which is made by counting the ace as a connecting card between the top and the bottom of a suit, such as QKA 2 3. When played it outranks the lowest possible straight.

corner, *v. t.* **3.** In making turpentine, to cut out a triangular shallow chip above each of the two corners of the box, to prepare the tree for chipping and to direct the flow of resin into the box. [Southern U. S.]—**4.** To form a corner in (a stock or commodity). See *to corner the market.*

corner-block (kôr′nėr-blok″), *n.* In *violin-making,* see ★*block*1, 19.

corner-punch (kôr′nėr-punch″), *n.* An angular punch used for cleaning out corners.

corner-valve (kôr′nėr-valv″), *n.* A little-used form of small valve in which the spindle and valve are on one side, at right angles to the plane of the two outlets. The angle-valve, in which the spindle is in the plane of the two outlets and in line with one of them, is more common.

cornet1, *n.* **8.** In *bot.,* a hollow, horn-like growth or projection; a hood.

corneta (kôr-nā′tä), *n.* [Sp.] Same as ★*cornet-fish.*

cornet-fish (kôr′net-fish″), *n.* A trumpet-fish, *Fistularia depressa,* widely distributed through the Pacific.

cornette-pot (kôr-net′pot), *n.* A pot in which the cornette of gold undergoes one of the steps of the assaying process.

corneum (kôr′nē-um), *n.* [NL., neut. of L. *corneus,* horny: see *cornea.*] The horny layer of the skin.

corn-feed (kôrn′fēd), *n.* One of a class of commercial feeds for stock, composed chiefly of the waste from the manufacture of glucose and starch.

corn-flag, *n.* **2.** The yellow flag or flower-de-luce, *Iris pseudacorus,* now naturalized in the eastern United States and common in cultivation.

Corn-flower decoration. See ★*decoration.*

corn-fly, *n.*—**Ribbon-footed corn-fly.** Same as *corn-fly.*

corn-fodder (kôrn′fod″ėr), *n.* The maize-plant as used for feeding stock; specifically, the whole maize-plant, including the ears, field-cured and used for feeding cattle. It is usually put up in shocks and is known on the farm as 'shock corn.' Contrasted with *silage* and ★*stover*1. Compare *fodder* and *fodder* ★*corn.*

corn-grinder (kôrn′grīn″dėr), *n.* A muller for grinding corn on the metate.

corn-harvester (kôrn′här″ves-tėr), *n.* A machine used in harvesting maize. See ★*corn-shocker.*

cornice (kôr′nis), *v. t.* To furnish or finish with a cornice.

cornice-brake (kôr′nis-brāk), *n.* See ★*brake*3, 14.

cornice-machine (kôr′nis-ma-shēn″), *n.* A machine for working copper or galvanized iron to form the moldings and decorations of sheet-metal cornices for the exterior of buildings.

corniculiferous (kôr-nik″ū-lif′ė-rus), *a.* In *bot.,* bearing little horns or projections; corniculate.

cornification, *n.* **2.** The growing of horns.

> The habit of *cornification* is more likely to have been formed nearer home than in the interior of Africa.
> *Southey,* Doctor, cxxviii.

Corning2 (kôr′ning), *n.* [Named for Erastus *Corning* of Albany, New York, the owner of the first vehicle of this kind.] A top-buggy with deep sides and the part forward of the seat cut down square.

Cornish, *a.*—**Cornish pump,** any pump worked by a Cornish engine-cylinder. As the Cornish engine had no connecting-rod and crank-device, the length of its stroke was not constant; but no acceleration of the water-column was caused by the harmonic motion of the piston as the crank revolved.—**Cornish rolls,** crushing or pulverizing rolls used chiefly for ores or easily broken materials.

corn-jobber (kôrn′job″ėr), *n.* A jobber who deals in corn; a grain-dealer.

corn-mildew (kôrn′mil″dū), *n.* The rust of wheat caused by the fungus *Puccinia graminis.* [Eng.]

corno (kôr′nō), *n.* [It., < L. *cornu,* horn: see *corn*2, *horn.*] In *music,* a horn. When used absolutely, it now usually designates the French or orchestral horn (see *horn*); but the *corno inglese,* or English horn, is a tenor oboe (see *oboe*), and the *corno di bassetto,* or basset-horn, is a tenor clarinet. See ★*corno di caccia.*

corno di bassetto. **2.** In *organ-building,* a soft-toned reed-stop.

corno di caccia (kôr′nō dē käch′ ä). [It., 'hunting-horn.'] A horn originally used in hunting and gradually developed into the modern French or orchestral horn. See *horn,* 4 (*c*).

corno-flute (kôr′nō flōt). In *organ-building,* a soft stop of the flute class.

cornometer (kôr-nom′e-tėr), *n.* [E. *corn*1 + Gr. *μέτρον,* measure.] See ★*grain-tester.*

cornopean, *n.* **2.** In *organ-building,* a reed-stop of a bold, powerful tone.

corn-pike (kôrn′pīk), *n.* A circular rick of corn (small grain), pointed at the top; a stack of grain. [Prov. Eng.]

corn-pit (kôrn′pit), *n.* That part of a produce exchange where the business in Indian corn is carried on. [U. S.]

corn-pith (kôrn′pith), *n.* The pith of the stalk of maize, used in the manufacture of cellulose and for a packing between the inner and outer shells of war-ships. It swells greatly when wet and is thus suited to close apertures automatically.

corn-rail (kôrn′rāl), *n.* A name for the corn-crake, *Crex pratensis.*

corn-riddle (kôrn′rid″dl), *n.* A corn-sieve.

corn-salve (kôrn′säv), *n.* An ointment or salve, generally containing salicylic acid and cannabis indica, applied to corns for their removal.

corn-sheller, *n.* Corn-shellers range in capacity from 30 bushels an hour in hand-machines to 250 bushels an hour in power-machines. Some power-machines clean the shelled corn by a blast from a fan and elevate it to a wagon-box or grain-car, and deliver the cobs to an elevator which stacks them at a distance from the machine. Others deliver the clean corn to sacks. Power-machines are also provided with long conveyers for collecting the unshelled corn and conveying it to the sheller. All, both stationary and portable, can be operated by belting or gearing from a horse-power machine placed in the field near by, or by a belt from a portable motor.—**Shuck corn-sheller,** a machine for removing the husks from the cob, shelling and cleaning the corn, delivering it to a sacking-machine, and stacking the husks and cobs.

corn-shocker (kôrn′shok″ėr), *n.* In *agri.,* a horse-power machine for cutting standing Indian corn, gathering and binding the stalks into shocks, and depositing the shocks in an upright position upon the ground; a corn-harvester. It consists of a strong platform, mounted on wheels and fitted with machinery for cutting, gathering, bunching, and binding the stalks into an upright shock that stands upon the platform. Attached to the platform is a crane which, when the shock is bound and tied, can be used to lift it, swing it to one side, set it upon the ground, release the lifting apparatus, and return it to its position ready to lift the next shock. The machine is drawn by two horses and operated by one man, the forward movement of the machine, as in other harvesters, serving to move all the machinery except the crane, which is operated by hand. If desired, the shock when gathered can be transported on the machine to another place to leave the field clear for plowing.

corn-shuck (kôrn′shuk), *n.* One of the coarse leaves which inclose an ear of Indian corn.

corn-sieve (kôrn′siv), *n.* A sieve for cleaning corn or grain.

corn-silk (kôrn′silk), *n.* The styles of Indian corn: same as *silk,* 4. Corn-silk is officially recognized under the pharmacopœial name *zea* as a mild stimulant diuretic.

corn-spurry (kôrn′spur″i), *n.* See *spurry*2.

corn-stalk (kôrn′stâk), *n.* **1.** The stem or culm of Indian corn, without the ears, leaves, or tassel, or with all of these except the ears. Compare ★*stover*1. The corn-stalk consists of an outer shell surrounding the pith. After removal of the latter the shell is now sometimes ground into a meal equal to good hay for feeding stock.

2. A tall, slender person: applied as a nickname to those whites who have been born and bred in the Australian colonies, and especially in New South Wales.

> The Australian ladies may compete for personal beauty and elegance with any European, although satirized as *corn stalks* from the slenderness of their form.
> *G. Bennett,* Wanderings in N. S. Wales, I. 341.

Corn-stalk disease, a peculiar fatal malady of cattle in the western United States, the cause of which is little understood. It frequently follows the eating of dried standing corn-stalks, hence the name.

> The *cornstalk disease,* which extends northward into a few localities in the northern stock ranges, especially in South Dakota, is a strange, little-understood malady of cattle, due to the eating of dry cornstalks in the field after harvest. As corn of itself is not poisonous, the real cause of the malady has been variously attributed to bacteria, to parasitic fungi, and to saltpeter, which may, under different conditions, be present on the corn, or simply to malnutrition or impaction of the alimentary canal. *Yearbook U. S. Dept. Agr.,* 1900, p. 307.

Corn-stalk fiddle, a musical toy made from a nearly ripe stalk of corn by slitting from the outer portion of the stalk, just above a joint, two narrow strips (without detaching the ends), raising them, and inserting under them thin slivers of wood. The slivers form bridges which support and stretch the fibers and make it possible to use them in the manner of a violin. [U. S.]

cornstalk-weed (kôrn′stâk-wēd), *n.* The shining pondweed, *Potamogeton lucens,* the long peduncles of which, surmounted by dense spikes, rising out of the water, somewhat resemble stalks of Indian corn.

corn-tassel (kôrn′tas″l), *n.* The tassel or staminate inflorescence at the top of a stalk of Indian corn.

cornu, *n.*—**Cornua of the spinal cord,** collections of gray matter seen on transverse section of the spinal cord, passing, two anteriorly and two posteriorly, from the central commissure. See cut under *spinal cord.*—**Cornu cutaneum,** a horny outgrowth from the skin.—**Cornu majus.** Same as *ceratohyal;* one of the hyoid bones of fishes.—**Cornu occipitale,** the posterior horn of each lateral ventricle of the brain.—**Ethmoidal cornu,** the middle turbinated body.—**Middle cornu.** (*a*) Same as *ethmoidal* ★*cornu.* (*b*) The descending horn of each lateral ventricle of the brain.

cornuate (kôr′nū-āt), *a.* [L. *cornuatus,* poetic variant of *cornutus,* horned.] Same as *cornute,* 3.

cornucopia, *n.* **4.** An extension of the choroid plexus into each lateral recess of the fourth ventricle of the brain.

cornucopiate (kor-nū-kō′pē-āt), *a.* [*cornucopia* + *-ate*2.] Having the shape of a cornucopia, as certain shells.

cornule (kôr′nūl), *n.* [LL. *cornulum,* dim. of L. *cornu,* horn.] A horny grinding-plate, with the function of a tooth.

Cornu's spiral. See ★*spiral.*

Cornute leaf. See ★*leaf.*

cornutin (kôr-nū′tin), *n.* [L. *cornutus,* horned, + *-in*2.] A poisonous alkaloid, of unknown composition and somewhat doubtful identity, found in ergot.

> The recent announcement by Kobert (C. C. 1885, 66) of three new compounds in ergot, ergotic and sphacelic acids and *cornutine,* is questioned by Tanret (J. Ph. 1885, 11,309). *Thorpe,* Dict. Applied Chem., II. 18.

Cornwall heave. See ★*heave.*

Cornwallis (kôrn-wol′is), *n.* The anniversary of the capture of General Cornwallis at Yorktown (Oct. 19, 1781), long observed as a holiday with parades, sham battles, etc.

> I hait the Site of a feller with a muskit as I du pizn. But there is fun to a *cornwallis* I ain't agoin' to deny it.
> *Lowell,* Biglow Papers, 1st ser., ii.

coroa (kō-rō′ä), *n.* [Pg., a crown: see *crown.*] A gold coin of Portugal, equal to 5,000 reis, and equivalent to about $5.40.

corodiastasis (kor″ō-dī-as′ta-sis), *n*; pl. *corodiastases* (-sēz). [NL. (at first erroneously *core-*),

⟨Gr. *κόρη*, pupil of the eye, + *διάστασις*, separation.] Dilatation of the pupil. Also *corodiastole*.

corodiastole (kor″ō-dī-as′tō-lē), *n.* [NL. (at first erroneously *core-*), ⟨Gr. *κόρη*, pupil of the eye, + *διαστολή*, separation, dilatation.] Same as ★*corodiastasis*.

corol., coroll. Abbreviations of *corollary*.

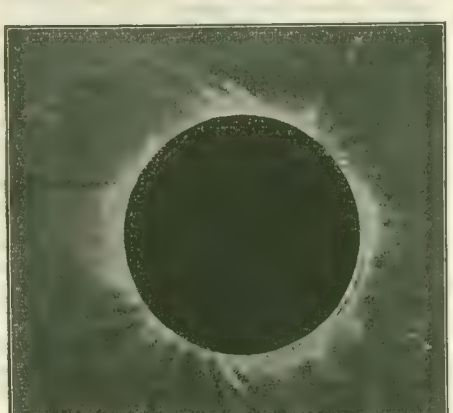
corollar (kō-rol′ăr) *a.* [NL. *corollaris*, ⟨ *corolla*, corolla.] Same as *corollate*.

corollarial (kor-ō-lā′ri-ạl), *a.* [LL. *corollarium*, corollary, + *-al*[1].] Of the character of a corollary.

corollary, *n.* **II,** *a.* Same as ★*corollar* and *corollate*.

corollitic (kor-ō-lit′ik), *a.* [Also erroneously *carolitic, carolytic;* ⟨F. *corollitique*, said to be formed (erroneously) from L. *corolla*, a wreath, garland: see *corolla*.] Having a sculptured garland wound around its shaft, generally in a spiral. [Rare.]

corollula (kō-rol′ū-lă), *n.*; pl. *corollulæ* (-lē). [NL., dim. of *corolla:* see *corolla*.] A small or minute corolla, especially the corolla of a floret in composite plants.



corollule (kor′o-lūl), *n.* Same as ★*corollula*.

corometer (kō-rom′ẹ-tėr), *n.* [First erroneously *coreometer;* ⟨ Gr. *κόρη*, the pupil of the eye, + *μέτρον*, measure.] An instrument for measuring the width of the pupil.

corona, *n.* **5.** (*h*) In *zoöl.*, the upper, branched portion of a crinoid, as distinguished from the *stem* or *columna*. (*i*) See the extract.

In Melo and some other genera the spines project upwards and are generally unclosed on the apertural side. This produces the spiral *corona*, so striking a feature in some shells. *Amer. Nat.*, Dec., 1902, p. 982.

6. (*d*) A cucullus or hood. (*e*) The ring of primary wood in the medullary sheath.—**7.** The solar corona is very complex. There is, first, a faintly luminous haze, not very high near the poles of the sun, while it extends at times to a distance of five or six million miles from the solar equator and the sun-spot zones, gradually fading to invisibility. Its spectrum is mainly continuous, sometimes, however, showing faintly a few of the most conspicuous Fraunhofer lines, which indicates that, while probably composed of incandescent particles, it also reflects sunlight. Next there is a gaseous envelop, less extensive and interpenetrating the haze, and composed of a substance, as yet unidentified but provisionally called *coronium*, of extreme tenuity and shown to be gaseous by its spectrum of bright lines. Of these lines the most conspicuous by far is in the green, and this was for a long time erroneously supposed to coincide with a line known as Kirchhoff's 1474 (λ, 5317), which is prominent in the chromosphere spectrum; recently, however, it has been shown to be slightly more refrangible (λ, 5304). A number of other coronium lines are revealed by photography in the violet and ultra-violet. Thirdly, there are the sharply defined streamers which mainly emanate from rings surrounding the poles and near the equator, but also less abundantly from the whole sun-spot region. They curve from both sides toward the spot-zones, and in their arrangement so closely resemble that of the streamers of

The Corona of 1901, May 18.
From a photograph taken 144 seconds after the beginning of totality.

the terrestrial aurora as strongly to suggest the idea that they are formed and controlled by similar electric and magnetic forces acting in and around the sun. Their composition is doubtful, because it has not yet been found possible to isolate their spectrum. There is a distinct sympathy between all these elements of the corona and the sun-spots. At the time of a sun-spot minimum the wing-like extensions are longest, the coronium spectrum faintest, and the polar streamers especially conspicuous: while at a sun-spot maximum the corona is brighter but smaller, and is markedly quadrangular in form, the greatest extensions lying above the middle of the spot-zones. The photographs of any particular eclipse also show many other interrelations between spots and prominences and the overlying portions of the corona. It is hardly necessary to add that the features of the corona continually change, though not with such rapidity as in the case of the chromosphere and prominences. In addition to the true corona, the observer sees overlying the rest the aërial illumination from the air between him and the eclipsed sun. This air, deeply immersed in the lunar shadow, receives no light from the photosphere, but only from the corona and the much more brilliant prominences, so that the bright lines of hydrogen, helium, and calcium are recognizable in its spectrum. This for a time led to the wrong conclusion that the chromospheric gases contributed to the coronal atmosphere, an inference refuted by the fact that at times these chromospheric lines extend into, and even clear across, the dark disk of the moon. This aërial illumination is obviously no part of the true solar corona.

11. Same as ★*aurora*, 5.—**12.** A phenomenon seen when an artificial cloud is viewed by transmitted light; an artificial halo.

It is only when few nuclei are present, and the drops formed on expansion thus comparatively large, that normal *coronas*, as Barus calls them, are seen surrounding a luminous source viewed through the cloud. It is only to such *coronas* that the ordinary theory of the *corona* applies; the gorgeous colour phenomena observed when the drops are very small, numerous and uniform in size are much more difficult to interpret.

Nature, Oct. 8, 1903, p. 549.

Diffraction corona. See ★*diffraction*.

coronade (kor-ō-nād′), *n.* [Fencers' F. *coronade*, ⟨ L. *corona*, crown, + *-ade*[1].] In *fencing*, a flourish of the saber round the head the instant before delivering a blow, to gain vigor in stroke and also trouble the opponent.

coronadite (kor-ō-nā′dīt), *n.* [*Coronado* (1500?–1543?), the name of an early explorer of the region now including Arizona, + *-ite*[2].] A mineral of somewhat uncertain composition, but consisting essentially of lead manganite ($PbMn_3O_7$). It occurs in black massive forms with fibrous structure in the Clifton-Morenci copper district in Arizona.

coronado (kō-rō-nä′dō) *n.* [Sp., ⟨ L. *coronatus*, crowned: see *coronate*, *a.*] Same as ★*amber-jack*.

coronal, *a.* **4.** In *bot.*, pertaining to a corona in any of the botanical senses of that word. —**Coronal poles, sulcus.** See ★*pole*[2], ★*sulcus*.

coronaled, coronalled (kor′ō-nạld), *a.* [*coronal* + *-ed.*] Adorned or decorated with a coronal or garland: as, *coronalled* panels. *Thackeray*.

Coronary artery of the stomach, an artery which comes from the celiac axis and passes along the lesser curvature of the stomach.—**Coronary sulcus.** See ★*sulcus*.

coronet[1], *n.* **7.** In *bot.*, same as *corona*, especially in a diminutive sense; also formerly applied to a whorl of small flowers, as in some labiate plants, and to small heads of umbelliferous and composite plants.—**8.** The bur at the base of an antler.

coronet-boot (kor′ō-net-bōt″), *n.* A horse-boot designed to protect the coronet from injury when the horse is trotting.

coronillin (kor-ō-nil′in), *n.* [*Coronilla* + *-in*[2].] A yellowish powder, $C_7H_{12}O_5$, of glucosidal nature, contained in the seeds of various species of *Coronilla*, particularly *C. scorpioides*. It acts promptly on the heart like digitalis.

coronillo (kō-rō-nēl′yō), *n.* [Sp., dim. of *corona*, a crown.] A large leguminous tree, *Gleditschia amorphoides*, of northern Argentina, whose trunk from the ground up to the height of a man is thickly beset with strong, much-branched thorns from 5 to 8 inches long. Its handsome veined wood is used in building and for furniture and cabinet-work. Its bark contains saponin and is used like soap, under the name of *quillay*.

coronion (ko-rō ni-on), *n.* [NL., ⟨ Gr. *κορώνιος*, with crumpled horns, ⟨ *κορώνη*, a curved point or tip: see *corona*.] In *craniom.*, the point of the coronoid process of the lower jaw. *Von Török*.

coronium (ko-rō′ni-um), *n.* [NL., ⟨ L. *corona:* see *corona*.] A gaseous element, unidentified as yet and thus far detected only in the solar corona. It is supposed to be lighter and more diffusible than hydrogen. Some years ago it was reported as present in volcanic gases at Pozzuoli, but probably by mistake; the observation has never been verified.

coronogram (kō-rō′nō-gram), *n.* [NL. *corona*, corona, + Gr. *γράμμα*, anything written.] A photograph of the solar corona.

coronograph (kō-rō′nō-gràf), *n.* [NL. *corona*, corona, + Gr. *γράφειν*, write.] An instrument, first suggested and tried by Huggins for photographing the sun's corona during an eclipse, or in full sunlight, if possible. The attempts to photograph the corona in full sunlight were unsuccessful, and the name is now applied to cameras designed for photographing the corona in total eclipses, the instrument being designed to secure the greatest brilliance of the image, with less regard to definition of fine details.

They included two coelostats and two *coronagraphs*, one of the latter being of 4 inches aperture and 19 feet 4 inches focal length, the other of 6 inches aperture and 7 feet 10½ inches focal length. *Nature*, Dec. 17, 1903, p. 160.

coronographic (kō-rō-nō-graf′ik), *a.* Pertaining to or produced by a coronograph.

coronoid. I. *a.*—**Coronoid index.** See ★*index*.

II. *n.* One of the component bones of the jaw in birds and reptiles, lying on the inner face of the dentary and back of the splenial.

In *Eudynamys*, *Cuculus*, and *Guira* the rami are pierced by a long lateral vacuity, which is partly closed by a long and slender *coronoid*. In *Corua* the *coronoid* terminates midway across this vacuity; whilst in *Taccocua* and *Centropus* this vacuity is quite open, the *coronoid* forming its ventral border.

Proc. Zool. Soc. London, 1903, p. 267.

coronoidal (kor-ō-noi′dạl), *a.* Resembling the solar corona in appearance; imitating the corona.—**Coronoidal tube,** a vacuum-tube with a large bulb, around which, under the influence of a powerful magnetic field, strong electric discharges cause the emission of luminous streamers which strikingly resemble the streamers of the solar corona in appearance and arrangement.

Coronopus (kō-ron′ō-pus), *n.* [NL. (Haller, 1768, adopted from Ruellius, 1536), ⟨ Gr. *κορωνόπους*, crowfoot, *Plantago Coronopus*, ⟨ *κορώνη*, crow, + *πούς*, foot.] A genus of dicotyledonous plants of the family *Brassicaceæ*. See *Senebiera*.

coronule, *n.* (*b*) The little calyx-like body which crowns the nucule in the genus *Chara*. (*c*) The crown of spines which sometimes occurs at the apex of the frustule in diatoms.

coroplastic (kor-ō-plas′tik), *a.* [*coroplast-y* + *-ic.*] 1. Relating to coroplasty.—2. In *Gr. antiq.*, relating to the manufacture of figurines. See *coroplast*.

coroplasty (kor′ō-plas-ti), *n.* [Gr. *κόρη*, pupil of the eye, + *πλαστός*, ⟨ *πλάσσειν*, form.] Operative treatment for the restoration of the iris.

corotomy (kō-rot′ō-mi), *n.* [Gr. *κορη*, pupil of the eye, + *-τομία*, ⟨ *ταμεῖν*, cut.] The proper form of *coretomy*.

corp (kôrp), *n.* [Assumed sing. of *corpse*, *corps.*] An old and still dialectal form of *corpse*.

Blessed is the *corp* that the rain rains on.
Scotch Proverb.

corp. An abbreviation of *corporal*[2].

corporal[2], *n.* **2.** *Semotilus corporalis*, a cyprinoid fish found in fresh waters east of the Alleghanies.—**Corporal of the field,** a superior officer of the army in the sixteenth and seventeenth centuries, who acted as an assistant or as a kind of aide-de-camp to the sergeant-major. *N. E. D.*—**Little Corporal.** (*a*) A translation of the F. *le petit Caporal*, a popular nickname of Napoleon I. (*b*) [*l. c.*] Three-ball billiards with the addition of a wooden pin which spots wherever it falls on the playing-surface of the table and counts if knocked down by the cue-ball after this has hit another ball.

corporalship (kôr′pō-rạl-ship), *n.* **1.** The rank or position of a corporal: as, to work one's way up from a *corporalship* to a generalship.—**2†.** A squad of soldiers under the charge of a corporal.

Every company was divided into three *corporalships*, of which each was the peculiar care of one of the three corporals, and of one of the three officers.

J. W. Fortescue, Hist. Brit. Army, I. 153.

corporation, *n.*—**Bureau of Corporations.** See ★*bureau*.—**Religious corporation law.** See ★*religious*.

corporealness (kôr-pō′rē-ạl-nes), *n.* Corporeal state or quality. *Ruskin*.

corps[2], *n.* **5.** One of the several bodies of officers charged with special administrative duties in the army or navy. In the United States navy the corps are as follows: *medical corps*, in charge of the sanitary and medical service; *pay corps*, in charge of supplies and stores, commissary, accounts, disbursements of money; *corps of chaplains; corps of naval constructors*, in charge of building and repairs of vessels; *corps of professors of mathematics*, in charge of work at the Naval Observatory and instruction at the Naval Academy; and *corps of civil engineers*, in charge of construction of dry-docks, buildings, and civil-engineering work generally at navy-yards.—**Army service corps,** the corps responsible for the transportation and supply of the British army. It is under the control of the quartermaster-general.—**Corps d'élite** [F.], a body of picked men.—**General staff corps,** in the United States army, a body of officers charged with the organization, distribution, equipment, and training of the military forces. It proposes legislative action, revises estimates for appropriations, exercises supervision over inspections and military education, prepares plans for national defense and mobilization, collects military information, and records the military operations of the armies of the United States. The senior officer is the chief of staff. European armies have corps performing approximately the same duties.—**Staff corps,** one of the corps of the staff of the United States army, as the corps of engineers.

corps-à-corps (kōr-ä-kōr′). [F., 'body to body.'] In *fencing*, the advance of one fencer on another to close quarters, thus destroying the elegance of the passage and causing wild

hitting. It is discouraged on the fencing-floor; in fencing for points the master of bouts warns or disqualifies a fencer who persists in it.

corpse (kôrps), *v. t.* 1. To make a corpse of; murder. [Low slang.] — 2. To 'put out' or confuse (an actor) in speaking his lines or to spoil (his 'business') by some blunder or mistake. [Theatrical slang.]

corpus, *n.* (*d*) Principal, as opposed to interest or income: as, these payments should be made out of *corpus*, and not out of income. (*e*) In *alg.*, a manifold, such that its elements are representable by symbols which can be combined according to the laws of ordinary algebra, every algebraic expression obtained by combining a finite number of symbols by means of a finite chain of rational operations (+, −, ×, /) being capable of interpretation as representing a definite element of the manifold, with the single reservation that division by zero is inadmissible.—**Corpora arenacea,** the sand-like grains found in a psammoma and sometimes isolated in the dura mater.—**Corpora fibrosa,** small fibrous nodules sometimes present in the ovaries: probably modified corpora lutea.—**Corpora flava,** bodies found in the central nervous system and elsewhere, resembling somewhat corpora amylacea, but not yielding the amyloid reaction with the aniline dyes. They are waxy or sandy in consistence and are supposed to arise from the direct transformation of nerve-cells.—**Corpora Malpighiana.** Same as *Malpighian bodies.*—**Corpora Morgagnii.** Same as *hydatids of Morgagni* (which see, under *hydatid*). — **Corpora Santoriniana.** Same as *cornicula laryngis* (which see, under *corniculum*).—**Corpora versicolorata,** corpora amylacea: so called because they take a variegated tint when treated with iodine solutions. —**Corpora Wolffiana.** Same as *Wolffian bodies.*—**Corpus interpeduncular,** a small oval mass of gray substance immediately anterior to the pons Varolii. It lies between the *crura cerebri*, or peduncles of the brain; hence its name. Also called *ganglion interpedunculare.*—**Corpus mammillare,** a small body forming a portion of the floor of the third ventricle. It lies just caudal to the infundibulum of the hypophysis and in front of the pons. In most vertebrates there is but one corpus mammillare, but in man there are two, connected together across the median line. The white matter of these bodies is formed by the anterior pillars of the fornix; hence they have also been named *bulbs of the fornix.* Also called *corpus albicans, corpus candicans,* and *bulbus fornicis.*—**Corpus mandibulæ,** in *ichth.*, the dentary; the bone in the lower jaw of teleost fishes which carries the teeth.—**Corpus mucosum.** Same as *rete mucosum.* **Corpus nigrum,** a pigmented prominence or body at the edge of the iris. It is well developed in the horse and other *Equidæ.*—**Corpus pampiniforme.** Same as *pampiniform plexus* (which see, under *pampiniform*). —**Corpus subthalamicum,** a stratum of gray matter in the ventral portion of the thalamus, containing numerous nerve-cells and a plexus of fine medullated fibers. It is lens-shaped in section and has an inclosing envelop of white substance. This body or stratum is distinct only in primates. Also called *nucleus of Luys, nucleus amygdaliformis.*—**Galoisian corpus,** in *math.*, a corpus each of whose conjugate corpora is identical with it.

corpuscle, *n.* 4. In *elect.*, a body smaller than an atom, assumed to explain the phenomena of electric discharges in gases, and of radio-activity.—**Cancroid corpuscles.** Same as **cancer-nests.*—**Chlorophyl corpuscle.** See **chlorophyl.*—**Krause's corpuscle or end-bulb,** the expanded bulbous extremity of a terminal nerve-twig, present in the conjunctiva and elsewhere.—**Miescher's corpuscle,** an elongated spindle-shaped, parasitic protozoan (*Sarcocystis miescheri*) sometimes found embedded in the muscle-fibers of mammals. Also called *Rainey's corpuscle.*—**Phantom or shadow corpuscle,** a decolorized red blood-corpuscle.—**Rainey's corpuscle.** Same as *Miescher's *corpuscle.*—**Ruffini corpuscles,** nerve-endings in the skin which have an arborescent form and are inclosed in connective tissue instead of epithelium. There is no capsule present, as in the Pacinian corpuscle.—**Third corpuscle,** a hematoblast.—**Traube's corpuscles,** decolorized red blood-corpuscles.—**Washed corpuscles,** in experiments dealing with hemolytic problems, the isolated red blood-corpuscles of an animal, which have been washed free from contaminating material with 0.8 per cent. saline solution, and separated by centrifugation.

Corpuscular temperature, in *phys. chem.*, a term used by J. J. Thomson to denote the energy of supposed corpuscular motions going on within the atom. *Nature,* May 26, 1904, p. 74.

corpusculiferous (kôr-pus-kū-lif'ėr-us), *a.* [L. *corpusculum,* corpuscle, + *ferre,* bear.] Bearing corpuscles. *Lindley.*

corrade, *v. t.* 2. In *geol.*, to abrade and remove (rock), as by running streams charged with grit.

This portion of the tract was *corraded* into a labyrinth of canyons, among which the Grand Canyon of the Colorado is most notable. *Smithsonian Rep.,* 1892, p. 21.

corral, *n.* 4. In Florida and the West Indies, a pen near the shore where sponges are macerated in the course of cleaning them for market. Sometimes colloquially contracted to *crawl.* See *kraal.*

corrasion (ko-rā'zhọn), *n.* [NL. **corrasio(n-),* ⟨ L. *corradere:* see *corrade.*] In *geol.*, the scraping away of a rock by the action on it of rock fragments moved by wind or water. *Dana,* Manual of Geol., p. 168.

correality[1] (kō-rē-al'i-ti), *n.* [*cor-* + *reality.*] Correlative or equal reality. *Sir W. Hamilton.*

correality[2] (kō-rē-al'i-ti), *n.* [*correal* + *-ity.*] In *Rom. law,* the condition of being correal. See *correal obligations* (under *correal*).

correction, *n.*—**Compass corrections.** See **compass.*—**Gravity correction.** See **gravity.*—**Optical correction,** a modification of form intended to counteract apparent discordances or deviations, such as an appearance of sagging or of sloping in an architectural member. A long girder or lintel that is perfectly horizontal will commonly look as if it curved downward in the middle, and to obviate this an upward curve may be actually given to its lower face.—**Poggendorff's correction,** a correction applicable to an ordinary mercurial thermometer, owing to the fact that the bore of the tube increases its volume as the temperature rises, so that a degree of the scale represents a greater volume and consequently a greater change in temperature in proportion as the temperature rises.—**Temperature correction.** See **temperature.*—**Twilight correction,** the correction applied to photographic registers of the duration of sunshine, in order to allow for the great loss of photographic power by the sun's rays when they pass near the horizon. —**Vacuum correction.** See **vacuum.*

correctionalist (kọ-rek'shọn-al-ist), *n.* One who is in favor of correctional methods in the management of delinquents. Also used adjectively.

Those smitten with the institution craze or with extreme *correctionalist* views will never solve the problem of criminal youths. *G. S. Hall,* Adolescence, I. 407.

correctionally (kọ-rek'shọn-al-i), *adv.* By way of correction or reform; as a corrective merely; with reform in view: as, "there are offences only punishable *'correctionally,'* not criminally," *Gladstone.*

correction-house (kọ-rek'shọn-hous), *n.* A house of correction (which see, under *correction*).

correction-proof (kọ-rek'shọn-prōf), *a.* Proof against correction; incorrigible: as, a stubborn, *correction-proof* youth. *Fuller.*

correctorial (kor-ek-tō'ri-al), *a.* [*corrector* + *-al*[1].] Of or pertaining to a corrector. *N.E.D.*

Correlate strata, equivalent strata; those of the same geological horizon. *Dana,* Manual of Geol., p. 398.

correlation, *n.* 5. In *statistics,* the relation of two or more variable quantities. One variable quantity never determines another completely. For instance, in a certain biological type size never completely determines weight, although large individuals are, on the whole, heavy. The values of one variable, which are correlated with a certain value of another variable, are called an *array.* When the variability is normal, the average deviation of the array is equal to the deviation of the correlated measure multiplied by a constant which is called the *coefficient of regression.* A comparison of the coefficients of regression of the first variable considered as a series of arrays of the second, and of the second considered as a series of arrays of the first, leads to their reduction to a common *coefficient of correlation* which equals the average of the products of all the correlated pairs of deviations, divided by the product of their standard or mean square variabilities. The variabilities of the arrays are equal to the variability of each complete series multiplied by $\sqrt{1-r^2}$ where r is the coefficient of correlation.

correlative, *n.*—**The doctrine of correlatives,** the doctrine that correlative terms are necessarily thought together, since a correlative implies the relation, the relation the other correlates, and the correlates suggest the correlatives. The phrase was introduced by H. Spencer.

correlativism (kọ-rel'a-tiv-izm), *n.* A doctrine in which the correlative or universally relative nature of ideas and terms forms the basis.

The relativism of Mill, and the universal relativism or *correlativism* of Laas. *Encyc. Brit.,* XXX. 665.

corresp. An abbreviation of *correspondence, corresponding,* and *correspondent.*

corresponding, *p. a.* 1. (*c*) In *phytogeog.*: (1) Derived from and in part taking the place of an older and broader type, broken up in the process of evolution; vicarious or representative in an evolutionary sense. Said of an endemic plant type. *Drude,* 1890. (2) Ecologically equivalent to another genus or species, therefore alternating with it in similar areas of a habitat. *F. E. Clements.*—**Corresponding points.** (*b*) In *physiol.*, points upon the two retinas whose impressions unite, in the great majority of cases, to give a single, spatially undifferentiated perception.

corridor, *n.* 4. In *car-building,* a narrow passage between the side of a sleeping-, dining-, stateroom- or other car and a partition which incloses the staterooms, lavatory, kitchen, or other apartment.—**Corridor train,** a train composed of vestibuled cars in which a corridor or passageway extends the whole length of each car. [Eng.]—**Corridor carriage,** a railway-car through which there is a corridor or passageway. [Eng.]

corrie-basin (kor'i-bā"sn), *n.* A nearly level-floored depression on a mountain- or hillside, supposed to have been formed by glacial erosion. *J. Geikie,* The Great Ice Age, p. 254.

corrie-glacier (kor'i-glā"shiėr), *n.* A glacier occupying a cirque or corrie.

Finally, there was the phase of *corrie-glaciers,* when the glacial detritus was borne for no great distance from the local centres of dispersion. *Nature,* April 7, 1904, p. 549.

corrie-lake (kor'i-lāk), *n.* A lake occupying the floor of a corrie or cirque. *J. Geikie,* The Great Ice Age, p. 236.

Corr. Mem. An abbreviation of *Corresponding Member.*

Corroded crystals. See **crystal.*

corrodentian (kor-ọ-den'shian), *a.* and *n.* I. *a.* Of or belonging to the insect order *Corrodentia.*

II. *n.* A member of the *Corrodentia.*

corrodiary (ko-rō'di-ā-ri), *n.* [ML. *corrodiarius,* ⟨ *corrodium:* see *corody.*] Formerly, one who received an allowance for maintenance; a pensioner.

corrodier (ko-rō'di-ėr), *n.* Same as **corrodiary. Kingsley.*

corrosion, *n.* 2. In *geol.*, the solution and removal of rocks, usually in water; the eating away by fusion and absorption of a solid mass of rock or of a mineral which is inclosed in a molten magma.

Erosion, *corrosion,* and hydrostatic pressure have, by widening the natural fissures of the ground, formed a real sponge of stone. *Geog. Jour.* (R. G. S.), X. 502.

Corrosion preparation, an anatomic preparation, as of the injected vessels of a part, made by treating the tissues with a corrosive substance which leaves only the solidified injection material.

corrosion-zone (kọ-rō'zhọn-zōn), *n.* A zone surrounding certain minerals which, having crystallized out of a molten magma or lava, have afterward been partially reabsorbed by fusion and have thus yielded a surrounding rim of intermediate composition between themselves and the unaffected lava. *Geikie,* Textbook of Geol., p. 141.

Corrosive glands. See **gland.*

corrugating-machine (kor'ọ-gā-ting-ma-shēn"), *n.* A power crimping-machine having large, long crimping-rolls for corrugating large pieces of sheet-metal. See **crimping-machine,* 2.

corrugative (kor'ọ-gā-tiv), *a.* Same as *corrugate,* 2. *Treas. Bot.*

corrugator, *n.*—**Corrugator labii inferioris** (wrinkler of the lower lip), fibers from the depressor anguli oris muscle, contraction of which throws the lower lip into folds.

corrupt, *a.* 5. Legally tainted, as by an act of attainder of treason or felony: said of the blood of one legally attainted. See *corruption,* 8.

corsair, *n.* 4. Any pirate-bug of the family *Reduviidæ.*—**Two-spotted corsair,** an American reduviid bug *Rasahus biguttatus,* inhabiting the southern and southwestern United States. It is predatory in its habits and sometimes bites human beings, inflicting a painful wound.

Corsican moss. See *moss*[1].

cort. An abbreviation of *cortex.*

cortex, *n.*, 1. (*c*) The peridium of fungi.—3. (*c*) In *Infusoria,* the clear, firm outer layer of protoplasm, bearing the cilia or suckers and showing in its simplest structure no further evidence of differentiation, though in some of the more specialized forms 3 distinct layers may be seen. Same as *ectosarc* and *ectoplasm.*—**Dermal cortex,** in sponges, a specialized outer layer of mesoderm lying immediately below the superficial ectoderm and usually containing the inner ends of projecting spicules and spaces and canals lined by ectoderm.

Corti, cells of. See **cell.*

Cortical cataract. See **cataract.*—**Cortical integument.** Same as **cortical layer* (*b*).—**Cortical layer.** (*b*) The integument which invests the bast system of a stem.

corticifugal (kôr-ti-sif'ū-gal), *a.* [L. *cortex* (*cortic-*), bark, + *fugere,* flee, + *-al*[1].] Originating in and running from the cortex, or outer layer of the cerebrum or cerebellum, into adjacent regions, such as the pulvinar and quadrigeminal bodies or the various fiber-tracts.

There was no clear evidence of *corticifugal* fibres passing from the angular gyrus to the basal ganglia; but that this gyrus is connected with the pulvinar by corticipetal fibres will be shown in the next section.

Philos. Trans. Roy. Soc. (London), ser. B, 1898, p. 10.

corticifugally (kôr-ti-sif'ū-gal-i), *adv.* In a corticifugal manner.

corticipetal (kôr-ti-sip'e-tal), *a.* [L. *cortex* (*cortic-*), bark, + *petere,* seek, + *-al.*] Originating outside of and running into the cerebral or cerebellar cortex. *Philos. Trans. Roy. Soc.* (London), ser. B, 1898, p. 11.

corticipetally (kôr-ti-sip'e-tal-i), *adv.* In a corticipetal manner.

corticopeduncular (kôr"ti-kọ-pē-dung'kū-lär), *a.* [L. *cortex,* bark, + NL. *pedunculus,* peduncle.] Relating to the cortex and both peduncles of the brain.

cortlandtite (kôrt'lan-dīt), *n.* [*Cortlandt* township, New York, + *-ite*[2].] In *petrog.*, a name given by G. H. Williams (1886) to a coarse-grained rock composed of large crystals of hornblende with abundant inclusions of olivin and pyroxene which mottle the cleavage surfaces of the hornblendes and give the rock a poikilitic fabric: a variety of hornblende picrite.

corubin (kō-rō′bin), *n.* [*co(rundum)* + *ruby*, + *-in*[2].] The trade-name of artificial corundum or crystallized alumina, obtained in the aluminothermic processes of Goldschmidt: used as an abrasive. *Electrochem. Industry*, Oct., 1904, p. 405.

coruco (kō-rō′kō), *n.* [Mex. Sp.] The popular name in Mexico and New Mexico of the so-called *Mexican chicken-bug*, a cimicid, *Acanthia inodora*, which attacks poultry in those regions.

corvid (kôr′vid), *a.* and *n.* **I.** *a.* Pertaining to or resembling the *Corvidæ*.

II. *n.* A crow of the family *Corvidæ*.

corvina, *n.* (*b*) Also applied to a large number of other fishes belonging to the family *Sciænidæ*.

corybantian (kor-i-ban′ti-an), *a.* Of or pertaining to the corybants or their worship.

corybantiate (kor-i-ban′ti-āt), *v. i.*; pret. and pp. *corybantiated*, ppr. *corybantiating*. [*corybant* + *-i* + *-ate*[2].] To 'carry on' like a frenzied corybant; act like a lunatic.

corybantine (kor-i-ban′tin), *a.* [*corybant* + *-ine*[1].] Of, pertaining to, or resembling the corybants or their rites; corybantian. *N. E. D.*

corybulbine (kor-i-bul′bin), *n.* [*Cory(dalis)* (see def.) + L. *bulbus*, bulb, + *-ine*[2].] A light-yellow crystalline monacid alkaloid, $C_{21}H_{25}O_4N$, found in the roots of *Corydalis cava* (otherwise *Bulbocapnus*, also *Capnodes*, *cavus*).

corycavine (kor-i-kav′in), *n.* [*Cory(dalis cava)* (see def.) + *-ine*[2].] A crystalline alkaloid, $C_{23}H_{23}O_6N$, found in the roots of *Capnoides cavum* (*Corydalis cava*).

corydalic (kor-i-dal′ik), *a.* [*Corydal-is* + *-ic.*] Derived from corydaline.—**Corydalic acid,** a name given, through misapprehension, to the acid ammonium salt of metahemipinic acid, $C_{10}H_{10}O_6.C_{10}H_9O_6NH_4.3H_2O$, obtained by the oxidation of corydaline.

Corydalis, *n.* **2.** [*l. c.*] The golden corydalis is *Capnoides aureum* of the northeastern United States and Canada, with golden-yellow flowers. The pink corydalis is *C. sempervirens* of the same region, but ranging to Alaska and North Carolina: the flowers are pink with yellow tips. The pale corydalis is *C. flavulum*, with pale yellow flowers, an early wild flower of the eastern half of the United States. These and other species are delicate and attractive plants.

Pink Corydalis (*Capnoides sempervirens*).

a, plant and inflorescence, one fourth natural size; *b*, a capsule, one half natural size.

Corydalus, *n.*—**Horned corydalus,** *Corydalus cornutus*. See *Corydalus*. *Comstock*, Manual of Insects, p. 176.

corylaceous (kor-i-lā′shius), *a.* [NL. *corylaceus*, < L. *corylus*, hazel: see *hazel.*] Of or pertaining to the hazel; belonging or related to the *Corylaceæ*.

corylin (kor′i-lin), *n.* [L. *corylus*, hazel, + *-in*[2].] A globulin obtained from various nuts.

corylophid (ko-ril′ō-fid), *a.* and *n.* **I.** *a.* Of or belonging to the coleopterous family *Corylophidæ*.

II. *n.* A beetle of the family *Corylophidæ*.

corymb, *n.* **2.** A hemispherical group of zoöphytes. *Dana*, Zooph., p. 173. *N. E. D.*

corymbate (ko-rim′bāt), *a.* In *bot.*, same as *corymbiate*.

Coryneum (ko-rin′ē-um), *n.* [NL. (Nees, 1816), from the shape of the sporodochia; < Gr. *κορύνη*, a club.] A genus of melanconiaceous fungi having black disk-shaped or pulvinate sporodochia breaking through the bark of the host. The spores are fusiform, dark-colored and several septate. *C. Beyerinckii* is said to be the cause of a gum flux of the cherry and closely related plants. It is also regarded as the conidial condition of *Ascospora Beyerinckii*. See ★*Ascospora*.

corynite (kor′i-nīt), *n.* [Gr. *κορύνη*, club, + *-ite*[2]. The name refers to the form of the crystalline groups.] A mineral similar to gersdorffite, but with the arsenic in part replaced by antimony.

corynocarpine (ko-rin-ō-kär′pin), *n.* [*Corynocarpus* + *-ine*[2].] A crystalline alkaloid found in the fruit of the karaka tree, *Corynocarpus lævigata*. It melts at 140° C.

Coryphantha (kor-i-fan′thä), *n.* [NL. (Lemaire, 1868, adopted from a subgenus name of Engelmann, 1857), < Gr. *κορυφή*, summit, + *ἄνθη*, blossom. The name alludes to the occurrence of the flowers, in typical species, on the very summit of the plant.] A genus of plants of the family *Cactaceæ*, often called *Mamillaria* (which see).

Coryphodon, *n.* **2.** [*l. c.*] A mammal of the genus *Coryphodon*.—**Coryphodon beds,** in *geol.*, the lower division of the Lower Eocene in the Rocky Mountain and Plateau region: equivalent to the Wahsatch group. It contains remains of the coryphodon.

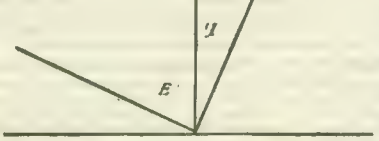
coryphylly (ko-rif′i-li), *n.* [For **coryphophylly*, < Gr. *κορυφή*, summit, + *φύλλον*, leaf, + *-y*[3].] The abnormal production of a leaf (sometimes colored) at the summit of the axis of a plant.

corytuberine (kor-i-tū′bėr-in), *n.* [*Cory(dalis)* (see def.) + L. *tuber*, tuber, + *-ine*[2].] An alkaloid, $C_{19}H_{25}O_4N$, found in the roots of *Capnoides cavum* (*Corydalis cava*). It crystallizes in needles which decompose at 200° C.

cos[2] (kos), *n.* [Also *coss*, *cosse* (lettuce), < L. *Cōs*, < Gr. Κῶς, an island in the Ægean Sea, now Stanchio.] A kind of lettuce, suited for being grown out of doors in summer, usually forming long heads or rosettes.

C. O. S. An abbreviation of *Charity Organization Society*.

cosaque (ko-säk′), *n.* [F.] A Cossack dance, or the music for it.



coscoroba (kos-kọ-rō′bä), *n.* [NL. *coscoroba*, appar. connected with the Tupi *casaroba*, also *saroba*, a diving bird.] A large swan-like duck, *Coscoroba coscoroba*, of South America, which has a white body and a long, slender, black neck.

cosensal (kō-sen′sạl), *a.* [*co-*[1] + *sense* + *-al*[1].] Having the same sense. Two mutually equiangular polygons are cosensal when rays pivoted within them and containing the vertices of equal angles, rotate in the same sense to pass through the vertices of the consecutive equal angles. Congruent spherical triangles are cosensal, which is not the case with symmetrical spherical triangles.

cosher[1], *v.* **II.** *intrans.* To chat in a familiar, friendly way; gossip. *Macaulay*.

Cosina beds. See ★*bed*[1].

Cosine circle. See ★*circle*.—**Cosine law.** See *Lambert's law of* ★*cosines*.—**Hyperbolic cosine** of x, $\frac{1}{2}(e^x + e^{-x}) = \cos x\sqrt{-1} = 1 + \frac{x^2}{2!} + \frac{x^4}{4!} \cdots$ It is usually written cosh x and read "cosh x", or "h-cosine x."—**Lambert's law of cosines,** the law that the intensity of the light

Lambert's Law of Cosines.

diffusely reflected from a mat surface is proportional to the cosine of the angle between the direction of the diffused rays under consideration and the normal to the surface. Experiments by Wright (Philos. Mag., XLIX. 199) show that if I is the angle of incidence of the light the intensity of the diffusely reflected light is strictly proportional to the cosine of the angle E, but that if the incidence be varied, the light reflected at a constant angle E is not proportional to the cosine of the angle I.

cosingular (kō-sing′gū-lär), *a.* [*co-*[1] + *singular.*] Having the same singular surface: said of complexes in line geometry.

By these principles the existence of *cosingular* quadratic complexes can easily be established.

Encyc. Brit., XXVIII. 662.

Cosingular complexes. See ★*complex*, *n.*

cosmetid (kos′me-tid), *a.* and *n.* **I.** *a.* Having the characteristics of or belonging to the family *Cosmetidæ*.

II. *n.* An arachnidan of the family *Cosmetidæ*.

cosmic, *a.*—**Cosmic consciousness.** See ★*consciousness*.—**Cosmic fog,** a nebulosity enveloping certain star-groups, notably the Pleiades.

Helium stars are often palpably connected with nebulæ. The entire Orion region, where they brilliantly congregate, is pervaded with *cosmic fog*; *cosmic fog* enwraps the Pleiades; and individual instances of the same association abound, and are likely to multiply as exploration proceeds. *A. M. Clerke*, Problems in Astrophysics, p. 189.—**Cosmic hydrogen, theism,** etc. See ★*hydrogen*, ★*theism*, etc.

II. *n.* A name proposed by H. L. Fairchild, in accordance with the new planetesimal hypothesis, for the primitive massive rocks.

With the passing of the old hypothesis it will be desirable to change the terminology of the rocks as far as this now implies an original molten or "igneous" state of the earth. Some new name will be desirable for the sediments which were formed chiefly or wholly from the planetesimals (the cosmic matter) in the early seas of the growing globe. Let us call such deposits cosmoplastics and the primitive massive rocks the *cosmics*.

H. L. Fairchild, Amer. Geol., Feb., 1904, p. 101.

cosmism, *n.* **2.** The philosophy of Spencer and Fiske, which asserts the existence of a real unknowable outside of the mind, the absolute relativity of all thought to ourselves, and that there is no knowledge except what is ultimately empirical science. It is specially opposed to the systems of Berkeley, Hume, Kant, Hamilton, and Comte.—**3.** The doctrine that the material universe works automatically; affirmative atheism.—**4.** The ethical doctrine which makes the welfare of mankind the highest good.

cosmist (koz′mist), *n.* [Gr. *κόσμος*, the universe, + *-ist.*] **1.** A believer in cosmism, or the cosmic philosophy of Fiske, which is substantially the first principles of Spencer.—**2.** A believer in the affirmative atheism of Holyoake, according to which we know that nature is automatic.

Cosmoceras (koz-mos′ē-ras), *n.* [NL., < Gr. *κόσμος*, ornament, + *κέρας*, a horn.] A genus of ammonoid cephalopods or ammonites with involute shells and highly costated and tuberculated whorls. It occurs in the Jurassic rocks.

cosmochlore (koz′mō-klōr) *n.* [Also *kosmochlore*; < Gr. *κόσμος*, ornament, + *χλωρός*, green.] A chromium silicate occurring in emerald-green monoclinic needles in the meteoric iron of Toluca, Mexico.

cosmoclastic (koz-mō-klas′tik), *a* and *n.* [Gr. *κόσμος*, universe, + *κλαστός*, < *κλᾶν*, break.] **I.** *a.* Consisting of fragmental material of extraterrestrial origin.—**Cosmoclastic rocks,** rocks composed of fragmental material of extraterrestrial origin.

II. *n.* A cosmoclastic rock. See the extract, under ★*cosmic*.

cosmog. An abbreviation of *cosmography*.

cosmogenetic (koz-mō-jē-net′ik), *a.* [Gr. *κόσμος*, universe + *γένεσις*, origin: see *genetic.*] Of or pertaining to the origin and development of the universe.

cosmogeny (koz-moj′e-ni), *n.* [Gr. *κόσμος*, the universe, + *-γενεια*, < *-γενης*, -produced.] **1.** Cosmogony; the history of the origin and development of the universe.

This *cosmogeny*, or theory of the development of the universe. *Haeckel* (trans.), Hist. Creation, I. 321.

2. The history of the origin and development of the inorganic universe, as distinguished from that of living beings.

Primary Aggregation. *Cosmogeny*—Genesis of Matter—Chemical Relations.

L. F. Ward, Dynamic Sociol, I. 220.

cosmognosis (koz-mog′nō-sis), *n.* [Gr. *κόσμος*, the world, + *γνῶσις*, knowledge.] The imaginary 'general knowledge' or instinct to which the migrations of birds have been attributed. *Syd. Soc. Lex.*

cosmogonize (koz-mog′ō-nīz), *v. i.*; pret. and pp. *cosmogonized*, ppr. *cosmogonizing*. [*cosmogony* + *-ize.*] To explain the origin of the world: theorize in regard to the world's origin. *J. W. Draper*, Intell. Devel. of Europe, I. iv.

cosmogony chart. See ★*chart*.

cosmographer, *n.* **2.** A geographer.

Aratus the astronomer, Ptolemy the *cosmographer*, add lustre to the golden age of Alexandrian culture.

J. A. Symonds, Greek Poets, 1st ser., p. 32.

cosmologic (koz-mọ-loj′ik), *a.* Same as *cosmological*.

cosmological, *a.*—**Cosmological proof,** that proof of theism which rests on the principle of efficient causation. According to Caldecott there are nine forms of this argument, as follows: (1) from the world as a mass of effects, an argument used (says Caldecott) by Aristotle, Aquinas, Locke, Clarke, Martineau, and Illingworth; (2) from the changes in the world, used by Aristotle and Martineau; (3) from the dependency of everything in the world, used by J. Caird, Martineau, and Stirling; (4) the contingencies of the world, used by Aquinas, Leibnitz, Clarke; (5) from the finitude of things in the world, used by Clarke; (6) from the temporal character of things in the world; (7) from the relativities of the world, used by Green and Illingworth; (8) from the phenomenal character of the world; (9) from the potential character of the world, used by Aristotle.

cosmonomic (koz-mō-nom′ik), *a.* [Gr. *κόσμος*, the world, + *νόμος*, law.] Pertaining to the laws of nature, in the sense of general truths as to instantaneous results of contemporaneous conditions.—**Cosmonomic monism,** a form of monism which acknowledges cosmonomic influences alone.

cosmophilite (koz-mof′i-līt), *n.* [Gr. *κόσμος*, the world, + *φιλεῖν*, love, + *-ite*[2].] A lover of the world.

Actress ball, where there was to be a great deal of Parisian beauty, which a *cosmophilite* ought to see.

Thackeray, in Scribner's Mag., June, 1887, p. 681.

cosmopoietic (koz″mō-poi-et′ik), *a.* [Gr. *κόσμος*, the universe, + *ποιητικός*, < *ποιεῖν*, make (see *poetic*).] Contributing to form the universe and to render it orderly. *Huxley.*

cosmopolis (koz-mop′ō-lis), *n.* [Gr. *κόσμος*, the world, + *πόλις*, city.] A city composed of people gathered from all parts of the world. *Stand. Dict.*

cosmopolitanize (koz-mō-pol′i-tan-īz), *v. t.*; pret. and pp. *cosmopolitanized*, ppr. *cosmopolitanizing*. [*cosmopolitan* + *-ize.*] To render cosmopolitan in character or feeling.

The telegraph has *cosmopolitanized* us in spite of ourselves; the whole world has but one set of nerves and we all have the headache together. *Lowell*, Letters, II. 368.

cosmopolite, *n.* **3.** A nymphalid butterfly, *Vanessa cardui*, common to Europe, Asia, North America, and Australia. Its larva feeds on thistle, mallow, and everlasting. Also known as the *thistle-butterfly*. See cut under *painted-lady*.

cosmorganic (koz-môr-gan′ik), *a.* [Gr. *κόσμος*, the world, + *ὄργανον*, organ, + *-ic.*] Pertaining to the supposed character of the universe as a living organism whose atoms are severally endowed with sensibility: a hypothesis put forward by G. T. Fechner.

But his [Fechner's] substitute was his own hypothesis of panpsychism, from which he deduced a "*cosmorganic*" evolution from a "*cosmorganic*" or original condition of the world as a living organism into the inorganic, by the principle of tendency to stability.
Encyc. Brit., XXX. 662.

Cosmos fiber. See ★*fiber*1.

cosmotheist (koz′mō-thē-ist), *n.* [*cosmotheism* + *-ist.*] A believer in cosmotheism.

cosmotheistic (koz″mō-thē-is′tik), *a.* Of or pertaining to cosmotheism or the cosmotheists.

cosmozoan (koz-mō-zō′an), *n.* [Gr. *κόσμος*, the universe, + *ζῷον*, a living being, + *-an.*] An imaginary organism transported to the earth from some unknown region of the cosmos. [Rare.]

It [life] was transported to the earth from another world, or from the cosmic environment, under the form of cosmic germs, or *cosmozoans*, more or less comparable to the living cells with which we are acquainted.
Smithsonian Rep., 1902, p. 401.

cosmozoic (koz-mō-zō′ik), *a.* [*cosmozo-an* + *-ic.*] Concerning or pertaining to the introduction of life upon earth from without.—**Cosmozoic hypothesis,** the doctrine or opinion that the first living organisms upon earth were brought here from some unknown region of the universe by a meteorite.

Kelvin suggested that germ life may have been a meteoric passenger from otherwhere. Allowing such arrival gave no answer to the question as to the origin of the life found on the meteorite. Helmholtz, in advocacy of this "*cosmozoic hypothesis*," said, "Organic life either came into existence at a certain period, or it is eternal."
Science, April 28, 1905, p. 643.

cosmozoism (koz′mō-zō-izm), *n.* [*cosmozo-an* + *-ism.*] The doctrine that the universe as a whole has an animal consciousness: a term which has been in good use since Cudworth.

cospecies (kō-spē′shēz), *n.* [*co-*1 + *species.*] One of two or more closely related and very similar species.

Warm-blooded animals which live in these [arctic] regions have the same temperature as their *co-species* in warm climates. *Smithsonian Rep.*, 1890, p. 420.

Cossack post. See ★*post*2.

Cossackian (ko-sak′i-an), *a.* [*Cossack* + *-ian.*] Same as ★*Cossackic.*

Cossackic (ko-sak′ik), *a.* [*Cossack* + *-ic.*] Of or pertaining to the Cossacks. *N. E. D.*

cossaite (kos′a-it), *n.* [Named after Professor A. *Cossa*, who described it.] A compact variety of the soda-mica called paragonite.

cossette (ko-set′), *n.* [F. *cossette*, < *cosse*, a pod, husk.] A section or slice of a root, as made in a process of manufacture; specifically, a section of chicory so cut before drying and roasting, or of sugar-beet root in the making of beet-sugar.

The raw beet is simply cut into long slender grooved slices. In the factory these slices are known as *cossettes*.
U. S. Dept. Agr., Rep. No. 74, 1902, p. 39.

cossid1 (kos′id), *a.* and *n.* **I.** *a.* Pertaining to or resembling the lepidopterous family *Cossidæ*.
II. *n.* A moth of the family *Cossidæ*.

cossid2 (kos′id), *n.* [Also *cassid*, *kasid*, < Hind. Ar. *qāṣid*, a messenger.] A running messenger; a courier. *Yule and Burnell.* [Anglo-Indian.]

cost2, *n.*—**Bill of costs.** See ★*bill*3.—**Cost, freight, and insurance,** a term, used in commercial transactions, meaning the actual cost of the goods ordered, plus the commission, the premium of insurance, and the freight or transportation charges: abbreviated to *C. F. and I.*, or *c. f. and i.*—**Joint cost,** the cost of producing two or more commodities or of two services which normally result from a single productive operation: as, the *joint cost* of beef and leather, or of naphtha and kerosene.

costa, *n.*, **2.** (*e*) In *Ctenophora*, one of the eight meridional rows of swimming-plates. (*f*) In *Hydrozoa*, one of the protective branches which form the walls of an open basketwork inclosing the gonangia, as in the corbula of *Aglaophenia*. (*g*) The ridge of the sucker of a tapeworm.—**Costæ sternales,** in *ichth.*, the branchiostegal rays, a series of bony rays attached to the hyoid arch and assisting to close the gill-cavity below.

costal, I. *a.*—**Costal gemmation.** Same as *cœnenchymal* ★*gemmation*.—**Costal processes.** (*c*) In *ichth.*, the ribs.

II, *n.* **1.** In the articulate crinoids, the lateral plates of the calyx, often fused together. **2.** One of the bony plates borne upon and fusing with the external face of the ribs to form the greater portion of the carapace in turtles. These plates are lacking in the lyre-turtle, *Sphargis*, and certain related extinct forms. See cut under *carapace*. Also called *pleuralia*.

cost-card (kôst′kärd), *n.* In the card-system of industrial cost-keeping, a card on which is inscribed the cost of manufacturing any article.

Costen lights, signals. See ★*light*1.

costerdom (kos′tėr-dum), *n.* [*coster* + *-dom.*] Costers (that is, costermongers) collectively or viewed as constituting a distinctive community. *Athenæum*, Dec. 28, 1895, p. 897.

costiv, *a.* A simplified spelling of *costive*.

costocervicalis (kos″tō-sėr-vi-kā′lis), *n.* [NL., < L. *costa*, rib, + *cervix* (*cervic-*), neck: see *cervical*.] A muscular slip which occasionally passes between the cervical fascia or carotid sheath and the sternothyroid muscle.

costochondral (kos-tō-kon′dral), *a.* [L. *costa*, rib, + Gr. *χόνδρος*, cartilage.] Same as ★*chondrocostal*.

costofascialis (kos″tō-fash-i-ā′lis), *n.* [L. *costa*, rib, + *fascia*, a band: see *fascia*.] Same as ★*costocervicalis*.

costo-inferior (kos″tō-in-fē′ri-ọr), *a.* Relating to the lower ribs.

costopleural (kos-tō-plö′ral), *a.* Relating to both ribs and pleura.

costopulmonary (kos-tō-pul′mō-nā-ri), *a.* Relating to both the ribs and the lungs.

costosuperior (kos″to-sū-pē′ri-ọr), *a.* Relating to the upper ribs.

costotrachelian (kos″tō-trā-kē′li-an), *a.* [L. *costa*, rib, + Gr. *τράχηλος*, neck, + *-i-an.*] Relating to both the ribs and the neck.—**Costotrachelian muscles.** Same as *scalene muscles* (which see, under *scalenus*).

costraight (kō-strāt′), *a.* [*co-*1 + *straight*1.] Situated on the same straight line.

In the Euclidean geometry every three points are either on a straight line or a circle. In non-Euclidean geometry there are triplets of points which are neither *costraight* nor concyclic.
Amer. Inventor, April 15, 1904, p. 180.

costula (kos′tū-lă), *n.*; pl. *costulæ* (-lē). [NL., dim. of L. *costa*, a rib: see *costa*.] A small costa, as on a shell.

costulation (kos-tū-lā′shọn), *n.* [*costula* + *-ation.*] The system of costæ upon a shell.

Diplommatina skeati. . . . Only a single specimen of the shell, the most salient features of which are the inflated whorls, deeply cut suture, and fine, regular *costulations*.
Proc. Zool. Soc. London, 1903, p. 198.

costume-piece (kos-tūm′pēs), *n.* In *theat.*, a play in which the actors are costumed in the style appropriate to the period represented, if earlier than the modern or present period.

costumery (kos-tū′me-ri), *n.* [*costume* + *-ery.*] Costume in general; clothing; apparel.

Typical articles of *costumery*, weapons, utensils, etc., were collected and some information was gained concerning the ethnic characteristics of the tribe.
Smithsonian Rep., 1895, p. 43.

costumier (kos-tü-myā′), *n.* [F.] A costumer; a dealer in costumes, or one who rents out costumes for theatricals, mask-balls, or the like.

cosymmedian (kō-si-mē′di-an), *a.* [*co-*1 + *symmedian.*] Having the same symmedian lines: said of triangles. *J. J. Milne.*

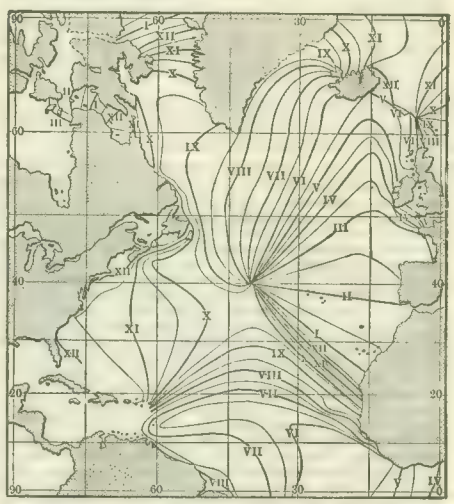
cota2 (kō′tä), *n.* [Also *cotta;* Philippine Sp. *cota*, *cotta*, < Sulu *kōta*, a wall, a fort, = Tagalog *cota*, a wall, = Pampanga *cuta* = Ilocan *cota* = Bisaya *cota* = Malay *kōta*, a fort, stronghold, < Skt. *kōṭa*, *kōṭṭa*, a fort, stronghold, < *ko-*, a prefix, who, what, implying strange, indifferent, somewhat (nom. sing. *kas* = L. *quis* = E. *who*), + *aṭṭa*, a room on a housetop, a tower.] In the southern islands of the Philippine archipelago, a fort.

cotangential (kō-tan-jen′shal), *a.* [*co-*1 + *tangential.*] Having the same tangent.

cotarnic (kō-tär′nik), *a.* [*cotarn-ine* + *-ic.*] Derived from cotarnine.—**Cotarnic acid,** a crystalline acid obtained by the oxidation of cotarnine or cotarnone. It melts at 178° C. with formation of the anhydrid.

cotarnone (kō-tär′nōn), *n.* [*cotarn-ine* + *-one.*] A compound, $C_{11}H_{10}O_4$, obtained indirectly from cotarnine. It crystallizes in leaflets which melt at 78° C.

coteau (kō-tō′), *n.* [F., a hill, hillside, ridge, dim. of *côte*, hill, hillside: see *coast*1, *n.*] In *phys. geog.*, an upland; a broad, flat-topped ridge of moderate elevation. [Northwestern U. S.]



cotenure (kō-ten′ūr), *n.* [*co-*1 + *tenure.*] Joint tenure.

coterel (kot′e-rel), *n.* [Also *cotterell*, *cotteril;* ME. *coterel*, < OF. *coterel* (ML. *coterellus*), dim. of *cotier*, cotter: see *cotter*1.] Same as *cotter*1; a cottager under the cottier system of landtenure. The name is found sometimes applied, by blunder, to the cotter's tenement.

coterminal (kō-tėr′mi-nal), *a.* [*co-*1 + *terminal.*] Same as *conterminal* and *conterminous*.

cothurnian (kō-thėr′ni-an), *a.* [*cothurn* + *-ian.*] Proper to or characteristic of tragedy.

Cotidal chart, a chart of the ocean showing cotidal lines,

Cotidal Chart of the North Atlantic Ocean.

or lines which connect the places at which the tidal waves arrive simultaneously.

cotillage (kō-til′āj), *n.* [*co-*1 + *tillage.*] Joint or coöperative tillage.

cotinine (kō′ti-nin), *n.* [A metathesis of *nicotine.*] A crystalline alkaloid, $C_{10}H_{12}ON_2$, obtained indirectly from nicotine. It melts at 50° C.

cotogenin (kō-toj′e-nin), *n.* [*coto*(*in*) + *-gen* -*in*2.] The trimethyl ether of pentahydroxybenzophenone, $(CH_3O)C_6H_2COC_6H_3(OH)_2$. It is formed by fusion of methylprotocotoin with caustic potash, and crystallizes in plates which melt at 27° C.

cotta2 (kot′ä), *n.* Same as ★*cota*2.

cottabist (kot′a-bist), *n.* [*cottab-us* + *-ist.*] One who took part in the ancient Greek game cottabus. *J. S. Blackie*, Wise Men of Greece, p. 138.

cottage, *n.* **5.** In Australia, a dwelling without up-stairs rooms; a house in which all the rooms are on the ground floor: as, a weather-board *cottage* with twelve rooms.—**Cottage bonnet,** a small, close-fitting bonnet, fashionable in the early Victorian era.—**Cottage loaf,** a loaf of bread on the top of which a smaller loaf is stuck.—**Cottage range.** See ★*range*.

cotta-grass (kot′ä-gràs), *n.* A Mexican and South American grass, *Cottea pappophoroides*, found also in cañons from western Texas to Arizona.

cotter2, *n.* Cotters were used in place of the nut and thread on a bolt before the cutting of threads was easy and cheap, and are still useful where the thread would be liable to injury. A wedge-shaped or tapered flat pin (cotter) is driven into a slot cut near the end of the bolt or stud, drawing up the bolt. A similar device is used to secure nuts on bolts from being shaken off. A hole is drilled through the bolt, at right angles to its axis, beyond the nut, and through this hole a taper pin is driven. The cotter in this case is often split at its smaller end, and if the two parts are spread it cannot of itself work out. In small work the cotter is made of half-round wire, bent double on itself, with an eye at the bend, so that when it is in place and the ends are spread, it cannot slip out either way. The hole can therefore be straight or cylindrical and not tapering, and the cotter has no wedging action in this form. Cotters are much used in motor-car construction.

cotter2 (kot′ėr), *v. t.* [*cotter*2, *n.*] To fasten by means of a cotter.

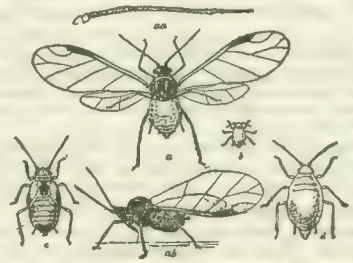
cotter-bolt (kot'ėr-bōlt), *n.* A bolt which, instead of a screw and nut at one end, has a slot cut through it near that end, for the insertion of a cotter, to keep it in its place. *Trautwine*, Engin. Pocket-book.

cotterel, *n.* 5. A washer or flat disk of metal to go under a bolt-head or nut and increase the bearing area of the fastening. [Eng.]—6. A disk of leather placed over the head of a mop to keep the strands together and prevent water from running up the handle.

cotterel-lug (kot'ėr-el-lug), *n.* An ear or lug through which a cotter is passed, to secure the piece to which the lug is attached.

cotter-pin (kot'ėr-pin), *n.* A pin used instead of a nut to keep a cotter in its place, as in fixing the pedals of a bicycle to the cranks.

cotter-way (kot'ėr-wā), *n.* A keyway; an oblong slot cut through two pieces which are to be joined by a cotter or key. The sides of the slot are parallel, but one or both ends are usually tapered so that the tapered key will bear at both bottom and top.



Cottier rent, the rent paid by a cottier, or small tenant at will. See *cottier tenure*, under *cotter*[1].—**Cottier tenancy,** the tenancy of a cottier, or small tenant at will. Originally the term designated the tenancy of an agricultural laborer who held a cottage and a parcel of land as partial payment for services upon the fields of his landlord.—**Cottier tenant,** a tenant at will holding a few acres of ground which he cultivates with his own labor.

cottolene (kot'ō-lēn), *n.* [*cott(on)(seed)* + L. *ol(eum)*, oil, + *-ene.*] A substance made from beef suet and cotton-seed oil.

cotton[1]. **I.** *n.*—**Artificial cotton,** any vegetable fiber (as the cellulose of the fir-tree freed from bark and knobs) reduced by chemical means to a cellulose condition resembling cotton.—**Asiatic cotton,** the same as *India ★cotton;* but the American upland plant has been introduced into Russian Turkestan, Persia, and India.—**Bender cotton,** long-staple upland cotton grown in the bends of the Mississippi river. See ★*cotton-plant.*—**Black-seed cotton,** the sea-island cotton, so named on account of its black or dark-brown seeds. The lint is removed with one ginning. Some upland varieties, doubtless containing sea-island stock, are included. Compare *green-seed ★cotton.*—**Blow of cotton,** the cotton crop as it appears in the field after the opening of the bolls.—**Cape cotton,** the silky fibers attached to the seeds of a shrub of the milkweed family, *Gomphocarpus fruticosus*, native to Cape Colony.—**Cluster cotton.** See *short-limb ★cotton.*—**Cotton army-worm.** See ★*army-worm.*—**Cotton boll-worm.** See *boll-worm.*—**Cotton crops,** a trade-term for three general pickings of the cotton crop. The division is more or less imaginary: the *bottom crop* is the first pickings; the *middle crop* the second pickings, and the most abundant; the *top crop* the last pickings; but this is often cut off by an early frost or wholly destroyed.—**Cotton cutworm.** Same as *granulated ★cutworm.*—**Cotton flax.** See ★*flax.*—**Cotton manufacture,** a completed commercial article made from cotton known and recognized in trade by a distinctive name other than the name of the raw material.—**Cotton-root bark.** See ★*bark*[2].—**Cotton snout-moth,** an American tortricid moth, *Platynota rostrana*, whose larva attacks first the forms and squares of the cotton-plant, and afterward the foliage.—**Cotton stalk-borer.** See ★*statk-borer.*—**Diamond cotton.** See ★*diamond.*—**Egyptian cotton,** a variety of *Gossypium Barbadense* produced from the sea-island cotton by cultivation in Egypt. It differs little from the latter except in its somewhat shorter staple. The product is especially valuable in the manufacture of mercerized goods. It is imported into the United States in large amounts and is under experimental cultivation in the Gulf States.—**Green-seed cotton,** the upland cotton, whose green seeds retain a fuzz after ginning which necessitates reginning. This name and that of *black-seed cotton*, though referring to color, have chiefly in view the corresponding adherence or detachableness of the lint. The name *green-seed* seems formerly to have designated a special variety of upland cotton.—**India cotton,** the fiber of *Gossypium herbaceum*, native in southern Asia and grown in India and other Asiatic countries, or the plant itself. *G. herbaceum* has the stems less woody than *G. hirsutum*, the leaves rounder-lobed, the bolls more nearly spherical, and the fiber generally coarser and shorter and from glossy white to golden brown.—**Kafir cotton,** the cottony fiber surrounding the seeds of a climbing plant, *Ipomœa digitata*, found in the warm regions of both hemispheres. Also called *Natal cotton.*—**Kendal cotton,** a coarse, rough woolen cloth, manufactured from the fourteenth to the seventeenth century in Lancashire, Westmoreland, and Wales: named from Kendal in Westmoreland, the original place of its manufacture. Also known as *Manchester* and *Welsh cotton.*—**Lint cotton,** cotton fiber after the removal of the seeds.—**Long Georgia cotton,** the sea-island variety of cotton grown in Georgia.—**Long-limb cotton,** a class of upland-cotton varieties with long limbs, large bolls, and long staple: unprolific, and maturing late.—**Maco cotton,** Egyptian cotton: so named from a certain Swiss who was a cotton-planter in Egypt. At one time all Egyptian cotton was known as *Maco cotton*, but now the name is more familiar among the cotton-spinners of middle Europe than elsewhere. Sometimes spelled *Mako.*—**Nankin cotton,** properly the cloth made from the naturally brownish-yellow fiber of a particular variety of cotton; but the term is very commonly applied to ordinary cotton cloth which has been dyed a similar color.—**Natal cotton.** (*a*) The cottony tomentum from the young stems and the seeds of a shrubby perennial climber of the morning-glory family, *Ipomœa albivenia*, native of Transvaal and Natal. Also called *wild cotton.* (*b*) Same as *Kafir ★cotton.*—**New Zealand cotton,** the fiber of the young branches of the ribbonwood, *Plagianthus betulinus.* See *Plagianthus.*—**Seed-cotton,** cotton lint which still contains the seed, that is, has been picked but is not yet ginned.—**Short-limb cotton,** a class of upland-cotton varieties with short limbs, medium to small bolls, and short staple: prolific, and maturing early. From the aggregation of the bolls, also called *cluster cotton.*—**Wild cotton.** (*a*) In the southern Atlantic States, the rose-mallow, *Hibiscus Moscheutos*, a plant resembling cotton. (*b*) See ★*cotton-weed*, 3. (*c*) Same as *Natal ★cotton* (*a*).

II. *a.*—**Cotton plush,** a fabric identical with cotton velvet, except that it has a longer pile.

cotton-aphis (kot'n-ā″fis), *n.* A plant-louse, *Aphis gossypii*, occurring commonly on the cotton-plant in the southern United States, especially in the early summer.

Cotton-aphis (*Aphis gossypii*).

a, winged female; *aa*, enlarged antenna of same; *ab*, dark female, side view; *b*, young nymph, or larva; *c*, last stage of nymph; *d*, wingless female; all greatly enlarged. (Chittenden, U. S. D. A.)

cotton-bale (kot'n-bāl), *n.* A bale of cotton; a commercial package consisting of cotton lint more or less tightly compressed, covered with bagging, and bound with ties. The bale differs in size, form, and covering in different countries. The standard American bale is of a square section, the faces 54 by 27 inches, and is intended to contain 500 pounds, but there is actually great variation in dimensions and density. Smaller and denser cylindrical bales, less subject to waste and loss by fire or rain, have come somewhat into use, and improvements of similar purpose have been attempted in the square bale.

cotton-ball (kot'n-bâl), *n.* A ball or small compact mass of cotton.—**Cotton-ball clouds,** small cumuli. When very small and white they are cirro-cumuli; when larger, with a darker shade on one side, they may be alto-cumuli or even cumulo-cirri.

cotton-belt (kot'n-belt), *n.* That section of the United States in which cotton is grown to best advantage. It covers 24° of longitude and 10° of latitude, including southern Virginia, Tennessee, Arkansas, Texas (except the western part), and all the States south and east of this line, the whole amounting to 600,000 square miles. Of this, according to the last census report, about one twelfth (practically 50,000 square miles) is actually planted in cotton. Cotton has been grown at many points outside of this area.

Cotton-boll cutworm, weevil. See ★*cutworm*, ★*weevil.*

cotton-brown (kot'n-broun), *n.* One of several direct cotton coal-tar colors of varying composition, all of which dye unmordanted cotton brown in a salt bath.—**Clayton cotton-brown,** a direct cotton coal-tar color. It dyes unmordanted cotton brown in a salt bath.

cotton-bush (kot'n-bûsh), *n.* See *Kochia.*

cotton-caterpillar (kot'n-kat″ėr-pil-ėr), *n.* The larva of an American noctuid moth, *Alabama argillacea* (formerly *Aletia xylina*), which abounds in the cotton-fields of the southern United States and feeds on the foliage of the cotton-plant to an injurious extent. Same as *cotton-worm* (which see, with cut).

cottoneer† (kot-n-ēr′), *n.* [*cotton* + *-eer.*] A cotton-spinner or -manufacturer.

cotton-fern (kot'n-fėrn), *n.* See ★*fern*[1].

cotton-gin, *n.*—**Single-breasted cotton-gin,** a cotton saw-gin with one grid or grate, through which the saws project.

cotton-grass, *n.* 2. A panic-grass, *Panicum insulare*, bearing cottony or silky hairs on its spikelets. It is a tropical species appearing in the southern United States, and, where abundant, is excellent for pasture. The name is also applied locally to the feather-sedge, *Andropogon saccharoides.* The *Arizona cotton-grass* is *Panicum lachnanthum*, called also *wiry panic* and *silky panic-grass.*

Cotton-leaf worm. Same as ★*cotton-caterpillar.*

cotton-loom (kot'n-löm), *n.* A loom made specially for weaving plain cotton fabrics.

cotton-manufacturer (kot'n-man-ụ-fak″ṭūr-ėr), *n.* One who operates a cotton-weaving establishment; in a broad sense, a person who carries on all the processes of cotton-manufacture from the ginned raw material to the completed product.

cotton-mouse (kot'n-mous), *n.* A rather large, coarse-haired, long-tailed field-mouse, *Sigmodon hispidus*, found in the cotton-fields of the southern United States. Also *cotton-rat.*

cotton-oil (kot'n-oil), *n.* Same as *cotton-seed oil* (which see, under *cotton-seed*).

cotton-plant, *n.* All parts of the cotton-plant are valuable, even the stubble, which forms a good coarse forage. The bark of the stems contains a fiber which it has been proposed to extract and put to several uses for which it is adapted, and the root-bark is medicinal. The main values lie in the staple or lint borne upon the seeds within the 3 to 5 cells of the pod or boll, which opens at maturity into as many divisions or locks, and in the seed itself (see ★*cotton-seed*). The cottons grown in the United States are believed to belong exclusively to the two species *Gossypium hirsutum* (the short-staple or upland cotton, a native of tropical America often identified with *G. herbaceum*) and *G. Barbadense* (the long-staple or sea-island cotton, including the Egyptian ★cotton, which see). The long-staple upland cottons appear to be derived by selection from hybrids of these two species. The sea-island cotton-plant differs from the upland in its larger growth (it is from 3 to 8 feet high against 3 or 4 feet), longer and more flexible branches, more deeply lobed leaves, bright-yellow flowers, and sharp-pointed smaller bolls having but 3 cells instead of 4 or 5. In the upland cotton the staple ranges from ⅞ to 1⅛ inches in length; in the sea-island, from 1⅛ to 2 inches; in the long-staple upland, between the two. The short-staple or upland is the ordinary cotton of the southern United States. Long-staple upland is grown sparingly in all the cotton States, in larger quantity in the delta region of the Mississippi, that is, on the broad alluvial flats along the river, chiefly between Memphis and Natchez (see *bender ★cotton*). Sea-island cotton is grown only in Georgia, Florida, and South Carolina, and the product forms less than one per cent. of the whole. The greater cost of its production precludes its use except for the highest grades of fabrics.

Cotton Bolls.

a, immature boll; *b*, mature and opened boll. One half natural size.

cotton-red (kot″n-red′), *n.* A direct cotton coal-tar color of the diazo type derived from toluidine and similar to benzo-purpurin 4B. It dyes unmordanted cotton a bright red from an alkaline salt bath.

cotton-rib (kot'n-rib), *n.* A kind of corduroy.

cotton-rock (kot'n-rok), *n.* A local name in the State of Missouri for a soft, fine-grained silicious magnesian limestone of the Lower Silurian series of Swallow.

No. 3. 15 feet of soft, earthy, fine-grained, yellowish-white or drab silico-magnesian limestone, with a conchoidal earthy fracture, in beds from half an inch to one foot thick, interstratified with thin layers of bluish, silico-argillaceous Magnesian Limestone. It is called "*Cotton-rock.*" *G. C. Swallow*, Geol. Surv. of Mo., 1855, p. 121.

cotton-seed, *n.* Cotton-seeds as picked are densely covered with the lint which is removed by ginning (see *cotton-gin*). The seed after ginning is either quite smooth, or, as is practically all commercial seed, still covered with down (see *black-seed ★cotton, green-seed ★cotton,* and *linter*[1]). The seed proper of cotton is composed of the hull (the outer shell) consisting of the seed-coats and the meat, or kernel, consisting of a coiled embryo without albumen, sprinkled with resinous glands, and containing in its cells, with other substances, oil to the extent of 20 per cent. or more of the seed. The weight of the seed is slightly over twice that of the adherent lint; the hull and the meat form about equal parts. Cotton-seed was not utilized, except for planting, until the latter part of the eighteenth century, when its value for oil and cake began to be recognized in England. It had no commercial value in the United States prior to 1834, and, though it had come into extensive use for fertilization and into limited use for feeding purposes, large amounts were still thrown away in the richer cotton States down to the time of the civil war. With the introduction of the oil-mill, chiefly after 1867, the cotton-seed industry vastly expanded, until in 1900 the total value of manufactured cotton-seed prod-

Cotton-seeds, with lint still adhering.

ucts exceeded $42,000,000, and in 1910 it reached about $150,000,000.—**Cotton-seed bran.** (*a*) The dark, solid portion of the hull of the cotton-seed from which the short fiber has been removed. (*b*) A mixture of ground hulls and waste kernels, chiefly of immature or frosted seed. It is used as food for cattle.—**Cotton-seed cake.** See *cotton-cake*. In France three kinds have been recognized: the linty, containing much waste fiber and used only for manure; the crude, containing large quantities of fragments of hulls and used as food for cattle; and the refined, from which these fragments have been removed. In the United States two kinds were formerly known, the undecorticated and the decorticated, that is, cake from seed with or without the hulls; but the former has now disappeared. Cotton-seed cake comes from the press as hard as wood and is exported in blocks, but for American use it is mostly converted into meal.—**Cotton-seed feed,** a ground mixture of cotton-seed hulls and cotton-seed meal used as food for stock.—**Cotton-seed meal,** dry cotton-seed cake broken up in a cracker or breaker and ground in a mill. It is very rich in protein, and is also one of the cheapest sources of nitrogen for fertilizing.—**Cotton-seed oil.** In the manufacture of cotton-seed oil as conducted in the United States, the ginned seed is reginned in a linter; the delinted seed is decorticated or hulled; the meats are crushed by a roller-machine or crusher; the resulting flakes are made into cakes by a former; and the cakes are wrapped in camel's-hair cloth and subjected to hydraulic pressure. After settling and clearing, the crude oil is refined by heating and agitation with caustic soda. After the oil is drawn off, freed of the excess of alkali, dried, and filtered, it is known as *summer yellow oil*—either *prime*, *choice*, or *off*. (The same gradations are also applied to the crude oil.) High grades of summer yellow oil are used in the manufacture of artificial butter, and when so used are called *butter oils*. *Summer white oil* is obtained from summer yellow by bleaching with fullers' earth and filtering, and is used chiefly in the manufacture of lard compound (see ★*lard*). *Winter yellow* and *winter white* oils are obtained by the separation from the foregoing, respectively, of the solid glycerides, the latter forming commercial *cotton-oil stearin*, which is also used in the manufacture of lard compound. The winter oils remain limpid at 32° F.; the summer oils begin to crystallize at from 35° to 50° F. The winter oils are marketed directly as salad and cooking oils; they also enter, in varying measure, into butter substitutes. Miner's oil is a winter oil used in the place of lard-oil for lighting mines. Except in the manufacture of soap, cotton-seed oil is little used in the arts, being too slow-drying for paints and too gummy for lubricating. It is chiefly consumed as food, most largely in lard compound, next in substitutes for butter, and lastly as a food-oil, like olive-oil (and often deceptively sold under that name). In 1867 there were but 4 cotton-seed oil mills in the United States; in 1902 there were 618; the American annual production of this oil now exceeds 165,000,000 gallons.—**Cotton-seed oil soap stock,** the precipitate resulting from the combination of caustic soda with the free acid of crude cotton-seed oil in the refining process. This is a true soap, but needs to be cleansed from various admixtures.—**Cotton-seed stearin,** a residue obtained upon subjecting cotton-seed oil to pressure at a low temperature: used as an adulterant and in imitations of lard and butter.

cotton-spinner (kot'n-spin″ėr), *n.* **1.** One who spins cotton; a manufacturer of cotton thread.—**2.** An echinoderm, *Holothuria forskali:* so named from the adhesive white threads (Cuvierian organs) which are shot out when the animal is irritated.

cotton-teal (kot'n-tēl), *n.* A small East Indian duck, *Nettapus coromandelicus*.

cotton-thief (kot'n-thēf), *n.* A name given in Ceylon and southern India to the paradise flycatcher, *Terpsiphone*, the adult male of which is white and black.

cotton-top (kot'n-top), *n.* The *Arizona cotton-grass*. See ★*cotton-grass*, 2.

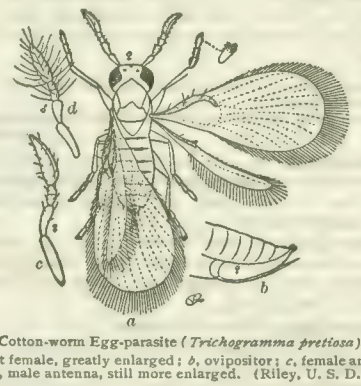
cotton-waste, *n.*—**Hard cotton-waste,** cotton thread or yarn waste.—**Soft cotton-waste,** any untwisted or partially twisted cotton-waste, as slubbing, roving, etc.

cotton-wax (kot'n-waks), *n.* A wax-like body occurring as a thin coating on the surface of cotton fiber. It is insoluble in and lighter than water, and has a comparatively high melting-point.

cotton-weave (kot'n-wēv), *n.* The simplest of the fundamental weaves: a plain weave consisting of 2 warp- and 2 weft-threads crossing each other at right angles.

cottonweed, *n.* **2.** Same as *sea-cudweed*.—**3.** The common milkweed, *Asclepias Syriaca:* the name, like that of *silkweed*, refers to the copious white fiber attached to its seeds. Also called *wild cotton*.

cottonwood, *n.* **2.** In Australia, a tree of the aster family, *Bedfordia salicina:* so called from the cottony under-surface of the leaves, or its hard, brownish, mottled wood. Called *dogwood* and *honeywood* in Tasmania.—**Balm** or **balsam cottonwood.** Same as *black* ★*cottonwood:* a name in frequent use on the Pacific coast: but to be carefully distinguished from the balsam or balm of Gilead.—**Black cottonwood,** *Populus trichocarpa*, a large tree of the Pacific coast, ranging from California to Alaska, sometimes attaining a height of 200 feet, having light wood much used for staves and various other articles.—**Common cottonwood,** *Populus deltoides*, a large tree of eastern North America, ranging from Canada to Florida and westward across the great plains, sometimes attaining a height of 100 feet. It often constitutes the only timber in the valleys of western rivers. The leaves are large, normally deltoid in outline, with coarse rounded teeth and sinuses. The wood is inferior as lumber; it warps in drying and is slow in seasoning. The tree is ornamental, of rapid growth, and is extensively planted for shade and to retain moisture on the treeless plains of the western United States. Also called *necklace-poplar* (which see, under *poplar*).—**Fremont cottonwood,** *Populus Fremontii*, a tree of the southwestern United States and



Fremont Cottonwood (*Populus Fremontii*).

a, male aments; *b*, a female ament; *c*, branch with leaf and two fruiting aments. (From Sargent's "Manual of the Trees of North America.")

Lower California, often planted for shade and also for fuel, in the latter case usually being pollarded to accelerate growth.—**Lance-leaf cottonwood,** *Populus acuminata*, a small tree of the foot-hills of the Rocky Mountains, ranging from Assiniboia to Colorado, with broadly lanceolate, taper-pointed leaves. It is sometimes planted as a shade-tree in the towns of that region.—**Narrow-leaf** or **narrow-leaved cottonwood,** *Populus angustifolia*, a middle-sized tree with narrow lanceolate leaves resembling those of a willow, found throughout the Rocky Mountain region from Assiniboia to Arizona, and exhibiting considerable variation. It is the common cottonwood west of the great plains.—**White cottonwood.** Same as *Fremont* ★*cottonwood*.—**Willow** or **willow-leaved cottonwood.** Same as *narrow-leaf* ★*cottonwood*.—**Yellow cottonwood,** the common cottonwood.

Cotton-worm egg-parasite, a minute hymenopterous insect of the family *Chalcididæ*, *Trichogramma pretiosa*,

Cotton-worm Egg-parasite (*Trichogramma pretiosa*).

a, adult female, greatly enlarged; *b*, ovipositor; *c*, female antenna; *d*, male antenna, still more enlarged. (Riley, U. S. D. A.)

which lays its eggs in the eggs of the cotton-caterpillar moth.

Cottony scale, cottony cushion-scale. See ★*scale*[1].

cotton-yellow (kot'n-yel″ō), *n.* A name of several direct cotton coal-tar colors which dye unmordanted cotton yellow in a salt bath.

cotwal (kot'wâl), *n.* [Also *kotwal*, *cutwall*, *cutwaul*, etc., < Hind. Pers. *kotwāl*, prob. < Turki *kotāwal*, *kotāwāl*, *kotāul*, a commandant of a fort or garrison.] An officer or superintendent of police; a native town magistrate. [Anglo-Indian.]

cotylar (kot'i-lar), *a.* [NL. **cotylaris*, < *cotyle*, < Gr. κοτύλη, a cup.] Cup-shaped, as the cavity in the mandible of some saurians.

Cotylea (kot-i-lē'ä), *n. pl.* [NL., < Gr. κοτύλη, a cup, socket.] A group of *Platyhelminthes*, of the order *Polyclada*. The central or subcentral ventral sucker is always placed behind the genital pores; the mouth is in the middle of the body or in front of it; the genital openings are usually in the anterior half of the body, with tentacles, if present, developed from the margin. It is opposed to the ★*Acotylea* (which see), and includes the families *Anonymidæ*, *Pseudoceridæ*, *Euryleptidæ*, *Prosthiostomidæ*, *Enantiidæ*, and *Diplopharyngeatidæ*.

cotyliform, *a.* **2.** In *bot.*, dish-shaped, with the border erect, as the leaves of *Victoria Amazonica*.

cotylophore (ko-til'ō-fōr), *n.* [Gr. κοτύλη, cup, + -φορος, < φέρειν, bear.] In *Polystomidæ*, the caudal sucker-bearing disk.

cotylopubic (kot″i-lō-pū'bik), *a.* [Gr. κοτύλη, socket (acetabulum), + L. *pubis:* see *pubic*.] Relating to both the acetabulum and the os pubis.

cotylosacral (kot″i-lō-sā'kral), *a.* [Gr. κοτύλη, socket (acetabulum), + L. *sacrum*, sacrum.] Relating to both the acetabulum and the sacrum.

cotylosaur (ko-til'ō-sâr), *n.* Any member of the order *Cotylosauria*.

Cotylosauria (kot″i-lō-sâ'ri-ä), *n. pl.* [NL., < Gr. κοτύλη, cup, + σαῦρος, lizard.] An order of Permian anomodont reptiles, closely related to the *Stegocephalia*. They have the head protected by a bony roof, the teeth on the margin of the jaws arranged in a more or less uniform series, and the vertebræ pierced for the permanent notochord. The order is synonymous with *Pariasauria*, and includes such genera as *Pariasaurus*, *Otocoelus*, and *Diadectes*.

cotylosaurian (kot″i-lō-sâ'ri-an), *a.* and *n.* **I.** *a.* Of or pertaining to the order *Cotylosauria*.

II. *n.* A member of the reptilian order *Cotylosauria*.

cotype (kō'tīp), *n.* [*co-*[1] + *type*.] In *zoöl.*, one of two or more specimens which together furnish the characters on which a new species is based. Such material may comprise the skin and skull of a mammal, or, as often happens in the case of fossils, portions of several individuals.

A number of valuable types and *cotypes* of fishes have also been transmitted by the commission.
Smithsonian Rep., 1898, p. 33.

couac (kwäk), *n.* [F., an imitative word, = E. *quack*[1].] The harsh and startling sound produced when a clarinet is unskilfully blown or its reed is out of order.

coubie (kō'bi), *n.* [F. *coubie*, appar. < Ar. **qūbī*, < *qūba*, a dry scab.] A cyprinoid fish, *Labeo coubie*, found in the Nile.

couch[1], *v. i.* **7.** To lie in a heap or pile to decay and pass into compost, as leaves and litter.

couch-grass, *n.*—**False couch-grass,** a western North American couch-grass, *Agropyron pseudorepens*, ranging from Nebraska to British Columbia and south to Texas and Arizona.

couchu (kō'chō), *n.* [Native name?] A common name of *Chætostomus fischeri*, a fish of the family *Loricariidæ* found in the river Chágres near Panama.

coudée (kö-dā'), *n.* [F., < *coude*, < L. *cubitus*, elbow: see *cubit*.] A cubit; the length from the elbow to the end of the hand.

cougar, *n.* Several species and subspecies of cougar have been recognized by naturalists, the Florida animal being known as *Felis coryi* and that from the northwest coast region as *F. oregonensis*. The southern form retains the name *F. concolor:* the type locality for this species is Brazil.

cough, *n.*—**Churchyard cough,** a cough that indicates an early death. *Mrs. Gaskell.*

cough-drop (kôf'drop), *n.* See *drop*, 2.

cough-root (kôf'röt), *n.* The nodding wake-robin, *Trillium cernuum*, of eastern North America.

cough-weed (kôf'wēd), *n.* The golden ragwort, *Senecio aureus*. See *ragwort*.

couia (kö-ē'ä), *n.* [Prob. a native name.] A fish, *Chasmistes cujus*, one of the suckers, found in Pyramid Lake, Nevada.

coulage (kö-läzh'), *n.* [F., < *couler*, flow, run, leak: see *coulisse*, *cullis*[2].] In *ceram.*, same as *casting*, 2.

couleur, *n.* **3.** In *rouge-et-noir*, the square (marked 'couleur') in which the banker pays all bets when the first card dealt for red or black is the same color as the winning color. *Amer. Hoyle*, p. 252.—**Couleurs de demi-grand feu** [F., 'colors of a medium fire'], in *ceram.*, colors which are fixed at the lower temperature of the least exposed parts of the porcelain-kiln: applied particularly to colors of Oriental and French hard-paste porcelain.—**Couleurs de grand feu** [F., 'colors of an intense fire'], in *ceram.*, colors which will bear the intense heat of a sharp fire without volatilizing, as certain of the blues and browns used in underglaze decoration: applied particularly to colors of Oriental and French hard-paste porcelains. See ★*grand feu*.—**Couleurs de moufle** [F., 'colors of muffle'], in *ceram.*, enamel colors which are put on over the glaze and fired in the muffle or decorating-kiln, but which will not bear the heat of the porcelain-kiln. See *muffle*[1], 6.—**Couleurs de petit feu** [F., 'colors of a low fire'], in *ceram.*, the colors of the muffle-kiln. See ★*couleurs de moufle*.

coulis (kö-lē'), *n.* [F.: see *cullis*[1].] A rich brown gravy.

couloir, *n.* **2.** A dredging-machine which employs iron elevator-buckets on an endless chain and excavates by making a gully where the buckets pass.

Coulomb's law. See ★*law*.

coulometer (kö-lom'e-tėr), *n.* Same as *coulomb-meter*.

couma (kö'mä), *n.* [F. (whence NL.) *couma*, representing a native name.] In Guiana and northern Brazil, a tree of the dogbane family, *Couma utilis*, or its fruit. By wounding the bark of the tree an abundant flow of sweet white milk is obtained, which is used as food and medicine by the Indians. The fruits are edible, and have a very sweet taste. Also called *Rio Negro cow-tree*.

coumalic (kö-mā'lik), *a.* [Appar. < *cou*(*marin*) + *malic*.] Noting an acid, the anhydrid of formylglutaconic acid, prepared by heating

malic acid with concentrated sulphuric acid. It crystallizes in prisms which melt, with decomposition, at 205–210° C.

coumalin (kō′ma-lin), *n.* [*coumal-ic* + *-in*².] An anhydrid, $CH\overset{CH:CH}{<_{C-CO}}>O$, formed from coumalic acid by the loss of carbon dioxid.

coumarone (kō′ma-rōn), *n.* [*coumar-in* + *-one*.] A compound, $C_6H_4<^{CH}_{O}>CH$, formedby heating coumarilic acid with lime or coumarin dibromide with alcoholic potash. It is an oil which boils at 172° C.

Coumarouna (kö-mä-rö′nä), *n.* [NL. (Aublet, 1775), < *coumarou* (*kumaru*), the Carib name of the tonka-bean.] A genus of dicotyledonous trees of the family *Fabaceæ*. See *Dipteryx* and *tonka-bean*.

council, *n.*—**Borough council**, the body of councilors elected by the voters of a borough to administer its affairs. In each of the 28 metropolitan boroughs of London, consisting of a mayor, aldermen, and councilors, the number of aldermen is one sixth that of the councilors.—**County council**, in England and Wales, a popularly elected body charged, since the passing of the Local Government Act of 1888, with the administration of the affairs of one of the new administrative counties established by the same act. Its members are elected for three years, choose their own chairman (annually) and a certain number of aldermen who serve for six years, one half retiring every three years.—**General council**. (*a*) See *council*, 7. (*b*) A Lutheran body organized in the United States in 1866 by the Pennsylvania synod and others which were not in sympathy with the attitude of the general synod toward the Augsburg Confession. The council proclaimed strict adherence to the Lutheran faith.—**Parish council**, in England, a representative body, elected in the parish, which supplements the local government work of the county council. Parish councils were established in 1894.

council-fire (koun′sil-fīr), *n.* Among several tribes of eastern North America, the fire around which the members of the tribe assemble when holding a council.

count¹, *n.*, **6.** (*a*) A term used in the textile industry to indicate the size or fineness of yarn, designated by naming the number of hanks in a pound, in the plural form: as, 20's. Also called *number* or *grist*. (*b*) *pl.* Fineness of the pitch of the wire teeth in card-clothing, computed on the number of teeth found in a width of 4 inches.—**7.** *pl.* Things sold by count, as by the dozen, the hundred, etc., and not by weight or measure; specifically, oysters, terrapin, etc.—**Common counts**, in *law*, general allegations in a complaint or declaration which are not founded upon the precise circumstances of the case, but are intended to enable the plaintiff to take advantage of any ground of liability that may be disclosed upon the trial of the action.—**Differential count**, the enumeration of the different kinds of leucocytes of the blood according to percentages.

count-bishop (kount′ bish″ up), *n.* One who is at the same time a bishop and a count.

count-cardinal (kount′kär″di-nal), *n.* One who is at the same time a cardinal and a count.

countenance, *n.*—**To change countenance**, to show involuntarily by a change of facial expression a sudden change of feeling or emotion, as on hearing unwelcome news or the like.

counter¹, *n.*, **2.** In its more elaborate form a counter consists of a series of disks placed parallel to one another on a shaft and having figures from 0 to 9 on their edges. The disks exhibit the figures through a line of holes on a covering-plate. The first one in series is moved through the angle between two of its figures by a rod from a machine whose strokes are to be counted. Each stroke moves the unit figure up one number. The tenth motion causes a dog or pin on the units disk to engage a pin or projection on the second or tens disk, and this second disk similarly moves the third or hundreds disk when the ninety-ninth stroke of the first disk is completed; and so on as far as is desired.

6. The representative of the engineer-in-chief of a canal or similar public work, having special charge of the recording of quantities of excavation, embankment, or masonry.

counter³, *n.* **8.** The depressed part of the face of a coin, medal, or printing-type that gives relief and contrast to the raised part of the design.—**Counter-dividing machine**, in *shoemanuf.*, a machine for cutting stock for boot-counters.

counter-agency (koun″tėr-ā′jen-si), *n.* An opposing agency. *De Quincey.*

counter-alliance (koun″tėr-a-lī′ans), *n.* An alliance entered into to oppose, offset, or counterbalance another alliance.

counter-antidote (koun″tėr-an′ti-dōt), *n.* A substance that inhibits the action of an antidote; an antiantitoxin.

counter-arch, *n.* **2.** An inverted arch connecting the imposts of another arch to give them equal bearing.

counter-attack (koun″tėr-a-tak′), *n.* Defense by aggressive measures; the attempt to ward off an opponent's attack by engaging him at another point: used especially in chess.

counterbalance, *n.* **2.** In elevators, a weight suspended on a rope which is attached to the car and passes over a pulley at the top of the elevator-shaft. The weight is usually heavier than the car, so as to allow for the average load.

counter-bass (koun′tėr-bās), *n.* See *bass counter*, under *bass*³.

counterbore (koun′tėr-bōr), *v. t.*; pret. and pp. *counterbored*, ppr. *counterboring*. To bore out (a hole) to a larger diameter for a given depth.

counterbore (koun′tėr-bōr), *n.* **1.** A tool-holder or tool-bar for a drilling-machine. It is passed through a hole in the work and brings the cutting tool against the farther or opposite (counter) end of the work.

2. A tool for boring out a portion of a hole to a larger diameter. Such a tool is usually made with a tip on the end to fit the drilled hole, so that the enlarged section will be concentric with and parallel to the drilled hole.

3. An enlarged section of a drilled hole, made for the purpose of receiving the cylindrical head of a screw or some similar object.

counterbracing (koun′tėr-brā″sing), *n.* Diagonal bracing placed in a truss or latticed girder to transmit stress, either tensile or compressive, from one point to another; a counterbrace to prevent deformation of the panel when the stress is reversed in the principal members.

counter-ceiling (koun′tėr-sē″ling), *n.* In *construction*, a false or second ceiling made by filling in between the floor-boards and the lath-and-plastered ceiling with mineral wool or other sound-deadening material, or with concrete, hollow brick, or other fireproofing.

countercharge, *v. t.* **2.** In *decoration*, to arrange (a design) so that elements may be repeated by simple reversion; to reverse (a design).

By *countercharging* two or more designs were obtained by the same drawing.
Hungerford, Furniture in South Kensington Museum, [p. cxxxii.

countercheck, *n.* **2.** In *pianoforte-making*, a projection from the hammer-butt that engages with the check. See cut under *pianoforte*. Also called *bumper*.

counter-chute (koun′tėr-shöt), *n.* A chute down which coal is dumped from an upper to a lower level or gangway. *Coal and Metal Miners' Pocketbook.*

counter-claim (koun′tėr-klām), *v. i.* In *law*, to set up an affirmative defense; make a counter-claim (which see).

counter-claimant (koun′tėr-klā″mant), *n.* One who sets up a counter-claim or begins a cross-action.

counter-coupé (koun″tėr-kö-pā′), *n.* In *fencing*, a thrust made by means of a counter which, instead of clinging to the opposing blade, develops into a coupé over the point. See ★*coupé*, 4.

counter-cry (koun′tėr-krī), *n.* An opposing cry.

Thy face is far from this our war,
Our call and *counter-cry*.
R. Kipling, The True Romance.

counter-demand (koun″tėr-dē-mand′), *n.* A demand made by way of reply to another.

counter-demonstration (koun″tėr-dem-on-strā′shon), *n.* A demonstration intended to be an answer to some other supposedly hostile movement or action.

counter-diapason (koun″tėr-dī-a-pā′zon), *n.* In *organ-building*, a double diapason, or 16-foot diapason.

counter-disengage (koun″tėr-dis-en-gāj′), *v. i.* In *fencing*, to disengage and make ready to thrust over the hand as the adversary changes the engagement.

counter-disengage (koun″tėr-dis-en-gāj′), *n.* In *fencing*, same as ★*counter-disengagement*.

counter-disengagement (koun″tėr-dis-en-gāj′ment), *n.* In *fencing*, a disengagement which follows or anticipates a disengagement of one's opponent; also, a riposte made by means of a disengagement which follows that of the opponent and avoids his foil. *N. E. D.*

counter-enamel (koun″tėr-e-nam′el), *v. t.* To enamel both front and back. See the noun.

counter-exposition (koun″tėr-eks-pō-zish′on), *n.* In *fugue-writing*, a treatment in which the answer precedes the subject.

counter-extend (koun″tėr-eks-tend′), *v. t.* To apply counter-extension to. *Buck*, Med. Handbook, III. 525.

counter-fire (koun′tėr-fīr), *n.* Same as ★*backfire*.

counter-fugue (koun′tėr-fūg″), *n.* A fugue in which the imitation of the subject is in contrary motion or by inversion. See *fugue* and *imitation*, 3.

counter-gambit (koun-tėr-gam′bit), *n.* In *chess*, a gambit played by the second player. See *gambit*.—**Lewis's counter-gambit**, an obsolete variation of the King's Bishop's opening.—**Lopez-Gianutio counter-gambit**, black's 3 . . . P—KB 4 in the King's Bishop's gambit.

counter-glow (koun′tėr-glō″), *n.* **1.** The light from the eastern sky after the sun has set: an apparent reflection of the sunset twilight glow, but really the independent illumination of the eastern atmospheric dust and haze by sunbeams that pass far above the observer through the upper atmosphere when the sun is below the horizon. The lower limit of the counter-glow is the twilight-arch.—**2.** A patch of extremely faint luminosity in the heavens always opposite to the sun. It is supposed to be connected with the zodiacal light.

counter-imitate (koun′tėr-im″i-tāt), *v. t.*; pret. and pp. *counter-imitated*, ppr. *counter-imitating*. To do or say the opposite of what one sees done or hears said.

In *counter-imitating* one another, that is to say, in doing or saying the exact opposite of what they observe being done or said, they are becoming more and more assimilated, just as much assimilated as if they did or said precisely what was being done or said around them.
Tarde (trans.), Laws of Imitation, p. xvii.

counter-imitation (koun′tėr-im-i-tā″shon), *n.* The opposite of imitation; the act of doing or saying the opposite of what one sees done or hears said.

Let us say, then, from this wider point of view, that a society is a group of people who display many resemblances produced either by imitation or by *counter-imitation*.
Tarde (trans.), Laws of Imitation, p. xvii.

counter-lath (koun′tėr-lāth), *n.* **1.** A lath, used as a kind of furring, as where the lathing and plastering must be carried over broad surfaces of timber or other material and must be kept away from it by the thickness of the counter-lath to allow the damp plaster to make a key between the laths.—**2.** A lath used as a gage to fix the amount of separation between boards, laths, palings, or the like which are to be nailed fast with openings between them.

counter-lath (koun′tėr-lāth), *v. t.* In *plastering*, to furnish (a ceiling or wall) with counter-laths. See ★*counter-lath*, *n.*

counter-lathing (koun′tėr-lāth″ing), *n.* In *plastering*, lathing applied to counter-laths. See ★*counter-lath*, *n.* *W. Millar*, Plastering, p. 86.

counter-lever (koun′tėr-lev″ėr), *n.* That part of a bar or system, serving as a lever, which lies between the fulcrum and the weight.

counter-loper (koun′tėr-lō″pėr), *n.* A counter-jumper (which see).

counterman (koun′tėr-man), *n.* A salesman in a shop or store; the man behind the counter, as distinguished from the floor-walker, etc.

countermine, *n.* **1.** (*b*) A mine or torpedo placed and exploded in a harbor entrance by an attacking navy to destroy the mines or torpedoes which guard the entrance.

counter-mold (koun′tėr-mōld), *n.* A profile or the like cut in and fitted close to a molding or group of moldings so that it may be copied accurately.

counter-penalty (koun′tėr-pen″al-ti), *n.* A penalty proposed as a substitute for another: as, in *Gr. antiq.* (translating Gr. *ἀντιτίμησις*), the penalty which a person convicted of crime was permitted to suggest for himself as an alternative to that proposed by the accuser.

counterpoint², *n.*—**Unequal counterpoint**, in *music*, any form of counterpoint that is not note against note. See *counterpoint*².

counterpointist (koun′tėr-poin-tist), *n.* Same as *contrapuntist*.

counterpoise, *n.*—**Counterpoise globe**, a glass globe equal in size to one containing a gas whose weight is to be accurately determined. It is placed on the other side of the balance and eliminates errors due to the change in the buoyancy of the air: first used by Regnault in 1845. *M. W. Travers*, Exper. Study of Gases, p. 125.

counter-pump (koun′tėr-pump), *n.* A pump under a counter or bar, for drawing liquids from barrels or other vessels too bulky to be kept close at hand.

counterpuncture (koun′tėr-pungk-tūr), *n.* In *surg.*, a second puncture made at another point, usually at some dependent part.

Counter-Reformation (koun″tėr-ref-or-mā′shọn), *n.* The movement of reform within the Roman Catholic Church which followed, and partly counteracted the effects of, the Protestant Reformation in the sixteenth century. See *reformation*, 3.

counter-roll (koun′tėr-rōl), *v. i.* To roll in the opposite direction: as, to roll and *counter-roll*.

> And spiritual thunders, born of soul
> Not cloud, did leap from mystic pole
> And o'er him roll and *counter-roll*.
> *Mrs. Browning*, Vision of Poets, st. 65.

counter-screw (koun′tėr-skrö), *n.* Either of two screws (both right-handed and turning together in the same direction or one right-handed and the other left-handed and turning opposite ways) by which an object which they adjust or restrain may be moved in one direction or the other by the motion of one.

counter-shaft, *n.*—**Differential counter-shaft,** a supplementary shaft in a motor-vehicle, parallel to the driving-axle and connected by drive-chains to the latter or the driving-wheels. It is divided by the compensating-gears, and therefore removes the latter from the rear axle which has to carry the load. This gives to it its differential character when the car is rounding curves. *Sci. Amer.*, Feb. 7, 1903, p. 91.

counter-shafting (koun′tėr-shâf″ting), *n.* One or more counter-shafts; the system of secondary transmission to tools from the main driving-shaft of a factory or works.

counter-skiver (koun′tėr-skī″vėr), *n.* A special machine for skiving counters and taps, and making rounds and welts. See *skiving-machine*.

counter-stain (koun′tėr-stān), *n.* In *histol.*, a dye employed to stain of another color the elements not colored by the dye first used. The effect is to make the different elements more conspicuous by contrast.

counter-stain (koun′tėr-stān), *v. t.* To treat with a counter-stain.

> Rehm (25) *counterstaining* with a solution of carmine 1 part, liq. ammon. caustic 1 part, in water 100 parts for five minutes, then decolorizing five minutes in alcohol 100 parts, potassium nitrate 1 part, stained the centre of the nucleolus red, while leaving a peripheral rim of blue.
> *F. R. Bailey*, in Jour. Exper. Med., Oct. 1, 1901, p. 559.

counter-stitcher (koun′tėr-stich″ėr), *n.* A shoe-sewing machine for stitching counters.

counter-stroke, *n.* 2. A force which produces a lesion in a part other than that where the injury is inflicted. See *counter-fissure*. *Buck*, Med. Handbook, IV. 558.

counter-tide (koun′tėr-tīd), *n.* A tide that opposes one already existing; the flood- or ebb-tide that is about to succeed to the one already existing; the incoming flood-tide overlying the outgoing ebb-tide as shown by the surface-ripple or bore.

counter-time, *n.* 3. In *fencing*, a pass or thrust made at a wrong or inopportune moment for the opponent, thus breaking the rhythm of his intended combination.

counter-treble (koun′tėr-treb″l), *n.* In *music*, a high treble or soprano voice, or the part sung by such a voice.

count-fish (kount′fish), *n.* A large snapper found in Australian and New Zealand waters, sometimes used as a standard of size by the fishermen in selling fish in the market.

counting-cell (koun′ting-sel), *n.* An apparatus designed for counting the number of blood-corpuscles, bacteria, etc., in a given volume of fluid.

counting-machine (koun′ting-ma-shēn″), *n.* A machine devised to perform the operation of counting; a ★tallying-machine (which see).

counting-scales (koun′ting-skālz), *n. pl.* A weighing-scales of the portable platform type, arranged for counting small hardware articles such as nuts, bolts, etc., by weight. It has two pans, a small one being suspended from the end of the balance-beam. One sample placed in this pan will balance one hundred placed on the platform. To count out a hundred nuts it is only necessary to place one nut in the pan and to place on the platform a quantity of the same nuts just sufficient to balance it. Small articles weighing less than a quarter of a pound can be counted by placing one in the small pan and more in the larger pan: when the two pans balance there are twenty in the larger pan.

count-muster (kount′mus″tėr), *n.* A muster or round-up, as of cattle, for the purpose of counting those that have been mustered. [Australia.]

country, *n.* 10. The parts of a cricket-field covered by the out-fielders; the long- or deep-field. [Colloq.]—**To appeal to the country,** in British parliamentary procedure, to appeal to the voters of the country by dissolving Parliament and ordering a new general election, when some government measure, considered of vital importance by the ministry, has been defeated in the House of Commons.

country-box (kun′tri-boks), *n.* A small country-house, generally for temporary residence as when shooting, fishing, or the like.

country-cut (kun′tri-kut), *a.* That has been cut roughly: used in regard to timber which has been roughly sawed in the district where it was felled.

country-damaged (kun′tri-dam″ājd), *a.* Damaged in the country, or at the interior or initial point of shipment (by being exposed to rain, mud, careless handling, etc.): a term applied to cotton in the bale when so damaged. *Taggart*, Cotton Spinning, I. 43.

country-house (kun′tri-hous), *n.* A house or mansion in the country, as distinguished from a town-house; a country-seat.

country-note (kun′tri-nōt), *n.* A bank-note issued by a local bank in England, as distinguished from those issued by the Bank of England. *N. E. D.*

county[1]. **I.** *n.*—**Administrative county,** one of the 62 divisions (exclusive of county boroughs) into which the 52 geographical and historical counties or shires of England and Wales are divided under the Local Government Act of 1888 for the administration of the county affairs which had prior to that date been administered in quarter-sessions by the justices of the peace, their powers being transferred to a new popularly elected administrative body styled the *county* ★*council* (which see). London is an administrative county in itself, with its own county council for county affairs, but for purely local or municipal purposes it is divided into 28 boroughs, each with its own municipal council. See also ★*county borough*.—**Body of a county,** the entire territory embraced within the limits of a county.—**Home counties,** the group of English counties of which London is the center. These are Middlesex, Hertford, Essex, Kent, Surrey, and (sometimes) Sussex: as, farming in the *Home Counties*.

II. *a.*—**County borough,** in England and Wales, a borough with a population of 50,000 or more, that since the passing of the Local Government Act of 1888 has had county administrative powers added to its own municipal powers and is thus a county in itself, administratively (but not politically or judicially) independent of the county in which it is situated. The county boroughs now number 67, but do not include the 28 boroughs of the administrative county of London.—**County council** See ★*council*.

county-court (koun′ti-kōrt), *v. t.* To sue (one) in the county court, especially for debt. *Surtees*.

county-house (koun′ti-hous), *n.* The county poorhouse. [Eng.]

coup[4], *n.* 4. A stroke; a brilliant play; in banking games the decision of all the bets by one event.—**Bath coup,** in *whist*, the act of holding up the ace and jack when the adversary leads a king, so as to secure tenace in the suit: so called because first brought into use by the old whist-players at Bath, England.—**Coup de repos** [F.], in *chess*, a silent or quiet move after a series of checks.—**Coup dur** [F., 'hard stroke'], a French billiard term for what in England and America is technically the 'kiss-shot.' Until recently it comprehended only that class of strokes in which the cue-ball was made to rebound from an object-ball either on or very close to a cushion. It now includes, but with insufficient reason, shots in which there is no double contact, or 'kiss,' between any two balls whatever.—**Coup fourré** [F., 'interchanged blow'], in *fencing*, a double blow delivered by two fencers, neither one waiting to parry: usually regarded with disfavor, as it spoils the grace and interest of the game.—**Coup juste** [F., 'exact stroke'], in *chess*, a move made at the right or opportune time.—**Grand coup** [F., 'great stroke'], in *whist* or *bridge*, the trumping of a trick which is already won by the partner, or throwing a small trump when he has already trumped with a higher.—**To run a coup,** in *billiards*, to pocket the cue-ball or send it off the table without hitting any other ball: a technicality of English billiards.

coupé, *n.* 4. In *fencing*, a sudden shifting of the guard by lifting the foil over the point of the opponent's blade and thrusting at the same moment on the unprotected side. A coupé is in the nature of a surprise to a careless opponent. See *cut over point*, under *cut*.

coupélet (kö-pā-let′), *n.* [*coupé* + *-let.*] A carriage with a coupé under-body and a calash top over the rear seat, and without high pillars on the doors or front.

couple, *n.* 2. (*e*) In *astron.*, a double star.—**Flexural couple,** a couple of forces acting upon a body in such a manner as to produce or tend to produce bending.—**Mechanical couple.** See def. 2 (*b*).—**Righting couple,** in *naval arch.*, the mechanical couple formed by the force of gravity acting downward through the center of gravity and the force of buoyancy acting upward through the center of buoyancy, which tends to restore a vessel to the upright or position of equilibrium after it has been inclined from that position.—**Torsion couple,** in *mech.*, a couple of forces acting so as to twist a body; a couple tending to produce torsion.—**Unit moment of a couple,** the moment of a couple such that the product obtained by multiplying one of the forces by the arm of the couple is equal to unity: thus the couple in which each force is one dyne and the arm is one centimeter has unit moment.

coupled, *p. a.* 2. As applied to quadrupeds, and particularly to horses, noting the distance between the shoulders and the hip-joint: as, well *coupled*, short *coupled*.—**Coupled rhythm, wheels.** See ★*rhythm*, ★*wheel*[1].

coupler, *n.* (*d*) In *zoöl.*, a plate which joins one of the swimming-appendages of a crustacean to its fellow on the opposite side of the body.

> [The] first four thoracic appendages bear biramous swimming feet . . . those of the right and left sides being connected by transverse plates or *couplers*.
> *Parker and Haswell*, Zoölogy, I. 530.

Automatic coupler. See *coupling*, 4, (*b*), (2).

couplet, *n.* 4. In *Gothic arch.*, a double window; one having two lights only and these of the same size and style.

coupling, *n.*, 4. (*e*) Same as *pipe-coupling*.—**Conevise coupling,** a shaft-coupling consisting of a sleeve bored conically from each end, two bushings turned to fit the conical boring of the sleeve and bored to fit the shaft, and three bolts passing through the bushings by which they can be tightened in the sleeve and on the shaft, the bushings being slotted through on one side to permit of their being compressed sufficiently to bind the shaft.—**Electro-magnetic coupling,** a device for coupling the parts of a mechanism, in which magnetic attraction, electrically produced and controlled, is used instead of friction or of some other of the mechanical means commonly employed.—**Face-plate coupling,** a flanged coupling; a pipe- or shaft-coupling which resembles in form the face-plate of a lathe, in that flat areas at right angles to the axis of the pipe or shaft form the joint.—**Flange-coupling,** a device for uniting two lengths of driving-shaft. On the end of each is fastened by keys a flange on a hub; the two flanges face each other, and are bolted to each other by bolts.

coupling-grab (kup′ling-grab), *n.* Same as ★*grapple*, 7.

coupling-rod (kup′ling-rod), *n.* Same as *parallel rod* (which see, under *rod*[1]).

coupling-screw (kup′ling-skrö), *n.* An eye-bolt with a strap attached to the nut, so that by screwing the bolt into the nut a chain or rope or rod fastened to the eye and to the strap may be tightened; also, a socket with female screws at each end, for connecting-rods or tension-members.

coupling-tool (kup′ling-tōl), *n.* Tongs used in uniting objects such as lengths of pipe. [Eng.]

coupon, *n.* 2. A small piece of metal made as a part of another piece to serve as a sample for testing-purposes.—**Ex coupon,** in *finance*, without the right to the coupon for current interest: said of a bond sold under this condition.

courbaril, *n.* 2. The tree which yields courbaril resin or anime. See *Hymenæa*.

courbash, *n.* See *koorbash*.

courbature (kör-bä-tür′), *n.* [F., aching, lassitude, lumbago, < *courbatu*, overpowered by lassitude, < OF. *courbatu*, lit. 'beaten with short arm' (that is, with quick and many blows), < *court*, short, + *batu*, *battu*, beat: see *battue*, *batter*[1].] An aching in the muscles. *Buck*, Med. Handbook, VII. 608.

courge (körzh), *n.* [F., lit. 'a gourd': see *gourd*.] In *sea-fishing*, a gourd-shaped basket for holding live bait immersed in the water.

courida (kö-rē-dä′), *n.* [Native name in Guiana.] In British Guiana, a verbenaceous shrub or small tree, *Avicennia nitida*. It is found within the tropics on both sides of the Atlantic. It grows with the mangrove on muddy flats along the sea-shore, and, like it, is raised on stilt-like-roots. Called *black mangrove* and *blackwood* in the West Indies.

> The land at the mouths of these estuaries is on the increase, forming a fringe of low ground which is soon covered with mangroves and *courida* bushes.
> *R. H. Schomburgk*, Descrip. British Guiana, p. 7.

course[1], *n.*—**21.** In *mining*: (*a*) An influx of water from one direction. (*b*) The direction of a lode or vein. (*c*) A passage-way. (*d*) The direction of a mine working.—**Course made good,** *naut.*, the true bearing of a vessel from the point left; the compass course corrected for leeway, send of the sea, variation, deviation, etc.—**Compass course.** See ★*compass*.—**Course of kind,** the course of nature; the ordinary procedure of nature especially as regards reproduction.

> Not an egg had been laid; and it appeared upon inquiry, that the whole *course of kind* was suspended.
> *Southey*, Doctor, lxxvi.

Void of course, in *astrol.*, said of the heavenly bodies when they form no fresh aspect before leaving the sign in which they are posited.

Coursed ashler. See ★*ashler*.

court, *n.* 12. Among Foresters and some other friendly societies, a local branch or lodge.—**Bail court,** in *Eng. law*, the practice-court; a court auxiliary to the Court of King's Bench, where motions connected with the pleading and practice, rather than with the merits, of a controversy were heard and determined.—**Central Criminal Court,** the most important English court of criminal jurisdiction. All the higher crimes committed in London and its surrounding country are triable in this court, as are also the serious offenses that were formerly within the jurisdiction of the admiralty court.—**Circuit court of appeals.** See ★*appeal*.—**Court of claims.** (*c*) A court in which claims against the State may be heard and determined. As the sovereign power cannot be sued by a subject, this court is usually established by the State, and all claims against the government must be brought therein. Such courts exist in Washington and generally in the capitals of each of the

States.—**Court of Commerce,** a United States court, established by act of Congress, June 18, 1910, for the adjudication of cases relating to the orders of the Interstate Commerce Commission.—**Court of error.** See *error.*—**Court of Private Land Claims.** See *private land claims,* under ★*claim*[1].—**Court of referees.** See the extract.

In the passage of private bills through the House of Commons, the practice was adopted in 1864 of the appointment of referees on such bills, consisting of the chairman of ways and means and not less than three other persons to be appointed by the speaker. The referees were formed into one or more courts, three at least being required to constitute each court, a member in every case being chairman, but receiving no salary. The referees inquired into the proposed works, etc., and reported to the house. The committees of the house on any bill might also refer any question to the referees for their decision. . . . A *court of referees* was specially constituted for the adjudication of this right, called locus standi. *Bouvier,* Law Dict.

Court of regard. See *regard.*—**Court of request.** Same as *court of conscience,* under *conscience.*—**Court of Wards and Liveries,** in *Eng. law,* a former court of record in England, having jurisdiction over questions relating to profits accruing to the crown by reason of tenures, the granting to heirs of the delivery of their inheritance out of the hands of their guardians, the granting of licenses to the king's widows to marry and imposing fines for marrying without license, and the superintendence of persons *non compos mentis* in the king's custody. It was abolished in the reign of Charles II.—**Court Scotch.** See ★*Scotch.*—**Double Court,** in *tennis,* a court for two pairs of players.—**High Court of Justice,** in England, a division of the Supreme Court having original and some appellate jurisdiction. The lord chief justice is its president.—**Levy court,** the name given in some of the United States to the board of officers which administers the affairs of a county, the same as *board of county commissioners, county supervisors, board of freeholders,* etc.—**Passage court,** an ancient court of record in Liverpool, once called the "mayor's court of *pays sage,*" but now usually called the "court of the passage of the borough of Liverpool." *Bouvier.*—**Single court,** in *tennis,* a court for two players only.—**Summary court,** in the *United States army,* a court consisting of a single officer, for the trial of minor offenses committed by enlisted men.—**To cover court,** in *tennis* and similar games, to so move about over the court as to render it impossible for the opponents to score by placing the ball out of reach.

court-circular (kōrt′sėr′kū-lăr), *n.* An official circular or bulletin containing a record of the doings of the court or royal family of Great Britain, supplied to the newspapers every day for publication in their columns.

courtesy, *n.*—**Courtesy of the port.** (*a*) A courtesy extended, in some cases, to a passenger arriving from a foreign port, consisting in the examination of the passenger's baggage by a special inspector immediately upon its delivery from the ship. (*b*) *Naval,* the interchange of official visits and salutes when a war-ship enters a foreign port.

court-room (kōrt′röm), *n.* The room or chamber in which a court is regularly held and justice is dispensed.

courtzilite (kōrt′zi-līt), *n.* [**Courtzil,* a proper name (?) + *-ite*[2].] A kind of asphaltum allied to uintahite and gilsonite.

coussinet, *n.* 2. In an Ionic capital, a roll or baluster-shaped member which is carried horizontally from one volute to another. There are two in each capital. See cut at ★*collarino.*

Couvin shales. See ★*shale*[2].

Coventry, Earl of. See ★*snip-snap-snorem.*

covenant, *n.*—**Book of the Covenant.** See ★*book.*—**Covenant of non-claim,** in *law,* in a deed of real property, substantially the same as a warranty covenant: used especially in the New England States and in deeds of extinguishment of ground-rents in Pennsylvania. It provides that neither the grantor nor his heirs shall claim any title in the property conveyed.—**Covenant of salt,** an inviolable covenant: from an old custom of the Hebrews of sealing an agreement by a common meal, at which salt was eaten, the preservative quality of the salt signifying the security of the agreement. 2 Chron., xiii. 5.—**Covenant to convey,** in *law,* a covenant by which one party agrees to convey to another the estate described in the covenant, under certain circumstances.—**Greater Book of the Covenant, Little Book of the Covenant.** See ★*book.*—**Personal covenant,** in *law,* one which binds the covenantor only; a covenant which does not run with the land.—**Real covenant,** in *law,* one which binds not only the covenantor but also the property which is the subject-matter of the covenant; a covenant which runs with land.—**Transitive covenant,** in *law,* one which binds both the covenantor and his representatives.—**Writ of covenant,** a legal process which issues in favor of a party who claims damages for breach of covenant.

cover[1], *v.* **I.** *trans.* 15. In *hockey, basket-ball,* and other sports, to stand by the side of or in front of (an opponent), so as to render it impossible for him to make a play.—17. In *cricket,* to field; to catch or stop (the ball) and return it.—**To cover court.** See ★*court.*

II. *intrans.* 4. In *card-playing,* to play a higher card on a card led or played, when the higher card is not the best of the suit: as, queen on jack, when the ace and king have not yet been played.

cover,[1] *n.* 8. In *cricket,* cover-point; a fielder who stands behind point, and more in the direction of the bowler; also, his position in the field.—9. In *calico-printing,* a fine pattern engraved on a roller to be printed over a pattern in resist.—10. In making a butt-joint in riveted work with plates, the lap-piece which covers the joint and is riveted to the butting edges. The double butt-joint has an outer and an inner cover-plate.—**Crown cover,** in *forestry,* the canopy formed by the crowns of all the trees in a forest, or, in an irregular forest, by the crowns of all trees in a specified crown class.—**Dead cover,** in English billiards, a position which corresponds to 'tie up' in the French or American game, the balls being so alined that the striker can effect a count only at the risk of losing position. *W. Broadfoot,* Billiards, p. 339.—**Double cover,** in *cricket,* extra-cover, or extra-cover point; the fielder who plays between cover-point and mid-off, but farther from the batsman's wicket than either of them; also, his position in the field.—**Forest cover,** in *forestry,* all trees and other plants in a forest.

cover[3] (kuv′ėr), *n.* [W. *cyfair.*] The ordinary measure of land in South Wales, two thirds of an imperial acre. *N. E. D.*

covering-piece (cuv′ėr-ing-pēs), *n.* In the *Echinodermata,* especially the *Crinoidea,* one of the plates arranged along both sides of the ambulacral grooves which cover the ambulacra.

covering-plate (kuv′ėr-ing-plāt″), *n.* In *Crinoidea,* one of the calcareous plates, situated along the margins of the food-grooves in the arms, which, by opening and closing, as occasion demands, serve to protect the soft parts. Also called *ambulacral.*

cover-slip, *n.* 2. In *cricket:* (*a*) A fielder formerly placed to back up or cover the short-slip. (*b*) His position in the field.

covert, *n.*—**Covert play.** See *close* ★*play.*—**Ear coverts,** in *ornith.,* the feathers covering the external opening of the ear.

co-vibration (kō″vī-brā′shọn), *n.* [*co-*[1] + *vibration.*] A concomitant or sympathetic vibration. *C. R. Squire,* in Amer. Jour. Psychol., XII. 588.

Covillea (kō-vil′e-ă), *n.* [NL. (Vail, 1895), named after Frederick V. *Coville,* an American botanist.] A genus of dicotyledonous plants belonging to the family *Zygophyllaceæ.* See *Larrea* and *creosote-bush.*

co-volume (kō-vol′ūm), *n.* [*co-*[1] + *volume.*] In *phys. chem.,* that part of the total volume of a body which is not occupied by the molecules, and which is the volume available for the oscillatory and translatory motions of the atoms and molecules.

cow[1], *n.*—**The cow with the iron tail,** the pump, as an alleged resort of the milkmen to enhance the quantity of their milk. [Colloq.]

The *cow with the iron tail* is still milked in London. *All the Year Round.*

cowalker (kō-wâk′ėr), *n.* In *folk-lore,* a double; an apparitional counterpart, which may show itself in places remote from that occupied by the individual in person.

A is on his way to X, or is dreaming that he is on his way, and is seen at X by P, or by P, Q, and R, as may happen. These cases are common, and were explained, in Celtic philosophy, by the theory of the "*Co-Walker,*" a kind of "astral body." *Encyc. Brit.,* XXXII. 52.

cowan (kou′ạn), *n.* [Also *cowen, kowan;* origin unknown.] 1. One whose occupation is the building of dry stone walls: used especially of one who has not been regularly trained in the mason's trade. [Scotch.] Hence—2. One who is not a Free-Mason.

Cowbane (*Oxypolis rigidior*).

a, upper part of plant and inflorescence, one eighth natural size; *b,* fruit and cross-section of same, three fourths natural size.

coward-tree (kou′ärd-trē), *n.* A tree under which all men who manifest fear in battle are killed: used by some Zulu tribes. *G. S. Hall,* Adolescence, II. 720.

cowbane, *n.* 2. An American umbelliferous swamp-plant, *Oxypolis rigidior,* ranging from New York to Florida and westward to Minnesota and Louisiana, supposed to be poisonous to cattle. Also called *hemlock-dropwort:* and *water-dropwort.* See cut in middle column.

cow-basil (kou′baz-il), *n.* Same as *cow-herb.*

cow-bind (kou′bīnd), *n.* The common or red-berried bryony, *Bryonia dioica.* See *bryony.*

cow-clover (kou′klō″vėr), *n.* See ★*clover.*

cow-cockle (kou′kok″l), *n.* See ★*cockle*[1].

cow-creamer (kou′krē″mėr), *n.* A cream-jug made in the shape of a cow. The cream is poured in through a hole in the back, the open mouth of the cow serving for a spout, while the curled tail answers for a handle. Such jugs were extensively made in England and in the United States from the middle of the eighteenth to the middle of the nineteenth century, both in cream-colored and brown glazed ware.

cowen, *n.* Same as ★*cohen.*

cow-fish, *n.,* (*b*) (3) A name applied in New England to the grampus, *Grampus griseus.* (*c*) A name applied in Demerara to the manatee.

cow-keeper, *n.* 2. A person, in a city or town, who keeps stall-fed cows and retails the milk.

The most significant feature in connexion with the milk supply of the metropolis at the beginning of the 20th century is the gradual extinction of the town "*cow-keeper.*" *Ency. Brit.,* XXVII. 363.

cowl[3] (koul), *n.* See ★*kowl.*

cow-lady, *n.* 2. In *angling:* (*a*) A natural fly used by anglers. (*b*) An artificial imitation of the same, in which the body is of peacock's feather and the wings of red hackle of a cock.

cow-lick, *n.* 2. *pl.* The snowdrop-tree, *Mohrodendron dipterum.*

cow-pea, *n.* The cow-pea is a bean rather than a pea, having large leaves with three leaflets and seeds frequently oblong or kidney-shaped. It is commonly classed as *Vigna Sinensis,* but probably includes more than one natural species, the red-seeded and black-seeded varieties forming one natural group; the round-seeded 'lady-peas' a second; the large black-eyed and purple-eyed a third; and the mottled and speckled 'whippoorwills,' together with plain yellow, pinkish, and light brown a fourth. The cow-pea is an annual, its numerous varieties passing through all grades of bush, trailing, and running habit, the less rampant being better adapted to short seasons. It requires much heat and will bear no frost; hence it is most at home in the South, but varieties have been

Cow-pea (*Vigna Sinensis*).

a, plant, about one fourth natural size; *b,* black-eye variety of bean of *Vigna Sinensis,* about natural size.

secured which will mature in 60 days, and its culture is extending northward. In the southern United States it has long been of great value, and with the introduction of mixed farming is increasingly appreciated. It is available for forage and soiling and for hay, in the latter use, when well cured, ranking with red clover; and it is one of the foremost nitrogen-gatherers. For silage it is inferior to corn or sorghum. The shelled seeds, chiefly of the 'black-eye pea,' are used for human food, either fresh or dried. —**Cow-pea weevil.** See ★*weevil.*

cow-penning (kou′pen″ing), *n.* The practice of penning cattle in orange-groves over night, the position of the pens being changed every few days. *Yearbook U. S. Dept. Agr.,* 1894, p. 201.

cowperitis (kou- or kō-pe-rī′tis), *n.* [NL., < *Cowper(ian glands)* + *-itis.*] Inflammation of the Cowperian glands.

cow-puncher (kou′pun″chėr), *n.* A cattle-driver on the great plains of the United States. Sometimes used for *cow-boy.* [Slang.]

cow-run (kou′run), *n.* A common for pasturing cows.

cowry, *n.* **3.** A unit of surface used in Hindustan, equal to a square yard.—**Head of cowries,** a count of 2,000 cowries, equal to about sixpence, in the British African Colonies.

cowslip, *n.*—**Cape cowslip,** any plant of the genus *Lachenalia.* See *leopard-lily.*

cow-tick (kou′tik), *n.* An ixodid, *Boöphilus bovis.* Also called ★*cattle-tick* (which see, with cut).

cow-tree, *n.* **2.** In British Guiana, the hya-hya or milk-tree, *Tabernæmontana utilis.* See *milk-tree,* 2, and *Tabernæmontana.*—**3.** The karaka of New Zealand, *Corynocarpus lævigata,* so called by the colonists from the fondness of cows for its leaves. See ★*karaka.*—**Cow-tree wax,** a wax-like substance obtained by boiling the milky juice of the South American cow-tree, *Piratinera utilis:* used locally for making candles.—**Rio Negro cow-tree.** See ★*couma.*

Coxa vara, a deformity marked by a bending of the neck of the thigh-bone, causing adduction of the limb.

Coxal gland. See ★*gland*—**Coxal organ,** in *Peripatus,* an eversible, furrow-like structure, with tumid lips and lined with smooth non-tuberculate epithelium, situated on the ventral sides of certain of the legs.—**Coxal sacs,** certain eversible sacs which function as blood-gills and occur near the coxæ in certain diplopods and other *Myriopoda,* and in the *Symphyla* and *Synaptera.* *A. S. Packard,* Text-book of Entom., p. 14.

coxarthrocace (kok-sär-throk′a-sē), *n.* [NL., < L. *coxa,* hip, + Gr. *ἄρθρον,* joint, + *κάκη,* ill condition (*arthrocace.*)] Hip-joint disease.

coxarthropathy (kok-sär-throp′a-thi), *n.* [NL., < L. *coxa,* hip, + Gr. *ἄρθρον,* joint, + *-παθεια,* < *πάθος,* disease.] Hip-joint disease.

coxecphysis (kox-ek′fi-sis), *n.* [NL., < L. *coxa,* thigh, + Gr. *ἐκφυσις,* outgrowth.] In crustaceans, a branch borne by the first joint or coxa of any appendage; an epignathite or epipodite.

coxitis, *n.*—**Senile coxitis,** rheumatoid arthritis located in the hip-joint.

coxodynia (kok-sō-din′i-ä), *n.* [NL., < L. *coxa,* hip, + *ὀδύνη,* pain.] Same as *coxalgia.*

coxognathite (koks-og′na-thīt), *n.* [L. *coxa,* thigh, + Gr. *γνάθος,* jaw, + *-ite*2.] The basal joint or coxa of a foot-jaw.

coxotuberculosis (kok″sō-tū-bėr″kū-lō′sis), *n.* [NL., < L. *coxa,* hip, + NL. *tuberculosis.*] Tuberculous disease of the hip-joint.

coxy, *a.* See ★*cocksy.*

coyote, *n.* No less than eleven species of coyotes have been recognized by Merriam, the name *Canis latrans* being restricted to the eastern form whose type-locality is Iowa. The species from Lower California is *C. peninsulæ;* the Californian form is *C. ochropus;* and that from Indian Territory is *C. frustror.*

coyoting (kō-yō′ting), *n.* Mining alone in a desultory way or in irregular openings and burrows like those made by the coyote. [Colloq., western U. S.]

Cozio counter-attack. See ★*attack.*

cp. A contraction of *compare.*

C. P. An abbreviation (*b*) of *candle-power;* (*c*) of *Chief Patriarch.*

C. P. D., C. P. D. M. In *astron.,* abbreviations of *Cape* (of Good Hope) *Photographic Durchmusterung.* See ★*durchmusterung.*

C. P. M. An abbreviation of *common particular meter.*

C. Q. In the Marconi wireless code, the call meaning "Attention, all stations."

C. Q. D. In the Marconi wireless code, the distress signal meaning "All stations, danger."

C. R. An abbreviation (*c*) of the Latin *Civis Romanus,* Roman citizen.

crab1, *n.*, **7.** (*g*) The ironwork affixed to the end of a carriage-pole to which are attached the straps or chains which secure the horses to the pole. It consists of a socket and two branching arms with loop-ends, with or without a long whiffletree-hook.

8. In Australia, the marine crustacean, *Scylla serrata;* also, *Telphusa transversa,* a crustacean found in fresh water.—**9.** *pl.* Same as *crab-yaws.*—**Black crab,** *Gecarcinus ruricola,* a land-crab living in the Antilles: its name is due to the markings on its carapace.—**Chevalier crab,** a swift-running sand-crab, of the genus *Ocypoda.* Also called *horseman-crab.*—**Crab nebula.** See ★*nebula.*—**Creole crab,** a large hairy West Indian crab with prickly claws.—**Demon-faced crab,** the Japanese *Dorippe dorsipes.*—**Fighting crab.** Same as *fiddler-crab* (which see, under *crab*1, 1).—**Great warty crab.** Same as *lazy* ★*crab.*—**Heraldic crab,** *Huenia heraldica,* a crab whose markings suggest a heraldic shield.—**Jonah crab,** a large crab, *Cancer borealis,* found along the North Atlantic coast of the United States.—**Lazy crab,** in the East and West Indies, *Parthenope horrida.* Also called *great warty crab.*—**Old-man's-face crab,** a local name for a crab, *Atelecyclus septemdentatus,* found along the southern coast of England.—**Sargasso crab,** a small crab, *Planes minutus,* that lives among sargasso weeds and is protectively colored.—**Swift crab.** (*a*) Any species of the beach-crab *Ocypoda.* (*b*) A cliff-crab, especially *Grapsus pictus.*—**To turn out crabs.** See ★*turn.*—**Velvet crab.** Same as ★*lady-crab,* 2, (*b*).—**Warty crab.** Same as *lazy* ★*crab.*—**White crab,** a beach-crab; a sprite.

crab2, *n.* **2.** The American crab-apple, *Malus coronaria,* also called sweet crab and fragrant crab, is a small

Crab-apple (*Malus coronaria*).
a, flowering branch; *b,* fruiting branch. (From Sargent's "Manual of the Trees of North America.")

tree from 25 to 30 feet high, with a trunk rarely a foot in diameter, abundant in the Appalachian region and in the region of the Great Lakes and in the Mississippi valley, extending eastward to New York, Pennsylvania, and the District of Columbia. It has somewhat ovate, sharply serrate leaves and large, handsome, white or rose-colored flowers in umbels on slender pedicels. Several in each umbel mature, the fruits hanging on long stems. The apples are nearly spherical with a depression at base and summit, an inch or more in diameter, green, but attaining a yellowish hue when fully ripe, sometimes turning nearly red. The sarcocarp is compact, heavy, and juicy, sharply acid, but with a pleasant aroma. They are little eaten in a raw state, but are highly valued for preserves and make excellent sauce. The Iowa crab-apple, *M. Ioensis,* which is confined to the Mississippi basin, but ranges from Minnesota to Texas, is similar to the last and is often confounded with it, but has narrower leaves and somewhat larger fruit. The Soulard crab-apple, *M. Soulardi,* of the same region is regarded by some as a hybrid between *M. Ioensis* and the common apple. The fruit is larger than that of the others (sometimes 2 inches across) and useful for the same purposes as the quince. The narrow-leaf crab-apple, *M. angustifolia,* of the Atlantic and Gulf States has much smaller fruit and is of little value. The Oregon crab-apple, *M. rivularis,* of the Pacific coast from California to Alaska, has a pleasant subacid fruit not much larger than that of the hawthorn.

crab3, *v. t.* **3.** To 'pull to pieces'; criticize or find fault with; hence, to hinder, spoil or defeat by adverse criticism of trivial details. [Colloq.]

The conditions of the race laid down definitely that every part of a competing vehicle [automobile] must be built in the country by it represented, and the use of foreign tires of course *crabbed* the deal.
New York Independent, Dec. 12, 1901.

crabbing-trough (krab′ing-trôf), *n.* A trough used in cleansing woven fabrics preparatory to dyeing.

crab-capstan (krab′kap-stan), *n.* A portable wooden upright pillar or shaft having a large socket or hole in the upper part into which is inserted a long strong wooden beam or lever: used for lifting weights, etc., commonly in shipyards.

crab-eater, *n.* **3.** A West Indian name of several small herons, including the green heron, *Ardea virescens* and the blue heron, *Ardea cærulea.*

crab-eyestone (krab-ī′stōn), *n.* A gastrolith of a crab; also, any eyestone.

crab-fish (krab′fish), *n.* A crab.

The fox catches *crab fish* with his tail, which Olaus Magnus saith he himself was an eye-witness of.
Derham, in Johnson's Dictionary, 8th ed., 1799.

crab-grass, *n.* **1.** Any species of *Syntherisma. S. linearis,* distinguished as *smooth crab-grass,* is abundant in the southern United States, but is little valued.—**Sprouting crab-grass,** *Panicum proliferum,* a succulent grass quite different from *Syntherisma,* sending out branches from all the upper nodes. It is liked by cattle but is hardly worthy of cultivation.

crab-hawk (krab′hâk), *n.* One of several species of birds of prey of the genus *Urubitinga,* related to the harpy-eagle but much smaller. The commonest species is *U. anthracina,* of Central and South America and the West Indies.

crab-hole (krab′hōl), *n.* A hole made by a land-crab or craw-fish; also, the hollow afterwards formed from one of these burrows by rain or by caving-in. [Australia.]

crabling (krab′ling), *n.* [*crab*1 + *-ling*1.] A small crab.

crabronid (krā′brō-nid), *a.* and *n.* **I.** *a.* Of or belonging to the hymenopterous family *Crabronidæ.*

II. *n.* A member of the hymenopterous family *Crabronidæ.*

crab-shell (krab′shel), *n.* A crab's carapace.

crab-step (krab′step), *n.* A sidelong step like that of a crab, made by a horse.

crab-tree, *n.* **2.** See ★*bitter-bark,* 1.

crab-vinegar (krab′vin-ē-gär), *n.* Vinegar made from the cider of crab-apples.

Cracca (krak′ä), *n.* [NL. (*Linnæus,* 1753, adopted from his 'Flora Zeylanica,' 1747), < L. *cracca,* an unidentified leguminous plant.] A genus of dicotyledonous plants belonging to the family *Fabaceæ.* See *Tephrosia.*

crack, *v.* **I.** *intrans.* **4.** (*b*) In *golf,* said of a player 'who goes to pieces.' In a close match a player *cracks* when he fails to maintain his average play of the preceding holes and allows his opponent thereafter easily to beat him. [Colloq.]

9. To shoot with small arms; fire: as, to *crack* at birds.—**10.** To become harsh or unmanageable; more specifically, to break involuntarily into an upper register: said of a voice.

II. trans. **10.** In *cricket,* to hit (a ball) hard with the bat: usually said of balls hit in front of the wicket. [Colloq.]—**11.** In *music,* to render (a voice) harsh or unmanageable.—**To crack on sail,** to carry a press of sail; crowd on sail.

crack, *n.* **17.** In a length of cloth, a short space without weft.—**18.** A burglary; a housebreaking; also, a cracksman; a burglar. [Thieves' slang.]

crackajack (krak′a-jak), *a.* and *n.* [Also *crack-erjack;* vaguely formed from *cracker*1 + *jack*1.] **I.** *a.* Extraordinarily or exceptionally fine; 'bang-up.' [Slang.]

II. *n.* Something, as a horse, a bicycle, or the like, that is extraordinarily fine; a 'bang-up' thing. [Slang.]

We have had a few sales, but business has been quiet. We got in a load of *crackajacks* during the week and among others Warlock, Nuttingham Gift and J. Max Davis, which we call the 'Marquis of Michigan,' were in the lot. We also had seven or eight pairs, the equal of anything ever brought to our stables.
Spirit of the Times, CXXXVI. 435.

crackbrain (krak′brān), *n.* One who is cracked or impaired intellectually; a crazy fellow. *Carlyle.*

cracked, *p. a.*—**Cracked-pot sound.** Same as ★*bruit de pot félé.*

cracker, *n.*—**Cracker-cutting machine,** in a bakery, a machine for stamping and cutting a sheet of sponge or water dough into crackers ready for baking. In general plan it resembles a panning-machine (which see).

cracker-berry (krak′ėr-ber″i), *n.* The dwarf cornel or bunch-berry, *Cornus Canadensis.*

crackerjack (krak′ėr-jak), *a.* and *n.* See *crack-ajack.*

cracking, *n.* **3.** A process by which a compound made up of elements of varying volatility may be analyzed and the components separated by successively raising the temperature of the mixture, so that they are distilled off successively in the order of their volatility: used specifically of petroleum compounds, which in the refining process are separated by increasing the temperature of distillation.

cracking-machine (krak′ing-ma-shēn″), *n.* A machine for producing fine lines like cracks on the surface of a millstone.

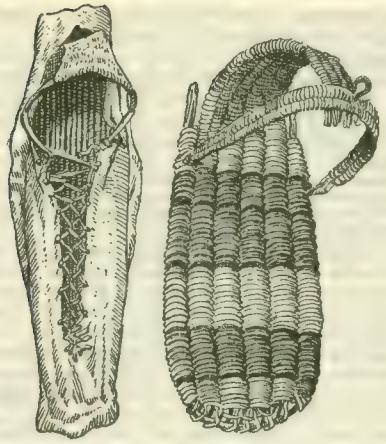
crack-jaw (krak′jâ), *a.* Jaw-breaking; hard to pronounce: as, a Russian *crack-jaw* name.

It is a story told of a Polish nobleman, a count somebody: I never can remember their *crack-jaw* names.
Disraeli, Vivian Grey, v. 13.

crackle, *n.* **3.** In *pathol.,* same as *crepitant râle* (which see, under *râle*).—**Fish-roe crackle,** a finely crackled glaze on Chinese porcelain.

crackler (krak′lėr), *n.* A soft-shell crab when the new shell begins to harden and gives a crackling noise when pressed.

crack-preventer (krak′prē-ven″tėr), *n.* A contrivance attached to a loom to prevent open spaces in the cloth in places where the weft fails, from any cause, to be laid in the web.



cracky2 (krak′i), *interj.* An exclamation of surprise or astonishment. [Slang.]

cradle, *n.* **4.** (*n*) In a gun-carriage, a bronze or bronze-lined frame in which the gun slides when recoiling. *Jour. U. S. Artillery,* Nov.–Dec., 1903, p. 296. (*o*) A framework of timbers in which ocean-going rafts of logs are built. (*p*) A rocking part of the building-motion, on a cotton-roving machine, which regulates the wind of the roving on the bobbin.

cradle, *v. t.* **5.** To reinforce on the back with crossed strips in order to prevent warping: as, to *cradle* a picture.—**6.** To support on or in a cradle: as, to *cradle* a ship while it is being raised to a higher level.—**7.** To cut (a cask) in two longitudinally. *Knight,* Dict. Mech.

cradle-board (krā′dl-bōrd), *n.* A board to which an infant is more or less firmly strapped: the cradle of most North American tribes.

cradle-frame (krā′dl-frām), *n.* A framework of willow or similar material, used like a cradle-

Cradle-frames.

board by some of the Indians of western and southwestern North America.

cradle-gage (krā′dl-gāj), *n.* An instrument for gaging the angle or setting of the top comb of a Heilmann cotton-combing machine.

cradle-knoll (krā′dl-nōl), *n.* In the construction of logging-roads, a small knoll which requires grading.

cradle-roof (krā′dl-röf), *n.* A roof having (as seen from within) the general shape of a cradle-vault, wagon-vault, or tunnel-vault: always a construction of light materials, not of masonry. It is usually built with wooden ribs bent or cut to the curve and boarded up.

cradle-song (krā′dl-sông), *n.* A song sung to a babe in the cradle; a lullaby.

craft[1], *n.*—**Arts and crafts.** See ★*art*[2], *n.*

craft-warden (kräft′wâr″den), *n.* The warden of a craft-gild.

About the same time, the '*craft wardens*' of the various fellowships . . . were levying excessive fees on the admission of apprentices. *Froude*, Hist. Eng., I. i.

crag[1], *n.* **2.** In geological classification this term has been applied to divisions of the Pliocene Tertiary in England, which are, in a general sense, banks or crags of marine shells. The *Coralline crag*, a division of the Older Pliocene, also called the *Bryozoan*, *White*, or *Suffolk crag*, is essentially made up of fragments of molluscan shells and bryozoans or corallines. The *Red crag*, a brown or ferruginous shelly band, is of the Newer Pliocene, and has been divided from the base up into the Walton, Oakley, Newbourn, and Butley crags. The Norwich, Chillesford, and Weybourn crags follow in order above the Red crag, and terminate the marine series.

crag-bed (krag′bed), *n.* A coarse-grained fragmental deposit formed just before the glacial period. See *crag*[1], 2.

crag-bone (krag′bōn), *n.* The neck-bone; the cervical vertebræ considered as one bone.

crag-fast (krag′fäst), *a.* Fast between two crags, as a sheep on a craggy hillside. [Eng.]

craggan (krag′an), *n.* [Var. of *crogan*, < Gael. Ir. *crogan*, O. Ir. *crocan*, W. *crochan*, a pot: see *crock*[1].] A vessel of rude pottery found in the Hebrides.

cram, *n.* **4.** A densely packed gathering or crowd; a crush; a 'jam.' [Colloq.]

It was a prodigious *cram* and we turned away no end of people. *Dickens.*

crambid (kram′bid), *n.* and *a.* **I.** *n.* A member of the family *Crambidæ*.

II. *a.* Of or belonging to the lepidopterous family *Crambidæ*.

cram-book (kram′bůk), *n.* A book specially prepared for 'cramming' a subject for an examination.

Cramp game, any game at billiards in which one player, by limiting his opportunities for counting (for example, always playing on the red ball first, or playing four pockets against six), gives his opponent odds.

cramp[2], *n.*—**Compositors', glass-blowers', musicians' cramp.** See *occupation* ★*cramp*.—**Occupation** or **professional cramp**, an involuntary and irregular contraction occurring in muscles which have been strained by overuse in certain occupations whenever an attempt is made to resume the occupation in question. This cramp or spasm has received various names descriptive of the sufferer's occupation. See *writers' cramp*, under *writer*.—**Pianists', sewers', shoemakers', typewriters' cramp.** See *occupation* ★*cramp*.

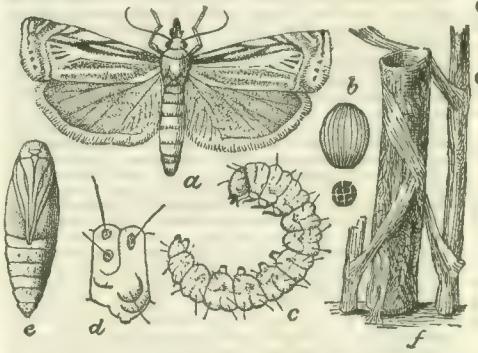
cramper (kram′pėr), *n.* A length of yarn which sailors sometimes tie around their legs to prevent cramp.

cramp-frame (kramp′frām), *n.* A clamp-frame; the frame of a C-clamp; the frame of a cramp-drill.

cramp-hole (kramp′hōl), *n.* A hole to receive a locking-pin; a hole for a clamping-bolt.

crampit, *n.*, **2.** (*c*) An iron spike or bar driven or built into a wall to serve as a support for other parts or to bind the wall itself. [Eng.]

cramp-word (kramp′wėrd), *n.* A word that is hard to understand or pronounce. *N. E. D.*



Cranberry blast. See ★*blast*.—**Cranberry fire-worm.** Same as *blackhead* ★*cranberry-worm*.—**Cranberry gall-fly, katydid**, etc. See ★*gall-fly*, ★*katydid*, etc.—**Cranberry tip-worm.** See *tip-worm*.—**Swedish cranberry**, the mountain-cranberry: so called when imported into the United States.—**Upland** or **wild cranberry**, the bearberry, *Arctostaphylos Uva-ursi*.

cranberry-aphis (kran′ber-i-ā″fis), *n.* An undetermined plant-louse which affects the leaves and young stems of the cranberry in the eastern United States.

cranberry-bog (kran′ber-i-bog), *n.* A bog in which cranberries grow or are cultivated.

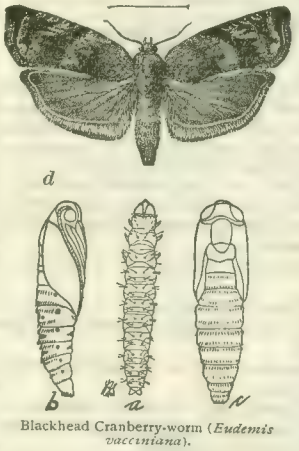
cranberry-gall (kran′ber-i-gâl), *n.* A pustular swelling sometimes found on cranberry-leaves, caused by the fungus *Synchytrium Vaccinii*. See ★*gall-fungus*.

cranberry-girdler (kran′ber-i-gėr″dlėr), *n.* The larva of a crambid moth, *Crambus hortuellus*. It lives in silken galleries, feeding upon the runners of the vine and girdling the stem. Also called *girdle-worm*.

Cranberry-girdler (*Crambus hortuellus*).
a, moth; *b*, egg; *c*, larva; *d*, segment of larva; *e*, pupa; *f*, nest of larva. All enlarged. (Scudder, U. S. D. A.)

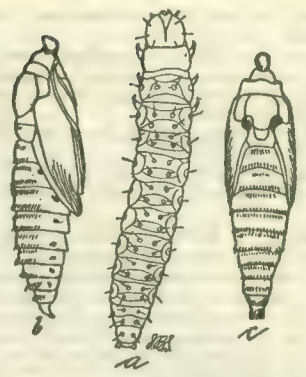
cranberry-looper (kran′ber-i-lö″pėr), *n.* The larva of an American geometrid moth, *Xanthotype crocataria*.

cranberry-marsh (kran′ber-i-märsh), *n.* A marshy spot, periodically flooded, in which cranberries are cultivated for the market.



cranberry-moth (kran′ber-i-môth″), *n.*—**Glistening cranberry-moth**, an American tortricid moth, *Eudemis oxycoccana*, the adult of a small caterpillar which feeds on cranberry.

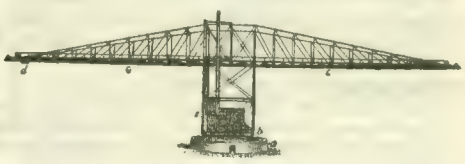
cranberry-scale (kran′ber-i-skāl), *n.* A scale-insect, *Aspidiotus ancylus*. Also known as *Putnam's scale*.



Cranberry-scale (*Aspidiotus ancylus*). (Comstock, U. S. D. A.) Enlarged.

cranberry-tree, *n.* **2.** In North America, *Viburnum pauciflorum*, a shrub ranging from Pennsylvania to Alaska, and somewhat resembling *V. Opulus* in its 3-lobed leaves and reddish globose drupes: distinguished as *few-flowered cranberry-tree*.

Blackhead Cranberry-worm (*Eudemis vacciniana*).
a, larva; *b* and *c*, pupa, all enlarged (after Smith); *d*, moth (after Riley).



Cranberry-worm (kran′-ber-i-wėrm), *n.*—**Blackhead cranberry-worm** the larva of an American tortricid moth, *Eudemis vacciniana*. It feeds on the buds, flowers, and young fruit of the cranberry, as well as on the foliage. Also *vine-worm* and *fire-worm*.—**Red-striped cranberry-worm**, an occasional fall variety of the yellow-headed cranberry-worm, in which the body becomes striped with red.—**Yellow-headed cranberry-worm**, the larva of an American tortricid moth, *Alceris minuta*. It feeds on cranberry-leaves.

Yellow-headed Cranberry-worm.
a, larva; *b* and *c*, pupa. All enlarged.

crane[1], *n.*—**Karivondo crane**, the African crowned crane, *Balearica pavonica*, distinguished by an erect, slightly radiating crest, of fine, stiff, yellowish-white feathers.

crane[2], *n.*—**Automotor-crane**, a form of crane which is supported on a car whose wheels are adapted to run on common roads.—**Cantaliver crane**, a crane supported at the middle upon a lofty frame and having a long cantaliver boom on which travels the hoisting-trolley. The frame may revolve upon a stationary platform, or may travel upon a track or runway. Shipyard and blast-furnace cantaliver cranes are often 100 feet high with a boom 350 feet long.—**Chain-block crane**, a crane having a chain-block for its hoisting apparatus, in place of the usual geared drum.—**Electric crane**, a swing or traveling crane, on which electric motors are used to furnish the power required for any or all of the motions. Traveling cranes are almost always equipped with motors, because for this purpose electric transmission is far more convenient than any other. On such cranes there is usually a motor for each motion — hoisting, cross-travel, and end-travel. When auxiliary hoists are fitted they usually have their own motors, since this simplifies the design and operation.—**Floating crane**, a bridge- or other type of crane mounted upon a float or pontoon.—**Gauntree crane**, a bridge-crane in which the bridge is carried by structural-iron supports resting on car-trucks, one truck supporting the out-board end of the bridge and traveling upon a single rail, and the other supporting the other end of the bridge and the motive power for the crane and traveling upon a broad-gage track. These cranes are made in many forms for use in railroad-yards, shipyards, blast-furnace yards, and on ore- and coal-docks, and are often of very great size.—**Molders' crane.** Same as *molding-crane*.—**Railway-crane.** (*a*) A crane designed for work on railways, especially in wrecking. (*b*) A crane mounted upon a car and fitted to run or traverse on a railway laid upon the ground, and either self-propelling or driven by a locomotive.—**Warehouse-crane**, a light form of hoisting apparatus used in warehouses for lifting articles and for interior transportation, having a capacity range from 1,000 to 6,000 pounds, and operated either by hand or by pneumatic or electric power.—**Yard-crane**, a gauntree-crane.

Cantaliver Crane.
Balanced revolving type.
a, foundation supporting circular track on which crane traverses in a circle; *b*, platform supporting power-house and central structure; *c*, cantaliver arms; *d*, trolley supporting hoist and traversing arms, hoisting chains not shown; *e*, house for boiler engine, hoisting drums and swinging gear. Total length of arms 356 ft. 6 in.

crane-barge (krān′bärj), *n.* See ★*barge*[1].

crane-bridge (krān′brij), *n.* The girder or bridge of a traveling crane, on which the hoist can travel transversely. The bridge is usually made of a pair of girders, each carrying a track for the hoist, though in very light cranes a single girder is sometimes used.

Crane-fly orchis. See *Tipularia*.—**False crane-fly**, any member of the dipterous family *Ryphidæ*. They are generally small flies with rounded and spotted wings. Their larvæ are found in decaying wood and fruit, in cow-dung, and in dirty-water.

crane-house (krān′hous), *n.* **1.** A building or shed covering a crane.—**2.** A shed built at the base of a large crane to protect the machinery and operator from the weather.

crane-neck (krān′nek), *n.* The long thin section of a coach which connects the driver's seat with the body.

crane's-bill, *n.*—**Spotted** or **wild crane's-bill**, *Geranium maculatum*, a favorite American wildflower found in woods from Newfoundland to Manitoba and south to Alabama and Kansas. It is a leafy herb a foot or more high, with large showy rose-purple flowers.

crane-willow (krān′wil″ō), *n.* The button-bush, *Cephalanthus occidentalis*.

crangonid (krang-gon'id), *n.* and *a.* **I.** *n.* A shrimp-like crustacean belonging to the family *Crangonidæ*.

II. *a.* Of or pertaining to the *Crangonidæ*.

crangonoid (krang'gon-oid), *a.* Shrimp-like, as a crustacean.

Cranial cartilage, flexure. See ★*cartilage*, ★*flexure*.

Cranial index. See ★*index*.

craniate (krā'ni-āt), *a.* [NL. **craniatus*, < L. *cranium*, < Gr. *κρανίον*, skull.] Having a skull or cranium, as do all vertebrates above the lampreys.

It [Amphioxus] exhibits what appears to be a primordial condition of vertebrate organization, a condition which is, in fact, partly recapitulated in the course of the embryonic stages of *craniate* vertebrates.
Encyc. Brit., XXV. 385.

cranidium (kra-nid'i-um), *n.*; pl. *cranidia* (-ä). [NL., < Gr. *κρανίον*, skull, + dim. *-ιδιον*.] In the cephalon of the trilobites, the central piece included within the facial sutures, consisting of the glabella and fixed cheeks.

craniectomy (krā-ni-ek'tō-mi), *n.* [Gr. *κρανίον*, skull, + *ἐκτομή*, excision.] Excision of a thin strip of the skull in a young child to relieve pressure on the brain.

craniodidymus (krā″ni-ō-did'i-mus), *n.*; pl. *craniodidymi* (-mī). [NL., < Gr. *κρανίον*, skull, + *δίδυμος*, twin.] A monster with two heads.

Craniofacial fissure, in *anat.*, a vertical fissure, or vacuity, in line with the frontonasal articulation, separating the mesethmoid more or less completely into two parts.
Proc. Zool. Soc. London, 1903, I. 269.

craniognosy (krā-ni-og'nō-si), *n.* [Gr. *κρανίον*, skull, + *γνῶσις*, knowledge.] Same as *craniology*.

craniographer (krā-ni-og'ra-fėr), *n.* One who describes and makes drawings of skulls; one versed in craniography.

craniohematoncus (krā″ni-ō-hem-a-tong'kus), *n.* [NL., < Gr. *κρανίον*, skull, + *αἷμα* (*τ*-), blood, + *ὄγκος*, mass.] Same as *cephalæmatoma*.

craniol. An abbreviation of *craniology*.

craniologically (krā″ni-ō-loj'i-kal-i), *adv.* With regard to the cranium, or to the zoölogical characters of the cranium.

craniom. An abbreviation of *craniometry*.

craniomalacia (krā″ni-ō-ma-lā'si-ä), *n.* [NL., < Gr. *κρανίον*, skull, + *μαλακία*, softness.] Same as *craniotabes*.

craniometrically (krā″ni-ō-met'ri-kal-i), *adv.* According to the rules and methods of craniometry; by means of the craniometer.

craniometrist (krā-ni-om'ē-trist), *n.* A person who measures skulls.

craniopathy (krā-ni-op'a-thi), *n.* [Gr. *κρανίον*, skull, + *-παθια*, < *πάθος*, disease.] Any disease of the skull.

craniorachischisis (krā″ni-ō-ra-kis'ki-sis), *n.* [NL., < Gr. *κρανίον*, skull, + *ῥάχις*, backbone, + *σχίσις*, cleaving, fissure.] Fissure of the skull and vertebral column.

cranioschisis (krā-ni-os'ki-sis), *n.* [NL., < Gr. *κρανίον*, skull, + *σχίσις*, cleaving, fissure.] Fissure of the skull.

craniosclerosis (krā″ni-ō-sklē-rō'sis), *n.* [NL., < Gr. *κρανίον*, skull, + *σκλήρωσις*, hardening.] Thickening of the skull.

craniostosis (krā-ni-os'tō-sis), *n.* [NL., prop. **craniosteosis*, < Gr. *κρανίον*, skull, + *ὀστέον*, bone, + *-osis*.] Premature closure of the cranial sutures.

craniote (krā'ni-ōt), *a.* and *n.* [NL. **craniotus*, < Gr. **κρανιωτός*, < *κρανίον*, skull.] **I.** *a.* Having a skull.

II. *n.* A member of the *Craniota*, or vertebrates which have a well-defined skull.

craniotome (krā'ni-ō-tōm), *n.* [Gr. *κρανίον*, skull, + *-τομος*, < *ταμεῖν*, cut.] A surgical instrument for cutting bone, used in operations on the skull.

craniotomy, *n.*—**Linear craniotomy**, incision through the cranium of a child to relieve tension.

craniotopography (krā″ni-ō-tō-pog'ra-fi), *n.* [Gr. *κρανίον*, skull, + E. *topography*.] The mapping out of the surface of the skull in order to determine the relation of the various parts to the brain beneath.

craniotractor (krā″ni-ō-trak'tor), *n.* [NL., < *κρανίον*, skull, + L. *tractor*, tractor.] A form of cranioclast.

cranitis (krā-nī'tis), *n.* [NL., < Gr. *κρανίον*, skull, + *-itis*.] Inflammation of the cranial bones.

crank[2], *n.*—**Overhanging crank**, a crank whose shaft-bearing is on one side of the crank-pin only. The crank is on the end of the shaft. When the bearing is on the right of the crank, as the observer looks along the mechanism which drives the crank in a horizontal engine, the crank is right-handed.—**Three-throw crank**, a shaft which has three cranks forged upon it, or which is built up of separate pieces, with an angle between any two, and is used in three-cylinder engines or pumps. The usual arrangement of a three-throw crank in an engine or pump is to place the cranks 120 degrees apart to secure as uniform a turning movement as possible.

crank[2], *v. t.* **4.** To turn with a crank; turn (an engine) with a hand-crank. This is usually done to draw in and compress the charge in a gas-engine so that it will be of the desired composition under pressure and ready to be ignited.

crank-arm (krangk'ärm), *n.* That part of a crank which joins the center of the shaft to be turned by it to the handle or pin to which the power or resistance is applied.

crank-cheek (krangk'chēk), *n.* A cheek-piece; a crank-arm; the crank to which the crank-pin is fastened.

crank-circle (krangk'sėr″kl), *n.* The circle described by a crank-pin; specifically, the circle in a valve-diagram or the elevation of a steam-engine which represents the path of the crank.

Cranked axle or **shaft.** See ★*shaft*.

crank-effort (krangk'ef″ort), *n.* The tangential force acting on the crank-pin of an engine. This force depends upon the angle between the crank and the connecting-rod, the pressure acting on the piston, and the effect of the inertia of the reciprocating parts of the engine.

cranking (krangk'ing), *n.* **1.** In cutting tools, the hollowing out of the tool immediately behind the cutting edge. This is done in order that the tool may have a tendency to spring back and out, rather than dig into work, when making a heavy cut. **2.** The operation of turning a crank, specifically in order to start an internal-combustion motor, as in a motor-car.

crank-motion (krangk'mō″shọn), *n.* The motion of a body when driving or when driven by a crank. Such motion is called *harmonic*, as the reciprocating part traverses the diameter of the circle in the same time in which the crank-pin is moving uniformly over the semi-circumference of the same circle.

crank-pit (krangk'pit), *n.* A recess, below the floor-line around an engine, in which the main crank and the lower end of its connecting-rod revolve.

crank-web (krangk'web), *n.* That part of a crank which connects the crank-pin hub to the shaft-hub. In short cranks this may be as large in cross-section as either hub, while in long cranks it is usually cut away to make it as light as possible.

crank-wrist (krangk'rist), *n.* In *mach.*, the short length of the double crank between the arms of the U. It forms the crank-pin surface to which the connecting-rod is attached.

crap[3] (krap), *n.* [Perhaps ult. connected with *crop*, *v.*] **1.** A throw with dice; especially, a losing cast in the game of craps, when the total of pips on the two dice is 2, 3, or 12. See *craps*[2]. *Stand. Dict.*—**Crap-shooting.** Same as *craps*[2] and ★*craps*[2].

crape-dresser (krāp'dres″er), *n.* One who finishes crape for the market.

crape-fern (krāp'fėrn), *n.* See ★*fern*[1].

crape-markings (krāp'mär-kingz), *n. pl.* In *photog.*, peculiar markings which appear in the film of collodion in the wet-plate process, due to the presence of water in the alcohol or ether. *Woodbury*, Encyc. Dict. Photog., p. 146.

crape-myrtle (krāp'mėr-tl), *n.* A shrub, *Lagerstræmia Indica*. Also called *Indian lilac*. See *lilac* and *Lagerstræmia*.

crape-ring (krāp'ring), *n.* The semi-transparent, dusky ring of Saturn between the bright ring and the planet. *Sci. Amer.*, Aug. 1, 1903, p. 79.

crappox (krap'poks), *n.* [Appar. < *crap*(*audine*[1]) + *pox*.] In yaws, ulceration with indurated edges on the soles of the feet.

craps[2] (kraps), *n. pl.* A game of chance played with dice; the modern and simplified method of playing hazard. The players bet as much as they choose, and the caster covers the amount he is willing to risk. He then throws two dice from his hand. If the first throw is 7 or 11, it is a nick or natural, and the caster wins everything. If 2, 3, or 12 is thrown, it is a crap, and the caster loses everything. Any other number thrown is the caster's point, and he must continue throwing until he brings the same number again and wins, or throws 7 and loses.—**To shoot craps**, to play at craps: said because the dice are thrown or shot from the hand, instead of being rolled from a dice-box.

crapula (krap'ū-lä), *n.* [L., < Gr. *κραιπάλη*, intoxication.] **1.** Crapulence.—**2.** A resin or confection of some drug producing intoxication, as hashish.

craspedodrome (kras-ped'ō-drōm), *a.* [Gr. *κράσπεδον*, margin, + *-δρομος*, < *δραμεῖν*, run.] Running into the margin: said of the nerves of leaves. See *nervation* (*a*) (1), Fig. 2.

Lateral primaries when forked usually above their base, often present as basal sub-primaries; secondaries camptodrome in the entire-margined forms and *craspedodrome* in those which have dentate margins, both characters combined in some species. *Bot. Gazette*, Dec., 1903, p. 423.

craspedodromous (kras-pe-dod'rō-mus), *a.* Same as ★*craspedodrome*.

craspedon (kras'pe-don), *n.*; pl. *craspeda* (-dä). Same as *craspedum*.

Craspedostoma (kras-pe-dos'tō-mä), *n.* [Gr. *κράσπεδον*, margin, + *στόμα*, mouth.] A genus of rhipidoglossal gastropods of the family *Delphinulidæ*, having globose whorls, short spire, cancellated body-whorl, and an alar process at the end of the columella. It is of Silurian age.

craspedotal (kras-pe-dō'tal), *a.* [*Craspedota* + *-al*[1].] Of or pertaining to the *Craspedota*; having a velum.

crass[2] (kras), *n.* [*Crass*(*icornis*), the specific name.] A species of sea-anemone, *Bunodes crassicornis*.

Crassatella (kras-a-tel'ä), *n.* [NL., < L. *crassatus*, thickened, + dim. *-ella*.] The typical genus of the family *Crassatellidæ*. *Lamarck*, 1801.

Crassatellidæ (kras-a-tel'i-dē), *n. pl.* [NL., < *Crassatella* + *-idæ*.] A family of bivalve mollusks. The shell is equivalve, thick, and nearly triangular; the mantle with anal orifice or open; hinge-ligament in an internal fossette; and hinge with 2 cardinal teeth. The laterals are produced. The principal genus is *Crassatella*.

Crassilinguia (kras-i-ling'gwi-ä), *n. pl.* [NL., neut. pl. of *crassilinguis*, < L. *crassus*, thick, + *lingua*, tongue.] A section or superfamily of *Lacertilia*, containing lizards with short, thick, nonprotrusile tongues, including such forms as the geckos and iguanas. Correlated with *Vermilinguia* and *Fissilinguia*.

Crassocephalum (kras-ō-sef'a-lum), *n.* [NL. (Moench, 1794), < L. *crassus*, thick, + Gr. *κεφαλή*, head. The allusion is to the swollen fruit-heads of *C. cernuum*.] A genus of plants of the family *Asteraceæ*, related to *Senecio*. There are about 24 species, of the Old World tropics, one of which is sometimes grown in warm glass-houses for its rich purple velvety foliage. This is *C. aurantiacum* (*Gynura aurantiaca* of de Candolle), the velvet-plant, from Java. It is a stout plant, hairy in all its parts, with large ovate jagged-edged soft leaves. The flower-heads are yellow or orange, in terminal clusters.

cratægin (krat'ē-jin), *n.* [*Cratægus* + *-in*[2].] A crystalline, bitter compound from the fresh bark of the twigs of the hawthorn, *Cratægus Oxyacantha*.

cratch[2], *n.* **3†.** In *astron.*, the star-cluster known as Præsepe (the Manger) in the constellation Cancer.

crate, *n.* **3.** In *glass-manuf.*, a lot of twelve tables or disks of crown-glass. See *table*, 1 (*d*).

crate (krāt), *v. t.* To put or pack in a crate for transportation: as, to *crate* fruit, furniture, etc.

crater, *n.*—**Bell crater**, in Greek vases, a crater which has the form of a modern bell. This type is usually followed in the marble Roman vases. See *crater* 1, with cut.—**Crater basin**: (*a*) A depressed area in which volcanic craters occur. (*b*) A caldera.—**Crater of an arc.** Same as *crater*, 6.—**Explosion crater**, a large cavity or caldera in a volcanic cone, caused by a violent eruption.

crater-chain (krā'tėr-chān), *n.* A series of volcanic craters, nearly in a line.

Sixteen were lava-cones. . .; but the *crater-chains* numbered not less than eighty-three.
Geog. Jour. (R. G. S.), XIII. 503.

crater-lake (krā'tėr-lāk), *n.* A deep lake occupying the crater or caldera of a volcano.

crater-wall (krā'tėr-wâl), *n.* The inclosing rock wall of a crater; as sometimes used, the steep in-face of this bounding wall. The ordinary crater of the basalt-volcano is pit-like, with the walls often nearly vertical, and the floor may be a great nearly level plane of solid lava. *Dana*, Characteristics of Volcanoes, p. 150.

Craticularia (kra-tik-ū-lā'ri-ä), *n.* [NL., < L. *craticulus*, dim. of *cratis*, wickerwork, grating, hurdle: see *crate*, *grate*[2], and *griddle*.] A genus of fossil hexactinellid sponges of the family *Craticulariidæ*, occurring in the Mesozoic and Lower Tertiary rocks.

cravenette (krā-ven-et'), *n.* [Trade-mark name.] A cloth made of yarn subjected to a special process that renders the woven material waterproof.

cravo (krā'vō), *n.* [Pg., lit. a nail, < L. *clavus*, a nail: see *clavus*, *clove*[4].] The mariposa fish.

crawcraw (krâ'krâ), *n.* [W. Afr. **krakra*.] A pruriginous skin-disease, probably parasitic, which affects chiefly the inner side of the thighs. It occurs on the west coast of Africa.

crawfish, *n.* **3.** One who backs out from a position or undertaking, especially in politics. [U. S. slang.]—**Blind crawfish**, *Cambarus pellucidus*,

which lives in the Mammoth Cave.—**Spiny crawfish**, the largest fresh-water crawfish of Australia, *Astacopsis serratus*.

crawl[1], *v. i.*—**To crawl off** (*naut.*), to work a vessel slowly away from a lee shore.

crawl-a-bottom, *n.* **2.** A small percoid fish, *Hadropterus nigrofasciatus*, found in fresh water from South Carolina to Louisiana. [Local, U. S.]

crawler, *n.* **3.** A person or thing that moves slowly; particularly, a cab that moves along a street very slowly on the outlook for a fare. [Colloq.]

crawley (krâ'li), *n.* Same as *crawley-root*. **False crawley**, the Albany beech-drops or pine-drops, *Pterospora andromedea*. See *Pterospora*.

crayon-board (krā'on-bōrd), *n.* A cardboard for crayon or pastel, usually with a tooth or roughened surface. See ★*tooth*, 11.

crazia (krät'sē-ä), *n.*; pl. *crazie* (-ā). [It., < G. *kreuzer, kreutzer*: see *kreutzer*.] A subsidiary coin of Tuscany, the twelfth part of a lira, equal to 1.67 United States cents.

crazy-chain (krā'zi-chān), *n.* In *forestry*, the short chain used to hold up that tongue of a sprinkler-sled which is not in use.

crazy-grass (krā'zi-gras), *n.* See ★*canary-grass*.

cream[1], *n.*—**Alumina cream.** See ★*alumina*.—**Bavarian cream**, a dessert composed of gelatin and whipped cream added to a custard: flavored variously and served cold.—**Cream caustic.** See ★*caustic*.—**Cream of lime**, (*b*) slaked lime mixed with water to a cream-like consistence.—**Devonshire cream.** Same as *clotted cream*. See *clot*[1].—**Evaporated cream**, in *dairying*, a trade-name for condensed cream, which resembles condensed milk.—**Neapolitan cream**, an ice-cream in which two kinds of cream and an ice are frozen in one block.

cream[1], *v. t.* **4.** To work and beat until it becomes smooth and light, forming a creamy mass. Butter is often so treated before it is mixed with other ingredients.—**5.** In *cookery* generally, to prepare in a cream sauce (chicken, oysters, etc.): frequently for use as filling for molds of puff-paste or of bread.

creamer, *n.* **3.** A refrigerator or cooling-cabinet in which fresh milk, placed in deep cylindrical cans, is kept cool by means of ice or cold water while the cream rises naturally. **Helmet creamer**, a cream-jug shaped like an inverted helmet, of Chinese porcelain, commonly, but improperly, ascribed to Lowestoft, England.

creameryman (krē'me-ri-man), *n.* A man who owns or operates a creamery. *Yearbook U. S. Dept. Agr.*, 1897, p. 17.

cream-gage (krēm'gāj), *n.* A graduated glass vessel, resembling a test-tube, used to measure the percentage of cream in milk.

creaming (krē'ming), *n.* **1.** The formation of cream; the rising of any liquid in cream or foam.—**2.** An artificial or mechanical process for separating cream from milk.

cream-sacs (krēm'saks), *n.* A species of owl's-clover, *Orthocarpus lithospermoides*: so named from the cream-colored corolla developed into three sacs. [California.]

cream-separator (krēm'sep″a-rā-tor), *n.* See *separator*.—**Gravity cream-separator**, a vessel designed to hold fresh milk while the milk is separating from the cream by gravity. It is a closed vessel, fitted with a strainer, draw-cocks, and glass indicators to show the position of the contents and the proportions of the separating milk and cream during the process.

creaser, *n.* **4.** A tool having a thin triangular head, used to crease leather.

creat[2] (krē'at), *n.* [Also *creyat*; < Canarese *kreata*.] An annual acanthaceous herb, *Erianthera paniculata* (*Justicia paniculata* of Burman), native to India and Ceylon, where it is sometimes cultivated in gardens. In Mauritius and the West Indies it has escaped from cultivation, becoming a weed. It is used medicinally as a bitter tonic like quassia.

creatinic, kreatinic (krē-a-tin'ik), *a.* Relating to creatin. *C. E. Simon*, Physiol. Chem., p. 84.

creation, *n.*—**The doctrine of continuous creation.** (*a*) The doctrine that the creative energy of the Deity alone keeps the universe in existence: an opinion adopted by St. Augustine and from him passing to some of the scholastics and to Descartes and his followers, including Spinoza and Leibnitz, and widely held by more modern theologians. (*b*) The opinion or hypothesis that the variety of creation is perpetually increasing in consequence of the fact that the regularity of nature is not absolute or does not extend to all events.

creationalism (krē-ā'shon-al-izm), *n.* Same as *creationism*. *Science*, July 5, 1901, p. 15.

creationalistic (krē-ā″shon-a-lis'tik), *a.* Pertaining to or of the nature of creationism.

creationary (krē-ā'shon-ā-ri), *a.* [*creation* + *-ary*[1].] Pertaining to creationism. *Athenæum*, Oct. 27, 1894.

creation-myth (krē-ā'shon-mith), *n.* A myth explaining the creation of the world: sometimes used in opposition to *transformation-myth*, a myth which explains the present form of the world by a series of transformations from a previous stage.

creativity (krē-a-tiv'i-ti), *n.* [*creative* + *-ity*.] Creativeness.

creatophagous (krē-a-tof'a-gus), *a.* [Gr. *κρέας* (*κρεατ-*), flesh, + *φαγεῖν*, eat.] Same as *creophagous*.

creatospore (krē-at'ō-spōr), *n.* [Gr. *κρέας* (*κρεατ-*), flesh (used for the 'meat' of a nut), + *σπορά*, seed.] In *phytogeog.*, a plant which bears nut fruits and is thus adapted to distribution by rodents. *F. E. Clements.*

creatoxicon, kreatoxicon (krē-a-tok'si-kon), *n.* [Gr. *κρέα(ς)* (*κρεατ-*), flesh, + *τοξικόν*, poison.] A poisonous substance, the cause of meat-poisoning. *Vaughan and Novy*, Cellular Toxins, p. 188.

creatoxin, kreatoxin (krē-a-tok'sin), *n.* [*creatox(icon)* + *-in*[2].] A substance concerned in meat-poisoning. *Vaughan and Novy*, Cellular Toxins, p. 188.

creatoxism, kreatoxism (krē-a-tok'sizm), *n.* [Gr. *κρέα(ς)* (*κρεατ-*), flesh, + *τοξ(ικόν)*, poison, + *-ism*.] Poisoning by tainted meat.

creaturism (krē'tūr-izm), *n.* [*creature* + *-ism*.] The ascription to God of creature qualities and attributes.

creaturist (krē'tūr-ist), *n.* [*creature* + *-ist*.] One who ascribes creature qualities to God.

crèche, *n.* **3.** A representation of the Holy Family, with the babe in the manger, and the ox and ass, modeled in full relief and colored: usually exhibited at Christmas-time in the parish church.

credently (krē'dent-li), *adv.* Believingly. *Carlyle.*

credit, *n.*—**Contra credit.** See ★*contra*.—**Credit bureau.** See *mercantile* ★*agency*.—**Credit entry**, in *bookkeeping*, an entry on the credit side of an account.—**Credit gild**, an organization of farmers in Japan for the promotion of their common interests, and through which its members may obtain loans on favorable terms. *Sci. Amer. Sup.*, Aug. 27, 1904, p. 23,959.—**Credit item**, in *bookkeeping*, an item to be entered on the credit side of an account.—**Credit system**, the system of buying and selling on credit.—**Paper credit**, credit given on the security of a written obligation purporting to represent property, such as I O U's, book-debts, bills of exchange, etc.

creditive (kred'i-tiv), *a.* [*credit* + *-ive*.] Of the nature of or connected with belief: as, *creditive* assent.

The faith is a wholly transactional matter toward God himself, and no mere *creditive* assent or conviction.
Bushnell, Sermons on Living Subjects, Sermon iii.

creditor, *n.*—**Chirographary creditor**, the holder of evidence of debt acknowledged by the handwriting of the debtor.

Cree (krē), *n.* and *a.* **I.** *n.* A member of a branch of the Algonkian (or Algonkin) Indians. See *Cree* and *Algonquian* in Century Cyclopedia of Names.

II. *a.* Of or pertaining to the Crees.

creed-bound (krēd'bound), *a.* Having a servile respect for creeds; slavishly obedient to a creed. *N. E. D.*

creed-monger (krēd'mung″gėr), *n.* Literally, one who deals in creeds; one who is devoted to the formulation of creeds.

creeker (krē'kėr), *n.* A local name for the spotted sandpiper, *Actitis macularia*: given from its habit of frequenting the borders of small streams.

creek-sedge (krēk'sej), *n.* A salt-marsh grass, *Spartina glabra*, abounding particularly along the edge of creeks and estuaries on the Atlantic coast. Also called *thatchy grass*. See *Spartina*.

creek-stuff (krēk'stuf), *n.* See *Spartina*.

creek-thatch (krēk'thach), *n.* See *Spartina*.

creeler (krē'lėr), *n.* One who attends to the creel of a spinning-machine.

creep, *v. i.* **8.** In *chem.*, to rise above the surface of the liquid upon the walls of the containing-vessel, like salt crystals in an evaporating-dish.

creep, *n.* **4.** Same as *creeper*, 6 (*b*). *G. E. Armstrong*, Torpedos and Torpedo-vessels, p. 134.—**5.** In *geol.*, the extremely slow downward movement of disintegrated rock on hillsides. Ground-water, frost, and changes of temperature are the chief factors in such movement.

When the movement is too slow to be sensible it is called *creep*. *Chamberlin and Salisbury*, Geol., I. 218.

Crust-creep, in *geol.*, the slow movement of a large portion of the earth's crust under compressive strain along a reversed or thrust fault.

Gigantic *crust-creep* of overthrust masses.
Geog. Jour. (R. G. S.), XVI. 461.

Tangential creep, in *geol.*, lateral movement of formations; displacement in a horizontal direction by expansion or contraction.

He attributes the *tangential creep* to the transference of material by denudation from one place to another, promoting subsidence, heating of the lower layers, and lateral expansion, with consequent crumpling of the strata. *Knowledge*, Feb., 1904, p. 9.

creeper, *n.*, **6.** (*j*) *pl.* Small andirons or fire-dogs placed between large ones.

10. The sandworm, *Nereis virens*. [Eng.]—**Bow-string creeper.** Same as *jetee*.—**Chain-creeper**, a woody-stemmed, leguminous vine, *Bauhinia splendens*, of northern South America. The stems are extremely flexible and tough, so that they can be used like cords, being more durable than iron nails or chains, which in the damp atmosphere soon rust and give way. Strips of the bark are made into a coarse kind of cordage. Also called *bejuco de cadena*.—**Rajmahal creeper.** Same as *jetee*.

creeper-chain (krē'pėr-chān), *n.* An endless chain provided with projecting hooks or fingers: used in moving mine-cars horizontally or on inclines. *G. W. Hughes*, Coal Mining, p. 465.

creeping, *n.* **2.** Stalking or still-hunting, as for moose or deer. *Earl of Dunraven*, in Sport with Gun and Rod, p. 20.—**3.** Motion of the rails of a railroad in the direction of traffic, due to a number of causes. The usual preventive measure is to notch the foot of the rail, and put through this notch the spike which holds the rail to the tie or sleeper.

4. The slip of a belt or rope which is driving one pulley from another: due to working or elasticity in the belt or rope.—**5.** In *elect.*, the slow drifting or moving of an instrument or meter at no load, due to inaccurate adjustment or to a slow change of the suspension.—**6.** In *geol.*, same as ★*creep*, 5.

creeping-bur (krē'ping-bėr), *n.* The ground-pine or club-moss, *Lycopodium clavatum*. Also called *creeping-jenny*.

creeping-fern (krē'ping-fėrn), *n.* See *climbing-fern*.

creeping-jenny, *n.* **2.** Same as ★*creeping-bur*.

creese (krēs), *v. t.* [Also *crease, kris*, < *creese*, *n.*] To kill by stabbing with a creese (which see).

cremaster, *n.* **4.** In marsupials a muscle which compresses the mammary gland and forces the milk down the gullet of the young while in the pouch.

cremastral (krē-mas'tral), *a.* [*cremaster* + *-al*[1].] Pertaining to the cremaster of insects. *Natural Science*, Jan. 1878, p. 16.

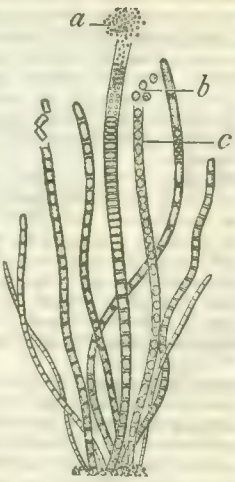
crême (krām), *n.* [F.: see *cream*[1], *n.*] **1.** A cream: a term used especially in the names of certain cordials, as *créme de menthe*. See *cream*[1], 6.—**2.** In *cookery*, meat, fish or vegetables baked in white sauce and covered with bread-crumbs.—**Crême brulée**, caramel or browned sugar with cream.—**Crême de cacao** [F.], a liqueur of the oily consistency known as *crême*, flavored with cacao or chocolate.

cremnophobia (krem-nō-fō'bi-ä), *n.* [NL., < Gr. *κρημνός*, a steep bank, a cliff, + *-φοβία*, < *φοβεῖν*, fear.] Morbid fear of being near the edge of a cliff or precipice.

cremometer (krē-mom'e-tėr), *n.* [E. *cream* (with assumed stem *crem-*) + Gr. *μέτρον*, measure.] In *dairying*, a graduated test-tube used in estimating the proportion of cream in milk. Fresh milk warmed to 100° F. is placed in the tube, filling it to the zero mark, and left to stand in it, in a cool place, for twenty-four hours, by which time the percentage of cream will be plainly indicated by the scale.

Cremona transformation. See ★*transformation*.

Cremorne bolt. See ★*bolt*[1].



crena, *n.* **3.** In *bot.*, a tooth or notch of a crenate leaf. **Crena ani**, the fissure between the nates.

Crenipecten (kren-i-pek'ten), *n.* [NL., < L. *crena*, a notch, + NL. *Pecten*, a genus of pelecypods, < L. *pecten*, a comb: see *pecten*.] A Carboniferous genus of pectenoid *Pelecypoda* with taxodont hinge.

crenitic (krē-nit'ik), *a.* [Gr. *κρηνῖτις*, adj., < *κρήνη*, a spring.] In *geol.*, of or pertaining to springs.—**Crenitic hypothesis**, a hypothesis formulated by T. S. Hunt to explain the origin of the crystalline schists. It assumed that the earth, in cooling from a molten condition, had solidified but was still hot: heated waters rising from the depths and charged with mineral matter deposited at the surface successive layers which contained an abundance of zeolites; subsequently the zeolites became feldspars, occasioning thus the banded nature of the schists.

Crenothrix (kren'ō-thriks), *n.* [NL. (Cohn, 1870), < Gr. *κρήνη*, a spring, + *θρίξ*, a hair.

These bacteria have a hair-like form and occur in springs.] A genus of filamentous non-motile bacteria having cylindrical or flat cells inclosed in a sheath. Reproduction takes place by means of two kinds of spores produced from the vegetative cells within the filaments. The single species, *C. polyspora*, occurs in stagnant or running water containing organic matter and iron salts.

Crenothrix polyspora.
Highly magnified. (After Zopf.) *a*, arthrospores; *b*, single segments; *c*, common sheath surrounding the separate spores. (From Frankland's "Micro-Organisms in Water.")

crenule (kren′ūl), *n.* [NL. *crenula*, dim. of L. *crena*, a notch: see *crena*.] In *bot.*, a diminutive crena.

creoform (krē′ō-fôrm), *n.* [*creo(sote)* + *form(aldehyde)*.] A non-toxic tasteless and odorless condensation-product of creosote and formaldehyde. It is a strong antiseptic. Also called *geoform* and *cresoform*.

creole, *n.* 3. In *ichth.*, the genizara, *Clepticus parræ*, found in the West Indies.

creole-fish (krē′ōl-fish), *n.* A beautiful fish, *Paranthias furcifer*, of tropical American waters.

creolinated (krē′ō-lin-ā″ted), *a.* [*creolin* + *-ate*[1] + *-ed*[2].] Mixed or impregnated with creolin: as, *creolinated* soap.

creolin (krē′ō-lin), *n.* [*creo(sote)* + *-l-* + *-in*[2].] The trade-name of two different commercial products: (*a*) *Pearson's creolin*, a mixture of coal-tar hydrocarbons (and probably phenols) with resin soap; (*b*) *Artmann's creolin*, a mixture of coal-tar hydrocarbons with cresol-sulphonic acid. They are used as antiseptic washes.

creolism (krē′ō-lizm), *n.* [*creole* + *-ism*.] The condition and characteristics, physical and mental, of creoles. *Athenæum*, Oct. 7, 1893.

creolization (krē″ō-lī-zā′shọn), *n.* [*creolize* + *-ation*.] The development of characteristics of a creole race.

> The subject race had . . . been physically refined by those extraordinary influences of climate and environment which produce the phenomena of *creolization*.
> *Harper's Mag.*, Feb., 1890, p. 416.

creolize (krē′ō-līz), *v. i.*; pret. and pp. *creolized*, ppr. *creolizing*. [*creole* + *-ize*.] To play the creole; imitate or fall in with the manners, customs, habits, etc., of the creoles, especially as regards an easy manner of living.

> The ladies . . . generally *creolize* the whole day in a delectable state of apathy.
> *J. McLeod*, Voyage of Alceste, p. 190.

creophagism (krē-of′a-jizm), *n.* [Also *kreo-*; < *creophag-ous* + *-ism*.] The practice of using flesh as food. Also *kreophagism*.

> *Kreophagism* leads to alcoholism, and still more to immorality. *Saturday Rev.*, Nov. 5, 1881, p. 570.

creophagist (krē-of′a-jist), *n.* [Also *kreo-*; < *creophag-ous* + *-ism*.] A flesh-eater; one who uses flesh as food.

creosal (krē′ō-sal), *n.* [*creos(ote)* + *-al*[3].] The trade-name of a tannic-acid ester of creosote. It is a dark-brown astringent powder, and is used medicinally in cases of pulmonary tuberculosis and in certain intestinal troubles.

creosine (krē′ō-sin), *n.* [*creos(ote)* + *-ine*[2].] A yellow transparent non-irritating fluid composed of creosote, iodine, calcium hypophosphite, and balsam of Peru: used internally in phthisis, bronchitis, etc.

creosoform (krē-ō′sọ-fôrm), *n.* [*creoso(te)* + *form(aldehyde)*.] Same as ★*creoform*.

creosote, *n.*—**Coal-tar creosote,** impure phenol or carbolic acid: quite distinct from the genuine creosote of wood-tar.—**Creosote oil.** See ★*oil*.

creosotol (krē′ō-sō-tol), *n.* [*creosote* + *-ol*.] A thick brownish inodorous oil analogous to guaiacol carbonate, but made directly from beech-wood creosote.

creotoxism (krē-ō-tok′sizm), *n.* Same as ★*creatoxism*.

crêpe, *n.*—**Crêpe de chine** [F., 'China crape'], a very thin, lustrous dress-silk.

crêpe (krāp), *v. t.*; pret. and pp. *créped*, ppr. *créping*. [F. *créper*, < L. *crispare*, curl: see *crêpe*, *n.*, *crape*, and *crisp*, *v.*] To curl; crimp; buckle; put up in curl-papers; frizz: as, to *crêpe* the hair.

crêpé (kre-pā′), *p. a.* [F.] Frizzed.

crepidome (krep′i-dōm), *n.* [NL. *crepidoma*, < Gr. *κρηπίδωμα*, a foundation: see *crepidoma*.] In the nomenclature of the spicular elements of sponges, an inceptive condition or stage in the growth of the irregular tetraxial spicules in which the tetraxial or caltrop type is manifested.

crepis, *n.* 2. In sponge-spicules, the central axis of a desma. *Lankester*, Treatise on Zool., II. 134.

crepitation, *n.* 5. The peculiar crackling sensation felt on palpation of emphysematous tissues.

cresalol (kres′a-lōl), *n.* [*cres(ol)* + *-al*[3] + *-ol*.] A group of ortho-, meta-, and para-salicylic esters of cresols. They form bulky white crystals, and are used as antiseptic dusting-powders.

crescence-line (kres′ens-līn), *n.* In the pelecypod mollusks, the line of most rapid growth of the shell. It usually extends on each valve from the umbo obliquely backward to the post-lateral margin.

crescent, *n.* 4. (*d*) In *anat.*, one of the cornua of gray matter in the spinal cord. (*e*) In *pathol.*, a sexual form of the plasmodium malariæ.

9. (*a*) The curved, sausage-shaped gametocyte of *Laverania*, the parasite of pernicious ★malaria (which see, with cut). (*b*) In certain extinct cardioid pelecypods, a lunate flattening of the shell-surface just behind the beaks. It specially characterizes the Devonian genus *Honeoyea*. (*c*) In the extinct trimerellid brachiopods, a curved and narrow muscular scar on each valve just within the cardinal margin.

10. In plate-armor, one of the small pieces of steel used to protect joints. See *gusset* (a).

Malarial crescent. Same as ★*crescent*, 4 (*e*).—**Myopic crescent,** a crescentic yellowish patch about the papilla of the optic nerve, due to atrophy or detachment of the choroid.

crescentic, *a.* 2. In *geol.*, noting certain crescentiform marks or 'gouges' attributed to the action of glacial ice. They are thought to be due to localized pressure, as in the process of gouging, and are therefore sometimes called *crescentic gouges*. *G. K. Gilbert*, in Science, Dec. 23, 1904, p. 894.

cresegol (kres′ē-gōl), *n.* A brownish-red stable organic compound of mercury, said to precipitate toxins but not albumins: used as a substitute for mercuric chlorid as a bactericide.

cresilite (kres′i-līt), *n.* [F. *crésilite*; as *cres(ol)* + *-il-* + *-ite*[2].] An explosive consisting of trinitrocresol mixed with melinite: used in France.

Cresol red. See ★*red*[1].

cresolene (kres′ọ-lēn), *n.* [*cresol* + *-ene*.] A trade-name for anisol, or methyl-phenyl ether, $C_6H_5OCH_3$, used as a disinfectant.

cresorcin (kres-ôr′sin), *n.* [*cres(ol)* + *orcin*.] Methyl phendiol-2,4, $C_6H_3(OH)_2CH_3$, or dihydroxytoluene. It is a crystalline dibasic phenol, which melts at 104° C.

cresorcinol (krē-sôr′si-nōl), *n.* Same as ★*isorcinol*.

cresotate (kres′ọ-tāt), *n.* [*cres(ol)* + *-ote* + *-ate*[1].] Same as ★*cresylate*.

cresotinic (kres-ọ-tin′ik), *a.* [*cres(ol)* + *-ote* + *-in*[2] + *-ic*.] Derived from cresol.—**Cresotinic acid,** the name given to three isomeric acids formed by the action of carbon dioxid on the sodium salts of the cresols: α-cresotinic acid is 4-hydroxy-m-toluic acid, $C_6H_3(OH)(CH_3)CO_2H(4:1:3)$; β-cresotinic acid is 2-hydroxy-m-toluic acid, $C_6H_3(OH)(CH_3)CO_2H(2:1:3)$; γ-cresotinic acid is 3-hydroxy-p-toluic acid, $C_6H_3(OH)(CH_3)CO_2H(3:1:4)$. The acids melt at 151°, 164°, and 177° C. respectively.

Cresphontes butterfly. See ★*butterfly*.

cress, *n.*—**French cress,** the winter cress, *Campe Barbarea*.—**Leek-cress,** the hedge-garlic or garlic mustard, *Alliaria Alliaria*.—**Meadow-cress.** (*a*) See *meadow-cress*. (*b*) The common garden-cress, *Lepidium sativum*.—**Mouse-ear cress.** See *thale-cress*.—**Para cress,** a pungent cruciferous plant, *Spilanthes oleracea*, originally from the West Indies, replacing water-cress in hot countries. See *Spilanthes*.—**Rocket cress.** Same as *French* ★*cress*.—**Yellow cress.** See *yellow cress*, under *yellow*.

cressed (krest), *a.* [*cress* + *-ed*[2].] Bordered with water-cresses.

> *Cressed* brook and ever-eddying river, lifted even in flood scarcely over its stepping-stones,—but through all sweet summer keeping tremulous music with harp-strings of dark water. *Ruskin*, Modern Painters, V. vii. 4.

cresset-lamp (kres′et-lamp), *n.* Same as *cresset*.

cresswort (kres′wėrt), *n.* Any plant of the mustard family *Brassicaceæ*, to which the cress also belongs. *Lindley*. [Rare.]

crest, *n.* 2. (*j*) The design, generally that of an animal, which constitutes the heraldic bearings of a social group among primitive tribes. The crest belongs often to an exogamic group and is related to the totem. (*k*) The summit of a river-flood wave.—**Crest and trough,** the alternately occurring regions situated half a wave-length apart in any wave-system where the displacements of the vibrating medium reach a maximum but are opposite in direction.—**Crest of the urethra.** Same as *crista urethræ*.—**Cross crest,** a fold of enamel running transversely across the face of a tooth.—**Ethmoid crest.** Same as *crista galli*.—**Exterior crest.** See drawing, under *parapet*.—**Neural crest,** in the vertebrate embryo, the ridge-like dorsal portion of the neural tube where it is cut off from the general integumentary ectoderm and gives rise to the spinal ganglia. See cut, under ★*cœlomesoblast*.—**Nuchal crest,** a crest of hair or feathers on the nape of the neck, as in a few birds and some mammals.—**Orbital crest,** the lower edge of the orbital surface of the sphenoid bone.—**Procnemial crest,** in *ornith.*, the large crest for the attachment of muscles on the superior end and anterior face of the tibia.—**Sphenomaxillary crest,** a bony ridge forming the margin of the sphenomaxillary fissure.—**Supramastoid crest,** a bony ridge on the temporal bone just above the meatus auditorius.—**Temporal crest,** in *anat.*, the line which extends from the outer angles of the frontal bone upward over the frontal and parietals. Also called *linea semicircularis*.

crest-board (krest′bōrd), *n.* 1. An ornamental board which forms the cresting or crossing of a roof.—2. A similar board set along the sloping edge of a gable and rising like a parapet above the roof: an erroneous use.

creston (kres-tōn′), *n.* [Sp., crest of a helmet.] In *mining geol.*, the outcrop of a vein: used along the Mexican boundary.

cresyl (kres′il), *n.* [*cres(ol)* + *-yl*.] A substance derived from cresol.—**Cresyl blue.** See ★*blue*, *n.*—**Cresyl fast violet.** See ★*violet*[1].

cresylate (krē′si-lāt), *n.* [*cresyl* + *-ate*[1].] A salt of cresylic acid: as, *cresylate* of sodium.

cresyol (kres′i-ōl), *n.* Same as ★*cresyl*.

creta (krē′tą), *n.* [L.: see *cretaceous*, *crayon*.] Chalk.—**Creta præparata** (prepared chalk), chalk freed from impurities and finely pulverized.

cretaceous, *a.* 3. In *bot.*: (*a*) Chalky, or having chalk-glands, as in some species of *Saxifraga*. (*b*) Of a chalky color; dead-white.

cretification (krē-ti-fi-kā′shọn), *n.* [*cretify* (*-fic-*) + *-ation*.] 1. Same as *cretefaction*.—2. Same as *calcification*, 2.

cretinize (krē′ti-nīz), *v. t.*; pret. and pp. *cretinized*, ppr. *cretinizing*. [*cretin* + *-ize*.] To reduce to the condition of a cretin. See *cretinism*.

> The wretched look of the dwarfed, diseased and *cretinized* inhabitants. *Freeman*.

cretinoid (krē′ti-noid), *a.* [*cretin* + *-oid*.] Resembling, in symptoms, a cretin.—**Cretinoid disease.** Same as *myxedema*.

cretinous (krē′tin-us), *a.* [*cretin* + *-ous*.] Relating to cretinism or to a cretin.

> *Cretinous* idiots, who are born without thyroid glands. *Encyc. Brit.*, XXXI. 540.

cretion (krē′shọn), *n.* [L. *crētio(n-)*, < *cernere* (pp. *cretus*), decide: see ★*cern*[2] and cf. *discrete*, etc.] In *Rom. law*, the act of cerning and the time allowed for it. See ★*cern*[2].

cretol (krē′tōl), *n.* [L. *creta*, chalk, + *-ol*.] A preparation suggested for the destruction of various obnoxious organisms, such as the larvæ and pupæ of mosquitoes.

Creto-Mycenæan (krē″tō-mī-sē-nē′an), *a.* Pertaining to both Crete and Mycenæ: applied to the Cretan phase of the Mycenæan or early prehistoric Hellenic civilization. Many excavations have recently been undertaken in Crete by English and Italian archæologists.

cretous (krē′tus), *a.* Same as *cretose*. [Rare.]

crevally (kre-val′i), *n.* Same as *cavally*.

crevasse, *n.*—**Crevasse cycle,** the sequence of changes which a series of crevasses passes through in the movement of a glacier. *Science*, May 20, 1904, p. 786.

crevasse (kre-vas′), *v. t.*; pret. and pp. *crevassed*, ppr. *crevassing*. To rend, as the surface of a glacier, with fissures and cracks.

> This high isolated drumlin and lower accumulations . . . are evidence of the wrenching and *crevassing* at the turning spot. *Dana*, Manual of Geol., p. 971.

crewellery (krö′el-ėr-i), *n.* [*crewel* + *-ery*.] Crewel-work. *N. E. D.*

crew-space (krö′spās), *n.* *Naut.*, space in a vessel specifically assigned and reserved as quarters for the crew. Each space must have not less than 72 cubic feet, with 12 square feet of floor for each person lodged therein, and no cargo or stores may be carried in such spaces.

crib[1], *n.* 11. The frames may rest one on the other, forming a solid lining, or *solid cribbing*, or they may be spaced at convenient intervals, making what is called an *open cribbing*. In the latter case a lining or backing of planks or of poles is used. At intervals *bearing cribs*, frames with ends projecting into the solid rock, are used to support the weight of the shaft-lining. *Wedging cribs* are heavy frames used as the foundation for a water-tight shaft-lining (tubbing), the space behind the wedging crib being wedged water-tight. *Garland curbs* are provided with horizontal gutters to intercept the water flowing down inside the shaft-lining. Also called *curb*.—**To balk the crib.** See ★*balk*.

crib[1], *v. t.* **5.** To make up (logs, boards, or staves) into small rafts or cribs to be united later into a large raft. [United States and Canada.]

cribbage, *n.*—**Five-card cribbage,** a variety of cribbage in which each player receives only five cards, two of which are laid out for the crib, the play stopping as soon as a 'go' or 31 is reached.

cribber, *n.* **2.** A device which is buckled around a horse's throat to prevent cribbing. The under side, which bears against the horse's throat, is provided with sharp points which are held back by springs to prevent them from pricking unless the horse attempts to crib.

cribbing-muzzle (krib'ing-muz″l), *n.* An open wire muzzle which is held in place over a horse's mouth by a halter, to prevent cribbing.

cribral (krib'ral), *a.* [*cribrum* + *-al*[1].] Relating to a cribrum or any sieve-like structure. *Science,* June 7, 1901, p. 888.

Cribraria (kri-brā'ri-ä), *n.* [NL. (Schrader, 1791), < L. *cribrum,* a sieve.] A genus of slime-molds, type of the family *Cribrariaceæ,* having separate stipitate sporangia. The lower portion of the peridium is cup-shaped and the upper consists of a network of thick-celled strands, which suggest the name. The spores are variously colored.

Cribraria piriformis. (From Engler and Prantl's "Pflanzenfamilien.")

Cribrariaceæ (krī-brā-ri-ā'-sē-ē), *n. pl.* [NL., < *Cribraria* + *-aceæ.*] A family of slime-molds named from the genus *Cribraria.* The peridia are mostly stipitate and have radiate or stellate thickenings. The thinner intermediate portions disappear at maturity, leaving a more or less spherical network. See ★*Cribraria.*

Cribriform area. See ★*area.*—**Cribriform organ,** in *Stelleroidea,* one of the densely packed groups of small spinelets or lamellæ found on some or all of the marginal plates, especially in *Porcellanasteridæ.* The function of the organ is unknown, but it may act as a percolator.

cribrilinidan (krib-ri-lin'i-dan), *a.* and *n.* **I.** *a.* Pertaining to or having the characters of the bryozoan family *Cribrilinidæ.*

II. *n.* A member of the *Cribrilinidæ.*

cricamphityle (kri-kam'fi-tīl), *n.* [Gr. *κρίκος,* a ring, + *ἀμφί,* on both ends, + *τύλη,* a lump.] In the nomenclature of the spicular elements of sponges, a monaxial spicule or rhabd with concentric swellings and blunt ends.

criccaltrop (kri-kal'trop), *n.* [Irreg. < Gr. *κρίκος,* a ring, + E. *caltrop.*] In the nomenclature of the spicular elements of sponges, a caltrop in which the arms bear series of concentric rings.

crick[3] (krik), *v. t.* [*crick*[3], *n.*] To wrench or sprain: as, to *crick* one's neck.

cricket[1], *n.*—**Agitating cricket,** an American gryllid, *Hapithus agitator,* which occasionally damages young cotton-plants in the southern United States.—**Banded cricket,** an American gryllid, *Nemobius fasciatus,* which occasionally injures the cotton-plant.—**Black cricket,** any member of the family *Gryllidæ* which is black in color, like *Gryllus assimilis.*—**Mormon cricket,** a wingless American locustid, *Anabrus simplex.* [Local, U. S.]—**Western cricket.** Same as *mormon* ★*cricket.*

cricket[2], *n.*—**Double-wicket cricket,** the ordinary form of modern cricket, which requires two wickets, and a batsman at each: in contradistinction to *single-wicket cricket,* in which only one batsman bats at a time.

cricket-match (krik'et-mach), *n.* A contest at cricket between two sides of eleven players each, lasting usually from half a day to three days. That side wins which, two innings having been played by both sides, shall have scored the greatest aggregate of runs. See *cricket.*

cricket-teal (krik'et-tēl), *n.* **1.** See *teal*[1].—**2.** A local name of the European blue-winged teal, *Anas crecca.*

cricohyoid (krī-kō-hī'oid), *a.* [*crico(id)* + *hyoid.*] Relating to the hyoid bone and the cricoid cartilage.

cricorhabd (krī'kō-rabd), *n.* [Gr. *κρίκος,* a ring, + *ῥάβδος,* a rod: see *rhabd.*] In the nomenclature of the spicular elements of sponges, a monaxial spicule or straight rhabd with concentric swellings.

cricostyle (krī'kō-stīl), *n.* [Gr. *κρίκος,* a ring, + *στῦλος,* a pillar, taken in sense of L. *stilus,* a pointed instrument.] A cricorhabd with sharp ends. See ★*cricorhabd.*

cricotomy (krī-kot'ō-mi), *n.* [*crico(id)* + Gr. *-τομία,* < *ταμεῖν,* cut.] Division of the cricoid cartilage in laryngotomy.

cricotracheal (krī-kō-trā'kē-al), *a.* [*crico(id)* + *tracheal.*] Relating to both the cricoid cartilage and the rings of the trachea.

cricotriæne (krī-kō-trī'ēn), *n.* [Gr. *κρίκος,* a ring, + *τρίαινα,* a trident.] In the nomenclature of the spicular elements of sponges, a triæne in which the four arms bear series of concentric wrinkles. See *triæne* and ★*criccaltrop.*

criminal, *a.*—**Central Criminal Court.** See ★*court.*—**Criminal code.** See ★*code.*

criminaloid (krim'i-nal-oid), *a.* and *n.* [*criminal* + *-oid.*] **I.** *a.* Similar to a criminal.

II. *n.* A person who in physique is similar to the criminal type, that is, the type which is believed to predispose to criminal acts.

The scientifically trained and practically experienced examiner . . . can, moreover, by the same means [a physical examination] exclude the criminals, *criminaloids,* and the degenerates.

Buck, Med. Handbook, VI. 181.

criminogenesis (krim″i-nō-jen'e-sis), *n.* [L. *crimen* (*crimin-*), crime, + *γένεσις,* origin.] The origin of crime. *Baldwin,* Dict. of Philos. and Psychol., I. 245.

criminography (krim-i-nog'ra-fi), *n.* [L. *crimen* (*crimin-*), crime, + *-γραφία,* < *γράφειν,* write.] The scientific description of crime, of its distribution, origin, and of the characteristics of criminals. *Baldwin,* Dict. of Philos. and Psychol., I. 245.

criminological (krim″i-nō-loj'i-kal), *a.* Of or pertaining to criminology.

criminology (krim-i-nol'ō-ji), *n.* The science of crime.

crimping-brake (krim'ping-brāk), *n.* In *shoe-manuf.,* a machine for crimping the vamps of shoes; a crimper. Also called *banging-iron.*

crimping-form (krim'ping-fôrm), *n.* A form on which vamps for boots may be crimped.

crimping-machine, *n.* **2.** In *sheet-metal work,* a hand- or power-machine for crimping the edges of box-covers, cans, and other tinware; a machine closely allied to the beading-machine, employing rolls to form a crimp or corrugation in sheet-metal.—**3.** A contrivance for crimping the tops of lamp-chimneys and other glassware.—**Double-head crimping-machine,** a power-machine for crimping both ends of a can at the same time.—**Upright crimping-machine,** one having horizontal crimping-rolls. It is adapted to crimping the edges of square as well as of round cans, the crimping-rolls following automatically the shape of the can, however irregular.

crimping-screw (krim'ping-skrō), *n.* A small, hand screw-press for crimping vamps.

crinanthropist (kri-nan'thrō-pist), *n.* [*crinanthrop-y* + *-ist.*] One who is in the habit of criticizing men. *N. E. D.*

crinanthropy (kri-nan'thrō-pi), *n.* [Irreg. < Gr. *κρίνειν,* judge, + *ἄνθρωπος,* man.] Criticism of men. *N. E. D.*

crine[2] (krin), *v. i.*; pret. and pp. *crined,* ppr. *crining.* [Appar. < Gael. *crìon,* wither, < *crìon,* withered, little, = Ir. *crìon,* earlier *crin,* = W. *crin* = Bret. *krin,* dry.] To shrink or shrivel up from dryness or heat, as in cooking. [Scotch.]

cringle, *n.*—**Bull's-eye cringle,** a cringle having a grooved ring of iron, called a *thimble,* around which the rope or wire is spliced.

crinid (krī'nid), *n.* [Gr. *κρίνον,* lily, + *-id*[2].] A crinoid.

criniferous (kri-nif'e-rus), *a.* [L. *crinis,* hair, + *ferre,* bear.] Bearing hair. [Rare.]

crinin, krinin (krin'in), *n.* [Irreg. < Gr. *κρίνειν,* separate, + *-in*[2].] A substance which will stimulate the secretion of certain glands, such as the pancreas, for example, secretin.

crinivorous (kri-niv'ō-rus), *a.* [L. *crinis,* hair, + *vorare,* devour.] Devouring hair. [Rare.]

crinogenic, krinogenic (kri-nō-jen'ik), *a.* Of or pertaining to crinin.

crinoline, *n.* **4.** A contrivance worn by divers in deep water to enable them to breathe more freely. It is placed round the body and tied in front of the stomach.

crinoline-mount (krin'ō-lin-mount), *n.* Same as ★*cage-mount.*

crinula (krin'ū-lä), *n.* [NL., dim. of L. *crinis,* hair: see *crine*[1].] In *bot.,* same as *elater*[2], 2.

crin végétal (kraṅ vā-zhā-tāl'). [F. *crin végétal,* 'vegetal hair': see *crine*[1] and *vegetal.*] The commercial name of the fiber obtained from the leaves of the dwarf fan-palm of southern Europe and northern Africa, *Chamærops humilis.* It is usually twisted, curled, and dyed to resemble curled horsehair, and is extensively used as a substitute for the latter in upholstery. See *hempalm,* and *vegetable horsehair,* under *vegetable.* *Hannan,* Textile Fibres of Com., p. 160.

crioboly (krī-ob'ō-li), *n.* [Also *kriobolу;* < Gr. **κριοβολία,* < *κριοβόλος,* ram-slaying, < *κριός,* ram, + *βάλλειν,* throw, cast.] A rite of the Phrygian worship performed by bathing in the blood of sacrificial rams. The practice was introduced into Rome during the early Empire.

Criophoros (krī-of'ō-ros), *n.* [Gr. *κριοφόρος,* < *κριός,* a ram, + *-φορος,* < *φέρειν,* bear.] In *Gr. myth.,* the ram-bearer, an epithet of Hermes, the ram being the animal especially sacrificed in his honor. There was a famous statue of Hermes Criophoros by Calamis at Tanagra in Bœotia.

cripple, *n.* **4.** A kind of temporary staging used by window-cleaners.—**5.** In *railroading,* a freight-car or other car which has been injured or damaged in its running gear or is for any other reason unfit for use. A car condemned by a car-inspector as a cripple must be cut out of its train and sent to the cripple-track. See ★*drill-yard.*

cripple-rafter (krip'l-râf″tėr), *n.* Same as ★*cripple-timber.*

cripple-stopper (krip'l-stop″ėr), *n.* A small gun used by sportsmen to kill wounded birds.

cripple-timber (krip'l-tim″bėr), *n.* In *roof-construction,* a timber made shorter, as required by the slope of the roof, so as to frame into a hip-rafter or valley-rafter. Often same as *jack-rafter.*

cripple-track (krip'l-trak), *n.* In *railroading,* a special track in a drill-yard for the storage or repair of cripples, or injured cars. Such tracks are provided with ample space on each side to enable the repairers to work about the cars. If the injury is serious, cripples are unloaded and sent from the cripple-tracks to the repair-shops.

cripple-window (krip'l-win″dō), *n.* A window built in or upon the slope of a roof, as a dormer-window of any form; also, an opening filled with a sash in the slope of the roof itself.

crisis, *n.* **3.** A paroxysm of acute localized pain or of functional disturbance of some organ accompanying tabes dorsalis or other degenerative affection of the spinal cord.—**Dietl's crises,** attacks of severe gastric distress in cases of wandering kidney.—**Gastric crisis,** a sudden attack of violent pain radiating from the region of the stomach, accompanied by nausea and vomiting, occurring sometimes in locomotor ataxia.—**Laryngeal crisis,** a convulsive cough, with hoarseness and severe pain in the larynx, occurring in the course of tabes dorsalis.

crispifloral (kris'pi-flō-ral), *a.* [L. *crispus,* curled, + *flos* (*flor-*), flower, + *-al*[1] (see *floral*).] Having crispate or curled flowers. *Jackson,* Glossary.

crispifoliate (kris-pi-fō'li-āt), *a.* [L. *crispus,* curled, + *folium,* leaf, + *-ate*[1] (see *foliate*).] Having crispate or curled leaves. *Jackson,* Glossary.

crista, *n.*, (*b*) In *anat.,* a ridge or crest for the attachment of a muscle. (*c*) A narrow fold of enamel directed inward and backward from a point near the meeting of the protoloph and ectoloph in such a tooth as that of a rhinoceros. See cut under ★*tooth.* (*d*) A cord-like longitudinal ridge on the dorsal surface of the egg-capsule of cockroaches. *A. S. Packard,* Text-book of Entom., p. 519.—**Crista ethmoidei,** in *ichth.,* the ethmoid: a median bone in front of the frontals and above the vomer. See cut under *Esox.* *Starks,* Synonymy of the Fish Skeleton, p. 509.—**Crista femoris.** Same as *linea aspera.*—**Crista helicis,** 'ridge of the helix,' the projection of the external ear just above the meatus, which divides the concha into two parts, the upper (cymba) and the lower (cavitas conchæ).—**Crista inferior,** in *ornith.,* the ridge along the proximal portion of the lower border of the humerus.—**Crista superior,** in *ornith.,* the marked ridge on the upper border for the attachment of the great pectoralis major.—**Crista tympanica,** 'tympanic ridge,' a roughened line on the annulus tympanicus which serves for the attachment of the drum membrane.—**Crista ulnæ,** 'ridge of the ulna'; the external border of the ulna.

critenchyma (kri-tengk'i-mä), *n.* [NL., < Gr. *κριτός,* separated, + *ἔγχυμα,* infusion: see ★*enchyma.*] In *bot.,* the tissue of the sheaths of fibrovascular bundles. *Jackson,* Glossary.

criteriology (krī-tē-ri-ol'ō-ji), *n.* [Gr. *κριτήριον,* criterion, + *-λογια,* < *λέγειν,* speak.] The doctrine of criteria or standards of judgment. See *criterion.*

Criterion of equilibrium, of kinetic stability. See ★*equilibrium, kinetic* ★*stability.*

Critical days, days on which the crisis of an acute disease may occur.—**Critical integer, mineral.** See ★*integer,* ★*mineral.*—**Critical period.** Same as *climacteric.*—**Critical point.** (*c*) In *math.,* a point where the slope of the graph of a function is zero or infinitely great.—**Critical pressure, solution, speed.** See ★*pressure,* etc.—**Critical state,** in *phys.,* the condition of unstable equilibrium between the vapor phase and the liquid phase, in which a substance exists when at its critical pressure and critical temperature.—**Critical temperature, tube, value,** etc. See ★*temperature,* etc.

criticism, *n.*—**Morellian criticism.** It was noticed by Giovanni Morelli (1816–91), the critic of Italian painting, that the old painters dropped unconsciously into mannerisms in the representation of details, both im-

portant and unimportant; each master, for instance, having a peculiar way of constructing a hand or an ear. Morelli used these peculiarities with good results to supplement the higher criticism of style, color, and composition in ascribing paintings to their proper authors. The method has been widely adopted in the criticism of art.

croaker, *n.*, **4.** (*e*) The little roncador. (*f*) Any fish of the sciænoid genus *Micropogon*, especially *M. undulatus*.—**Black croaker**, the red roncador.—**Post croaker.** Same as *spot*, 7 (*a*).—**Silver croaker**, a sciænoid fish, *Bairdiella chrysura*, found on the Atlantic coast of the United States.—**White croaker**, the queenfish.

Croatan group. See ★*group*[1].

crobylus, *n.* See *krobylos*.

crocard (krō-kärd′), *n.* [Also *crockard* (a modern spelling, but the word is not in modern use); ME. *crocard*, AF. *crokard*, prob. < ME. *crok*, a crock, a potsherd: see *crock*[1].] A base coin current in England in the time of Edward I.

croc-chien (krō-shyaṅ′), *n.* [Colonial F., for *croc de chien*, 'dog's fang' (from the hooked spines on the stems and leaves): F. *croc*, fang or tusk; *chien*, dog.] A common name in the West Indies of climbing palms of the genus *Desmoncus*.

Their stems and the petioles and midribs of the leaves are beset with hooked spines, making them very troublesome to one walking in a forest. See *Desmoncus*.

As the Spanish soldiers ran from the English, one of them was caught in the innumerable hooks of the *Croc-chien*. *Kingsley*, At Last, iii.

crocein (krō′sē-in), *n.* [*croce*(*ous*) + *-in*[2].] A name given to several acid coal-tar colors on account of the bright red they produce.—**Brilliant crocein M, 3B,** and **9B,** acid coal-tar colors of the disazo-sulphonic-acid type. They dye wool a bright bluish red from an acid bath, and are also used in coloring paper and, to a limited extent, in dyeing cotton.—**Crocein B** and **3B,** two acid coal-tar colors of the disazo type. The former is derived from amidoazo-benzine and the latter from azo-toluene. They dye wool red in an acid bath.—**Crocein 2B** or **3BX,** an acid coal-tar color of the monoazo type, derived from naphthionic acid. It dyes wool red in an acid bath. Also called *scarlet* 000.—**Crocein orange, scarlet.** See ★*orange*[1], ★*scarlet*.

crocetin, *n.* (*b*) An amorphous red product, $C_{34}H_{46}O_{11}$, obtained by heating crocin, the coloring matter of saffron (*Crocus sativus*), with dilute mineral acids.

crochet, *n.* **4.** A fold of enamel directed forward from the anterior edge of the median cross-crest (metaloph) in such a tooth as the molar of a rhinoceros. See cut under ★*tooth*.

crocine (krō′sin), *a.* [L. *crocinus*, < Gr. κρόκινος, < κρόκος, saffron: see *crocus*.] Of or pertaining to the crocus.

crock[2], *n.* **2.** In *cricket*, a worthless player. [Slang.]

crocketed, *a.* **2.** Having crockets, or terminal snags: said of stags' horns.

crocketing (krok′e-ting), *n.* **1.** In *arch.*, the system of crockets, as along the gable, or one angle, of a spire.—**2.** Decoration by means of rows of crockets: as, a steeple adorned by rich *crocketing*.

crockman (krok′man), *n.* A man who deals in crockery.

crock-stick (krok′stik), *n.* A stick used for stirring a pot; a pot-stick; a spurtle.

crocodile-arrow (krok′ō-dīl-ar′ō), *n.* A large arrow bearing the design of a crocodile on its foreshaft: used by the natives of Torres Strait, and remarkable on account of the conventional modifications of the crocodile design. *Haddon*, Evolution in Art, p. 20.

crocodile-shears (krok′ō-dīl-shērz), *n. sing.* and *pl.* Same as ★*alligator-shears*.

crocose (krō′kōs), *n.* [*croc-us* + *-ose*.] Sugar obtained by the hydrolysis of crocetin: now known to be glucose. Also called *saffron-sugar*.

Crocosmia (krō-koz′mi-ạ), *n.* [NL. (Planchon, 1851–52), < Gr. κρόκος, saffron, crocus, + ὀσμή, smell. The dried flowers when moistened have the odor of saffron.] A genus of plants of the family *Iridaceæ*, which includes only one species, *C. aurea*, a showy bulbous autumn-blooming plant. This genus is distinguished from the closely allied genus *Tritonia* by having the stamens separated at equal distances instead of grouped at one side, the tube not swollen at the top, and the fruit 3-seeded instead of many-seeded. Its cultivation is that of *Gladiolus*. The plant is native to Africa.

crocus, *n.* **5.** In old *chem.*, a yellowish or reddish impure oxid of some of the metals: as, *crocus antimonii* or *crocus metallorum*, an impure oxid of antimony obtained by deflagration of natural sulphid of antimony with saltpeter; *crocus Martis*, oxid of iron left on heating sulphate of iron to redness in the air; *crocus Veneris*, red oxid of copper obtained by heating copper in the air.—**Autumn, fog, meadow,** or **Michaelmas crocus,** the meadow-saffron, *Colchicum autumnale*.—**Prairie** or **wild crocus,** the American pasque-flower, *Pulsatilla hirsutissima*. See *pasque-flower*.

crocused (krō′kust), *p. a.* Covered or decked with crocuses. *Ruskin*.

crocus-powder (krō′kus-pou″dėr), *n.* An old name for red oxid of iron in fine powder, used as a polishing material. See *crocus*, 4.

crodonium (krō-dō′ni-um), *n.* [NL.] A supposed new chemical element announced by Trommsdorff in 1820 as present in an incrustation produced by sulphuric acid: afterward shown to be a mixture of common substances.

croft-bleaching (krôft′blē″ching), *n.* Bleaching and exposure to the sun on grass, and frequent sprinkling; insolation. See *croft*, *v. t.*

crofter, *n.* Originally a customary tenant with well-defined rights to his holding, in the early nineteenth century the crofter came to be regarded merely as a tenant at will. Wholesale evictions of crofters led, in 1883, to the appointment of a parliamentary commission of investigation, the result of which was the enactment, in 1885, of the Crofters Act, which guaranteed permanence of tenure, compensation for improvements, and fair rents, determined by a permanent commission.

Since the passing of the *Crofters* Act of 1885, and the amending statutes of succeeding years, which added to the Commissioners' powers of fixing fair rents and cancelling arrears, the power of enlarging crofts and common grazings, political agitation among the Highland *crofters* has practically died out. *Encyc. Brit.*, XXXII. 464.

crogan (krō′gạn), *n.* See ★*craggan*.

crokinole (krō′ki-nōl), *n.* [Also *croquinole*, *crockinale*; < F. *croquignole*, a fillip; probably connected with *croquignole*, *craquignolle*, a cracknel, which originated in the root of *crack*[1], *v.*] A game played on a round or octagonal board, in which round wooden disks are filliped from the edge toward the middle. See *squail*.

Cro-Magnon race. See ★*race*[3].

cromfordite (krom′fôr-dīt), *n.* [*Cromford*, a locality in Derbyshire, + *-ite*[2].] Same as *phosgenite*.

cromhorn (krom′hôrn), *n.* Same as *cromorna*.

crommelin (krom′e-lin), *n.* [Appar. from a surname *Crommelin*.] A light roasted starch, similar to roasted potato starch, used in calico-printing as a thickener for thin colors.

Crompton loom. See ★*loom*[1].

Cromwellism (krom′wel-izm), *n.* Policy and methods characteristic of Oliver Cromwell. See *Cromwellian*.

Cronartium (krō-när′shium), *n.* [NL. (Fries, 1815).] A genus of parasitic fungi of the order *Uredinales*. The æcidia grow on conifers and have been called *Peridermium*. The uredospores and teleutospores occur on leaves of *Ribes*, *Asclepias*, *Quercus*, etc. The teleutospores are one-celled and arranged in slender cylindrical brown masses. *C. Asclepiadeum* has æcidia on the trunk or branches of *Pinus sylvestris* and teleutospores on *Cynanchum Vincetoxicum*, in Europe.

cronk (krongk), *a.* [Var. of *crank*[3].] **1.** Sick or feigned to be sick; in poor condition; in 'bad trim,' as a race-horse.—**2.** Unsound; cranky; shaky; unstable; 'crooked': as, *cronk* financial institutions.—**3.** Obtained by theft or fraud; stolen: as, *cronk* goods. [Australian slang in all senses.]

crook, *n.*, **4.** (*f*) A British foundry name for a compass of wood used in the forming up of the molds for casting bells.

10†. A name given to both the parenthesis ( ) and the square bracket [ ].

crookbill (krůk′bil), *n.* The New Zealand plover, *Anarhynchus frontalis*, in which the bill is bent sidewise.

crooked-foot (krůk′ed-fůt), *n.* A pathological condition of a horse's hoof in which one wall is concave from the coronet to the plantar surface, while the opposite wall is convex. The hoof may be said to be twisted to form an arc of a circle.

Crookes's layer, space, vacuum. See ★*layer*, ★*space*, ★*vacuum*.

croom (krŏm), *n.* A dialectal form of *crome*[2].

crop, *n.* **15.** In cattle, a portion of the back, on either side of the median line, immediately back of the shoulder. See cut under ★*point*[1]. —**16.** The working unit in the making of turpentine, consisting of a forest tract of from 200 to 250 acres, containing approximately 10,500 faces.—**17.** In certain cephalopods and other mollusks, a more or less dilated portion of the esophagus, sometimes forming a lobular cæcum.—**Ameliorating crop,** a crop beneficial to the soil, and grown wholly or partly for that reason.—**Black crop,** a crop of beans or peas, as opposed to one of cereals: according to some, it includes vetches when grown for seed. [Great Britain.]—**Brown crop,** a crop other than one of grain, as legumes, turnips, etc.

Most of the modern systems of rotation in connection with high farming depend . . . upon the alternation of

straw crops and leaf crops, or, as the old terms were, "white crops" and "*brown crops*."
Storer, Agriculture, II. 220.

Catch crop, a minor crop occupying the soil between the times of two principal crops; specifically, in Great Britain, a fallow crop of vetches, clover, rye, or the like, following the grain of one year and preceding the root crop of the next. See *cropped* ★*fallow* and *stolen crop*.—**Cleaning crop,** a crop which serves in any manner to rid the ground of weeds.

It [rye] becomes in a sense a "*cleaning*" *crop* when another crop immediately follows the depasturing.
T. Shaw, Forage Crops, p. 173.

Companion crop, a crop which is grown with another crop, the two occupying the land simultaneously.—**Cotton crops.** See ★*cotton*[1].—**County crop,** the crop or hair-cut of prisoners in the county jail. [Slang.]—**Cover crop,** a leguminous crop planted to protect the soil from washing and weeds during the period when it is not occupied by the main crop, at the same time serving to enrich it.—**Crop report,** specifically, an official exhibit of the condition of domestic crops, published monthly by the United States Department of Agriculture. These reports are based upon the advices of voluntary correspondents.—**Crop writer,** a skilled agriculturist who collects agricultural reports as to the prospects of good crops or poor crops.

Educated and practically trained meteorologists, *crop writers*, printers, and messengers are on duty, fully equipped with the most improved instruments and mechanical appliances for performing their various functions. *Yearbook U. S. Dept. Agr.*, 1897, p. 67.

Forage crop, in the broadest sense, any crop grown principally for forage, that is, as feed for stock, or any crop so far as grown for this purpose. Cereals, including Indian corn, become forage crops when intended for stock-feeding, and even the sugar-beet when the use of the pulp for stock-feeding is in view. More often the term is used in some limited sense, as—(*a*) In British agriculture, a crop grown as green food for stock, exclusive of root crops and temporary or permanent pasture. (*J. Muir*, Agriculture, p. 243.) (*b*) In the United States, usually a crop of which the herbage is eaten either green or dry, not exclusive of pasturage; the meaning is not well defined with reference to roots, which (until recently the sugar-beet) have been little grown in the United States. (See the extract.) T. Shaw ("Forage Crops," p. 1) restricts the term to pasture crops other than grasses.

In a more limited and technical sense a *forage crop* is an annual crop in which the whole plant is used for food. *T. F. Hunt*, Cereals in America, p. 7.

Leguminous crop, a crop of any useful legume or pulse-plant, more especially of one grown in the field for cutting or for plowing under. Under such crops are included all the cultivated true beans, peas, and clovers, the vetches or tares and lupines, the cow-pea, chick-pea, horse-bean, soy-bean, sword-bean, sanfoin, sulla, sweet clover, beggar-weed, etc., all belonging to the family *Fabaceæ*.—**Money crop,** a crop which is sold, as cotton, in distinction from one consumed on the farm.—**Nitrogen-fixing crop,** a crop of some plant whose roots serve as hosts for the microbes which have the power of fixing the free nitrogen of the air as organic matter. The plants available for this purpose are legumes, such as clovers, the cow-pea, etc. The nitrogen accumulated in the roots is prepared for plant use through nitrification. See *nitrification*, ★*nitrogen-fixing*, and *nodule-bacteria* under *Bacterium*.—**Nurse crop,** an annual crop which serves, primarily or incidentally, to protect the young growth of some longer-lived crop, as rye or wheat sown with clover to secure the benefit of its shade. The term has been applied also to the banana grown with coffee to shade it.—**Protective crop.** Same as *nurse* ★*crop*.—**Renovating crop,** a crop grown for its effect in improving the soil; often, however, serving also as forage. Soiling crops (see below) may also be renovating crops.—**Root crop.** See *root-crop* and *cropped* ★*fallow*. In Great Britain root crops consist of turnips (white and yellow), Swedes, mangel-wurzel, carrots, and parsnips, with which are sometimes counted cabbage, kale, rape, and the potato.—**Scourging crop,** a crop which impoverishes the soil. [Great Britain.]

The flax is what is termed by farmers a *scourging crop*.
Low, Pract. Ag., p. 284.

Smothering crop, a dense and vigorous crop grown to suppress weeds.—**Soiling crop,** a crop suited to the purpose of soiling, that is, of being fed green to cattle in the stall or yard. Indian corn, small grains, and grasses can be thus used; but leguminous crops (clover, the cow-pea, alfalfa, etc.) are advantageous in that they require little expensive manuring and leave the soil richer and in better physical condition than before (see *nitrogen-fixing* ★*crops*), at the same time affording a rich nitrogenous food.—**Stolen crop,** a catch-crop: so called because it is taken between regular crops, as if by stealth.—**Succession crop,** a crop which is grown directly after another in a short rotation, particularly horticultural crops, as a succession in one season of lettuce, beans, and turnips. The practice of raising succession crops is called *succession-cropping*.—**Top crop,** in *cotton-growing*, a crop which, in the more southern States, may sometimes be gathered from the upper, late-maturing bolls.—**Trap-crop,** a crop attractive to noxious insects, planted to draw them away from some other crop. On the trap-crop the insects are killed by poison, or in some cases the crop laden with eggs is fed to cattle.

crop, *v. t.* **4.** To shear; cut the nap from, as woolen cloth.—**5.** To cut down needlessly the outer margins of a book. When this cutting shaves the type the book so treated is said to be *bled*.

crop-belt (krop′belt), *n.* Same as *crop-*★*zone*.

crop-ends (krop′endz), *n.* The rough, unfinished ends of rails, billets, or blooms, in the rolling-mill process, which are cut off in bringing the finished pieces to standard length and to remove the defective portions which are con-

centrated into such wastage. The crop-ends are melted over again and charged, as scrap, into the furnaces.

Large billets can be rolled at one operation into small rods of great length, so that the proportion of metal wasted in the form of *crop-ends* is greatly reduced.
Encyc. Brit., XXIX. 588.

crop-head (krop′hed), *n.* The top or head of an ingot. This is always less sound than the bottom or foot, since the formation of the "pipe" in cooling occurs in the head, and any impurities rise there by liquation. More metal should therefore be cut off from the head than from the bottom end. See ★ *crop-ends*.

The next process is to cut the long bloom up into smaller blooms, in which electrically-driven bloom shears are brought into play. The rough ends — "*crop heads*" — are cut off and are placed by an electric crane in a car for shipment to any part of the works.
Sci. Amer. Sup., Feb. 21, 1903, p. 22687.

crop-leather (krop′leᵺ″ėr), *n.* Sole-leather made from a hide from which the belly has been trimmed off.

crop-over (krop′ō″vėr), *n.* The end of the sugar-cane harvest on a plantation; hence, a celebration or harvest-home often held on the last day of the cane-cutting. [West Indies.]

cropper[4] (krop′ėr), *n.* [See the def.] A small bed-and-platen printing-press invented by George P. Gordon (1858) of New York, but named from the machinist (H. S. Cropper) who introduced it into Great Britain.

cropper-worker (krop′ėr-wėr″kėr), *n.* One who operates a cropper or cropping-machine used in facing cloth by cropping or shearing the nap.

cropping, *n.*, **3.** (*b*) *pl.* Exposures of bed-rock through the surface-mantle; outcrops. — **Combined cropping,** in *forestry*, the combination of forest and field crops on the same area.

cropping-out (krop′ing-out″), *n.* A rock exposure; an outcrop.

cropping-shears (krop′ing-shērz), *n. sing.* and *pl.* Same as ★*alligator-shears*.

crop-service (krop′sėr″vis), *n.* See *climate-and crop-service*, under ★*climate*.

crop-tin (krop′tin), *n.* Same as *crop-ore*.

croquant (krō-känt′), *n.* [F. *croquant*, crackling, crisp, ppr. of *croquer*, crackle.] A crisp sweet cake or pastry; something brittle made of nuts, as peanut brittle, etc.

crosnes (krōn), *n.* Same as ★*chorogi*.

cross[1], *n.*, **15.** In *geom.*, the point determined by two straight lines: the intersection of two straight lines. — **Axial cross.** See ★*axial*. — **Celtic cross,** a form of sepulchral monument found in England, Scotland, Ireland, and the islands. The name *Celtic* is largely conventional, the works themselves often dating from a later period, sometimes as late as the thirteenth century. They are decorated with interlaced patterns commonly called *Celtic*. — **Cervical cross.** See ★*cervical*. — **Cross dollar.** See ★*dollar*. — **Cross of the Holy Ghost,** the decoration of the Order of the Holy Ghost (which see, under *ghost*). — **Egyptian cross.** See ★*Egyptian*. — **Irish cross,** a form of Celtic cross having a circle at the intersection of the arms with the shaft. See *Celtic* ★*cross* and cut of monumental cross, under *cross*[1], *n.* — **Stations of the cross,** a series of fourteen representations of the passion of Christ, either painted or in relief, around the interior of a Roman Catholic church, before which the faithful pray and meditate; also, the formulary of prayers used for this purpose. — **To give the double cross to,** in racing or any game or sport in which betting is concerned, to conspire with one man to betray another and then to betray the first: as when A, a runner who can easily outrun his opponent B, arranges (for a consideration) with C to let B win, and then, having informed his own backers of this contract with C, arranges with them (for a consideration) to win the race himself, thus giving the double cross to C, who, unaware of A's treachery, bets on B and loses both his bets and the consideration he had paid. See *cross*, 14. [Gamblers' slang.] — **To shake the cross,** to abandon crooked or swindling ways; become 'good.' [Slang.]

cross[1], *a.* **9.** Dishonest; not honestly come by; not on the square: as, a *cross* horse. [Slang.] — **10.** In *logic*, having an extensive part in common, without including or being included. Cross terms are such terms as *living* and *corruptible*, if there are things that are both living and corruptible, others living but incorruptible, others not living but corruptible, whether there is or is not anything neither living nor corruptible. — **Cross keys, ratio.** See ★*key*[1], ★*ratio*.

cross[1], *v. i.* **6.** In *euchre*, when the trump is turned down, to make it the opposite color.

cross-arm (krôs-ärm), *n.* A cross-piece; an arm or bracket which crosses a pole or post: used on poles to carry wires and keep them separated.

cross-assortative (krôs′a-sôr″ta-tiv), *a.* Reciprocally assortative; serving to assort or separate into kinds which are reciprocals. — **Cross-assortative mating,** assortative mating considered reciprocally; the mating or pairing of a male parent with the characteristic *x* and a female parent with the characteristic *y*, as compared with that of a male parent with the characteristic *y* and a female parent with the characteristic *x*.

cross-beard (krôs′bērd), *n.* In *organ-building*, see ★*beard*, 6 (*b*).

cross-beat (krôs′bēt), *n.* In beating time for music, the motion of the hand sidewise or across in marking one of the pulses of a measure between the initial and the final pulse; also, such an intermediate pulse itself.

cross-bedded (krôs′bed″ed), *a.* Having cross- or false bedding. See *false bedding*, under *false*.

cross-belt, *n.* **2.** In *mach.*, a crossed belt; a belt which is crossed or twisted so that the driven pulley will run in a direction opposite to that of the driver.

cross-binding (krôs′bīn″ding), *n.* In *mach.*, binding across corners; the act of sticking in guides, due to a tendency to twist instead of to travel in a line parallel to the guides.

cross-border (krôs′bôr″dėr), *a.* Forming a border across, as across a fabric woven on a Jacquard loom, such as that in a handkerchief, a table-cover, a towel, etc. *T. W. Fox*, Mechanism of Weaving, p. 165. — **Cross-border Jacquard loom.** See ★*loom*[1].

cross-bred, *a.* **II.** *n.* In *biol.*, the offspring produced by the crossing of parents which exhibit antagonistic or mutually exclusive characters, such as blackness and whiteness, tallness and shortness, which do not blend. The generative cells of a cross-bred are held to be of two sorts — those that confer upon descendants the characteristics of one parent and those that confer the characteristics of the other.

Hence it is seen that the 75 per cent. dominants are not really of similar constitution, but consist of twenty-five which are pure dominants and fifty which are really *cross-breds*, though, like the *cross-breds* raised by crossing the two original varieties, they only exhibit the dominant character.
Bateson, Mendel's Prin. of Heredity, p. 10.

cross-catalogue (krôs′kat″a-log), *v. t.*; pret. and pp. *cross-catalogued*, ppr. *cross-cataloguing*. To enter in a catalogue under two or more headings, as under both author and subject.

cross-chains (krôs′chānz), *n. pl.* Chains connecting the front and rear sleds of a logging-sled.

cross-claim (krôs′klām), *n.* An opposing claim; a claim in reply or opposition to another; a counter-claim.

cross-coloring (krôs′kul″or-ing), *n.* In *geol.*, color-markings developed independently of the stratification by infiltrated matter. *Science*, May 31, 1901, p. 869.

cross-crib (krôs′krib), *n.* A headquarters for crooks and blacklegs. *Stand. Dict.* [Thieves' slang.]

Cross-curves of stability, in *naval arch.*, a congeries of curves showing righting arms or righting moments of transverse stability of a vessel. Each cross-curve represents for a constant inclination the righting arm with reference to a fixed pole, as an ordinate, corresponding to the varying displacements as abscissæ. On such a diagram a vertical line with any given displacement as abscissa gives, by its intersection with each curve, the righting arm at the corresponding inclination, from which the curve of statical stability for the given displacement for all inclinations can readily be plotted.

crosscut, *v. t.* **2.** To cross-plow, as in fallowing.

A rough condition of soil . . . such as is obtained by winter ploughing and spring *cross-cutting*.
J. Wrightson, Fallow and Fodder Crops, p. 15.

cross-cut, *n.* **3.** In *math.*, a line, regarded as a section actually made in the surface, which begins at one point of a boundary, goes into the interior of the surface, and, without anywhere intersecting either another boundary-line or itself, ends at a point of the boundary. A cross-cut may connect two points on the same boundary-line, or two on different boundary-lines; or it may end where it began; or it may end in a point of its previous course. Also *cross-line*.

cross-division (krôs′di-vizh″on), *n.* In *logic*, a multiple mode of division by which the concept or class divided is divided in several ways, each subclass in each of these ways intersecting every subclass in each of the other ways. Thus, if men are divided according to their complexions, according to their ages, and according to their social status, this will be a cross-division. Mendeléjeff's division of the chemical elements into groups and series is a cross-division.

crossdye (krôs′dī), *v. t.*; pret. and pp. *crossdyed*, ppr. *crossdyeing*. To carry out the process of ★crossdyeing (which see).

crossdye (krôs′dī), *n.* A color suitable for use in crossdyeing. — **Crossdye black.** See ★*black*.

crossdyeing (krôs′dī-ing), *n.* [Verbal noun of *crossdye*.] The process of dyeing cotton-and-wool union-cloth in which the cotton warp has been dyed some color before weaving. During the crossdyeing the woolen or worsted filling may be colored to match the cotton warp, or it may be dyed a different color. In the latter case the result is called a *shot-effect*. See the extract.

Cross-dyeing is always preferred for medium and better class goods, since it is then possible to dye both the cotton and the wool with a greater choice of colouring matter and process, and the most suitable for each fiber may be employed.
J. J. Hummel, Dyeing of Textile Fabrics, p. 466.

Crossed inheritance, paralysis. See ★*inheritance, paralysis*.

cross-education (krôs′ed-ū-kā″shon), *n.* In *psychol.*, the transference of the effects of practice from the one side of the body to the other, unpractised side. *W. W. Davis*, Yale Psychol. Stud., 1898, p. 6.

cross-fault (krôs′fâlt), *n.* In *geol.*, a fault striking across the axis of a mountain-range or the general strike of the displaced strata.

Both longitudinal and *cross-faults* are said to have been developed more especially in the Eastern Alps.
Geog. Jour. (R.G.S.), XVI. 461.

cross-feed (krôs′fēd), *n.* In *mach.*, a device for feeding the tool or material crosswise in relation to the principal motion of either, or in relation to the long axis of the machine.

cross-fertilization, *n.* **2.** In general, the sexual union of two germ-cells from two parent organisms, as contrasted with self-fertilization in plants and in some hermaphrodite animals.

cross-fiber (krôs′fī″bėr), *n.* One of the varieties of chrysotile asbestos or fibrous serpentine.

This mineral occurs as a filling of veinlets, in which the fiber sometimes lies more or less parallel to the walls (especially where movement has affected it), and is then called *slip-fiber*; but more commonly the structure is almost at a right angle to the vein-walls, and is then called *cross-fiber*.
Amer. Geol., March, 1905, p. 194.

cross-figure (krôs′fig″ūr), *n.* A superficial figure which crosses itself, as a figure 8.

cross-fingering (krôs′fing″gėr-ing), *n.* In playing certain wood wind-instruments, like the flute, the use of the fingers out of the regular or serial order, so as to make extreme tones possible.

cross-flow (krôs′flō), *v. i.* To flow transversely.

cross-flute (krôs′flōt), *n.* A transverse flute. See ★*flute*[1], 1.

cross-fold (krôs′fōld), *n.* A fold which crosses another older fold obliquely or at right angles.

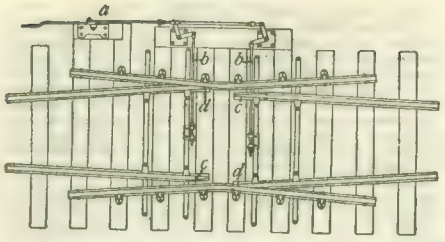
These had been deformed by oblique *cross-folds*.
Nature, Feb. 12, 1903, p. 359.

cross-fur (krôs′fėr), *v. t.* To fur or cover with laths diagonally.

cross-hatch (krôs′hach), *n.* In *engraving*, a series of lines intersecting at right angles or diagonally.

cross-hatch (krôs′hach), *v. t.* In *engraving*, to shade with lines crossing one another. See *cross-hatching*.

cross-haul (krôs′hâl), *n.* In *logging*, the cleared space in which a team moves in cross-hauling.



cross-haul (krôs′hâl), *v. t.* In *logging*, to load (cars or sleds) with logs by horse-power and crotch or loading-chain.

cross-head, *n.* **3.** In *printing*, same as ★*cross-heading*.

cross-heading (krôs′hed″ing), *n.* **1.** In *mining*: (*a*) A passage driven for ventilation from the airway to the gangway, or from one breast through the pillar to the adjoining working. (*b*) A roadway driven in the solid, or maintained through old workings, to intersect other haulage-roads diagonally or at right angles. (*c*) A roadway driven at less inclination than directly to the rise of the seam. *Coal and Metal Miners' Pocketbook.* — **2.** In *printing*, a subheading; a title set in the body of the printed matter at the beginning of a subdivision of the treatment.

cross-heredity (krôs′hē-red″i-ti), *n.* The resemblance of descendants to parents or ancestors considered reciprocally, or through the comparison of the descendants of male ancestors who are *x* and female ancestors who are *y* with those of male ancestors who are *y* and female ancestors who are *x*. *Biometrika*, April, 1903, p. 344.

crossing, *n.* — **Movable-point crossing,** in *railroading*, a track-crossing formed of a pair of split switches placed with the points facing each other where the tracks cross at a small angle. The two switches move together in opposite directions, and any movement opens one track and closes the other. Another form is called a *movable-frog crossing*. — **Reciprocal crossing,** the crossing of the male of one race or species with the female of a second, and of the male of the second with the female of the first. It often happens that a cross is fertile and its reciprocal sterile. The eggs of *Echinus microtuberculatus* are readily fertilized with the sperm of *Strongylocentrotus*

Movable-frog Crossing.

a, switch-stand and lever; *b*, *b*, switch-rods; *c*, *c*, frog in open position; *d*, *d*, closed position.

lividus, but the eggs of *S. lividus* cannot be fertilized with the sperm of *E. microtuberculatus*.

crossing-plate (krôs'ing-plāt), *n.* An iron or steel plate forming a crossing of two lines of track.

crossite (krôs'īt), *n.* [Named after Whitman *Cross* of the United States Geological Survey.] A mineral of the amphibole group, in composition between glaucophane and riebeckite. It is marked by its bright blue color and is frequently observed in the crystalline schists of the Coast Range in California.

cross-lamination (krôs'lam-i-nā″shọn), *n.* Minor bedding somewhat oblique to the major stratification-lines in sedimentary rocks; cross-bedding or false bedding.

cross-leaf (krôs'lēf), *n.* The cross-leaved, cauliflorous calabash-tree, *Crescentia alata*, a small tree with horizontal branches and round, gourd-like, hard-shelled fruit the size of a large orange. The leaves usually grow in fascicles of three, of which the middle leaf is trifoliate, composed of a long winged petiole and three leaflets, which together have the shape of a cross. The fruit and leaves are used medicinally in Mexico. The species is of Mexican origin, but was early introduced into Guam and the Philippines. Also called *jicara*.

cross-leaved (krôs'lēvd), *a.* In *bot.*, having four-leaved whorls in the form of a cross.

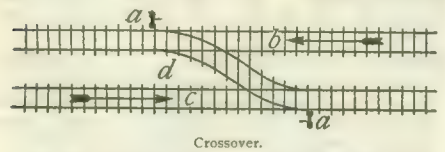
Crossley reflector. See ★*reflector*.

cross-line (krôs'lin), *n.* Same as ★*cross-cut*, 3.

cross-matched (krôs'macht), *a.* Said of a team of four or more horses in which the horses on either side resemble one another in color, but differ from those of the opposite side.

cross-memory (krôs'mem″ọ̈-ri), *n.* In *psychol.*, cross-education, regarded as a transference of habit or organic memory.

It was noticed by Weber and Fechner that the memory for arm movements is transferred from one side to the other, and that this *cross-memory* is symmetrical and not identical. *Scripture*, New Psychol., p. 190.



cross-motion (krôs'mō″shọn), *n.* Motion of a star at right angles to the line of sight expressed in linear units (miles per second). It can be calculated from the proper motion (seconds of arc per year) when the parallax of the star is known. Sometimes called *thwartwise motion*.

I have classified the stars in this way not only as a whole, but also with reference to their *cross-motion*—motion at right angles to that of the sun.
S. Newcomb, in Pop. Sci. Mo., March, 1901, p. 457.

Crossopodia (kros-ọ̈-pō'di-ạ̈), *n. pl.* [NL., < Gr. *κρόσσαι*, battlements, + *πούς* (*ποδ-*), a foot.] A name which has been applied to certain serpentine or vermiform markings on Silurian rocks, commonly regarded as the trails of crustaceans, worms, or mollusks.

crossopterine (kros-op'tẹ-rin), *n.* [*Crossopter(ix)* + *-ine*².] An amorphous alkaloid found in the bark of *Crossopterix Kotschyana* Fenzl. of Abyssinia.

crossover, *n.* **2.** In *railroading*, a crossing or connecting line of rails and two switches joining two lines of rails. It is used to enable a

Crossover.

a, switch and switch-stand; *b*, up-line; *c*, down-line; *d*, crossover.

train to cross from one line to another. See *switch*, 2, and ★*ladder*, 3.— **3.** In *elect.*, a place where two wires pass each other without touching. Should they touch a cross would be formed. See *cross*¹, 13.— **4.** Same as *sontag*. — **5.** The crossing of the swiftest current in a river from one side of the channel to the other. Crossovers generally occur between two bends in the course of a stream.

Just below the Pass of Lillo there is a *cross-over* in the [river] current, making a neutral point and forming a shoal. *Encyc. Brit.*, XXVII. 533.

cross-parental (krôs'pā-ren″tạl), *a.* Of or pertaining to parentage considered reciprocally, or through the comparison of fathers who are *x* and mothers who are *y* with fathers who are *y* and mothers who are *x*.

I determined *C* from the twelve series and found for its mean value ·5585. This is within two per cent. of the value of *C* found for the *cross-parental* relationships, and I think the agreement is as close as we could hope for.
Biometrika, Nov., 1903, p. 392.

cross-plow (krôs'plou), *v. t.* To plow at right angles with a former plowing.

cross-raise (krôs'rāz), *v. t.*; pret. and pp. *cross-raised*, ppr. *cross-raising*. To raise (the nap of cloth) across its width.

cross-reel (krôs'rēl), *v. t.* To wind (yarn) on a reel with a reciprocating motion. *Nasmith*, Cotton Spinning, p. 362.

cross-reference (krôs'ref″ẹr-ẹns), *v. t.*; pret. and pp. *cross-referenced*, ppr. *cross-referencing*. To relegate or refer by a cross-reference; provide with cross-references.

cross-rib (krôs'rib), *n.* In a side of beef, one of the sternal ribs which run crosswise to the body.—**Cross-rib steak.** See ★*steak*.

cross-road, *n.* **4.** Same as ★*cross-heading*, 1 (*a*) and (*b*).

cross-section, *n.* **2.** The area of a section, of a bar, tube, rod, or other body, taken at right angles to its axis. *C. Hering*, Conversion Tables, p. 101.—**Cross-section paper.** See ★*paper*. **Cross-section units,** units of area, such as the circular mil and the circular millimeter, used for the convenient expression of the areas of cross-section of bars, rods, and wires. Such units are so defined as to avoid the use in computation of the factor π; the circular millimeter, for example, is the area of a circle whose diameter is one millimeter. Also called *circular units*.

cross-sectional (krôs'sek″shọn-ạl), *a.* Of or pertaining to a cross-section or that section of a body (specifically of a bar, rod, or wire) which is normal to the major axis of the body. *H. Du Bois*, The Magnetic Circuit, p. 60.—**Curve of cross-sectional areas.** See ★*curves of ship calculations*.

cross-septation (krôs'sep-tā″shọn), *n.* The division of a hypha or other cell by means of a transverse septum.

cross-sleeper (krôs'slē″pẹr), *n.* In *railroading*, a long tie, or one longer than those used in an ordinary track, employed to support more than two rails, as at a switch.

cross-slide (krôs'slīd), *n.* That part of a machine on which either the work or the tool-carriage travels across the principal direction of motion.

cross-spring (krôs'spring), *n.* In *carriage-making*, a half-elliptic spring which extends across the body, the ends being secured by toggle-joints to the ends of the side-springs.

cross-stitch (krôs'stich), *v. t.* To sew or embroider with a cross-stitch; sew or fasten with cross-stitches.

cross-straps (krôs'straps), *n. pl.* Ornamental straps which cross one another at the end of the body of a carriage, the upper ends being secured to the body and the lower to the pump-handles.

cross-stratification (krôs'strat-i-fi-kā″shọn), *n.* Cross-bedding or false bedding. See *false*.

cross-stratified (krôs'strat″i-fīd), *a.* False-bedded. See *false bedding*, under *false*.

cross-stump (krôs'stump), *n.* In *cricket*, a stump 2 feet long, formerly laid like a bail across the two wickets. *Hutchinson*, Cricket, p. 31. [Obsolete.]

cross-talk (krôs'tâk), *n.* Talk from another telephone circuit that interferes with or intrudes into one's own communication.

crosstoes (krôs'tōz), *n.* The bird's-foot trefoil, *Lotus corniculatus*: so called from the digitate clusters of pods which twist after opening.

cross-town (krôs'toun), *a.* That runs across the town: as, a *cross-town* line of street-cars; a *cross-town* car.

cross-turret (krôs'tur″et), *n.* A turret in a turret-lathe the axis of which is horizontal and lies across the bed, instead of being vertical, as in most turret-lathes.

cross-vault (krôs'vâlt), *n.* A groined vault, usually one in which the two cylindrical surfaces which meet one another are of the same width and height, so that the plan would form a cross of the usual type.

Cross-warp weave. See ★*weave*¹.

cross-weed (krôs'wēd), *n.* A plant of the genus *Diplotaxis* of the mustard family, especially *D. muralis* and *D. tenuifolia*, the cruciferous character of whose flowers is more than usually marked. See *stinkweed*, 1, and *wall-rocket*, under *rocket*². Both species are adventive in the United States. Also known as *sand-rocket*.

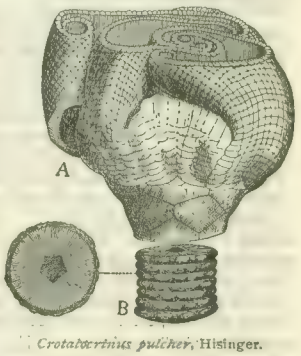
cross-wind (krôs'wind), *n.* In *archery*, a wind blowing across the range.

cross-wind (krôs'wīnd), *v.* **I.** *trans.* To wind (yarn) on a reel in such a manner that the windings cross at an acute angle with the axis. *Nasmith*, Cotton Spinning, p. 360.

II. *intrans.* To twist; depart from a plane: said of a plank or platform which twists out of its plane.

cross-wood (krôs'wụ̊d), *n.* A West Indian shrub of the family *Theophrastaceæ*, *Jaquinia aculeata*: so called from the fact that its branches are produced in whorls of four, thus forming a cross.

crotaconic (krō-tạ-kon'ik), *a.* [*crot(on)* + *aconic* (?).] Noting a crystalline, easily soluble acid, $CH_3CH:C(CO_2H)_2$ (?), obtained by the saponification of cyancrotonic acid: as, *crotaconic* acid (which melts at 119° C.).



crotalic (krō-tal'ik), *a.* [*Crotalus* + *-ic*.] Of or pertaining to the genus *Crotalus*, or to a poison derived from snakes of that genus.

crotalin (krō'tạ-lin), *n.* [*Crotalus* + *-in*².] An albuminous poison found in venom derived from snakes of the genus *Crotalus*.

crotalism (krō'tạ-lizm), *n.* [NL. *Crotal(aria)* + *-ism*.] A disease of horses, known chiefly in the valley of the Missouri river, due to eating the rattlebox, *Crotalaria sagittalis*. Also called *bottom disease*, because it occurs on bottom-land.

The diseases resulting from plant poisoning known as locoism and *crotalism*, which prevail in some parts of the West and Northwest, are caused, respectively, by the continued eating in the field of some one of the several locoweeds (Astragalus and Aragallus species) and by the eating of the rattleweed or rattlebox (Crotalaria sagittalis) either in the field or in hay.
Yearbook U. S. Dept. Agr., 1900, p. 308.

Crotalocrinus (krō-tạ-lok'ri-nus), *n.* [NL., < Gr. *κρόταλον*, a rattle, + *κρίνον*, a lily (see *crinoid*).] A genus of singular camerate crinoids in which the branches of the first arms rapidly dichotomize, but remain united so that each arm forms a broad infolded net. It occurs in the Silurian rocks.

Crotalocrinus pulcher, Hisinger. Silurian; Gottland.

A, crown with folded arms; *B*, portion of stem. (From Zittel's "Palæontology.")

crotaloid (krō'tạ-loid), *a.* [*Crotalus* + *-oid*.] Of or pertaining to a rattlesnake; having the characters of a rattlesnake.

crotaphion (krō-taf'i-on), *n.* [NL., < Gr. *κροτάφιον*, neut. of *κροτάφιος*, of the temples, < *κρόταφος*, temple.] In *craniom.*, the posterior terminal point of the suture between the parietal and sphenoid bones.

crotaphite, *a.*—**Crotaphite fossa** or **depression,** the groove on the posterior portion and superior face of a bird's skull in which the temporal muscles lie. The size of this is an indication of the power of the mandible, and it is large in fish-eating birds.

crotaphitic (krō-tạ-fit'ik), *a.* [*crotaphite* + *-ic*.] In *anat.*, same as *crotaphite*. Also *crotaphytic*.

The morphogenic action of *crotaphytic* muscles on the skull and brain of the Carnivora and Primates, by M. R. Anthony. *Nature*, Dec. 3, 1903, p. 120.

crotaphyte, *n.* An erroneous spelling of *crotaphite*.

crotch (kroch), *v. t.* In *logging*, to cut notches on opposite sides of (a log) near the end, into which dogs are fastened.

crotch-chain (kroch'chān), *n.* A tackle for loading logs on sleds, cars, or skidways by cross-hauling.

crotchet, *n.* **11.** In *zoöl.*, one of the slightly curved and notched bristles or chætæ common among *Oligochæta*, and serving probably as locomotor organs.— **12.** Same as *crocket*.

crotching (kroch'ing), *n.* In *billiards*, a play analogous to the anchor (see ★*anchored*) in balk-line billiards, with the exception that, as the two object-balls lie transversely in a corner of the table, less accuracy of touch and far less skill are required to keep them there. The same situation can occur in the jaw of a pocket-table, but is more difficult to maintain, unless balls are larger and pockets smaller than the standard. Crotching beyond three successive shots was barred as early as 1862, and jawing in 1866; but both in America and in England expert professionals have since sometimes resorted to one or the other for their high runs.

crotch-tongue (kroch'tung), *n.* Two pieces of wood, in the form of a V, joining the front and rear sleds of a logging-sled.

crotin (krō'tin), *n.* [*Crot(on)* + *-in*2.] A highly poisonous toxalbumin contained in the seed of *Croton Tiglium*.

Crotonic aldehyde. See ★*aldehyde*.

crotonoleic (krō″ton-ō-lē'ik), *a.* [*Croton* + L. *oleum*, oil.] Noting a pale-yellow compound existing, partly as free acid and partly as glyceride, in croton-oil. It is a drastic purgative.

crounotherapy (krō-nō-ther'a-pi), *n.* [Reg. **crunotherapy*, < Gr. κρουνός, a spring, + θεραπεία, medical treatment.] Treatment of disease by a course of drinking or bathing, aided by a special dietary and exercises, at a mineral-spring resort. *Lancet*, July 11, 1903, p. 104.

croup1, *n.*—**Catarrhal croup.** Same as *false croup*.—**Diphtheritic croup,** diphtheria of the larynx.—**Fibrinous croup,** true croup.—**Intestinal croup,** croupous inflammation of the mucous membrane of the intestine.—**Pharyngeal croup,** inflammation of the mucous membrane of the pharynx attended with a fibrinous exudation.—**Pseudomembranous croup,** true croup.—**Uterine croup,** croupous inflammation of the lining membrane of the uterus.

croup1 (krōp), *v. i.* [Also *croop*, *crupe*, prob. imitative, like *roup*, etc. See *croup*1, *n.*] To cry out; cry hoarsely; specifically, to cough hoarsely, as in croup. [Provincial (Sc.) or colloq.]

crouper-bush (krō'per-bůsh), *n.* The button-bush, *Cephalanthus occidentalis*.

croup-kettle (krōp'ket″l), *n.* A kettle under which a low flame is kept lighted so that there may be a continuous escape of vapor: used in giving vapor inhalations in cases of laryngitis, or to keep the atmosphere of the room humid.

croustade (krös-tād'), *n.* [F., < It. *crostata*: see *crustate*, *custard*.] A cup-like form of bread toasted, fried in hot fat, or dipped in melted butter and browned in the oven; also, a hollow mold of rice sprinkled with bread-crumbs and fried in deep fat, or of puff-paste filled with creamed meat, fish, etc.

crout (krout), *n.* Same as *sauer-kraut*.

croûte au pot (krōt ō pō'). [F., 'crust in the pot': see *crust*.] A clear soup to which small pieces of toast, or of stale bread, have been added just before serving.

croûton (krö-toṅ'), *n.* [F., < *croûte*, crust.] A small piece of bread dipped in melted butter and toasted in the oven, or fried in hot butter or fat: used in soups and to garnish various types of stewed dishes.

crow2, *n.* 2. (*b*) In the West Indies, particularly in Jamaica, the black vulture, *Catharista atrata*.—**Blue-wattled crow,** in New Zealand, a name given to *Glaucopis wilsoni*, a bird of the crow family.

crow-bird (krō'bėrd), *n.* The purple grackle, *Quiscalus quiscula*: so called in some parts of the United States.

crowd1, *v. t.*—**To crowd off,** to work (a ship) off from the land.

crowd1, *n.*—**Crowd of sail,** a press of canvas; all possible sail set.

crowd-poison (kroud'poi″zn), *n.* Volatile excrementitious matters contained in the respired air, which by concentration become dangerous to health in crowded places. *G. H. Napheys*, Prevention and Cure of Disease, I. 197.

crowd-poisoning (kroud'poi″zn-ing), *n.* A morbid state induced by the inhalation of waste products given off by the breath and skin of a number of persons confined in an unventilated space; ochlesis.

The symptoms arising from indigestion, from *crowd-poisoning*, from sewer-gas-poisoning, from ptomaine-poisoning (auto-infection), etc., are often ascribed to "malaria." *Pop. Sci. Mo.*, Feb., 1901, p. 371.

crow-duck (krō'duk), *n.* See *Fulica*.

crowd-weed (kroud'wēd), *n.* 1. The field-cress, *Lepidium campestre*.—2. The charlock or wild mustard, *Brassica arvensis*.

crow-eater (krō'ē″tėr), *n.* One who will do anything rather than work. [Colloq., Australia.]

crowfoot, *n.* 2. The name is applied to many plants with pedately or palmately divided leaves, chiefly of the genus *Ranunculus*, but also of other genera, especially the club-mosses, *Lycopodium inundatum*, *L. obscurum*, and *L. complanatum*. See *bog* ★*club-moss*, ★*Christmas green*, and *Lycopodium*.—**American crowfoot,** the spotted crane's-bill, *Geranium maculatum*.—**Celery-leaved crowfoot,** *Ranunculus sceleratus*. Also called *water-celery* (which see).—**Corn crowfoot,** *Ranunculus arvensis*, common in the Old World and sparingly found in the United States. See *hungerweed* and *starve-acre*.—**Cursed crowfoot.** Same as *celery-leaved* ★*crowfoot*, translating the specific name.—**Ditch-crowfoot, marsh-crowfoot.** Same as *celery-leaved* ★*crowfoot*.—**Musk-crowfoot,** *Adoxa Moschatellina*, better known as *hollow-root*. Also called *musk-root* and *moschatel*. See *Adoxa*.—**Tuberous crowfoot.** Same as *musk-*★*crowfoot*.—**Water-crowfoot.** See *water-crowfoot*.—**Wood-crowfoot.** (*a*) The goldilocks, *Ranunculus auricomus*. See *goldilocks* and *Ranunculus*. (*b*) The wind-flower, *Anemone nemorosa*.

crowfoot-grass (krō'fůt-gras), *n.* 1. A plant, *Dactyloctenium Ægyptiacum*, distinguished as *little crowfoot*, a low creeping grass of warm climates, common in the southern United States. It is a weed of cultivated grounds, but sometimes cut for hay. The name, as with other crowfoot-grasses, refers to the digitate inflorescence.—2. The similar but larger *Eleusine Indica*, also called *goose-grass*, *yard-grass*, *wire-grass*, etc. See *wire-grass*, 2.—**Bearded crowfoot-grass, feather crowfoot-grass,** a grass of the genus *Chloris*. See ★*finger-grass*, 3.—**Texas crowfoot-grass,** *Diplachne dubia*, a promising hay-grass somewhat of the crowfoot habit.

crow-hop (krō'hop), *n.* The action of a horse in endeavoring to throw a rider by arching the body, holding the legs stiff, and bucking vigorously. [Local, U. S.]

All bronchos are different individually, but the ways they try to throw their riders may be classed under three heads. The first is known as the *crow-hop*. The rider gets on a wild horse and immediately the steed bunches itself up like a goat, holds itself stiff in limb and body, and bucks promiscuously. It jars the rider, but the horse that only does this is considered easy and tame. *Wide World Mag.*, April, 1903, p. 548.

crow-line (krō'līn), *n.* The straight line of a crow's flight. See *crow-flight*.

crown. I. *n.* 7. (*f*) In *mech.*: (2) The amount of curvature of a surface or line. In pulleys for flat belts the face is made of larger diameter in the middle to check a tendency of the belt to work off to one side or the other by greater stretching on the edges. (*g*) In *arch.*: (2) An ornamental top of a tower used in late English Gothic. It resembles four or more flying buttresses meeting at their highest point. (*k*) In *zoöl.*: (1) The protuberance on the head of a whale, particularly of a right whale, surrounding the blow-holes. [Rare.] (2) Same as *crown-antler*. [Rare.] (3) Same as *coronet*1, 6 (in reference to the bones of a horse's foot). (4) In the terminology of the *Crinoidea*, the calyx without the stem. (*l*) In *ship-building*, the arching athwartship or camber of a deck or deck-beam; also, the top or central part of such an arched deck.

These spaces include the internal volume of the ship, below the deck forming the *crown* of the engine and boiler-rooms. *White*, Manual of Naval Arch., p. 61.

(*m*) The horizontal cap-piece or collar of a set of mine timbers. Also called *crown-tree*. [Scotch.] (*n*) That part of the bridle of a harness which extends over the horse's head and to which the cheeks are attached. (*o*) In *agri.*, the middle line of a ridge of land, formed by two furrow-slices laid back to back. [Great Britain.] (*p*) In *bell-founding*, the top of a bell, of which the cannons are parts and to which the tongue is attached within. Also called *pallet*. (*q*) Same as ★*howell*.

12. (*b*) The summit of a root, as of a beet or turnip, the leaf-bases forming a circle. (*c*) The leaves and living branches of a tree. In forest measurements the use of the term varies with the kind of tree and the purpose of the measurements. For example, *crown* may be used to designate either the whole leaf-and-branch system or that portion of it above a dead or a growing branch of a given size. In the description of trees the crown is said to be long or short, broad or narrow, compact or ragged, conical or flat.

16. An abbreviation of *crown-glass*.

Experiments of the eminent Jena glass-makers with phosphate *crowns* and borate flints are optically highly successful. *Encyc. Brit.*, XXV. 41.

Brabant crown, a Belgian silver coin struck under Austrian domination, weighing 456 grains, .872 fine.—**Crown forest.** See *national* ★*forest*.—**Crown imperial,** in late English Gothic architecture, a decorative finish of a tower produced by carrying up four curved ribs upon which a small spire is set. The term was invented in the nineteenth century to describe a thing once thought very attractive. The Church of St. Giles at Edinburgh is the best-known example, though there are several others, among them the Church of St. Dunstan's in the East, in the City of London.—**Gothic crown,** an English silver coin of Queen Victoria, struck as a pattern in 1846, 1847, and 1853.—**Iron crown of Lombardy,** a thin ring of iron, said to have been forged from a nail of the true cross, overlaid with gold and precious stones. It is supposed to have been made for Agilulf, king of the Longobards, in 591, and was worn by Charlemagne and all the medieval emperors who were also kings of Lombardy. Napoleon I. placed it upon his head. It is now in the cathedral of Monza, in Italy.—**Order of the crown.** (*i*) *Order of the Iron Crown of Italy*. See *iron*.—**Order of the Oak Crown,** an order for civil and military merit, conferred by Luxemburg and founded in 1841.—**Order of Rue Crown,** a military order of Saxony, founded in 1807.—**Petition crown,** a rare coin of Charles II., struck in 1663 with a petition of the mint-master to the king.—**Triple crown.** (*a*) and (*b*). See *triple*. (*c*) See ★*triple*.

II. *a.*—**Crown government,** government by the crown, as in a crown colony.—**Crown grant,** a grant from the crown.—**Crown prosecutor.** See ★*prosecutor*.—**Crown side.** Same as *Crown Office* (which see, under *crown*).—**Crown witness,** in *Eng. law*, a witness for the prosecution in a criminal action.—**Master of the Crown Office,** the prosecuting officer in the criminal department of the Court of King's Bench, who prosecutes upon the relation of some private person or informer, the crown being the nominal prosecutor.

Crown Imperial, Church of St. Giles, Edinburgh.

crown, *v. t.* 10. To give a crown or bulge to: as, to *crown* the surface of a ship's deck.—11. To cut off (the crown), as of a sugar-beet.

crownal (krou'nal), *a.* and *n.* I. *a.* Pertaining to or resembling a crown.

II. *n.* A coronet, chaplet, or garland; a coronal.

crown-beam (kroun'bēm), *n.* A cross-beam.

crown-borer (kroun'bōr-ėr), *n.*—**Blackberry crown-borer,** the larva of an American sesiid moth, *Bembecia marginata*, common in the northern United States, which burrows into canes of the blackberry at the surface of the ground.

Blackberry Crown-borer (*Bembecia marginata*). *a*, male; *b*, female.

crown-gall (kroun'gâl), *n.* A disease which attacks the roots of certain plants, especially the almond, blackberry, peach, and raspberry. It is characterized by the formation of hard, rough, irregular-shaped, gall-like bodies on the roots and sometimes on the stems of the plant. The cause is somewhat doubtful. Toumey attributed it to a myxomycete which he named *Dendrophagus globosus*.

crown-gear (kroun'gēr), *n.* A crown-wheel; a gear having teeth cut in the edge of an annular ring, or as if in the end of a hollow cylinder.

crown-grafting, *n.* 2. A kind of grafting in which the scion is inserted at the crown of the plant (where it emerges from the ground).

crowning, *n.* 6. In *agri.*, the cutting off of the crown, as of sugar-beets. See ★*crown*, 12 (*b*).

crown-moth (kroun'môth), *n.* A moth whose larva attacks the crowns of plants.—**Strawberry crown-moth,** an American sesiid moth, *Sesia rutilans*, whose larva bores in the crown of strawberry, raspberry, and blackberry plants on the Pacific coast.

crown-of-the-field (kroun″uv-the-fēld'), *n.* The corn-cockle, *Agrostemma Githago*.

crown-piece, *n.* 3. The crown-sheet or top plate of the fire-box of an internally fired boiler.

crown-plate (kroun'plāt), *n.* 1. The top plate of the fire-box of an internally fired boiler.—2. In *carp.*, the horizontal member which finishes a frame at the top. In a wall, as of a framed house, the crown-plate may receive the timbers of the attic floor, or the rafters of the roof, or both. It is the top chord of a frame, as the *sill* is the bottom chord.

crown-princess (kroun'prin″ses), *n.* The wife of a crown-prince: as, the *crown-princess* of Prussia. [Commonly as two words.]

crown-roast (kroun'rōst), *n.* The ribs of lamb as a fancy roast with the upper part of the bones trimmed and the whole turned on itself and so fastened that the center is hollow.

crown-tree (kroun'trē), *n.* 1. The horizontal timber of a timber framework, which rests on

top of the uprights and on which rest the rafters or, in some cases, the joists.—**2.** Same as ★*crown*, 7 (*m*).

crown-tuber (kroun'tū″bėr), *n.* A tuber the upper part of which is stem or crown, the lower part being root, as beet, carrot, radish. *L. H. Bailey.*

crown-work, *n.* **2.** In *dentistry*, the attachment of an artificial crown of gold or porcelain to the root of a tooth.

crow-pheasant (krō'fez″ant), *n.* A large East Indian ground-cuckoo, *Centropus rufipennis.*

crow-poison (krō'poi″zn), *n.* **1.** Same as *fly-poison*, 2.—**2.** A related plant, *Tracyanthus angustifolius*, found in low grounds from North Carolina to Florida.

crow-purse (krō'pėrs), *n.* A popular name of the egg-case of the skate, a black or dark-brown oblong case having a long process at each corner and a texture like that of leather.

crow's-foot, *n.* **5.** *pl.* The angular lines or arrow-points (made thus: < >) which are placed at the extremities of dimension-lines on a drawing to indicate between what points or planes the dimension is given.

crow's-nest, *n.* **2.** See ★*Cycadeoidea.*

crowstone, *n.* **3.** A name once commonly applied in Worcestershire, England, to fossil oyster-shells of the genus *Gryphæa* from the Jurassic rocks.

crow-twill (krō'twil), *n.* A four-harness twill-weave, regular or irregular. See ★*cassimere-twill.*

croydon (kroi'dọn), *n.* [From *Croydon* in Surrey.] A kind of two-wheeled carriage of the gig class, introduced about 1850, originally of wickerwork but afterward made of wood. *N. E. D.*

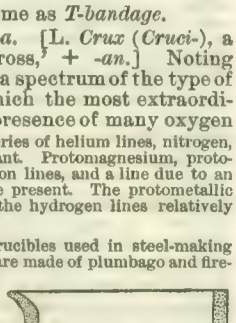
crozer (krō'zėr), *n.* [*croze* + *-er*[1].] In *barrel-making*, a machine for cutting the croze in barrel-staves or in the assembled package of staves forming a barrel; a crozing-machine.

crozier, *n.* **4.** In *bot.*, the circinate young frond of a fern. Also *crozier-head, crozier-bud. Sir C. Lyell*, Elem. of Geol., p. 230. [Rare.]—**5.** The flat, spirally coiled shell of the cephalopodous mollusk *Spirula.*

crozier-bud (krō'zhėr-bud), *n.* Same as ★*crozier*, 4.

crozier-head (krō'zhėr-hed), *n.* Same as ★*crozier*. 4.

crozing-machine (krō'zing-ma-shēn″), *n.* See ★*crozer.*



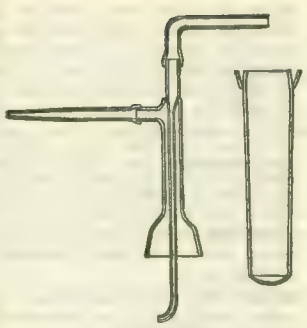
C. R. P. An abbreviation of *Calendar of the Patent Rolls.*

cruciade (krö-si-ād'), *n.* [F. *cruciade*, < It. *crociata*, ML. *cruciata:* see *crusade*[1].] **1.** A crusade.—**2.** A papal bull enjoining and authorizing a crusade, or granting indulgences to those who undertake a crusade.

Crucial bandage. Same as *T-bandage.*

crucian[2] (krö'shian), *a.* [L. *Crux* (*Cruci-*), a constellation, 'the Cross,' + *-an.*] Noting those stars which have a spectrum of the type of that of β Crucis, of which the most extraordinary character is the presence of many oxygen lines. Hydrogen, both series of helium lines, nitrogen, and carbon are predominant. Protomagnesium, protocalcium, both series of silicon lines, and a line due to an unknown body, λ-4649.2, are present. The protometallic lines are relatively thick, the hydrogen lines relatively thin.

crucible, *n.*, **1.** The crucibles used in steel-making will carry 200 pounds, and are made of plumbago and fire-clay. The crucible process for making steel is specially adapted for high-grade products with a high percentage of carbon, and for uses in which desirable properties are conferred by alloying the iron with other metallic elements such as chromium, tungsten, manganese, titanium, and the like.—**Caldwell's crucible,** a porcelain crucible with a movable perforated plate inserted to form the bottom.—**Gooch's crucible,** a platinum or porcelain crucible with a fixed or movable perforated bottom. A layer of fine asbestos spread over the bottom inside the crucible serves to collect any precipitate in a liquid filtered through it, usually by suction. The precipitate so collected is dried or ignited, and weighed with the crucible.—**Reduction crucible,** in *chem.*, a porcelain crucible with a perforated cover and inlet-tube of the same material, by means of which a metallic oxid may be heated in a stream of hydrogen gas.



Section of Modern Crucible.

—**Tubulated crucible,** a platinum crucible with a tubulated cover, used in iron-ore analysis.

crucible-earth (krö'si-bl-ėrth), *n.* Clay suitable for making fire-crucibles.

crucible-furnace (krö'si-bl-fėr″nās), *n.* See ★*furnace.*

Tubulated Crucible.

Crucibulum (krö-sib'ū-lum), *n.* [NL. (L. R. and Ch. Tulasne, 1844), < ML. *crucibulum*, a pot: see *crucible.*] A small genus of gasteromycetous fungi of the family *Nidulariaceæ.*

Crucibulum vulgare.

A, group of fruiting bodies in the successive stages of development; *B*, longitudinal section through a nearly mature but still closed fruiting body. (From Engler and Prantl's "Pflanzenfamilien.")

The peridium is yellowish and cup-shaped, and has the top at first covered with a membrane which ruptures at maturity and exposes the seed-like sporangioles which are attached to the peridium by thread-like processes called funiculi. *C. vulgare* is a common and widely distributed species, occurring on decaying wood, old rope, and matting.

crucificial (krö-si-fish'al), *a.* [Improp. formed from *crucifix*, with termination conformed to *sacrificial*, etc.] Of or pertaining to a crucifix.

He [the archbishop] stopped and blessed the people, making *crucificial* signs on the stairs.
Thackeray, Letters, Feb., 1849, p. 42.

Crucifixion attitude. See ★*attitude.*

cruciformly (krö'si-fôrm-li), *adv.* In the form of a cross.

crude, *a.*—**Crude oil,** natural mineral oil, "neither steamed nor treated, free from water, sediment, or any other adulteration, of the gravity of 43° to 48° B." *New York Oil Exchange*, Rule iv., quoted in *Dialect Notes*, II. vi.

cruentation (krö-en-tā'shọn), *n.* [L. *cruentatio*(*n-*), < *cruentare*, stain with blood, < *cruentus*, bloody.] Passive oozing of blood-tinged fluid from the cut surface of raw flesh. *Syd. Soc. Lex.*

cruise[1], *v. i.* **2.** To survey and estimate the amount and value of standing timber.

cruiser, *n.* **2.** In *forestry*, one who cruises or surveys and estimates the amount and value of standing timber.—**Armored cruiser,** a type of war-ship intermediate between a battle-ship and a protected cruiser. The distinction between an armored and a protected cruiser is that the water-line of the latter has no external armor-protection, though both have protective decks. The distinction between an armored cruiser and a battle-ship is that the former has higher speed, lighter guns, and thinner armor, though the two types tend to merge. See ★*battle-ship.*—**Auxiliary cruiser,** a merchant steamer converted into a cruiser by arming it with guns and putting it into commission as a war-vessel.—**Belted cruiser,** a type of war-ship intermediate between a battle-ship and a cruiser, having comparatively high speed and protected by a partial armor-belt of moderate thickness. The Spanish ships in the battle of Santiago (1898) were of this type. The belted cruiser may be considered the forerunner of the armored ★cruiser (which see).—**Protected cruiser,** a cruiser having a protective deck, but no vertical side armor except local protection for the guns.—**Scout cruiser,** a recent type of cruiser in which battery and protection have been sacrificed to a large extent in order to secure extreme speed combined with good sea-going qualities. These vessels are from 2,000 to 4,000 tons displacement and from 24 to 26 knots speed, and in some cases have steam-turbine propelling machinery.—**Torpedo cruiser** a small cruiser having a powerful torpedo armament.—**Unprotected cruiser,** a cruiser which has no armor or protective deck. These vessels are usually of small size and are practically obsolete.

crum, *n.* and *v.* A simplified spelling of *crumb*[1].

crummy, *a.* **3.** Plump; buxom: as, a *crummy* lass. [Eng. slang.]

Crumpsall yellow. See ★*yellow.*

crupper, *n.* **3.** *Naut.*, the train-tackle bolt in a gun-carriage.—**Crupper bolt.** Same as ★*crupper*, 3.—**Crupper chain** (*naut.*), an old-fashioned device for securing the heel of the jib-boom to the bowsprit; it consists of a length of small chain passing around the two spars.—**Crupper loop,** a metal loop attached to a saddle-tree or pad-frame for securing the crupper.—**Crupper notch** (*naut.*), the score in the heel of the jib-boom for receiving the crupper chain.

crural, *a.* **5.** Of or pertaining to the crura. See ★*crus.*—**Crural neuralgia.** See ★*neuralgia.*

cruralium (krö-rā'li-um), *n.*; pl. *cruralia* (-ä). [NL., < L. *cruralis:* see *crural.*] In the *Brachiopoda*, the calcareous supports for the coiled internal arms when formed, by the union of the crura (see ★*crus*), into a single apparatus: contrasted with ★*spiralium*, which is applied to the coiled supports.

crurin (krö'rin), *n.* [L. *crus* (*crur-*), leg, + *-in*[2].] A powder, quinoline-bismuth-sulphocyanate, used as a dressing for various forms of ulcers.

cruriped (krö'ri-ped), *n.* [L. *crus* (*crur-*), leg, + *pes* (*ped-*), foot.] One of the ambulatory appendages following the chelipeds or great claws on the cephalothorax, especially of crabs and lobsters. *J. E. Ives.*

crus, *n.* **2.** *pl.* The calcareous brachial supports in the *Brachiopoda*, as in *Pentamerus* and *Rhynchonella*, where they are a pair of short discrete, slightly curved lamellæ. Also called *crural plates.*—**Auricular crura,** in certain pelecypod mollusks, a hinge-structure consisting of two ridges which diverge within and below the beaks. This structure, in specialized forms, develops into concentric teeth and sockets which cannot be separated without breaking, as in *Spondylus.*

crush, *n.* **3.** In Australia, a funnel-shaped, fenced lane or passageway for cattle.—**4.** In *coal-mining:* (*a*) A general settlement of the strata above a coal-mine, due to failure of the pillars: generally accompanied by numerous local falls of roof-rocks in the workings. (*b*) A species of fault in coal.—**5.** The amount of cotton-seed crushed for oil during a given season: as, a large *crush.*

crush-breccia (krush'brech″i-ä), *n.* A breccia produced by the shattering of rocks along a fault. See ★*fault-breccia.*

crush-conglomerate (krush'kọn-glom″e-rāt), *n.* See ★*conglomerate.*

crusher, *n.* **3.** Specifically, a crushing-machine. The most common type has two converging jaws operated by powerful mechanism, between which the mineral is crushed by pressure. To this type belong the Blake and Dodge crushers. (See *Blake* ★*crusher.*) Another more recent type has a gyrating swinging cone in a hopper-shaped receptacle, as in the Gates and McCully breakers. Crushers are used to prepare stone for road-ballast, for concrete, and for other engineering purposes, and in mining to prepare the ore for finer crushing by rolls, stamps, etc.

4. A mill for grinding sugar-beets, potatoes, and other roots to reduce them to a pulp for use in the manufacture of sugar or starch.—**5.** In *elect.*, a device for reducing the apparent fall of potential in the ground return-circuit of an electric system. The function of a crusher in such a circuit is similar to that of a booster in a system with insulated return-circuit. Both terms are of slang origin, but have acquired recognition on account of the great practical importance of the devices thus designated.—**Blake crusher,** a machine for crushing ore or other hard material in coarse lumps. It is provided with two jaws, one stationary and one swinging. The machine moves at the rate of about 250 revolutions a minute, the swinging jaw advancing about half an inch toward the stationary jaw at each revolution. The size of the fragments is limited by the distance between the jaws at the bottom, which can be regulated at will. The capacity of a machine whose dimensions at the mouth are 20 inches by 10 inches is about 300 tons of ordinary rock per day of 24 hours. See *stone-breaker*, with cut.

Crushing strain, the strain which causes a piece of material to fail, or tend to fail, by compression. Most brittle materials, such as cement, stone, and cast-iron, fail by shearing at an angle, while the more ductile materials, such as wrought-iron and soft brass, fail by bulging.—**Crushing strength,** the strength of a substance measured in terms of the load necessary to crush a test-piece of it one cubic centimeter (or one cubic inch) in size.

crushing-rolls (krush'ing-rōlz), *n. pl.* A machine consisting of two heavy rolls between which ore, coal, or other mineral is drawn and crushed. Sometimes the rolls are toothed or ribbed, but for ore their surface is generally smooth.

crush-line (krush'līn), *n.* In *geol.*, a line along which rocks, under great compression, yield, usually with the production of schistosity.

Such, too, has been the compression that in some cases dykes of 50 or 60 yards in breadth are reduced where one of these thrusts or *crush-lines* crosses them obliquely to a thickness of no more than four feet.
Geikie, Text-book of Geol., p. 888.

crush-movement (krush'möv″ment), *n.* In *geol.*, compression, thrust, or lateral movement tending to develop shattered zones.

The greater part, if not actually of Bala age, seem to have been intruded before the post-Bala *crush-movements*. *Nature*, June 16, 1904, p. 166.

crush-plane (krush'plān), *n.* In *geol.*, a plane defining zones of shattering which result from lateral thrust.

The previous investigators of Fassa Valley failed to recognise the presence of the innumerable *crush-planes* with extremely low hade, and the branch-connection of many of them with leading cross-faults, and consequently overlooked the correlation of the igneous invasions with pre-existent deformational structures.
Annals and Mag. Nat. Hist., Jan., 1904, p. 79.

crush-zone (krush'zōn), *n.* In *geol.*, a zone of faulting and brecciation in rocks.

Throughout the Tertiary crust-movements in the Alps, this passage-zone had been the great *crush-zone* of the district. *Nature*, Feb. 12, 1903, p. 359.

crust, *n.*—**Flotation crust**, the thin solid crust of the earth that has been thought to rest upon a liquid mass beneath. Earlier theorists were accustomed to explain changes of level and many other adjustments by this floating of the crust. *Dana*, Manual of Geol., p. 378. —**In crust**, in *currying*, said of a skin which has been tanned and colored but not glazed or entirely finished. *Flemming*, Practical Tanning, p. 312.—**Weathered crust**, a film or zone on the outside of a stone which shows marked alteration or decay. Such a crust is not always more fragile than the unchanged interior, and may form a hard shell or successive shells.

They show no *weathered crusts*, and the matrix of finer-grained materials is similarly unaltered.
J. Geikie, The Great Ice Age, p. 23.

crustaceal (krus-tā'shiạl), *a.* Same as *crustacean*.

crustaceoid (krus-tā'sē-oid), *a.* [*crustaceous* + *-oid.*] Resembling a crustacean. *Dana.*

crust-creep (krust'krēp), *n.* See ★*creep.*

crust-fold (krust'fōld), *n.* In *geol.*, a fold in the earth's crust.

'The great Rocky Mountain-Andes fold, . . . the longest and most continuous *crust-fold* of the present day.'
Geog. Jour. (R. G. S.), XV. 48.

crust-fracture (krust'frak″tụ̄r), *n.* An extended fracture in the earth's crust.

It may probably be regarded as true of any wide region upheaved by a folding-movement and afterwards submerged, that old crust-forms and *crust-fractures*, especially such as allow occasional intrusion and outlet of volcanic material, are determining factors in the distribution of the subsequent deposits.
Geog. Jour. (R. G. S.), XVI. 460.

crustification (krus″ti-fi-kā'shọn), *n.* The forming of a crust or coating or band, by chemical precipitation, in a cavity from mineral-bearing waters.

As a general rule, however, *crustification* is a characteristic feature of cavity-filling.
F. Posepny, Trans. Amer. Inst. Min. Engin., 1893, p. 207.

crust-movement (krust'möv″ment), *n.* An extensive movement of the earth's crust.

There are two primary and permanent kinds of *crust-movements*, namely, (*a*) those which give rise to those greatest inequalities of the Earth's surface — oceanic basins and continental surfaces; and (*b*) those which by interior contraction determine mountains of folded structure.
Geog. Jour. (R. G. S.), IX. 669.

crust-strain (krust'strān), *n.* A strain in the earth's crust. *Geog. Jour.* (R. G. S.), XVI. 457.

crust-stress (krust'stres), *n.* Local strains and pressure within the rocks of the earth's crust.

During the geological periods when the fault-vent continued intermittently active, the form of the sill-complex was capable of being re-moulded periodically in harmony with the localised *crust-stresses*.
Nature, Sept. 3, 1903, p. 413.

crust-torsion (krust'tôr″shọn), *n.* A twisting stress in the earth's crust.

Crust-torsion has already been recognized as a mode of crust-deformation associated with the superposition of different movements upon one another, either simultaneously or successively. . . . In 1898, I demonstrated, by the field geology of Enneberg, that phenomena of *crust-torsion* were induced by any combination of crust-pressures, not only by cross-movements crossing rectangularly, but also by cross-movements at any oblique angle.
M. M. O. Gordon, in Geog. Jour. (R. G. S.), XVI. 457.

crutch[1], *n.* **3.** (*h*) The angle at the meeting of the flukes forming the tail of a whale; the fluke-notch. (*i*) In *leather-manuf.*, a contrivance which fits under the arm like a crutch: used in hand-staking.—**Crutch paralysis.** See ★*paralysis.*

crutch[1], *v. t.* **3.** In *leather-manuf.*, to work with a crutch. *Flemming*, Practical Tanning, p. 81.

crutcher (kruch'ėr), *n.* In *soap-making*, a vessel in which the ingredients of soap are mixed and thoroughly stirred together: so called from the wooden paddle sometimes used to mix soap. See *crutch*, 3 (*e*).

crutch-hole (kruch'hōl), *n.* *Naut.*, a hole designed to receive the stanchion on which a boom or other spar rests, to prevent it from slipping; also, a hole on the quarter-rail of a boat for the use of a steering-oar.

cruzada (krō-thä'dä), *n.* [Sp.: see *crusado*[2].] A gold coin of Castile of the time of Pedro I. (1350–68): it weighed $92\frac{5}{10}$ grains.

cry, *n.*—**Epileptic cry**, a loud cry which sometimes precedes the respiratory spasm in an epileptic attack.—**Hydrocephalic cry**, a sudden shriek or loud scream uttered by a child suffering from meningitis.—**Night cry**, a sudden shrill scream uttered by a child in its sleep: often a sign of beginning joint-disease.

cryæsthesia (krī-es-thē'si ạ), *n.* [NL., < Gr. *κρύος*, cold, + *αἴσθησις*, perception.] Sensitiveness to cold.

cryalgesia (krī-al-jē'si-ạ), *n.* [NL., < Gr. *κρύος*, cold, + *ἄλγησις*, sense of pain.] Pain caused by cold.

cry-baby (krī'bā″bi), *n.* One who, like a baby, is prone to tears. [A derisive term among children.]

crymophyte (krī'mọ̄-fīt), *n.* [Gr. *κρυμός*, icy cold, + *φυτόν*, plant.] In *phytogeog.*, a plant adapted to life under low temperatures.

crymotherapeutics (krī″mọ̄-ther-ạ-pū'tiks), *n.* [Gr. *κρυμός*, icy cold, + *θεραπευτικός*, of medical treatment.] The employment of cold in the treatment of disease.

crymotherapy (krī-mọ̄-ther'ạ-pi), *n.* [Gr. *κρυμός*, icy cold, + *θεραπεία*, medical treatment.] Same as ★*crymotherapeutics.*

Cryogen blue. See ★*blue.*

cryogenic (krī-ọ̄-jen'ik), *a.* [Gr. *κρύος*, cold, + *-γενής*, -producing.] Producing cold; especially, noting an apparatus or a laboratory for experimenting at the extreme low temperatures which may be produced by the evaporation of liquefied ethylene, air, oxygen, or hydrogen.

The physical laboratory of the University of Leipzig, the *cryogenic* laboratory, and the Astronomical observatory of Leiden. *Rep. Carnegie Inst.*, 1903, p. 186.

cryohydrate (krī-ọ̄-hī'drāt), *n.* [Gr. *κρύος*, cold, + *ὕδωρ* (*ὑδρ-*), water, + *-ate*[1].] A definite mixture of ice and any crystallized salt obtained by freezing a saturated aqueous solution of the salt.

Cryohydrates were supposed by Guthrie, to whom the name is due, to be chemical compounds, but they are now regarded as mixtures the constancy of proportion of which is due to the uniform conditions of temperature, etc., under which they are produced. . . . A *cryohydrate* is the lowest freezing-mixture of two substances.
H. C. Jones, Physical Chem., p. 222.

cryohydric (krī-ọ̄-hī'drik), *a* [*cryohydr-ate* + *-ic.*] Producing, produced by, or connected with a cryohydrate.

If the solution saturated with two iodides be cooled to the freezing-point, ice will separate. Five phases are then present, ice, the two iodides, solution and vapor, and the system becomes non-variant. Such a system can exist only at its *cryohydric* temperature, and the composition of the solution is fixed
Amer. Chem. Jour., March, 1903, p. 205.

Cryohydric temperature, the temperature at which a cryohydrate is produced.

cryolithionite (krī-ọ̄-lith'i-ọ̄-nīt), *n.* [Gr. *κρύος*, cold, + NL. *lithium* + *-n-* + *-ite*[2].] A fluoride of aluminium, sodium, and lithium ($Li_3Na_3Al_2F_{12}$) occurring in colorless dodecahedrons at the cryolite locality in Greenland.

cryometer (krī-om'e-tėr), *n.* [Gr. *κρύος*, cold, + *μέτρον*, measure.] A thermometer for the measurement of low temperatures (usually below the freezing-point of mercury) and therefore containing alcohol or a similar liquid of low freezing-point.

cryophoric (krī-ọ̄-for'ik), *a.* [*cryophor-us* + *-ic.*] Of or pertaining to the cryophorus, or to any instrument or method for freezing a liquid by its own evaporation.

cryoplankton (krī-ọ̄-plangk'ton), *n.* [NL., < Gr. *κρύος*, cold, ice, + NL. *plankton.*] The 'plankton,' particularly the algic flora, which is found in the snow and ice of polar and alpine regions.

cryoscopic (krī-ọ̄-skop'ik), *a.* [*cryoscop-y* + *-ic.*] Of or pertaining to the phenomena of freezing, specifically to those methods of determining molecular weights, degrees of dissociation, and other properties of substances which depend upon measurements of the freezing-point.

Raoult indicated the possibility of employing the lowering of the vapor-pressure of a solution in determining the molecular weight of a dissolved substance. In his opinion, however, the experimental difficulties were such as to give preference to the *cryoscopic* and ebullioscopic methods. *Amer. Chem. Jour.*, April, 1903, p. 342.

cryoscopy (krī-os'kọ̄-pi), *n.* [Gr. *κρύος*, cold, + *-σκοπία*, < *σκόπειν*, view.] That department of physical chemistry which treats of the freezing or solidification of liquids and solutions; specifically, the determination of molecular weights of dissolved substances by the lowering of the freezing-point of their solutions in suitable solvents.

Taking into account all the difficulties and disturbing factors in experiments of this kind, the authors conclude that their results tend to increase confidence in the methods of exact *cryoscopy*. *Nature*, Jan. 15, 1903, p. 263.

cryostase (krī'ọ̄-stās), *n.* [Gr. *κρύος*, cold, + *στάσις*, standing.] A mixture of equal parts of phenol, saponin, and camphor, with a little turpentine. It is liquid when cold, but solidifies on warming.

Cryphæus (kri-fē'us), *n.* [NL., < Gr. *κρυφαῖος*, concealed, < *κρύπτειν*, conceal.] A genus of Devonian trilobites, of the family *Phacopidæ*, having broad and long genal spines and a fringe of flat spines on the pygidium.

crypsis, *n.* **2.** A term used in the discussions of the seventeenth century to designate Christ's possession of divine omnipotence and divine omniscience, with conscious restraint in the use of them.

crypt, *n.*—**Morgagni's crypts**, minute depressions in the bulbous portion of the urethra; also, pits in the rectal mucous membrane.

Cryptaulax (krip-tâ'laks), *n.* [Gr. *κρυπτός*, concealed, + *αὐλαξ*, a furrow, groove.] A genus of platypodous mollusks, of the family *Cerithiidæ*. They have turreted shells with spiral ribs on the whorls and a scarcely perceptible canal in the aperture. The genus occurs in Triassic and Jurassic rocks.

cryptic, *a.* **2.** In *biol.*, serving to conceal or fitted for concealing an organism.

The most perfect *Cryptic* powers are possessed by those animals in which the individuals can change their colours into any tint which would be appropriate to a normal environment. *Encyc. Brit.*, XXVII. 147.

cryptitis (krip-tī'tis), *n.* [NL., < *crypta*, crypt, + *-itis.*] Same as *folliculitis.*

Crypto-Calvinism (krip-tọ̄-kal'vin-izm), *n.* **1.** Concealed Calvinism: an opprobrious term used, during the controversy concerning the doctrine of the Lord's Supper (1552–74), to designate the teaching of Melanchthon, who favored the Calvinistic view of the spiritual presence of Christ, as opposed to the Lutheran view.—**2.** Applied, in 1881, to the doctrine of unconditional election (semi-Calvinistic) held by Missouri Lutherans.

Crypto-Catholic (krip-tọ̄-kath'ọ-lik), *a.* and *n.* **I.** *a.* Of or pertaining to Crypto-Catholicism.

II. *n.* One initiated into a supposed system of hidden or esoteric (Roman) Catholicism.

Crypto-Catholicism (krip″tọ̄-ka-thol'i-sizm), *n.* A supposed system of hidden or esoteric (Roman) Catholicism known only to the initiated.

Cryptocephala (krip-tọ̄-sef'ạ-lạ), *n. pl.* [NL., < Gr. *κρυπτός*, hidden, + *κεφαλή*, head.] A group of *Annelida*, of the order *Polychæta.* They have the præstomium more or less hidden by the peristomium, which grows forward; the tentacles reduced, but the palps greatly developed and subdivided, forming the crown of gills; the body distinguishable into the thorax and abdomen, characterized by the form and arrangement of the setæ and by certain internal differences. The group includes the *Sabellidæ*, *Eriographidæ*, *Amphicorinidæ*, *Serpulidæ*, and *Hermellidæ*. Contrasted with *Phanerocephala.*

cryptocerate (krip-tos'ẹ-rāt), *a.* and *n.* **I.** *a.* Pertaining to or resembling the *Cryptocerata.*

II. *n.* A member of the *Cryptocerata.*

cryptochelate (krip-tọ̄-kē'lāt), *a.* [Gr. *κρυπτός*, hidden, + *χηλή*, claw (see *chela*), + *-ate*[1].] Having the chelæ hidden or so minute as to escape notice without close observation, as certain crustaceans.

cryptochroism (krip-tok'rọ̄-izm), *n.* [Gr. *κρυπτός*, hidden, + *χρόα*, color, + *-ism.*] A difference in properties of X-rays and other obscure rays, due to difference in wave-length and analogous to the color-difference in light-rays.

cryptoclastic (krip-tọ̄-klas'tik), *a.* [Gr. *κρυπτός*, hidden, + *κλαστός*, broken.] In *petrog.*, composed of fragments too small to be seen by the unaided eye.

cryptoclite (krip'tọ̄-klīt), *n.* [Gr. *κρυπτός*, hidden, + **κλιτός*, verbal adj. of *κλίνειν*, incline.] In *gram.*, a noun whose originally normal inflections have been disguised by phonetic changes, as by hidden umlaut, quasi-gemination of semi-vowels, contraction, etc., so that the resulting forms are irregular. An example is, in Anglo-Saxon, nominative *man*, dative *men*, plural *men*, whence English *man*, plural *men*. *March*, Anglo-Saxon Gram., p. 52.

cryptococcus (krip-tō-kok'us), *n.* [NL., < Gr. *κρυπτός*, hidden, + *κόκκος*, berry (coccus).] Same as *Saccharomyces.*—**Cryptococcus xanthogenicus**, a microbe believed by Freire of Brazil to be the cause of yellow fever.

Cryptocrinus (krip-tok'ri-nus), *n.* [NL., < Gr. *κρυπτός*, hidden, + *κρίνον*, a lily (see *crinoid*).] A genus of Silurian cystideans in which the calyx is composed of three rings of perforate plates, the mouth is central, the arms are eccentric, and the stem is short.

cryptocyst (krip'tō-sist), *n.* [Gr. *κρυπτός*, hidden, + *κύστις*, bladder, bag.] In certain polyzoans, a portion of the body cavity separated from the remainder by a calcareous lamina. [Not used.]

In the Microporidae and Steganoporellidae, and perhaps in many of the Lepralloid Cheilostomata, the body-cavity is partially subdivided by a calcareous lamina ("*cryptocyst*," Jullien) which grows from the proximal side. *Encyc. Brit.*, XXXI. 829.

Cryptocystes (krip-tō-sis'tēz), *n. pl.* [NL., pl. of *cryptocystis*, < Gr. *κρυπτός*, hidden, + *κύστις*, bladder.] A group of *Myxosporidia* having minute pear-shaped spores, with one polar capsule and more than two spores formed in each pansporoblast. They are cell-parasites. Also *Microsporidia*.

Cryptodira (krip-tō-dī'rä), *n. pl.* [Gr. *κρυπτός*, hidden, + *δειρή*, neck.] A division or suborder of *Chelonia* containing those species in which the neck can be bent in a vertical plane and is usually capable of being withdrawn within the body: contrasted with *Pleurodira*.

cryptodiran (krip-tō-dī'ran), *a.* and *n.* **I.** *a.* Relating to or characteristic of the *Cryptodira*.

II. *n.* A member of the *Cryptodira*.

cryptodire (krip'tō-dīr), *n.* One of the *Cryptodira*.

crypto-double (krip'tō-dub″l), *n.* A double star of which the components are too close to be resolved by the telescope, but the duplicity of which is indicated by the fact that its spectrum is composed of two spectra of different classes overlying each other. Alpha Equulei is a typical case. This star and several others have been shown to be spectroscopic binaries.

Indeed, several of Miss Maury's *crypto-doubles*, o Leonis, o Andromedæ, and *a* Equulei among the number, have been spectroscopically resolved by Professor Campbell into unlike pairs. *A. M. Clerke*, Problems in Astrophysics, p. 266.

Cryptodrilidæ (krip-tō-dril'i-dē), *n. pl.* [NL., < *Cryptodrilus* (see def.) + *-idæ*.] A family of terricolous *Annelida*, of the order *Oligochæta*. They have 8 setæ on each segment, clitellum occupying some or all of segments 12 to 23, usually complete anteriorly, spermathecæ 1 to 5 pairs placed anteriorly, male pores on segments 17 or 18, nephridia paired or diffuse. Members of this family occur in nearly all parts of the world, but are mainly tropical and especially Australian. It includes *Microscolex*, *Pontodrilus*, *Cryptodrilus*, *Microdrilus*, and other genera.

Cryptogamic botany. See ★*botany*.

cryptogenetic (krip″tō-jē-net'ik), *a.* [Gr. *κρυπτός*, hidden, + *γένεσις*, origin: see *genetic*.] Having no evident cause; of unknown origin; specifically, noting a disease of unknown origin. *Buck*, Med. Handbook, IV. 585.

cryptogenic (krip-tō-jen'ik), *a.* [Gr. *κρυπτός*, hidden, + *-γενής*, -producing.] Same as ★*cryptogenetic*.

cryptogenous (krip-toj'ē-nus), *a.* Same as ★*cryptogenetic*.

cryptogramic (krip-tō-gram'ik), *a.* Pertaining to or of the nature of a cryptogram.

Cryptogramma (krip-tō-gram'ä), *n.* [NL. (Robert Brown, 1823), < Gr. *κρυπτός*, hidden, + *γραμμή*, a line.] A small genus of boreal polypodiaceous ferns, the rock-brakes, distinguished from *Pellæa* mainly by their dimorphic fronds. Two species, *C. Stelleri* and *C. acrostichoides*, occur in the northern United States and Canada. The latter and a closely allied European species, *C. crispa*, are known as *parsley-fern*.

cryptogrammatic (krip″tō-gra-mat'ik), *a.* Of, pertaining to, or of the nature of a cryptogram.

cryptogrammatical (krip″tō-gra-mat'i-kal), *a.* Same as ★*cryptogrammatic*.

cryptogrammatist (krip-tō-gram'a-tist), *n.* One who is skilled in cryptograms and their decipherment.

cryptographic, *a.* **3.** In *petrog.*, noting a fabric formed by the graphic intergrowth of two minerals, but so minute as not to be seen by the unaided eye.

cryptographist (krip-tog'ra-fist), *n.* One who is skilled in cryptography.

cryptoheresy (krip-tō-her'e-si), *n.* Concealed heresy; hidden heresy.

cryptoheretic (krip-tō-her'e-tik), *n.* A secret heretic; one who secretly holds heretical views.

Crypto-Jesuit (krip-tō-jez'ū-it), *n.* A secret Jesuit; one who has, or is supposed to have, secret affiliation with the Society of Jesus.

Crypto-Jesuitism (krip-tō-jez'ū-it-izm), *n.* Disguised Jesuitism.

Cryptol, *n.* See ★*kryptol*.

cryptolin (krip'tō-lin), *n.* [*cryptol* + *-in*².] An organic liquid sometimes found in cavities of topaz, chrysoberyl, or quartz. It hardens to a resinous body when exposed to the air.

Cryptomeria (krip-tō-mē'ri-ä), *n.* [NL. (Don, 1839), < Gr. *κρυπτός*, hidden, + *μέρος*, a part. The plant is so named because the seeds are well covered by the scales.] A genus of coniferous plants of the family *Pinaceæ* and tribe *Taxoideæ*, technically distinguished from *Taxodium* by the manifest toothed inner scales of the cones. There is only one species, *C. Japonica*, the Japan cedar, or sugi, a native of Japan and northern China. See *sugi* and *Japan* ★*cedar*.

Cryptomeria Japonica.

a, a branch with both male (left) and female (right) flowers; *b*, male spike; *c* and *d*, stamens showing anthers; *e*, a scale seen from the back; *f*, a scale seen from the side; *g*, a seed. (Drawn from Engler and Prantl's "Pflanzenfamilien.")

cryptomerous (krip-tom'ē-rus), *a.* [Gr. *κρυπτός*, hidden, + *μέρος*, a part.] In *petrog.*, exceedingly fine-grained; dense; aphanitic; applied to the texture of rocks.

cryptomnesia (krip-tom-nē'si-ä), *n.* [NL., < Gr. *κρυπτός*, hidden, + *μνῆσις*, memory.] In *psychol.*, subconscious memory; memory exercised by the subliminal self.

Cryptomonadina, *n.* **3.** A family of *Protozoa*, of the order *Flagellata*, having either a colored or a colorless body, usually compressed laterally, without true cuticle, with two long anterior flagella, and the anterior end obliquely truncated. It includes *Chilomonas*, *Cyathomonas*, *Cryptomonas*, and *Oxyrrhis*.

cryptonema (krip-tō-nē'mä), *n.*; pl. *cryptonemata* (-ma-tä). [NL., < Gr. *κρυπτός*, hidden, + *νῆμα*, thread.] In *bot.*, one of the hairs or threads formed in a cryptostoma. See *cryptostoma*.

Cryptoniscidæ (krip-tō-nis'i-dē), *n. pl.* [NL., < *Cryptoniscus* + *-idæ*.] A family of isopod crustaceans parasitic on cirripeds, typified by the genus *Cryptoniscus*.

Cryptoniscus (krip-tō-nis'kus), *n.* [NL., < Gr. *κρυπτός*, hidden, + *ὀνίσκος*, a wood-louse: see *Oniscus*.] The typical genus of the family *Cryptoniscidæ*. *C. planarioides* is a parasite on *Peltogaster purpureus*, which in turn is parasitic on a pagurid crustacean. *F. Müller*, 1864.

cryptonymous (krip-ton'i-mus), *a.* [As *cryptonym* + *-ous*.] Having the real name concealed; pseudonymous: as, a *cryptonymous* author.

Cryptoparamera (krip″tō-pa-ram'e-rä), *n. pl.* [NL., < Gr. *κρυπτός*, hidden, + NL. *Paramera*.] One of two grades (the other being *Paramera*) of zoantharian *Anthozoa*, in which the primary bilateral symmetry is obscured by the radial development of the second and succeeding series of mesenteries. It includes the order *Actiniidea*.

cryptoperthite (krip-tō-pėr'thīt), *n.* [Gr. *κρυπτός*, hidden, + E. *perthite*.] A name given to certain feldspars whose composition and optical characters make it probable that they have the structure of perthite, although the supposed interlamination of albite and orthoclase is too fine to be discernible even with the microscope.

cryptophagid (krip-tof'a-jid), *n.* and *a.* **I.** *n.* A member of the *Cryptophagidæ*.

II. *a.* Pertaining to or resembling the coleopterous family *Cryptophagidæ*.

cryptophanic (krip-tō-fan'ik), *a.* [Gr. *κρυπτός*, hidden, + *-φανης*, < *φαίνεσθαι*, appear.] Appearing only obscurely; scarcely appearing: noting an amorphous acid, $C_{10}H_{18}O_{10}N_2$, which in small amounts is said to occur in human urine.

cryptophthalmia (krip-tof-thal'mi-ä), *n.* [NL., < Gr. *κρυπτός*, hidden, + *ὀφθαλμός*, eye.] Congenital closure of the eye through union of the eyelids, the eyeball itself being usually also imperfectly formed.

cryptophyte (krip'tō-fīt), *n.* [Gr. *κρυπτός*, hidden, + *φυτόν*, plant.] Same as *cryptogam*. [Rare.]

Cryptoplacidæ (krip-tō-plas'i-dē), *n. pl.* [NL., < *Cryptoplax*, a genus (< Gr. *κρυπτός*, hidden, + *πλάξ* (*πλακ-*), anything flat), + *-idæ*.] A family of polyplacophorous *Mollusca* or chitons with small valves.

cryptoscope (krip'tō-skōp), *n.* [Gr. *κρυπτός*, hidden, + *σκοπεῖν*, view.] A fluorescent screen, with a hood, for the observation of bodies under the action of X-rays; a ★fluoroscope (which see, with cut).

cryptoscopic (krip-tō-skop'ik), *a.* Of or pertaining to the use of the fluorescent screen or cryptoscope.

cryptoscopy (krip-tos'kō-pi), *n.* [Gr. *κρυπτός*, hidden, + *-σκοπία*, < *σκοπεῖν*, view.] The art or process of examining, by means of a fluorescent screen, bodies which are subjected to the X-rays.

cryptostemmid (krip-tō-stem'id), *n.* and *a* **I.** *n.* A member of the *Cryptostemmidæ*.

II. *a.* Of or belonging to the family *Cryptostemmidæ*.

Cryptostomata (krip-tō-stō'ma-tä), *n. pl.* [Gr. *κρυπτός*, hidden, + *στόμα(τ-)*, mouth.] A suborder of the *Bryozoa*, characterized by having the apertures of the zoœcia concealed, lying at the bottom of a tubular vestibule which may be divided by diaphragms and is surrounded by vesicular or solid tissue. Marsupia and avicularia are absent. The group is essentially of Paleozoic age.

cryptostomatous (krip-tō-stom'a-tus), *a.* [Gr. *κρυπτός*, hidden, + *στόμα(τ-)*, mouth.] Having the mouth-opening concealed.

cryptozoic (krip-tō-zō'ik), *a.* [Gr. *κρυπτός*, hidden, + *ζωή*, life.] **1.** Leading a concealed life: in *zoöl.*, applied to those animals which habitually seek concealment and pass the greater part of their lives beneath logs, stones, etc.

Among terrestrial animals those which habitually live on the open ground must be distinguished from ... *cryptozoic* forms which live under stones, logs of wood, etc., such as Land Planarians, Peripatus, Centipedes, and Woodlice. *Parker and Haswell*, Zoölogy, II. 601.

2. Having the organic evidences concealed: in *petrog.*, applied to limestones whose organic origin cannot be recognized by the unaided eye, as lithographic limestone. *Renevier*, 1882.

Cryptozonia (krip-tō-zō'ni-ä), *n. pl.* [NL., < Gr. *κρυπτός*, hidden, + *ζώνη*, girdle.] An order of extinct starfishes with the marginal plates inconspicuous, the entire surface papillate, and the ambulacral plates crowded and narrow.

cryptozygous, *a.* **2.** In *craniom.*, having a stephanozygomatic index of more than 100.

crys. An abbreviation (*a*) of *crystal*; (*b*) of *crystallography*.

crystal, *n.* **6.** An English trade-name for a fine quality of white sugar.—**Asthma crystals.** Same as *Charcot's crystals*.—**Boettcher's crystals**, crystals found in the prostatic secretion: possibly the same as *Charcot's crystals*.—**Charcot-Leyden crystals.** Same as *Charcot's crystals* (under *crystal*).—**Coffin-lid crystals**, crystals of triple phosphate found sometimes in the urine.—**Corroded crystals**, in *petrog.*, crystals that have been partly resorbed or dissolved by the molten magma before its final solidification.—**Demerara crystals**, a commercial name of a kind of sugar, originally and chiefly brought from Demerara, obtained by direct boiling down of cane-juice, preferably in vacuum-pans, and careful washing of it in centrifugals.—**Dumb-bell crystals**, crystals of calcium oxalate sometimes found in the urine.—**Equatorial crystal.** See ★*equatorial*.—**Hedgehog crystals**, globular crystals of sodium urate having numerous sharp acicular projections.—**Hopper crystal**, a crystal having the form of a hollow inverted pyramid, or one having cavernous faces of this shape. Such crystals are usually the result of rapid and imperfect crystallization, as with rock-salt formed from an evaporating brine.—**Lead-**

chamber crystals, colorless crystals which form in the leaden chambers in which sulphuric acid is made upon a great scale, and which can also be prepared by laboratory methods. They consist of nitrosyl-sulphuric acid or nitrosulphonic acid ($SO_2.HO.NO_2$). If it comes in contact with water the substance is decomposed, producing sulphuric acid and nitrogen trioxid or the products of its dissociation, the dioxid and tetroxid of nitrogen.—**Leucocytic crystals**, the Charcot-Leyden crystals: so named on account of their common association with eosinophilic leucocytes.—**Liquid crystal**, a crystallized substance in which some of the properties belonging to the solid crystals are lost, not when the substance is fused, but at some higher temperature. For instance, *p*-azoxyanisoil fuses at 114° C. The liquid shows strong double refraction, so that its molecules possess a regular arrangement like that in a solid crystal; but it is mobile and rises in a capillary tube, so that it is indubitably a liquid. At 134.1° C. it suddenly becomes in all respects like an ordinary liquid.—**Platner's crystals**, crystals of the salts of the bile acids.—**Protein crystals**. See ★*protein*.—**Skeleton crystal**, a crystal whose edges are developed while the interior is more or less hollow. In such cases the edges are often formed of a multitude of minute crystals (for example, cubes) in parallel position. The form is common with certain of the native metals, as gold, silver, and copper.—**Teichmann's crystals**, a crystalline product which is obtained from blood-coloring matter by evaporation with salt and glacial acetic acid. An important medicolegal test is based upon the formation of these crystals. Chemically they are hemin crystals of the composition $C_{34}H_{33}N_4O_4FeCl$.—**Virchow's crystals**, crystals of hematoidin.—**Whetstone crystals**, crystals of xanthin sometimes found in urine.

crystal-gazing (kris′tal-gā″zing), *n.* A steady staring into the depths of a clear object, now usually a glass ball, with the view of arousing visual perceptions. Crystal-gazing is of world-wide occurrence in folk-magic, the object of the practice being to determine what is taking place at a distance or to obtain information regarding the future. A well-known variant is the use of the ink-pool, and the experiment will also succeed, in many cases, with clear water. The visions which the gazer imagines he sees in the crystal are by the ignorant believed to be of supernatural origin, and figure in fortune-telling and other impostures. Among those who seek a scientific explanation it is customary to refer the 'visions' to subliminal or subconscious processes; but they are more probably, at least in most instances, ordinary illusions, constructed by association on the basis of the stimulus which is supplied by the pleasing form, the apparent depth, and the glitter and cross-lights of the crystal.

Post-hypnotic suggestion, *crystal-gazing*, automatic writing and trance-speech, the willing-game, etc., are now, thanks to him [Myers], instruments of research.
W. James, in Proc. Soc. Psychical Research, May, 1901, p. 17.

Crystallic attraction. See ★*attraction*.

crystalliform (kris-tal′i-fôrm), *a.* [L. *crystallum*, crystal, + *forma*, form.] Of crystalline form: as, a *crystalliform* body.

Crystalline glaze, etc. See ★*glaze*, etc.

Crystalline liquid. Same as *liquid* ★*crystal*.

crystallinic (kris-ta-lin′ik), *a.* [*crystalline* + *-ic*.] Of a crystalline character: in *petrog.*, a term used to designate metamorphism in which there is simply a change in crystallization, as the change of limestone to marble. *Dana*, 1895.

crystallinity, *n.* **2.** In *petrog.*, the degree of crystallization in a rock, as compared with the state of glassiness, whether completely or partly crystallized.

crystallitic (kris-ta-lit′ik), *a.* [*crystallite* + *-ic*.] In *petrog.*, of or belonging to crystallite: used to describe the texture of glassy rocks filled with crystallites.

crystallization, *n.*—**Fractional crystallization**, a process by which substances closely resembling each other in chemical character may sometimes be separated, from the fact that one shows a tendency to crystallize out from a solution before the other or others. Thus salts supposed to contain a single metal, didymium, by very often repeated crystallizations (in each of which the crystals first separated were kept apart from those separating later) were shown to be intimate mixtures of salts of two different metals, neodymium and praseodymium.

crystallized (kris′ta-līzd), *p. a.* Having assumed the form of crystals: as, *crystallized* saltpeter or *crystallized* alum.

crystallizer, *n.* **2.** In *petrog.*, an agent, such as gas, in molten rock-magmas, which by increasing the mobility of the liquid promotes the development of crystals without entering into their composition. Sometimes called a *mineralizing agent*.

crystalloceramic (kris′ta-lō-se-ram″ik), *a.* Of or pertaining to the incrustation of glass on clay.

crystallochore (kris′ta-lō-kōr), *n.* [Gr. *κρύσταλλος*, clear ice, + *χωρεῖν*, spread abroad.] In *phytogeog.*, a plant distributed by means of glaciers. *F. E. Clements*.

crystallogenesis (kris″ta-lō-jen′e-sis), *n.* Same as *crystallogeny*.

crystallogenetic (kris″ta-lō-jē-net′ik), *a.* Same as *crystallogenic*.

crystallogranular (kris″ta-lō-gran′ū-lăr), *a.* Having the condition of a granular powder consisting of minute crystals, as sal ammoniac granulated by rapid and disturbed crystallization.

crystalloiditis (kris″ta-loi-dī′tis), *n.* [NL., < *crystalloides*, crystalloid, + *-itis*.] Same as *phacitis*.

crystallometric (kris″ta-lō-met′rik), *a.* Of or pertaining to crystallometry.—**Crystallometric angles**, the angles (either 30°, 45°, 60°, or 90°) between any pair of the several planes of symmetry in a crystal.

crystal-seer (kris′tal-sēr), *n.* A crystal-gazer; specifically, one who pretends by this means to see events at a distance, to reveal secrets, etc.

crystal-symmetry (kris″tal-sim′e-tri), *n.* See ★*symmetry*.

crystal-vision (kris′tal-vizh″ọn), *n.* The illusory visual perception aroused by crystal-gazing. See ★*crystal-gazing*.

crystic (kris′tik), *a.* [Also *krystic*; < Gr. *κρύστ-* (*αλλος*), ice (see *crystal*), + *-ic*.] Of or relating to ice; especially noting that branch of geology which is concerned with the study of glaciers, etc.

Cs. An abbreviation (*b*) of *cases*.

C. S. An abbreviation (*e*) of *Civil Service*; (*f*) of *clerk of session*; (*g*) of *commissary of subsistence*; (*h*) of *current strength*.

C. S. I. An abbreviation of *Companion of the Order of the Star of India*.

C. S. O. An abbreviation of *Chief Signal Officer*.

C. SS. R. An abbreviation of *Congregatio Sanctissimi Redemptoris* (Congregation of the Most Holy Redeemer). See *Redemptorist*.

C. S. T. An abbreviation of *Central Standard Time* (see *time*).

ct. An abbreviation (*d*) of *centum*; (*e*) of *contrast*.

C. T. An abbreviation of *Certificated Teacher*.

C. T. A. U. An abbreviation of *Catholic Total Abstinence Union*.

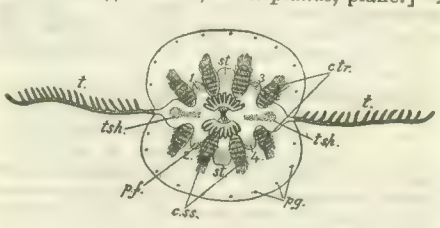
cteinophyte (tī′nō-fīt), *n.* [Irreg. < Gr. *κτείνειν*, kill, + *φυτόν*, plant.] A parasitic fungus which exerts a chemical (and destructive) action only upon its host. *Wakker*.

Ctenacanthus (ten-a-kan′thus), *n.*; pl. *ctenacanthi* (-thi). [NL., < Gr. *κτείς* (*κτεν-*), a comb, + *ἄκανθα*, a spine.] A name given by Agassiz to spines of fossil selachians not otherwise known, but of frequent occurrence in Carboniferous rocks.

ctenate (ten′āt), *a.* [Gr. *κτείς* (*κτεν-*), a comb, + *-ate*1.] Comb-like; pectinate; bearing many fine teeth, as the chætæ of some worms.

ctene (tēn), *n.* [Gr. *κτείς* (*κτεν-*), a comb.] One of the swimming-plates in *Ctenophora*.

ctenid (ten′id), *a.* Same as *ctenoid*: applied to fish scales which are rough or toothed on their posterior edges.



cteniform (ten′i-fôrm), *a.* [NL., < *Ctenus*, a genus of spiders, + L. *forma*, form.] Noting the spiders, of several different groups, that have the eye-formula of the genus *Ctenus*. *Proc. Zool. Soc. London*, 1898, p. 13.

Ctenodonta (ten-ō-don′ta), *n.* [NL., < Gr. *κτείς* (*κτεν-*), a comb, + *ὀδούς* (*ὀδοντ-*), a tooth.] A genus of taxodont *Pelecypoda* having the hinge-teeth in a continuous arched series, an external ligament, and a simple mantle-line. It is of Silurian age.

Ctenolates (ten-ō-lā′tēz), *n.* [NL., < Gr. *κτείς* (*κτεν-*), a comb, + (?)-*lates* for *-latus* < L. *latus*, broad?] A genus of serranoid fishes found in the rivers of southeastern Australia.

ctenolium (ten-ō′li-um), *n.*; pl. *ctenolia* (-ä). [NL., < Gr. *κτείς* (*κτεν-*), a comb, + term. *-olium*.] A comb-like arrangement on the margins of the byssal sinus in some of the *Pelecypoda* (pectens) in which the threads of the byssus rest.

Ctenoplana (ten-ō-plā′nä), *n.* [NL., < Gr. *κτείς* (*κτεν-*), a comb, + L. *planus*, plane.] A ctenophoran of much flattened shape, with eight very short ribs, and the characteristic combs which can be withdrawn into or evaginated from pouch-like cavities in the body-wall. It has a pair of solid, muscular, pinnate tentacles retractile into sheaths. It swims by means of its combs, or crawls on the bottom on its ventral surface, or attaches itself, ventral side uppermost, to the surface film of water.

Ctenoplana Kowalevskii, Korotneff (after Willey).
t, *t*, tentacles; *tsh*, tentacle sheaths; *ctr*, sub-transverse costæ; *css*, sub-sagittal costæ; *st*, "stomach" (? stomodæum); *1*, *2*, *3*, *4*, the four principal lobes of the infundibulum; *pf*, sensory tentacles representing the polar fields; *pg*, pigment spots. (From Lankester's "Zoölogy.")

ctenostome (ten′ō-stōm), *a.* and *n.* **I.** *a.* Relating to or characteristic of the *Ctenostomata*.

II. *n.* One of the *Ctenostomata*.

ctetology (te-tol′ō-ji), *n.* [Gr. *κτητός*, acquired, + *-λογία*, < *λέγειν*, say.] The science of acquired characters: a term proposed by Cope.

ctl. A contraction of *cental*.

cu. An abbreviation (*a*) of *cubic*; (*b*) of *cumulus*.

cuabilla (kwä-bēl′yä), *n.* [Cuban Sp., dim. of *cuaba*, an aboriginal name of the tree.] The torch-wood of Florida and the West Indies, *Amyris elemifera* and *A. maritima*. See *torch-wood*.

cuajilote (kwä-hē-lō′tā), *n.* [Mex. Sp., also *quauxiote*, < Nahuatl *quauhxilotl*, < *quauhitl*, tree, + *xilotl*, an ear of green maize.] A tree of Mexico and Central America, *Parmentiera edulis*, with greenish-yellow flowers followed by fruit resembling cucumbers or pods of the okra (*Abelmoschus esculentus*). This is crisp and pleasant to the taste. It is eaten either raw or cooked, or is prepared in the form of pickles.

cuajiote (kwä-hē-ō′tā), *n.* [Mex. Sp., < Nahuatl *quauhxiotl*, < *quauhitl*, tree, + *xiotl*, skin-eruption.] **1.** The Mexican stinkwood, *Pseudosmodingium perniciosum*, a foul-smelling, poisonous shrub or small tree of the sumac family, exuding a fetid gum which is used as an antidote for scorpions' stings. Also called *cuajiote blanco*, to distinguish it from the two following.—**2.** A name applied to several species of *Terebinthus* growing in Mexico, especially to *T. fagaroides* (*Bursera fagaroides* of Engler), called *cuajote verde*, and to *T. lancifolia* (*Bursera lancifolia* of Engler), called *cuajote chino*, both of which yield a gum-resin called ★*gum-archipin*, used as an antidote for scorpions' stings, and having emetic and purgative properties. These gums are also used for mending broken porcelain and glass.

cuantecomate (kwän-tā-kō-mā′tā), *n.* [Mex. Sp., < Aztec *quatecomatl*, head-calabash, < *quaitl*, head, + *tecomatl*, calabash.] A Mexican name for the ★*cross-leaf*.

cuarta (kwär′tä), *n.* [Said to be Amer. Sp.; if original, it is apparently connected with *cuarta*, a fourth part, and must be the source of *quirt*, which has been doubtfully referred to Sp. *cuerda*, a cord.] A long rawhide whip. [Southwestern U. S.]

cuartel (kwär-tel′), *n.* [Sp., < *cuarto*, fourth.] A quarter; ward of a city; soldiers' quarters.

cuartillo (kwär-tēl′yō), *n.* [Sp., < *cuarto*, fourth.] A silver coin of the Spanish American States, equivalent to one fourth of a real.

cub. An abbreviation of *cubic*.

Cuba bast, black. See ★*bast*1, ★*black*, *n.*

Cuban blind-fish. See ★*blind-fish*.

cube, *v. t.* **2.** To measure the cubic capacity of a hollow object, like that of a skull.

Among the 73 male and 42 female crania that were *cubed* (with shot, according to Turner's method), 'the maximum capacity in the male skulls was 1,855 c.c., the minimum was 1,230 c.c., and the mean was 1,478 c.c.'
Science, Oct. 30, 1903, p. 568.

cube, *n.*—**Four-faced cube**, a tetrahexahedron.

Cubeb camphor. See ★*camphor*.

cubebene (kū′beb-ēn), *n.* [*cubeb* + *-ene*.] A sesquiterpene, $C_{15}H_{24}$, obtained by the dehydration of cubeb camphor. It boils at 250–260° C. The name was formerly applied, also, to cadinene, the principal constituent of cubeb oil.

cubera (kō-bā′rä), *n.* [Sp., < *cuba*, < L. *cupa*, a tub: see *cup*.] A fish, *Lutianus cyanopterus*, of the family *Lutianidæ*, known from the West Indies to Brazil.

cubic. **I.** *a.*—**Cubic space curve**, a non-plane or twisted cubic curve, or curve of double curvature, which may be regarded as the partial intersection of two ruled quadric surfaces which have a common element or generator.

II.—**Discriminating cubic**, the equation

$$\begin{vmatrix} a-\lambda, & h, & g \\ h, & b-\lambda, & f \\ g, & f, & c-\lambda \end{vmatrix} = 0.$$

The discrimination of the conicoid can be made through the *discriminating cubic*.
W. H. Echols, Calculus, p. 361.

Polar cubic, of a point O, its first polar with respect to a quartic.—**Ruled cubic**, a cubic ruled surface

For a *ruled cubic* the double line *d* may be either (i) a double directrix, or (ii) a generator and a single directrix, understanding by a *directrix* of a ruled surface a line which meets every generator.

C. M. Jessop, Treatise on the Line Complex, p. 76.

cubicephalic (kū″bi-se-fal′ik), *a.* [L. *cubus*, cube, + Gr. *κεφαλή*, head, + *-ic.*] In *craniom.*, having a brachycephalic form with flattened occiput. *Aitken Meigs.*

cubicossic (kū-bi-kos′ik), *a.* [L. *cubus*, cube, + NL. *cossicus*, cossic: see *cossic.*] Of or pertaining to cubic equations.

cubilose (kū′bi-lōs), *n.* [L. *cubile*, a couch, + *-ose.*] The mucilaginous material which forms the essential basis of edible birds'-nests.

cubital. I. *a.*—**Cubital fossa.** Same as *coronoid fossa* (which see, under *coronoid*).

II. *n.* 3. Same as *hypocoracoid*, the lower of the two bones attached to the clavicle and supporting the actinosts in fishes.

cubitale (kū-bi-tā′lē), *n.*; pl. *cubitalia* (-li-ą̈). [NL.: see *cubital.*] Same as *cuneiform bone* (which see, under *cuneiform, a*).

cubitalis (kū-bi-tā′lis), *n.* [NL.] One of the ulnar muscles of the forearm.—**Cubitalis anterior** or **internus.** Same as *flexor carpi ulnaris.*—**Cubitalis gracilis.** Same as *palmaris longus.*—**Cubitalis posterior** or **externus.** Same as *extensor carpi ulnaris.*—**Cubitalis Rioland.** Same as *anconeus.*

cubit-arm (kū′bit-ärm), *n.* In *her.*, an arm couped at the elbow.

cubito-radial (kū″bi-tō-rā′di-ąl), *a.* [L. *cubitus*, elbow, + *radius*, spoke (radius).] Relating to both the radius and the ulna.

cubitus, *n.* 2. In *ornith.*, the forearm; more particularly the ulna, or outer bone of the forearm.—**Radius and cubitus,** the actinosts, the bones at the base of the pectoral fin-rays of fishes: not homologous with the radius of Owen, nor with the radial or the cubital of Cuvier.

cuboid. I. *a.*—**Cuboid cell.** See ★*cell.*

II. *n.* 2. A parallelopiped whose six faces are rectangles.—3. In *anthrop.*, a cranium, short, high, and wide, of somewhat angular form. *G. Sergi*, The Varieties of the Human Species, p. 39.

Cuboides beds. See ★*bed*[1].

cub-shark (kub′shärk), *n.* A shark, *Carcharhinus lamia*, found in tropical parts of the Atlantic, and abundant in the Caribbean Sea and the Mediterranean.

cucharo (kö-chä′rō), *n.* [Venezuelan.] Same as ★*paraguatan.*

cuckoo, *n.*—**Bee cuckoo,** the honey-guide, *Indicator major.*—**Cuckoo owl.** Same as ★*boobook.*

cuckoo-clock (kůk′ö-klok), *n.* A clock in which a mechanical cuckoo announces the hours: originally made in the Black Forest or in Switzerland and known as *Black Forest clock.*

cuckoo-fish, *n.* 3. A gurnard, *Trigla cuculus*, found in European seas.

cuckoo-flower, *n.*—**White** or **wild cuckoo-flower,** the white campion, *Lychnis alba.*

cuckoo-wrasse (kůk′ö-ras), *n.* A common name of *Labrus variegatus*, a fish of the family *Labridæ.*

Cucujo, *n.* See ★*cucuyo.*

Cucullella (kū-kų̄-lel′ą̈), *n.* [NL., dim. of L. *cucullus*, a hood: see *cowl*[1].] A genus of Paleozoic taxodont *Pelecypoda* of the family *Ctenodontidæ*, having teeth in a continuous arched series and elongate shells bearing a buttress behind the anterior adductor.

cucullus, *n.* 3. In *bot.*, an organ folded in the form of a hood or cowl, as the upper sepal of *Aconitum.*

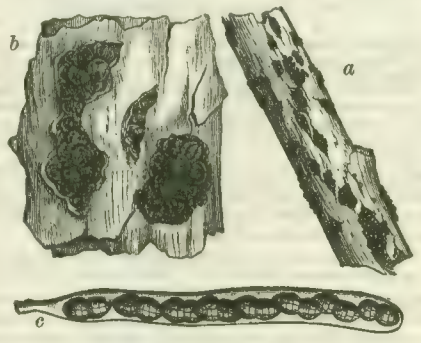
Cucumaria (kū-kų̄-mā′ri-ą̈), *n.* [NL., < L. *cucumis* (*cucumer-*), cucumber, + *-aria.*] The typical genus of the family *Cucumariidæ. Blainville.*

Cucumariidæ (kū-kų̄-ma-rī′i-dē), *n. pl.* [NL., < *Cucumaria* + *-idæ.*] A family of *Holothuroidea*, of the order *Actinopoda.* The podia are generally tube-feet only, and there are no papillæ; the mouth and anus are terminal or dorsal; the tentacles number from 8 to 30 and are branched; the madreporite is internal; the calcareous ring consists of 5 radial and 5 interradial pieces; retractor muscles are present, and the longitudinal muscles are generally simple; the respiratory tree is well developed; Cuvierian organs are rarely present; and the spicules are chiefly rods and knobbed perforated plates. It includes *Cucumaria, Psolus, Thyone, Rhopalodina* and other genera.

cucumber, *n.*—**Bacteriosis of the cucumber.** See ★*bacteriosis.*—**Bur cucumber,** the star cucumber, *Sicyos angulatus.* Also called *one-seeded bur cucumber.* See *cucumber.*—**Cucumber caterpillar borer.** See ★*borer.*—**Cucumber mildew.** See ★*mildew.*—**Jamaica cucumber,** the burr or West Indian gherkin, *Cucumis Anguria.* See *burr* ★*gherkin.*—**Leaping cucumber.** Same as *squirting cucumber* (which see, under *cucumber*).—**Neat cucumber-moth,** an American pyralid moth, *Diaphania nitidalis*, the parent of the so-called 'pickle-worm.' See *pickle-worm.*—**Salad cucumber,** a variety of *Cucumis Melo*, much grown in Egypt, ripening earlier than the common cucumber: the fruit long, horn-shaped, succulent, and of a delicate flavor.—**Wild cucumber.** (*a*) See *squirting cucumber* under *cucumber.* (*b*) In California, the big-root or man root *Micrampelis fabacea*, and doubtless other species. *Parsons and Buck*, Wild Flowers of California.

cucumber-beetle (kū′kum-bėr-bē″tl), *n.* 1. Any one of several species of chrysomelid beetles of the genus *Diabrotica*, as *D. vittata*, the striped cucumber beetle, *D. longicornis, D. soror*, and *D. duodecimpunctata*, the 12-spotted cucumber beetle, also known as the *southern* ★*corn root-worm* (which see, with cut), which feed on the leaves of cucumber and other cucurbitaceous plants.—2. A minute halticid beetle, *Haltica cucumeris*, also known as the *cucumber flea-beetle.*

cucumber-fish (kū′kum-bėr′-fish″), *n.* A fish, *Prototroctes oxyrynchus*, of the family *Haplochitonidæ*, found in Australia and New Zealand and known more commonly as the *grayling.* Also called *cucumber-mullet.*



cucumber-green (kū′kum-bėr-grēn″), *n.* A shade of green like that of the cucumber; specifically, such a shade of green seen in the glaze of some Oriental porcelains and in the enamel of the Grueby pottery.

cucumber-mullet (kū′kum-bėr-mul″et), *n.* Same as ★*cucumber-fish.*

cucumber-shin (kū′kum-bėr-shin), *n.* Anterior curvature of the tibia, common in the negro as a result of rickets in childhood.

His shins had the true *cucumber* curve.
W. Irving, Salmagundi, 79. *N. E. D.*

Cucurbitaria (kū-kėr-bi-tā′ri-ą̈), *n.* [NL. (S. F. Gray, 1821), from a resemblance of the peri-

Cucurbitaria Berberidis.

a, habit of the fungus growing on dry stems of the barberry; *b*, several fruiting bodies, enlarged; *c*, a spore-case with spores, enlarged. (From Engler and Prantl's "Pflanzenfamilien.")

thecia to gourds, < L. *cucurbita*, a gourd, + *-aria.*] A large genus of pyrenomycetous fungi, type of the family *Cucurbitariaceæ*, having the black, carbonaceous perithecia in close clusters on a thin stroma. The spores are ellipsoid and are divided by both longitudinal and transverse septa. *C. Berberidis* is a common species occurring on branches of the barberry and other plants in Europe and America.

Cucurbitariaceæ (kū-kėr″bi-tā-ri-ā′sē-ē), *n. pl.* [NL., < *Cucurbitaria* + *-aceæ.*] A family of pyrenomycetous fungi of the order *Sphæriales*, named from the genus *Cucurbitaria.* The perithecia are mostly spherical and carbonaceous and are usually arranged in dense masses on a more or less well-developed stroma.

cucurbitine (kū-kėr′bi-tin), *a.* and *n.* I. *a.* Of or pertaining to a cucurbitinus.

II. *n.* Same as *cucurbitinus.*

cucuyo (kö-kö′yō), *n.* [Also *cucuío, cucujo*, erroneously *cucullo* and in F. spelling *cucuye*; < Sp. *cucuyo*, < Taino (Haitian) *cucuyo, cocuyo*, otherwise reported as *cucuix* and *locuyo.*] 1. The West Indian firefly, *Pyrophorus noctilucus* and another species, an elaterid beetle which gleams with phosphorescent light from spots on the body. See *Pyrophorus*, with cut.—2. A fish (*Balistes carolinensis*), the leather-jacket; also another balistoid fish, *Xanthichthys ringens*, of the West Indies and waters southward.

cuddy[1], *n.* 4. A counterweight, a loaded truck used to balance the car on an incline. [Scotch miner's term.]

cuddy[2], *n.* 1. *Naut.*: (*b*) A platform in the stern of a fishing-boat, on which a drift-net is carried when not in use.

cuddy-brae (kud′i-brā), *n.* An inclined roadway with a rope and a counterweight or cuddie which is raised by a descending loaded car, and is heavy enough to raise the empty car. [Scotch miner's term.]

cudgerie (kuj′ėr-i), *n.* [Australian aboriginal name.] 1. Same as *rasp pod* and *crow's* ★*ash.*—2. A Queensland tree, *Hernandia bivalvis*, of the family *Hernandiaceæ*: it yields an oily nut and a light, soft, dark-gray wood. Also called *grease-nut.*

cudweed, *n.*—**Winged cudweed.** See *clammy* ★*everlasting.*

cue-call (kū′kâl), *n.* The signal or call furnished by the 'cue' to speak or act one's part. See *cue*[1], *n.* 3.

In the life-drama's stern *cue-call*,
A friend's a part well-prized by all.
D. G. Rossetti, Soothsay, st. 7.

cueist (kū′ist), *n.* A billiard-player, especially one who uses his cue skilfully. See *cue*[1] *n.* 7.

cuerda, *n.* 3. In Porto Rico, a unit of land-measure, equal to about two fifths of an acre.

cuesta (kwes′tä), *n.* [Sp.: see *coast, n.*] An unsymmetrical ridge having a strong slope or escarpment on one side and a gentle slope on the other. [Southwestern U. S.]

An upland of this kind may be called a *cuesta*, following a name of Spanish origin used in New Mexico for low ridges of steep descent on one side and gentle slope on the other. *W. M. Davis*, Phys. Geog., p. 133.

cuf, *v.* and *n.* A simplified spelling of *cuff.*

cuffy (kuf′i), *n.* [From the personal name *Cuffy*, Guiana, D. *Koffi*, a common name for negroes, applied by custom to any one born on Friday.] A general name for a negro. [Southern U. S.]

cuilleron, *n.* 2. A name given by French entomologists to the squama of the *Diptera* and to a certain extent adopted by English writers. *A. S. Packard*, Text-book of Entom., p. 124.

Cuirass cancer. See ★*cancer en cuirasse.*

cuiter (kū′ter), *v. t.* [Also *cuter, kuter*; a freq. form, of unknown origin.] To tend or nurse with tenderness and solicitous care; minister to with untiring kindness or affection; cocker up; coddle. [Scotch.]

I 've seen the day ye buttered my brose,
And *cuitered* me late and early, O;
But downa-do's come o'er me now,
And och, I find it sairly, O!
Burns, Deuks Dang o'er my Daddy, st. ii.

culantrillo (kö-län-trēl′yō), *n.* [Sp. *culantrillo*, dim. of *culantro*, vernacular form of *coriandro*, coriander: see *coriander.*] 1. In many Spanish countries, the name applied to the maidenhair, *Adiantum Capillus-Veneris*, and ferns resembling it, decoctions or syrups of which are administered to women at childbirth and for menstrual irregularities. In Mexico the term is applied to *A. tenerum* and *A. tricholepis*, and in the Philippines to *A. lunulatum.* Also called *cilantrillo*, or *culantrillo del pozo.*

2. A name applied to several other plants used medicinally, as *Tetilla hydrocotylæfolia*, a Chilean plant with astringent properties, belonging to the saxifrage family.

culch (*kulch*), *v. t.* [*culch, coltch, n.*] To apply (cultch) to (an oyster-bed). See *culching.*

culching (kul′ching), *n.* In *oyster-culture*, the coating of an oyster-bed with fresh gravel, stones, etc., to form a surface on which the oyster-spat can find a lodgment.

Nature has often to be assisted in the preparation of these spots by the process known as "*culching*," that is, scattering the floor of the bed with rock, loose coral, and so on, to afford the necessary anchorage for the byssus of the young oyster. *Nature*, March 17, 1904, p. 466.

culd, *pp.* A simplified spelling of *culled.*

culebra (kö-lā′brą̈), *n.* [Sp. *culebra*, < L. *colubra*, a snake: see *culverin.*] A water-spout or cloud-burst on land. The dark-colored spout, reaching down from the sky, does not descend to the ground of the lowlands and stir up a cloud of dust, but moves toward the mountains and breaks up on a mountain side, sending torrents of water down the gorges.

culen (kö-len′), *n.* [Chilean name: in Uruguay *culé.*] See *Psoralea.*

culiat (kö-lē-ät′), *n.* See ★*kuliat.*

culicicide (kū-lis′i-sīd), *n.* and *a.* [L. *culex* (*culic-*), a gnat, mosquito, + *-cida* < *cædere*, kill.] I. *n.* An agent which is destructive of mosquitos.

II. *a.* Destructive of mosquitos.

culicid (kū-lis′id), *n.* and *a.* I. *n.* A member of the family *Culicidæ.*

II. *a.* Of or belonging to the dipterous family *Culicidæ.*

culicide[1] (kū′li-sīd), *n.* and *a.* Same as ★*culicicide.*

The non-spreading qualities of corn-oil, however, as well as its price, remove it from the list of good *culicides.*
L. O. Howard, Mosquitoes, p. 197.

culicide[2] (kū′li-sīd), *n.* [For ★*culicicide*, < L. *culex* (*culic-*), mosquito, + *-cidium*, a killing, < *cædere*, kill.] The act of killing mosquitos.

Culicina (kū-li-sī′nă), *n. pl.* [NL., < *culex* (*culic-*), a mosquito + *-ina.*] A tribe or subfamily of mosquitos, *Culicidæ*, including the typical genus *Culex* and its allies, having the palpi short in the female and long in the male, and the first submarginal cell of the wings as long as or longer than the second posterior cell.

culilawang (kō-lē-lä′wang), *n.* [Malay.] See *culilawan bark* under *bark*[2].

culintangan (kō-lin-täng′gan), *n.* [Also *colintangan;* Mindanao.] A musical instrument consisting of a number of closed metal vessels or gongs of varying size which are struck with sticks: used among the Moros.

culler, *n.* 4. In *glass-manuf.*, same as *gatherer*, 6.

culmigenous (kul-mij′e-nus), *a.* [L. *culmus*, a stalk, + *-genus*, -born.] Produced or growing on straw. *Syd. Soc. Lex.*

culm-measure (kulm′mezh″ūr), *n.* One of the Lower Carboniferous formations.

Those Lower Carboniferous rocks that are called the *culm-measures* by some authors.
Geog. Jour. (R. G. S.), XVI. 56.

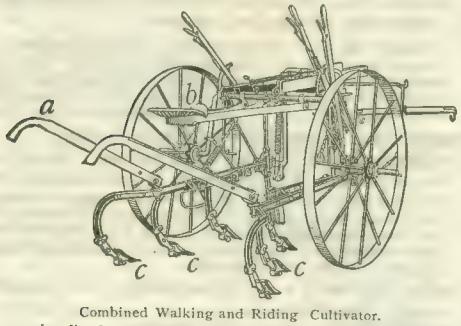
culor, *n.* and *v.* A simplified spelling of *color*.

culorabl, *a.* A simplified spelling of *colorable*.

culord, *pp.* A simplified spelling of *colored*.

culpose (kul′pōs), *a.* [NL. **culposus*, < L. *culpa*, a fault.] Faulty; negligent; grossly careless.

cult-deity (kult′dē″i-ti), *n.* See ★*cultus-statue*.



cultellus, *n.* 2. In medieval arms and armor, a knife which occasionally served as a dagger.

cultivation, *n.*—**Margin of cultivation,** in *polit. econ.*, a situation in which labor and capital yield a product just sufficient to cover normal wages and interest. The term came into use in the conventional exposition of the nature of rent. Some lands are so fertile and so favorably situated with respect to centers of population as to yield a surplus over and above the normal remuneration of the labor and capital employed upon them. Lands of less fertility, or less favorably situated, yield a smaller surplus, and some lands, usually represented as a narrow zone circumscribing the surplus-yielding lands, produce barely enough to pay normal wages and interest. This zone, for obvious reasons, is called the *margin of cultivation*, or more commonly, the *extensive margin of cultivation*. In the cultivation of the better lands the first units of labor and capital may properly be said to yield large returns, the later units increasing the total product, but not in proportion. Obviously a point appears at which an additional unit of labor and capital yields normal wages and interest, but nothing more. This point is spoken of figuratively as the *margin of cultivation*, or, more specifically, the *intensive margin of cultivation*.—**Zone of cultivation.** See ★*zone*.

cultivation-bed (kul-ti-vā′shŏn-bed), *n.* The filter-like bed often used with the septic tank which by bacterial action brings about nitrification of the effluent from the tank. Same as *bacteria-bed*.

cultivation-paddock (kul-ti-vā′shŏn-pad″ok), *n.* The tract of land set off from an Australian cattle-farm for tillage and the raising of such crops as are needed on the station.

cultivator, *n.* (*c*) This name is now applied to a great variety of horticultural and agricultural machines. They

Combined Walking and Riding Cultivator.
a, handles for operator when walking; *b*, seat for rider; *c*, *c*, *c*, cultivator teeth.

are divided into two classes, hand machines and horse machines; and the horse machines are classed as *walking cultivators*, and *riding* or *sulky cultivators*. Hand machines are supported upon one or two wheels placed in front, and have two long plow-handles by which they are pushed along the ground beside or astride of the rows of plants to be cultivated. All are provided with one or more teeth for breaking and stirring the soil and removing weeds, and have interchangeable tools (plows, rakes, hoes, scrapers, harrow-teeth, etc.) to adapt them to a variety of work. 'Walking' horse cultivators are supported upon a pair of wheels and are provided with a pair of plow-handles placed behind, by which they are guided by the operator walking in the rear. 'Riding' cultivators are fitted with a seat above the cultivating-tools, in the rear of the machine and in reach of levers for controlling the tools. The teeth or tools of all horse machines are interchangeable, and are made in the form of small hoes, rakes, scrapers, plows, harrow-points, claws, weeders, and disks. Hand cultivators are often provided with seed-drills, or other planting-appliances, and with fertilizer-distributing appliances. The combination of many tools in one machine has led to the use of many trade names.—**Disk cultivator,** a cultivator using disks in place of knives or shears. See above.—**Expanding cultivator,** a cultivator in which the frame is adjustable to varying widths of plant-rows. By expanding or contracting the frame, the machine can be made to fit all conditions of culture.

cult-society (kult′sō-sī″e-ti), *n.*; pl. *cult-societies* (*-tiz*). A society or social group held together by a religious motive, like the religious secret societies of Africa and of North America.

The *cult-society*, or fraternity, or phratry, or curia (for by all of these names it has been known), has an ecclesiastic or religious motive which distinguishes it from the clan and gens which have a sociologic motive.
Am. Rep. Bur. Amer. Ethnol., 1897-98, p. xlvi.

cultural, *a.* 2. Produced by cultivation: said of types of plants, chiefly varietal. A cultural variety is opposed to a natural or botanical one.

Substances obtainable from large numbers of plants of different types, botanical and *cultural*.
Yearbook U. S. Dept. Agr., 1901, p. 363.

3. In *surv.*, of artificial origin: said of roads, villages, etc., on a topographic map.—4. In *bacteriol.*, relating to culture-media or to the character of any micro-organism as indicated by the results obtained from growing it upon various culture-media.

The bacillus . . . always showed the same *cultural* characters, viz., sparseness of growth on blood-serum, limited surface growth in gelatine stab cultures, and a typical radiating colonies in gelatine plates.
Jour. Exper. Med., 1900, p. 259.

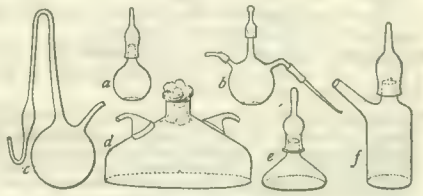
Cultural degeneracy, the weakening in constitution of plants under domestication.

A few of my correspondents believe in what I may call *cultural degeneracy*, or the doctrine that the more highly we improve the species, the weaker in constitution must each succeeding generation of varieties become.
L. H. Bailey, Survival of the Unlike, p. 335.

Cultural map, a map which shows cultural details.—**Cultural plant formation.** See ★*formation*.—**Cultural variety,** a variety or form of plant originating under cultivation, as distinguished from one originating under feral conditions. Such varieties are often spoken of as agricultural or horticultural varieties, according as they pertain to agricultural or horticultural plants. See *cultural*, 2, above.

culturally (kul′tūr-al-i), *adv.* In *bacteriol.*, by the use of culture-media: applied to the identification of micro-organisms according to their specific methods of growth.

In the first seven cases they failed to obtain the organisms *culturally* in one. *Med. Record*, LXIII. 237.



culture, *n.* 9. In a map, all those features represented which are artificial or of human origin, such as meridians, roads, railroads, trails, ferries, bridges, houses, etc.—**Aridian culture.** See ★*aridian*.—**Bouillon culture,** a culture of bacteria growing in bouillon, which generally consists of some combination of beef extract, and peptone.—**Culture anthropology.** See ★*anthropology*.—**Culture area.** See ★*area*.—**Culture system,** a system of colonial exploitation employed in the Dutch East India colonies, especially in Java, the essential characteristic of which is obligatory service of the native population on government plantations for the profit of the government or its concessionaries. The system was introduced into Java in 1830 and was radically reformed in 1870. It has since practically disappeared. The principal commodities produced under it were coffee, sugar, and indigo. It was originally intended to take the place of the burdensome and unproductive land-tax, and was defended as an institution which would improve the condition of the peasant. In its practical operation, however, it proved to be highly iniquitous, reducing the peasant to the position of a serf.—**Direct culture,** a culture of bacteria produced by direct transfer from their natural source to an artificial medium.—**Drop culture,** a method of cultivating minute organisms, particularly fungus and alga spores, in single drops of water or nutrient solution for the purpose of observing their development under the microscope.—**Ethical culture,** the cultivation of morality and the art of right living, apart from and independently of religious beliefs and philosophical theories. Societies for ethical culture, led by lecturers, exist under this name in the principal American cities.—**Hanging-drop culture,** a minute drop culture adherent to the under surface of a cover glass.—**Intensive culture,** the production of crops under the system of intensive ★farming (which see).

As is well known, there are two great classes of farms: viz. those based upon *"intensive" culture*,—"high farming," as the English call it,—and those based upon "extensive" culture. *Storer*, Agriculture, II. 317.

Negative culture, inoculation of a culture medium with suspected material not followed by a growth of bacteria.—**Positive culture,** inoculation of a culture medium with blood, secretions, or suspected matter, which is followed by a growth of bacteria.—**Poured plate culture,** a method of cultivating bacteria upon solid media which enables each organism to give rise to an individual colony. The medium is liquefied and with the bacteria is poured upon a plate of glass or into a shallow dish, where it soon hardens. Also called *Petri dish culture*. See *Petri* ★*dish*.—**Puncture culture.** Same as *stab* ★*culture*.—**Roll culture,** a method of culture in which a tube of nutrient gelatin is inoculated with the organism to be cultivated and then rolled on a block of ice, so as to solidify the gelatin on the walls of the tube as rapidly as possible.—**Shake culture,** a culture prepared by inoculating a tube of gelatin with the organisms under investigation, distributing these through the medium by gentle shaking, and allowing the medium to solidify again.—**Slant culture,** bacteria cultivated upon a medium which presents a slanting surface, due to the tilting of the tube before the medium hardens.—**Stab culture,** bacteria growing in some solid medium which has been inoculated by adding the necessary organisms by means of stabbing a platinum needle into its substance.—**Stock culture,** a permanent culture of bacteria, kept for a considerable period, from which transfers can be made. **Streak culture,** bacteria growing upon a solid medium which has been inoculated by drawing a platinum needle, to which the proper organisms adhered, across its surface. Also called *stroke culture*.

culture-dish (kul′tūr-dish), *n.* A shallow glass dish with a loose-fitting glass cover, used for bacteriologic cultures.

culture-flask (kul′tūr-flask), *n.* Apparatus of varying shape used in growing bacteria.

Culture-flasks.
a, Chamberland's culture-flask; *b*, *c*, Pasteur's culture-flasks; *d*, Lister's culture-flask; *e*, Miquel's culture-flask; *f*, Freudenreich's culture-flask.

culture-hero (kul′tūr-hē″rō), *n.*; pl. *culture-heroes* (*-rōz*). In *anthrop.*, the mythical personage who gave to the world its present shape, and who gave to man his arts: a belief characteristic of many tribes and peoples in the lower stages of culture.

culture-province (kul′tūr-prov″ins), *n.* In *anthrop.*, a geographical area in which, under the influence of geographical and social environment, certain metamorphic types of man developed. *Encyc. Brit.*, XXV. 373.

culture-stock (kul′tūr-stok), *n.* A group of tribes or peoples characterized by the possession of one and the same type of culture.

They are much more likely to have been permanent than temporary habitations of the same *culture-stock* of Indians who availed themselves of rock shelters wherever the nature of the cliff permitted excavation in its walls.
17th An. Rep. Bur. Am. Ethnol., ii. 543.

culture-yeast (kul′tūr-yēst), *n.* A cultivated form of yeast, *Saccharomyces*, as distinguished from undesirable forms, (wild yeast) which produce the so-called diseases in beer.

cultur-kampf, *n.* See ★*kultur-kampf*.

cultus[2] (kul′tus), *a.* [Chinook jargon *cultus*, worthless, purposeless, vain, nothing; < Chinook *kaltas*, in vain.] Worthless. [Washington state and British Columbia.]

cultus-statue (kul′tus-stat″ū), *n.* In *classic antiq.*, a temple image or sacred statue, usually quite simple and archaic.

cum, *v.* A recent simplified (and dialectal) spelling of *come*.

cumaphyte (kū′ma-fīt), *n.* [By error or intention, a more direct representative, in the first element, of the original, the normal NL. type being **cymatophytum*, < Gr. *κῦμα* (*κυματ-*), a wave, + *φυτόν*, a plant.] In *phytogeog.*, an aquatic plant adapted to growing in places exposed to the surf.

The general character of *cumaphytes* is necessarily such that impact of the waves does not injure or displace them.
C. MacMillan, Minn. Bot. Stud., Bulletin IX., p. 1001.

cumaphytic (kū-ma-fit′ik), *a.* [*cumaphyte* + *-ic.*] In *bot.*, adapted to the action of the surf: as, the *cumaphytic* form assumed by marine algæ and other plants.

cumaphytism (kū′ma-fīt-izm), *n.* [*cumaphyte* + *-ism.*] The changing of the normal form of certain plants, particularly marine algæ, to abnormal forms for the purpose of better resisting the action of waves and rough water.

cumarone, *n.* Same as ★*coumarone*.

cumber-board, *n.* Same as ★*comber-board*.

cumberlandite (kum′bėr-land-it), *n.* [*Cumberland* (Cumberland Hill, R. I.) + *-ite*[2].] In *petrog.*, a name given by M. E. Wadsworth (1884) to much-altered rocks composed of abundant titaniferous magnetite, lime-soda feldspar, olivin, and secondary minerals.

cumbersum, *a.* A simplified spelling of *cumbersome*.

cumbi[2] (kum′bī), *n.* [Tamil *kumbai.*] A fetid gum-resin exuded as transparent tears on the buds and young shoots of *Gardenia gummifera* and *G. lucida*. See *dikamali* and *Gardenia*.

cumboo-millet (kum′bŏ-mil-et), *n.* [Tamil *kambu* + E. *millet.*] In the East Indies, the cat-tail millet, *Pennisetum spicatum.*

cumbre (köm′brā), *n.* [Sp., top, summit, < L. *cumulus*, heap: see *cumber, cumulus.*] A dividing ridge, or divide.

On the afternoon of the same day the party camped at a point 4600 feet above this, on the first "*cumbre*," or dividing ridge. *Geog. Jour.* (R. G. S.), XII. 615.

cum d. or **div.** An abbreviation of the New Latin *cum dividendo*, 'with the dividend': used in stock-exchange quotations.

cumengite (kum′en-jīt), *n.* [From M. *Cumenge*, a French chemist.] An oxychlorid of lead and copper from Boléo, Lower California, closely related to percylite, but supposed to have distinguishing optical characters. Also *cumengeite.*

cumfit, *n.* A simplified spelling of *comfit.*

cumfortabl, *a.* A simplified spelling of *comfortable.*

cumforter, *n.* A simplified spelling of *comforter.*

Cumidæ (kū′mī-dē), *n. pl.* [NL., < *Cuma* + *-idæ.*] A family of sessile-eyed crustaceans typified by the genus *Cuma.*

cumidic (ku-mid′ik), *a.* [*cum(in)* + *-id* + *-ic.*] Used in *cumidic acid*, a name given to two bibasic acids: *a-cumidic acid*, $C_6H_2(CH_3)_2(CO_2H)_2$ (1:3:4:6), melts above 320° C. and is also called *s-dimethylisophthalic acid;* and *β-cumidic acid*, $C_6H_2(CH_3)_2(CO_2H)_2$ (1:4:2:5), sublimes without melting and is called *s-dimethylterephthalic acid.*

cumidine (ku′mi-din), *n.* [*cumid-ic* + *-ine*²] A base, $C_6H_4(NH_2)CH(CH_3)_2$ (1:4), prepared by the reduction of p-nitrocumene. It boils at 225° C. and is also called *p-aminoisopropylbenzene.*—**Cumidine ponceau.** See ★*ponceau*¹.—**Cumidine red.** See ★*red*¹, *n.*

cuminic (ku-min′ik), *a.* Derived from cumin.—**Cuminic acid.** Same as *cumic acid.*

cuminil (ku′mi-nil), *n.* [*cumin* + *-il.*] A 1,2-diketone, $C_3H_7C_6H_4COCO\ C_6H_4C_3H_7$ (1:4:4¹:1¹), prepared by the oxidation of cuminoïn. It crystallizes in prisms which melt at 84° C.

cuminilic (ku-mi-nil′ik), *a.* [*cuminil* + *-ic.*] Derived from cuminil.—**Cuminilic acid.** A crystalline acid, $[(CH_3)_2CHC_6H_4]_2C(OH)CO_2H$, prepared by fusing cuminil with potassium hydroxid. It melts at 120° C.

cuminoïn (ku-min′ō-in), *n.* [*cumin* (L. *cuminum*) + *-in.*] A white crystalline ketone alcohol, $C_3H_7C_6H_4C(OH)COC_6H_4C_3H_7$, formed when cuminic aldehyde is boiled with alcoholic potassium cyanide. It melts at 101° C.

cum laude (kum lâ′dē). [L.] With praise: a phrase denoting a special grade of excellence in the work of the taker of a degree. See ★*magna cum laude*, ★*summa cum laude.*

cumpany, *n.* A simplified spelling of *company.*

cumpass, *n.* and *v. t.* A simplified spelling of *compass.*

cumular (kū′mū-lăr), *a.* [NL. **cumularis*, < L. *cumulus*, a heap: see *cumulus.*] Having the form of a heap; heaped; piled up; cumulous.—**Cumular cloud,** a cumulus cloud.

cumulate (kū′mū-lāt), *a.* Heaped or piled up; as, a *cumulate* sentence or subject.

Short sentences are prevalent in our language, as long ones are in the German. In all things we incline to curtness. . . . But we can use the *cumulate* construction when needed. *J. Earle*, Philol. Eng. Tongue, § 655.

Cumulative jurisdiction, in *Scotch law*, same as *concurrent jurisdiction* (which see, under *concurrent, a.*).—**Cumulative temperature.** See ★*temperature.*

cumulescent (kū-mū-les′ent), *a.* [*cumulus* + *-escent.*] Assuming the characteristics of the cumulus form of cloud; piling up; growing larger.

cumulitic (kū-mū-lit′ik), *a.* [*cumulus* + *-ite*² + *-ic.*] Having an appearance of being gathered into heaps, as an agglomerated mass of micro-particles in a rock. See *cumulite.*

It is filled with minute, reddish, non-polarizing grains, agglomerated into semi-opaque, often spherical, balls, which give the mass a "*cumulitic*" appearance. *Amer. Geol.*, Feb., 1905, p. 98.

cumulo-cirrus (kū″mū-lō-sir′us), *n.*; pl. *cumulo-cirri* (-ī). A high cloud belonging to the cirrus group, but having the cumulus structure; an alto-cumulus. See ★*cloud.*

cumulo-nimbus (kū″mū-lō-nim′bus), *n.*; pl. *cumulo-nimbi* (-ī). Cumulus developing toward the formation of rain, but from which little rain has yet fallen. See ★*cloud.*

Cumulous deposits, accumulations of vegetation in water, where it does not suffer complete decay, as in marshes where peat is formed. *Van Hise*, U. S. Geol. Surv., Monograph 47, p. 471.

cumulo-volcano (kū″mū-lō-vol-kā′nō), *n.* A name suggested by Lacroix, in connection with studies of Mont Pelé, in Martinique, for steep cones or columns built up of masses of viscous or relatively infusible lavas which have been forced out from below the earth's surface and have been heaped up without moving far, if at all, from the vent.

Cumulo-volcano.
Formed at Mont Pelé, Martinique, in 1903.

Examination through a telescope convinced Lacroix that this top was composed of "solid" rock, not débris, and led him to advance the idea that Pelé now was to be classed as a *cumulo-volcano*, a theory which his subsequent observations and those of his colleague Giraud, and of Sapper, Heilprin and the author have fully confirmed.

Amer. Jour. Sci., Oct., 1903, p. 272.

cumulus, *n.*—**Turreted cumulus,** a large cumulus cloud from whose sides rise special masses suggesting the turrets of a fortress. See ★*cloud.*

Cu. N. An abbreviation of *cumulo-nimbus.*

cunctatious (kungk-tā′shus), *a.* [*cunctati(on)* + *-ous.*] Prone to delay. *Carlyle.*

cunctatory (kungk′tā-tō-ri), *a.* [*cunctat(ion)* + *-ory.*] Disposed to linger or delay. *Carlyle.*

cundy (kun′di), *n.* [Also *cundie, condy, cundiff, cundith*, etc., < OF. *conduit;* see *conduit.*] **1.** A covered drain; a conduit.—**2.** In *long-wall mining*, the unfilled space between pack-walls.—**3.** In steep mine-workings, a chute down which coal or other mineral slides to a passage below.—**4.** A small roadway or air-course. [Scotch and North. Eng. in all uses.]

cuneiformist (kū″nē-i-fôr′mist), *n.* [*cuneiform* + *-ist.*] One who is versed in or has made a special study of cuneiform writing or writings. *N. Y. Tribune*, Oct. 26, 1900.

Cunoniaceæ (kū″nō-ni-ā′shē-ē), *n. pl.* [NL. (Robert Brown, 1814), < *Cunonia* + *-aceæ.*] A family of dicotyledonous, choripetalous plants of the order *Rosales*, typified by the genus *Cunonia*, (which see), and differing chiefly from the *Saxifragaceæ*, in which it was formerly included, by having the seeds in two rows in the carpels. There are 20 genera and about 123 species, 70 of which belong to *Weinmannia*, woody plants with stipuled, opposite, or whorled leaves and small flowers in clusters or compound racemes, chiefly natives of Australasia, but also found in the Pacific and other islands and in South America. See *Platylophus*, 3, *tile-seed*, and *Weinmannia.*

cuntry, *n.* A simplified spelling of *country.*

cup, *n.*—**Anathema cup,** a large silver cup at Pembroke College, Cambridge, bearing the hall-mark of 1481; and presented by the bishop of Winchester: so called from the inscription engraved on its base, QUI ALIENAVERIT ANATHEMA SIT, 'cursed be the man who sells (this cup).'—**Antimonial cup.** See ★*antimonial.*—**Cup and gutter system,** the system of turpentine-gathering by the use of earthen cups and metal gutters.—**Dorsal cup,** in crinoids, the part of the theca below the origins of the free arms.—**Dragon-boat cup,** a small porcelain wine-cup made by Chinese potters and decorated with paintings of racing-boats in the dragon festival.—**Elijah's cup,** a cup used in the Passover service and dedicated to the prophet Elijah, whose name is synonymous with redemption. As the Passover service commemorates the Exodus and symbolizes the final emancipation at the Great Day, a special, large cup is filled with wine and placed in the center of the table at the Passover service, ready for the Prophet, who, according to tradition, will suddenly make his appearance on a Passover eve and announce the coming of the Messiah.—**Eve's cup.** See ★*Eve.*—**Grape-trellis cup,** a small wine-cup of Chinese porcelain bearing paintings of grape-vines rising from frames.—**Jugal cup,** in *ornith.*, the cup-shaped depression, or socket for the articular face of the jugal, found on the external face of the distal end of the quadrate bone.—**Keyser cup,** a tall cup with a cover, made in China for exportation and painted with European designs.

Cup and Gutter System of Turpentine-gathering.

The tall cups with covers called *Keyser cups*, which are illustrated in Sir Henry Thompson's Catalogue, and also by Jacquemart, are painted with a broad panel containing St. Louis of France and his queen on a canopied throne, and narrower alternate panels with kneeling figures and birds. *S. W. Bushell*, Oriental Ceramic Art, p. 612.

Vaphio cups, two gold vases about 0.m.08 high, having each a single handle, found at Vaphio, in Greece. They

Decoration of the Vaphio Cups.

are decorated with sculpture in relief, representing bulls and herdsmen. They are considered to be the finest examples of Mycenæan or prehistoric Greek work.

cup, *v.* **II.** *intrans.* **4.** To fit concavely over a contiguous leaf. See ★*cupping*, 4.

cup-and-ring (kup″and-ring′), *n.* A peculiar type of markings on rocks, stone monuments, and buildings, consisting of cups and rings, and of doubtful significance.

Rock inscriptions, Archaic. An account of the *cup-and-ring* marking on the sculptural stones of the old and new worlds. London, 1890. 8vo.

Smithsonian Report., 1890, p. 597.

cupang (kö′päng), *n.* See ★*kupang.*

cupay (kö-pī′), *n.* [Also cupey; of S. Amer. origin.] In the West Indies and South America, a parasitic shrub or tree of the gamboge family, *Clusia rosea.* Its wood is reddish and is used only as fuel. See ★*aralie* and *Clusia.*

Cupay (*Clusia rosea*).

cup-break (kup′brāk), *n.* A cup-shaped fracture. Some metals, when broken in a testing-machine, show a cup-break, the particles on the edges stretching more at the moment of rupture than those nearer the center.

cup-cake (kup′kāk), *n.* A plain cake, usually baked in small tins: so named from the fact that the original directions gave the proportions of the ingredients as measured by cupfuls.

cup-chuck (kup′chuk), *n.* Same as *bell-chuck.*

cup-day (kup′dā), *n.* In *racing*, the day on which a race is run for a cup.

cup-drum (kup′drum), *n.* A chain-sheave having recesses to receive the alternate individual links of the chain which passes over it.

cupel, *n.* **2.** The hearth of a cupellation furnace in which silver is separated from lead; a test. See *test*[1], 2.

cupel-furnace (kū′pel-fėr″nās), *n.* A form of assay furnace.

cup-escutcheon (kup′es-kuch″on), *n.* A door-plate having a cup-like recess containing the keyhole, knob, and a door-pull or finger-hole: used with sliding doors.

cupesid (kū-pes′id), *a.* and *n.* Of or belonging to the Coleopterous family *Cupesidæ*.

cupey (kō-pā′), *n.* Same as ★*cupay*.

cup-flower (kup′flou″ėr), *n.* A twining annual herbaceous plant, *Scyphanthus elegans*, belonging to the family *Loasaceæ*, but without stinging hairs. It has opposite, twice-pinnatifid leaves, and yellow, cup-shaped, axillary flowers with ten petals, the alternate ones being somewhat spurred at the base and larger than the others, which are three-awned at the tip. It is a native of Chile.

cup-fungus (kup′fung″gus), *n.*; pl. *cup-fungi* (fun″jī). Any ediscomycetous fungus, especially one of those which have the ascomata distinctly cup-shaped. Also *cup-mushroom*.

cup-headed (kup′hed-ed), *a.* Having a cup-shaped head: said of a railroad spike so shaped, particularly in English practice, where the rails are supported in chairs: in the United States, a socket-spike.

cupiá (kō-pi-ä′), *n.* [Tupi *cupiá*.] An undetermined yellow ant found in Brazil, where it is or was eaten, according to Piso and Humboldt, by the Marivatano and Margueritare Indians.

Cupid's-flower (kū′pidz-flou″ėr), *n.* The cypress-vine, *Quamoclit Quamoclit*.

cuplet, *n.* A simplified spelling of *couplet*.

cupling, *n.* A simplified spelling of *coupling*.

cup-marked (kup′märkt), *a.* In *archæol.*, marked with cup-like depressions, as cup-stones.

> The significance of inscribed and *cup-marked* stones, dolmens, and other early monuments.
> *Geog. Jour.* (R. G. S.), XI. 681.

cup-marking (kup′mär″king), *n.* A circular cavity, with or without a surrounding ring, found as a peculiar form of archaic sculptured marking in Scandinavia, Scotland, America, and even in early churches in Prussia. See ★*cup-and-ring*.

cupped, *a.* **2.** Lodged in a cup or depression of the ground, as a golf-ball.

cupper, *n.* **3.** A device for making cup-leathers, which are used for packing pumps and hydraulic presses. It consists of a die of the size of the outside of the cup to be made and a plug or plunger of the size of the inside of the cup. A disk of leather of the proper size is cut, is wet and stretched over the plug, and is pushed into the die and allowed to dry and set.

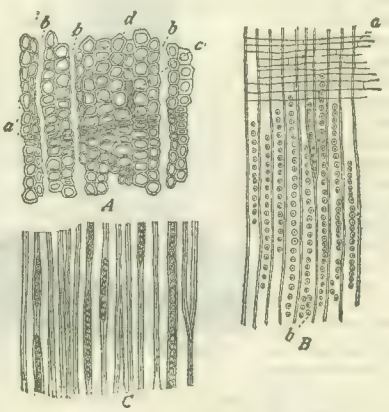
cupping, *n.* **4.** The taking of a concave form, as tobacco leaves do in drying, when placed face to back. Cupping is prevented by stringing the leaves face to face and back to back.

cupping-pump (kup′ing-pump), *n.* In *surg.*, an air-pump used for drycupping.

cup-plate (kup′plāt), *n.* A small plate of glass or china, three or four inches in diameter, formerly used to hold a teacup from which the tea had been poured into the saucer to cool.

cuppy[2] (kup′i), *a.* **1.** Cup-like; concave: as, *cuppy* flowers.—**2.** Full of small cup-like cavities. See *cup*, *n.*, 6 (*b*). [Golfers' cant.]—**Cuppy lie,** in *golf*, the position of a ball when it lies in a depression or shallow hole in the course. *W. J. Travis*, Practical Golf, p. 46.

cuprammonia (kū-pra-mō′ni-ä), *n.* [NL., < *cupr-um*, copper, + NL. *ammonia*.] A solution of cupric hydroxid in aqueous ammonia; Schweitzer's reagent. A substance resembling horn or celluloid may be obtained by the action of cuprammonia on cellulose which, with its original vegetable structure (as, for instance, cotton fiber), is thus dissolved and then recovered in amorphous condition by evaporation of the solution and the removal of the copper by a dilute acid.



cuprammonium (kū-prä-mō′ni-um), *n.* [NL., < L. *cupr-um*, copper, + *ammonia* + *-um*.] In *chem.*, the compound radical in certain salts obtained by the action of ammonia upon the ordinary salts of copper.

cupreol (kū′prē-ol), *n.* [*cuprea* (see def.) + *-ol*.] A complex alcohol, $C_{20}H_{34}O + H_2O$, found in cuprea-bark, *Cinchona officinalis*. It crystallizes in needles or leaflets which melt at 140° C.

Cupreous pyrites. See ★*pyrites*.

cupressineous (kū-pre-sin′ē-us), *a.* Belonging or pertaining to the tribe *Cupressineæ* or cypress family; cypress-like.

Cupressinoxylon (kū-pres-i-nok′si-lon), *n.* [NL. (Göppert, 1850), < L. *cupressinus*, of cypress, + Gr. ξύλον, wood.] A genus of fossil

Cupressinoxylon.

A and B, *Cupressinoxylon Wardi*; *A*, transverse section through annual ring; *a*, cells of fall wood; *b*, *b*, *b*, medullary rays; *c*, very large intercellular space. *B*, radial section; *a*, medullary rays; *b*, tracheïd with two rows of bordered pits. *C*, *Cupressinoxylon Columbianum*, tangential section. All magnified about 33 diameters. (From "Bull. 56 of the U. S. Geol. Surv.")

coniferous plants based entirely on the internal structure of the wood which has not been connected with other parts. It agrees in a general way with that of the cypress family, but more closely still with that of *Sequoia* in the tribe *Taxodieæ*. The leading character is the circular punctations of the tracheïds shown in radial section, which are always in a single row. The genus is chiefly Upper Mesozoic, being most common in the Lower Cretaceous. Though found in many parts of the world, it is perhaps most abundant in the United States, and constitutes most of the fossil wood found in such great quantities in the Potomac formation of Virginia and Maryland.

cupriaseptol (kū″pri-a-sep′tol), *n.* [*cupri(c)* + *asept(ic)* + *-ol*.] A light-green crystalline compound, $Cu(C_6H_4(OH)SO_3)_2H_2O$, obtained by neutralizing phenol-sulphuric acid with cupric oxid and purifying; copper sulphocarbolate: used as a hemostatic.

Cupric reduction, the reduction of the state of cuprous oxid of an alkaline solution of cupric tartrate (Fehling's solution), which serves as a test for and the means of quantitatively determining certain kinds of sugar, as glucose.

cuprobismutite (kū-prō-biz′mut-īt), *n.* [L. *cuprum*, copper, + E. *bismut(h)* + *-ite*[2].] A sulphid of bismuth and copper occurring in groups of bluish black prismatic crystals.

cuprodescloizite (kū″prō-dā-cloi′zīt), *n.* [L. *cuprum*, copper, + *descloizite*.] A variety of descloizite containing copper; it occurs in green to brown crusts or reniform masses.

cupro-iodargyrite (kū″prō-ī-ō-dār′ji-rīt), *n.* [L. *cuprum*, copper, + *iod(ide)* + Gr. ἄργυρος, silver, + *-ite*[2].] A rare mineral consisting of the iodides of copper and silver; it is found in Chile.

cuproplumbite (kū-prō-plum′bīt), *n.* [L. *cuprum*, copper, + *plumbum*, lead, + *-ite*[2].] A sulphid of copper and lead intermediate in composition between galena and chalcocite: first described from Chile, but also observed elsewhere, for example, in Montana.

cuprotungstite (kū-prō-tung′stīt), *n.* [L. *cuprum*, copper, + *tungst(en)* + *-ite*[2].] A tungstate of copper, or of copper and calcium ((Cu, Ca)WO_4), occurring in crystalline granular masses of a green color.

cuprum (kū′prum), *n.* [LL. *cuprum*: see *copper*.] In *chem.*, the metal copper.

cup-shake (kup′shāk), *n.* See *shake*, *n.*, 7.

cup-stone (kup′stōn), *n.* In *archæol.*, a stone with cup-like depressions made in its surface. Such cups are found in Europe and Asia, on natural rocks as well as on prehistoric monuments and on churches. Cup-stones occur also in America. See ★*cup-marking*.

cur. An abbreviation (*a*) of *currency*; (*b*) of *current*.

curage, *n.* A simplified spelling of *courage*.

curageous, *a.* A simplified spelling of *courageous*.

curangin (kū-ran′gin), *n.* [*Curanga* + *-in*[2].] An amorphous, bitter glucoside, $C_{48}H_{77}O_{20}$ (?), found in *Picria amara* (*Curanga amara* of Vahl). It melts at 172° C.

curare, *n.* Same as *curari*.

curassow, *n.*—**Mountain curassow,** *Oreophasis derbianus*, a species confined to the forest in the vicinity of the Volcan de Fuego, Guatemala. Also called *mountain pheasant*.

curator, *n.*—**Curator ad hoc** ('guardian for this'), a guardian appointed for one special purpose only.—**Curator bonis.** (*a*) In *civil law*, an officer appointed to take care of property. (*b*) In *Scotch law*, one appointed as guardian for minors, incompetents, etc.

curatorial (kū-rā-tō′ri-al), *a.* [LL. *curatorius* (< *curator*, curator) + *-ial*.] Of or pertaining to a curator or his office or duties.

> The purely *curatorial* part of the work.
> *Gunther*, Cat. Birds Brit. Mus., XX. v.

curatorium (kū-rā-tō′ri-um), *n.* [NL. *curatorium*, neut. of LL. *curatorius*, adj. < L. *curator*, curator.] A board or college of curators, forming the governing body of a German university or imperial institution. Also *curatory*.

curb, *n.*[2], **4.** (*i*) Same as *crib*[1], 11.—**Curb market,** business in stocks, bonds, etc., transacted on the curb, that is, on the street, or not within a regularly organized exchange; specifically, the business carried on by large groups of brokers, not members of the exchange, near the New York stock-exchange.

curb-hook (kėrb′hůk), *n.* A snap-hook fitted for the curb-straps of a bridle.

curbing (kėrb′ing), *n.* **1.** The act of checking or restraining.—**2.** Material prepared for curb-stones either roughly worked to dimension, or finished ready to set.

curcas (kėr′kas), *n.* [NL. *curcas* (specific name), Sp. *curcaso*; of S. Amer. origin.] The seed of certain *Euphorbiaceæ*, as *Jatropha Curcas*, found in South America. Its oil has purging properties.

curculionideous (kėr-kū″li-ō-nid′ē-us), *a.* Belonging to the coleopterous family *Curculionidæ*, the weevils.

curculionist (kėr-kū′li-on-ist), *n.* [L. *curculio(n-)*, curculio, + *-ist*.] One versed in the study of curculios.

curcuma, *n.*—**Ohio curcuma,** the goldenseal, *Hydrastis Canadensis*.

curcumein (kėr-kū′mē-in), *n.* Same as ★*curcumin*, 2.

curcumin, *n.* **2.** A name given to several yellow acid coal-tar colors, as, fast yellow, brilliant yellow, and citronin. Also *curcumein*.

curd-knife (kėrd′nīf), *n.* A series of knife-blades placed side by side in a metal frame fitted with a handle, used in slicing curd in cheese-making; a curd-cutter.

curd-soap (kėrd-sōp′), *n.* Soap which has been coagulated or granulated by the addition of common salt to the original solution obtained by boiling together fat and an alkaline lye.

cure, *n.* **6.** That which is cured (see *cure*, *v.* 4); a product preserved by drying, salting, etc.; a catch of fish so treated.

Chlorid-of-gold cure. See ★*gold-cure*.—**Economic cure,** cure of a disease, not necessarily absolute, but to the extent that the patient regains his wage-earning capacity. *Lancet*, June 18, 1904, p. 1753.—**Open-air cure.** See ★*open-air*.—**Terrain cure,** treatment of disease by means of graduated exercises and measured mountain climbing, combined usually with regulation of the diet.

cure-all, *n.* **2.** The name of various plants having real or supposed medicinal virtues: in most cases a translation like *heal-all* and *all-heal*, but applied specifically to the water avens, *Geum rivale*, and the garden or lemon balm, *Melissa officinalis*. The evening primrose, *Œnothera biennis*, is called *king's cure-all*.

cure-master (kūr′mās″tėr), *n.* In *fishing*, one who superintends the curing of fish.

curf (kurf), *n.* [Another spelling of *kerf*[2], a cutting, layer, etc.] On the Isle of Portland, a calcareous rock which, considered geologically, is one of the members of the Portlandian division of the Jurassic series. [Local. Eng.]

curialist (kū′ri-al-ist), *n.* [*curial* + *-ist*.] An officer or dignitary of the Roman Curia or papal court; also, one who advocates or supports the papal system.

curibali (kö-rē-bä′lē), *n.* Same as *juribali*.

curiboco (kö′ri-bō″kō), *n.* [Braz.] In Brazil, a person of mixed Indian and negro descent.

curie (kö′rē), *n.* [Named after Mme. Marie S. *Curie* (born 1867).] A unit of radioactivity proposed by Rutherford; the amount of emanation in equilibrium with one gram of radium.

Curie point. The temperature at which ferromagnetism is transformed into para-magnetism.

Curie's law. The law, established by Pierre Curie in 1896, that the magnetic susceptibility of gases is inversely proportional to the absolute temperature.

curine (kūr′in), *n.* [*cur(ari)* + *-ine*[2].] A crystalline alkaloid, $C_{18}H_{19}O_3N_7$, found in curari. It melts at 212° C. It tastes at first sweet then bitter and acts by paralyzing the nervous system.

curist (kū'rist), *n.* One who cures or who professes to cure disease: usually employed in a somewhat contemptuous sense and in composition: as, mind-*curist*, sure-*curist*, etc. (really formed from *mind-cure* + *-ist*, etc.).

curl, *n.*, **4.** (*b*) A disease of potatoes in which the shoots become curled up and deformed. It is attributed to chlorosis. (*c*) A disease of other plants in which the leaves curl up.—**Leaf-curl.** See ★*leaf-curl.*

curl, *v.* **I.** *trans.* **4.** In *cricket*, to cause (the ball) to curve in the air: said of the bowler.

II. *intrans.* **5.** In *cricket*, to curve in the air: said of the ball.

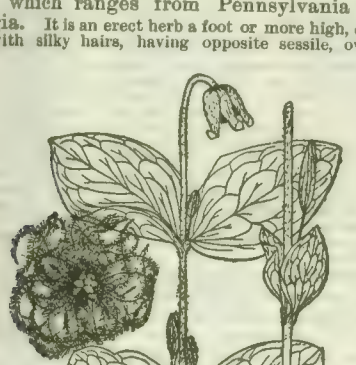
curl-cloth (kėrl'klôth), *n.* A kind of woolen fabric with a curly face.

curld, *pp.* A simplified spelling of ★*curled.*

curled (kėrld), *p. a.* **1.** Having the form of a curl; brought into curls.—**2.** Having a winding grain: said of wood, as *curled* maple. See *maple.*—**3.** In *bot.*: (*a*) much folded or crumpled, as the leaves of *Cichorium Endivia.* (*b*) Affected by curl. See *curl*, *n.*, 4 (*a*), ★(*b*), ★(*c*).

curling[2] (kėr'ling), *n.* **1.** The act of forming into curls; taking the form of curls.—**2.** Same as *curl*, *n.*, 4 (*a*), ★(*b*), ★(*c*).—**3.** A process for giving a curl to the long nap on the face of some woolen fabrics. It is done by passing the fabric beneath a plate fitted with a brush which is given a rotating or otherwise curving motion.

4. The faulty detaching of cotton from the comb in a combing-machine.



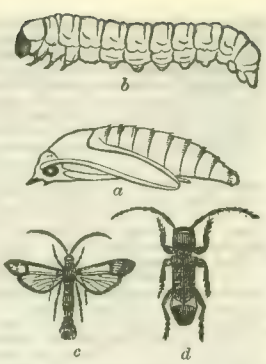
curlock (kėr'lok), *n.* A dialectal form of *charlock.*

curly, *a.* **2.** Affected with curl. See *curl*, *n.*, 4 (*a*), ★(*b*), ★(*c*).—**Curly top**, a disease of unknown origin which affects the sugar-beet. The leaves become much curled and the roots hairy, tough, and fibrous.

Sugar beets in New York, Ohio, and Michigan suffered severely from leaf spot. In Utah, Colorado, Nebraska, and to a slight extent in the Middle States the disease known as "*curly top*" was prevalent and injurious.
Yearbook U. S. Dept. Agr., 1901, p. 671.

curly-grass (kėr'li-grȧs″), *n.* A fern of the genus *Schizæa:* so called from the curly thread-like segments of the sterile fronds. See cut under *Schizæa.*—**Curly-grass family**, the fern family *Schizæaceæ* (which see).

curly-head (kėr'li-hed″), *n.* The erect silky clematis, *Clematis ochroleuca*, an American plant which ranges from Pennsylvania to Georgia. It is an erect herb a foot or more high, covered with silky hairs, having opposite sessile, ovate



Curly-head (*Clematis ochroleuca*).
(From Britton and Brown's "Illustrated Flora of the Northern States and Canada.")

leaves and large solitary thick and leathery greenish-white flowers nodding at the summit of the stem: the flowers are converted into heads of fruit one to two inches in diameter, formed of a mass of long, curled, plumose, persistent styles of a yellowish-brown color, suggesting the name.

currant[2], *n.*—**Black currant mite.** See ★*mite*[1].—**Cane-blight of currant.** See ★*cane-blight.*—**Currant bark-louse.** See ★*bark-louse.*—**Currant endropla**, an American geometrid moth, *Priocycla armantaria*, whose larva feeds on the foliage of the currant in the northeastern United States.—**Currant plant-louse, saw-fly, scale.** See ★*plant-louse*, etc.—**Native currant** of Australia. Same as ★*blueberry-tree.*—**Wild currant**, any currant in its native state; also, other plants with currant-like fruit, as *Amelanchier Botryapium* (Dismal Swamp region), and *Berberis trifoliolata* (Texas). The fruit of the latter is used for tarts, jellies, etc.

currant-borer, *n.* (*b*) The larva of a cosmopolitan moth, *Sesia tipuliformis*, probably introduced into the United States from Europe. (*c*) An American cerambycid beetle, *Pseno-cerus supernotatus.* Also called *long-horned currant-borer.*

Currant-borers.
a, larva; *b*, pupa, both enlarged; *c*, moth, natural size, of *Sesia tipuliformis*; *d*, *Psenocerus supernotatus*, twice natural size.

currant-bug (kur'ant-bug), *n.*—**Yellow-lined currant-bug.** Same as *four-lined* ★*leaf-bug.*

currant-fly (kur'ant-flī), *n.* An Americantrypetid fly, *Epochra canadensis*, which attacks the fruit of white and red currants, its larva feeding within the fruit which prematurely ripens, decays, and falls.

currant-leaf (kur'ant-lēf″), *n.* The bishop's-cap or miterwort, *Mitella diphylla:* so called from some resemblance of the leaves to those of the currant.

currant-moth, *n.*—**Pepper-and-salt currant-moth**, an American geometrid moth, *Lycia cognataria*, with pepper-and-salt markings, whose larva feeds on the foliage of the currant and other plants.

currency, *n.*—**Divisional currency**, currency consisting of the small or fractional pieces.

current[1], *n.*—**After currents**, electric currents in muscular tissue produced after the arrest of a galvanic current.—**Alternating current.** See ★*alternating.*—**Average current**, in *elect.*, the average intensity of an alternating current; the square root of the mean square of the current value. The *average current* is also sometimes defined as that value which is equal to the value of the equivalent continuous current.—**Axial current.** See ★*axial.*—**Cellulifugal current.** See ★*cellulifugal.*—**Cellulipetal current.** See ★*cellulipetal.*—**Constant current**, a direct or alternating current of constant mean intensity.—**Continuous current**, a direct current of constant or uniform intensity.—**Current of injury**, a current set up as the result of an injury to a muscle or nerve. The injured surface becomes electronegative, as compared with the intact substance. Also known as *Hermann's demarcation current.*—**Dielectric current.** Same as *displacement* ★*current.*—**Direct current**, an electric current which always flows in the same direction.—**Discharging current**, the current derived from discharging a charged storage battery or condenser.—**Displacement current**, the condition of electric stress in an insulating material or dielectric produced by an alternating electromotive force acting thereon.—**Eddy currents**, in *elect.*, induced currents flowing in closed circuits within the mass of a conductor placed in a fluctuating magnetic field or moving through a field so as to cut lines of force. Also called *Foucault currents.*—**Energy current**, an alternating current or component of current in phase with the electromotive force or voltage.—**Foucault current**, in *elect.*, same as *eddy* ★*current.*—**Franklinic current**, a current produced by an electrostatic machine.—**Guinea current**, a current in the Atlantic ocean which flows eastward along the Guinea coast; the counter-current of the equatorial Atlantic.—**Hermann's demarcation current.** Same as ★*current of injury.*—**Idle current**, in *elect.*, a term formerly used for a wattless current.—**Leakage current of transformer**, in *elect.*, a term formerly used for the exciting current of transformer, that is, a current passing through the primary circuit at open circuit of the secondary coils.—**Local current**, in *elect.*, a current circulating within any small portion of an electric circuit and not traversing the circuit as a whole. Currents flowing within a voltaic cell, for example, and not entering the external circuits, are local currents.—**Magnetic current**, the magnetic flux. See *magnetic* ★*circuit.*—**Molecular current**, in *phys.*, a term sometimes employed to denote that electric current flowing around each molecule of iron which was assumed by Ampère in a theory of magnetism.—**Molecular theory of vital currents**, the theory that nerves and muscles are composed of electromotive molecules serially connected.—**Monsoon current**, a current of the equatorial oceans, particularly of the Indian ocean, caused by the monsoon winds.—**Ore currents**, in *geol.*, subterranean waters which are believed to have brought the ores in solution to form ore-deposits.—**Oscillating current**, in *elect.*, a periodically reversing current in which the successive half-waves are of equal duration but gradually decrease in intensity. See ★*alternating.*—**Planktonic current.** See ★*planktonic.*—**Polyphase current**, a system combining two or more alternating currents differing in phase.—**Poncelet current**, a current of water having a dynamic energy of 100 kilogrammeters per second.—**Power current.** Same as *energy* ★*current.*—**Pulsating current**, a current which varies periodically in intensity, so that it always or generally flows in the same direction; a pulsatory current.—**Reactive current.** Same as *wattless* ★*current.*—**Rotary current**, a term occasionally used for a polyphase, especially a three-phase, current.—**Surface current**, a current of small depth at the surface of a lake or ocean.—**Terrestrial currents**, electrical currents traversing the crust of the earth; earth-currents.—**Tesla current**, a term sometimes used for *oscillating current.* See ★*current.*—**Upper currents**, the motions of the atmosphere as shown by the clouds or by balloons at great elevations. According to Broun's rules, deduced in 1845 from observations at Makerstown, Scotland, the successive layers one above the other move in directions successively deflected more and more to the right of the lower wind. This law was also deduced independently by Clement Ley for southern England (1872), by Abbe for American balloon voyages (1871), and for clouds throughout the United States (1872), and is sometimes known by

their names.—**Wattless current**, an alternating current, or component of current, displaced in phase from the electromotive force by a quarter-period.

current-bedding (kur'ent-bed″ing), *n.* Cross-bedding developed in deposits made by a strong current over a sandy bottom. *Dana.*

current-bottle (kur'ent-bot″l), *n.* A sealed bottle, usually one of a number, containing a dated writing asking for its return when found: cast into the sea by investigators of the direction and velocity of ocean currents. *Geog. Jour.* (R. G. S.), XVI. 374.

current-collector (kur'ent-kȯ-lek″tor), *n.* In *elect.*, any device, as a sliding brush or a trolley-wheel, for conveying current from a fixed to a moving portion of the circuit of an electric machine, motor, generator, or system; or vice versa.

current-density (kur'ent-den″si-ti), *n.* In *elect.*, the ratio of the current flowing to the cross-sectional area of the conductor, taken at right angles to the lines of flow. It is expressed in c. g. s. units of current per square centimeter, or in amperes per square centimeter, or sometimes in amperes per circular mil.

current-gage (kur'ent-gāj), *n.* An apparatus designed to measure the flow of liquids through channels; a current-meter.

current-mark (kur'ent-märk), *n.* In *geol.*, the undulating surface of sands that are drifted by a current: contrasted with a *ripple-mark* which is formed by small waves. *Geog. Jour.* (R. G. S.), XVIII. 196.

curricular (ku-rik'ū-lăr), *a.* [NL. **curricularis*, < L. *curriculum*, a course.] **1.** Of or pertaining to a carriage course or carriage-driving.—**2.** Of or pertaining to a curriculum or course of study. See ★*curricularization.*

curricularization (ku-rik″ū-lăr-i-zā″shon), *n.* [*curricular* + *-ize* + *-ation.*] Subjection to a hard-and-fast school or college curriculum.

Youth who want somewhere room for individuality, if not for distinction, and resist *curricularization* and, as the French call it, the canalization of knowledge.
G. S. Hall, Adolescence, II. 509.

currycomb (kur'i-kōm), *v. t.* To curry, as a horse.

Cursive epilepsy. See ★*epilepsy.*

cursor, *n.*—**Radial cursor**, an addition to the slide-rule, devised by Lanchester.

Lanchester's *radial cursor*, which makes thermodynamical calculations with γ-wise exponents almost as direct as plain multiplications, and far more convenient than with the log. log. line. *Nature*, July 24, 1902, p. 293.

cursus, *n.* **2.** A course of study.

curtail (kėr'tāl), *n.* In *arch.*, a member shaped like a volute or scroll, especially in stair-building, as in the lower termination of a hand-rail or the projection of the lowest step of a flight. See *curtail-step.*

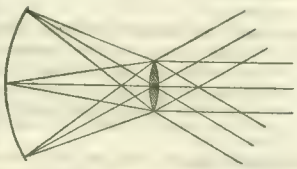
curtain, *n.* **9.** In *hydraul. engin.*, a woven fabric of brushwood or withes, such as branches of willows, placed in a stream to retard the current and permit the deposition of silt, or to compel scour and remove it.—**10.** A vertical fold of the mantle within the margins of the valves of certain pelecypods (the pectens).—**11.** In *arch.*, a wall which serves as an inclosure rather than as a support. Thus the wall beneath a large window, as in a church, or that between two buttresses which carry the vault and roof without its assistance, is a curtain.—**Asbestos curtain.** See ★*asbestos.*—**Auroral curtain**, an arrangement of nearly vertical beams of auroral light resembling the folds of a curtain, or drapery, and partly obscuring the light of the stars beyond. The foldings are usually in motion horizontally, or changing so as to give the appearance of motion, and show that the sheet of light is apparently a boundary-surface between moving masses of air.

curtain-holder (kėr'tān-hōl″dėr), *n.* A mechanical device for holding a car window-curtain in any desired position.—**Magnetic curtain-holder**, a curtain-holder consisting of bar-magnets fastened to the lower edge of the shade and bearing against soft iron guides in the window-casing. The shade is held in place by magnetic attraction. A slight pull readily releases the magnets, and when again at rest they hold the curtain in place.

curtain-paper (kėr'tān-pā″pėr), *n.* A kind of tinted and ornamented paper of close texture, used to some extent in the United States for roller-blinds or window-shades.

curtain-raiser (kėr'tān-rā″zėr), *n.* A short opening piece acted before the principal play of the evening. [Theatrical slang.]

Curtate expectation of life. See ★*expectation.*



curteous, curtesy, curtezan. Simplified spellings of *courteous, courtesy, courtezan.*

curupay (kö-rö-pī'), *n.* [Guarani *curupai.*] The name in Paraguay and Argentina of *Stachychrysum Cebil* (*Piptadenia Cebil* of Grisebach), a large tree of the mimosa family.

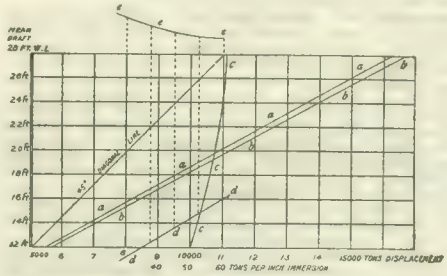
It yields a strong and easily worked dark-red timber, used for furniture and house construction, and a reddish gum resembling gum arabic. The bark contains from 19 to 25 per cent. of tannin, and is much used locally for tanning hides in the manufacture of sole-leather. Also called *cebil* and *cebil colorado*.

curv, *a., n.,* and *v.* A simplified spelling of *curve*.

curvature, *n.* **4.** In *projective geom.*, susceptibility of being cut in two different points by a straight, independently of whether the construct possessing this property has any point at which two straights inclined to one another and lying in this construct might meet. In metric geometry curvature is often used for the measure of curvature or the reciprocal of the radius of curvature.—**Axis of curvature,** the intersection of consecutive normal planes of a skew curve.—**Curvature of field,** in *photog.*, the imaginary concave surface upon which the rays of light are brought to a focus. Corrections for this are made in photographic and other objectives in order that the image may appear sharply defined at all points of the plane of the plate or film.—**Curvature of space.** See ★*space*.—**Sachs's curvature,** the difference in the growth of the two sides of a root, causing it to curve. *Wettstein.*—**Specific curvature,** the curvature of a surface expressed in terms of the solid angle subtended by a unit of area.—**Terminal curvature,** in *geol.*, the bending over of outcropping edges of strata. This is a common feature in glaciated regions, but it is not confined to them. The same effect is sometimes the result of creep.

Curvature of Field.

curve, *n.*—**Adjoint** or **adjunct curve,** in *math.*, a curve which passes 1–1 times through every i-fold point of a primitive curve.—**Affective curve.** See ★*affective*.—**Binomial curve,** in *math.*, a curve whose ordinate may be expressed by some power of a binomial function of the abscissa: thus $y=x^m(a+bx^m)^p$ is a binomial curve.—**Curve of Carus,** the axis of the pelvis represented by a curved line.—**Curve of centers of buoyancy.** See ★*curves of ship calculations*.—**Curve of comfort,** in *climatology*, a curve connecting temperatures and moistures that correspond to perfect bodily comfort for a given velocity of the wind. *Abbe*, in Monthly Weather Rev., Aug., 1898.—**Curve of decay,** in radioactivity, a curve showing the diminution of activity of a radioactive substance, as a function of the time.—**Curve of discomfort,** a curve connecting temperatures and moistures that correspond to extreme bodily discomfort for a given velocity of the wind; a hyther. *W. S. Tyler*, in Monthly Weather Rev., May, 1904.—**Curve of displacement.** See ★*curves of ship calculations*.—**Curve of distribution.** Same as *Quételet's* ★*curve*.—**Curve of energy,** in *phys.*, any curve representing change of condition or configuration of a system, in which energy is one of the variables; specifically, in *spectroscopy*, the curve of distribution of energy in the spectrum.—**Curve of extinction,** in *naval arch.*, a curve showing graphically the diminishing angle of inclination in the rolling of a vessel in still water which has been inclined by an extraneous force and then allowed to oscillate freely in the water.—**Curve of fatigue,** in *phys.*, the curve which shows the gradual change in the deformation of a body subjected to continued stress.—**Curve of flexure,** in a curve drawn on an anticlastic surface which may be held fixed without involving the immovability of the surface: the curve will be that formed by the successive elements of the inflexional tangents.—**Curve of flotation,** in *naval arch.*, a curve formed by a normal section of the envelop of the load-water planes of a vessel, in the theory of unresisted rolling.—**Curve of loads.** See ★*curves of ship calculations*.—**Curve of longitudinal shearing-stresses.** See ★*curves of ship calculations*.—**Curve of metacenters** or **transverse metacenter.** See ★*curves of ship calculations*.—**Curve of resistance,** in *naval arch.*, a curve which shows graphically the resistance of a ship or model to towing as obtained by experiments in a model basin. The model is run at various speeds and its resistance to towing is measured for each speed. These resistances are plotted as ordinates with the speeds as abscissæ and the points thus obtained are joined in a curve. The resistance for a given speed is separated into three parts, the wave-making resistance, eddy resistance, and frictional resistance (see ★*resistance*), and by suitable calculations, using the law of comparison, the curve of resistance and curve of effective horse-power for the full-sized ship of similar form to that of the model are obtained.—**Curve of saturation,** in *meteor.*, that curved line on the Hertzian or Neuhoff diagram of adiabatic changes which separates the dry stage from the cloudy stage.—**Curve of search** (*naval*), a curve of pursuit geometrically developed from information as to the speed and time of departure of a vessel or fleet of the enemy from a given place, or from its speed and probable time of arrival. The pursuing or scouting vessel follows this curve as the best method of systematic search for the enemy with the information available.—**Curve of sensitiveness,** a curve which represents the relative sensitiveness of a photographic plate for rays of different wave-length.—**Curve of stability,** a curve which shows the relation between the angle of inclination of a floating vessel, as a ship, and the arm of the righting couple. See also ★*curves of ship calculations*.—**Curve of velocity,** a curve for every point of which the abscissa is the length of time after a certain instant and the ordinate is the velocity acquired at the end of that period of time.—**Curve of weight.** See ★*curves of ship calculations*.—**Curve resistance.** See ★*resistance*.—**Curves of ship calculations.** In determining the qualities of a ship, naval architects make certain calculations based on the form of the vessel as shown by the lines. These calculations are made by certain mathematical rules known as Simpson's rules, trapezoidal rule, etc. (see ★*rule*). The calculations are made for the vessel floating at a certain number of equally spaced water-lines, and the values obtained are laid off in a diagram. The points thus obtained are joined by curves passing through them (see the cut). From the diagram the quantities for any intermediate water-line can be obtained without calculation by reading their values from the intersection of the corresponding curves with the water-line. The following curves are usually calculated for a vessel of any importance: *Curve of displacement*, a curve showing to a suitable scale the displacement of a vessel in fresh or salt water for any given mean draft. *Curve of centers of buoyancy*, a curve showing the position of the center of buoyancy (see *center*) corresponding to the immersion of a vessel to any given water-line. The curve showing the vertical position of the center of buoyancy is generally plotted in combination with the curve of transverse metacenters as follows (see the cut): A diagonal line at 45° inclination is drawn on the diagram. Where this diagonal intersects any given water-line a vertical line is drawn (see dotted line in diagram), and the intersection of this vertical with the curve of metacenters and the curve of centers of buoyancy gives the height of the metacenter and of the center of buoyancy corresponding to the displacement of the vessel floating at that water-line. The longitudinal position of the center of buoyancy is shown by laying its value off on the water-line corresponding to any given displacement forward or abaft a vertical indicating the middle perpendicular (not shown in diagram). *Curve of transverse metacenters* or *curve of metacenters*, a curve showing the height of the metacenter with reference to the water-line corresponding to any given displacement. For the method of laying off curve, see above. *Curve of tons per inch immersion* or *curve of tons per inch*, a curve showing the additional displacement corresponding to one inch deeper immersion of the vessel in the water when it is floating at any given water-line. Thus it is the measure of the



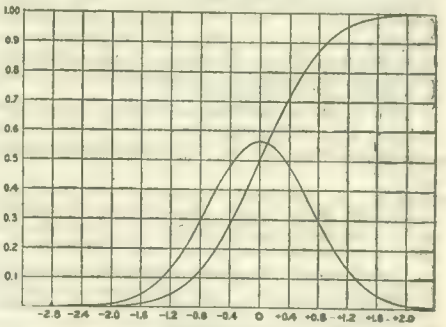


Diagram of Displacement and Other Curves usually Calculated for Ships.

a, *a*, curve of displacement in fresh water; *b*, *b*, curve of displacement in salt water; *c*, *c*, curve of tons per inch immersion; *d*, *d*, curve of vertical position of centers of buoyancy; *e*, *e*, curve of transverse metacenters.

weight required to be added to the vessel to sink her one inch deeper when she is floating at any given displacement. Additional curves are usually calculated for warships. Among the more important of these are the *cross-curves of stability*. From the cross-curves can be obtained for any given condition of loading of the vessel a *curve of statical stability* which shows, corresponding to each angle of inclination from the upright, the value of the righting couple and the point to which, if sufficiently inclined, the vessel will upset or turn turtle. The *curve of cross-sectional areas* or *curve of buoyancy* is the curve whose ordinates are areas of cross-sections up to a given water-line corresponding to each point in the length. Read to a suitable scale, these ordinates represent the buoyancy per unit of length. *Curve of weight* is a similar curve showing the actual weight of the vessel and its contents for each unit of the length. The difference between the ordinates of the curve of weights and the curve of buoyancy for any given displacement gives the *curve of loads*, from which, by integration, are successively obtained the *curve of longitudinal shearing-stresses* and the *curve of bending moments* which serve to determine whether the vessel has sufficient longitudinal strength.—**Derived curve,** of the function f(x), the graph of the derivative of the function f(x) of x.—**Diametral curve,** a curve which has, like a diameter, the property of bisecting parallel chords in a curve.—**Dioptric curve.** Same as *Cartesian oval*.—**Frequency curve.** Same as *curve of probability*, but applied more often than the latter term to unsymmetrical curves which cannot be explained in any very limited space.—**French curve,** in *mechanical drawing*, a thin plate of metal or hard rubber, sheet of cardboard, or veneer of wood cut into complicated shapes so that its edge may give a great many different curves of non-geometrical character. It is used for drawing a curve through three or more points previously laid down, and in similar ways.—**Funicular curve.** Same as *catenary curve*.—**Galton's curve.** Same as *Quételet's* ★*curve*.—**Hessian of a curve.** See ★*Hessian*^{2}.—**Ichthyoid curve,** a curve, having the generalized form of a fish, which is the profile of completed snow-drifts in the neighborhood of obstructions on the prairie; the fundamental curve of snow-drifts.—**Inertia curve,** the curve that would be described by a body moving freely on the surface of the earth, or of any other rotating body, under the influence of gravity and inertia only. At the pole it is a point and at the equator a straight line; at intermediate latitudes it is a circle whose radius depends on the sine of the latitude and on the velocity of motion.—**Integral curve.** If $\phi(x)$ and f(x) are 2 functions so related that $\frac{d}{dx}\phi(x) = f(x)$, then the curve $y = \phi(x)$ is an *integral curve* of the curve $y = f(x)$.—**Integral probability curve.** See the diagram under *Quételet's* ★*curve*. By this curve problems such as the following can be solved: Given the probability, *r*, that an object taken at random will have a certain character, then among any considerable number, *n*, of independent objects, what is the probability that the number having the character in question will be within the given inclusive limits m_1 and m_2, where $m_1 < m_2$?—**Iseidomal curve.** See ★*iseidomal*.—**Isentropic curve,** a curve, in any thermodynamic diagram, indicating any process or operation during which there is no change of entropy.—**Isogyric curve.** See ★*isogyre*.—**Isothermal curve,** the curve which represents the expansion or compression of a gas or vapor at a constant temperature. The isothermal curve for a perfect gas follows the law of Boyle or Mariotte, which is that the pressure times the volume is a constant.—**Kinematic curve,** a curve which is usually the resultant of two or more harmonic or circular motions mechanically combined.—**Liquidus curve,** a curve which shows the temperatures of complete fusion or of the beginning of solidification of a series of alloys containing every proportion of the two constituents. See ★*solidus curve*.—**Load curve,** in *electrotechnics*, a curve which indicates variations of the load of an electric-power system as a function of any variable, such as the time of day, upon which the size of the load depends.—**Magnetic curves.** (*b*) See ★*magnetic*.—**Mixed curve,** an irregular curve; a curve composed of two or more different curves.—**Motion curve,** a curve showing the successive positions of a piece of mechanism or a point, specifically of the link-block or of that part which moves the slide-valve of a steam-engine, as in a locomotive or marine engine.—**Polytropic curve,** in *thermodynamics*, a curve of constant specific heat for a perfect gas; a curve having the equation pv^n = const., where *p* is the pressure of a gas and *v* is its volume.—**Probability curve.** See *Quételet's* ★*curve*.—**Quételet's curve,** a curve which exhibits the arrangement or distribution of a group of statistical events

Quételet's Curve.

Probability Curve and Integral Curve of Probabilities.

according to the mathematical law of error. It was first employed as a means for recognizing and distinguishing biological types or species by a Belgian mathematician, Lambert Adolphe Jacques Quételet (1796–1874), and it is the basis of the modern science of biometry. Quételet showed that the numbers representing the individual qualities of a race of mankind are grouped round the numbers referring to the 'average man' in a manner corresponding to that in which single results of observation are grouped round the mean result, so that the principles of the theory of probabilities may be applied to statistical researches in anthropology as a means of distinguishing the different human races. He showed that the number of cases in which a certain height, for example, occurs among a large number of individuals of a race may be represented by an ordinate of a curve symmetrically situated with regard to the ordinate representing the mean result or average stature, and that the curves for different races of mankind are different. Also called *Galton's curve*, *curve of distribution*, *probability curve*.—**Reverse curve.** See *reverse* ★*twist*.—**Vapor-pressure curve,** a curve showing the variation of vapor-pressure with temperature.—**Vertex of a curve.** See ★*vertex*.

curve-adder (kėrv′ad″ėr), *n.* An instrument by means of which the sum of two curves of any kind, with any relations of period, amplitude, and phase, can be drawn automatically. *Scripture*, Exper. Phonetics, p. 68.

curve-pen (kėrv′pen), *n.* A ruling-pen having pen-points attached to a rod inclosed in the handle and free to rotate with it. When used in drawing fine curves the points follow the motion of the hand, whatever its direction.

curve-tracer (kėrv′trā″sėr), *n.* A machine for drawing curves; specifically, a device for recording graphically the changes of electromotive force or current which occur in alternating electric circuits or when a condenser is charged or discharged. The term is also applied to instruments for drawing curves of magnetic induction.

curve-tracing (kėrv′trā″sing), *n.* The process of tracing a curve or curves. A curve is said to be *traced* when the general form of its several parts or branches is determined, and the position of those which are unlimited in extent is indicated.

curvilineal (kėr-vi-lin′ē̤-al), *a.* Same as *curvilinear*.

curvilinear fret. See ★*fret*^{3}.

curvometer (kėr-vom′e-tėr), *n.* [L. *curvus*, curve, + Gr. *μέτρον*, measure.] An instrument for measuring the length of curved lines, as of a road on a map. A wheel is rolled along the line, each revolution of the point of contact indicating a path equal to the circumference of the wheel. *Encyc. Brit* XXX. 578.

cuscamidine (kus-kam′i-din), *n.* [*Cusc(o)* (*bark*) + *amide* + *-ine*^{2}.] A crystalline alka-

loid contained in the bark of certain species of cinchona.

cuscamine (kus'ka-min), *n.* [*Cusc(o)* (*bark*) + *amine.*] Same as ★*cuscamidine.*

Cuscutaceæ (kus-kū-tā'sē-ē), *n. pl.* [NL. (Dumortier, 1829), ‹ *Cuscuta* + *-aceæ.*] A family of dicotyledonous sympetalous plants of the order *Polemoniales*, the dodder family. It contains the genus *Cuscuta* only, and differs from the *Convolvulaceæ*, in which it is included by many authors, chiefly in its parasitic habit, the leaves being reduced to minute scales. See *Cuscuta* and *dodder*[1].

cusecs (kū'seks), *n.* An abbreviation of *cubic feet per second*, occasionally used by irrigation engineers, particularly by British engineers, as an expression of rate of flow of water.

cush[2] (kŭsh), *n.* [Origin obscure.] In North Carolina, the crumbs and scrapings of cracker- or meal-barrels, fried with grease.

cushaw (kŭsh-â'), *n.* [Also *cashaw, cashew, kershaw;* Algonkian (of Virginia) *escushaw.*] A fruit, mostly oblong or crooked, of *Cucurbita moschata*, sometimes called *squash* and sometimes *pumpkin.* The pumpkins, as the term is understood in North America, belong to the species *Cucurbita Pepo*, and the autumn and winter squashes to *C. moschata.* The name seems to be applied somewhat loosely, and in its local usage may designate pumpkin-like fruits other than those of *Cucurbita moschata;* but the usage of horticultural writings seems to confine it to that species, although it does not follow that all fruits of *C. moschata* are cushaws. The winter crookneck or Canada crookneck type is the fruit most commonly known as cushaw or cashaw. It keeps well into winter. The name is chiefly used in the southern and western United States

The best variety [of squash] for family use is the *Cashaw*, a long, cylindrical, curved variety, swollen at one extremity, of fine, creamy yellow color, very solid and excellent to use as a winter squash, and quite as valuable as any for the other purposes.

W. N. White, Gardening for the South, p. 214.

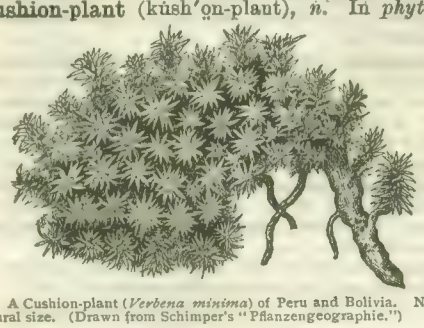
cushion, *n.* **2.** (*j*) (2) An expansion at the lower extremity of a grape-vine from which a part of its roots spring.

This had ten roots springing from the *cushion* at the base.

U. S. Dept. Agr., Div. Veg. Pathol., Bulletin 2, 1892, p. 52.

(*l*) Same as *saddle*, 3 (*g*) (6). (*m*) In *pianoforte-making*, a pad or roll of felt placed under the ends of the keys to prevent noise. See cut under *pianoforte.* (*n*) Same as *coronet*[1], 6. (*o*) A pool formed by a low dam or obstruction immediately below a higher dam to prevent erosion or destructive effect of the water which falls over the higher dam or hydraulic work.—**Cushion form,** in *phytogeog.*, the vegetation-form which is embodied in a ★cushion-plant (which see, with cut). Also called *hassock form.*—**Leaf-cushion,** in *paleobot.*, the more or less raised and usually rhombic area left on the trunks and stems of various fossil plants, especially *Lepidodendron* and *Sigillaria.* It includes the leaf-scar proper (see *scar*[1], 4), the print of the vascular bundle, the ★*parichnos* (which see), the ligule (see *ligule* (*d*)), and other markings.—**Sucking cushions,** circumscribed areas of fatty tissue in an infant's cheeks, the function of which is supposed to be to prevent the cheeks from sinking in while the child is at the breast.

cushion, *v. t.* **4.** In *mach.*, to compress (exhaust-steam or other motive fluid) by closing the exhaust-outlet of a cylinder before the piston completes its traverse. The gradual compression causes increasing pressure against the piston and arrests the motion of the reciprocating parts without shock. See *cushion*, *n.*, 2 (*h*).



cushion-bit (kŭsh'on-bit), *n.* A metal bit in which the mouthpieces are covered with vulcanized leather. Round pads of soft leather, which bear against the horse's cheeks, are attached to the side of the rings.

cushion-crawling (kŭsh'on-krâ"ling), *n.* In *Eng. billiards*, a mode of nursing along or near a cushion: analogous to American play 'on the rail' before it developed into 'straight (straight-forward and corner-turning) rail.'

cushion-draw (kŭsh'on-drâ), *n.* In *billiards*, the name of two draw-shots, in one of which the cue-ball retrogrades parallel with and along the cushion, and in the other comes peculiarly out at right angles to it, cushion and first object-ball being struck, in both shots, at about the same time.

cushion-flower (kŭsh'on-flou"ėr), *n.* An evergreen shrub, *Hakea laurina*, of the family *Proteaceæ.* See *Hakea.* [Australian.]

cushion-plant (kŭsh'on-plant), *n.* In *phytogeog.*, a plant of a vegetation-form resembling a cushion, consisting of a mass of branches from an axis, which may either persist or disappear, so crowded that leaves and flowers are shown only on the general surface. Except in the case of mosses, it is mainly an alpine or arctic type, but is also developed on islands of the south temperate zone.

A Cushion-plant (*Verbena minima*) of Peru and Bolivia. Natural size. (Drawn from Schimper's "Pflanzengeographie.")

cushion-rest (kŭsh'on-rest), *n.* In *billiards*, the cushion used as a support for the striker's bridge-hand or for the cue itself, the latter especially in giving the odds of one hand against two.

cushion-steam (kŭsh'on-stēm), *n.* The steam which remains in a steam-engine cylinder and the clearance-spaces after the exhaust-valve closes.

cushion-work (kŭsh'on-wėrk), *n.* See *cushion style*, under *cushion.*

In old embroidery the cushion-work or -style (*opus pulvinarium*) was like modern so-called Berlin work. It was done in cross- or tent-stitch with silk or wool, and was used to cover cushions, either to kneel upon or to uphold the mass-book at the altar; hence its name. It was also used for emblazoning heraldic designs.

Rock, S. K. Handbook, Textile, Fabrics, p. 81.

cusk-eel (kusk'ēl), *n.* Any fish of the family *Ophidiidæ.* They are marine forms, eel-shaped, but have nothing in common with the true eels.

cusp, *n.* **5.** (*c*) One of the segments, with pointed tip, of a valve of the heart.—**Ceratoid cusp,** a cusp at which the two branches of the curve, in the neighborhood of the singular point, lie on opposite sides of the common tangent.

cuspate, (kus'pāt), *a.* [*cusp* + *-ate*[1]. Cf. *cuspidate.*] Resembling a cusp; having the form of a cusp.

cuspid (kus'pid), *n.* and *a.* [L. *cuspis* (*cuspid-*), a point: see *cusp.*] **I.** *n.* A canine tooth.

II. *a.* Same as *cuspidate*, 2.

cuspidal, *a.* **3.** Having cusps; cuspidate: said of teeth. [Rare.]—**Cuspidal tangent.** See ★*tangent.*

cuspidation (kus-pi-dā'shon), *n.* Same as ★*cusping.*

cuspidite (kus'pi-dīt), *n.* [L. *cuspis* (*cuspid-*), point, + *-ite*[2].] Same as *cuspidine.*

cuspidule (kus'pi-dūl), *n.* [NL. **cuspidula*, dim. of *cuspis*, a cusp.] A minute cusp. [Rare.]

cusping (kus'ping), *n.* In *arch.*, an arrangement of cusps; a series of cusps; the general system of decoration by cusps, as in Gothic tracery.

cusplet (kusp'let), *n.* [*cusp* + *-let.*] A small cusp.

cuspule (kus'pūl), *n.* [*cusp* + *-ule.*] In *anat.*, a small projection or minute cusp on a tooth.

customary, *n.* **2.** A book which treats of the rules, regulations, usages, and ceremonies to be observed by a religious community, order, or college. Also *custumary.*—**Customary estate,** See ★*estate.*

custom-free (kus'tum-frē), *a.* Free of customs-duty; duty-free; on the free list: as, *custom-free* goods.

cut, *v.* **I.** *trans.* **20.** In *golf*, to draw the club smartly across and underneath (a ball) with a quick upward turn of the wrists. *Practical Golf*, p. 49.—**21.** In *projective geom.*, said of the intersecting by a fixed plane μ (the picture-plane) of a figure, the subject, made up of planes β, γ, δ, etc., and straights b, c, d, etc., thus constructing the meets $\overline{\mu\beta}$, $\overline{\mu\gamma}$, $\overline{\mu\delta}$, and the passes $\mu{\cdot}b$, $\mu{\cdot}c$, $\mu{\cdot}d$. Thus is obtained a new figure composed of straights and points, all on μ, and called a *cut* of the subject. If the subject is an eject of an original, the cut of the subject is an image of the original.

The operations of projecting and *cutting* are the two fundamental ones of the Projective Geometry.

C. Leudesdorf, Cremona, Projective Geom., p. 2.

Cut service, terrace. See ★*service*[1], ★*terrace.*—**Cutting-down machine,** in *shoe manuf.*, a foot-power cutting-machine employing a straight-edge knife for cutting panels, trimming shank-pieces, etc.—**Cutting-off tool,** in a lathe, a special tool for cutting off any part of the work to release it from the chuck, or to finish the end of the piece. It is made in many forms. A tool having two parallel cutting-off blades, with a narrow space between them, is used to cut flat rings from a pipe and is called a *ring-cutting tool.* An automatic machine for cutting metal rods into lengths is called a *cutting-off machine*, as is also a cold saw for cutting rods and bars. See *parting-tool.*—**To cut ice,** to make an impression; effect something. [Slang.]—**To cut the pan,** in *soap-making*, to add salt to the original solution obtained by boiling together fat, alkali, and water, in order to precipitate or curdle the soap, leaving glycerin in the watery brine or under-lye.

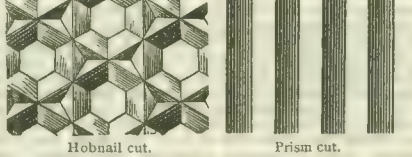
II. *intrans.* **9.** In *mech.*, to become scored or scratched by friction, as a journal-bearing or piston-rod when imperfectly lubricated or improperly packed.—**To cut in.** (*c*) In *carriage-painting*, to apply color around a letter or stripe.—**To cut out, to cut all out,** in sheep-shearing, to finish the work. [Australia.]

cut, *n.* **22.** In *mining:* (*a*) An advance opening made with a pick or by blasting in drifting or other mine-work to facilitate subsequent blasting. (*b*) An open side. In long-wall work, one working-face in advance of another gives it *cut.* *Barrowman*, Glossary.—**23.** In *forestry*, the season's output of logs.—**24.** In *agri.*, a land or ridge.

After this the furrows between the "lands," or "*cuts*," are cleaned out, so as to allow of surface drainage.

H. J. Webb, Advanced Agriculture, p. 319.

25. A slit or narrow opening across the stage of a theater for use in moving the scenery up or down.—**26.** In *sugar-manuf.*, a pause in the process of boiling syrup, during which the evaporating-pan is partly emptied of the concentrated syrup. A portion is left to set up crystallization in the fresh syrup which is then added and the process resumed.



To obtain this result, reduce the cutting and shorten the time of boiling, refiners now proceed as follows, viz., they concentrate some liquor in the pan to nearly the crystallizing point and add to it a proportion of the dried sugar from the first or earlier *cuts* of a former boiling.

Sci. Amer. Sup., Feb. 28, 1903, p. 22706.

27. In *math.*: (*a*) Any separation of the system of rational numbers into two classes, A_2, A_1, which possesses the characteristic property that every number in A_1 is less than every number in A_2.

Every separation $E = A + A'$ which satisfies these conditions is called a *cut*, and will be denoted by (A, A'). We have seen that every rational number a is associated with a definite cut. Conversely, a cut (A, A') in which A has a last element a is perfectly definite, and specifies a without ambiguity. *Encyc. Brit.*, XXXI. 284.

(*b*) In *projective geom.*, the figure obtained by cutting. See ★*cut*, *v. t.*, 21. (*c*) In *function-theory*, the line of division in the z-plane, which serves to separate the branches of a function from one another.—**28.** The act of cutting or interfering. See *cut*, *v. i.*, 6.—**Fish-fin cut,** a standard pattern in decorative glass-cutting, resembling the serrated fins of a fish.—**Forward cut,** in *cricket*, a stroke by which a short-pitched ball is sent to the right side of point. *Hutchinson*, Cricket, p. 67.—**Hobnail cut,** a standard pattern in decorative glass-cutting.

Hobnail cut. Prism cut.

—**Indian cut,** a method of cutting gems in Ceylon and the Orient, in which the size of the table is usually double the size of the culet and there is no special order as to the size of any of the facets, the gems being cut for weight and preservation of color rather than for their beauty. They are almost invariably recut when sent to Europe or the United States.—**Late cut,** in *cricket*, a wrist-stroke by which a length ball, or a ball short of a length, is hit when it has almost passed the batsman, so as to send it in the direction of third man. *Hutchinson*, Cricket, p, 67.—**Olive cut,** a standard pattern in decorative glass-cutting.—**Prism cut,** a standard pattern in decorative glass-cutting.—**Rasp cut.** Same as *rasp*[1], 1.—**Speedy cut,** an injury to the inside of the fore leg of a horse just below the knee, inflicted when the animal is trotting or going at a rapid gait.—**Split cut.** (*a*) See *split.* (*b*) A standard pattern in decorative glass-cutting. See ★*split*, *n.*—**Square cut,** in *cricket*, a wrist-stroke by which a length ball, or a ball short of a length, is sent in the direction of point. *Hutchinson*, Cricket, p. 67.—**Strawberry diamond cut, table diamond cut,** standard patterns in decorative glass-cutting.

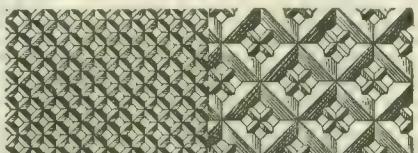


Table diamond cut. Strawberry diamond cut.

cut-and-cover (kut'and-kuv'ėr), *a.* and *n.* **I.** *a.* In *engin.*, a term applied to a method of tunnel construction in which those portions which approach the surface are made by cutting down from above (instead of boring horizon-

tally) and filling in with the excavated earth when the cut has been properly lined and roofed over.

II. *n.* The cut-and-cover method of tunnel construction.

cut-and-fill (kut′and-fil′), *n.* In *geol.*, lateral planation on one side of a meandering stream accompanied by deposition on the other.

This is *cut-and-fill.* The sediment eroded from the curve which is concave toward the stream is shifted down-stream, while that deposited in the curve which is convex toward the stream is brought down from above.
Chamberlin and Salisbury, Geol., I. 183.

cutch[3], *n.*—**Diamine cutch**, a direct cotton coal-tar color of the disazo type, derived from diamido-naphthalene. It dyes unmordanted cotton a violet brown from a salt bath.

cut-chain (kut′chān), *n.* In *mining*, a chain used on inclines, which may be cut at different places to suit various levels.

cut-finger (kut′fing″gėr), *n.* See *Vinca*.

cutigeral (kū-tij′e-ral), *a.* [L. *cutis*, skin, + *gerere*, carry, + *-al*[1].] Carrying or supporting skin.—**Cutigeral cavity**, the depression or emargination in the inner upper border of a horse's hoof.

cut-in (kut-in′), *n.* Same as *cut-in notes*. See *cut*, *p. a.*

cutization (kū-ti-zā′shọn), *n.* [L. *cutis*, skin, + *-ize* + *-ation*.] Transformation into skin.

cutline (kut′līn), *n.* Same as ★*cantline*.

cutling[2] (kut′ling), *n.* [*cut* + *-ling*[1].] A cutting; a small part of a plant, as a twig, severed for purposes of propagation.

cut-looker (kut′lůk″ėr), *n.* One who inspects the weaver's cut or piece of cloth as it comes from the loom.

cut-meter (kut′mē″tėr), *n.* An instrument for measuring the cutting-speed of machine-tools. It is essentially a form of tachometer, having a dial which, when the instrument is pressed against the spindle of a lathe, the cutter of a milling-machine, or the table of a planer, records the speed of the cut made by the tool.

cut-money (kut′mun″i), *n.* See ★*money*.

cut-off, *n.* 7. An attachment to a magazine firearm which enables the soldier to use it as a single-loader and reserve the cartridges in the magazine.

The new weapon [Springfield rifle] is what is known as the clip-loading magazine gun, being provided with a *cut-off* which enables the firer to use it as a single loader.
Review of Reviews, Nov., 1903, p. 570.

8. In *forestry*, an artificial channel by which the course of a stream is straightened to facilitate log-driving.—**9.** The practice of stopping or cutting off the admission of motor-fluid, such as steam, to the engine-cylinder before the traverse of the piston is completed. It makes the steam imprisoned in the cylinder work by expansive action after cut-off has occurred, so that the steam is of lower pressure and temperature when the exhaust takes place, and the heat in it is more efficiently utilized. The cut-off is said to be *short* when the expansion period is long. The expansion or degree of expansion is the reciprocal of the cut-off; that is, if the cut-off is at ⅔ of the stroke, the expansion is ⅔, or the steam has ⅔ the volume which it occupied when the valve closed. The point of cut-off is the point of the piston traverse at which the valve closed.—**Commercial cut-off**, a point on a steam-engine indicator-diagram which is determined by drawing a line parallel to the base-line through a point which shows the maximum pressure during admission, and intersecting it with the backward prolongation of the expansion-line by a hyperbolic curve; that point of cut-off which gives the greatest power for a dollar expended to produce such power.—**Cut-off governor**, a governor which regulates the speed of the engine by varying the point of cut-off, thus changing the amount of steam or gas admitted to the cylinder by shortening or lengthening the period of admission, but without affecting the pressure during such admission.—**Cut-off muscle.** Same as *compressor urethræ*.—**Cut-off plate.** (*a*) Same as ★*cut-off valve*. (*b*) A partition or plate in a valve-chest having one or more ports controlled, as to opening and closure, by a cut-off valve.—**Cut-off ring**, a metal ring with a number of holes around its periphery, placed in the steam-chest of a turbine and used to regulate the amount of steam admitted to it. The position of the holes in this ring determines the number of nozles in use.—**Cut-off valve**, a steam-valve which slides on the back of the main steam-valve to cut off steam from the latter and hence from the cylinder. This enables the cut-off to be made earlier and more sharply than by means of a single valve, since the exhaust functions of the main valve are not modified by the angular advance or considerable lap required to produce early cut-off of admission. The cut-off valve may be adjustable by hand or by the governor to make the cut-off variable.—**Drop cut-off**, a closure of the period of admission of steam to an engine-cylinder by releasing the valve from the mechanism which opened it, so that it closes suddenly by a weight or by a spring. (See *Corliss* ★*valve*.) This was first proposed for vertical spindle-valves by Sickles. A dash-pot is required to prevent inconvenient shock.—**Governor cut-off**, a period of admission for the steam to the cylinder, which is made to vary as the demand for steam varies and is effected automatically by the action of the engine governor.—**Trip cut-off.** Same as *drop* ★*cut-off*.

cut-out, *n.* **2.** A clutch; a device for mechanically connecting or disconnecting two pieces.—**Film cut-out**, in *elect.*, a cut-out in which a film or sheet of paper or mica is employed which is punctured if the voltage exceeds the normal value.

cut-over (kut′ō″vėr), *v. t.* In *cricket*, to injure (the batsman) by striking him in vulnerable parts: said of the ball.

cut-shot (kut′shot), *n.* A blast-hole designed to break coal which has been opened on one side by shearing with a pick or otherwise. [Scotch.]

cuttage (kut′āj), *n.* [*cut* + *-age*.] The practice or process of multiplying plants by means of cuttings or severed parts.

cuttanee (kut′a-nē), *n.* [Hind. Pers. **kattanī*, < Hind. *katān*, fine linen (Fallon), *kattān*, waste selvage of silk (Yule, 1903), < Pers. Ar. *kattān*, linen.] A stuff of silk, or of silk and cotton, at one time imported into Europe from the East Indies.

cutter[1], *n.* **3.** (*c*) A vessel of the government revenue marine which is known as the revenue-cutter service.—**Albany cutter**, a style of sleigh first built by James Goold in Albany, New York. Its characteristic features are a light bent-wood frame for the body, well-curved panels, and full-sweep outlines. An enlarged size has seat-room for four or six passengers.—**Ensilage cutter.** See ★*ensilage*.—**Formed cutter**, a cutter made of a special form to adapt it to particular kinds of work. It is made in a great variety of forms to which special names are given, as *twist-drill cutter*, *grooving-cutter*, *angular*, *spiral*, *convex*, *volute cutter*, etc.—**Lever cutter**, a small machine which has a feed-table on which hay or other material to be cut is placed and pushed against a pivoted knife operated by a hand-lever. Larger machines employ revolving knives operated by means of a hand-crank.

cutter-brig (kut′ėr-brig), *n.* A square-rigged vessel with a fore-and-aft mainsail and a jigger-mast.

cutter-built (kut′ėr-bilt), *a.* Built on the lines of a cutter.

cutter-gig (kut′ėr-gig), *n.* A ship's boat between a cutter and a gig in build and size.

cutter-rigged (kut′ėr-rigd), *a.* Rigged like a cutter. See *cutter*, 3 (*b*).

cutter-spindle (kut′ėr-spin″dl), *n.* A revolving head or spindle to which cutting-blades can be attached.

cutter-yacht (kut′ėr-yot), *n.* A deep-draught comparatively narrow-beamed vessel rigged as a cutter.

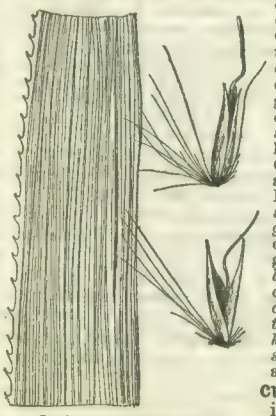
Cutthroat finch. See ★*finch*[1].

cutting, *n.* **9.** A process in bookbinding. After gluing, rounding, and backing, the edges are cut in a special machine. Cutting is one of the secondary processes included in the general term *forwarding*. See *forwarding*, *n.*, 2.—**Accretion cutting.** Same as ★*accretion thinning*.—**Clean cutting**, in *forestry*: (*a*) The cutting of the entire stand. (*b*) An area upon which the entire stand has been cut.—**Cutting series**, in *forestry*, a block, or a part of a block, containing even-aged stands whose ages differ uniformly within given limits and which are to be cut in turn, the cuttings usually following a given direction. A perfect cutting series seldom exists, except under the clean-cutting method followed by artificial reproduction, or under the sprout method.—**Preparatory cuttings.** See *stand* ★*method*.—**Regeneration cutting.** See *reproduction* ★*cutting*.—**Removal cuttings.** See *stand* ★*method*.—**Reproduction cutting**, in *forestry*, any cutting which is intended to invite or assist reproduction.—**Seed cuttings.** See *stand* ★*method*.—**Severance cutting**, in *forestry*, the cutting of all trees upon a narrow strip before natural pruning has far advanced, in order that the trees bordering this strip may, as the result of partial exposure, become wind-firm through the development of strong roots.

cutting-almond (kut″ing-ä′mọnd), *n.* The American feverfew or prairie-dock, *Parthenium integrifolium*, a stout composite plant with numerous small white-flowered heads in dense terminal corymbs: found from Maryland to Minnesota and south to Georgia and Texas.

cutting-back (kut″ing-bak′), *n.* The heading-in of shoots or plants by cutting the leading shoots off at the ends.

cutting-bed (kut′ing-bed), *n.* A bed or plot of sandy soil for propagating plants. The cuttings of currant, privet, or other shrubs or trees are set in the bed in the spring or fall and allowed to stand for one growing season, when they may be removed from it for sale or permanent planting. In a greenhouse a shallow box of wood or slate placed over the hot-water or steam pipes and filled with sand is used as a propagating-bed for such plants as the geranium, verbena, etc.



cutting-cylinder (kut′ing-sil″in-dėr), *n.* The cylinder with a knife-attachment which cuts the roll of paper printed on a web-press into sheets of proper length.

cutting-die (kut′ing-dī), *n.* A simple die for cutting out the blanks used in making tinware and other sheet-metal objects.

cutting-engine (kut′ing-en″jin), *n.* A machine for cutting gear-teeth or ratchet-wheels. It has an indexing device to divide a circumference into aliquot or equal parts.

cutting-frame (kut′ing-frām), *n.* A wooden frame, with a trough and a spindle, in which are placed the wheels used in glass-cutting.

cutting-grass (kut′ing-gràs), *n.* Same as *cut-grass*. The name is also applied to a number of sedges, especially to species of *Cladium* and *Scleria*. On the Island of Guam there are open areas called 'savannas' covered with the cutting-grass, *Xiphagrostis floridula*, also called *neti* or *sword-grass*. In Australia and Tasmania occurs *Cladium psittacorum* and in the Everglades of Florida, *Cladium effusum*, also called *saw-grass*. In the West Indies and South America grow *Scleria reflexa*, *S. latifolia*, and a number of allied species called *cortadera* and *herbe coutteau*. See *cut-grass*, *knife-grass*, *razor-grass*, *saw-grass*, ★*Cladium*, and *Scleria*.

Cutting-grass (*Xiphagrostis floridula*).

Portion of leaf-blade showing cutting-teeth; spikelets. All magnified.

cutting-in (kut″-ing-in′), *n.* The process of shortening the growth of plants or of reducing their size by cutting the leading shoots in two. Often called ★*cutting-back* (which see).

cutting-liquor (kut′ing-lik″ọr), *n.* In *calico-printing*, a chemically prepared liquor for discharging (or cutting), in spots, a color that is printed on the cloth, in order to produce a pattern. *G. Duerr*, Bleaching and Calico-printing, p. 45.

cutting-machine (kut′ing-ma-shēn″), *n.* An apparatus, used by cracker-bakers, for cutting a sheet of sponge or water dough into crackers. Sometimes called *peeling-machine*.

cutting-pot (kut′ing-pot), *n.* A shallow earthenware pot filled with sand and used as a small propagating-bed in a window or greenhouse.

cutting-press, *n.*—**Armature-disk cutting-press**, a press employing a gang of dies which punch the blank circular armature and make all the perforations, key-slots, and notches at once. Other machines cut segments of armature-disks, cutting, perforating, and notching at one stroke. See ★*notching-press*.

cutting-shop (kut′ing-shop), *n.* An establishment in which flint-glass is decorated by the process of cutting or grinding.

cutting-tool (kut′ing-tōl), *n.* A tool with a sharp edge intended or adapted for cutting, as distinguished from a boring-, piercing-, planing-, riving-, sawing-, or other tool.

cutting-wire (kut′ing-wīr), *n.* In *ceram.*, a piece of fine brass wire, a foot or more in length, to each end of which a small piece of wood or other object is attached as a handle: used by potters for cutting the plastic vessel from the wheel-head. See *archetto*.

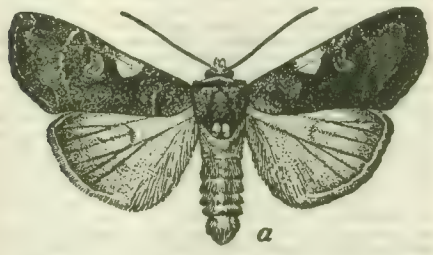
cuttle[4] (kut′l), *n.* [Origin obscure; perhaps orig. a fold made by the use of the back of a knife (see *cuttle*[2]).] A fold or plait of cloth, formed when the piece is done up in layers.

cuttle[4] (kut′l), *v. t.* [See ★*cuttle*[4], *n.*] To fold (cloth) in plaits, with the exception of a length at one end, which is wrapped around the plaited part for convenience in unfolding and showing it.

Cuttle, to fold cloth in the following manner. First, a small portion is doubled, then another upon it (not round it), and so on until it is all doubled up; finally wrap the end, left first or last round all. The reasons for adopting this mode are, that the cloth is supposed to keep best; it is easier to unfold for show purposes; it piles best.
Glossary of the Dialect of Almondbury and Huddersfield, [p. 34. *N. E. D.*

cuttle-shell. Same as *cuttlebone*.

cutty-stoup (kut′i-stoup), *n.* A pewter vessel holding the eighth part of a chopin or quart. *Jamieson*.



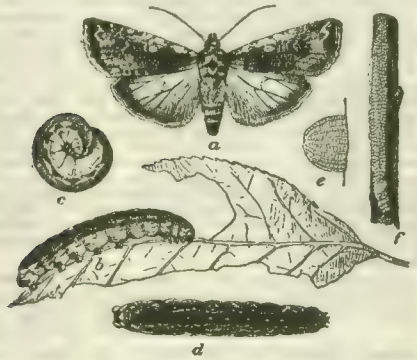
cut-under (kut′un-dėr), *n.* A carriage or other vehicle in which the body is cut out in such a way as to allow the front wheels to pass under it in turning; also, the form thus produced. See *cut-under buggy*, under *buggy*[2].

cut-ups (kut′ups), *n. pl.* Articles of hosiery, such as stockings, undershirts, etc., cut and shaped out of a web knitted by machinery, and then sewed together and finished by other machines.

cut-work (kut′wėrk), *n.* [*cut*, *n.*, 13, + *work*, *n.*] In typographic printing, the presswork of woodcuts or their electrotypes, or of illustrations

of any kind, that requires more skill than that given to ordinary type-work.

cutworm, *n.*—**Bean cutworm,** the larva of an American noctuid moth, *Ogdoconta cinereola.* It devours the buds and leaves of beans and peas.—**Black cutworm,** the larva of *Agrotis ypsilon.*—**Bronzed cutworm,** the larva of *Nephelodes violans.*—**Climbing cutworm,** any one of several different cutworms which climb trees and plants at night to feed on foliage or fruit; notably and specifically, the larva of *Euxoa scandens.*—**Clover cutworm,** the larva of a noctuid moth, *Mamestra trifolii,* which, although partial to clover, feeds also upon other plants, as the cabbage.—**Cotton-boll cutworm,** the larva of an American noctuid moth, *Prodenia ornithogalli,* which feeds on the bolls and squares of cotton in the same way as does the boll-worm.—**Dark-sided cutworm,** the larva of an American noctuid moth, *Euxoa messoria.*—**Dingy cutworm,** the larva of *Feltia subgothica.*—**Granulated cutworm,** the larva of an American noctuid moth, *Feltia annexa.*—**Greasy cutworm,** the larva of an American noctuid moth, *Agrotis ypsilon.*—**Pretty cutworm,** the larva of *Mamestra legitima.*—**Shagreened cutworm,** the larva of *Feltia malefida.*—**Speckled cutworm,** the larva of *Mamestra subjuncta.*



a

b

Spotted Cutworm (*Noctua c-nigrum*).
a, moth; *b*, larva, somewhat enlarged.

—**Spotted cutworm,** the larva of an American noctuid moth, *Noctua c-nigrum,* which damages grains, grasses, and other crops.—**Striped cutworm,** the larva of an American noctuid moth, *Feltia jaculifera,* a species of eastern distribution.—**Variegated cutworm,** the larva of an American noctuid moth, *Peridromia saucia,* which

Variegated Cutworm (*Peridromia saucia*).
a, moth; *b*, *c*, *d*, larvæ; *e*, egg; *f*, egg mass on twig. All reduced except *e*, highly magnified. (After Howard, U. S. D. A.)

damages crops of nearly all kinds, including garden and field crops, also fruit-trees, greenhouse plants, etc.—**Western striped cutworm,** the larva of an American noctuid moth, *Feltia herilis,* a species of western distribution.—**W-marked cutworm,** the larva of an American noctuid moth, *Noctua clandestina.*

cuvenant, *n.* and *v.* A simplified spelling of *covenant.*

cuver, cuverd, cuvering. Simplified spellings of *cover, covered, covering.*

cuverlet, *n.* A simplified spelling of *coverlet.*

cuvetous, *a.* A simplified spelling of *covetous.*

cuvette, *n.* **4.** In *photog.,* a narrow vessel of glass, porcelain, vulcanite, etc., for holding silver nitrate or other solutions: it is placed vertically or at an angle, and into it the photographic plate is dipped. *Wilson,* Cyc. of Photog., p. 107.

cuvey, *n.* A simplified spelling of *covey.*

Cuvier, canal of. Same as *ductus Cuvieri.*

Cuyahoga shale. See ★*shale*[2].

Cuzco corn. See ★*corn*[1].

cuzen, cuzenage. Simplified spellings of *cozen, cozenage.*

cuzin, *n.* A simplified spelling of *cousin.*

C. V. An abbreviation of *Common Version* (of the Bible).

C. V. O. An abbreviation of *Commander of the Royal Victorian Order.*

cwm (köm), *n.* [W. *cwm,* a valley, comb: see *comb*[3], *coomb*[2].] A round valley-head inclosed on all sides but one by steep slopes; a corrie; a cirque. The typical cwms of the Welsh mountains have been shaped by glacial erosion. *Geikie,* Text-book of Geol., p. 541.

C. W. O. An abbreviation of *cash with order.*

cyamelide (sī-am′e-lid), *n.* [*cyamel(lone)* + *-ide*[2].] A polymeric form of cyanic acid, $(CONH)_4$. It forms a white, amorphous, insoluble powder.

cyamellone (sī-am′e-lōn), *n.* [*cya(nic)* + *mellone.*] A tribasic acid, $C_9H_3N_{13}$, known only in solution and in its salts. The potassium salt is obtained by heating mellone with a solution of potassium hydroxid. Also called *mellone hydrid.*

cyameluric (sī″a-me-lū′rik), *a.* [*cyamel(lone)* + *-uric.*] Noting a tribasic acid, $C_6H_3O_3N_7 + 2\frac{1}{2}H_2O$, whose potassium salt is formed when the potassium salt of cyamellone is boiled with a solution of potassium hydroxid.

cyanacetic (sī″an-a-set′ik), *a.* [*cyan(ogen)* + *acetic.*] Derived from chloracetic acid and potassium cyanide.—**Cyanacetic acid,** a crystalline acid, $CH_2(CN)CO_2H$, whose potassium salt is formed by the action of a solution of potassium cyanide on chloracetic acid. It melts at 55° C.

cyananiline (sī-an-an′i-lin), *n.* [*cyan(ogen)* + *aniline.*] A crystalline base, $NH{:}C{-}NHC_6H_5$ / $NH{:}C{-}NHC_6H_5$ formed by the action of cyanogen on aniline. It melts at 210–220° C.

cyanephidrosis (sī-a-nef-id-rō′sis), *n.* [Gr. *κύανος,* blue, + *ἐφίδρωσις,* superficial perspiration.] Blue sweat, a form of chromidrosis.

cyanescent (sī-a-nes′ent), *a.* [*cyan(eous)* + *-escent.*] Tending to a cyaneous or dark bluish color.

cyanethine (sī-an′e-thin), *n.* [*cyan(ide)* + *eth(yl)* + *-ine*[2].] A compound, $C_9H_{15}N_3$, which occurs when ethyl cyanide is treated with potassium.

cyanformic (sī-an-fôr′mik), *a.* [Irreg. < *cyan(ogen)* + *formic.*] Same as ★*cyanoformic.*

cyanhematin (sī-an-hem′a-tin), *n.* [Irreg. < *cyan(ogen)* + *hematin.*] A supposed compound of cyanogen and hematin.

cyanhemoglobin (sī-an-hem-ō-glō′bin), *n.* [Also *cyanhæmoglobin;* irreg. < *cyan(ogen)* + *hemoglobin.*] A compound of hydrocyanic acid with hemoglobin.

cyanhydrate (sī-an-hī′drāt), *n.* [*cyan(ogen)* + *hydr(ogen)* + *-ate*[2].] Same as ★*cyanhydrin.*

cyanhydrin (sī-an-hī′drin), *n.* [*cyan(ogen)* + *hydr(ogen)* + *-in*[2].] A compound, RC(OH)CN.H or R-C(OH)CN.R′, containing a hydroxyl and a cyanogen group. The cyanhydrins are usually prepared by the addition of hydrocyanic acid to an aldehyde or ketone.

cyanic, *a.* **3.** Same as *cyanotic.*

cyanide, *n.*—**Alkaline cyanide,** a compound of cyanogen and an alkali metal.—**Cyanide of cacodyl.** See ★*cacodyl.*—**Cyanide process,** an important process of modern metallurgy, in which a dilute solution of an alkaline cyanide, aided by the action of atmospheric oxygen, serves to dissolve metallic gold existing in a very finely divided condition in rock: the gold is recovered from the solution by precipitation on metallic zinc. The process is especially valuable in the treatment of poor but abundant ores of gold, as in South Africa, and of tailings from other methods of treatment.—**Platinobarium cyanide.** Same as ★*barium platinocyanide,* or *platinum* ★*baricyanide.*—**Potassium cyanide.** Much of the salt sold under this name is in reality a mixture of two thirds potassium cyanide and one third sodium cyanide, this mixture serving quite well for all of its usual applications in the arts. In two respects these alkaline cyanides have recently commanded special attention, first on account of their use on a very large scale for the extraction of gold from rocks containing the precious metal in such small proportion as not to admit of profitable working in any other way, and secondly on account of the demonstrated possibility of utilizing, with the aid of the electric furnace, the nitrogen of the air for the production on the *a* scale of the cyanides themselves. See ★*cyanide process.*

cyanide (sī′a-nid or -nīd), *v. t.*; pret. and pp. *cyanided,* ppr. *cyaniding.* [*cyanide, n.*] To treat an ore with a weak solution of an alkaline cyanide, as in the cyanide process for the extraction of gold. See ★*cyanide process.*

cyanilic (sī-a-nil′ik), *a.* [*cyan(agen)* + *-il* + *-ic.*] Noting a crystalline acid, $C_3H_3O_3N_3 + 2H_2O$, obtained by boiling mellone with nitric acid. It is isomeric with cyanuric acid but is more easily soluble.

cyanimide (sī-an′i-mid), *n.* [*cyan(ogen)* + *imide.*] A salt of a hypothetical acid, H_2CN_2.—**Calcium cyanimide.** Same as ★*calcium cyanamide.*

cyanine, *n.* **2.** In *chem.,* a beautiful blue dye, chinoline blue, prepared by acting on a mixture of chinoline and lepidine with amyl iodide.

Unfortunately it does not resist the action of light, and hence has lost its importance as a dyestuff, but it is used in making orthochromatic plates for photography.—**Alizarin cyanine,** a name applied to several mordant dyestuffs derived from anthraquinone, which produce greenish blues. They are chiefly tetra- or penta-hydroxyanthraquinones.—**Brilliant alizarin cyanine G** and **3G,** mordant coal-tar colors, similar to alizarin blue.—**Cyanine B,** an acid coal-tar color prepared by oxidizing patent blue. It dyes wool and silk, in an acid bath, a blue resembling indigo.

cyanitic (sī-a-nit′ik), *a.* [*cyanite* + *-ic.*] Pertaining to or containing cyanite.

cyanmethemoglobin (sī″an-meth″em-ō-glō′bin), *n.* [*cyan(ogen)* + *methemoglobin.*] A compound of methemoglobin with hydrocyanic acid.

cyano (sī′a-nō), *n.* [Detached from *cyanogen.*] The radical CNO contained in cyanic acid.

cyanochroite (sī-a-nok′rō-īt), *n.* [Gr. *κύανος,* blue, + *χρόα,* color, + *-ite*[2].] A hydrous sulphate of copper and potassium occurring in bright-blue crystalline crusts, found in Vesuvian lavas after the eruption of 1855.

cyanocrystallin (sī″a-nō-kris′ta-lin), *n.* [Gr. *κύανος,* blue, + *κρύσταλλος,* crystal, + *-in*[2].] A bluish pigment found in the eggs and carapace of the river crab and the lobster.

cyanoform (sī-an′ō-fôrm), *n.* [*cyan(ide)* + *(chloro)form.*] A crystalline compound, $CH(CN)_3$, formed by the action of potassium cyanide on chloroform.

cyanoformic (sī″a-nō-fôr′mik), *a.* [*cyano(gen)* + *formic.*] See the following phrase.—**Cyanoformic acid,** a hypothetical acid, $CN.CO_2H$, known only in the form of its esters, which are prepared by the dehydration of esters of oxamic acid.

cyanogenetic (sī″a-nō-jē-net′ik), *a.* [*cyano(gen)* + *-genetic,* < *-genesis:* see *genetic.*] Giving rise to cyanogen. The poisonous properties of certain fodder-plants and food-grains are referable to cyanogenetic glucosides which occur in the young plants but gradually disappear as the seeds ripen.

Besides lotusin and dhurrin, the glucosides we have isolated from young plants of Lotus arabicus and Sorghum vulgare respectively, only one other *cyanogenetic* glucoside is definitely known.
Philos. Trans. Roy. Soc. (London), Ser. a, 1902 p., 409.

cyanomaclurin (sī″a-nō-ma-klō′rin), *n.* [Gr. *κύανος,* blue, + E. *maclurin.*] A compound, $C_{15}H_{14}O_6$, closely related to the catechins and found in the jack-wood, *Artocarpus integrifolia.*

cyanometric (sī″a-nō-met′rik), *a.* [*cyanometer* + *-ic.*] Pertaining to or measured by the cyanometer.

cyanophilic (sī-a-nō-fil′ik), *a.* [Gr. *κύανος,* blue, + *φίλος,* loving, + *-ic.*] Same as ★*cyanophilous.*

cyanophilous (sī″a-nof′i-lus), *a.* [Gr. *κύανος,* blue, + *φίλος,* loving, + *-ous.*] In *cytol.,* having the capacity of readily staining in blue or green dyes: said of cells and tissues: opposed to *erythrophilous.*

cyanophycean (sī″a-nō-fī′sē-an), *a.* and *n.* **I.** *a.* Same as ★*cyanophyceous.*

II. *n.* An alga of the *Cyanophyceæ.*

Gloioconis, found by Renault in a coprolite of Permian age, is regarded by him as a *Cyanophycean* allied to *Glœocapsa.* *Encyc. Brit.,* XXXI. 409.

cyanophyceous (sī″a-nō-fī′sē-us), *a.* In *bot.,* of or pertaining to the *Cyanophyceæ,* or blue-green algæ.

cyanopia (sī-a-nō′pi-ä), *n.* [NL., <Gr. *κύανος,* blue, + *ὤψ* (*ὠπ-*), eye.] Blue vision; a morbid condition in which objects appear to have a bluish tinge.

cyanoplatinite (sī″a-nō-plat′i-nīt), *n.* [*cyano(gen)* + *platin-um* + *-ite*[2].] Same as ★*platinocyanide.*

cyanoplatinous (sī″a-nō-plat′i-nus), *a.* [*cyano(gen)* + *platin-um* + *-ous.*] Same as ★*platinocyanic.*—**Cyanoplatinous acid.** Same as ★*platinocyanic acid.*

cyanosine (sī-an′ō-sin), *n.* [Gr. *κύανος,* blue, + *-ose* + *-in*[2].] A coal-tar color of the xanthene type, made by methylating phloxin. It dyes wool a bluish pink or red in an acid bath. It is only slightly soluble in water, but dissolves readily in alcohol.

cyanuramide (sī″a-nū-ram′id), *n.* [*cyanur-ic* + *amide.*] An amide of cyanuric acid; especially melamine, $(CNNH_2)_3$, which is more properly called *cyanurtriamide.*

cyanurenic, *a.* Same as *cyanuric.*

cyanurin (sī-a-nū′rin), *n.* [Gr. *κύανος,* blue, + *οὖρον,* urine, + *-in*[2].] Indigo-blue obtained from urine.

cyanurtriamide (sī″a-nūr-trī-am′id), *n.* See ★*cyanuramide.*

cyaphenin (sī-af′e-nin), *n.* [*cya(nate)* + *phen(yl)* + *-in*[2].] A crystalline compound.

$(C_8H_5CN)_3$, formed when potassium cyanate is heated with benzoyl chlorid. It melts at 233° C.

Cyathaspis (sī-a-thas′pis), *n.* [NL., < Gr. *κύαθος*, a cup, + *ἀσπίς*, a shield.] A genus of extinct ostracoderm fishes, known from its dorsal shield and rostral plate: found in the Upper Silurian rocks.

Cyatheaceæ (sī-ath-ē-ā′sē-ē), *n. pl.* [NL., < *Cyathea* + *-aceæ*.] One of the seven coördinate families of homosporous leptosporangiate *Filicales*, or true ferns, typified by the genus *Cyathea*. The species, which are mainly arborescent and are commonly known as the tree-ferns, are associated within about 10 genera, under 3 tribes, namely, *Cathæ*, *Thrysopteridæ*, and *Dicksonieæ*. The sporangia, which are either sessile or short-stalked, are provided with a complete annulus extending obliquely over the apex of the capsule, and are aggregated in dense sori borne upon mostly elevated receptacles. There are more than 250 species, mainly tropical, and divided about evenly between the eastern and western hemispheres.

Cyatheæ (sī-ath′ē-ē), *n. pl.* [NL., < *Cyathea* + *-eæ*.] One of the three tribes constituting the family *Cyatheaceæ*. The sori are borne dorsally upon the simple veinlets or at their forking; the indusia are globose, cyathiform, scale-like, or (in *Alsophila*) wanting. The principal genera are *Cyathea*, *Hemitelia* and *Alsophila*, embracing many of the most beautiful tree-ferns.

cyathocrinoid (sī-a-thok′ri-noid), *n.* and *a.* **I.** *n.* A crinoid allied to *Cyathocrinus*.

II. *a.* Pertaining to *Cyathocrinus*.

cyathometer (sī-a-thom′e-tėr), *n.* [Gr. *κύαθος*, cup, + *μέτρον*, measure.] An instrument designed to detect any tampering with liquids in bottles, vats, or other receptacles. It indicates how much of the liquid has been withdrawn and if thereafter any has been added. *Sci. Amer. Sup.*, Nov. 22, 1902, p. 22,481.

cyathophyllid (sī-a-thō-fil′id), *n.* and *a.* **I.** *n.* A member of the family *Cyathophyllidæ*.

II. *a.* Pertaining to or having the characters of the fossil coral family *Cyathophyllidæ*.

Cyathophylloidea (sī″a-thō-fil-lō-id′ē-ä), *n. pl.* [NL., < Gr. *κύαθος*, cup, + *φύλλον*, leaf, + *εἶδος*, form.] A Paleozoic section of rugose corals having the peripheral region of the visceral chamber extensively occupied by vesicular dissepimental tissue whose lenticular cells are directed obliquely downward: not generally recognized.

Cybele, *n.* **3.** [NL. (Salisbury, 1809), < L. *Cybele*, < Gr. *Κυβέλη*, Cybele, a Greek goddess. The summit of the flower before expanding resembles the crown which Cybele is conventionally represented as wearing.] A genus of dicotyledonous plants of the family *Proteaceæ*. See *Stenocarpus*.

cycad, *n.* **2.** A fossil cycadean trunk belonging to either of the genera *Cycadeoidea* or *Bennettites*.

A Famous Fossil *Cycad*. *Amer. Jour. Sci.*, July, 1904, [p. 40.

cycadean (sī-kā′dē-an), *a.* [*cycad* + *-ean*.] Same as *cycadaceous;* also specifically and commonly applied to fossil trunks of the family *Bennettitaceæ*.

In no case, however, had the fructification of any Fern-Cycad been definitely recognised, hence it remained an open question whether the *Cycadean* advance which was so marked a feature of the vegetative organs found its counterpart in the reproductive process.

Nature, June 4, 1903, p. 113.

Cycadeoidea (sī-kā-dē-oi′dē-ä), *n.* [NL. (Buckland, 1828), < *Cycas* (*Cycad-*) + *-oidea* (see *-oidea*, *-oideus*, *-oid*).] A large genus of fossil cycadean trunks of the family *Bennettitaceæ*, characterized by an axis consisting of a large medulla or pith, a woody zone usually of three exogenous layers or rings, and a very thick false bark or armor (see ★*armor*) in which the reproductive organs are buried. Those in which seeds have been found have been called ★*Bennettites* (which see). These trunks are abundant in the quarries of the Isle of Portland, where they are popularly called *crow's-nests* from the cavity at the summit caused by the loss of the terminal bud. Great numbers occur in Mesozoic strata in Italy and in the United States.

cycadeous (sik-ā′dē-us), *a.* Same as ★*cycadean*.

cycadite (sik′a-dīt), *n.* [*cycad* + *-ite*2.] A fossil cycad. [Rare.]

Cycadofilices (sik″a-dō-fil′i-sēz), *n. pl.* [NL. (Potonié, 1897), < *Cycas* (*Cycad-*) + L. *filices*, pl. of *filix*, fern]. A group of extinct plants, all Paleozoic so far as is known, having the systematic rank of a phylum, coördinate with the *Pteridophyta* and the *Spermatophyta* and intermediate between these in having the outward appearance of ferns but bearing true seeds. The name *Pteridospermaphyta* has been proposed as better expressing these relations. The group was originally founded on features of the internal structure of these plants which were incompatible with their classification as ferns. The discovery of seeds was subsequent and the group now includes many genera not primarily included in it.

cycadofilicinean (sik″a-dō-fil-i-sin′i-an), *a.* [*Cycadofilices* + *-ine*1 + *-e-an*.] Relating or belonging to the *Cycadofilices*. [A bad form.]

It is impossible to do more than to point to a few indications afforded by external and, to a slight extent, by internal structure, of the survival of *Cycadofilicinean* types.

Encyc. Brit., XXXI. 425.

cyclad (sī′klad), *n.* [NL. *Cyclas* (*cyclad-*).] A fresh-water mollusk of the genus *Cyclas*, or of the family *Cycladidæ*.

cyclamen, *n.*—**Wild cyclamen,** in *bot.*, in California, any species of the genus *Dodecatheon;* the shooting-star. *Parsons and Buck*, Wild Flowers of California.

cyclamen2 (sik′la-men), *n.* Same as ★*cyclamin*, 2.

cyclamin, *n.* **2.** A coal-tar color of the xanthene type. It dyes wool and silk bluish red in a neutral bath. Also spelled *cyclamen* and *cyclamine*.

cyclamiretin (sik la-mi-rē′tin), *n.* [*Cyclami(n)* + Gr. *ῥητίνη*, resin.] A white amorphous compound, $C_{14}H_{18}O_2$, obtained by the hydrolysis of the glucoside cyclamin.

cyclamose (sik′la-mōs), *n.* [*Cyclam(in)* + *-ose*.] A levorotatory sugar, $C_{12}H_{22}O_{11}$, found in the roots of *Cyclamen Europæum*.

Cyclanthaceæ (sik-lan-thā′sē-ē), *n. pl.* [NL. (Lindley, 1836), < *Cyclanthus* + *-aceæ*.] A family of monocotyledonous plants typified by the genus *Cyclanthus*. They bear some resemblance to both palms and screw-pines, but have the monœcious flowers arranged in dense alternating spirals or whorls around a thick succulent spadix. The family includes 6 genera and 44 species, all natives of tropical America. The largest and most important genus is *Carludovica* (which see).

cyclanthaceous (sik-lan-thā′shius), *a.* [*Cyclanthaceæ* + *-ous*.] Belonging to the plant family *Cyclanthaceæ*.

cyclar (sik′lär), *a.* Same as *cyclic*.

cycle1, *n.* **10.** In *elect.*, the time of one complete wave, or double reversal, of alternating currents. Frequencies are usually denoted in cycles per second. See ★*alternating*.—**11.** In *chem.*, same as ★*ring*, *n.* 18.—**12.** In *mech.*, a succession of conditions, operations, or phases which follow each other in a determinate order; specifically, in gas or internal-combustion motors, the successive changes experienced by the mixture of fuel and air in the motor cylinder. In the cycle proposed by Beau de Rochas, now better known as the *Otto cycle*, the mixture of fuel and air is drawn into the cylinder by an aspirating stroke of the piston and the mixture is compressed by the return of the piston; then this compressed mixture is ignited by an electric spark, or other means, and the expansion due to the heating of the air by the combustion of the gas causes a rise in pressure and exerts the forward effort on the piston during the second outward stroke; during this increase of volume the pressure is lowered. On the second return stroke, the exhaust-valve is opened and the burned gases are expelled during this fourth traverse. Then the cycle repeats itself. This cycle may be realized in one cylinder; or aspiration and compression may be done in one cylinder, and the working-stroke and following exhaust take place in another; or, in the two-phase cycle, or two-cycle motor, the intake or aspiration phase may take place just at the end of the working-stroke, the exhaust not occupying the time of a piston traverse. This makes one working-stroke for each complete revolution of the crank. The cycles may differ in having the compression and expansion isothermal or adiabatic, the heating at constant volume or at constant pressure, and the cooling phenomena isothermal or adiabatic. The compression may be omitted, although efficiency is increased by retaining it. The cycle of the gas-mixture should not be confounded with the mechanical arrangements for realizing and utilizing it.

Their three-quarter actual horse-power motor, which is of the two *cycle* compression type, having an impulse at each revolution and is reversible.

Hiscox, Horseless Vehicles, p. 163.

It thus takes four strokes or two revolutions of the shaft to complete the Otto *cycle*, the cylinder being used alternately as a pump and a motor, and the engine, when working at full load, thus gives one impulse for every two revolutions. *Encyc. Brit.*, XXVIII. 184.

13. In *math.*: (*a*) In *geom.*, a closed path in a multiply connected region. (*b*) In *function-theory*, the set of homologous corners of a given region (in substitution-groups).—**14.** In *meteor.*, the repetition of some general atmospheric phenomenon at approximately regular intervals. The more prominent cycles are the 35-year period, deduced by Bruckner; the sun-spot period, which varies between seven and thirteen years following the sun-spots; the 26.6 day period, deduced by Professor F. H. Bigelow; the lunar or tidal periods, the existence of which has been asserted by many persons but which are still uncertain; a 7-year period in the rainfall of Illinois, announced by Dr. Cyrus Thomas; the geological periods of indefinite and irregular extent, discussed by many geologists; the sun-spot period in the tropical temperatures combined with a retardation further away from the equator, as deduced by Koeppen; the annual temperature-wave carried slowly from the tropics to the polar regions by the ocean current or surface drift; and the diurnal and annual periods, carried from the surface of the ground downward by the conduction of heat through the ground.—**Anœstrous cycle.** See ★*anæstrous*.—**Asexual cycle.** See *sexual* ★*cycle*.—**Automobile cycle,** a form of motor-driven bicycle; a motor-cycle.—**Calippic cycle.** Same as *Calippic period* (which see, under *Calippic*).—**Canicular cycle.** See ★*canicular*.—**Clausius' cycle,** the succession of operations proposed contemporaneously by Clausius and Rankine for an ideal steam-engine. In this cycle all parts of the engine are assumed to be perfect, without initial condensation, leakage, radiation, or clearance in the cylinder. The feed-water is taken into the boiler at the exhaust temperature and heated until it becomes steam of a certain pressure and temperature. The steam is supplied to the cylinder at constant pressure until cut-off takes place; after which, expansion takes place adiabatically, pressure being reduced to the back-pressure. Then the return-stroke of the piston is performed at the constant terminal pressure until all the steam has been swept from the cylinder and the cycle is complete.—**Closed cycle,** a complete cycle; a series of states of a quantity of gas which starts with a certain volume, pressure, and temperature and in which the gas returns to those same conditions at the end of the cycle.—**Cycle of eclipses.** See *saros*.—**Cycle of erosion,** the time involved in the reduction of a land area to base-level. *Chamberlin and Salisbury*, Geol., I. 78.—**Eimerian cycle.** Same as *schizogenic* ★*cycle*.—**Ericsson cycle,** the succession or series of operations upon a gas or air used in Ericsson's design of hot-air, or so-called 'caloric,' engine. The special feature is the change of quantities of heat in the air or of intrinsic energy at constant pressures, so that the change of volume is the striking dynamic element. The air is passed by displacement over the heating surface, and its temperature and volume are increased; it then does work at constant temperature by increasing the volume it seeks to occupy at that pressure, and is afterwards displaced into the cooling-chamber, to which it imparts temperature, and shrinks in volume at the lower constant temperature; after which it is heated again, repeating the series.—**Four-stroke cycle.** Same as *four-phase cycle* (which see, under *internal-combustion* ★*motor*.—**Genesial cycle,** the period of reproductive life in woman, consisting of conception and gestation, parturition, and lactation.—**Geographical cycle,** in *phys. geog.*, an indefinite period of time in which a land mass is worn down from its initial form to a featureless plain close to sea-level; a cycle of erosion.—**Irreversible cycle,** in *thermodynamics*, a cycle in which one or more of the operations cannot be performed in the reversed sense. An operation which involves the development of heat by friction is of this sort and a cycle containing such an operation is irreversible.—**Joule cycle,** the succession of operations upon a gas used in a hot-air or closed-cycle gas-engine. The air is compressed by a piston in a cylinder, and passes thence through a heating-chamber. From the heater it passes to the motor-cylinder where it does work on the external resistance, exhausting thence into a cooling-chamber. From the latter the intake of the compressor withdraws the air and repeats the series of operations. The pressures in both heater and cooler are not supposed to vary, by having the volumes of these latter large enough. The Joule cycle becomes that of the usual internal-combustion ★motor (which see) when the heater becomes the place where fuel is introduced and by its combustion heats the air, while the cooler serves to keep any heat from going to waste with the free exhaust to the atmosphere. The Joule cycle reversed is used in refrigerating machinery.—**Rankine's cycle.** Same as *Clausius'* ★*cycle*.—**Schizogenic cycle,** that stage in the life-history of certain parasites which is devoted to multiplication by division. See *sporogenic* ★*cycle*.

The glomerular parasite . . . may represent the *schizogenic* or Eimerian cycle of the species and as such may antedate the whole sporogenic cycle of the tubules.

Jour. Exper. Med., VI. 310.

Sexual cycle, in *biol.*, that form or generation of animals and plants in which they spring from an ovum or female gametocyte, as distinguished from the *asexual cycle*, or generation which arises by budding or fission of the parent organism. The sexual and asexual cycles alternate in the so-called 'alternation of generations.'—**Sporogenic cycle,** the resting or spore stage in the life-history of certain animal parasites. See *schizogenic* ★*cycle*.

cycle-horn (sī′kl-hôrn), *n.* An alarm signal for use on bicycles, usually blown by compressing a rubber bulb which forces air through a reed at the smaller end of the horn-tube.

cycle-path (sī′kl-pȧth), *n.* A path for bicycles.

The cycle tax consequently has been devoted, first, to the construction of *cycle-paths*, on which wheelmen have equal rights with pedestrians.

Encyc. Brit., XXVII. 328.

cycleway (sī′kl-wā), *n.* An elevated roadway for the special use of bicycles, motor-cycles, etc.: as, the *cycleway* between Pasadena and Los Angeles, California.

Cycliæ (sik′li-ē), *n. pl.* [NL., < Gr. *κύκλος*, circle.] An order of fossil marsipobranchiate fishes found in the Lower Devonian, interesting on account of its high development.

cyclic, *a.* **4.** In *chem.*, containing a cycle or ring. —**5.** In *bot.*, arranged in whorls: said of the stamens, petals, etc., in a flower; also, having the parts so arranged: said of the flower; cyclical. In composition used in this sense and also with reference to the annual course or cycle of plant-life. See *monocyclic*, 1 and ★3, *bicyclic*1, *pentacylic*, ★*dicyclic*, and ★*pleiocyclic*. **6.** In *geom.*, having its vertices all on the same circle: thus, if a quadrilateral has its vertices concyclic it is *cyclic*.—**Cyclic albuminuria.** See

★*albuminuria*.—**Cyclic compounds**, Same as ★*ring compounds* or *closed* ★*chain compounds*.—**Cyclic constant**. See ★*constant*.—**Cyclic hydrocarbon**, a hydrocarbon containing a closed chain or ring of carbon atoms.—**Cyclic permutation**. Same as *cyclical permutation*.

Cyclical form, in *music*, a method or pattern of composition in which a principal theme or passage recurs at intervals without substantial change: used especially of rondos and sometimes of songs in which successive stanzas are treated alike. See ★*strophic*, 2.

cyclically (sīk'li-kal-i), *adv.* In a manner such that a cycle or series of cycles occurs: said of certain periodic changes as of temperature or pressure in which the varying conditions are repeated and follow each other in the same order.

cyclicism (sik'li-sizm), *n.* [*cyclic* + *-ism*.] The custom or system of reckoning days or years by cycles.

cyclicotomy (sik-li-kot'ō-mi), *n.* [Gr. *κυκλικός*, circular, + *-τομια*, < *ταμεῖν*, cut.] An operation for dividing the ciliary body of the eye. *Syd. Soc. Lex.*

cyclide, *n.*—**Darboux's cyclide**, a point surface represented by any equation of the second degree F (a, b, c, d, e) = 0, taken in connection with the relation $b^2 + c^2 + d^2 - ae = 0$. From the point of view of ordinary projective geometry, the *cyclide* is a surface of the fourth order containing the imaginary circle common to all spheres of space as a double curve.—**Dupin's cyclide**. Same as *cyclide*.

cyclism (sīk'lizm), *n.* [*cycle* + *-ism*.] The use of the bicycle or tricycle as a means of transportation or for health or pleasure.

Military *cyclism* wants no undue praise.
Saturday Rev., Aug. 2, 1890, p. 136.

cyclocentric (sī-klō-sen'trik), *a.* [Gr. *κύκλος*, circle, + *κέντρον*, center, + *-ic*.] Having the starting-point of the spiral at a little distance from the center, so that the first whorl runs around it, as in the shells of certain mollusks. *Syd. Soc. Lex.*

cyclocephalian (sī″klō-se-fā'liạn), *a.* Same as *cyclocephalic*.

Cycloceras (sī-klos'ē-ras), *n.* [Gr. *κύκλος*, circle, + *κέρας*, horn.] A genus of Paleozoic nautiloid cephalopods with slightly curved shells bearing annuli and longitudinal ridges.

cycloceratitis (sī″klō-ser-ạ-tī'tis), *n.* [NL., < Gr. *κύκλος*, circle, + *κέρας* (*κερατ-*), horn, + *-itis*.] Inflammation of the cornea and ciliary body.

Cycloconium (sī-klō-kō'ni-um), *n.* [NL. (Castagne, 1845), < Gr. *κύκλος*, circle, + *κόνις*, dust (see *conidium*).] A genus of hyphomycetous fungi having dichotomously branched black hyphæ growing in the epidermis of the host and producing two-celled dark-colored conidia. The single species, *C. oleaginum*, is parasitic on leaves of the olive in Europe and California, causing a disease called scab. See ★*scab of olive*.

Cycloconium oleaginum.
Cross-section of epidermis of an olive leaf, showing the mycelium in the cuticle, and the erect conidia, greatly magnified. (Drawn from Engler and Prantl's "Pflanzenfamilien.")

Cyclodonta (sī-klō-don'tạ), *n.* [NL., < Gr. *κύκλος*, circle, + *ὀδούς* (*ὀδοντ-*), tooth.] A division of the pelecypod mollusks characterized by the extreme torsion of their dentition, which curves out from under the beaks and is not set upon a flat hinge-plate.

cyclogenous (sī-kloj'e-nus), *a.* [*cyclogen* + *-ous*.] Of the nature of a cyclogen; exogenous. *Syd. Soc. Lex.* [Not used.]

cyclograph, *n.* 2. The name given to a machine, invented by A. H. Smith of the British Museum, for photographing Greek vases. The vase to be photographed rotates while traveling along the circumference of a circle having its center at the center of the lens.—3. A special form of camera for obtaining panoramic views.—4. An apparatus for automatically making a topographical record of the ground traversed during a journey. As now manufactured it is intended for use on a bicycle, and the rider must set the instrument for direction by the aid of a compass, the remainder of the recording being done automatically.

cyclography (sī-klog'rạ-fi), *n.* [Gr. *κύκλος*, circle, + *-γραφία*, < *γράφειν*, write.] A method for the treatment of geometrical problems by means of circles: due to Fiedler, 1863. *Science*, May 2, 1902, p. 713.

cyclohexane (sī-klō-hek'sān), *n.* [Gr. *κύκλος*, circle, + E. *hexane*.] A hydrocarbon, C_6H_{12}, found in Russian and in Californian petroleum, and also prepared synthetically. It boils at 81° C.

cyclohexanol (sī-klō-hek'sạ-nōl), *n.* [*cyclohexane* + *-ol*.] An alcohol, $C_6H_{11}OH$, derived from cyclohexane. It boils at 160.5° C.

cyclohexanone (sī-klō-hek'sạ-nōn), *n.* [*cyclohexane* + *-one*.] A ketone, $C_6H_{10}O$, prepared by oxidizing cyclohexanol. It boils at 154.5° C. Also called *pimelic ketone*.

cycloid, *a.* 3. In *chem.*, containing a cycle or ring of atoms: used especially of the structure of organic compounds.

Cycloidal pump. See ★*pump*[1].

cycloidally (sī-kloi'dạl-i), *adv.* In a cycloidal manner.

cycloidotrope (sī-kloi'dō-trōp), *n.* [Gr. *κύκλος*, circle, + *εἶδος*, form (see *cycloid*), + *τρόπος*, a turning.] In *photog.*, a kind of lantern-slide for projecting the operation of engine-engraving or turning.

cyclolith (sī'klō-lith), *n.* [Gr. *κύκλος*, circle, + *λίθος*, stone.] A prehistoric megalithic stone circle.

But similar blocks are also found disposed in circular form round the barrows, and they are then known as *cycloliths* or stone circles. *Keane*, Ethnology, p. 130.

cyclomatic (sī-klō-mat'ik), *a.* [NL. **cyclomaticus*, < *cycloma*, a circle: see *cycloma*.] Of or pertaining to a cycle or cycles.—**Cyclomatic number**, in *phys.*, a number which denotes how many cycles occur in a given process or are comprised in a diagram.

cycome (sī'klōm), *n.* [NL. *cycloma*, < Gr. *κύκλωμα*, a circle, wheel, coil, < *κυκλοῦν*, make into a circle, < *κύκλος*, circle.] In *bot.*, a ring-shaped cushion of anthers. *McNab*.

cyclometrical (sī-klō-met'ri-kạl), *a.* 1. Of or pertaining to the cyclometer or to cyclometry.

A degree of exactness for *cyclometrical* operations was now obtained. *Smithsonian Rep.*, 1890, p. 113.

2. Cyclometric; specifically, pertaining to the rectification of the circumference.

Cyclonal gradient. See ★*gradient*.

cyclone, *n.*—**Axis of a cyclone**, in *meteor.*, a line which joins the center of a cyclonic whirl at the earth's surface with corresponding centers in the layers of air above. The line is generally inclined to the earth's surface and is rarely a straight line.—**Centered cyclone**, a theoretic cyclone in which the isobars are circular, the winds are parallel to them, and the whole system is stationary relative to the earth's surface.—**Cyclone nozle**. See ★*nozle*.—**Diurnal cyclone**, the cyclonic appearance of winds on a weather-map of the whole illuminated hemisphere, on which the departures from normal temperatures, pressures, and winds show a general inflow toward the heated central region over which the sun is vertical, thereby constituting a true cyclone, though one of feeble energy.—**Eclipse cyclone**, the cyclonic appearance of a weather-map during a total eclipse of the sun, on which the departures from normal temperatures, pressures, and winds show cyclonic and anti-cyclonic tendencies in the atmosphere around the central shadow.—**Ferrel's theory of cyclones**, the application to general cyclonic motions of the laws governing small local cyclones; especially the assumption that the condensation of vapor in ascending convection-currents is the initial cause and the supporting force of the cyclone.—**Polar cyclone**, the theoretic circulation of the atmosphere about the north or south polar regions, forming a cyclone with a cold center, in which the lower air flows outward but the upper air flows inward.—**Primary cyclone**, a large area of low pressure having a well-defined system of isobars and rotation of the wind.—**Satellite cyclone**, a small depression that is supposed to revolve around a larger primary cyclone, although this actually happens very rarely.—**Secondary cyclones**, a small area of low pressure and revolving winds usually formed in advance of the primary cyclone, or between the primary and the highest adjacent pressure, and usually lasting only a few hours.—**Solar cyclone**, a whirling movement like a terrestrial cyclonic storm observed in the solar atmosphere; a sun-spot; a solar protuberance; a solar flame.—**Stationary cyclone**, a cyclone whose center has no appreciable movement of translation; a centered cyclone. A moving cyclone is frequently stationary for some time at some point in its history, and may even move backward, making a loop or reëntrant angle in an otherwise steady progression. During this stationary period the isobars become almost perfectly circular and the inclination of the wind to the isobars becomes very slight.—**Tropical cyclone**, a large whirlwind beginning as a small one within ten degrees of the equator and increasing in size as it moves until it becomes known as a hurricane in the Atlantic, a typhoon in the Pacific, and a cyclone in the Indian Ocean.—**Trough of a cyclone**, the line drawn through the center of a cyclone (approximately north and south in northern latitudes) connecting those places on the weather-map where the barometer reading is the lowest at that moment or has the greatest departure from the normal. This line separates the front and rear of the cyclone. In front of it the barometer is falling and in the rear of it rising, in consequence of the forward motion of the cyclone.—**Zone of cyclones**, the region between latitudes 30° and 60°, within which cyclones occur by virtue of the combination of descending polar and ascending equatorial winds into one rotating mass of mixing air; a zone of mixture in which the west wind retains the upper hand.

cyclone-cellar (sī'klōn-sel″ạr), *n.* An underground room used as a refuge on the approach of a cyclone or tornado in certain western plains and prairies of the United States. Sometimes called *cyclone-pit*.

Cyclonema (sī-klō-nē'mạ), *n.* [NL., < Gr. *κύκλος*, circle, + *νῆμα*, thread.] A genus of Paleozoic gastropods commonly assigned to the family *Turbinidæ* and including turbinate shells with inflated whorls marked with spiral striæ, rounded aperture, and conical operculum.

cyclone-season (sī'klōn-sē″zn), *n.* The months during which hurricanes, typhoons, or cyclones are most frequent. In India the cyclone-season extends from July to November; in China and Japan from April to November; in the West Indies and the Philippines from August to October.

cycloneurous (sī-klō-nū'rus), *a.* [Gr. *κύκλος*, circle, + *νεῦρον*, nerve, + *-ous*.] Having the principal parts of the nervous system arranged in a circular manner, as certain jellyfishes.

Cyclonic law, the law of the circulation of the winds within a cyclone; specifically, the rule that, in the northern hemisphere, if one stands with his back to the wind, the center of the cyclone bears from 50 to 80 degrees to the left of front or from 10 to 40 degrees in front of the left hand; it will also be more directly to the left of the movement of the lower clouds. In the southern hemisphere the center will be to the right instead of to the left. Originally the cyclonic law assumed a circular motion around a storm-center, but at present it includes the idea of a spiral movement inward with a gradual ascent, and a corresponding outflow and descent above.

cyclonist (sī'klō-nist), *n.* [*cyclone* + *-ist*.] A cyclonologist; in a restricted sense, one who advocates the circular theory of cyclones; one who makes too much use of explanations based on the theory of cyclones.

cyclonograph (sī-klon'ō-graf), *n.* [*cyclone* + Gr. *γράφειν*, write.] A form of dromoscope devised by Viscovich in 1882; an apparatus for drawing cyclonic movements; also, a diagram for exhibiting the circulation of winds around a storm-center.

cyclonologist (sī-klō-nol'ō-jist), *n.* [*cyclonology* + *-ist*.] A student of cyclonology; one who is wedded to the circular theory of cyclones. See *cyclonic law*.

cyclonology (sī-klō-nol'ō-ji), *n.* [*cyclone* + Gr. *-λογία*, < *λέγειν*, speak.] The scientific study of the winds and other phenomena of cyclones.

cyclopedist, cyclopædist (sī-klō-pē'dist), *n.* [*cyclopedia* + *-ist*.] One who contributes to or makes a cyclopedia or encyclopedia.

Cyclopeltis (sī-klō-pei'tis), *n.* [NL. (John Smith, 1846), < Gr. *κύκλος*, circle, + *πέλτη*, a shield.] A genus of free-veined polypodiaceous ferns, having the crowded simple pinnæ narrow, auriculate, and articulated with the rachis, the sori borne in from 1 to 3 rows on either side of the midvein, and the indusia peltate. There are 2 species, *C. semicordata*, a well-known West Indian plant, and *C. Presliana* of the Philippine Islands.

cyclopentane (sī-klō-pen'tān), *n.* [Gr. *κύκλος*, circle, + E. *pentane*.] A synthetic cyclic hydrocarbon, C_5H_{10}. It is an oil which boils at 50° C. Also called *pentamethylene* and *R-pentene*.

cyclophoria (sī-klō-fō'ri-ạ), *n.* [NL., < Gr. *κύκλος*, circle, + *-φορος*, < *φέρειν*, carry.] Insufficiency of the oblique muscles of the eye, producing a tendency to rotation about an anteroposterior axis. *Med. Record*, Feb. 7, 1903, p. 211.

cyclophoric (sī-klō-for'ik), *a.* Relating to or of the nature of cyclophoria. *Optical Jour.*, Aug. 4, 1904, p. 453.

Cyclopia (sī-klō'pi-ạ), *n.* [NL. (Ventenat, 1808), < Gr. *κύκλος*, circle, + *ὤψ* (*ὠπ-*), eye: see *Cyclops*. The allusion is to the circular depression of the base of the calyx, around the pedicel.] A genus of shrubs of the family *Fabaceæ*. They have small, sessile, trifoliate leaves, and yellow flowers borne singly in their axils. There are about 10 species, all South African. See *bush tea*, under *tea*[1].

cyclopic[2] (sī-klop'ik), *a.* [*Cyclopia* (see def.) + *-ic*.] Obtained from a plant of the genus *Cyclopia*.—**Cyclopic acid**, a solid yellow acid, $C_7H_8O_4$, found in the leaves of *Cyclopia subternata*.

cyclopically (sī-klop'i-kal-i), *adv.* In the manner of the Cyclopes. See *Cyclops*, 1, and *cyclopic*.

cyclopiform (sī-klop'i-fôrm), *a.* [L. *cyclops* (*cyclop-*), cyclops, + *forma*, form.] Shaped like a cyclops.

cycloplegic (sī-klō-plej'ik), *a.* and *n.* I. *a.* Relating to or of the nature of cycloplegia.

II. *n.* 1. An agent, such as atropine, which causes paralysis of the ciliary muscle. *Optical Jour.*, June, 1903, p. 726.—2. A person suffering from cycloplegia.

Cyclops, *n.* 4. [*l. c.*] A monster having one imperfect eye, sometimes showing a fusion of two, near the middle line.

cyclopterin (sī-klop'te-rin), *n.* [*Cyclopterus* + *-in*[2].] A protamin obtained from the testicles of the teleost fish *Cyclopterus lumpus*.

cycloramic, *a.*—**Cycloramic camera**. See ★*camera*.

cyclose (sī'klōz), *n.* [Gr. *κύκλος*, circle, + *-ose.*] A sugar containing a closed carbon chain in the molecule.

cyclosis, *n.* 2. In *phys.*, the existence of cycles.

The existence of cycles is called *Cyclosis.*
Clerk Maxwell, Electricity and Magnetism, I. 17.

3. In *math.*, the occurrence of closed paths.

Cyclospondyli (sī-klō-spon'di-lī), *n. pl.* [NL., < Gr. *κύκλος*, circle, + *σπόνδυλος*, a vertebra.] A suborder of sharks having the calcareous lamellæ of the vertebræ arranged in one or more concentric circles or series around a central ring, instead of radiating from a central ring as in the asterospondylous sharks.

cyclospondylic (sī″klō-spon-dil'ik), *a.* Having the characters of the *Cyclospondyli;* having vertebræ that are partly cartilaginous and partly ossified by the deposit of bone arranged in concentric layers; also, noting such vertebræ.

cyclospondylous (sī-klō-spon'di-lus), *a.* Same as ★*cyclospondylic.*

Cyclosporales (sī″klō-spō-rā'lēz), *n. pl.* [NL., < Gr. *κύκλος*, circle, + *σπορά*, seed (spore), + *-ales.*] An order of the *Phæophyceæ*, or brown seaweeds: practically the same as *Fucaceæ.*

cyclostomian (sī-klō-stō'mi-an), *a.* [Gr. *κύκλος*, circle, + *στόμα*, mouth, + *-ian.*] Having circular orifices of the zoœcia or cells, as certain polyzoans.

cyclostyle, *n.* 2. A peristyle of circular form.

cyclotomic, *a.* 2. Relating to or of the nature of cyclotomy.—**Cyclotomic equation.** See ★*equation.*

cyclotomy (sī-klot'ō-mi), *n.* [Gr. *κύκλος*, circle, + *-τομια*, < *ταμεῖν*, cut.] 1. In *surg.*, operation for division of the ciliary muscle, practised to relieve tension in glaucoma.—2. In *math.*, the theory of the partition of the circle.

Cyclotus, *n.* 2. [*l. c.*] Same as *synotus*, 2.

cyclovertebral (sī-klō-vėr'tē-bral), *n.* [Gr. *κύκλος*, circle, + E. *vertebral.*] The body of a vertebra in fishes; the centrum.

Cydippidea (sī-di-pid'ē-ą), *n. pl.* [NL., < *Cydippe* + *-idea.*] An order of tentaculate *Ctenophora.* They have the body of spherical, cylindrical, or compressed form, with 2 simple or branched tentacles retractile within tentacular sheaths, and the meridional and stomodeal canals not produced into a peripheral-canal system. The order includes the families *Mertensidæ* and *Pleurobrachiidæ.*

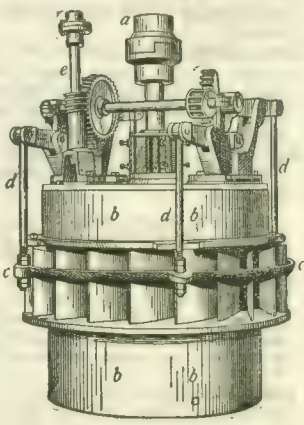
Cydones (si-dō'nēz), *n. pl.* [Gr. *Κύδωνες.*] One of the early races of Crete.

Cygnian (sig'ni-an), *a.* and *n.* [*Cygnus* + *-ian.*] **I.** *a.* Having a spectrum similar to that of Arided (*a* Cygni, often called Deneb).

II. *n.* A star having such a spectrum.

cyl. An abbreviation (*a*) of *cylinder;* (*b*) of *cylindrical.*

Cylinder oil. See ★*oil.*—**Delivery-cylinder,** in a printing-press, the cylinder which seizes the printed sheet when it leaves the printing-cylinder, and delivers it to the fly on the receiving-table.—**Displacement-cylinder,** an auxiliary cylinder used on some internal-combustion engines for forcing the charge into the main or working cylinder.—**Impression-cylinder,** the cylinder of a rotary printing-machine which resists the pressure of the plate-cylinder and gives the impression which produces the print. See *cylinder,* 2 (*c*).—**Inside cylinder,** a cylinder located between the frames of a locomotive instead of outside of them. The inside cylinder compels the use of a cranked axle, and compacts the connecting-rods and guides into the small spaces under the boiler. The valve-gear is then usually forced outside the frames, where it is more liable to injury. See *locomotive.*—**Inverted cylinder,** a vertical-engine cylinder in which the piston-rod passes downward through the bottom-head. In the original vertical engines built by Watt and others, the piston-rod passed through the top-head.—**Inverted-cylinder engine.** See ★*engine.*—**Low-pressure cylinder,** the last cylinder in which the steam is expanded in a compound or multiple-expansion engine, the steam passing first into the high-pressure cylinder and thence through the other cylinders in the order of their size, the low-pressure cylinder being the largest.—**Outside cylinder.** See *overhanging* ★*cylinder* and *locomotive.*—**Overhanging cylinder,** a cylinder of a locomotive which overhangs the frames. Usually called *outside cylinder* or *outside connected cylinder.*—**Plate-cylinder,** the cylinder of a rotary printing-machine on which are fastened the curved electrotype or stereotype plates to be printed.—**Porcupine cylinder.** Same as *porcupine* ★*beater.*



cylinder (sil'in-dėr), *v. t.* To press under a cylinder or between cylinders.

cylinder-band (sil'in-dėr-band), *n.* A type of fluted band, observed in certain metallic spectra, which has the appearance of a hollow half-cylinder illuminated from one side. *Electrochem. Industry,* Dec. 1903.

cylinder-cake (sil'in-dėr-kāk), *n.* Salt-cake (sodium sulphate) made by heating common salt with sulphuric acid in cylindrical cast-iron retorts. *G. Lunge,* Sulphuric Acid, II. 121.

cylinder-gage, *n.* 2. A gage for testing or measuring the size of the opening in the escape-wheel of a cylinder-escapement.—3. A steam-gage connected with the cylinder of a steam-engine.

cylinder-gate (sil'in-dėr-gāt), *n.* A cylindrical gate or valve used to regulate the amount of water flowing to a turbine. In its usual form it is a series of fingers protruding downward from a cylinder and filling the passages between the guide-vanes of the turbine.

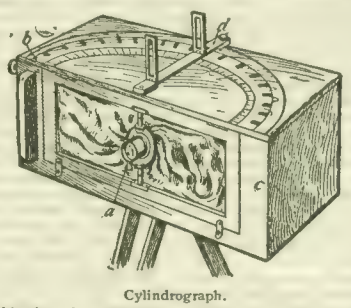
Cylinder-gate.

a, shaft of turbine; *b*, casing surrounding turbine; *c*, ring or cylinder-gate flange (the cylinder which shuts off the water from the vanes or buckets is fastened to the inner edge of this ring or flange); *d*, *d*, *d*, hangers supporting flange and gate; *e*, rod actuating worm and wheel to raise and lower the gate.

cylinder-pressure (sil'in-dėr-presh'ūr), *n.* The motor effort on a piston-motor, due to the tension of the fluid which drives it. The pressure at the beginning of the stroke is the initial pressure, that at the end of the stroke the final or terminal pressure. The average of all pressures throughout the stroke is the mean pressure, or the mean effective pressure.

cylinder-printing (sil'in-dėr-prin'ting), *n.* The printing of cloth on a machine consisting of one large cylinder and a number of smaller ones. The surfaces of the latter are engraved with the patterns to be printed.

cylinder-relief (sil'in-dėr-rē-lēf'), *n.* A drain for carrying off water which collects in a steam-cylinder; also, an automatic valve which opens when the pressure rises above a certain point; a relief-valve.



cylindrarthrosis (sil″in-drär-thrō'sis), *n.* [NL., < Gr. *κύλινδρος*, cylinder, + *ἄρθρωσις*, articulation.] In *anat.*, a hinge-joint.

Cylindrical spiral. See ★*spiral.*

cylindricality (si-lin-dri-kal'i-ti), *n.* [*cylindrical* + *-ity.*] The quality of being cylindrical; cylindricity.

cylindrite (sil'in-drīt), *n.* [NL. ★*cylindrites,* < Gr. *κύλινδρος*, cylinder, + *-ιτης*, E. *-ite*[2].] A sulphid of lead, antimony, and tin, occurring in massive forms with concentric cylindrical structure: found in Bolivia. Also written *kylindrite.*

cylindrograph (si-lin'drō-gråf), *n.* [Gr. *κύλινδρος*, cylinder, + *γράφειν*, write.] In

Cylindrograph.

a, objective; *b*, curved film; *c*, camera; *d*, arm for rotating objective.

photog., a form of panoramic camera which has an angular range covering nearly half the horizon. *Woodbury,* Encyc. Dict. of Photog., p. 152.

cylindroid, *n.* 3. In *anthrop.*, a cranium the norma verticalis of which is elongated, flattened at the forehead and occiput, and rounded at the sides. *G. Sergi,* (trans.) Var. of the Human Species, p. 39.—4. In *pathol.*, a body resembling a tube-cast, consisting usually only of mucus.

cylindroscope (si-lin'drō-skōp), *n.* [Gr. *κύλινδρος*, cylinder, + *σκοπεῖν*, view.] In *photog.*, an apparatus for viewing panoramic pictures, the print being curved to a radius which corresponds to the original radius of the panoramic camera or cylindrograph used to secure the negative. *Wall,* Dict. of Photog., p. 172.

Cylindrosporium (si-lin-drō-spō'ri-um), *n.* [NL. (Greville, 1822), < *κύλινδρος*, cylinder, + *σπορά*, seed (spore).] A large genus of parasitic melanconiaceous fungi having the pale-colored conidial cushions (sporodochia) embedded in the surface of the host, and producing filiform straight or variously curved conidia. *C. Padi* is a common species causing a disease of the leaves of plum and cherry. See *cherry* ★*leaf-spot.*

cylindruria (sil-in-drū'ri-ą), *n.* [NL., < Gr. *κύλινδρος*, cylinder, + *οὖρον*, urine.] In *pathol.*, the condition in which there is a passage of urinary tube-casts in the urine.

Cym. An abbreviation of *Cymric.*

cymba, *n.*—**Cymba conchæ,** in *anat.*, the upper portion of the concha of the ear, above the auditory meatus.

cymbalo (sim'ba-lō), *n.* Same as *cembalo.*

cymbella (sim-bel'ą), *n.*; pl. *cymbellæ* (-ē). [NL., dim. of L. *cymba*, a boat: see *cymba.*] In *bot.*, one of the elliptical zoöspores of some algæ.

cymbocephalic, *a.* 2. Belonging to a subdivision of the oöidocephalic forms, characterized by an exceedingly protuberant occiput. *Aitken Meigs.*

cymbocephalous (sim-bō-sef'ą-lus), *a.* Same as *cymbocephalic.*

cymbocephalus (sim-bō-sef'ą-lus), *n.*; pl. *cymbocephali* (-lī). [Gr. *κύμβη*, bowl, + *κεφαλή*, head.] One who has a cymbocephalic skull.

cyme, *n.*—**Bostrychoid cyme.** Same as *bostryx.*

cymenol (sim'e-nol), *n.* [*cymene* + *-ol.*] Same as *carvacrol.*

cymidine (sī'mi-din), *n.* [*cym(ene)* + *-id*[1] + *-ine*[2].] Amino-cymene, $CH_3C_6H_3(NH_2)CH(CH_3)_2$(1:3:4), an oily monacid base which boils at 230° C. Also called *3-amino-methyl-4-methoethylphen.*

cymogene, *n.* This very volatile product, obtainable at the beginning of the distillation of crude petroleum, boils under ordinary pressure at 0° C. (32° F.), and consists chiefly of normal butane, C_4H_{10}. Also *chymogene.*

cymograph (sī'mō-gråf), *n.* Same as *kymograph.*

cymometer (sī-mom'e-tėr), *n.* [Gr. *κῦμα*, wave, + *μέτρον*, measure.] In *elect.*, an instrument for the measurement of the wave-length and frequency of electric oscillations.

cymotrichous (si-mot'ri-kus), *a.* [Gr. *κῦμα*, wave, + *θρίξ* (*τριχ-*), hair.] In *anthrop.*, characterized by having wavy hair.

cymyl (sim'il), *n.* [*cym(ene)* + *-yl.*] The radical, $C_6H_3(CH_3)CH(CH_3)_2$(1:4), of cymene.

cynanchin (si-nang'kin), *n.* [NL. *Cynanchum* (see def.) + *-in*[2].] A compound found in the milky juice of *Cynanchum acutum* Linn. It crystallizes in leaflets which melt at 149° C.

cynanchocerin (si-nang-kō-sē'rin), *n.* [NL. *Cynanchum* (see def.) + Gr. *κηρός*, wax, + *-in*[2].] A compound obtained from the milky juice of *Cynanchum acutum* Linn. It crystallizes in needles which melt at 146° C.

cynanchol (si-nang'kōl), *n.* [NL. *Cynanchum* (see def.) + *-ol.*] A crystalline substance obtained from the milky juice of *Cynanchum acutum* Linn. It was afterward separated into cynanchocerin and cynanchin.

cynapin (sin'ą-pin), *n.* [NL. *cynapium* (see def.) + *-in*[2].] An oil of uncertain composition obtained from fool's-parsley, *Æthusa Cynapium.* It has a strong odor and reddish-yellow color.

Cynareæ (si-nā'rē-ē), *n. pl.* [NL., < *Cynara* + *-eæ.*] A tribe of plants of the family *Asteraceæ*, typified by the genus *Cynara;* the thistle family; same as *Cynaroideæ. Cynareæ* is the proper form of the tribal name.

cynarrhodion, cynarrhodium, *n.* Erroneous forms often used for *cynorrhodon* or *cynorrhodium.*

cyniatria (sin-i-ą-trī'ą), *n.* [Gr. *κύων* (*κυν-*), dog, + *ἰατρεία*, medical treatment.] Investigation and treatment of diseases of the dog.

cyniatrics (sin-i-at'riks), *n.* [Gr. *κύων*, dog, + *ἰατρικός*, < *ἰατρός*, physician: see *iatric.*] Same as ★*cyniatria.*

cynipidean (si-ni-pid'ē-an), *a.* Of or belonging to the hymenopterous family *Cynipidæ*, the gall-flies.

cynism (sin'ism), *n.* Same as *cynicism. Thirlwall. N. E. D.*

cynoctonine (si-nok'tō-nin), *n.* [Gr. *κυνόκτονον*, aconite, (neut. of *κυνόκτονος*, killing dogs (< *κύων* (*κυν-*), dog, + *-κτονος*, < *κτείνειν*, kill), + *-in*[2].] An amorphous, bitter alkaloid, $C_{36}H_{55}O_{13}N_2$, found in *Aconitium septentrionale.* It is poisonous, producing tonic-clonic spasms.

cynodonichthys (sin″ō-don-ik′this), *n.* [NL., < Gr. *κυνόδους* (*κυνόδοντ-*), canine tooth, + *ἰχθύς*, fish.] A genus of fishes of the family *Pœciliidæ* found in fresh waters of Mexico.

cynodont (sī′nō-dont), *n.* [Gr. *κυνόδους*, a canine tooth, < *κύων* (*κυν-*), dog, + *ὀδούς* (*ὀδοντ-*), tooth.] A member of the reptilian suborder ★*Cynodontia*.

On the other hand, like the *cynodonts*, they show a rudimentary secondary palate.
Amer. Nat., Feb. 1904, p. 103.

Cynodontia (sī-nō-don′ti-ạ), *n. pl.* [NL., neut. pl. of *Cynodus*, < Gr. *κυνόδους*, a canine tooth: see *cynodont*.] A suborder of anomodont reptiles of medium size, having the squamosal expanded, the quadrate reduced, and double occipital condyles: Owen's family *Cynodontia* (1876), raised to a suborder by Osborn (1903).

cynolatry (sī-nol′ạ-tri), *n.* [Gr. *κύων* (*κυν-*), dog, + *λατρεία*, worship.] Dog-worship.

cynology (sī-nol′ō-jï), *n.* [Gr. *κύων* (*κυν-*), dog, + *-λογία*, < *λέγειν*, speak.] The natural history of the dog.

Cynomoriaceæ (sī-nō-mō-ri-ā′sē-ē), *n. pl.* [NL. (Lindley, 1836), < *Cynomorium* + *-aceæ*.] A family of dicotyledonous archichlamydeous root-parasitic plants of fungoid habit, containing the genus *Cynomorium* only (which see). Lindley gave this name to the family *Balanophoraceæ* in which he and most other authors included this plant, but Engler, in 1897, removed it from that family and classed it in the order *Myrtales*, as a distinct family. See *rhizogen*.

cynomorphous (sī-nō-môr′fus), *a.* [Gr. *κυνόμορφος*, dog-shaped, < *κύων* (*κυν-*), a dog, + *μορφή*, form.] Resembling, or characteristic of, the Old World monkeys contained in the family *Cynopithecidæ* or *Cercopithecidæ*.

cynophilist (sī-nof′i-list), *n.* [Gr. *κύων* (*κυν-*), dog, + *φίλος*, loving, + *-ist*.] A lover of dogs. *N. E. D.*

cynophobia (sī-nō-fō′bi-ạ), *n.* [Also *kynophobia*; < Gr. *κύων* (*κυν-*), dog, + *-φοβία*, < *φοβεῖν*, fear.] **1.** Same as *lyssophobia*. — **2.** A morbid fear of dogs.

cynopic (sī-nop′ik), *a.* [Gr. *κυνώπης*, dog-eyed, < *κύων* (*κυν-*), dog, + *ὠψ* (*ὠπ-*), eye.] Dog-eyed; shameless. *Badham.* [Nonce-word.] *N. E. D.*

Cynthia, *n.* **4.** [*l. c.*] In *bot.*, the Virginia ★goat's-beard (which see).

cynurenic (sī-nū-ren′ik), *a.* [*cynur(ic)* + *-en* + *-ic*.] Obtained from the urine of dogs. — **Cynurenic acid**, a colorless compound, HOC_9H_5NCO $OH.H_2O$, contained in the urine of dogs fed with meat-fat. It crystallizes in silver, lustrous needles and when anhydrous melts at 257–258° C. Also called *hydroxyquinolinecarboxylic acid*.

cynuric (sī-nū′rik), *a.* [Gr. *κύων* (*κυν-*), dog, + *οὖρον*, urine.] Noting a crystalline acid, $CO_2H.C_6H_4NHCOCO_2H + H_2O$, which melts, when free from water, at 188–189° C., with decomposition. Also called *oxalylanthranilic acid*.

cynurine (sin′ū-rin), *n.* [*cynur(ic)* + *-ine*[2].] A colorless bitter compound, HOC_9H_6N, prepared by the fusion of cynurenic acid and also by the oxidation of cinchonine and certain related compounds. It crystallizes in lustrous, monoclinic, anhydrous prisms or, with $3H_2O$, in needles melting at 201° C. and 52° C. respectively. Also called *4-hydroxyquinoline*.

cyperoid (sī′pe-roid), *a.* [*Cyper-us* + *-oid*.] Resembling, allied to, or belonging to the plant-genus *Cyperus* or the family *Cyperaceæ*.

Cyphaspis (sī-fas′pis), *n.* [Gr. *κυφός*, bent, + *ἀσπίς*, a shield.] A genus of trilobites of the family *Proëtidæ*, having a short ovoid glabellum, broad cephalic margins, a variable number of thoracic segments, and a small pygidium. It occurs in the Silurian and Devonian rocks.

cyphophthalmid (sī-fof-thal′mid), *a.* Having the characters of or belonging to the family *Cyphophthalmidæ*.

Cyphosomatidæ (sī″fō-sō-mat′i-dē), *n. pl.* [NL., < *Cyphosoma*(*t-*) + *-idæ*.] A family of regular ectobranchiate *Echinoidea*, of the order *Diademoida*. They have the ambulacral plates compounded, with 3 to 7 pore-plates in an arc; the adoral, supraoral, and sometimes also the aboral plates primaries, and the remaining constituents demi-plates. It is typified by the extinct genus *Cyphosoma*, the only living genus being *Glyptocidaris*.

cyphotic (sī-fot′ik), *a.* [*cyphosis* (*-ot-*) + *-ic*.] Humpbacked: usually *kyphotic*.

cypress[1], *n.* — **Alaska cypress, Alaska gound-cypress**, the yellow cedar, *Chamæcyparis Nootkatensis*. See *yellow*. — **Arizona cypress**, *Cupressus Arizonica*, a tree of the mountains of Arizona and northeastern Mexico, sometimes attaining a height of 70 feet, with the trunk very large in proportion to the height. The wood is light and soft. The tree is occasionally cultivated for ornament. — **California mountain cypress**. Same as *MacNab's* ★*cypress*. — **Chilean cypress**, a tall, stately tree, *Libocedrus tetragona*, of the Chilean Andes and Patagonia, with a straight trunk sometimes 120 feet high, and soft, white, light, resinous wood, which is durable under ground and is much used for railway-ties in Chile. This species, together with the Chilean cedar (*Fitzroya Patagonica*), is recommended for planting in swampy mountain-moors of the temperate zones. The name *alerce* is often applied to both of them, as well as to *Libocedrus Chilensis*. — **Dwarf cypress**. Same as *cypress-moss*. See *heath-cypress*. — **Flowering cypress**. See *tamarisk*, 1. — **Gowen cypress**, *Cupressus Goveniana*, a tree of the California coast regions, sometimes 50 feet high and 2 feet in diameter, with light, soft wood: sometimes cultivated for ornament. — **Ground-cypress**, the *lavender-cotton* (which see, under *cotton*[1]). — **Guadalupe cypress**. Same as *Arizona* ★*cypress*. — **MacNab's cypress**, *Cupressus Macnabiana*, a small bushy tree of interior California, occasionally 30 feet high and over a foot in diameter, with light, fine-grained wood. It is occasionally planted for ornament in southwestern Europe. — **Mexican cypress, Mexican bald cypress**, *Taxodium Mexicanum*. See *Taxodium*. — **Monterey cypress**. See *cypress*[1], 1. (*a*) The Monterey cypress is a tree 60 or 70 feet high, with a trunk very large for its height, usually 2–3 feet in diameter, but exceptionally 6 feet. Its slender erect branches form in old trees a broad flat-topped crown. The wood is hard, fine-grained and durable. This tree is remarkable

Monterey Cypress (*Cupressus macrocarpa*).
(From Sargent's "Silva.")

for its very restricted range, being confined to an area about two miles long and 200 yards wide on the California coast south of the Bay of Monterey, extending from Cypress Point to the shores of Carmelo Bay, with a small grove on Point Lobos. It is now nearly extinct in its native habitat, but fortunately it thrives well in cultivation, and has been introduced throughout the Pacific coast region from Lower California to Vancouver Island, also to some extent in the southeastern United States, and extensively in southern and western Europe, in South America, and in Australia and New Zealand. — **Montezuma cypress**, an individual tree of the Mexican cypress of historic note. See *Taxodium*. — **Nootka cypress, Nootka Sound cypress**. Same as *Alaska* ★*cypress*. — **Pond-cypress**, a subspecies of the bald cypress, *Taxodium distichum imbricarium*, regarded by some as a distinct species, growing in or around ponds, swamps, and shallow streams, from the Dismal Swamp to Florida and Alabama. It is distinguished from the typical bald cypress by its smaller size and acicular leaves, and is more frequently cultivated in the northern United States and in Europe than the type form. — **Red-bark cypress**. Same as *Arizona* ★*cypress*. — **Shasta cypress**. Same as *MacNab's* ★*cypress*. — **Southern, Virginia, Virginia swamp, water cypress**, local names of the *bald cypress*. — **Southern cypress**, the white cedar, *Chamæcyparis thyoides*. The bald cypress is also so called.

cypress-grass (sī′pres-gràs), *n.* A general name for plants of the genus *Cyperus*; galangal. See *Cyperus*.

cypress-vine, *n.* **2.** The climbing fumitory, *Adlumia fungosa*.

Cyprian vitriol. See ★*vitriol*.

Cypricardella (sip″ri-kär-del′ạ), n. [NL., < *Cypri(na)* + *Card(ium)* (genera of pelecypods) + *-ella*.] A genus of Devonian teleodesmaceous pelecypods having subquadrate concentrically lined valves, each bearing two cardinal teeth. Same as *Microdon*, 3.

Cypricardinia (sip″ri-kär-din′i-ạ), *n.* [*Cypri(na)* + *Card(ium)* (genera of pelecypods) + *-in* + *-ia*.] A genus of Devonian teleodesmaceous pelecypods having two small cardinal teeth in each valve and bearing concentric laminæ on the surface with a finer ornament between.

Cypricardites (sip″ri-kär-dī′tēz), *n.* [*Cypri(na)* + *Card(ium)* (genera of pelecypods) + *-ites*, E. *-ite*[2].] A Silurian genus of prionodesmaceous pelecypods of the family *Cyrtodontidæ*, with subequal valves bearing fine cardinal teeth.

Cypridina shales, in South Devon, the Rhineland, and Westphalia, the uppermost division of the marine Devonian, profusely abundant in the ostracode crustacean *Cypridina* or *Entomis*.

cypridinoid (si-prid′i-noid), *n.* and *a.* **I.** *n.* A fish belonging or allied to the family *Cypridinidæ*.

II. *a.* Having the characters of the *Cypridinidæ*.

cypriferous (sip-rif′e-rus), *a.* [*Cypris* + L. *ferre*, bear.] Containing the tests of the ostracode crustacean *Cypris*.

Cypro-Mycenæan (sī″prō-mi-sē-nē′ạn), *a.* Relating to both Cyprus and Mycenæ; noting relics of the Mycenæan age found in Cyprus. See ★*Mycenæan*.

Cyproniscidæ (sip-rō-nis′i-dē), *n. pl.* [NL., < *Cyproniscus* + *-idæ*.] A family of isopod crustaceans, parasitic on *Ostracopoda*, typified by the genus *Cyproniscus*.

Cyproniscus (sip-rō-nis′kus), *n.* [NL., < *Cypris* + Gr. *ὀνίσκος*, a wood-louse (see *Oniscus*).] The typical and only genus of the family *Cyproniscidæ*. *Kossmann*, 1884.

Cypro-Phenician (sī″prō-fē-nish′ạn), *a.* Of or pertaining to the civilization brought to Cyprus by the Phenicians. Colonies were established in Cyprus by Phenicians at an early period, and the earliest Phenician inscriptions have been found there.

Cypselid (sip′se-lid), *n.* [Gr. *Κυψελίδαι*, pl., < *Κύψελος*, Cypselus.] A descendant of Cypselus, tyrant of Corinth. The Cypselids dedicated the chest of Cypselus at Olympia.

cypselous (sip′se-lus), *a.* [*cypsela* + *-ous*.] Having the character of a cypsela; bearing cypselæ.

cyrillaceous (sir-i-lā′shius), *a.* Belonging to the plant family *Cyrillaceæ*.

cyroplane (sir′ō-plān), *n.* [Gr. *κῦρος*, security (?), + E. *plane*.] A special form of tripod-head for photographic cameras or surveyors' planetables, by which the plane of the table can be adjusted to be normal to any line, and free adjustment horizontally or in azimuth be subsequently made without changing the position of the normal: useful in taking panoramas by photography. The usual ball-and-socket mounting is retained, but in addition a conical axis in the ball gives a separate adjustment without disturbing the ball.

cyrtean (sèr′tē-ạn), *a.* [Gr. *κυρτός*, convex, + *-e-an*.] Noting that type of vertebra in which both faces of the centrum are convex. *Wieland*, 1899.

Cyrtia (sèr′ti-ạ), *n.* [NL. < Gr. *κυρτός*, curved.] A Paleozoic genus of *Brachiopoda* resembling *Spirifer*, but having a high suberect cardinal area and perforated deltarium.

Cyrtina (sèr-tī′nạ), *n.* [NL., Gr. *κυρτός*, curved, + *-ina*[1].] A Paleozoic genus of brachipods in general aspect like *Spirifer*, but having a median septum in the ventral valve which supports the convergent dental plates or spondylium.

cyrtiniform (sèr-tin′i-fôrm), *a.* Having the form and aspect of *Cyrtina*, an extinct genus of brachiopods.

cyrtocephalus (sèr-tō-sef′ạ-lus), *n.* [NL. < Gr. *κυρτός*, curved, convex, + *κεφαλή*, head.] In *anthrop.*, a cranium which has a convexity, extending from the frontal and parietals to the vertex, resembling a protuberance. *G. Sergi* (trans.), Var. of the Human Species, p. 55.

cyrtoceracone (sèr-tō-ser′ạ-kōn), *n.* [Gr. *κυρτός*, curved, + *κέρας*, horn, + *κῶνος*, cone.] In the nautiloid cephalopods, a shell curved, like *Cyrtoceras*, on both venter and dorsum.

Cyrtochoanites (sèr″tō-kō-ạ-nī′tēz), *n. pl.* [NL., < Gr. *κυρτός*, curved, + *χόανος*, a funnel, + *-ιτης*, E. *-ite*[2].] A Paleozoic suborder of the nautiloid cephalopods, including forms with straight or curved shells variously ornamented and with simple sutures, the siphuncle tubular or nummuloidal and the siphonal funnels short and bent outward.

cyrtocœlian (sèr-tō-sē′li-ạn), *n.* [Gr. *κυρτός*, curved, + *κοῖλος*, hollow.] Having that type of vertebra in which the anterior face of the centrum is convex and the posterior concave: convexo-concave. *Wieland*, 1899.

cyrtocone (sèr′tō-kōn), *n.* [Gr. *κυρτός*, curved, + *κῶνος*, a cone.] In the nautiloid cephalopods, a curved form of the young shell replacing or succeeding the more primitive orthocone.

Cyrtodonta (sèr-tō-don′tạ), *n.* [NL., < Gr. *κυρτός*, curved, + *ὀδούς* (*ὀδοντ-*), a tooth.] A genus of prionodesmaceous *Pelecypoda*, typical of the *Cyrtodontidæ* and having rounded heavy shells, narrow cardinal area, from 2 to 4 curved cardinal teeth, and strong lateral teeth. It is of Silurian age.

cyrtograph (sèr′tō-gràf), *n.* [Gr. *κυρτός*, curved, convex, + *γράφειν*, write.] Same as *cyrtometer*.

cyrtoid (sėr'toid), *a.* [Gr. *κυρτοειδής*, < *κυρτός*, curved, arched, convex, + *εἶδος*, form.] Humpbacked. *Syd. Soc. Lex.*

Cyrtoidida (sėr-toi'di-dä), *n. pl.* [NL., < *Cyrtoides* (< Gr. *κυρτός*, curved, + *εἶδος*, form) + *-ida.*] An order of nassellarian *Radiolaria* having a helmet-shaped shell without a saggittal furrow. It includes the families *Tripocalpidæ*, *Anthocyrtidæ*, *Podocampidæ*, and others.

Cyrtolites (sėr-tō-lī'tēz), *n.* [NL., < Gr. *κυρτός*, curved, + *λίθος*, stone.] A genus of Silurian rhipidoglossal gastropod mollusks of the family *Bellerophontidæ*, having widely umbilicate keeled shells without peripheral slit and with strong transverse ribs or lamellæ.

cyrtometer, *n.* **2.** An instrument for measuring the shape or size of the head.

Cyrtomium (sėr-tō'mi-um), *n.* [NL. (Prese, 1836), referring to the curved veins, < Gr. *κύρτωμα*, curvature, < *κυρτοῦν*, make curved, < *κυρτός*, curved.] A small genus of rigid, simply pinnate polypodiaceous ferns allied to *Polystichum*, from which it differs by its freely anastomosing venation. There are about 6 species, all Asiatic, of which *C. falcatum*, *C. caryotideum*, and *C. Fortunei* are commonly cultivated in greenhouses.

Cyrtonotus (sėr″tō-nō'tus), *n.* [Gr. *κυρτός*, curved, + *νῶτος*, the back.] A genus of short and thicked-shelled *Pelecypoda*, allied to *Astarte* and characterized by the broad cardinal surface, with one strong tooth on each valve. It is of Devonian age.

cyrtopia (sėr-tō'pi-ą), *n.*; pl. *cyrtopiæ* (-ē). [NL., < Gr. *κυρτός*, curved, + *ὤψ* (*ὠπ-*), eye, face.] A schizopod crustacean in a larval stage, in which the antennæ are transformed and no longer serve for locomotion, and the posterior pairs of thoracic and abdominal feet and the gills appear.

cyrtoplatyan (sėr-tō-plat'i-an), *a.* [Gr. *κυρτός*, curved, + *πλατύς*, flat, + *-an.*] Having the anterior face of the vertebral centrum convex and the posterior face flattened; convex-plane. *Wieland*, 1899.

cyrtosis (sėr-tō'sis), *n.* [NL., < Gr. *κύρτωσις*, curvedness, humpbacked condition, < *κυρτοῦν*, curve, arch, hump, < *κυρτός*, curved, arched, convex.] Spinal curvature.

Cyrtospadix (sėr-tō-spā'diks), *n.* [NL. (C. Koch, 1853), < Gr. *κυρτός*, curved, + *spadix*, in reference to the curved middle part of the spadix in the type species, *C. striatipes.*] A genus of monocotyledonous plants of the family *Araceæ*. See *Caladium*, 2.

cyrtostyle (sėr'tō-stīl), *a.* and *n.* [Gr. *κυρτός*, curved, + *στῦλος*, pillar, column (see *style*[2]).] **I.** *a.* Having columns arranged in a generally curvilinear plan: said of a portico, or a part of one, which has a rounded horizontal projection.

II. *n.* A portico having a rounded projection; or, by extension, a building furnished with such a portico.

cyst, *n.* **5.** (*a*) The resistant coating formed by the parent organism previous to sporulation and inclosing the spores, in *Sporozoa*. (*b*) In *Sporozoa*, the common envelop surrounding the two associated gametocytes. (*c*) The resistant covering secreted by many *Infusoria* previous to going into a resting-stage, or before fission, or for the purpose of resisting draught or other unfavorable conditions of environment.—**Dentigerous cyst,** a dermoid cyst in which a tooth has developed.—**Inclusion cyst,** a cyst which results from the inclosure in tissue of one origin of an islet of tissue of different origin.—**Meibomian cyst.** Same as *chalazion.*—**Mother-cyst.** See ★*mother-cyst.*—**Nabothian cysts,** small nodules formed by retention of the mucous secretion in the Nabothian follicles.—**Parent-cyst.** Same as ★*mother-cyst.*—**Pilliferous cyst,** a dermoid cyst which contains hair.—**Serous cyst.** Same as *hygroma.*

cystal (sis'tal), *a.* [*cyst* + *-al*[1].] Pertaining to or derived from a cyst.—**Cystal residuum,** the surplus of protoplasm remaining after the formation of the gametes in the gametocyte of *Sporozoa*, and serving for the nutrition of the sporoblasts during their further development.

cystamine (sis'ta-min), *n.* [Gr. *κύστις*, bladder, + *amine.*] Same as ★*uritone.*

cystatrophy (sis-tat'rō-fi), *n.* [Gr. *κύστις*, the bladder, + *ἀτροφία*, atrophy.] Atrophy of the bladder.

cystauchenitis (sis″tâ-kē-nī'tis), *n.* [NL., < Gr. *κύστις*, bladder, + *αὐχήν*, neck, + *-itis.*] Inflammation at the neck of the bladder.

cystectomy (sis-tek'tō-mi), *n.* [Gr. *κύστις*, bladder, + *ἐκτομή*, excision.] Excision of the urinary or gall-bladder, or of a cyst.

cystein (sis'tē-in), *n.* [Gr. *κύστις*, bladder, + *-e-* + *-in*[2].] An organic sulphur body which is closely related to cystin. On oxidation it yields cysteinic acid, and this, in turn, taurin.

cysteinic (sis-tē-in'ik), *a.* Pertaining to or derived from cystein.—**Cysteinic acid,** an oxidation product of cystein, $C_3H_7NSO_5$. By loss of CO_2 cysteinic acid gives rise to taurin.

cystencyte (sis'ten-sīt), *n.* [Gr. *κύστις*, bladder, + *ἐν*, in, + *κύτος*, a hollow (a cell).] One of the large vesicular cells of which cystenchyma is composed. *W. J. Sollas.*

Cystic canal. Same as *cystic duct* (which see, under *duct*).—**Cystic degeneration.** See ★*degeneration.*

cysticercosis (sis″ti-sėr-kō'sis), *n.* [NL., < *cysticercus* + *-osis.*] An infection with bladder-worms or larval tapeworms (cysticerci) of the genus *Tænia*. *Cysticercosis* of man is caused by *Cysticercus cellulosæ*; of cattle, by *C. bovis* and *C. tenuicollis*; and of hogs, by *C. cellulosæ* and *C. tenuicollis.*

cysticolous (sis-tik'ō-lus), *a.* [Gr. *κύστις*, bladder (cyst), + L. *colere*, inhabit.] Inhabiting a cyst: specifically applied to certain *Myzostomaria*. *Cambridge Nat. Hist.*, II. 334.

cysticotomy (sis-ti-kot'ō-mi), *n.* [*cystic* + Gr. *-τομια*, < *ταμεῖν*, cut.] Incision into the cystic duct of the liver.

cystidean, *n.* **II.** *a.* Pertaining to or having the characters of the *Cystidea*.

cystigerous (sis-tij'ę-rus), *a.* [Gr. *κύστις*, bag (cyst), + L. *gerere*, bear.] Bearing or containing cysts; cystic: as, *cystigerous* growths.

cystinemia (sis-ti-nē'mi-ą), *n.* [NL. *cystinæmia*, < *E. cystin* + Gr. *αἷμα*, blood.] Presence of cystin in the circulating blood. Also *cystinæmia.*

cystinuria (sis-ti-nū'ri-ą), *n.* [NL. *cystinuria*, < E. *cystin* + Gr. *οὖρον*, urine.] Excretion of cystin in the urine.

cystinuric (sis-ti-nū'rik), *a.* [*cystinuria* + *-ic.*] Relating to or affected with cystinuria.

cystiphragm (sis'ti-fram), *n.* [Gr. *κύστις*, a bladder, + *φράγμα*, partition.] One of the curved partitions which divide transversely the zoœcia of the trepostomatous *Bryozoa*: contrasted with the *diaphragms* or flat partitions.

cysto-adenoma (sis″tō-ad-e-nō'mą), *n.*; pl. *cysto-adenomata* (-ma-tą). [Gr. *κύστις*, bladder, + NL. *adenoma.*] A gland tumor which contains cysts.

cystocarcinoma (sis″tō-kär-si-nō'mą), *n.*; pl. *cystocarcinomata* (-ma-tą). [NL., < Gr. *κύστις*, bladder, + NL. *carcinoma.*] A cancerous growth which contains cysts.

cystocarpium (sis-tō-kar'pi-um), *n.*; pl. *cystocarpia* (-ą). Same as *cystocarp.*

Cystocidaroida (sis″tō-sid-ą-rō'i-dä), *n. pl.* [NL., < **Cystocidaris* (< Gr. *κύστις*, a bladder, + *κίδαρις*, a Persian head-dress) + *εἶδος*, shape.] An order of primitive *Palæchinoidea* regarded as transitional to the *Cystoidea* and characterized by an exocyclic test, narrow and straight ambulacra, with 4 vertical rows of plates each with a central pair of pores, broad interambulacra, numerous scale-like echinate plates, periproct posterior, and mouth with well-developed jaws. It is of Silurian age.

Cystodictya (sis-tō-dik'ti-ą), *n.* [NL., < Gr. *κύστις*, a bladder, + *δίκτυον*, a net.] A Paleozoic genus of cryptostomatous bryozoans, typical of the family *Cystodictyonidæ*.

Cystodictyonidæ (sis″tō-dik-ti-on'i-dē), *n. pl.* [NL., < *Cystodictyon* + *-idæ.*] A Paleozoic family of cryptostomatous *Bryozoa* in which the zoaria consist of several rows of cells grown together back to back, forming flat, branching fronds; primitive cells with tubular vestibules, and superficial aperture with a lunarium; and interzoœcial spaces with vesicular tissue.

Cystoflagellata (sis″tō-flaj-e-lā'tą), *n. pl.* [NL., < Gr. *κύστις*, bladder (cyst), + NL. *Flagellata.*] An order of mastigophoran *Protozoa*. It contains individuals of large size with a single nucleus, reticular protoplasm, a stout membrane, and 2 flagella, one of which is modified into a long tentacle, while the other is small, and contained within the gullet. It includes two genera, both marine: *Noctiluca* (which see), and *Leptodiscus*. Same as *Rhynchoflagellata.*

cystogen (sis'tō-jen), *n.* [Gr. *κύστις*, bladder (cyst), + *-γενης*, -produced.] Same as ★*uritone.*

cystoid, *a.* **II.** *n.* One of the structures produced by the swelling of a functionless pollen-tube within the ovarian cavity of plants.

cystomatous (sis-tom'ą-tus), *a.* [*cystoma*(*t-*) + *-ous.*] Relating to, containing, or complicated by a cystoma.

cyston (sis'tōn), *n.* [NL. *cyston*, < Gr. *κύστις*, bladder.] One of the dactylozoöids of *Siphonophora*, modified for excretory purposes. *Sedgwick*, Text-book of Zoöl., I. 151.

Cystonectæ (sis-tō-nek'tē), *n. pl.* [NL., < Gr. *κύστις*, bladder (cyst), + *νήκτης*, swimmer.] A group of siphonanthous *Siphonophora* having a large apical pneumatophore without nectocalyces or bracts, the pneumatocyst having an apical stigma. The gasterozoöids are generally numerous and arranged either on the lower side of the pneumatophore or on a long tubular cœnosarc. It includes the *Physaliidæ* and several other families.

cystonectous (sis-tō-nek'tus), *a.* Having the characters of the *Cystonectæ*.

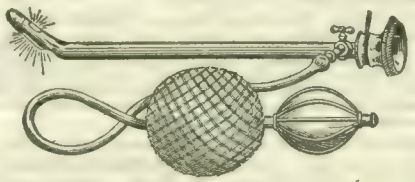
cystonula (sis-ton'ū-lą), *n.*; pl. *cystonulæ* (-lē). [NL., dim. of *cyston*, cyston.] The youngest larva of the *Physaliidæ*. It has a float and one siphon with a tentacle hanging below it.

cystopexy (sis'tō-pek-si), *n.* [Gr. *κύστις*, a bladder, + *πῆξις*, a fixing.] In *surg.*, an operation for the fixation of a prolapsed bladder to the anterior abdominal wall.

cystophore (sis'tō-fōr), *n.* [Gr. *κύστις*, bladder (cyst), + *-φορος*, < *φέρειν*, bear.] **1.** The stem or stalk which bears the cysts in the *Myxobacteriaceæ*.

Finally a condition is reached in which the stem or *cystophore*, as it may be conveniently called, is terminated by one or more rounded masses of very similar dimensions. *Thaxter*, in Bot. Gazette, XVII. 391.

2. Same as *ascophore.* *Jackson*, Glossary.



cystophthisis (sis-tof'thi-sis), *n.* [NL., < Gr. *κύστις*, bladder, + *φθίσις*, consumption: see *phthisis.*] Tuberculosis of the bladder.

cystoproctostomy (sis″tō-prok-tos'tō-mi), *n.* [Gr. *κύστις*, bladder, + *πρωκτός*, anus, + *στόμα*, mouth.] In *surg.*, an operation for the establishment of a permanent communication between the bladder and the rectum.

cystosarcoma (sis″tō-sär-kō'mą), *n.*; pl. *cystosarcomata* (-ma-tą). [Gr. *κύστις*, bladder, + *σάρκωμα*, sarcoma.] A sarcoma which contains cysts.

cystoschisis (sis-tos'ki-sis), *n.* [NL., < Gr. *κύστις*, bladder, + *σχίσις*, cleaving.] Congenital fissure of the bladder.

cystoscope (sis'tō-skōp), *n.* [Gr. *κύστις*, bladder, + *σκοπεῖν*, view,] A hollow tube illuminated

Cystoscope, with bulb attachment for inflating the bladder.

by an electric light, employed to bring into view the interior of the bladder.

Alterations in the internal vesical orifice as demonstrated by the stone-searcher and *cystoscope.* *Therapeutic Gazette*, Feb. 15, 1903, p. 74.

cystoscopic (sis″tō-skop'ik), *a.* [*cystoscop-y* + *-ic.*] Relating to cystoscopy or the cystoscope; obtained by use of the cystoscope. *Med. Record*, June 13, 1903, p. 952.

cystoscopical (sis-tō-skop'i-kal), *a.* Same as ★*cystoscopic.*

cystoscopy (sis-tos'kō-pi), *n.* [Gr. *κύστις*, bladder, + *-σκοπια*, < *σκοπεῖν*, view.] Inspection of the interior of the bladder by means of the cystoscope. *Med. Record*, June 13, 1903, p. 952.

cystosore (sis'tō-sōr), *n.* [Gr. *κύστις*, bladder (cyst), + *σωρός*, a heap.] In *bot.*, a group or heap of resting-spores within a cell, as in the fungus *Woronina.*

cystospasm (sis'tō-spazm), *n.* [Gr. *κύστις*, bladder, + *σπασμός*, contraction: see *spasm.*] Spasmodic contraction of the walls of the bladder. *V. Krafft-Ebing* (trans.), in Alien. and Neurol., Feb., 1903, p. 29.

cystospore (sis'tō-spōr), *n.* [Gr. *κύστις*, bladder (cyst), + *σπορά*, seed (spore).] In *bot.*, same as *carpospore.*

cystostomy (sis-tos'tō-mi), *n.* [Gr. *κύστις*, bladder, + *στόμα*, mouth.] In *surg.*, an operation for the establishment of a permanent opening into the bladder.

cystotrachelotomy (sis″tō-trā-kē-lot'ō-mi), *n.* [Gr. *κύστις*, bladder, + *τράχηλος*, neck, + *-τομία*, < *ταμεῖν*, cut.] In *surg.*, incision through the neck of the bladder.

cystozoöid (sis-tō-zō′oid), *n.* [G. κύστις, bladder (cyst), + *zoöid.*] The enlarged body-like anterior portion of the proscolex of certain *Cestoidea*, as *Dipylidium caninum*. See ★*acanthozoöid*. *Villot.*

cyst-pearl (sist′pėrl), *n.* See ★*pearl.*

cyst-worm (sist′wėrm), *n.* A bladder-worm.

cytase (sī′tās), *n.* [Gr. κύτος, a hollow (a cell), + E. *-ase.*] An enzym which ferments cellulose; found in germinating seeds, certain fungi, and possibly in some animal secretions. See ★*complement*, *n*, 8.

The views advanced by Bordet and others of the French school regarding the union of the amboceptors with the cells to be destroyed are less precise than those of Ehrlich. Both, however, recognize the importance of an association of the amboceptor as a condition for the effective action of the complement (*cytase*).
Med. Record, Feb. 14, 1903, p. 249.

cytaster (sī-tās′tėr), *n.* [Gr. κύτος, a hollow (a cell), + ἀστήρ, star.] In *cytol.*, the star-like radiation seen at either pole of the karyokinetic spindle during the division of a cell.

Cytherea (sith-ę-rē′ą), *n.* [NL. (Salisbury, 1812), < L. *Cytherea*, < Gr. Κυθέρεια, a surname of Aphrodite.] A genus of monocotyledonous plants of the family *Orchidaceæ*. See *Calypso*, 1.

Cytherella (sith-ę-rel′ą), *n.* [NL., < *Cythere* + *-ella.*] A genus of ostracode crustaceans or water-fleas, having elongate, smooth, bean-shaped valves, flanged on the hinge. They are commonly regarded as appearing in Silurian time and continuing to the present.

cytiau (kut′i-ou), *n. pl.* [W., pl. of *cwt*, a hut, cot, sty.] In *Eng. archæol.*, a name given to certain prehistoric stone huts in Wales, as those at Tre'r Ceiri. *Sci. Amer. Sup.*, Nov. 14, 1903, p. 23299.

cytoblast, *n.* 3. In *cytol.*: (*a*) The nucleus of the cell. *Schleiden*, 1838. (*b*) One of the hypothetical units of cell-structure. *Altmann*, 1890. (*c*) A naked cell; a protoblast. *Kölliker.*

Cytherea bulbosa. (L) House.
One half natural size.

cytoblastemal (sī″tō-blas-tē′mal), *a.* [*cytoblastema* + *-al*[1].] Of or pertaining to cytoblastema.

cytoblastemic (sī″tō-blas-tē′mik), *a.* Same as ★*cytoblastemal.*

cytochemism (sī-tō-kem′izm), *n.* [Gr. κύτος, a hollow (a cell), + E. *chemism.*] Same as ★*chemotaxis.*

cytochromatic (sī″tō-krō-mat′ik), *a.* In *cytol.*, of or pertaining to cytochromes, or to the appearance of specific, readily stainable substance in the cytoplasm of certain cells.

cytochrome (sī′tō-krōm), *a.* [NL. *cytochroma*, < Gr. κύτος, a hollow (a cell), + χρῶμα, color.] In *neurol.*, a name given by Nissl to the so-called 'granules,' or nerve-cells with scanty cytoplasm incompletely surrounding a small nucleus which does not exceed in size the nucleus of an ordinary leucocyte or neuroglia cell: opposed to ★*caryochrome* cell which has a larger nucleus.

cytochylema (sī-tō-kī-lē′mą), *n.* [NL., < Gr. κύτος, a hollow, (a cell), + χυλός, juice, + *-ema.*] Same as ★*cytolymph.*

cytochyma (sī-tō-kī′mą), *n.* [Gr. κύτος, a hollow (a cell), + χύμα, liquid.] The fluid contents of the vacuoles found in cell-protoplasm.

cytoclasis (sī-tok′la-sis), *n.* [NL., < Gr. κύτος, a hollow (a cell), + κλάσις, breaking, < κλᾶν, break.] Necrotic destruction of cells.

cytoclastic (sī-tō-klas′tik), *a.* [Gr. κύτος, a hollow (a cell), + κλαστός, < κλᾶν, break.] Relating to cytoclasis.

cytocyst (sī′tō-sist), *n.* [Gr. κύτος, a hollow (a cell), + κύστις, a bladder (a cyst).] A schizont inclosed in a membrane, as in the sporozoan blood-parasite *Lankestrella.*

cytoderm (sī′tō-dėrm), *n.* [Gr. κύτος, a hollow (a cell), + δέρμα, skin.] Same as *cytioderm.*

cytodiagnosis (sī″tō-dī-ag-nō′sis), *n.* [Gr. κύτος, a hollow (a cell), + διάγνωσις, diagnosis.] Diagnosis based upon a study of the cell-contents of the fluids of the body, especially of the cerebrospinal fluid. *Lancet*, May 30, 1903, p. 1535.

cytodieresis (sī″tō-dī-er′e-sis), *n.* [Gr. κύτος, a hollow (a cell), + διαίρεσις, a division.] In *cytol.*, cell-division, both direct (amitosis) and indirect (mitosis, karyokinesis).

cytodieretic (sī″tō-dī-e-ret′ik), *a.* Of or pertaining to cytodieresis, or cell-division.

cytogenic (sī-tō-jen′ik), *a.* 1. Same as *cytogenous.*—2. Concerning or pertaining to cytogenesis or the subject-matter of the science of cytology.

cytogeny, *n.* 2. Cell-lineage; the series of cells which intervenes between an embryonic cell and the tissues or organs or parts of the body which ultimately arise from it.

The relationship of the inner and outer layers in the various forms of gastrulas must be investigated . . . by tracing out the cell-lineage or *cytogeny* of the individual blastomeres from the beginning of development.
E. B. Wilson, in Biol. Lectures, 1894, p. 2.

cytoglobin (sī-tō-glō′bin), *n.* [Gr. κύτος, a hollow (a cell), + E. *glob(ulin)* + *-in*[2].] A cell globulin.

cytohyaloplasm (sī-tō-hī′ą-lō-plazm), *n.* [NL. *cytohyaloplasma*, < Gr. κύτος, a hollow (a cell), + ὑαλος, glass, + πλάσμα, anything formed.] In *cytol.*, the reticular or alveolar substance of the cell-cytoplasm as opposed to the more liquid cytochylema or cytolymph.

cytohyaloplasma (sī-tō-hī″ą-lō-plaz′mą), *n.* [NL.] Same as ★*cytohyaloplasm.*

cytohydrolist (sī-tō-hī′drō-list), *n.* [Gr. κύτος, a hollow (a cell), + E. *hydrol(ysis)* + *ist.*] An enzym which attacks and breaks up the cell-wall by hydrolysis.

cytohydrolytic (sī″tō-hī-drō-lit′ik), *a.* [Gr. κύτος, a hollow (a cell), + E. *hydrolytic.*] Relating to or of the nature of intracellular hydrolytic ferments.

cytolist (sī′tō-list), *n.* [*cytol(ysis)* + *-ist.*] An enzym which dissolves the cell-wall.

cytologic (sī-tō-loj′ik), *a.* Of or pertaining to cytology or cells.

cytological (sī-tō-loj′i-kal), *a.* Same as ★*cytologic.*

cytologist (sī-tol′ō-jist), *n.* One who studies cells or cytology.

cytology (sī-tol′ō-ji), *n.* [Gr. κύτος, a hollow (a cell), + *-λογία*, < λέγειν, speak.] The study of the structure and functions of the cells of animals and plants; especially, the study of the cells of the human body, and of the significance of changes in their form and location in disease.

cytolymph (sī′tō-limf), *n.* [Gr. κύτος, a hollow (a cell), + L. *lympha*, clear water.] In *cytol.*, the more liquid substance contained in the reticulum or alveoli of the cell-cytoplasm. Also called *cytochylema* and *hyaloplasma.*

cytolysin (sī-tol′i-sin), *n.* [*cytolys(is)* + *-in*[2].] Same as ★*cytotoxin.*

cytolysis (sī-tol′i-sis), *n.* [Gr. κύτος, a hollow (a cell), + λύσις, dissolution.] In *pathol.*, the destruction or degeneration of cells.

cytolytic (sī-tō-lit′ik), *a.* Relating to cytolysis; having cell-destroying properties.

cytomachia (sī-tō-mak′i-ą), *n.* [Gr. κύτος, a hollow (a cell), + μάχη, fight.] 'Cell-fighting'; a rhetorical name referring to the apparent struggle for mastery between pathogenic micro-organisms and the protective cells of the body. *Buck*, Med. Handbook, III. 534.

cytometer (sī-tom′e-tėr), *n.* [Gr. κύτος, a hollow (a cell), + μέτρον, a measure.] Any device used in counting cells: employed frequently in the special sense of *hemacytometer.*

cytomicrosome (sī-tō-mī′krō-sōm), *n.* [Gr. κύτος, a hollow (a cell), + μικρός, small, + σῶμα, body.] In *cytol.*, one of the minute bodies which are supposed to make up the cytoplasm of the animal and plant cell.

cytomitoma (sī-tō-mī-tō′mą), *n.* Same as ★*cytomitome.*

cytomitome (sī-tom′i-tōm), *n.* [NL. **cytomitoma*, < Gr. κύτος, a hollow (a cell), + μίτος thread.] In *cytol.*, the reticulum which forms the more solid portion of the cytoplasm of the cell; the cytohyaloplasm.

cytomorphosis (sī-tō-môr′fō″sis), *n.* [NL., < Gr. κύτος, a hollow (a cell), + μόρφωσις, shaping.] In *biol.*, a general term for all the structural alterations which cells, or successive generations of cells, may undergo from the earliest undifferentiated stage to their final destruction. *Minot*, 1901.

cytophagy (sī-tof′ą-ji), *n.* [Gr. κύτος, a hollow (a cell), + *-φαγια*, < φαγεῖν, eat.] Same as *phagocytosis.*

cytophan (sī′tō-fan), *n.* [Gr. κύτος, a hollow (a cell), + *-φανής*, < φαίνεσθαι, appear.] The ovoid matrix surrounding the nucleus-like granules, or karyophans, in the strand of the contractile stalk of certain *Infusoria*, as *Zoöthamnium.*

cytopharynx (sī-tō-far′ingks), *n.* [NL., < Gr. κύτος, a hollow (a cell), + φάρυγξ, pharynx.] The gullet or esophagus of a protozoan, as a ciliate.

cytophil (sī′tō-fil), *a.* [Gr. κύτος, a hollow (a cell), + φίλος, loving.] In *cytol.*, having a disposition to combine with the receptor of a cell: a term applied to one group of amboceptors. *Wasserman* (trans.), Immune Sera, p. 18.

cytophilic (sī-tof′i-lik), *a.* Same as ★*cytophil.*

Cytoplasmic bridge. In *cytol.*, a strand of protoplasm connecting two adjacent blastomeres during the early cleavage of the egg.—**Cytoplasmic cycle**, that stage in the life-cycle of a micro-organism during which it is living in the cytoplasm, or cell-body, of some cell of the host organism: distinguished from the *intranuclear cycle* or *stage.*

cytoplast (sī′tō-plast), *n.* [Gr. κύτος, hollow, (a cell), + πλαστός, formed.] In *biol.*, one of the hypothetical bodies or units of protoplasm in the cell.

cytoplastin (sī-tō-plas′tin), *n.* [Gr. κύτος, a hollow (a cell), + E. *plastin.*] The plastin of the cytoplasm of a cell.

cytoproct (sī′tō-prokt), *n.* [Gr. κύτος, a hollow (a cell), + πρωκτός, anus.] In *zoöl.*, the anus of a unicellular organism, such as an infusorian.

cytopsyche (sī-top-sī′kē), *n.* [NL. *cytopsyche*, < Gr. κύτος, a hollow (a cell), + ψυχή, mind.] The consciousness of the protoplasmic contents of a cell, according to the metaphysical system of E. Haeckel. *Haeckel* (trans.), Riddle of the Universe.

cytoreticulum (sī″tō-rē-tik′ū-lum), *n.*; pl. *Cytoreticula* (-lą). [Gr. κύτος, a hollow (a cell), + L. *reticulum*, a little net: see *reticulum.*] In *cytol.*, the network of more solid substance in the cytoplasm; the spongioplasm as distinguished from the more liquid ground substance, cytochylema or cytolymph. See cut under ★*cell.*

Cytoryctes (sī-tō-rik′tēz), *n.* [NL., < Gr. κύτος, a hollow (a cell), + ὀρύκτης, a digger, < ὀρύσσειν, dig, excavate.] The supposed protozoan organism of smallpox and vaccina; one of the vaccine-bodies. *Nature*, Aug. 4, 1904, p. 324.

cytosin (sī′tō-sin), *n.* [Gr. κύτος, a hollow (a cell), + *-ose* + *-in*[2].] A pyrimidin derivative ($C_4H_5ON_3$) of the nucleinic acids, from which it is obtained as a constant decomposition-product together with xanthin bases.

cytosoma (sī-tō-sō′mą), *n.*; pl. *cytosomata* (-ma-tą). [NL.] Same as ★*cytosome.*

cytosome (sī′tō-sōm), *n.* [NL. *cytosoma*, < Gr. κύτος, a hollow (a cell), + σῶμα, a body.] The body of a cell.

Cytospora (sī-tos′pō-rą), *n.* [NL. (Ehrenberg, 1818), < Gr. κύτος, a hollow (a cell), + σπορά, seed (spore).] A large genus of sphæropsidaceous fungi having allantoid, hyaline spores produced in irregular chambers in an erumpent stroma buried in the surface of the host. About 200 species have been described. They occur on the branches of woody plants, and many are regarded as the pycnidial condition of species of *Valsa*. Also incorrectly spelled *Cytispora.*

cytostasis (sī-tos′ta-sis), *n.* [NL., < Gr. κύτος, a hollow (a cell), + στάσις, standing.] Arrest of blood-corpuscles in the small vessels.

cytotactic (sī-tō-tak′tik), *a.* [*cytotaxis* (*-tact-*) + *-ic.*] Of or pertaining to the locomotion of cells in relation to other cells; exhibiting cytotaxis.

cytotaxis (sī-tō-tak′sis), *n.* [Gr. κύτος, a hollow (a cell), + τάξις, arrangement.] The movement of cells, or of cell-masses, in relation to one another. The approach of cells to one another is spoken of as *positive cytotaxis*, their withdrawal from one another as *negative cytotaxis.*

cytotherapy (sī-tō-ther′ą-pi), *n.* [Gr. κύτος, a hollow (a cell), + θεραπεία, medical treatment.] Same as ★*organotherapy* or ★*opotherapy.*

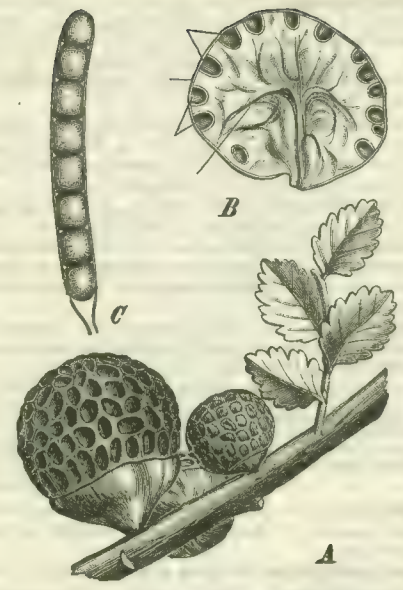
cytothesis (sī-toth′e-sis), *n.* [NL., < Gr. κύτος, a hollow (a cell), + θέσις, placing, arranging.] In

physiol., the regenerative or restorative change in a cell or neuron: the opposite of ★*cytolysis*.

cytotoxic (sī-tō-tok′sik), *a.* [Gr. *κύτος*, a hollow (a cell), + *τοξικόν*, poison (see *toxic*).] Effecting the destruction of cells: applied to the action of special cytotoxins.

cytotoxin (sī-tō-tok′sin), *n.* [*cytotox(ic)* + *-in*[2].] An adaptation-product which has specific toxic properties for the particular kind of cell which was used in immunization. Generally speaking, these bodies result on immunization with cells from a different species, and are specific. Autocytotoxins may, however, also be formed. The action of the cytotoxins depends upon the presence of a specific amboceptor and of a complement (see ★*complement*, 8) which is present in normal serum. Examples are the nephrotoxins, hepatotoxins, leucotoxins, etc. Also termed ★*cytolysin*.

cytotropic (sī-tō-trop′ik), *a.* [Gr. *κύτος*, a hollow (a cell), + *τρόπος*, a turning.] Of or pertaining to the growth or bending of cell-masses in relation to one another.



cytotropism (sī-tot′rō-pizm), *n.* [*cytotrop(ic)* + *-ism*.] The growing or bending of cell-masses, or of cells, toward or away from one another. See ★*cytotaxis*.

cytozoan (sī-tō-zō′an), *a.* and *n.* **I.** *a.* Having the characters of the *Cytozoa*.

II. *n.* One of the *Cytozoa*.

cytozoön (sī-tō-zō′on), *n.*; pl. *cytozoa* (-ȧ). [NL., < Gr. *κύτος*, a hollow (a cell), + *ζῷον*, an animal.] A protozoan parasite of the red blood-corpuscles.

Cyttaria (si-tā′ri-ȧ), *n.* [NL. (Berkeley, 1841), so named from the resemblance of the plants to a wasp's nest; < Gr. *κύτταρος*, honeycomb, wasp's nest.] A genus of discomycetous fungi having the ascomata sunken in the surface of a subspherical mostly stipitate stroma which is gelatinous when mature. About 6 species are known, mostly from Patagonia and Tierra del Fuego, where they are eaten by the natives. They grow upon living branches of beeches, species of *Nothofagus*. See *beech-fungus* and *mushroom*, 1.

Cyttaria.

A, *C. Gunnii* in different stages of development; *B*, *C*, *C. Harioti*; *B*, a longitudinal section through a stroma; *C*, a mature spore-case with spores. (From Engler and Prantl's "Pflanzenfamilien.")

Cyttariaceæ (si-tā-ri-ā′sē-ē), *n. pl.* [NL., < *Cyttaria* + *-aceæ*.] A family of ascomycetous fungi named from the single genus *Cyttaria*, and having the same general characters. See ★*Cyttaria*.

C. Z. An abbreviation of (Gould's) *Cordova Zones*. See ★*G. C. Z.*

czar, tsar, *n.*—**White Czar,** a name by which (or its equivalent) the Czar of Russia is known especially in Asia.

> The *White Tsar's* people call
> Aloud to the skies of lead:
> "We are slaves, not freemen:
> Ourselves, our children, our women—
> Dead, we are dead,
> Though we breathe, we are dead men all."
> *R. W. Gilder*, In the Heights,
> The White Tsar's People, i. 3.

czardom, tsardom (zär′dum, tsär′dum), *n.* The dominion, power, or office of a czar.

czarian, tsarian (zär′i-an), *a.* Of or pertaining to a czar.

> The growing influence of the Tsar in the affairs of other nations was conditioned by the same causes as the decline of the *Tsarian* System within the confines of Russia.
> *A. Ular*, Russia from Within, p. 1.

czarism, tsarism (zär′izm), *n.* Absolutism in government, such as that of the Czar of Russia. *A. Ular*, Russia from Within, p. 5.
